By comparison, ABC's circulation figures in St. Louis are closer—273,784 for the *Post-Dispatch* vs. 201,418 for the *Globe-Democrat*—although the gap has widened substantially during the past year. (See accompanying chart.) The *Post-Dispatch* carries about 80% of the advertising linage, Mr. Christopher says.

In Baltimore, the Sun newspapers pull in 82% of the ad linage, according to Media Records, and enjoy 90% of the advertising revenue.

The Boston numbers have not, however, discouraged the *Herald*, which cites a 19% linage increase for the year to date. The paper, which floundered under previous ownership, switching to broadsheet and back to tabloid, has undergone further revision since News America took over, including toning down its sometimes blunt, inflammatory headlines, and is receiving more favorable comment on its editorial product.

In an effort to expand beyond its blue-collar base, the paper began publishing the daily stock market listings, added an expanded Tuesday section, a Sunday business section, one-time special sections (such as one on Boston's new Catholic cardinal) and a weekly sports pullout section. By contrast, the *Globe* offers a regular special section every day of the week, and has been improving readability by tinkering with its layout and presentation, such as adding color highlights to the front page and experimenting with a new Sunday comics format.

The major battle in the struggle for survival is not going on within the editorial pages. Nor is a paper's politics a key to survival.

Source: Audit Bureau of Circulations, March 1985 report

Despite his newspaper's gains, Mr. Purcell isn't predicting that the *Herald*, which was losing about $1 million a month when News America took over, will soon—or ever—take the No. 1 position from the *Globe*.

"Our strategy is to continue growing," he says, emphasizing the readability of the *Herald's* tabloid format and its improved editorial. "We're very close to the break-even point now."

There is a sense of frustration in the 37-year-old *Herald* publisher, a veteran of the Murdoch organization. Despite the improved editorial product, promotions such as the classified contest, 13 weeks of tv advertising and dramatically improved circulation, widespread advertiser support has not followed automatically.

There is similar frustration at the conservative *Globe-Democrat*, which has not been able to capitalize either on Midwest conservatism in its battle with the liberal *Post-Dispatch* or on civic interest in maintaining two competing newspapers.

"Advertisers make an absolutely pure coldblooded market decision," says Richard Amberg Jr., *Globe-Democrat* general manager, who hasn't been able to woo conservative advertisers away from the *Post-Dispatch*.

Responsive readership is what advertisers demand, and the mainstay of the *Herald's* readership-building efforts is Wingo, Mr. Murdoch's bingo-like game. The question advertisers ask is whether Wingo delivers good readers or just builds circulation numbers.

"Wingo is like a drunk on a binge," says Robert Bergenheim, former *Herald* publisher under Hearst and now publisher of the *Boston Business Journal*, a weekly tabloid with a circulation of 42,000, according to Business Publications Audit of Circulation. "There's no way to get off [Wingo] without losing readers." People are buying the newspaper, he concludes, but they only read it to check their Wingo number.

Mr. Purcell disputes that. "Wingo gets people to change their normal reading habits," he says. "In that sense it is no different from any product-sampling promotion." Circulation, he says, does not drop off as each round of Wingo winds down.

The ultimate question isn't whether Wingo players are worthwhile and loyal readers, but whether, in this era of multimedia diversity, a city needs two daily newspapers.

Boston media planner Bill Hadley of The Hadley Co. definitely sees room for a competing daily in the Boston market. Citing daily metro-area household coverage figures, both newspapers combined only reach half the market, which he believes leaves a substantial opportunity.

The *Boston Business Journal* published its own late 1984 survey of the newspaper habits of Massachusetts residents, con-

(Continued on Page 20)

Alan Radding is ADVERTISING AGE*'s Boston correspondent.*

Focusing

(Continued from Page 19)

boosted the *Times'* San Diego circulation from about 18,000 when it entered the market to about 50,000 now.

Finally, last October, the *Times* created a separate edition for the San Fernando Valley, where 1.6 million people—one-fifth of the Los Angeles metropolitan area population—reside. Officials report daily circulation in the area rose 7,000 in the first three months and Sunday circulation jumped 9,000.

The *Times* has a total weekday circulation of 1,069,564, according to ABC; the paper reports a weekday circulation of 185,926 for its Valley edition.

Other metro newspapers, too, recently have taken steps to move beyond their traditional core areas.

The *Chicago Tribune*, for example, wants to reclaim its historic role as the paper of record for the Midwest.

Robert L. Dickey, marketing department manager, says the *Tribune* used to have wide influence in the Midwest, but it withdrew from that position in the 1970s while it concentrated on increasing penetration in its primary market area.

However, after watching *USA Today*, the *Wall Street Journal* and the *New York Times* carve out national niches, the *Tribune* now wants to make a comeback as an important player in the midsection of the country.

In April the *Tribune* began printing copies of its final edition in a satellite printing facility in Champaign, Ill., and trucking it to central and southern Illinois as well as central and western Indiana. It spent about $200,000 to promote itself to downstate readers.

The company says these expansion efforts are still experimental.

"Our goals aren't set in concrete," Mr. Dickey says. "We're testing the waters."

According to the latest ABC figures, the *Tribune* was selling about 87,000 dailies outside its primary eight-county area before it opened the satellite operation, and gains since then haven't amounted to much—less than 2,000 since April.

But Mr. Dickey says the paper is more interested in building image and prestige than hiking its numbers. "This tactic isn't for every newspaper," he says.

"For us it makes sense because we perceive ourselves as a major voice in the Midwest."

Meanwhile, the *Washington Times*, which last year announced grand plans for its national edition, continues to struggle with the concept. Larry Chandler, director-promotion and research, says a good market for the national edition exists, but he admits the current editorial product isn't quite what readers want.

"We're working on it," he says.

(Continued on Page 22)

Rivals

(Continued from Page 18)

ducted by area researchers the Becker Institute, which showed that two-thirds of the households in the state read the *Globe*. Some 28% of the state's households read the *Herald*, but 72% of those also read the *Globe*. That high level of duplication and the *Globe's* perceived stature as the journal of record make Mr. Bergenheim skeptical of predictions that the *Herald* soon will be profitable. In effect, Boston is not a two-newspaper city, he says.

Lee Slayton, vp-director of advertising and sales promotion for Jordan Marsh, a leading Boston department store chain owned by Allied Stores and one of the largest local advertisers, does see a niche for the *Herald*, however.

Significant portions of the market cannot be delivered by just one newspaper, he says, even one as dominant as the *Globe*.

While giving News America's Boston organization an "A for effort" in improving the newspaper and applauding the circulation increase, Mr. Slayton watches carefully the source of the circulation increases. In his store's effort to target more upscale consumers, Mr. Slayton wants to see the *Herald* increase its circulation beyond the core city to include more of the affluent suburbs. The challenge facing Mr. Purcell is to do that without abdicating his position with the blue-collar reader.

There is more to a two-newspaper city than just having two surviving newspapers, says J. Kendrick Noble, first vp and newspaper industry analyst at Paine Webber Mitchell Hutchins, New York, in assessing the Boston newspaper situation. The second newspaper must be in the hands of someone aggressive. "The *Globe* is awesome in its dominance of the market," Mr. Noble says, yet he is "impressed by what Murdoch has done in Boston."

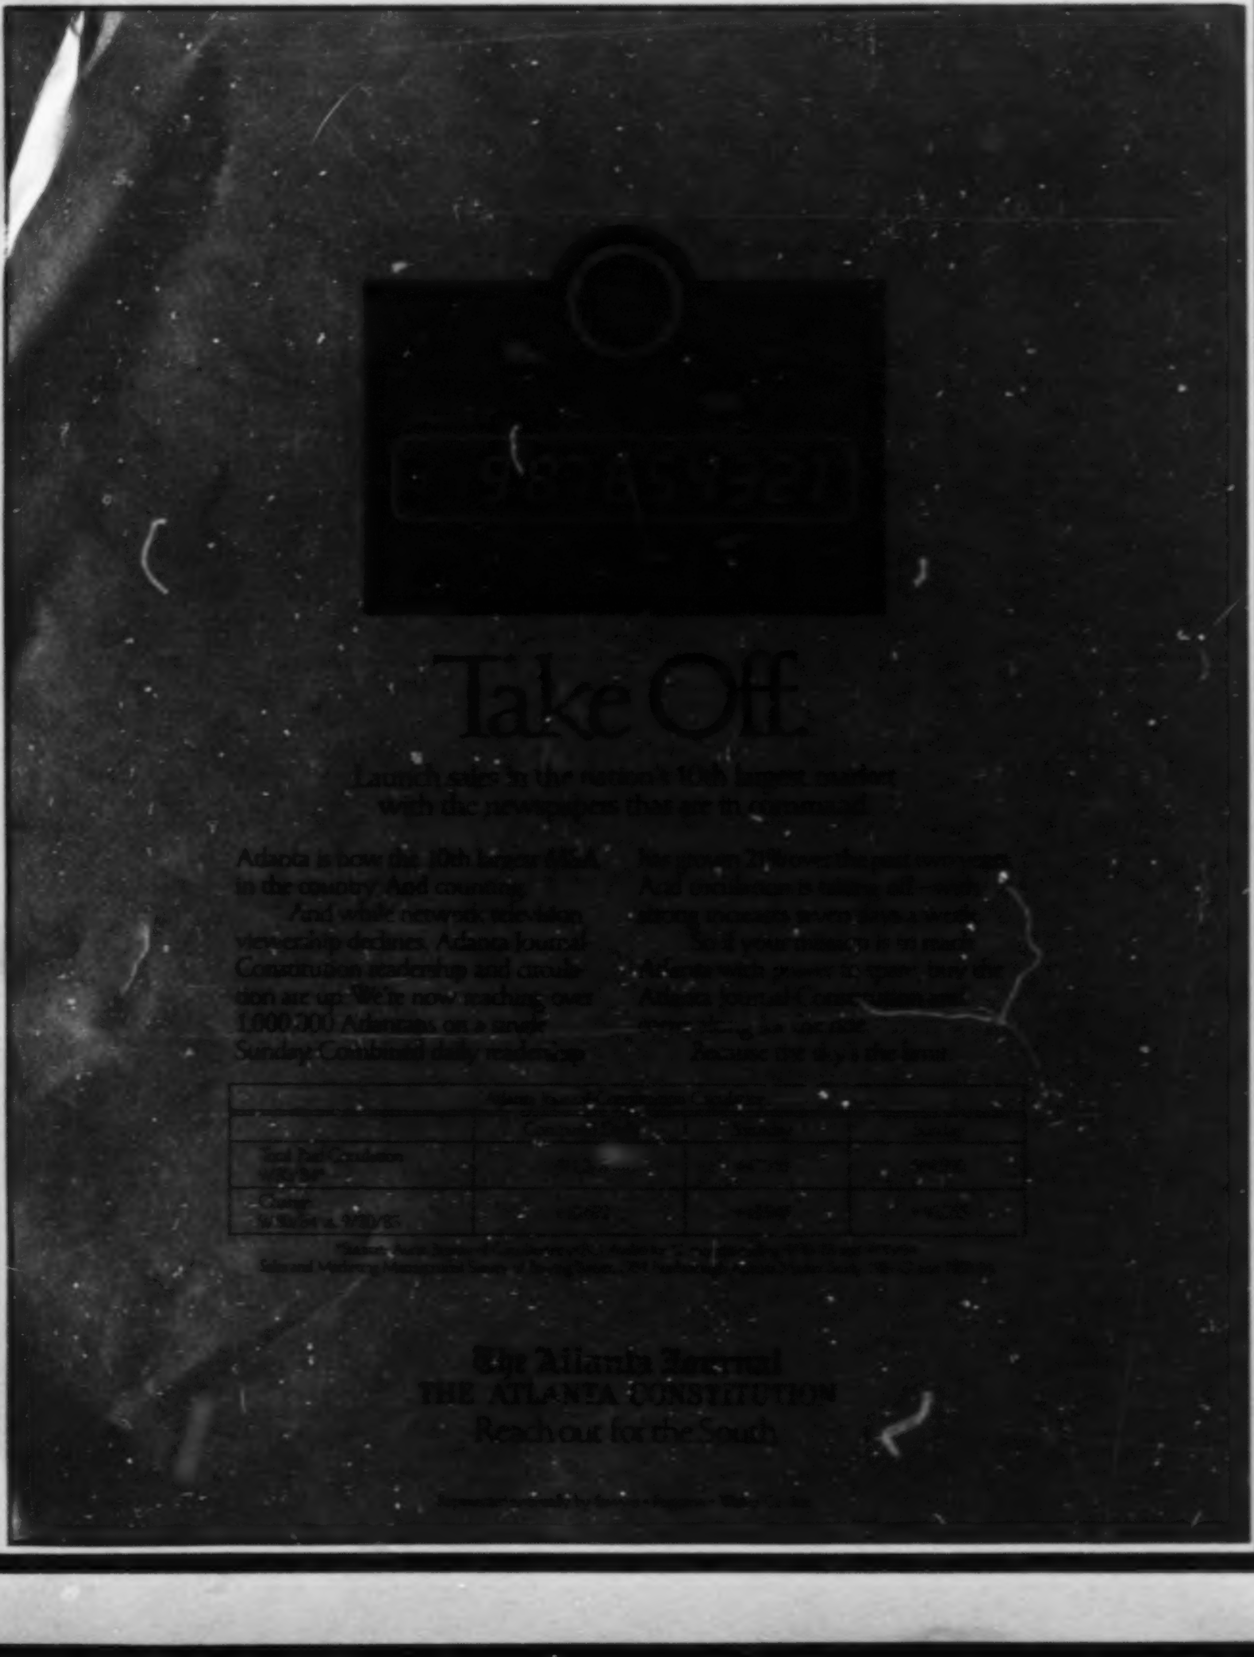
Mr. Noble believes the future success of Boston as a two-newspaper city may lie in today's lopsided situation, which allows for a quality newspaper as the market leader, but leaves an opportunity for an aggressive competitor such as the *Herald* to carve out a specific niche.

If the *Herald* doesn't succeed, there already are others waiting for a chance. Mr. Bergenheim toys with the idea of taking his *Boston Business Journal* daily to skim off the very highest demographic audience. The Boston *Phoenix*, a successful alternative weekly, persistently is rumored to be waiting for the chance to go daily with what now would be considered a yuppie newspaper.

"If the situation were closer, you could have both newspapers hurting," Mr. Noble says, and quality would suffer all around.

The competition is good for Boston, agrees Mr. Guiggio. The presence of an aggressive rival keeps the business growing and keeps the *Globe* on its toes.

Just like in the movies.



Take Off.

Launch sales in the nation's 10th largest market with the newspapers that are in command.

Atlanta is now the 10th largest SMSA in the country. And counting.

And while network television viewership declines, Atlanta Journal-Constitution readership and circulation are up. We're now reaching over 1,000,000 Atlantans on a single Sunday. Combined daily readership [illegible]

Aggressive stance transforms classified ad sales

By Van Wallach

Jangling telephones are nothing new for newspaper classified ad departments. Traditionally, sales staffs would field calls and take orders; today, those staffs are just as likely to place calls as they work the phones to dig up new accounts.

"We're not sitting around, and we are much more aggressive than we were 10 years ago," says Dan Buckley, advertising director-classifieds for the *Atlanta Journal* and *Constitution*. "We used to be ad takers and wait for the calls to come in. Now we have people who do nothing but call out looking for business."

That vigor, new classified formats and the continuing use of the latest technology have combined to give classifieds new luster in newspaper ad circles.

"Classifieds are ceasing to be the little agate ads in the back," says Jerry R. Hayes, classified advertising manager of the *Arizona Republic* and *Phoenix Gazette*. "We've become full-blown advertising sales sections."

Necessity forced managers into that stance. They point to 1980 as the start of the evolution, as the souring economy hurt classified spending.

"Classifieds feel it first in a recession," says Eric Anderson, vp-classified advertising for the New York-based Newspaper Advertising Bureau. "Interest rates affect home buying and auto sales." (Auto dealers and real estate agents represent two key classified categories, along with employment ads.)

But aggressiveness and a healthy economy seem to have turned the numbers around. Total revenues from classifieds rose almost 25% in both 1983 and 1984, according to NAB.

Always considered a profit center for newspapers, classifieds now contribute more than ever to ad revenues; NAB numbers give classifieds a 31.4% share of total industry ad revenues in 1984, compared with 1975's 26.2%.

Changes in those "little agate ads" take many forms; indeed, Mr. Anderson barely can track the profusion of special sections, bannered pages and themed booklets now appearing.

USA Today joined the fray by introducing daily classified display ads in February and agate ads in April. The classified section previously ran weekly. "Our sales pitch is it's a national medium with a rate base of 1.3 million," says Lise Chin, director-classified advertising for Gannett Co.'s paper, which reports circulation of 1,162,606, according to ABC.

The ads are anchored in the back pages of *USA Today's* Life section. Ms. Chin says the department's toll-free phone number receives 2,300 inquiries a week for categories that include real estate, travel, business opportunities and career recruitment. A travel page with a cou-

Monitoring the personal touch

Bars are meat markets. Health and fitness clubs can cost an arm and a leg. Office romances are risky. Frustration and anxious parents loom.

Enter the personal ad.

It isn't a new concept, but in recent years personal ads have gained new respectability as a way to pursue romance in the efficiency-minded 1980s. Readers and advertisers reply to whom they choose; cool selectivity is the name of the game.

Classified ad managers themselves are choosy. They rigorously oversee the propriety of the personal ads—if they run them at all. After all, nobody wants his paper to reflect a sleazy image.

Eric Anderson, vp-classified advertising for the Newspaper Advertising Bureau, New York, says, "Some papers stopped running personals, but some kept them and tracked the contents to keep out the 'working women.'"

Art Kurek, classified advertising manager of News America Corp.'s *New York Post*, reads every one of the 80 to 100 personals carried in the *Post's* Friday entertainment section. "They are tasteful in tone and content," he says. "I make sure there's no innuendo."

The *Post* started taking personals of the romance and "I miss you" ilk in May and accepts only heterosexual messages. The minimum cost during an ongoing introductory period is $18 for three lines of copy and a *Post* box number. Readers submit prepaid ads on a coupon the *Post* runs every day with the polite reminder, "No abbreviations, please."

As a group, the *Post* personals receive about 1,000 replies per week from a weekday circulation base of 901,313, according to Audit Bureau of Circulations. Says Mr. Kurek, "I've had people call me to comment on the high quality of their responses."

The *Post's* coupon touts its

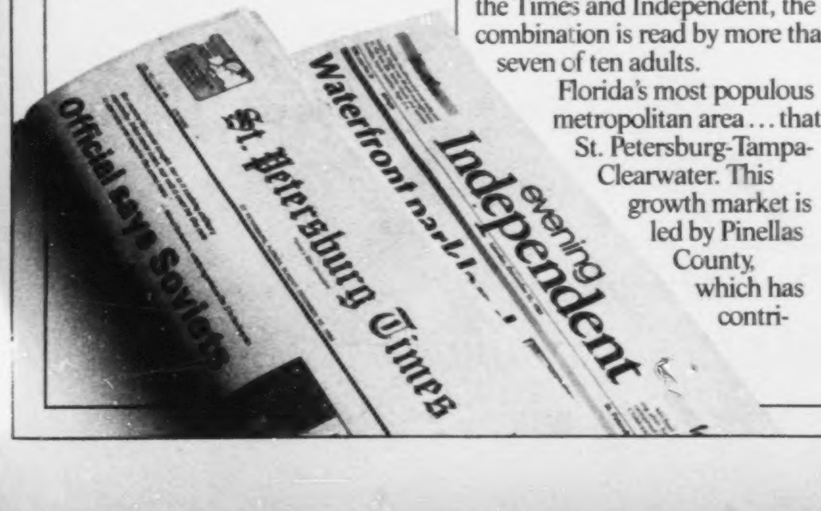
The growing media in the growth market.

Since 1982, the St. Petersburg Times has gained almost eleven thousand in circulation ... making it the largest daily between Miami and Washington, D.C.

Within the market area, the Times has a Sunday circulation of 342,800. Weekdays, the St. Petersburg Times and Evening Independent have a combined circulation of 305,363 and a readership of 646,500 ... unmatched penetration. In fact, within Pinellas County, home of the Times and Independent, the combination is read by more than seven of ten adults.

Florida's most populous metropolitan area ... that's St. Petersburg-Tampa-Clearwater. This growth market is led by Pinellas County, which has contributed the largest number of newcomers over the past three years, and leads neighboring Hillsborough County (Tampa) by almost 90,000 in total population.

So call your Times and Independent representative today ... and get in on the growth.



St. Petersburg Times

pon ran March 7 and drew more than 19,000 responses; it will run again in October. A Christmas catalog page will appear in August.

One of the industry's most active programs, however, is in Phoenix. Mr. Hayes' program for the *Republic* and *Gazette*, which represent a combined daily circulation of 450,698, currently includes:

- Quarterfolds, the industry term for booklets half the size of a tabloid. The two papers run five per year on topics such as "Summer Fun," "Home Improvement" and "To Your Health."
- "CityLife," an entertainment weekly mostly distributed free in downtown Phoenix and on college campuses. A June issue ran six pages of classifieds.
- "Real Estate Showcase & Rental Guide," a monthly quarterfold distributed through the newspaper and on racks at a local supermarket chain.
- Mini-classified sections appearing in three zoned editions.

Mr. Hayes says the newspapers' classified ad counts are running 5% ahead of last year's full-run total of more than three million.

Like Mr. Hayes, Mr. Buckley of the Atlanta *Journal* and *Constitution* says his papers get new business through his telemarketing staff. One group does prospecting only, especially among service businesses, companies looking to hire and schools. The sales staff scours local and national publications to find companies running help-wanted ads. They note job titles, such as engineering, in which Atlanta has a large labor pool.

"We'll call, say, aircraft companies and tell them we have [so many] structural engineers in metro Atlanta, and sell them on the paper," he says. "We found we can sell a help-wanted ad."

For the past five years, the *Journal* and *Constitution* have run business-to-business classifieds. The section isolates classifieds for services, data processing, machinery, equipment, and commercial and industrial real estate. That last category especially benefits from the special treatment, Mr. Buckley says. Classifieds for office space and industrial property will get noticed by "businessmen who may not see them in the regular classifieds." This section runs with the daily business pages.

It all adds up to growth. Mr. Buckley quotes 1984 statistics of 31.7 million lines (up 23.8%) and 3.2 million ads (up 15.5%). Through May, linage had increased 12.4% and ads 11.2% in 1985. The *Journal* and *Constitution* reported a combined daily circulation of 420,156, according to ABC's March 31 figures.

In recent years classified managers also have relied on technology to keep their departments nimble. Late last year Times Mirror Co.'s *Los Angeles Times* installed 325 Zentec "intelligent" terminals—at about $3,500 each—in three production plants and 12 branch offices. Don Clark, classified director, says the move allowed the far-flung operations to work on the same deadlines because ads go via phone lines to other computers.

Mr. Hayes soon will supplement his automatic call distributor, which forwards calls to the next available salesperson, with a management information system. That will gather data on the length of time callers must wait, number of calls abandoned and the time of the calls. This will help him schedule his 85-person telephone staff.

"Managers are getting more technologically oriented," he says. "We've got 114 terminals, and we also do electronic pagination, which assembles classifieds a page at a time."

The *Times* reports a weekday circulation of 1,069,054, according to ABC.

Mr. Anderson of the NAB sees investments such as these as a trend in classified ad departments.

Forecasting a 10% to 12% increase in industrywide classified revenues this year, he thinks observers can discern much about a newspaper through its classifieds. "They're a key to the success of a paper," he says. "Without healthy classifieds you don't have a healthy newspaper."

Using that yardstick, the newspaper industry is in excellent health, indeed. ■

---

program with the headline, "The classic romance is waiting for you in Personals!" Other papers are more oblique. Times Mirror Co.'s *Los Angeles Times* soon will start "Common Interests."

"It gives people interested in computers or Shakespeare or art a good way to meet," says Don Clark, classified director. The *Times* won't run personals as such, however.

This spring the *Arizona Republic/Phoenix Gazette* launched "Meeting People [where singles meet]" in its "CityLife" entertainment weekly. The ads use abbreviations, but otherwise aim for a low-key tone. "Phoenix is more conservative than New York or San Francisco," says Jerry Hayes, classified ad manager.

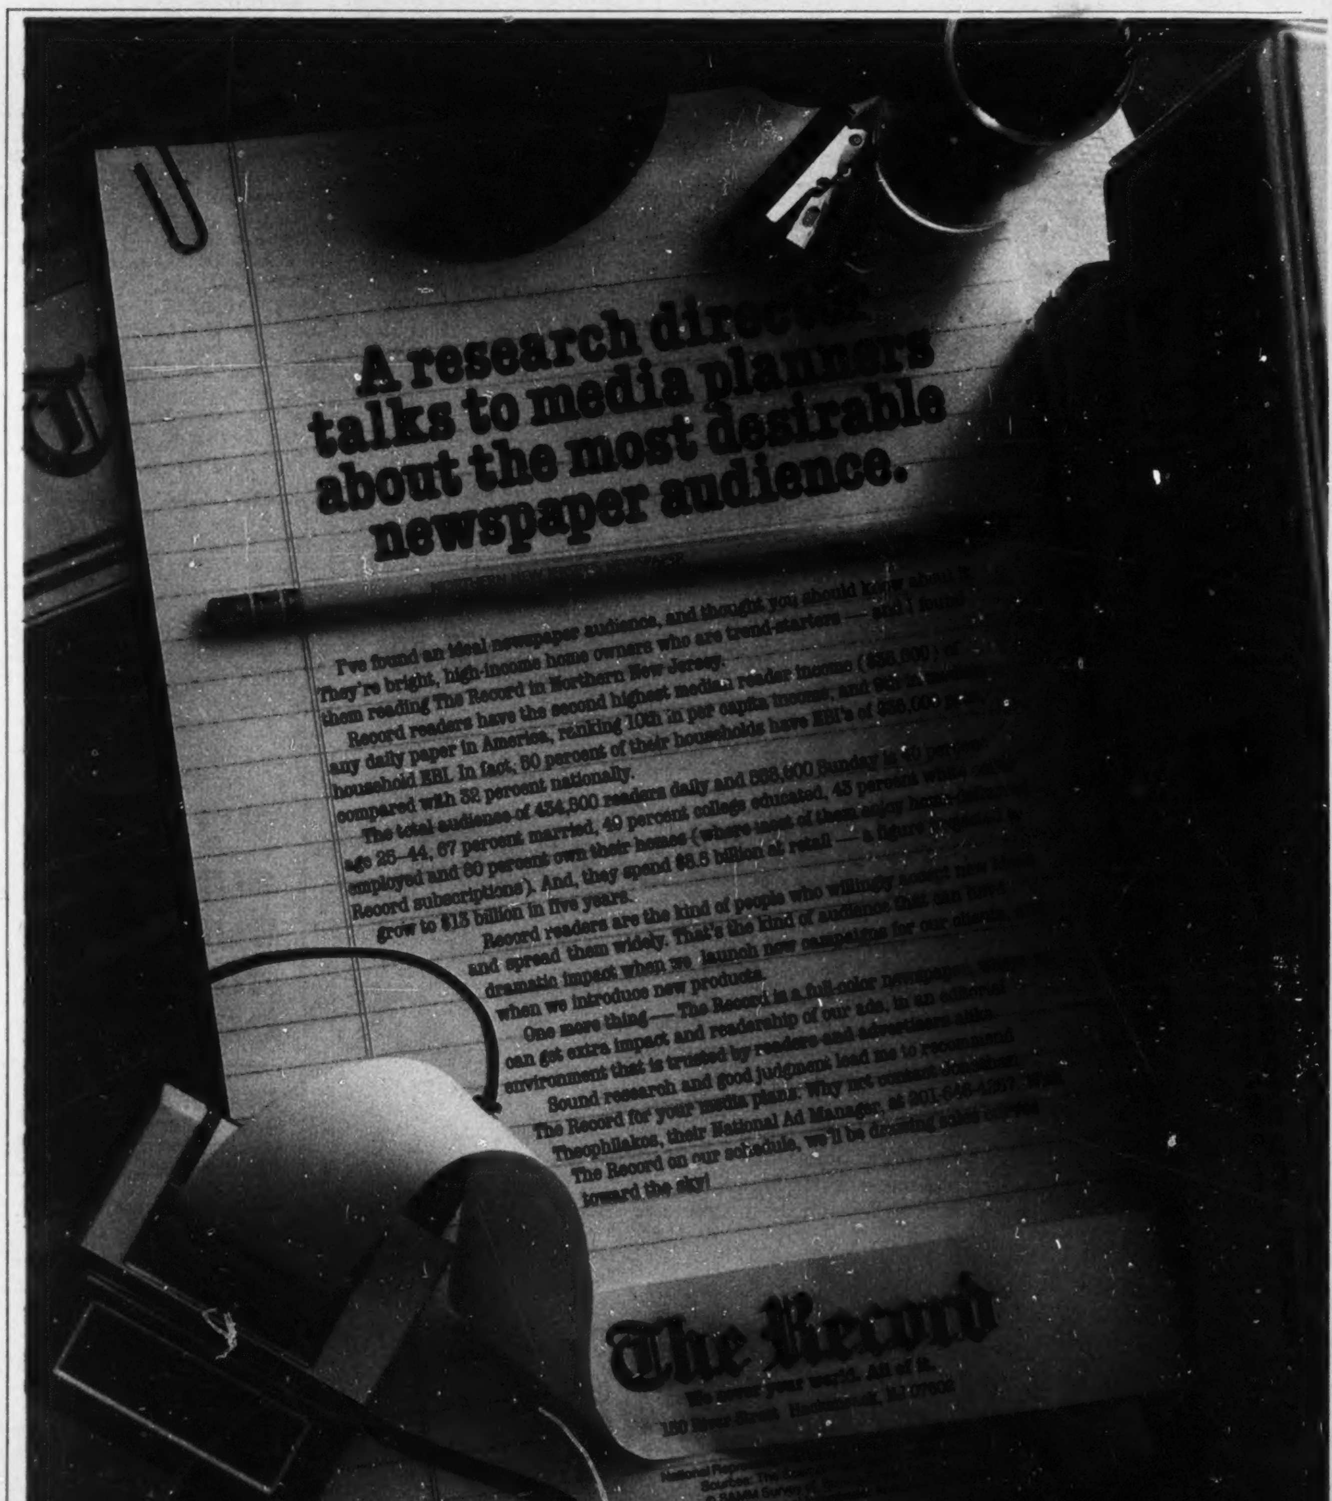
But people wanting coast-to-coast market penetration might consider the Wednesday personals in *USA Today*. The section kicked off April 24 as a combination dating service/birthday card/welcome committee. Categories are "Let's Be Friends," "Happy Days," "Hello There," "Have a Nice Day" and "Message for You."

Lise Chin, director-classified advertising for Gannett Co.'s Washington-based paper, says readers suggested *USA Today* add personals.

Rates are $15 a line, with a four-line, $15 minimum for a box; credit cards are okay. Standards are high: No abbreviations, and the paper reserves the right to reject any ad.

Ms. Chin closely follows the results, and says an average ad gets 15 replies in the first week.

"We call people back to see what the response was," she says. "We're looking for the great success story." —*V.W.*



A research director talks to media planners about the most desirable newspaper audience.

[illegible]

I've found an ideal newspaper audience, and thought you should know about it. They're bright, high-income home owners who are trend-starters — and I found them reading The Record in Northern New Jersey.

Record readers have the second highest median reader income ($36,000) of any daily paper in America, ranking 10th in per capita income, and 9th in [illegible] household EBI. In fact, 50 percent of their households have EBI's of $35,000 [illegible] compared with 32 percent nationally.

The total audience of 434,800 readers daily and 558,600 Sunday is 40 percent [illegible] age 25–44, 67 percent married, 49 percent college educated, 43 percent white [illegible] employed and 80 percent own their homes (where most of them enjoy home-delivered Record subscriptions). And, they spend $8.5 billion at retail — a figure [illegible] grow to $13 billion in five years.

Record readers are the kind of people who willingly accept new [illegible] and spread them widely. That's the kind of audience that can [illegible] dramatic impact when we launch new campaigns for our clients, [illegible] when we introduce new products.

One more thing — The Record is a full-color newspaper, [illegible] can get extra impact and readership of our ads, in an editorial environment that is trusted by readers and advertisers alike.

Sound research and good judgment lead me to recommend The Record for your media plans. Why not contact [illegible] Theophilakos, their National Ad Manager, at 201-646-4297? [illegible] The Record on our schedule, we'll be drawing sales curves toward the sky!

The Record
We cover your world. All of it.

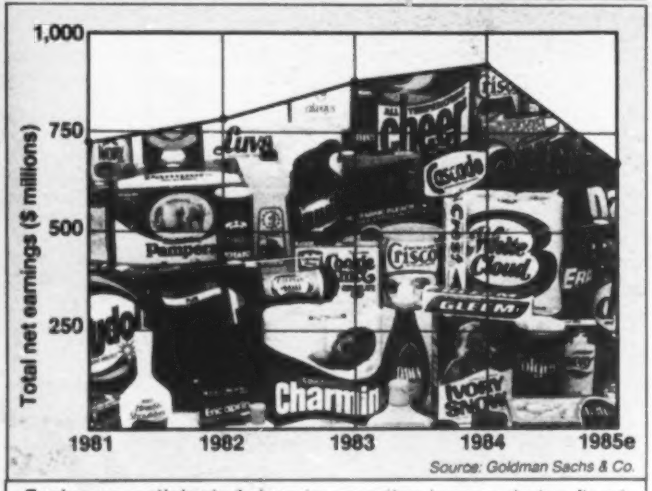
Procter & Gamble net earnings



Source: Goldman Sachs & Co.

Facing an anticipated drop in operating income during fiscal 1985, especially in personal care products, Procter & Gamble is expected by industry analysts to announce a decline in earnings for the first time in 33 years.

Wounded lion?

Trail of mistakes mars P&G record

By NANCY GIGES and LAURIE FREEMAN

Procter & Gamble next month will report the company's first annual earnings decline in 33 years.

The last time the nation's leading national advertiser suffered such a reversal was 1952. Harry Truman was president then, the Dodgers were still in Brooklyn, Rocky Marciano was the world heavyweight boxing champion and Gary Cooper won an Oscar for his performance in "High Noon."

P&G's earnings decline that year was 19%, and this year's drop, to be announced Aug. 8, is likely to be even more dramatic—somewhere in the range of 25% for the company's fiscal 1985, which ended June 30.

For P&G, fiscal '85 was "like Chinese water torture, as they've watched their earnings decline drop by drop," says First Boston analyst Daniel Meade.

Smith Barney paper-goods analyst George Adler adds that fiercer competition has left P&G in the position of "a wounded lion"—ready to fight back to protect its territory and offspring.

Despite suggestions that the decline reflects P&G's "new" willingness to spend heavily on new products, there's no camouflaging mistakes that the Cincinnati-based marketing giant has made in key areas.

In pivotal markets producing what analyst Jack Salzman calls "megapools of profit"—chiefly disposable diapers and toothpaste and, to a lesser extent, laundry detergents—P&G's efforts faltered just when the company most needed revenues to push forward into major new areas of opportunity, namely cookies, orange juice, soft drinks and feminine-protection products, analysts say.

An ADVERTISING AGE review of P&G's far-flung operations shows that not all areas were troublesome for the company. Some large categories, such as paper, coffee, shortenings and oils, which had heated competition as recently as a year ago, have quieted down.

Still, they didn't produce enough income to keep earnings on

(Continued on Page 50)

Defections to 'Parade' rain on 'USA Weekend'

By WILLIAM F. GLOEDE

NEW YORK—Here's a late score from the tumultuous newspaper Sunday-magazine war: *Parade* 129, *USA Weekend* 11.

Rosslyn, Va.-based Gannett Co.'s purchase of *Family Weekly* and its subsequent metamorphosis into *USA Weekend* (AA, July 1, *et seq*) have dramatically changed the Sunday-magazine field. The change has seemingly put Advance Publications' *Parade* in a dominant competitive position, and is casting some doubt on the future of the Sunday Magazine Network.

As a result of decisions by many newspapers to switch to *Parade* when *USA Weekend* debuts, *Parade's* circulation will climb by roughly 4.5 million, to 29.8 million, effective with the Sept. 22 issue. Since Gannett formally unveiled its revamped product, *Parade* has gained a total of 145 new subscribers—129 papers that formerly carried *Family Weekly* and 16 others.

USA Weekend gained 38 newspapers, 11 of which—all Gannett-owned—are switchers, dropping *Parade* Sept. 8. Of the 27 other papers, none of which carried *Parade*, 10 have more than 100,000 circulation, including the *Dallas Times Herald, Denver Post, Des Moines Register, Cincinnati Enquirer, Rochester Democrat & Chronicle, Nashville Tennessean* and the Westchester Rockland group. Of those, all but the Dallas and Denver papers, which are Times Mirror Co. properties, are owned by Gannett.

The defections to *Parade* from *Family Weekly/USA Weekend* are being made as a result of non-Gannett newspaper chains, as well as some independently owned papers, being unhappy with *USA Weekend's* similarity to Gannett's national daily *USA Today*. Among the chains switching their allegiance en masse: New York Times Co., eight; Thomson Newspapers, 23; Cox Enterprises, seven, and Donrey Media Group, 10.

As a result of the switches, Gannett has lowered *USA Weekend's* circulation rate base to "about" 12 million from original estimates of 13 million. Others in the Sunday-magazine field believe the rate base will have to be lowered into the 10 million-to-11 million range.

Ramon Gaulke, president of *USA Weekend*, said, "There's a realignment going on. We expect to be delivering the same circulation as before except of a higher quality.

"Nobody here was surprised by the fact that a number of smaller newspapers were frightened by the product," he said. "We have no desire to shove an un-

$40M for Commodore's Amiga

By BRIAN MORAN

Commodore International Ltd. will move to win a skeptical audience of consumers and computer dealers with a two-tiered, $40 million ad campaign and a 37-market tour of retailers for its new Amiga home computer.

Commodore, the troubled West Chester, Pa.-based computer giant, will break a "short term" awareness effort for the Amiga in early September, to be followed up "very quickly" by a second campaign highlighting the machine's applications, said Robert Trukenbrod, Commodore vp-marketing. Media will include network tv, radio and print ads via Ted Bates Advertising/New York.

Because the effort will seek to establish Amiga as a new brand in the sagging home computer segment, Commodore's name and familiar logo will be downplayed in the advertising, Mr. Trukenbrod said.

Commodore is counting on the $1,300 Amiga machine, developed by its subsidiary, Amiga Corp., Santa Clara, Cal., to stem its multi-million-dollar losses. The machine's price, flashy color graphics and stereo capability will be positioned against Apple Computer's Macintosh in a dogfight for Christmas season sales. Also expected to introduce a new machine for the Christmas season is Commodore's former chairman, Jack Tramiel, now with Atari Corp.

Commodore's four-week barnstorming tour of dealerships, to begin next month, will seek to soothe lingering hard feelings among computer retailers, Mr. Trukenbrod said. Under Mr. Tramiel, Commodore pulled its hot-selling C-64 product out of computer specialty stores and shifted it to price-conscious mass merchandisers like K mart Corp.

The "new" Commodore is promising the Amiga will be available exclusively to computer dealers. The company plans to rely on mass merchandisers to handle the C-64 and its soon-to-be-introduced successor, the more powerful C-128, Mr. Trukenbrod said.

"There are some [dealers] who are skeptical because of things that happened in the past," he said. "This company is not doing business the way it was done in the past. The people who are talking to the dealers are not the same."

Industry analysts say although the Amiga's dazzling features may appeal to consumers, the machine's price tag may be too high for many Christmas lists. Asked if Commodore might eventually lower the machine's price and distribute it through mass retailers, Mr. Trukenbrod was adamant:

"There is no chance of that happening," he said. "There is no way we would pull the rug out from under [computer dealers]."

Commodore's move to two-tiered distribution—if successful—would be a first in the personal computer industry. IBM and Apple have remained steadfast in their support of specialty retailers, despite frequent overtures from discounters.

Mr. Trukenbrod said Commodore expects to have 500 dealers signed before the Amiga's Sept. 15 shipment date, but he would no identify locations. The list reportedly d not include any large chains, such as Comp terLand or Entre Computer Centers, many returnees from the days of Tramiel-le Commodore.

The Amiga rollout will coincide with Atari's introduction of its long-awaited 520 ST machine, setting up a battle for dealer shelf space and software support. Atari will rely on the lower price of its machine ($799)

Atari gets new agency

By CLEVELAND HORTON

Atari Corp. last week named a small Silicon Valley agency to handle future creative assignments—the fourth shop to work on the account since Jack Tramiel took over as chairman one year ago.

Humpal, Leftwich, Luack & Sinn, a $10 million agency in Palo Alto, Cal., won the account, succeeding Goodby, Berlin & Silverstein, San Francisco. The assignment comes just one month before Atari plans to break the first ad for its newest computer, the 520 ST.

The Sunnyvale, Cal.-based computer marketer, bristling over last week's introduction of Commodore International's Amiga computer, said it will take its "Power without the price" message to the public next month. The print ad, created in-house, is the first national advertising coming from the "new" Atari.

The ad attempts a patriotic approach, featuring an American flag on the upper left corner of the ad as well as on the screen of the 520 ST pictured below. The headline proclaims: "America: We built it for you." At the bottom of the ad, under "The New Atari" logo, is the internally developed slogan "Power without the price." The ad prominently lists the

CLASSIC

Coke plays the classics

Coca-Cola Classic's new spots rely on familiar icons—Babe Ruth, Little Orphan Annie and the Statue of Liberty—to reinforce the symbolic value of Coke Classic. The spot notes: "It takes time before something becomes a classic." McCann-Erickson, New York, handles.

Late West Coast news

Scott Lancaster draws crayon job

Avalon Industries, New York, marketer of Avalon crayons and other craft items, appointed Scott Lancaster Mills Atha, Los Angeles, as its first ad agency. The 95-year-old company, being realigned after going through a leveraged buyout last year, named the agency following a review in which five or six agencies took part. Ad budget is estimated at $2 million to $3 million. First consumer advertising probably will start next spring.

Ketchum Advertising named several senior creative and account personnel for its newly opened Los Angeles office: Mike Scardino, formerly associate creative director, J. Walter Thompson USA, New York, becomes senior vp-creative director; Bruce Kramer, previously senior vp-art, McCaffrey & McCall, New York, is vp-associate creative director; Richard Crispo, most recently art director, Chiat/Day, assumes a similar position, and Pat Hallenbeck, print production manager, Ogilvy & Mather, also takes a similar title. Vps-account supervisors on the office's lone account, American Honda Motor Corp.'s Acura division, are Peter Goodwin, formerly vp-management supervisor, Ken-

Newspaper audience study draws controversy

By WILLIAM F. GLOEDE

NEW YORK—The 1985 Simmons-Scarborough syndicated study of newspaper audiences in the top 50 and six other ADIs shows that more than 70% of adult Americans who live in and around major markets read daily and Sunday newspapers regularly.

The '85 report, the third in a series of studies done once every two years, shows 82.6 million Americans reported reading a daily newspaper "yesterday," representing roughly 70.3% of the adult population. Some 85.4 million, or 72.7% of the adult population, read a Sunday newspaper "last week." The "yesterday" and "last week" readership norms were developed in accordance with an "indirect" questioning procedure recommended by the Advertising Research Foundation that's designed to prevent untruthful answers. The average newspaper reaches 2.74 people, according to analysis of the Simmons-Scarborough data and Audit Bureau of Circulations figures from 1984. Simmons-Scarborough is urging caution in using the readers-per-copy figure since it is based on last year's circulation numbers.

The study, out for little more than two weeks, is already generating controversy among its newspaper subscribers. Much of the controversy centers around weighting for income and educational demographic characteristics. Problems have been reported in Houston, Dallas-Fort Worth, Des Moines, Kansas City, Tampa-St. Petersburg-Sarasota and Washington, D.C. Problems are expected in other markets, say newspaper advertising executives.

"We have some very serious problems with the study," said Hugh Downey, marketing director for the *Fort Worth Star-Telegram*. "Over-all readership levels are suppressed—newspapers with more distinct upscale profiles get hurt more than newspapers with less upscale profiles. The *Star-Telegram* and the *Dallas Morning News* do not intend to use the study as it is."

In Dallas, the Simmons-Scarborough report puts readership and coverage of the *Morning News* and the *Times Herald* "neck and neck," according to Mr. Downey, when actually the *Morning News* has opened a significant lead over the *Times Herald* both daily and Sunday.

In Houston, J. A. Johnston, vp-marketing for the *Houston Chronicle*, issued a statement saying, "Comparing the Simmons-Scarborough study with three other studies gives us basis for concern. Only with the 1985 Simmons-Scarborough study do we find a discrepancy in the critical relationship between papers sold and the people who read them. While the *Chronicle's* circulation leads at the time of the study were 35% daily and 44% Sunday, the *Chronicle's* readership, according to Simmons-Scarborough, was 3% less than that of the *Post* daily and only 15% more than that of the *Post* on Sunday.

"The Audit Bureau of Circulations gives us a sound apples-to-apples measurement on circulation. We don't understand why the readership [data] from the Simmons-Scarborough doesn't also reflect similar differences between the audiences of the two papers," Mr. Johnston stated.

The 1985 study, the first from Simmons-Scarborough, is the culmination of more than a year of intensive field surveys and analysis. The study is based on more than 73,000 telephone interviews, most followed up with second contacts, with the phone numbers selected by the random-digit dialing method. John Polich, Simmons-Scarborough president, said the survey takers also made a "very aggressive" effort at contacting those who were not at home when the first random calls were made.

"We're not aware of anyone else who does two interviews with as many respondents as we do," said Mr. Polich. The reason for the survey's depth lies in its inherent local character. "We have to have a report that will stand up in each of 56 ADIs and 71 metro areas."

The report fills five volumes and contains detailed demographic information on people who live in the nation's top markets.

"It's a very powerful marketing tool even before you get into the stages of planning media," said Mr. Polich. "It stands on its own almost without the newspaper ratings."

The study contains information, broken into all the standard American Assn. of Advertising Agencies demographic categories, on the population of each of the 50 top markets and the six others that Simmons-Scarborough surveyed. Among the data in the report are: Age, sex, employment status and occupation, income levels, education, size of household, types of dwellings, estimated values of dwellings, race, languages spoken within households and even information on people who have unlisted telephone numbers. There's also data on consumer spending, including major purchases of autos, home computers and airline tickets and more routine purchases of such items as movie tickets, groceries, tobacco products, alcoholic beverages and cable television service.

On newspaper readership, the survey reports average issue and cumulative audiences for each newspaper, including one, two and five-issue net audiences of weekday newspapers and one, two and four issues of Sunday papers.

The 56 ADI averages reported by the study show daily newspaper readership is the highest in the ADI surrounding Albany, N.Y., where 80.1% of all adults reported reading yesterday's newspaper. A close second was Boston, where 80% of the respondents said they read yesterday's paper. In comparison, in the top five markets, the yesterday-readership figure averaged 71.1%, with New York reporting the highest coverage, 77.3%, and Los Angeles reporting the lowest, 65.5%. In the next five markets, Boston led in coverage and Dallas-Fort Worth showed the lowest, with 63.5%. The ADI with the lowest percentage coverage was Memphis, Tenn., where only 56.3% of the adult population reported yesterday readership. The only other market in which fewer than 60% of the adult population reported reading yesterday's newspaper was Nashville, where the figure stood at 57.4%.

Newspaper market coverage is generally lower in most Sunbelt and southern markets than it is in the Northeast and Midwest. Mr. Polich said several explanations have been offered for the difference. One explanation surmises that people are more active out of doors in the Sunbelt, allowing less time for newspaper readership. Another explanation is that the survey is reported according to tv geography. Areas reached by a tv signal, especially in rural exurban areas, are not always reached by a newspaper that is based in the same market as the tv stations.

Sunday newspaper readership was highest in Detroit, where 82.8% of the adult population reported having read last Sunday's newspaper. Following Detroit were Milwaukee, with an 80.4% coverage rate, and New York, with an 80.3% coverage rate.

The lowest Sunday coverage rates were reported in Memphis, with 56.3%; Nashville, with 59.9%, and Cincinnati, with 59%.

At press time, the study was on its way to agency subscribers. Thurman Pierce, vp-U.S. print media manager for J. Walter Thompson USA, New York, said that although he'd not seen the new study, he was not expecting it to have a major impact at advertising agencies.

"There's a great deal of impact on the selling side," he said. The study is a "boon" for newspaper representative companies, he said, since its findings are directly comparable to broadcast figures.

The study itself, he believes, will not lead agencies to place more national advertising in newspapers, although it "gives them figures that agencies have confidence in."

Mr. Pierce noted that since the last syndicated newspaper studies were completed in 1982, newspapers' share of national advertising expenditures has fallen from 6.5% to 6.1%. While the studies are an important element in the newspaper industry's effort to attract a larger share of national expenditures, the industry has major "marketing and sales problems" that must be solved before the industry can make significant inroads in national. (The industry is attempting to define those problems through a blue-ribbon task force of newspaper publishers.)#

Simmons-Scarborough 1985 newspaper ratings - Sunday

Notes: (a) All day, (e) Evening, and (m) Morning. The readers-per-copy figures are subject to correction for 1985 circulation when available.

Let them talk.
They say you're not as innocent as you seem.
They say you have a past.
They say you cry too easily and laugh too much.
They're right, you do.
So do I.
Now wear my perfume.
And let them talk.
SOPHIA

Not exactly the look of love

The fall print campaign for Coty's Sophia fragrance is provocative. The ad copy notes "They say you're not as innocent as you seem. They say you have a past. They say you cry too easily and laugh too much. They're right, you do. So do I. Now wear my perfume. And let them talk." But instead of a suggestive visual, three grandmotherly types, dressed in black, stare into the camera, their eyes full of censure. Beber Silverstein & Partners, New York, handles.

U.S. to decide soon on tv ad exclusivity

By STEVEN W. COLFORD

WASHINGTON—A two-year federal antitrust probe of beer advertising exclusivities on network tv sports could be resolved within the next few weeks.

Top-level policy determinations on the case, instigated by Stroh Brewery Co., Detroit, are expected shortly now that the Senate has confirmed Douglas Ginsburg as the new assistant attorney general in charge of the Justice Department antitrust division.

The investigation started after officials of Stroh complained to Justice that exclusivity arrangements between the tv networks and Anheuser-Busch and Miller Brewing in prime live-action sports precluded Stroh from being able to compete fairly through television advertising. Network and local tv ad sales executives have routinely marketed exclusivities for years, and there are hundreds of such pacts in place in sports and other programing.

Sources close to the investigation expect the department's antitrust staff to press Mr. Ginsburg for action that could force the networks and advertisers to alter or eliminate granting of exclusivities, a practice that prevents Stroh and other tv advertisers from gaining an advertising foothold on some premium-audience programs.

Under questioning at his recent Senate confirmation hearing, Mr. Ginsburg assured Sen. Howard Metzenbaum (D., O.) prompt action would be taken on the exclusivities investigation. Sen. Metzenbaum, an outspoken critic of Reagan administration antitrust policy, also warned Mr. Ginsburg that he expected an explanation if the department failed to take action.

Exclusivities usually entail an advertiser paying more than the going rate for the distinction of being the sole sponsor of its kind during a particular program. The arrangements forestall the entry of rival marketers on such attractive programing as pro sports.

Mr. Ginsburg, who recently left the Office of Management & Budget, will have the final word on whether to close the investigation, which began in December, 1983, or press the networks for changes in the way exclusivities are arranged.

The tv networks, A-B and Miller have maintained that exclusivities don't restrain competition. They

BBDO may gain in marketing change

Polaroid agency shuffle?

By GAY JERVEY

Reports have begun to circulate since Polaroid's recent changes in top marketing management that BBDO may be a strong contender for part of Polaroid's business, possibly the introduction of the new 7000 instant system next year.

Ally & Gargano, agency for Polaroid's domestic consumer photography business, for the past several months has been working on preliminary strategy for the 7000's U.S. debut.

BBDO, which only handles Polaroid sales promotion and direct-response work, has been given a business-to-business project on the 7000, sources said. BBDO declined comment. A Polaroid spokesman said BBDO's current work is limited to existing projects.

However, sources close to Polaroid indicated the company's agency lineup could change, given the pressures associated with the 7000 introduction and the marketing management shifts (AA, July 29).

The company last month eliminated the post of group vp-worldwide advertising, for two years held by M. Carl Johnson, as part of a corporate restructuring. The revamp was designed to soften the company's complex matrix management system, often criticized for frequently requiring too many participants in decision-making.

Both William O'Neill, group vp-consumer photography, and Peter Eichorn, vp-North American marketing operations, will have a stronger say in who handles the 7000, the name Polaroid has adopted internally for a new generation of instant products it hopes will resuscitate the waning instant photography business.

Sources agreed this bodes well for BBDO, whose work has been well received.

Earlier this summer, Cambridge, Mass.-based Polaroid reportedly asked Ogilvy & Mather to do spec-

Rice leaves FMR to form own shop

By BOB GEIGER

MINNEAPOLIS—Award-winning executive art director Nancy Rice last week resigned from Fallon McElligott Rice to form a competing ad agency here with her husband, Nick.

N. Rice

One of FMR's five co-founders, Ms. Rice is the first principal to leave the agency since it opened in 1981. She was the quiet force behind the agency's campaigns for *Rolling Stone*, the *Wall Street Journal* and Gold 'N Plump Poultry.

Details of the Rices' new agency, called Rice & Rice, are shrouded in secrecy, as are Ms. Rice's reasons for resigning.

"I don't think this will mean anything negative for FMR's creative," she said. "This is a baby that I'm proud of, and it will blossom without missing a step."

Ms. Rice, 37, carries no FMR accounts to Rice & Rice, which will be housed temporarily in the couple's south Minneapolis home. Within 90 days, the agency will move to downtown Minneapolis offices. Hiring of an account supervisor, copywriter and production manager are planned, Ms. Rice

Mickelberry profits skid 59.3%

NEW YORK—Mickelberry Corp. watched net income plummet 59.3% to $187,000 in the second quarter as revenues rose 13.6%, to $35.1 million, over the same period last year. For the first half, net income dropped 28.8% to $898,000; revenues were up 20.2% to $69.7 million.

Texaco tags 8 finalists

WHITE PLAINS, N.Y.—Texaco has narrowed the field to eight agencies for a successor to Benton & Bowles, New York. Texaco was to begin visiting the first of the finalists today. The eight are reported to be Backer & Spielvogel, Ted Bates Advertising, Dancer Fitzgerald Sample, William Esty Co., Jordan Case Taylor & McGrath, Needham Harper Worldwide, Ross Roy Inc. and Young & Rubicam. The $24 million account was jarred loose by the B&B merger with Amoco agency D'Arcy MacManus Masius.

Ralston Chex out agencies

ST. LOUIS—Ralston Purina Co. has put its $12 million Chex cereals account under creative review, sources say. Competition is limited to incumbent Wells, Rich, Greene/New York and two of Ralston's other agencies: Gardner Advertising and in-house Checkerboard Advertising. Sep-

Airline discount seats rise along with prices

By BRIAN MORAN

Major airlines planning to match United Airlines' more expensive fare structure are expected to weather any attacks from cut-rate carriers by offering more discounted seats on highly competitive routes.

The new structures are scheduled to take effect in late August, near the end of the peak summer travel season and at a time of year when airlines traditionally have trimmed fares. But most carriers are expected to blunt the negative marketing aspects of the average 4% fare hike by expanding their discount-fare programs.

"There are still going to be some pretty terrific deals," said William Dowse, vp-advertising, Eastern Air Lines. "United's [fare structure] filing, with its stepped series of advance purchase requirements at different fares, should increase opportunities for discounting for all of us."

Miami-based Eastern late last week had not decided how it would respond to United's proposed fare structure, which ties coach fares to mileage. Several other carriers—including Atlanta-based Delta Air Lines and Minneapolis-based Republic Airlines—said they were leaning toward matching United's plan.

American Airlines, Dallas; Piedmont Aviation, Winston-Salem, N.C., and Trans World Airlines, New York, said they would restructure their fare systems to match United's plan, which goes into effect Aug. 17 (AA, July 29).

Under the new structure, most carriers will offer two discount fare programs: A 14-day advance purchase, with a 45% discount, and a 30-day purchase, with a 60% to 70% discount. The new structure would eliminate the seven-day advance fare.

All of the carriers said no advertising plans have been set to address the new fare structure or expansion of discount programs.

The effect of the new structure on specific routes will vary widely, so it is too early to tell how a corporate ad program might deal with the changes, airline officials said.

Industry analysts said that making more discount seats available should help carriers maintain high load factors into the fall, despite the fare increases. Fares on the most heavily discounted tickets, like United's unrestricted Super Coach ticket, will rise about 10%.

"They'll have to loosen up the availability of the

Now, where will Ted turn next?

By MAURINE CHRISTOPHER

If Ted Turner's dream of capturing CBS has finally collapsed, where will he dash off to next?

Turner-watchers suggest several possibilities.

For years Mr. Turner has been huddling with motion-picture studios about possible deals. Last week, Turner Broadcasting System's Cable News Network reported that the TBS chairman was in Los Angeles for talks with MGM/UA Entertainment Co. executives.

Mr. Turner could not be reached for comment at press time, but Kirk Kerkorian, 50.1% owner of MGM/UA, has said he wants to sell at least part of the MGM movie complex.

While one source close to Mr. Turner said CNN reporters were wrong about what was on the boss' calendar during his last trip West, another insider said the principal owner of Atlanta-based TBS has talked to a variety of film companies, and this deal appears to be hotter than the others.

Meanwhile, there was a flurry of fanciful speculation about Mr. Turner's own future. Will he choose another takeover target in broadcasting? Though CBS Inc. and American Broadcasting Cos. both seem safe from hostile raiders, RCA Corp., parent of the National Broadcasting Co., is technically available. RCA has barriers

Okidata's new copiers may cut overhead

By BRIAN MORAN

Remember during those big college lecture classes, when the professor slapped a flimsy transparent sketch onto an overhead projector to drive home a crucial point?

Along with hundreds of other squinting students, you probably scribbled furiously to copy a graph or chart in your notebook before the wily instructor dashed ahead to the next slide.

This fall, photocopier and printer marketers will unleash a new type of machine—known in the industry as the "electronic whiteboard" or "copyboard"—that observers say could revolutionize the way college classes, business meetings and sales presentations are conducted.

The machine consists of a large white writing surface, similar to a blackboard, connected electronically to a printer. After drawing or writing on the board with a special pen, the teacher, boss or meeting leader can press a button and instantly provide the audience with sharp paper copies.

Office-equipment dealers are eager to get their hands on the new technology, developed in Japan and shown here for the first time last month at an industry trade show in Las Vegas.

Okidata, a large marketer of printers for personal computers, says it has the first model of the new category to hit the market. Mount Laurel, N.J.-based Okidata, a unit of Japan's Oki Electric, began shipping its Oki Copyboard last month to more than 100 dealers. A 75-by-58-in. model retails for $3,495; a smaller model sells for $2,795.

Okidata is supporting the introduction with a $2 million print campaign via Shimer vonCantz, Philadelphia. Media schedule includes the *Wall Street Journal* and major-market newspapers, and *Business Week* and *Inc.*, demographic editions of *Newsweek* and *Time* and office equipment and inflight books.

One spread ad shows an Oki Copyboard in a replica of the Oval Office, over the headline: "The Great Communicator. Every office should have one."

Okidata's parent company in Japan has sold 15,000 units of the machine since it was introduced there about 18 months ago, said Ronni Barton, marketing communications manager. Okidata hopes to sell 10,000 units in the U.S. during the next year, Ms. Barton said.

A host of other copier marketers are readying "whiteboard" entries, in pursuit of anticipated heavy demand for the device among businesses and schools. Canon USA, Lake Success, N.Y.; Sharp Electronics Corp., Paramus, N.J., and Ricoh Corp., West Caldwell, N.J., all are expected to have models on dealer shelves soon.

"No question about it—this is a sensational new-product concept," said Joel Lasko, president, Washington Photocopy Corp., a large Washington-based copier dealer. "Sure, it's something of a gimmick, but it's helpful to anybody who has meetings."

Dealers anticipate heated competition among manufacturers for the general business and education markets.#

Auto makers gird for imports

By JESSE SNYDER

ACME, MICH.—Domestic auto makers are evolving a two-step defense of the heart of the U.S. market as Japanese marketers take aim at mid-size cars: Advertising now, technology later.

"Clearly, marketing costs will increase this fall," Ford chairman Donald Petersen said last week at a University of Michigan auto seminar here. That's when the surge of Japanese imports will hit following the virtual lifting of import quotas.

The Big Three won't discuss specifics, but over-all factory auto advertising will rise 16% to 18% in 1985, says Robert Coen, McCann-Erickson's chief trend analyst.

Including matching funds that auto marketers contribute to dealer groups, that could push factory auto advertising past the $3 billion mark by early 1986.

First-tier Japanese auto makers are moving up in auto weight for several reasons: U.S. auto makers conceded the low-end market to imports and are using second-tier Japanese companies for their own small cars; Koreans and other low-wage countries are planning price-value assaults on Japanese small cars in the U.S., and the Japanese have 25% more cars to sell this year.

"[The Japanese] are very good economists. They see the remarkable profitability of the upper portions of our market," Mr. Petersen said.

"For successful companies, the U.S. is no longer an optional market but an essential one," said David Cole, director of U-M's office for the study of automotive transportation.

"By and large, the profit of the world auto market is being made in North America," Mr. Petersen said. He acknowledged a few exceptions, but Europe and the Japanese home markets are depressed.

Mr. Petersen believes U.S. marketers can blunt the new Japanese assault. "I'm not sure they'll be able to sell 25% more cars this year," he said.

The second phase for U.S. marketers is increased technology. The Big Three is determined to keep a lead in areas in which they are ahead of imports (such as corrosion control) and "leapfrog" the Japanese in others, said Alex Mair, GM vp-group executive of technical staffs.

Part of that effort is GM's well-publicized Saturn Corp. and Ford Alpha and Chrysler Liberty projects, designed to overcome a $2,500 Japanese small-car cost advantage through changes in design, engineering, manufacturing, distribution and marketing.

But technology must add value in the mind of the buyer to be worthwhile, said Robert Eaton, GM vp-advanced product and manufacturing engineering. GM is pushing to convert the car from a mechanical to an essentially electromechanical product by 1995. but the benefits that will make it more marketable include better reliability, computer-controlled brakes and transmissions that prevent skidding at all times and navigation systems.#

AHS eyes image ads

By JULIE FRANZ

CHICAGO—American Hospital Supply Corp., about to be merged into Baxter Travenol Corp., last week took the surprising step of hiring Cramer-Krasselt to create a $1 million corporate-image campaign.

Evanston, Ill.-based AHS last month accepted a $3.8 billion takeover bid from Deerfield, Ill.-based Baxter Travenol after earlier nearly completing a union with Hospital Corp. of America, Nashville. The AHS-Baxter merger should be completed by the fourth quarter, and likely will wipe out the American Hospital Supply name, Baxter sources say. AHS officials couldn't be reached for comment or explanation of the need for a corporate campaign.

AHS never has turned to advertising to build a national brand name, but president Karl Bays is known to favor advocacy advertising on healthcare issues (AA, April 8).

Sources say Cramer-Krasselt's campaign, due this fall, will focus on AHS' efforts in healthcare cost containment, a hotly contested issue in the field. American is considered "the Cadillac of supply distributors, with service that's unmatched in the industry," a source close to the project said. That image also fosters the perception AHS is a high-cost company.

"They wouldn't be the best if they weren't cost-efficient," the source added. That's what will be brought out in the campaign, set to run in national business and healthcare trade publications.

American's annual ad budget is about $20 million, compared with Baxter's $4 million annual budget. Both companies have focused on business-to-business advertising. Neither has an agency of record, instead doling out advertising assignments on a project basis.#

AA's Alter promoted

NEW YORK—Stewart Alter, who has reported on the agency business for ADVERTISING AGE during the past 16 months, has been promoted to senior reporter.

In announcing the promotion, AA editor Fred Danzig made special note of Mr. Alter's ongoing coverage of merger stories such as Benton & Bowles/-D'Arcy MacManus Masius and Bozell & Jacobs/Kenyon & Eckhardt. "Through hard work and diligence, Stew Alter has become the nation's leading reporter of advertising agency business news and trends," said Mr. Danzig.

S. Alter

"This promotion is our way of saluting Stew and rewarding him."

Before joining AA in April, 1984, Mr. Alter served as executive editor at *Magazine Age*, which he joined as managing editor in September, 1979.

Earlier, Mr. Alter had been an associate editor at *Parents'*; a writer/editor for *The Trib*, the short-lived New York daily, and held editorial posts at *ANNY* (now *Adweek*).

Mr. Alter earned a master's degree from the State University of New York and a bachelor's degree from Brandeis University in 1970.#

CORRECTIONS & CLARIFICATIONS

- When Estee Lauder introduces Beautiful this fall, it will be the first time the company has used radio and tv for an introduction, not the first time the company has ever used those media, as was stated in a story due to an editing error (AA, July 29, P. 33).
- Procter & Gamble's operating earnings for personal-care products are expected to decline 50%, to $314 million, for the fiscal year just ended, not net profit as was reported (AA, July 29, P. 50).
- Grey Advertising, New York, incorrectly was identified as the agency of record for the joint S.C. Johnson & Son-Procter & Gamble "Winning shine" sweepstakes (AA, July 15, P. 76). Curtin & Associates, Englewood Cliffs, N.J., handled the promotion. Grey Advertising, New York, is the P&G Joy agency; J. Walter Thompson USA, Chicago, handles Johnson's Pledge.
- John Blair & Co.'s newest tv station, WSCV-TV, covers Miami in addition to Fort Lauderdale, and its programing is autonomous. This information was reported incorrectly in Blair's 100 leading media company profile (AA, June 27, P. 14). In addition, Blair's Network Mail circulation is 42 million, not 30 million as stated.#

Cold cereals heating up

By JOHN C. MAXWELL JR.

Last year was another record year for the cold-cereal industry. Volume was up some 3.1% compared with 1983, to 2.15 billion pounds.

In dollars, the market was up some 10% to $4.05 billion.

The main factors were good growth in adult ready-to-eat cereals, particularly brans. In addition, family-type products were up. Presweetened share was down as new licensed entries did not turn out as well as their predecessors. In 1985, we expect to see this type of trend continuing, with poundage up 3% and a price increase of 5% having been put into effect early this year.

The main news was Kellogg Co., which jumped two share points in 1984 and is currently running up another two share points to somewhere around 42.5%. This performance has been aided by new products, such as Apple Raisin Crisp, C-3PO, Fruitful Bran and Raisin Squares. However, such basic products as Frosted Flakes and corn flakes also helped.

General Foods appears to be the main company hurt by Kellogg's, as it has almost a mirror image of Kellogg's portfolio. GF was down more than two share points in 1984, and probably is down at least another share point to somewhat more than 13% currently.

Quaker Oats also suffered, particularly since Halfsies proved to be somewhat of a failure and Mr. T. is not doing well.

Currently, we think Quaker may be down as much as another share point to around 7.5%. Nabisco, which held up reasonably well in 1984, has continued in 1985 to date. Thus, the only other companies that have held up reasonably well have been General Mills, off slightly for the year, and Nabisco.

Ralston was helped by new introductions, such as Cracker Jacks and Gremlins and, more recently, Cabbage Patch and Rainbow Brite. However, the private labels, which are preponderantly Ralston, were down more than 7% in 1984 and the erosion continues.

In terms of the top 10 cold-cereal products in volume, Kellogg's Corn Flakes retained its No. 1 position, but General Mills' Cheerios dropped to No. 3 (but remained No. 1 in dollars), displaced by Kellogg's Frosted Flakes. The rest of the rankings remained constant except for 10th place—Honey Nut Cheerios joined the ranking, knocking out General Foods' Grape-Nuts.#

Mr. Maxwell is with Furman Selz Mager Dietz & Birney, New York.

Cold cereal's top 10

Kellogg

(Continued from Page 4)

logg president Gerald Robinson. Ads contain both educational and promotional messages, a spokesman said.

Kellogg's two domestic agencies, Leo Burnett USA and J. Walter Thompson USA, both Chicago, also handle the company's international advertising.

The company's cereals will succeed in foreign markets where other food companies have gone awry because "the background of getting nutrition from grain is established worldwide," Mr. LaMothe said. That background gives Kellogg's products an opportunity to meet the needs of the foreign market, he added.

The company has modernized or improved production capacity at plants in Australia, Canada, England and Wales, as well as at home, in an effort to reduce production costs and meet projected demand.

Although Kellogg declined to disclose its estimates of potential growth abroad, analysts say overall growth in the U.K. and Australia should outpace the company's domestic growth, while growth on the Continent may lag slightly behind domestic rates.

The company is promising additions to its already heavy investments in research and development and marketing for new and established products, the Kellogg spokesman said.

In addition, Kellogg has added former Ford Motor Co. chairman Philip Caldwell and G.D. Searle & Co. chairman-ceo Donald Rumsfeld to its board, hoping to benefit from their "strong international marketing experience," Mr. LaMothe said.

But Kellogg has a steep road ahead abroad. In 1984, 46% of its assets were abroad, though they accounted for only 22% of operating profits. Last year, foreign profits fell 23% to $55.8 million as sales slipped 1% to $812.8 million. Domestic profits increased 14% to $194.7 million on 13% higher sales of $1.8 billion.

For the company as a whole, those figures register as a 3% increase in net income, to a record $250.5 million, on a 9% increase in sales to $2.6 billion.

In the U.S., Kellogg grew faster last year than the cereal industry as a whole. Its pound volume jumped 10% while pound volume for the industry only gained 3%.

Capital improvements cut deeply into foreign earnings, especially the $229 million Kellogg spent boosting production capacity. About 66% of that total was spent at its London, Ont., plant, the company said. Another $250 million in capital improvements is scheduled for 1985.

International raw material prices (excluding grain) rose last year, also cutting into profits, Kellogg said. Drops in noncereal volume, especially from the sale of NeoCitran cold remedy in Canada, also affected foreign earnings.

Companywide, Kellogg reported a 2.7% increase in net income for the first half of fiscal 1985, to $133.3 million. Sales were up 10% to $1.42 billion.

The gap between Kellogg's domestic and international business will continue to widen, PaineWebber's Mr. Larson said. Any gains made abroad will be exceeded by significant gains that Kellogg is expected to make in the U.S. cereal market again this year.

Kellogg is continuing to strengthen its domestic cereal position, having regained the market share it lost between 1980 and 1982. Generic and private-label copies of old-line Kellogg favorites abounded then, and at its lowest point, in 1982, Kellogg had only 35% of the market.

The company's market share in the $4.1 billion U.S. ready-to-eat cereal market is now 42.5%, up from 37.8% last year, analysts say. Growth came from steady volume gains averaging 12.5% across-the-board for Kellogg brands. Only sales of Kellogg's flagship corn flakes remained flat.

Kellogg's nearest competitors, General Mills, Minneapolis, and General Foods Corp., White Plains, N.Y., reported mediocre years in 1984. General Mills' share remained stable at 20%, while General Foods lost ground to 14% from 16% in '83.

The biggest loser for General Foods was its entry into the licensed children's cereal market: Smurf-Berry Crunch. Also slipping last year were Post Raisin Bran and Honey Nut Crunch.

Despite industry analysts' predictions, Kellogg doesn't see an end to growth in the domestic cereal market, Mr. LaMothe said. The U.S. ready-to-eat cereal market's expected annual growth of 3% to 4% is good enough for Kellogg, which expects its own cereal volume to grow between 7% and 11%, the company said.

Already this year, Kellogg is the growth leader in the cereal segment, recording 12% volume growth in February and March, according to data from A.C. Nielsen Co., Northbrook, Ill. General Foods' volume was down 8% in that period; General Mills, down 2%; Quaker Oats, down 10%; Nabisco Brands, Parsippany, N.J., down 1%, and Ralston Purina, down 12%.

To keep domestic momentum going, Kellogg's 1985 ad plans include promotional tie-ins with the Jacksons, the Statue of Liberty and Mars Inc.'s M&M's candies for Kellogg's "big four" cereals: Corn flakes, Frosted Flakes, Raisin Bran and Rice Krispies. Burnett handles those brands.

Ad spending on new and established brands increased 16.2% to an estimated $204.8 million worldwide last year. Ad spending will increase another 20% this year to about $245.8 million.

Kellogg's controversial anti-cancer diet theme for its bran cereals will continue in 1985 (AA, Oct. 29, *et seq.*). Although only All-Bran tv spots have used the theme, information linking bran to an anti-cancer diet is included on the back of all Kellogg's bran cereal boxes.

The company also is testing Extra Fiber All-Bran, a higher-fiber cereal to replace its regular All-Bran (AA, March 18, *et seq.*), sources say. Ads for the new cereal

This data has been provided by Media Records for exclusive publication in Advertising Age and may not be reprinted or published in any form without explicit permission from Media Records. All newspapers represented are subscribers to Media Records. For those newspapers that subscribe to Media Records National Advertising Reporting Service, Total Advertising data shown has been supplied by the publisher to Media Records and included in this compilation. All publisher supplied figures are converted to MRCS/SAU inches by Media Records. These newspapers are indicated with an asterisk (*).

REPORTING METHODOLOGY

Media Records continues to measure in linage but due to the introduction of the SAU 6 column format Media Records has designed and developed a methodology with the approval of our subscribers, the INAME Measurements Committee, The ANPA/NAB Working Committee, The AAAA Newspaper Committee, and other industry groups.

The approved methodology is titled The Media Records Conversion System (MRCS) and is based upon the printed page area of each product of the newspaper and is a five step approach as follows:

1. Measure Printed Page
   Width and Depth in inches
2. Determine Square Inches of Page
   Multiply Width by Depth Inches
3. Determine the Number of SAU Inches of Page
   Divide the Square Inches by 2.0625 (SAU Inches).
4. Measure the Total Lines of the Page
   Multiply Column Depth Agate Lines by the Number of Columns on the Page
5. Determine the Factor for Converting Measured Lines to Reported SAU Inches
   Divide the Total Lines of Page by the Number of MRCS/SAU Inches of the Page

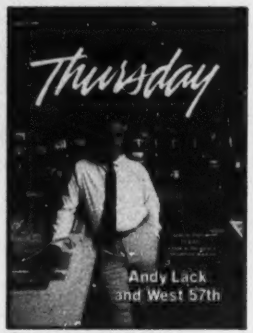
No slack with Lack

In the nine years since leaving the advertising business for CBS News, where he's produced for such shows as "Our Times With Bill Moyers," "CBS Reports" and "60 Minutes," Andy Lack has never watched one of his creations at the same time as the rest of America. He'll continue that tradition this month as CBS screens his new, stylized news magazine show, "West 57th." *See Page 5.*



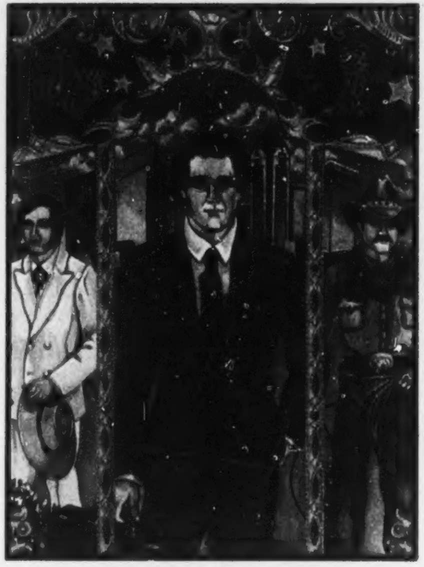
Cover photo by Arnold Adler

Flying high

Are flyers the next yuppies? They hope to God not. Flyers: "Fun-loving youth en route to success," are the species of 15-to-25-year-olds identified by marketing consultants Lawrence Graham and Lawrence Hamdan. *See Page 36.*

Leaders are readers

To advertising people who are also book lovers, the term "summer vacation" is almost synonymous with pleasure reading. It means they're no longer obliged to drag through that never-ending pile of mail and memos, but are free to read anything they want. Ad Age *Thursday* checked to see what sort of reading material they were taking to the beach this summer. *See Page 39.*



Special Report—Texas

The cattle rancher and the oil man are only two of the many faces of Texas. It's a sprawling state with a large and growing variety of residents, requiring diverse methods for marketers. Special Report examines the Lone Star State, starting on *Page 15.*

Presstime

DYR abandons review

Los Angeles—DYR has dropped from the review of the $20 million Jack in the Box account (AA, July 1). The move came after objections from R.J. Reynolds Industries, whose Louisville-based Kentucky Fried Chicken unit is handled by DYR partner Young & Rubicam, New York.

Grey's profits down 2.4%

New York—Grey Advertising wrapped up the second quarter with net income of $4.1 million, down 2.4% from the same period a year ago. Revenues, however, were up 4.5% to $58 million. For the first half, net income rose 5.8% to $5.5 million on 12.2% higher revenues of $107.6 million.

DDB layoffs in L.A.

Los Angfles—Doyle Dane Bernbach late last week laid off almost 10% of its staff here following the loss of the $20 million Western Airlines account to Dailey & Associates (AA, July 18). DDB would not confirm the number of layoffs, but sources say 18 people were let go.

Air New Zealand reviews

Auckland, New Zealand—Air New Zealand is reviewing the domestic portion of its account, estimated at less than $10 million. The local agencies involved in the review include incumbent McCann-Erickson, as well as Colenso Communications; D'Arcy MacManus Masius; Charles Haynes Co.; Ilott Advertising; Ogilvy & Mather; Saatchi & Saatchi Compton, and J. Walter Thompson Co. Dailey & Associates, Los Angeles, handles the carrier's U.S. account.

Coke Foods, Bacardi mix

Houston—Coca-Cola Foods and Miami-based Bacardi Imports have joined forces to market a new line of frozen-concentrate tropical fruit mixers under the Bacardi name. The line will be tested via supermarket frozen-food cases in Houston, as well as Jacksonville and Orlando, Fla. It includes daiquiri, strawberry daiquiri, Mai Tai Punch and pina colada flavors. Marschalk Co., New York, handles print and tv.

It's Leber Katz' day

New York—*Woman's Day* is moving its $10 million consumer and trade account to Leber Katz Partners from Calvillo, Shevack & Partners. The CBS Magazines publication will continue its "Personal news women can use" trade campaign developed by CS&P when the agency was still Nadler & Larimer (AA, April 29).

Johnson buys into Essence

New York—Essence Communications has disclosed that John Johnson, founder-president of Johnson Publishing Co., Chicago, has purchased a "small equity interest" in the privately held company from an investor but declines to specify the size of his purchase or identify the investor. The move preceded Mr. Johnson joining Essence's two top executives, ceo-publisher Edward Lewis and president Clarence Smith, in a group of in-

Advertising: Join it and see the world

An Advertising Age roundup

Bored with the commute into New York City? Tired of the long drive into Los Angeles? Sick of seeing sailboats on your way to work in Chicago?

Well, maybe you need a change of scenery. A better job. A bigger salary. Have you always wanted to go Down Under? To Europe? The Far East?

An Advertising Age survey of agencies and executive search companies in 10 countries has found that the jobs are out there, but Americans had better choose their new location with care.

Briefly, here's what we found:

- **New Zealand.** The shortage of top talent in the advertising industry has reached a critical level here. Within the last six months 37 out of 100 Auckland-based marketing organizations have changed their chief executives or marketing managers, according to a study by SSC&B:Lintas. The reason is that many New Zealand citizens are flocking to the U.S., the U.K. or Australia.

At least six advertising agencies in Auckland are without creative directors and another five are searching for account directors.

The greatest need is for people who have worked on package goods or consumer durables, but New Zealand agencies also need copywriters and art directors with broad experience, says John Balasoglou, SSC&B's general manager.

Senior copywriters earn about $35,000 a year, while senior art directors draw about $30,500.

One of the problems in hiring account directors from the U.S., he says, is that they tend to come in purely as strategists, whereas New Zealand agencies expect their account handlers to roll up their sleeves. "We expect them to be able to work on everything," he says.

But before you start flying to New Zealand, it would be wise to touch base with a New Zealand consulate, because immigration is strictly controlled. The advertising industry is only allowed to import 25 people a year from around the world.

- **Australia.** If you want to work for an Australian agency, your best chance is if you are a senior employe of a large multinational agency, have Madison Avenue experience and can boast specialized skills.

Claire Worthington, managing director of the Australian branch of Apple International, an executive search company, says she most often looks internationally for senior creative directors with "experience working on automotive, beer, banking or package-goods accounts." Occasionally there is an opening for senior account execs and media directors, she says.

"If you're a recent college graduate, it's no easier to get a job here than in the States," Ms. Worthington says. "We already have enough graduates of our own."

According to Ms. Worthington, an ad exec in Australia can expect a salary comparable with U.S. levels.

"The life style would be the same," she says. "If they have a house and a pool in the States, they'll have a house and a pool here." A senior copywriter and art director might earn $44,000 while a creative director gets $65,000.

One source says a recent American creative recruit was sent back after only eight weeks because "he thought he was here to teach Australians how to do advertising."

- **Japan.** The only jobs generally available here for foreigners are for English-language copywriters interested in producing ads for overseas markets. Positions such as art director and account executive usually are filled by natives or by expatriates sent from a multinational

(Continued on Page 33)

World jobs

(Continued from Page 3)

advertising agency's headquarters operation.

Dentsu, Japan's largest agency, employs about 10 English-speaking copywriters, while Hakuhodo, Standard Advertising and Asia Advertising have about five each.

Salaries tend to be lower than in the U.S., while the cost of living is higher. An average salary for a copywriter is about $35,000.

Several problems face foreign copywriters in Japan. "There is a great psychological bias against local hires in agencies," says Wick Smith, a copywriter at J. Walter Thompson Co., who got his first job in Tokyo eight years ago with K&L, a local agency, which advertised in the trade press in the U.S. "You usually start with a lower salary, and making a name for yourself is more difficult. In addition, a major frustration is that your copy is frequently checked by clients who don't know English all that well and demand changes that you know are wrong. It requires a lot of patience," Mr. Wick says.

"There's a tremendous culture shock coming over here and it's costly, so we have to be careful in hiring someone with at least five years under his belt," says Richard Genardini, a copy supervisor in Dentsu's international creative division. "That's why we have a policy of only hiring through the trade press."

Speaking Japanese can really help, says Mr. Wick, but almost no foreigners do. "It makes it possible to communicate better with the art directors and improves an understanding of the company and its politics. It's an absolute necessity if you are an account executive," Mr. Wick says.

• **Korea.** You might think that Korea would be an ideal place to look for a job overseas because of the upcoming 1988 Olympics, improving economic conditions and growing industrialization. But in reality, Korea is a tough market to crack. The ad industry is young—the oldest agency is 20 years old—and foreign equity in local agencies is barred.

Marketing still is a weak concept here and hiring expatriates is almost unheard of among Korean companies. In addition, visa requirements are getting tougher.

The few Americans here have had to adjust to lower salaries. "If I was working in the U.S., I'd be making triple my salary here," says Jeff Crane, Lg Ad's copywriter/account exec. Yet salaries for expatriates are double that of Koreans working at the same job level. One American executive/creative director at Daehong Advertising claims his $3,000-a-month salary is more than the agency's president.

Americans might have a chance getting hired on the account-service side, including marketing and research, Mr. Crane says. "But they [Koreans] have a high opinion of their own creative and they don't feel the need there," he says.

"There is definitely a need for experts, but they aren't willing to spend the money," he adds.

• **U.K.** In London, job opportunities for Americans are scarce. "The days when an American could get on a plane to London and expect to find an advertising job are long gone," says the manager of one U.K. recruitment agency. It's even tough for the British because many agencies are cutting back or freezing their staff levels, he adds.

There is a shortage in certain categories, however. One executive recruiter said he has found the demand for male account managers is so great that he is now specializing in finding them. In many agencies, he says, women outnumber men at the middle-management level, but some clients, particularily automobile and computer companies, still want males to manage their accounts.

"Things have gotten so bad that one large agency recently employed four recruiters to find a male account manager. They got nowhere, so the agency decided to try the direct approach. It picked 25 males unearthed by the recruiters and got one of its top copywriters to write a four-page letter to each one of them. The result was six positive replies," the recruiter says.

Another shortage is for top-level creative people. Several leading agencies have set up a private college for their creative staff because they complain the country's art colleges are producing the wrong type of people for advertising.

In addition, some U.S.-owned agencies employ Americans to handle the international coordination of multinational accounts, but hire only those with experience in specific accounts.

Salaries average about $19,200 for copywriters to $30,000 plus a car for account directors.

• **Germany.** Nobody seems to be actively looking for marketing people from the U.S. to work in Germany, but within the industry there is a need for copywriters. However, fluency in German is essential. Art directors who can speak at least a little German also are needed.

Experienced copywriters and art directors can earn between $26,000 and $40,000 a year, with top-notch employes drawing $80,000. Keep in mind that German taxes take up to 56% of a $50,000 salary, but sometimes U.S.-based agencies will offer compensation for lost income.

"For Americans, the whole ad business here is different," says Charles Greene, creative director at Grey Advertising, Duesseldorf. "At home they do almost nothing but tv; here they're also expected to handle print, sales promotion, display and what have you."

• **France.** The prevailing sentiment is "What do we need Americans for? We're doing a great job on our own."

The top three agencies in France are French-owned. No American directs any major agency nor are there any Americans in top management. Even the French subsidiaries of American agencies consider themselves French companies, according to Jacques Bille, director of the French advertising association.

"They simply have to be French to understand the culture and psychology of advertising in France," Mr. Bille says.

Jobs in advertising are not exactly plentiful, either. French business schools and universities are turning out scads of graduates wanting to enter either field, and the number of new employers is not commensurate with the growth of advertising revenues. Agencies are running leaner and efficiently without adding personnel, Mr. Bille says.

An average salary for a creative director is $44,340 a year, while art directors and copywriters draw about $24,000.

Rona Rashkin, an account director at McCann-Erickson, Paris, is one American who made it into the French ad industry, after working in Helsinki, Lisbon and Milan. She says France has been the most difficult because it is the least like any country in her experience. She says fluency in French is mandatory, whereas in other markets one can function effectively in English.

However, she notes basic differences between working in New York or Paris. "In New York, everyone is an expert at something, whereas in Europe, people tend to be practiced in a number of things," she says.

She adds that an American working abroad has to be flexible, but must also thrive on constantly being among different kinds of people, eating strange foods, not understanding languages or learning languages.

• **The Netherlands.** The employment situation in the Netherlands mirrors that of other countries—tight. But there are some specific shortages, mainly copywriters.

"The main hurdle for copywriters coming here is obviously the language," says Berend Van Aren, a spokesman for the Netherlands advertising association. "Once that is mastered, the possibilities are there for employment, if you are good."

High Dutch unemployment and the red tape involved in getting residency permits are two other obstacles.

"But when people are good, there is always a chance," says Robert Benjamens, managing director of Saatchi & Saatchi Compton, Amsterdam.

Some of the disadvantages of working in the Netherlands include being paid in guilders rather than dollars, so "travel between here and the U.S. tends to be quite expensive," says Chad Chambers, an American account manager at Saatchi. Advantages include "living the European life style. Things aren't as much a rat race. You also have a lot more decision-making here, so you learn very quickly."

• **Brazil.** Unless you know something about computers or videotape, forget Brazil.

Brazilians say they have nothing against Americans, but the job market is tight enough.

Besides, says Clovis Calia, creative director at Standard, Ogilvy & Mather, Sao Paulo, "We are good." Brazil is so well known and respected in the ad world that it exports its professionals to countries such as Chile and Peru, he says.

An average salary for a creative director in Brazil is $57,000; copywriters average $36,000.

At most multinational agencies in Brazil, there is only one expatriate, the ceo, and the paperwork for entry is unbelievable, says Peter Frye, the new ceo at SSC&B:Lintas, Sao Paulo.

One adman says there is a desperate need for help on the production side of advertising, and any top-notch foreigner would be welcome. MPM Propaganda's managing director, Petronio Correa Filho, says his agency is looking for someone who is up-to-date on all the latest techniques. He says MPM is willing to try to find a way to get that person a visa.

• **South Africa.** When it comes to finding a job in South Africa, now is not a good time.

"Chances were already slim that Americans would come here to work because of the poor economy and the weak rand but now the state of emergency [declared July 21] will make South Africa a total no-go area," says a source at Grey Advertising, Johannesburg.

There are rumors that major agencies, such as Grey Advertising, BBDO International and Ted Bates International, have dropped 120 people between them within the past few months.

Smaller shops are doing the same.

Some people point out the right person will always find a job. "We are permanently looking for people, but we are not actively recruiting because of pressure on ad budgets," says David Howell, Young & Rubicam's deputy manging director, Johannesburg.

This is quite a contrast to a few years ago, when South African agencies were actively looking abroad for copywriters and other creative people.#

Tropicana account squeezed from B&B

By STEWART ALTER

Days after Beatrice Cos. fired its controversial chairman James Dutt, its Tropicana Products subsidiary last week pulled its $15 million ad account from Benton & Bowles, New York.

The split, which an agency internal memo says was "initiated" by the client but "precipitated in part by us" and "with which we don't disagree," ends a 14-month relationship that began dreamily but turned sour five months ago when Beatrice installed new management at the Bradenton, Fla., company.

A Beatrice spokesman said the timing of B&B's firing was unrelated to that of Mr. Dutt. The spokesman said it was not a move to consolidate agencies, which has been central to the company's marketing strategy, and left open the possibility that the $15 million account could be assigned to an agency not now in the Beatrice family.

An agency source said Beatrice is expected to contact prospective new agencies this week. In April, 1984, when it first won the Tropicana business, B&B was nothing short of jubilant, with senior vp Theodore Burnett stating at that time, "We put more time into this than any other new business we've gone after" (AA, April 30, '84). The competition pitted B&B against MCA Advertising, the incumbent; Ted Bates Advertising/New York, and D'Arcy MacManus Masius, which shortly will merge with B&B and whose Beatrice assignments in Chicago, including County Line cheeses, are unaffected by the Tropicana move.

After the sudden departure of chairman James Dutt, who's Beatrice now? See Page 3.

B&B itself continues to work with Beatrice, having become the first agency two months ago to win an assignment from Beatrice's new-products group, and also

Franchising comes to fashion as both Benetton (and its pics of young ethnics in complementary clothes) and the Gap—trying to shed its blue-jean image—look to McDonald's as a model.

'Fast fashion' hot retail arena

By PAT SLOAN

New York—Luciano Benetton sees his company as a competitor of McDonald's. Esther Unterman thinks of McDonald's founder Ray Kroc as a sort of guru. But, neither of them sells fast-food.

What both push is fashion—fast fashion.

As president of Aca Joe, a franchised retail chain in the U.S. that grew out of the original Acapulco Joe in Mexico, Ms. Unterman believes that, like McDonald's, she is "offering people what's needed: Quality, moderate prices and great service. It's simplification and you need it in your life. People have little spare time to investigate different designers."

At Benetton, this comparison is drawn: "The fast-foods distribution plan and production concept of one nerve center is very similar to ours," assays a spokesman who pinpoints another commonality. "People with a lot of things to do in a limited amount of time can go

Fending off Campbell's dry-mix entries

Lipton ladles new soups

By GAY JERVEY

Thomas J. Lipton Inc., No. 1 marketer of dry-soup mixes, next month will introduce two new product lines just as canned-soup king Campbell Soup Co. makes a heavy foray into the dry-soup arena.

Triggering what promises to be the most aggressive soup season in its 70-year history, Lipton will begin national distribution Sept. 1 of both International Soup Classics, a family of upscale entries, and an expanded and repackaged line of Hearty Soup mixes, billed as containing more chicken and beef than regular dry soup. Young & Rubicam, New York, handles both products.

Campbell's line of dry Quality Soup Mix items is due on supermarket shelves this fall as well, backed by a $20 million ad campaign by Leber Katz Partners, New York (AA, July 15).

Sources said Englewood, N.J.-based Lipton will nearly double its 1984 soup spending, estimated at some $25 million. Lipton won't disclose its ad budget, but the company is expected to spend heavily for its flagship soup lines as well to fend off Campbell.

The $434 million dry-soup market—of which Lipton has an estimated 45%—is no doubt alluring to Campbell. According to Anthony Franke, vp-food division at Lipton, per capita consumption of canned soup rose just 2% from 1983 to 1984, compared with a 10.1% gain for dry soups. Of that, instant varieties grew by 17.3%, versus 8.2% for regular mixes.

During the past few years, Lipton has beefed up its sales, marketing and new-product development efforts. The company recently named James Benson as senior vp-marketing, a post that was vacated a year and a half ago when Dolph Von Arx was promoted to exec vp-general management. Mr. Frank succeeded Mr. Benson as vp-food

Last Minute News

McCann asks sister shops for Coke ideas

New York—McCann-Erickson reportedly has asked sister Interpublic agencies SSC&B and Marschalk Co. to help come up with ideas for new Coca-Cola advertising. McCann officials could not be reached for comment. A Coca-Cola USA spokesman said the company was not aware that these agencies were working on any ads for it and Coke has not assigned them any responsibilities. Sources at parent Interpublic say all agencies have pitched in periodically and this would not be unusual.

CBS is first net to sell stand-alone 15s

New York—CBS Television Network has become the first tv network to sell stand-alone 15-second units. The three nets now sell 15-second units only as part of a split-30 unit. CBS says it decided to sell the 15s because many advertisers now have 15-second commercials.

Who will take over Ward's catalog?

By PAUL L. EDWARDS
and LAURIE FREEMAN

Chicago—Montgomery Ward's decision to abandon its catalog operations at the end of this year and concentrate on retailing appeared to bring an end to the business begun by Montgomery Ward in 1872. But Advertising Age has learned that far from being over, discussions are under way that could result in the catalog operation being transferred to Signature Group, Ward's wholly owned subsidiary engaged in financial, insurance and automobile club direct marketing.

Further, Harold Schwartz, who joined Montgomery Ward in December as vp-direct marketing to develop a line of specialty catalogs, is holding discussions with Ward's in an effort to buy the operation himself.

Ward's and Signature officials acknowledge that they are looking at the transfer of catalog operations to Signature, but would not comment further. Mr. Schwartz also declined comment.

Mr. Schwartz, who came to Montgomery Ward after resigning the

Twist and shout

The new "twist" in cigaret marketing broke Aug. 5 in test markets when Philip Morris began sales of Concord, a new smoke with what PM calls the "flavor control filter" (AA, July 22). With a twist of Concord's filter, smokers can regulate the cigaret's tar delivery from a minimum of 5mg to a maximum of 15mg, or anywhere in between. Concord ragular soft pack will test in Little Rock and Spokane; menthols will move into Birmingham and Fort Wayne. Leo Burnett USA, Chicago, handles.

Honig channels his tv expertise at LKP

By STEWART ALTER

Leber Katz Partners, New York, seeking over-all creative leadership to focus its billings growth and a broadening client list that's becoming more tv-oriented, has named onetime Doyle Dane Bernbach creative boss Marvin Honig to the new post of exec vp-chief creative officer.

M. Honig

"I believe an agency as large as ours, growing as fast as we are and in the direction we are, needs a single creative leader," said Jonathan Adams, who became president-chief operating officer 10 months ago as one in a series of steps (of which Mr. Honig's joining is the latest) to establish a new generation of management at LKP.

"The system of multiple creative leaders, which we've had, makes it difficult to have a single creative leadership, single standards and a single philosophy," continued Mr. Adams. Creative responsibilities had been shared by senior vps Jack Silverman, Charlie Piccirillo and Alex Mohtares. They now report to Mr. Honig, who comes off a short stay at Geers Gross Advertising, New York, as vice-chairman/executive creative director.

LKP, now a $280 million shop, is considered strongest in the marketing and new-products areas, with new products it has helped launch accounting for 80% of its billings.

"Our creative product has been very solid and effective at introducing new products and growing our clients' businesses, but between solid and excellent there is a difference," Mr. Adams said.

Besides providing a creative focus, Mr. Honig can also be expected to help provide LKP with a specific type of creative talent, namely, tv advertising. Only 24% of LKP's billings are in tv, a small percentage for an agency of its size.

Once primarily a fashion and retail

Murdoch buys Metromedia's tv syndie arm

By VERNE GAY

New York—In what may be the final addition to his tv empire, Rupert Murdoch has purchased Metromedia Producers Corp., Los Angeles, for an undisclosed sum.

The syndication arm of Metromedia Inc., Secaucus, N.J., is perhaps best known for co-producing extravagant first-run failures such as "Thicke of the Night" and the "soap flopera" "Rituals." The unit was set adrift after Mr. Murdoch purchased the Metromedia tv station group for $2.1 billion (AA, May 9).

The buyout of MPC ensures the unit will survive, though sources said the final form is unknown. Mr. Murdoch may fold it into 20th Century Fox Film Corp., Los Angeles, a major tv producer and syndicator, of which he is half-owner with Marvin Davis.

In Metromedia Producers, Mr. Murdoch gets a unit with a checkered track record. While MPC is fairly strong in off-network syndication, its first-run failures contributed to the belief that a fourth network is unattainable. Mr. Murdoch, however, has often been described as desirous of a fourth network and with MPC he at least buys a company that's been trying.

The acquisition throws into question the future of Metromedia Television president Bob Bennett,

Late West Coast news

20th Century Fox to stick with JWT

Twentieth Century Fox Film Corp. will stick with its current agency, J. Walter Thompson Entertainment, on its $35 million account, Fox marketing president David Weitzner decided late last week. The former marketing head of Avco Embassy, who joined Fox four months ago, acknowledged the studio had been talking to Los Angeles agencies, but described the process as an "informal overview." BBDO/West, Benton & Bowles, Bozell & Jacobs, Needham Harper Worldwide and N W Ayer all had made overtures to Fox regarding the account.

Vita-Fresh Co. will introduce the first chewing gum containing eight essential vitamins next month in Denver, Phoenix and Tucson market tests. The Garden Grove, Cal., vitamin company will support the Vita-Fresh chewing-gum launch with a schedule of animated tv commercials, presumably playing up its dietary benefits, starting the second week of September. The gum will be available in spearmint, peppermint and bubble-gum flavors. The company, making its first foray into the $1.8 billion market dominated by William Wrigley Jr. Co., is in the process of expanding its manufacturing and warehousing capacity by acquiring Sharpe Nutritionals, a New York-based vitamin and

"The board essentially said [to Mr. Dutt (r.)], 'We like your ideas, but we don't like you.' "

After dumping of Dutt, who's Beatrice now?

CHICAGO—The departure of Beatrice chairman-ceo James Dutt eliminates only the focal point for many of the questions that have been raised about the future of the nation's largest diversified foods company.

The questions, and the task of finding satisfactory answers, remains for retired vice-chairman William Granger Jr., who was named by Beatrice's board of directors to replace Mr. Dutt Aug. 3.

Mr. Granger inherits leadership of a company that has lost most of its top executives and where morale is said to be critically low among those who remain (AA, July 29).

Problems caused by Beatrice's $2.7 billion acquisition last year of Esmark, including questions about which of the latter's business units to keep and which to sell, and how to further reduce Beatrice's heavy debt load that resulted from the buy, also are still to be resolved.

Most analysts say they expect few major changes in Beatrice's strategic and marketing directions in the near future. "The board essentially said [to Mr. Dutt], 'We like your ideas, but we don't like you,' " said E.F. Hutton analyst George Novello.

As such, Mr. Dutt's plan to make Beatrice a more

(Continued on Page 75)

Ogilvy, FCB escape poor quarter trend

By STEWART ALTER

NEW YORK—The slowdown in ad spending, which many agency executives have confirmed is in the cards for the second half of the year (AA, Aug. 5), already seems to be in evidence in disappointing second-quarter results for the public ad agencies.

With the exception of Ogilvy Group and Foote, Cone & Belding Communications, most of the public shops have reported declines or only very modest increases in second-quarter net income or first-half earnings *(see chart on Page 74)*.

While these are comparisons with a very strong 1984, in which the Olympics helped boost ad spending, the earnings declines apparently reflect three general causes: Unrealized revenues expectations; individual problem spots at different agencies, and the impact of the strong dollar, a situation that recently has reversed itself and should have a positive impact on third-quarter results.

"It would have surprised absolutely nobody that comparisons this year would be difficult, but we are already seeing slowdowns in the second quarter," said Charles Crane, who follows agency stocks at Oppenheimer & Co. "Some agencies have set expense budgets in anticipation of a certain rate of growth throughout the year, but that growth rate is now falling behind."

But, added Mr. Crane, "each individual situation has its own explanation. So it's difficult to make broad generalizations."

BBDO International, which has the largest agency group in South Africa, has seen business problems related to that country's difficulties. "Specialized businesses are the first to turn down," said exec vp Steve Kahler, referring to problems that occurred first with BBDO's nonagency subsidiaries, "but it's beginning to affect the whole business."

Mr. Kahler also noted that the agency started seeing a slowdown in the fourth quarter of 1984, but "did not take it as an ongoing signal" and kept expense spending up. "It's not going to be a gangbuster year," said Mr. Kahler. There's still "a good chance" it could be up, "but not dramatically. There's no way for that after being down two quarters in a row."

Other agencies have also run into specific business-segment problems. Doyle Dane Bernbach Group cited a "softness in advertising expenditures most notably in the agriculture sector" this year. DDB also cited the absence of hefty Polaroid Corp. and Atari billings this year, which DDB had in 1984's first half.

Mickelberry Corp., which suffered the largest decrease in earnings among the public agencies this year, also has had some problems. Calvillo, Shevack & Partners, for-

For Pete Rose, few endorsement hits

By ROBERT RAISSMAN

A few days before last week's two-day Major League Baseball strike, a reporter asked Pete Rose about the owners trumpeting the fact that the average baseball player's salary is more than $300,000.

Mr. Rose reminisced about the time he entered the free-agent market, visited several owners and came away with a very lucrative deal. "I got what I wanted," he said, "and I didn't have to put a machine gun to any owner's head to get it."

That is the same approach Taft Merchandising Group, the New York-based subsidiary of Taft Broadcasting Co., Cincinnati, is taking in marketing the 44-year-old player-manager of the Cincinnati Reds who, when play resumed last week, was just 24 base hits from breaking Ty Cobb's 57-year-old record of 4,191 career hits.

When Taft gained Mr. Rose's marketing rights in October, Bill Hayes, managing director of Taft's sports division, decided not to pitch Mr. Rose to companies strictly on the basis of his quest to break Cobb's record—even though that inevitable event loomed as baseball's promotional equivalent to "Who Shot J.R. Ewing?"

Taft is telling advertisers the quest for the record will generate a tremendous amount of national publicity. That fact, added to the events comprising the Rose career, makes a Pete Rose package considerably more attractive than it was five years ago, according to Mr. Hayes. Although Mr. Rose has appeared in a number of national commercials, most notably for Beecham Products' Aqua Velva and Combe Inc.'s Grecian Formula, industry sources said he has been hard to sell.

"Pete hasn't gotten the endorsements he has deserved over the years," said an agent who declined to be identified. "He's out of the rough-and-tumble Ty Cobb mold, not the Steve Garvey goody-goody type."

Since signing with Taft, Mr. Rose has landed just one major national endorsement: General Mills for Wheaties.

His other promotions have not exactly been blockbusters: A hitting training device, assorted caps, t-shirts, key chains, a portrait by Andy Warhol that will be available in silk-screen prints for $2,000 each and a Rose collage going for $175.

Record breakers have had a tough time

(Continued on Page 70)

French doors open to tv commercials

By CLAIRE WILSON

PARIS—Independent commercial tv will finally become a reality in France following the government's long-awaited decision earlier this month to allow two networks to begin operating next year.

In addition, about 50 local commercial stations will be allowed to operate regionally.

The programing on one network will be general interest; the other will feature an all-music format.

Advertisers in France eagerly welcomed the development. They are accustomed to three government-run networks, each of which offers only about 21 commercial minutes a day, and one pay tv station.

"This is what we've been waiting for," said William Tragos, ceo at New York-based TBWA, an agency billing about $42 million in France. "Every single advertiser in France wants more tv time.

"France is a big market where per capita advertising expenditures are low because of the lack of television broadcast time," Mr. Tragos said. "The two new commercial networks are going to make France a buoyant market.

"You can compare it to Italy,

Cats trigger pet-food gains

By JOHN C. MAXWELL JR.

Last year was a fairly good one for the pet-food industry, with a 6.4% gain in retail sales. Moist dog food and soft dry dog food enjoyed the greatest annual gains, rising a respective 14.2% and 40.8%.

The dog-food category enjoyed a 5.3% increase in dollar sales, but the biggest winner was the cat category, up 8.3% thanks to a new segment, "Cat treats," which was included this year for the first time.

A recent entry onto the pet-food scene, cat treats already have more than $17 million in retail sales. Canned cat food led existing categories of cat food with an 8.1% gain.

The reason for the increase in the cat area appears to have a lot to do with demographics. While dogs still are the No. 1 pet, cats are gaining fast. Indications are that the cat population is increasing, while the dog population is flat to decreasing.

With more than 23% of the population single, more women working, increasing numbers of apartment dwellers and an aging population as a whole, cats, and thus cat-food sales, are on the rise.

It is interesting to note that more than 75% of all pets in the U.S. now eat some type of commercially prepared food. This again relates to demographics. With more women working, there is less time to prepare full-scale meals and more single-serve, convenience foods being used.

The canned dog market was down 2% to 3% in unit volume in 1984, and appears to be going through a similar decline in unit volume through the first five months in 1985. In the dry dog-food category, unit volume was about flat throughout 1984, but in the first five months of 1985 we are beginning to see a decline. This has been and probably always will be the largest pet-food category, due to the price/value consideration.

The moist dog-food category also experienced a volume decline in 1984 of 6% to 8%. However, the rate of decline in this category has slowed. The 1984 decline was slower than that of previous years, and so far through 1985 units appear to be flat to down about 2%.

In cat food, the largest growth is coming from the dry cat-food area, which had a unit volume increase of about 5% year-to-year in 1984 and is running up about the same percentage for year-to-date 1985. The canned cat-food area was up about 3% in 1984 versus 1983, and is up another 3% through the first five months of 1985. It should be noted that for this category, virtually all the growth is coming from the specialty or "gourmet" segment. This area had gains of about 9% and 8%, respectively, in 1984 and for 1985 year-to-date.

The other part of the canned cat-food segment is the "maintenance," or cereal-based products, which are down 9% and 8%, respectively for the 1984 and 1985 periods. Moist cat food saw total unit growth of about 1% in 1984, with a fairly flat performance thus far in 1985. As the cat population grows, and owners cater to their felines' finicky tastes with gourmet products, cat treats could become a small but profitable specialty segment.

Purina retained the No. 1 position, but had a market-share decline of a little more than a share point to 27.1%. Nestle's Carnation lost a half share point, but retained its No. 2 position with 11.4% of the market. The top seven companies as a whole remained basically unchanged, with the exception of GrandMet's Alpo and Quaker Oats. Quaker moved into sixth place with 6.3% of the market, while Alpo dropped to No. 7 with 5.9% share.#

Mr. Maxwell is with Furman Selz Mager Dietz & Birney, New York.

Newspaper ad spending up

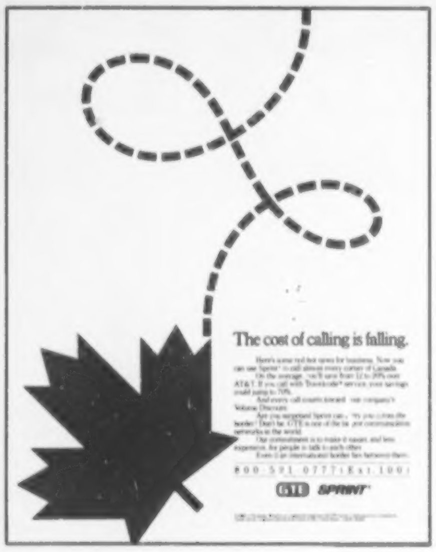
New York—The Advertising Age Flash Report for April shows an over-all increase in advertiser spending in major market newspapers of $12 million from year-ago levels.

Over-all, 11 of the 16 categories showed gains, with the largest percentage increases coming in the radio-tv-phonograph-records category, up 23% to $15.4 million; public service utilities and communications, up 35.4% to $8.4 million; airlines, up 16.8% to $14.5 million; new passenger cars, up 16.8% to $12.8 million, and alcoholic beverages, up 16.2% to $2.6 million.

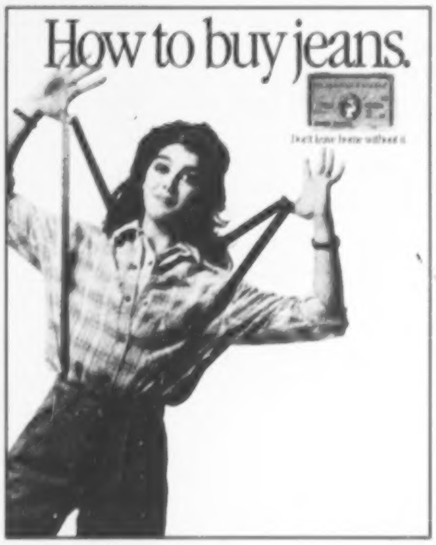
Among other gainers were the department stores category, up 2.7% to $78.1 million; food stores, up 4.2% to $25 million; amusements, up 0.2% to $25.7 million; general merchandise stores, up 7.5% to $36.4 million; publishing and media, up 7.2% to $11.7 million, and banks and trust companies, up 9.9% to $9.8 million.

Among the losing categories were cigarets, off 34.4% to $3 million; stock, bond and investment houses, down 34.2% to $1.3 million; computers, equipment and services, down 13.3% to $4.7 million; computer stores and supplies, down 3.2% to $4.2 million, and cameras, photo supplies and services, down 76.5% to $236,487.

The Flash Report is compiled for Advertising Age by Media Records Inc. from linage measurements in 29 daily and 23 Sunday newspapers in 15 major markets. These markets are: Atlanta, Baltimore, Boston, Cincinnati, Chicago, Cleveland, Dallas, Denver, Detroit, Los Angeles, New York, Philadelphia, San Francisco, Washington and Youngstown.#



Good use of spot color leaves a good impression in this ad for GTE-Sprint's Canadian long-distance service, via J. Walter Thompson USA, San Francisco. Art director, Tom Freyer; copywriter, Rachel Gilday; illustrator, Nicholas Sidjkof.

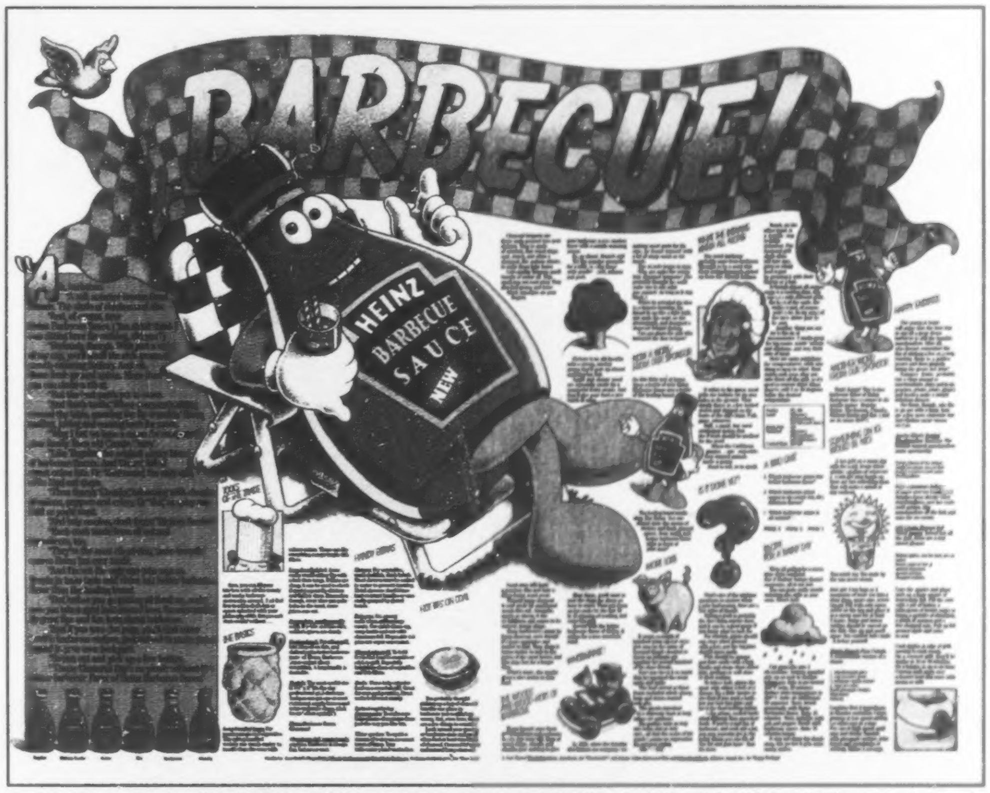


How to buy jeans.
Don't leave home without it.

Ogilvy & Mather, New York, did a splendid job in translating the long-running "Do you know me" campaign for American Express from video to print in this effort. We looked twice, both at the model and the card, to make sure she *is* Brooke. Art director, Nancy O'Neal; copywriter, Jeff Atlas; photographer, Henry Wolf; creative director, Tom Rost.

DEWAR'S PROFILE

Equally good use of spot color makes this ad, new in the long-running "Dewar's profile" series from Leo Burnett USA, Chicago, for Dewar's scotch. Creative director, Ted Bell; art director, John Eding; copywriter, Richard Rand; photographer, Lawrence Robins.



A good use of color illustrations with long copy drew our attention to this ad for Heinz barbecue sauce, via Ketchum Advertising, Pittsburgh. Creative director, John Dymun; associate creative director, John Chepelsky; art director, Craig Otto; copy supervisor, Kathy Bowen; copywriter, Lynn Epstein.

NOW YOU DON'T HAVE TO BE A WIZARD TO GET PERFECT PICTURES.
ONLY FROM THE MIND OF MINOLTA
MINOLTA

No, that's not Judy, but she does catch your eye in this color ad for Minolta cameras from William Esty Co., New York. Creative director and copywriter, George Morin; art director, Jack Robson; concept, Peter Olsen.

Best of Press selections are made by a committee of three: Hank Simons, vp-creative director of the Newspaper Advertising Bureau; James Dunaway, vp-information at the bureau, and William F. Gloede, Advertising Age's newspaper industry reporter. National System Inc., St. Louis, provides tear sheets to the Newspaper Advertising Bureau for much of this work. Agencies, clients and newspapers are invited to submit ads for review. Submissions should be sent to Mr. Gloede at AA's New York bureau.

Records

(Continued from Page 3)

that rock music be given motion-picture-like ratings to allow parents greater control over the type of records their children bring home.

PMRC was organized by the wives of more than a dozen powerful figures here, including the spouses of Sen. Albert Gore Jr. (D., Tenn.) and Treasury Secretary James Baker III.

The group contends that the recording industry should not only rate the records but explain the rating: "X" would stand for sexually explicit lyrics, as well as violence, profanity and suicide; "O" for references to the occult, and "D&A" for glorification of drugs and alcohol.

PMRC also has asked the recording industry to do the same for cassettes and music videos; print lyrics on record album jackets; rate concerts "according to lyrics and onstage performance," and either cover all explicit album jackets with a wrapper or keep them "behind the counter" at record stores.

Mr. Gortikov said it would be impossible to follow several of these suggestions.

He proposed, instead, that RIAA's membership, which includes virtually all the large record companies, will print a standard warning label on recording releases, resembling the warnings on cigaret packs.

The label will read something like "PARENTAL GUIDANCE: Explicit lyrics," he said. This label should do the trick because PMRC's core concern is that "an involved parent who diligently wishes to supervise the recording purchases of a child be provided with a means to exercise that parental discretion," he said.

The more specific rating system requested by PMRC is superfluous, Mr. Gortikov said, adding, "It should make no difference to a given parent desiring to 'protect' his or her child whether a given recording contains sexually explicit material or violent material." The choice of multiple rating symbols is unnecessary to accomplish the PMRC's own cited objective."

PMRC earlier had indicated it might accept such generic labeling.

As for PMRC's other requests, Mr. Gortikov said:

- It would be impossible for the recording industry to devote half of each album cover to printing lyrics, not only because this area is used to convey the mood of the record but also because, legally, recording companies seldom own the reprint rights to all the songs on an album.
- As for rating concerts, recording companies are "devoid of definitive control over the performances of their artists."
- Merchandising also is beyond the venue of his industry. The recording industry cannot dictate individual stores' display practices.

PMRC also has asked that the recording industry work with the broadcast media, providing them with lyric sheets and ratings for all videos and songs.

But Mr. Gortikov declared it is up to the media alone to choose what they air. By law, he added, each station is obliged to be familiar with what it broadcasts.

"That is its responsibility, not the role of the recording company," he said.

Mr. Gortikov deplored what he called the PMRC's "unfair" focus on the recording industry. When it comes to influencing children's morals, he said, "Sound recordings take a back seat to the range of explicitness bombarding children from far more accessible media: Prime time television, soap operas, motion pictures, radio, billboards, magazine advertising, coin-vended sex journals, books [and] real-life behavior."

The PMRC also has ignored "the core problems," he asserted, "such as crime, unemployment, poverty, parental permissiveness [and] fragmentation of family units."#

Late Broadcast News

Raise 'Kane' in Nov.; commit 'Sins' in Feb.

New York—**Dancer Fitzgerald Sample** in its 1985-86 network tv season report says CBS plans a November airdate for its "Kane & Abel" miniseries. "Sins" is due in February," "If Tomorrow Comes" in March and "Dream West" and Procter & Gamble's "Alice in Wonderland" both in April. (Earlier, other agency sources had felt "Kane & Abel" might air in September, "Sins" in October and "Alice" in November.) As previously reported, ABC's "North & South" is set for Nov. 3, 5, 6, 7, 9 and 10 (AA, July 22). The sequel, "Love & War," is due in May. NBC's "Long, Hot Summer" will air in October, "Mussolini" in November and "Peter the Great" in February. "Dress Gray" is likely in March and "Rage of Angels II" in May.

Dallas—**Bozell & Jacobs** picks CBS to top the coming prime time season. B&J projects CBS will bag a 16.2 rating and 26 share from A.C. Nielsen Co. NBC will run to a virtual tie, though B&J says other factors give the crown to CBS. ABC will get a 15 rating and 24 share. Over-all share is projected to drop to 76 from 77 last season. B&J picks NBC's "Golden Girls" to be the season's only solid hit, with a 25 share. B&J's list of "maybes" (23 to 24 share) includes ABC's "Dynasty II: The Colbys," "The Insiders," "MacGuyver" and "Our Family Honor"; CBS' "Twilight Zone," and NBC's "Amazing Stories," "Hell Town" and "Hitchcock Presents." The "misses" (22 share or less) include five each from ABC and CBS, and two from NBC.

New York—**LBS Communications** has acquired a minority interest in All American Television. The two barter-syndicators now are discussing several tv programing co-ventures.

New York—**Capital Cities Communications** and **ABC** have unloaded a total of six radio stations for more than $100 million. Gannett Co., Rosslyn, Va., will acquire ABC's Denton (Dallas), Tex.-based KTKS (fm) for $16 million; Malrite Communications, Cleveland, will buy ABC's KSRR (fm), Houston, and Cap Cities' KLAC (am) and KZLA (fm), Los Angeles, for $75 million, and Park Communications, Ithaca, N.Y., gets WPAT (am, fm), Paterson, N.J., for an undisclosed price. The sales, made in accordance with FCC rules on multiple ownership, are subject to the consummation of the merger between Cap Cities and ABC in January, 1986.#

Quarter

(Continued from Page 3)

merly Nadler & Larimer, continues to lose money, acknowledged a Mickelberry spokesman, though he noted that "at the same time we recognize they've gone through extensive management changes." The spokesman said Mickelberry expects results to improve in the second half.

Combined with that, Cunningham & Walsh, which last year lost its huge Brown & Williamson account and closed various unprofitable U.S. offices, only recently has begun to turn the corner. C&W had a "small profit" in the first quarter and "was starting to bounce back in the second quarter. Its 1985 second quarter was much better than its second quarter last year," said the Mickelberry spokesman.

But while C&W posted gains in the second quarter, Mickelberry's Caribiner business-conference subsidiary showed a decline in that period. Although Caribiner is up in 1985's first half compared with 1984, its first-half income this year was primarily in the first quarter, while last year the second quarter was stronger. It contributed $1 million to Mickelberry's profits in the second quarter of 1984, but only $250,000 in the second quarter of 1985, said the spokesman.

International losses also tended to offset domestic gains for the big shops. BBDO was up 9% in domestic revenues but down 6% in international gross income. The Interpublic Group of Cos.' earnings decline in the first six months is "in large part due to the negative effect of an exceptionally strong dollar that continued during most of the first half of 1985 and to weakness of certain foreign operations caused by economic conditions in those countries," explained Philip Geier Jr., Interpublic chairman.

JWT Group's U.S. revenue growth, especially for its J. Walter Thompson USA agency, was particularly strong—up 22% in the quarter and 19% in the year. And JWT, which benefited in its domestic growth by investment spending, particularly on creative staff in recent years, will continue with the same policy over-all. JWT chairman Don Johnston said, "We continue to expect a strong financial performance for the year," adding that JWT is "maintaining high levels of spending in such strategically important areas as multinational client services, the recruitment advertising unit, new-business development, facilities to accommodate our growth and expansion into new markets."

In figures previously not divulged, Mr. Crane of Oppenheimer offered estimates of what JWT has been spending in building its multinational client services organization: $5 million to $5.5 million a year, and $1.2 million in the second quarter.

Last week, FCB reported record earnings and revenues for the second quarter and first six months of fiscal 1985, ended June 30.

Earnings for the second quarter were $6 million, a new quarterly high and an increase of 34.3% over restated earnings of last year. Revenues were $75.4 million, up 5.4%.

Results for 1984 were restated to include Golin/Harris Communications, a pr company merged into Foote, Cone Jan. 1.

Earnings for the six-month period were $7.29 million, up 11.5% from the previous year. Revenues were $138.6 million, a new record, and 5.9% above restated 1984 revenues. U.S. revenues increased 11%, while non-U.S. revenues dropped 7%.

"While results in the second quarter represent a substantial improvement over the first quarter, our revenues continue below our initial 1985 expectations," said Norman Brown, Foote, Cone president.

"The lack of drive in U.S. advertising expenditures to date includes a number of substantial client budget reductions, as well as some postponement of spending in the second half of the year," he said.#

Agency financial results

With the exception of FCB and Ogilvy, which showed strong second quarter and first half net income gains, most of the public ad agencies were flat or down in earnings. Figures are not included for Ally & Gargano, which ends its fiscal year June 30 and hasn't reported yet. *Source:* Advertising Age.

Olds honors women execs

Lansing, Mich.—General Motors Corp.'s Oldsmobile division and its dealers are sponsoring a national annual award competition saluting the achievements of business and professional women.

Local chambers of commerce will administer the competitions for the Chamber Athena Award.#

Mecca finds new home

New York—Mecca Communications, a full-service communications company specializing in healthcare promotion, has relocated to 220 East 23rd St., 10010.

French

(Continued from Page 3)

where in the last two or three years we've seen a 25% growth in ad expenditures."

It is still not clear who will run the two new independent networks in France or how much commercial time will be available.

But most industry sources agree the new networks will only partially ease the demand for commercial time by advertisers and probably will cause an increase in tv advertising costs.

The government also has to decide whether the two networks will operate on a free-market system or whether they will be as restricted as the three government-run networks.

Retailers and restaurants, for example, are prohibited from advertising on tv in order to protect the French press, which fears the new networks will siphon their ad revenue.

The general-interest network will be run by two existing tv networks, sources say, probably Radio Television Luxembourg and Telemontecarlo, which just got an infusion of capital from the sale of 90% of its Italian network to Brazil's TV-Globo (AA, Aug. 29).

Potential investors in the all-music station include the international agency network Publicis, publisher Daniel Filipacchi, private radio stations Energy and Europe 1, Gaumong Films, Club Mediterranee and the French subsidiary of Virgin Records.

The move is not expected to affect state-run networks TF-1 and Antenne 2. But FR-3, which currently only broadcasts during the evenings, will begin afternoon cultural programing that will be switched to France's TDF-1 satellite network in 1986.

Operations at Canal Plus, the pay tv station, will not change.#

Collecting Lions in Seattle

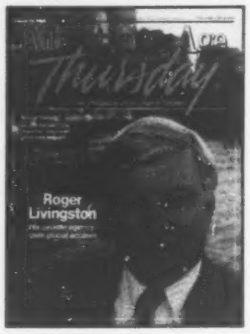

Photo by Matt Mcvay

Roger Livingston's philosophy is that good advertising has staying power. Based on that outlook, the Chiat/Day alumnus has been a roaring success. His Seattle agency's list of awards is topped by back-to-back Gold Lions from the Advertising Film Festival in Cannes, an unheard-of feat for a U.S. agency. *See Page 4.*

Revealing

"The Nude You," reads the ad in *New York*. "Ever fantasized having a private portfolio of yourself in the nude? Museum-quality work by Parisian female photographer. Women only. A perfect gift for your loved one or just yourself. Call Marie-Claire. 212-473-1566." Behind that ad is a terrific story of art and commerce. *See Page 42.*

Radio with a bite

Canadian radio station CINE doesn't have an easy-listening format—at least not for mosquitoes. The fm station accompanies its lunch and supper-hour broadcasts with the sound of flying male mosquitoes. Listeners hear the subtle flapping only between songs, but to mosquitoes it's like fingernails on a blackboard. *See Page 44.*

Special Report—Sales Promotion

New testing, sophisticated premiums and product tie-ins are making sales promotion the Cinderella of marketing. *Page 15.*

O'Toole to retire from FCB

By DENNIS CHASE

"I once promised myself that if I woke up some morning, thought about what I do for a living and felt anything but elation about going to the office, I'd hang it up and go into free-lance writing."

So wrote John O'Toole in his 1981 book, "The Trouble With Advertising." Early this week Mr. O'Toole, 56, took his own advice and announced that as of the end of this year he would retire as chairman of Foote, Cone & Belding Communications, a position he has held since 1981.

J. O'TOOLE

Norman Brown, now the FCB president and chief executive office, will take on Mr. O'Toole's title as well, at least for a while. He conceded that the agency may have "other plans" which he would not divulge.

Mr. O'Toole's decision to retire after 31 years at the agency—three years before FCB chairmen customarily step down—apparently was prompted by a few French words: Deja vu and ennui.

In an internal memo to the FCB staff, he admitted to "having awakened a number of mornings lately feeling something less than elation." He said, "What I do for a living has moved me farther and farther" from "precious" involvement with clients or even FCB employes.

In an interview with Ad Age, Mr. O'Toole recalled a time in January when he raced to Italy to solve a problem with a client, who was considering dropping the agency. "It was the most fun I had had in a long time," he said. "I found myself wishing for another crisis to solve."

He said executives at big global agencies spend a lot of time buying and selling properties and very little time working with clients on the creative product.

"What John is facing is common to executives who come up through the creative end of the business and whose success leads to life in the executive suite, where they then face a whole different set of activities," said Mr. Brown.

He added that the impact of Mr. O'Toole's departure on day-to-day activities will be minimal because "John's role lately has been heavily with the Four A's and not directly with clients."

Mr. O'Toole joined FCB's Chicago office as a copywriter in 1954, rose to president in 1970 and was chairman of the American Assn. of Advertising Agencies in 1984-85.

He plans to devote his time to free-lance writing and consulting with advertisers to "help them get 100% of what their agencies can and want to provide creatively."

He has prepared a seminar to help advertisers "evaluate, care for and encourage" creative advertising ideas and may turn it into a book. He will also be on retainer to FCB as a consultant.

During his tenure as FCB chairman, the agency's worldwide billings increased from $1.2 billion in 1981 to $1.8 billion last year.#

Redesigning the Ralston Purina Special Dinners box: From a bit too "uninterested" to staring the consumer straight in the eye.

Package design gets a bit catty

By Lenore Skenazy

They arrive meticulously groomed for the auditions. They're nervous. They eye each other with envy, fear. . .and sometimes, undisguised lust. An attractive group.

When the photographer summons each in turn they sit and strut and stretch for the camera.

At his request, they lick themselves. About the only thing these furry knockouts won't do is sign their own release forms.

A paw print will suffice.

"It's exactly like modeling," says Rafael Feliciano, senior designer/director at Gerstman & Meyers, the Manhattan-based design company revamping Ralston Purina's Special Dinners cat food packaging. The four different dinner flavors require four different cats, one for each box. Finding the photogenic feline for each flavor requires no less patience and skill than, say, finding the right model for a skin cream.

G&M has been designing packages for Ralston Purina for a dozen years. They know cats and cat owners. They know that the flagship Cat Chow brand package calls for the tabby equivalent of Everyman; that Kitten Chow has to look cute enough to cuddle, and that Special Dinners packaging must look. . .special.

Design

To begin the Special Dinners project, G&M contacted a local animal talent agent, Linda Hanrahan, and requested a review of her purebreds. Says Larry Riddell, G&M vp-senior design director, "We were looking for upscale cats," ones with obvious breeding, "but not so exotic they'd look grotesque."

From the glossies, G&M chose 10 candidates for a photo session. Usually, the majority of those chosen are female because, according to Mr. Riddell, "Female cats look more attractive. Male cats are more like Morris—full around the face. They have this macho look." A kindly look is key.

Though the Special Dinners line premiered in 1970, this is the first time the cat on the package looks the consumer straight in the eye. While not a new pet food package tactic—G&M claims to have originated the direct stare several years ago—it is a dramatic departure from the previous Special Dinners' coy cat, who had looked, admitted one G&M designer, a bit too "uninterested."

Coaxing a cat into an engaging stare, however, is not as easy as saying "sardine."

Cats are nervous animals, and won't tolerate being photographed for more than half an hour. Some of them get skittish at the first click and that's it. The noise upsets them. Or the lights. Or the attention. To be on the safe side, G&M always books two or three similar cats for each package.

Not only do the cats get fidgety, they get feisty. Sometimes, the fur flies. While, theoretically, the designers could mix and match the best cats from several agencies in town, or even pick the prettiest of several pet shelters' litters, in practice this proves tricky. Cats that don't already know each other are apt to pick fights.

Or lovers. The designers chuckle a bit at this fact of life, but it's true: "You can't use them if. . ." If, let's say, they're not concentrating.

So once you have 10 well bred and well behaved cats togther for a shoot: What next? For Special Dinners the challenge was to get them to lick their lips appealingly. No mean feat.

The designers—Mr. Riddell, Mr. Feliciano and Herb Meyers, principal of G&M—sat around a table discussing the intricacies of cat tongue maneuvers:

Riddell: "You put any kind of oil—"

Meyers: "*Fish* flavored oil—"

Riddell: "Well, you touch their lips with oil or cat food, and they lick it automatically."

Feliciano: "The trick is to put it some place so the lick looks natural."

Meyers: "It's very difficult to do that. The cat's tongue whips in and out in a fraction of a second."

Riddell: "Not only that—it goes halfway across their face. We don't

Marketing image plots turnaround

By Curt Schleier

"Fewer marketing people are treating sales promotion as a stepchild," says Stephen Field, president of Marcon Marketing Services, New York. Ron Hirasawa, president of American Marketing Services Corp., Chicago, goes one step further and says, "Promotion is moving from being the stepchild to the Cinderella of marketing."

That's the optimistic view almost universally shared by promotion executives around the country, all of whom believe the industry is a perfect fit for the marketing princess' glass slipper.

The burgeoning respect being accorded sales promotion is hardly a fairy tale. In fact, it is a culmination of a lengthy struggle to shuck an image of shysterism that has plagued the industry, probably since the days of traveling medicine shows.

The credit for this shift in attitude goes to a variety of factors and trends that have combined to focus attention on a segment of the marketing mix that its practitioners argue has been given short shrift far too long.

Mr. Hirasawa says one reason for sales promotion's rise may be that "the cost of advertising has skyrocketed to the point where $10 million to $12 million is considered a small budget."

Mr. Field says sales promotion's metamorphosis can be traced to the latter part of the 1970s. "With the economy cooling, companies needed demonstrable results a lot quicker. That's when promotion started to heat up."

Whatever the cause, marketers during the past decade have been throwing increasing amounts of money behind sales promotion, to the point where consumer and trade promotion budgets now far exceed money spent on advertising. For example, Donnelley Marketing's most recent annual survey of promotional practices shows promotion budgets in 1984 accounted for 64.4% of total marketing expenditures, and advertising accounts for the remaining 35.6%.

With increased expenditures came increased attention. Companies that largely ignored sales promotion—or relegated it to a back burner—began to focus on it and demand increased creativity and sophistication from their own staffs and outside promotion agencies.

The number of avenues to which this creativity and sophistication can be applied is limited, says Jim Feldman, who heads Feldman Associates, Chicago. Mr. Feldman quotes his friend Harry Blackstone, the magician, as saying there are only 10 magic tricks in the world. Everything you see uses a variation of those basic techniques. "When we look at the sales promotion arena, we discover an amazing similarity to magic," he says.

"It's not so much what the mechanism is, but the form you deliver it in," says Bob Lorsch, president of the Lorsch Group, a sales promotion agency in Los Angeles.

Traditionally, couponing has been the most prevalent mechanism, and it grows in usage every year. According to Donnelley Marketing, 95% of the companies that participated in its annual survey used couponing as a promotion vehicle last year. That's up from 93% in 1982 and 1983.

However, some promotion experts contend that couponing may become a victim of its own success. They say the rapid growth in the number of free-standing inserts, now offered both in daily and Sunday papers, has led to coupon clutter.

(Continued on Page 16)

Curt Schleier is an East Coast-based free lance writer.

Image

(Continued from Page 15)

Richard Barrett, president of Glendinning Associates, Westport, Conn., says, "Anybody who steps back and looks at the total number of coupons that fall out of the paper has to say that it's too much to expect someone to spend the entire afternoon going over all of these offerings. It's too much to expect that the trade is going to tie in."

Brian Clark, director-marketing services for Vlassis Newspaper Marketing, Detroit, one of the principal publishers of free-standing inserts, says, "Clutter is an issue everyone seems to want to talk about, in the same way that clutter on television was an issue when 30-second commercials were first used."

Can in-store coupon machines alleviate some of the coupon clutter? Mr. Barrett says, "I don't see that in-store couponing machines are going to grab up much business. The reason is you want to reach people as they are planning their shopping trips. You also want to use coupons to leverage trade support, and I'm not sure in-store machines have proven that they can do that."

While the redemption rate has not been affected substantially, the total number of coupons redeemed has not kept pace with the increased number available. Nielsen Clearing House, Clinton, Ia., reports coupon distribution increased 14% from 1983, to 163.2 billion last year, while in that same period, redemption jumped a healthy, but slower 12%, to 6.25 billion coupons.

The coupon redemption rate of virtually every medium measured by Nielsen—whether it is free-standing inserts or direct mail—has declined over the past several years.

Another factor against couponing is that outside promotion agencies don't seem to like it. While they call it an effective device, they also contend it's not creative.

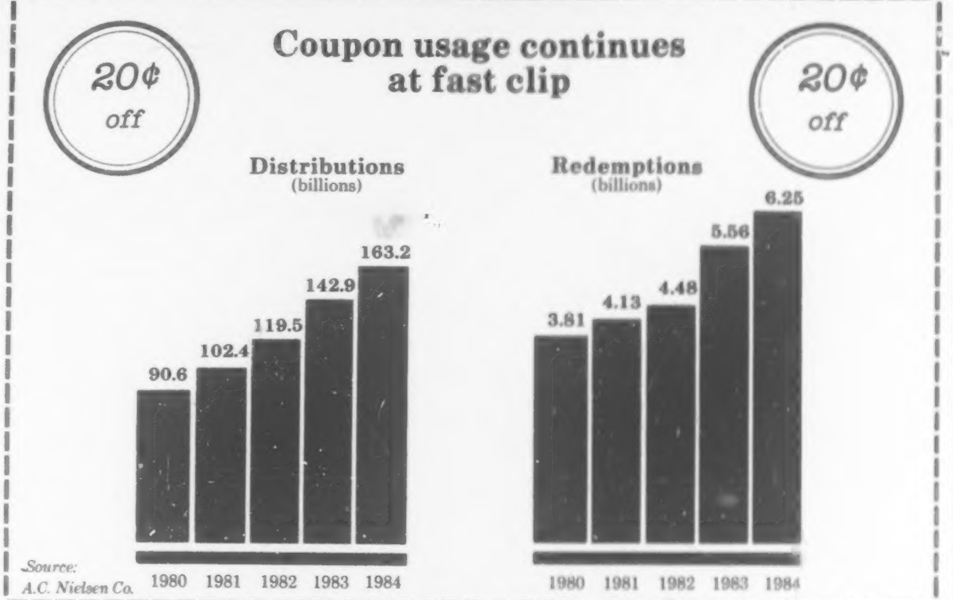
"For a brand manager, it's a quick way to solve a promotion problem," the head of one promotion agency says. "It's far easier and safer to do than go out and create something."

That opinion is shared by at least one promotion manager on the client side of the fence. Bill Shaw, promotion director for General Foods, White Plains, N.Y., agrees that "brand managers tend to like couponing. It's easy to understand and easy to do—a diabolical combination."

The consensus is that the use of couponing will continue to grow, albeit not as quickly as before. Moreover, there are likely to be changes in the way coupons are used. There seems to be a trend toward more refund offers than cents-off to avoid what Ken Bortner, chief executive officer, Product Movers, New York, calls "the misapplication of coupons."

There's also likely to be more joint multibrand promotions, such as the Beatrice Cos. "Enter the World of Beatrice" free-standing insert, involving 35 of the company's brands, out this fall. Increasingly, inserts will have a theme, tied into the Super Bowl or outdoor cooking.

Coupon usage continues at fast clip



Source: A.C. Nielsen Co.

Finally, the increased amount of data computerization made available, from the scanning equipment in stores to surveys by marketing companies, will enable marketers to "more selectively and more effectively target" direct mail recipients, in general, and coupon/sampling recipients, in particular, says Austin Chave, senior vp at BBDO and manager of BBDO Promotion, New York.

Donnelley Marketing, for example, already offers selective coupons and sample mailings to households with people older than 50, teen age girls, even users of competitive products. Even more selective, targeted mailings soon will be possible, cutting costs, increasing accuracy, and, in the words of Louis Haugh, senior vp at Frankel & Co., Norwalk, Conn., "making direct response come alive."

Another area of promotion being affected by computers and other advanced technology is point-of-purchase. Increasingly, consumers are finding interactive computer terminals in retail outlets such as automobile dealerships and cosmetics counters in department stores.

According to John Kawala, exec vp of the Point-of-Purchase Advertising Institute, Fort Lee, N.J., a California company is experimenting with a laser device that will create a human figure to give a sales pitch as a customer approaches a particular product.

Combining advertising and p.o.p. displays is not new, but it is effective and will continue to grow, according to J. Patrick Kelly, K mart professor of marketing at Wayne State University, Detroit. One company he's worked with, the Fred Myer chain in the Pacific Northwest, "began to realize its wall space was valuable, and has even developed rate cards."

Dayton Hudson and Bloomingdale's use tv monitors in their stores to advertise products. Given all the alternatives, it's not surprising to hear Frankel's Mr. Haugh, say: "It's getting more and more difficult to get supermarket and drug chains to put up point-of-purchase displays. Bigger chains want the stores to look like they're in charge, not the manufacturers."

"I've heard similar comments," Mr. Kawala says. "One of the problems, I believe, is a lack of communication. Manufacturers don't seem to know what retailers want. Our studies indicate that retailers want more p.o.p. but tailored to their stores."

BBDO's Mr. Chave, who frequently lectures on sales promotion in the 21st century, sees retailers of the future not only demanding personalized displays, but personalized promotions as well.

"With the amount of trade dealing declining, and the power of retailers continuing to grow," Mr. Chave says, "there is going to be a move toward more customized trade promotions more closely involving the retailer."

Interest in localized promotions, in general, and special events, in particular, seems to be on the upswing, particularly those that can be tied into a community event. For example, Tony Hobson of Hobson, Barnes & Associates, Atlanta, created the Strohs Run For Liberty promotion, an 8-kilometer run, with part of the proceeds from entry fees being donated to refurbish the Statue of Liberty.

The promotion ran in 123 cities last fall, involved extensive use of free radio time on "official" Run for Liberty stations, and resulted in "very high acceptance by the national retail trade," Mr. Hobson says. "We had sell-in acceptance of 70%."

Mr. Hobson says a "special benefit comes when you can tie a promotion into a charity event of high community interest. It's a marketing-plus."

But whether a charity is involved or not, Mr. Hobson notices that "with aerobic competitions and triathlons, life-style events seem to have shown considerable growth." As an example, for Raleigh cigarets, which was interested in the Middle America market, Mr. Hobson arranged a 30-city series of truck pulls to help garner interest.

Special events promotions can give agencies an opportunity to reverse the normal buyer-seller relationship. Normally, an agency will wait for a client to present it with a problem. With the right special event, an agency may approach a marketer and say, "look, I've got a solution."

For instance, Mr. Hirasawa came up with a novel way to reach the growing Hispanic market. He forged agreements with Catholic churches in Spanish neighborhoods in Chicago, San Diego and San Antonio to act as p.o.p. redemption centers. Whatever p.o.p. materials the churches receive can be turned in for anything from college scholarships to audiovisual and sports equipment.

Promotion in hand, Mr. Hirasaw sought marketers to participate. Although he won't reveal their names, Mr. Hirasawa has received indications of interest from several companies, and he expects the promotion will run next spring.

"The principle we work on is borrowed value," he says. "A bag of potato chips is a commodity. One tastes pretty much like the other. How do you give it added value? Perhaps hook it into a theme park, and offer a $7 discount on a $14 ticket. You've given that bag of potato chips an added value of $7.

"The same thing with the Hispanic promotion. If you won't buy product 'x' because we sent out a 10-cent coupon on it, maybe you'll buy it because we're donating 10 cents to charity."

Another example comes from Mr. Lorsch, who is holding discussions with the National Aeronautics & Space Administration about using the space shuttles as promotional vehicles.

Are there no storm clouds on sales promotion's horizon? While Walter Coddington, president of Walter Coddington Promotions, New York, is generally optimistic; he says that even though the amount of money devoted to sales promotion is on the rise, "a large percentage of that is still devoted to trade deals and allowances, essentially discounting."

He says there's "got to be a shift in that," but he's concerned marketers may feel they "are trapped, that they can't 'not' now offer trade deals or retailers will switch to other brands."

Like money locked into couponing, money set aside for trade deals often precludes the use of more creative promotions. Changing the emphasis from trade deals to consumer promotions—a trend already well under way—may accelerate as promotion agencies get more involved, Mr. Coddington says. "We're getting much more involved with the company's advertising and public relations. We're pushing for it, and it's been working out very well."

BBDO's Mr. Chave says the integration of advertising, sales promotion and pr under one umbrella will continue, as will the interest on the part of ad agencies in acquiring their sales promotion counterparts.

Mr. Lorsch says he's been approached several times. "I listen," he says.

"There's a danger in that advertising people have a tendency to think of sales promotion people as schlocky. But, stripping away ego, there's a certain logic to the merger. Look, I'm 35 years old, and I have to ask myself if 10 or 15 years from now I want to be at war with a multimillion-dollar corporation."

Trade wars threaten future peace of marketers

By Richard Edel

A trade war is simmering over special discounts that package goods marketers give to retailers for providing products with an extra push.

These discounts, called trade promotions, allowances or push money, build sales volume in the short-term, but also can erode long-term profitability. Experts say this deal making is mortgaging the future of some products, even while the marketers appear to be gaining market share and sales volume.

Although the money is difficult to track down, promotion allowances for package goods to drug, grocery and discount stores have grown from about $9 billion in 1979 to about $18 billion today, says Bob Schmitz, vp-research, development and planning at Majers Corp., an Omaha, Neb.-based company that monitors trade promotions for manufacturers.

Promotional dollars for package goods are divided roughly 70% grocery, 20% drug and 10% discount stores, Mr. Schmitz says. The dollar figures are staggering, compared with grocery industry profits of about $4 billion annually.

The main bone of contention for marketers is whether trade promotions bring about incremental profits through increased use of products, or whether the products eventually would have been sold anyway, regardless of promotions. Some say retailers have become as dependent on fattening the bottom line through deals made in the buying office as through sales at the checkout counter. If this is true, trade promotions could be thought of as an institutionalized form of bribery to gain and keep market share.

A 1976 study in Sloan Management Review, Massachusetts Institute of Technology, Cambridge, says 46% of accepted deals get no merchandising support in the retail outlet, and 66% of total allowances are not passed through to the consumer. One reason is that retail chains and wholesalers engage in forward buying, which means buying enough goods on promotion to have some left over for full price sales later. Another tactic is called diverting, the practice of buying goods in a market where they are on promotion and moving them to one where they can be sold at full price.

Of course, most marketers place conditions on promotional allowances, such as reduced pricing, shelf or floor display, and advertising, but that only covers the item when it is on promotion. It is not uncommon for wholesalers and retailers to borrow money, rent warehouse space and store products, if the deal is sweet enough to offset the added costs.

But retailers defend their use of forward buying and diverting to bolster margins and keep retail prices low. With net profits on grocery store operations averaging as low as 1%, it's not as though they are lining their pockets with promotional dollars. A typical trade discount of 15% to 20% to stimulate sales will do just that, and it's not uncommon for manufacturers to offer additional discounts at the end of a promotion to encourage forward buying, they say.

"It's the manufacturers who create this deal buying situation," says an executive for one of the nation's largest grocery retailers, who asked not to be identified. "If somebody hands you something on a silver platter, you're going to take it. It's a rational response to an irrational situation."

Trade deals took root in the early 1970s under the threat of federal price controls from the Nixon administration. List prices at that time were inflated to protect profit margins in case of a price freeze, and marketers cut back on pricing through deals. The dealing grew as inflation forced frequent price increases, which were rolled back to competitive levels. Once the system took hold, it became addictive.

Compounding the problem for manufacturers were high interest rates and a deep recession in the early 1980s, which caused record business failures, resulting in consolidation of the retail industry. Larger retail operations meant more buying and bargaining power for the retailer. Internal reward systems for manufacturers, based on sales, not profitability, also contributed to the promotion mania.

A final consideration is increasing use by retailers of computerized point-of-sale technology, which provides detailed information on the movement of goods. It is this that frightens brand managers into maintaining the status quo, if not increasing the promotion ante. If a manufacturer were to cut back and his competition didn't, the reasoning goes, the result would be a loss of market share for the marketer that did cut back.

TRADE PROMOTIONS
30¢

Jeffrey Toth

These factors are shifting the balance of power away from the manufacturer to retail and wholesale buyers. Oddly, however, although retailers stand only to gain from trade promotions, they too have complaints. The increasing complexity, number and frequency of trade promotions causes confusion.

"As promotional requirements become more complex, it becomes more difficult to remain consistent with the consumer," says Richard Fredericksen, vp-director of marketing for Lucky Stores Southern Food Division. Lucky Stores, Dublin, Cal., is a $9.2 billion operation with 1,600 stores in the Southwest.

"There's no perceived value [for the consumer] if you can buy a product that is on promotion as often as off," Mr. Fredericksen says. "This causes a real resistance to paying full price. Consumers think the retailer is ripping them off or they buy a brand that's on promotion."

As consumers become conditioned to seek out ever lower prices, brand loyalties are compromised, especially for marginal products. In a Needham Harper Worldwide study, the percentage of consumers saying they try to stick with major brands dropped from about 80% to 60% during an eight-year period.

In effect, says John A. Quelch, associate professor at Harvard Business School, marketers are turning the reins over to retailers by devoting less money to advertising, which creates consumer "pull," and more to promotions, which "pushes" products through trade channels.

Leading brands are the most insulated from consumer brand switching because they build a loyal franchise through advertising, which provides the marketer with leverage on the size and scope of the promotion, Mr. Quelch says. "Hunt's and Heinz catsup will always be on the shelf, but a Del Monte might have to buy space with trade allowances," he says.

Another factor is that the growth rate of retail shelf space has slowed in recent years. As a result, marketers are trapped in what Mr. Quelch calls a "prisoner's dilemma," meaning they realize that excessive promotions are destructive, but they can't cut back for fear of losing market share.

The interplay of these factors is skewing marketing budgets in favor of trade promotions, consultants say. "Many of our clients have been diverting their marketing dollars to short-term trade promotion strategies and away from advertising," says Mr. Schmitz of Majers Co.

"It's a terrifying thing," he says. "Manufacturers used to be able to dictate the terms of sales. Now, many retailers have unbelievable influence."

Further complicating matters is a difference in perception as to the seriousness of the situation. Manufacturers and distributors surveyed in 1980 by *Progressive Grocer* were asked to rank in order of importance a list of 49 business issues. First on the manufacturers' list was "deals vs. performance rendered." The same issue ranked No. 35—near the bottom—of critical concerns for distributors.

Perhaps this explains why so many leading manufacturers are the ones taking action to modify their trade promotion activity before the problem gets out of control. Consultants say the effort is none to soon.

"We estimate that a third to two-thirds of the dollars that manufacturers now spend on trade promotion is just wasted," says Robert Brown, president of SPAR Inc. (Sales Promotion Analysis Reporting) in Tarrytown, N.Y. The company's clients include Procter & Gamble, PepsiCo, Coca-Cola Bottling Co. of New York and Kraft.

By and large, the SPAR clients contacted by ADVERTISING AGE say they focus on gaining incremental profits from increased sales and consumption of their products.

"We don't offer promotional dollars just to stock warehouses," says John Howell, national sales manager at Miles Laboratories, Elkhart, Ind., a client of SPAR, which has evaluated more than a million promotions in its 20 years in business. "An overstocked trade just doesn't make good business sense. The old catch phrase, 'loaded is loyal' has gone the way of Willy Lohman."

When Miles Labs increased media and trade promotional spending last year, it also increased its expectations, Mr. Howell says.

The company changed its promotional strategy from one offering across-the-board discounts to one that offered allowances based on several levels of performance. Called tiered promotions, the new strategy offers a base discount and additional allowances as incentives for buying various displays or buying cooperative advertising. Retailers are divided into "regular" and "special" performers, he says.

But convincing retailers and wholesalers to sell more by using the full power of promotions is a tough battle. "It's really an education to get the retailer to think in terms of making money on selling [a product] rather than making money by buying it," says Paul C. Gorman, sales promotion manager at R.T. French Co., Rochester, N.Y. "The name of the game is incremental business, and it requires a teamwork approach."

Mr. Gorman's company uses SPAR data to show how French's products are selling in relation to close competitors.

"When you can show a customer that his competition is generating more [incremental volume and profits] from your promotions, you then have a more receptive audience to recommend improved promotion

performance," Mr. Gorman says.

French also uses the data to fine-tune its marketing program according to geographic areas and other marketing factors. In one instance, the company was able to trim 15% to 20% on promotions for its Sauce & Gravy brand while maintaining the same level of sales.

Perhaps nowhere does the competition focus more strongly on trade promotions than in the soft drink industry. And for this reason, both PepsiCo and Coca-Cola rely heavily on research to track each other's moves and determine the effects of promotion on volume and profits.

Pepsi-Cola uses SPAR data to track off-shelf display execution, says G. Michael Calvert, director-sales communications for Pepsi-Cola Bottling Group, Purchase, N.Y. SPAR's Thursday night survey keeps tabs on display size, price markings and p.o.p. locations, reporting by Friday morning in time for corrective action to maximize weekend retail sales.

Assuming Pepsi-Cola could effect a 10% improvement in display execution, Mr. Calvert says, the result could be a tremendous increase in volume sales. Just how much better is shown in two Point-of-Purchase Advertising Institute-Du Pont studies of the drugstore and grocery trades, which found that advertising combined with in-store displays improved sales between 500% and 750%.

Pepsi-Cola is concentrating on displays in an attempt to reduce its reliance on promotions in building sales volume. "Ultimately, you don't get the pull through from the consumer if your product is on promotion all the time," Mr. Calvert says.

Even his competitors agree. The danger in discounting, says Bruce Mommsen, senior vp of Coca-Cola Bottling Co. of New York, Greenwich, Conn., is that it promotes consumer brand-switching, eats into profits and intensifies competition.

On the plus side, trade promotions do encourage increased consumption, but at what cost? Mr. Mommsen says. Given the price range for a 2-liter bottle of Coke from 99 cents to $1.59, "that's a hell of a spread," he says.

As a result of SPAR's consulting services, Mr. Mommsen discovered that nearly 100% of sales volume on the 2-liter size was sold with some form of promotion, with very little incremental volume. Presumably the same was true for leading competitors in the New York area.

"What has happened is that we get our week, and they get theirs," Mr. Mommsen says. As a result, brand loyalty has declined steadily from a high of 60% many years ago to about 20% today, he says.

But Mr. Mommsen's company, the second-largest Coke bottler behind Coca-Cola U.S.A., is making promotional changes. It eliminated certain off-week deals and reduced the frequency of discounts.

The changes might not seem like much, but even slight alterations in the discount formula could result in huge changes on the bottom line, Mr. Mommsen says. With sales of 80 million cases a year, if Coca-Cola New York can shave a penny off promotions on a package selling for $1.25, it could net almost $1 million. The profits then could go to stockholders or into more sensible promotions and ads.

"What we're attempting to do is spend a little bit smarter," Mr. Mommsen says, with the eventual goal of narrowing the spread between regular wholesale and discount pricing. "We'd like to see Coke at a price level that's attractive to the consumer everyday."

"Everyday low pricing" has become a buzzword in the grocery industry, a fact partially due to excessive trade promotions. But what if every marketer suddenly decided to stop?

"If tomorrow they stopped dealing products," Lucky Stores' Mr. Fredericksen says, "the retailers would have to do more volume or raise prices." AA

Remember the day your mind went blank trying to remember if the legal copy was approved and... already the sweepstakes ad was running in newspapers in seven states?

Oh, yes, it *has* happened!

But not with us. With a 25-year track record of creating and managing successful promotions for dozens of major advertisers, we're eagle-eyed when it comes to the fine print.

From the beginning of a promotion to its delivery, we ensure that nothing gets by without approval. Including the legal copy.

So next time you're planning a promotion, call in the professionals—Marden-Kane. We're confident we'll meet with your approval.

tickets to radio stations to award callers. The fact that radio stations also benefit from these promotions makes them especially popular.

Many close to the film industry believe that the proliferating placement business is due for a shakeout. "They're only about a hundred companies that are really interested in getting involved in film promotions," Mr. Minot says. "With so many [placement agencies] falling all over each other for their business, it gets confusing. The sizzle overcomes the steak."

This new chapter in Hollywood-style promotions has had an unerasable impact. For target-conscious advertisers and hype-seeking studios, it's a match made on Madison Avenue. And, for a product-fascinated society, which has been known to elevate soup and soda cans into the realm of high price art, it must be heartening to know that certain detergents and cereals will be enshrined forever on celluloid. Promotions add fizz in soft drink business

By Sally Fennell Robbins

Promotions in the soft drink industry are beginning to explode as producers and bottling operations take a more imaginative and aggressive approach to local market activities.

"Historically, the business has been characterized by trade deals," says Jeffrey Feinman, president of Ventura Associates International, New York. "It's been only recently they're looking at aggressive promotions. The industry woke up to the fact that the business could be affected by consumer promotion."

Mr. Feinman says he believes soft drink companies will give promotion "more than lip service. It will be an active part of the marketing mix."

With the consolidation and reorganization of bottlers in recent years into larger, more efficient operations, their efficiencies are generating larger margins for promotions. As Mr. Feinman says: "Many bottlers have bigger budgets than most brands."

Consequently, more localized promotions are being developed by bottlers and their franchises that capitalize on the opportunities in their markets. In some cases, local promotions are so successful the parent company adopts them into national campaigns for their bottler organizations to consider. For example, Alpac Corp., Seattle, originated the Little Pepsi Identification promotion in the fall of 1983 as a public service for parents with missing children. Pepsi-Cola adopted Alpac's program last year and is offering the Pepsi-Cola New Generation ID Card to its bottlers nationwide.

"Parent companies are faced with stronger and more sophisticated bottlers," says George Baratta, vp-marketing, All American Bottling, Coral Gables, Fla., which operates franchises in nine cities. Mr. Baratta says soft drink companies are "getting a lot more performance, cooperation and good ideas from bottler feedback."

National programs developed by parent companies are considered and, in most cases, adapted by bottlers to appeal to the demographics of their markets.

"We take ideas Pepsi presents and mold them to be compatible with our customers and the trade," says Leslie Meagley, pr manager, Alpac Corp., a Pepsi franchise for Hawaii, Alaska and Washington. On her promotional drawing board is a tie-in with the Tina Turner rock concert tour Sept. 29 in Tacoma, Wash.

Image positioning promotions and segmentation will continue to be important. For example, Pepsi's Walk Thru Rock traveling exhibit to 24 cities, beginning Sept. 11 and ending next summer, is part of its music marketing thrust.

PepsiCo signed a $1 million deal with Walk Thru Entertainment, a Denver-based company, to be the exclusive sponsor for the exhibit. It has the right to market promotion materials through Pepsi's distributors and tie-in opportunities in each market through its bottlers (AA, April 8).

Coca-Cola and its "new" Coke brand will continue a fall tie-in with Coleco Industries, but this year the sweepstakes will raise money for the Statue of Liberty instead of the March of Dimes.

The campaign, called "Support the Lady and Share the Love," will run from mid-October through mid-November and will be supplemented by radio, tv, print advertising and point-of-purchase materials.

Consumers donating $5 or more to the Ellis Island restoration project will receive Cabbage Patch Kid doll posters. The sweepstakes will award 5,000 dolls. Bottlers will receive a Statue of Liberty school program, combining education, fund-raising and contest.

In promotion trends, "There'll be more tie-ins, nationally and locally, with nontraditional partners," says John Young, president, Universal Promotions, Philadelphia.

Partnerships with package goods and consumer service companies "can take a lot of different forms to increase awareness and purchase incentives. Soft drink people are beginning to offer value-added promotions instead of couponing, refunding or something free." Such value-added enhancements, Mr. Young says, could include combinations with air carriers, cruise ships, hotels and vacation packages.

"Cola marketing is taking a more package goods discipline [approach]," says Ellis Gaskell, director-promotion programs for Pepsi-Cola Co., Purchase, N.Y. There's a lot of experimentation being done on a tie-in basis, particularly given the pressure within the industry to avoid price competition, he says.

Pepsi-Cola tied in with Gillette Good News razor blades this year with a deal that featured 10-pack razors and Pepsi 6-packs. "The verdict is still out" on the success of the campaign, Mr. Gaskell says.

According to Peter Swift, vp,

Hanes Printables
Providing Leadership With The Right Combination

For the quality imprinted sportswear you need to make the most of your promotion and incentive investments — come to Hanes Printables. Whether it's your brand promotions, corporate identity programs, awards, incentives or point of purchase premiums, we have the right portfolio of quality sportswear that opens up exciting new opportunities, and is backed by the security and outstanding leadership that only our famous high quality brand can provide.

An effective imprinted sportswear investment requires sportswear with the right combination of styles and colors to get your name out in front of the crowd and keep it there. From standard-weights to heavy-weights, from basic T-shirts to the American Sportswear Classics Sportshirt, we have the right shirt to fit your needs.

And because Hanes offers a selection of brilliant basic and pacesetting fashion colors in the finest colorfast dyes, you can depend on reliable consistent colors order after order. The key to our success is the unmatched quality of our product line that is compounded year after year.

Plus, the Hanes brand name earns you even greater dividends with consumers through the well-recognized high quality image already established for you.

All these product benefits are backed by a staff of professionals to assist you in planning your imprinted sportswear promotions and programs. With our proven combination you can bank on Hanes Printables — where leadership earns interest every day.

Fizz

(Continued from Page 24)

Glendinning Associates, Westport, Conn., "The challenge [of promotional tie-ins] is executionally with the bottlers. Who pays?"

In the more traditional techniques used in the soft drink business, in-pack and on-pack games of chance will continue as an effective tool among bottlers. In addition, sweepstakes are seen as important to focus a communications statement and generate displays and dealer loaders, premiums retained by stores or offered to consumers to secure secondary display space. As an overlay to couponing, sweepstakes can increase redemption by 30%.

Couponing will continue to be widely used. In 1983, distribution of coupons in the soft drink category was 4.3 billion units, or 3% of the 143 billion distributed by all U.S. marketers, says Zachary Tahmin, manager of the business research packaging sector, American Can Co., Greenwich, Conn.

American Can's analysis, based on data compiled by A.C. Nielsen Co., expects its 1984 forecast to be on target with a total of nearly 170 billion coupons distributed. Mr. Tahmin says, "the 1984 figure [for soft drinks] will probably approach 4.5 billion to 5 billion coupons."

Mr. Tahmin projects the 1985 figure for soft drink coupon distribution to exceed 1984, "since there's a lot of fighting for shelf space."

At Coca-Cola Bottling Co. of New York, for example, there has been a recent fueling of coupon activity. "We've dropped more coupons in the last year than we have during the past 10 years," says James Patton, vp-advertising and promotion at the New York bottlers. He primarily uses local newspapers or in-store tearoff pads as vehicles.

Some bottlers say more free-standing inserts are being used to announce consumer promotions.

As an intensely price competitive industry—90% of soft drink volume reportedly is sold at discounted prices—trade deals will continue to flourish.

"There'll be more end-aisle and price features done through price promotions in supermarkets," says Michael J. Enzer, president of Saxton Communications Group Ltd., New York, and president of the Council of Sales Promotion Agencies, New York.

Accelerating trade deals, he says, is the drop in the price of sugar. As a result, "The bottler has more dollars available to reduce the cost of soda and still make a profit."

For soft drink canners and bottlers, nonprice promotions have increased sales, whether the concept is under-the-crown, under-the-tab or the relatively newer in-the-can technique developed in 1982 by Continental Can's Beverage Packaging division, Stamford, Conn., working with Videojet Systems International, a division of A.B. Dick Co., Elk Grove Village, Ill.

It allows promotional coding to be printed inside the can using ink jet equipment.

For New York and Mid-Atlantic Coca-Cola bottling companies, UTC "Fun Cap" promotions have been successful as tie-ins with participating partners in their respective trading areas.

At Mid-Atlantic Coca-Cola, its third annual Fun Cap promotion, which runs July through mid-September, ties in with Hardee's, Baskin Robbins, Waldenbooks, Commodore and the area Dodge dealer, says Paula Scanlon, director-advertising and promotion.

"Every cap is a winner," she says. "We have had a high consumer response. Our research survey indicates the Fun Cap name has an 80% awareness. Fun Cap promotions are an incredible administrative task, but they're good for all partners. It's a 'win-win' situation," Miss Scanlon says.

For Coca-Cola in New York, Fun Caps are used as an "umbrella, on-going consumer promotion," says Bruce Mommsen, senior vp-marketing. "We bring in as many partners as possible and convert the advertising. If we spend $500,000, we'll get $1.5 million from partners."

Mr. Mommsen says Fun Cap promotions also are used for one or two national overlay promotions, as well as five to six different local offers on-can that range from New Jersey-based Great Adventure to Radio City Music Hall for price-off on ticket purchases.

In the Midwest, several major bottlers prefer ITC promotions over UTC for security, flexibility and consistency of performance.

"In-the-can promotions are more legible and there is no way consumers can tamper with it," says Ralph LaPoint, chairman, Wis-Pak Co-Op Advertising Committee, La Crosse, Wis. The company is a five-state Pepsi bottling co-op.

This year, Wis-Pac extended its second year Homerun Countdown Baseball sweepstakes promotion with the Milwaukee Brewers to include the Chicago Cubs and the Minnesota Twins, whereby bottlers in the three states participated. In-can instant prizes included a free Pepsi 6-pack, free pair of tickets to a baseball game, and $100 and $1,000 cash. All eight Pepsi products were involved. The promotion was tied into the All Star game. During the break, owners of cans marked with specific home run numbers were eligible to win $10,000 and a car.

As soft drink consumption continues to grow, so will the ante in consumer promotions. In the battle for shelf space, however, the winners remain to be seen. ■

Lottery targets minorities

Coca-Cola Bottling Co. of New York, has launched a 12-week lottery in four New York boroughs and in Newark, N.J., in a distribution promotion aimed at increasing penetration of small, Spanish-language grocery stores—called bodegas.

"Get Rich with Coca-Cola," budgeted at between $700,000 and $800,000, according to Bruce Mommsen, senior vp-marketing, kicked off Aug. 5—after being preceded by a direct mail coupon package announcing the lottery to 830,000 black and Hispanic households.

For the first time, the company used Donnelley Marketing Information Services' Cluster Plus program—analysis clusters life style segmentations within geographic neighborhoods.

The ethnic households targeted for Coca-Cola received a game piece and instructions, plus four coupons; two for Coke and one each for Cherry Coke and Sprite.

The distribution promotion, involving all 15 Coca-Cola products, is seen as an important part of maintaining the bottler's competitive edge.

"We should be as competitive on the consumer promotion side as we are on the cents-off side. The decision is made at the store level so we want to give them as many choices as we can," says James Patton, vp-advertising and promotion.

The ethnic promotion is aimed at dealers and has two consumer tiers—instant winners and a sweepstakes.

On a buy of 25 cases, the dealer gets 300 game cards, which automatically enters him in a weekly cash prize drawing and eligibility to vie for a Ford Thunderbird grand prize.

WJIT (am), New York, announces weekly dealer winners for the trading areas, and each dealer winner receives $1,000. Mr. Patton says the company hopes to get 5,000 dealers involved in the promotion.

Consumers can be instant winners or vie for a Ford Thunderbird grand prize, as well. The ruboff game cards, available in-store, have three areas to match. Prizes include a 19-in. color tv, a boom box radio, $25 or a Coke t-shirt.

All entrants send their game cards to WNJU-TV, Teterboro, N.J., a Spanish speaking tv station, to enter a weekly drawing for the grand prize. Announcements will be made on the 11 p.m. news Wednesdays. Winners get $1,000 in cash. Similarly, WBLS (fm), New York, an English-speaking station, will announce winners, as will WADO (am), New York, a Spanish-language station.

A specially produced 30-second spot will support the promotion (Castor Spanish International, New York) and will air throughout the lottery on WNJU. Also, there are 30 60-second radio spots and print advertising in black and Hispanic newspapers.

Tv stand-alone 15s make inroads at nets

By VERNE GAY

New York—Within a day of CBS-TV's Aug. 9 announcement that it would become the first network to sell stand-alone 15-second ad units (AA, Aug. 12), ABC-TV had advertisers on the phone telling them they, too, would probably begin selling 15s shortly.

NBC-TV is expected to follow suit soon, though one source said there was no time pressure, and the other nets may wait to see how the CBS venture turns out.

CBS, which like ABC is selling 10s only in prime time and daytime news and sports breaks, said it made the move to 15s because more advertisers have 15-second commercials ready than 10-second spots.

Advertisers and agency media executives acknowledge that the growth during the last year of "split-30s," in which two separate brands from the same advertiser split a single 30-second spot, has resulted in a large bank of 15-second commercials.

But many also saw the networks' action as a sign that 15-second spots eventually would replace 30-second commercials as the standard network unit.

That would not happen overnight. If 15s became the standard immediately, tv networks would just as quickly double their available inventory and it is doubtful advertiser demand could keep pace.

About 20% of all network inventory is available for split-30s, but less than 5% is used by advertisers, said Bob Igiel, senior vp-director of programing and network negotiations at N W Ayer.

"What's really going to happen is [the networks] will have to go to isolated 15s—that's that," he said. "The demand is not there."

Other agency executives speculated the concept would grow, with the networks gradually raising the price of a 15-second spot to the current level of prices for 30-second spots—a process similar to the earlier switch from 60s to 30s. "I can see [the sale of the 15-second unit] expanding," said Richard Kostyra, senior vp-media-director, J. Walter Thompson USA.

JWT and ABC jointly have been studying the effec-

Foe will sample New Coke worldwide

Pepsi 'introduces' Coke

By VALERIE MACKIE

Pepsi-Cola International will hold press conferences in 30 cities around the world Tuesday, Aug. 20, where it will "introduce" Coca-Cola Co.'s New Coke.

Pepsi's move is seen as an effort to take the steam out of Coca-Cola's introduction of New Coke overseas. Pepsi agencies J. Walter Thompson Co. and Ogilvy & Mather are setting up the press conferences.

Coca-Cola has not rolled out its reformulated version of Coke internationally, except in Canada and Puerto Rico. The company has "no timetable" on when it will introduce the new product overseas.

Last Friday, invitations to a press conference on Tuesday were distributed in London saying "Pepsi-Cola International would like to invite you to the most unusual press conference ever held. . .to introduce you to SOMEBODY ELSE'S new product." Similar invitations were circulating in other countries.

Though Pepsi gave few advance details, several sources speculated that the press conference will involve a taste test.

Rumors started flying around the world last week that Pepsi was going to introduce Pepsi Supreme, a less-sweet version of its flagship brand with a Classic-Coke flavor.

When asked about the rumors, Pepsi sources said, "We are definitely not planning any new product introduction" and "the rumor is unfounded."

But other sources in London and Australia indicate that the press conferences and Pepsi Supreme "could be related."

One source at Ogilvy & Mather, which was implicated in the rumor as handling the new product introduction, said "We know nothing about Pepsi Supreme."

Pepsi, which is outsold by Coke in every overseas market except about four, admits it has been exploring new international approaches.

In earlier talks with Robert

D.C. wives aim at MTV; ads next?

By STEVEN W. COLFORD

Washington—After squeezing a promise from the recording industry to label sexually explicit recordings, a group of politically connected Washington wives is taking on music videos and, perhaps, advertising.

Susan Baker, wife of Treasury Secretary James Baker and a founder of Parents Music Resource Center, said the group hopes to meet again with representatives of MTV: Music Television, the 'round-the-clock video machine cranking out minimovies PMRC thinks are sometimes unsuitable for young viewers.

An earlier meeting with three representatives from MTV failed to mark any progress towards the group's hopes for music videos—an "R" rating superimposed on an offending film to inform parents.

Ms. Baker said the group also "would like to talk to the [advertising industry] trade reps. . .about their using sex to sell products."

"Rock music is only one portion of society [where] the line of de-

(Continued on Page 72)

Rate-break charges shake Seven Sisters

By STUART J. ELLIOTT
and GARY LEVIN

A renewed outbreak of rate-breaking among the Seven Sisters women's service magazines has roiled the advertising and media communities.

The latest instance of offering certain advertisers rates not on the rate card is what is being described as a two-for-one plan from *Better Homes & Gardens*: One page free with one page bought by advertisers meeting certain minimum page-purchasing levels.

The offer, an apparent reversal of a long-standing policy of parent Meredith Corp. against such wheeling and dealing, was said to have been made first to Procter & Gamble, and reportedly will be extended to other large marketers. It follows an offer *BH&G* made to P&G in 1983, under which a buy of six pages brought two free.

The new rate-breaking is said to have been precipitated by a sharp decline in *Better Homes & Gardens'* ad pages from Cincinnati-based P&G, the nation's largest advertiser, after the eight-for-six plan expired. According to one rival publisher, P&G's ad pages in *BH&G* had dropped to six from 92.

While confirming a drop in P&G pages, James Autry, general manager of Meredith's magazine group, declined to be more specific, and said any discounts offered that company would also be granted to other large-scale advertisers.

A P&G spokeswoman refused to comment on the level of its advertising in *BH&G*, but said the company plans to continue its placements in the magazine.

"We're not receptive to selling to people off the card, but at the same time that's one of the competitive considerations of the marketplace, and we will remain competitive," said J. Wesley Silk, vp-publisher of *BH&G*. He refused to outline specific discounts offered to advertisers.

At a spring planning session, Mr. Autry said, Meredith agreed to let the company's individual publishers decide, with management approval, when discounting was needed to effectively compete in the marketplace. Robert Burnett Meredith's president, has previously said the company is philosophically opposed to such practices.

"We won't make deals over the lunch table as the

New promo tie: Sponsor a bowl

By ROBERT RAISSMAN

You can call it the (YOUR NAME HERE) Holiday Bowl.

In a move likely to spark a trend among second-tier postseason college football bowl games, the Holiday Bowl is actively pursuing a corporate sponsor to attach its name to its San Diego-based bowl.

The move is significant because it ultimately could shift the balance of power of all bowls, with the exception of the big four—Rose, Orange, Sugar and Cotton—in the eyes of the three networks. The money the Holiday Bowl would pick up from the corporate sponsor would go directly to increasing appearance fees. This would lead to matchups of teams with more marquee value in future Holiday Bowls, and thus increase its value as a tv property.

Also, with tv sports ratings in a period of decline and an uncertain advertising sales future prevailing, a network might welcome a bowl bringing some kind of title sponsor as part of a bowl game package, according to a network source.

Sources said Holiday Bowl officials were looking for "a seven-figure" payout from any corporation interested in becoming the game's corporate sponsor.

Michael Trager, chairman of Greenwich, Conn.-based Sports Marketing & Television International, the company marketing the Holiday Bowl, declined to say how much money the Holiday Bowl is looking for from a corporation.

"The Holiday Bowl is looking to raise its payout [to teams] so it can control the next tier of teams," Mr. Trager said, referring to the pool of teams not selected for the four major New Year's Day bowl games. "There are a lot of teams who aren't picked by the four major bowls who are major powers. The way the system is set up is that money usually dictates where they go and play. The Holiday Bowl can

Late West Coast news

Wash. tourism ads take a trip to Cole

Washington state department of trade and economic development, Seattle, has chosen Cole & Weber to handle its estimated $2 million account. The account formerly was at Ehrig & Associates. C&W edged out McCann-Erickson in the final stage of competition. Others in the review included: Ehrig, Evans/-Kraft, Livingston & Co. and Mogelgaard & Associates. The state aims to develop Washington tourism and persuade international business, particularly companies in the Far East, to locate in the Pacific Northwest state.

Vic Olesen & Partners, Los Angeles, has named Eric von der Lieth to the new post of general manager. Mr. von der Lieth formerly was senior vp-management supervisor at N W Ayer. Vic Olesen handles the California marketing program for General Motors' Chevrolet division. The appointment, though, reflects the agency's desire to solicit new business and to develop a second level of management.

Davis, Johnson, Mogul & Colombatto, Los Angeles, is starting a Hispanic ad agency within its offices. Julio Castellanos will head

Giraldi spots have 'Cheers'-like setting

Coors plans ad 'series'

By BRIAN LOWRY

Adolph Coors Co. is increasing its fourth-quarter ad spending 33% to 50% for a new, unconventional campaign for Coors Light set in a "Cheers"-like bar.

Buoyed by the success of the "Coors is the one" commercials featuring actor Mark Harmon (AA, Feb. 11), the Golden, Colo.-based brewery is initiating what it refers to as "another groundbreaking campaign."

The first pool of ads break Sept. 15, featuring a recurring group of characters in a bar called the Silver Bullet. Coors Light's current campaign is themed "Turn it loose with the Silver Bullet" (AA, Sept. 3), a reference to the beer's silver can.

Six 30 and 60-second spots are currently in production—all directed for Foote, Cone & Belding, Chicago, by Bob Giraldi, director of numerous Lite beer ads for Miller Brewing Co., the light-beer category leader.

The first spot introduces the bar and its four central characters: The owner, bartender and two waitresses. In the first commercial, which will run exclusively for two weeks, Coors hopes to develop friendly, distinctive personalities tv watchers will come to recognize. It ends with the line "Stay tuned, y' hear?" urging viewers to look for the continuous series. Similarly, the Mark Harmon "Coors is the one" spots are tagged "To be continued."

The bar's patrons will change in each spot, though some will become "regulars," similar to the setup in NBC's "Cheers."

The commercials will have the feel of an episodic tv show, creating a sense of realism in contrast to the slick, rock-video format of most beer advertising, Mr. Giraldi believes.

A Coors official said the brewer will be advertising more frequently on network tv, which became more cost-efficient for Coors this spring after its latest wave of marketing territory expansion made its Coors and Coors Light brands available in 44 states.

Coors is the nation's fifth-largest brewer, with a 7.4% share last year, according to consultants R.S. Weinberg & Associates, St. Louis. Anheuser-Busch and Miller Brewing still dominate the market with 36% and 21% shares, respectively. Coors spent $39 million in measured-media advertising last year.

FCB creative director Nina Baker-Feinberg insists the spots' Silver Bullet setting isn't patterned after the popular tv show. "We're not cloning 'Cheers,'" she said. "This has a life and vitality that's very different. It's a warm, friendly bar where you're known; it has that in common with 'Cheers.'"

According to John Maxwell, analyst at Furman Selz Majer Dietz & Birney, and *Beverage Industry* magazine, sales of Coors Light rose nearly 20% last year to 4.5 million bbls., moving it to No. 10 over-all and a distant No. 2 in the light-beer category behind Miller's Lite (18 million bbls.). But the brewer claims the current "Turn it loose" campaign doesn't fit with its new marketing strategy.

FCB executive creative director Mike Rogers said the "Turn it loose" ads "were not addressing the real beer drinker, or the primary occasion for drinking beer, which is 'social lubrication.'" Coors wants to approach the average beer drinker on his level, as seen in the folksiness of the Harmon ads for the company's other brand.

Mr. Giraldi sees the ads as a backlash against the prevailing mode in beer advertising, which is "slick, silly songs and dances." The rare occasions where the advertiser attempts to create a feeling about the people in the ads, he noted, are reserved for celebrity spokespersons.

According to Ms. Baker-Feinberg, the Silver Bullet bar campaign will explore a gamut of emotions—some of them bittersweet, a marked departure from "old-style, macho-man beer advertising."

In one 30-second commercial, for example, one waitress describes her dream man to the other, only to have a dead ringer for the description walk in and sit down beside her during the narrative.

Great pains have been taken to make the bar "Anywhere, U.S.A.," purposely devoid of references to the bar's location. None of the actors have accents and the music is a middle-of-the-road rock/-country & western mix. Each commercial begins with an exterior shot of the bar taken from a miniature, the lyrics asking "Who's gonna be at the Silver Bullet tonight?"

The spots will include a broad ethnic mix, including a commercial featuring Hispanics sitting around the bar asking each other trivia questions. One of those characters will become a regular.

The soft-sell commercials won't make direct references to Coors Light, except to show customers ordering the product and waitresses, clad in silver-metallic "Meet me at the Silver Bullet" t-shirts, hauling trays of it past the camera.

Ms. Baker-Feinberg said the brewer is negotiating with a few celebrities as possible guest patrons, though nothing has been finalized.#

WHY BE A LITTLE FISH IN A BIG POND?

BECAUSE YOU'RE JUMPING IN WITH BOTH FINS, OUR ADVERTISING IS MAKING A BIG SPLASH.

Our "Big Fish" campaign, and your overwhelming response to it, prove that our industry works for all of us. More advertisers than ever are streaming into our pond. And they're turning into some pretty big fish.

Thanks for jumping into our pond. We'd like to shake your fin.

BE A BIG FISH.

For Camp followers

Camp Beverly Hills, the retailer, becomes Camp Beverly Hills, the fragrance, with a California attitude but bicoastal style (AA, Aug. 5). The ad, created by Harold Griffin & Associates, is set off by California color and clothes playing off an oversize version of the scent and packaging.

Blank tapes from 3M get prerecorded ads

By LAURIE FREEMAN

The new high-grade videocassette 3M Co. will introduce this fall is both a new product and a new advertising medium.

The Scotch EXG "Freeviews" Review videocassette is a sort of joint venture between 3M and several major home-video distribution companies since the videocassette 3M will sell already will include up to an hour of prerecorded "trailers" for films and other video titles, including "how-to" and exercise tapes (AA, Aug. 12).

The cassettes then can be erased, producing what the St. Paul, Minn.-based company calls a "virgin" or blank tape. The tapes will retail for $9.99, about the same as for other top-grade blank tapes.

Companies already signed to supply trailer material include CBS-Fox Home Video, Karl-Lorimar, MGM/UA Home Entertainment, Paramount Home Video, Prism and Vestron Video. 3M is not charging the distribution companies for including trailer ads for their video products.

3M will unveil the "Freeviews" videocassette during the annual Video Software Dealers Assn. meeting in Washington at the end of this month (AA, Aug. 12). The first edition of the tape will be available at retail in October.

Grey Advertising, Minneapolis, will handle an estimated $3 million trade print campaign introducing the tape to videostore owners, dealers and distributors. No consumer advertising is planned.

This will be the first time blank videocassettes will feature prerecorded material. Although a Grey spokeswoman admits some vcr users may balk at purchasing this kind of cassette, "we're confident consumers can be educated to realize these tapes erase as well as regular, high-grade blank tapes."#

CAMPAIGNS BREAKING

Ralston Purina Co., St. Louis, today begins couponing for Almond Delight cereal. Tv breaks Oct. 7 and print in October issues of women's service magazines. Tatham-Laird & Kudner, Chicago, handles the $20 million account (AA, July 8, 15).#

CORRECTIONS & CLARIFICATIONS

- Information supplied by the Bloom Agency reported incorrectly that Anderson Clayton Foods would be moving its headquarters to New York from Dallas (AA, June 24, P. 8). In fact, only the foods marketing staff moved to New York to join Anderson, Clayton & Co.'s Gaines Foods subsidiary, which as of July 1 assumed responsibility for marketing Seven Seas salad dressings and Chiffon margarine. Bloom has shifted its account team for the products to Bloom's New York office.
- In the Hearst Corp. profile in the 100 leading media companies issue (AA, June 27, P. 36), the sports publication dropped by the *Baltimore News American* should have read *Sports First*. *Sports Afield* also inadvertently was omitted from the list of magazines published by Hearst.
- The agency for the professional advertising for Colgate-Palmolive Co.'s Dentagard line is Wilk & Brichta. Young & Rubicam, New York, handles consumer advertising (AA, July 1, P. 8).
- The article naming Miller Brewing Co. and J. Walter Thompson USA as winners of ADVERTISING AGE's Commercial Music Award (AA, July 18, P. 5) failed to credit Pat McManus and Bob DiPiero, who wrote the song "American Made," from which the Miller campaign's music was adapted.
- The *Denver Post*, which is carrying Gannett Co.'s *USA Weekend*, is continuing to publish its locally edited *Empire* Sunday magazine, and the newspaper says Metropolitan Sunday Newspapers continues as rep for the magazine. A story had said that MSN lost the *Post* as a client (AA, July 29, P. 1).#

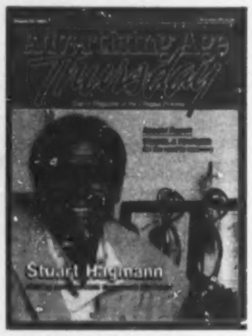
Hag-iography

When Stuart Hagmann was a schoolboy, he spent much of his time putting on marionette shows in schools around his hometown in Wisconsin. While more than 30 years have passed since those long-ago days in Sturgeon Bay, the principal of Hagmann, Impastato, Stephens & Kerns, Studio City, Cal., is still pulling strings as a producer of tv commercials that are among the best in the business. *See Page 5.*



Cover photo by Glen LaFerman

Gag me

The campaign that's put a wine-cooler brand among the hottest sellers in one of the country's fastest-growing categories is one nobody connected with can talk about. *See Page 46.*

Smokin'

Peter Heineman has perfected calculated casualness. Everything about him is crafted to convey an image of having never worked a day in his life—which was true until nine years ago. Mr. Heineman, 33, owns his own $4 million business, and he can afford enough self-possession to prevent anyone from guessing how he makes his living. *See Page 49.*

Special Report—Travel & Tourism

An improved economy and fare and rate wars have consumers on the move and the travel industry looking up. *Starting on Page 15.*

Presstime

Falwell for S. Africa

WASHINGTON—The Rev. Jerry Falwell's Moral Majority on Aug. 23 breaks half-page ads in *USA Today* and the *Washington Post*, paving the way for upcoming tv specials urging continued U.S. investment in South Africa. The conservative religious and political organization, based in Lynchburg, Va., plans two specials to be aired on Christian cable tv networks. Blue Ridge Advertising, Lynchburg, handles.

BBDO sells agency

NEW YORK—BBDO International has sold majority ownership of its South African agency, BBDO Intl. Holdings, to five senior executives at the shop. The agency is the largest in South Africa. The new owners, all equal partners, are Derrick Dissel, Ian Shepherd, Alan Tiley, Grahame Tomes and Pierre Venter. BBDO sold its entire 80% interest in the agency.

Sears card gets $20M in ads

ATLANTA—Sears Financial Network, New York, on Aug. 21 kicked off a $20 million ad campaign for its new Discover credit/financial services card (AA, July 16, '84, *et seq.*). Sears blanketed most of Georgia with two-page b&w newspaper ads and 30 and 60-second radio and tv spots supporting its first test of the card. Consumer ads carry the over-all theme "Discover Card puts your money in a whole new light." J. Walter Thompson USA, Chicago, handles.

No new agency: Hampel

NEW YORK—Alvin Hampel, former exec vp-director of creative services at D'Arcy MacManus Masius Worldwide, firmly denies widespread reports that he is close to starting a new ad agency with Joseph Hannan, senior vp-account director at Benton & Bowles. Mr. Hannan heads the Texaco account, which is looking for a new agency as a result of the DMM-B&B merger and a conflict with DMM's Amoco account.

Chi. dealers review

CHICAGO—Chicagoland Ford Dealer Advertising Fund will open the review of its estimated $5 million account to "three or four" more agencies. The group last week heard presentations from incumbent J. Walter Thompson USA, Detroit, and Chicago shops Bentley, Barnes & Lynn; Chase/-Ehrenberg & Rosene; Cramer/Krasselt, and Jack Levy & Associates.

Newark dealers decide

NEWARK, N.J.—Newark District Ford Dealers Assn. has assigned its $4 million-plus account to Hill, Holliday, Connors, Cosmopulos from Rosenfeld, Sirowitz & Lawson, both New York. The competition also had included BBF Communications; Penchina, Selkowitz, and J. Walter Thompson USA (AA, Aug. 5).

'Old' Pepsi vs. New Coke

LONDON—Pepsi-Cola International this week held a series of lighthearted press conferences

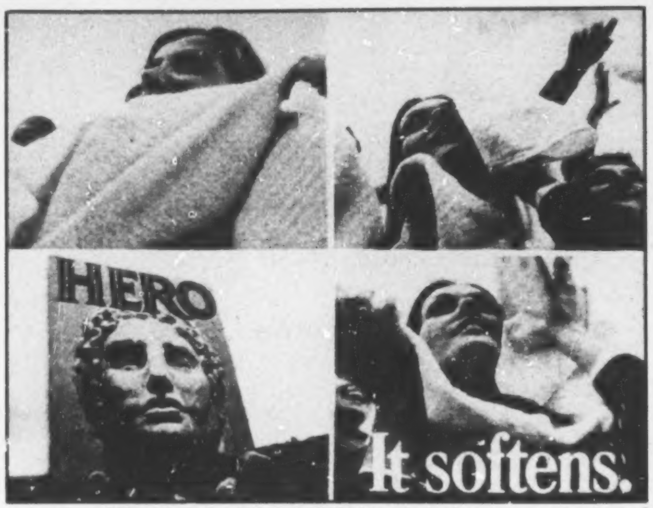
Microfiche copies are available from Bell & Howell, Micro Photo Division, Old Mansfield Rd., Wooster, O. 44691. $1.25 a copy on Monday, 75¢ a copy on Thursday, $55 a year, $100 two years. Add $143 per year for air delivery to Europe & Middle East. Add $49 for surface mail to all other foreign countries. WILLIAM STRONG, vp-circulation; ROGER DI GREGORIO, fulfillment director; HEIDI SCHULTZ, senior circulation manager. Four weeks' notice required for change of address. Address all subscription correspondence to circulation department, Advertising Age, 740 Rush St., Chicago, Ill. 60611 (312) 649-5200.



Lever Bros.' Hero laundry detergent failed to stir the hearts—or glands—of consumers as much as it moved the addle-brained women in its tv spots.

Readers remember ad gaffes from past

Confidence is a marvelous attribute for marketing organizations, but sometimes one must wonder why anyone out there in marketing land has any of it left. With the new Coke-old Coke-Coke Classic fandango in mind, ADVERTISING AGE Thursday *asked readers for other examples of marketing missteps.*

The collection of marketing disasters, submitted to our Edsel, Etc. contest in July, proved not only how easy it is to usher in an utter failure, but how common failure can be.

Below, representing a richness of marketing embarrassments, are some of the products that will never die, for they will always live on in our memories.

"Does anyone else remember **Yucca Dew shampoo?** A wonderful-smelling mixture which did miracles for my teen-age hair, but obviously I was the only customer daring enough to put a concoction called 'Yucca' on my head." Melinda Carson, advertising manager, Coalfield Progress, Norton, Va.

"Did market researchers and audio equipment manufacturers forget that people have only two ears? They underestimated the public's reluctance to completely rearrange living room furniture in order to place four large speakers in precise, equidistant locations so listeners could sit squarely in the center enjoying the **four-channel effect.**" Bob Blancato, public relations manager, Reese, Thomases & Ellick, Wilmington, Del.

"Here's a Titanic memory. Take America's most popular children's book, about the world's greatest candy maker. Turn it into a movie starring Gene Wilder. Give it a score, including a hit tune. . .and then launch a product made of ersatz chocolate: **Willie Wonkas.** Too bad the client didn't make a product worthy of the name." Name withheld on request.

"Circa 1970, Coca-Cola bottlers tested a fruit-flavored soft drink named **Sugarbush.** It came in several flavors and was rather a strange concoction, which included yeast. I was working in a food store in Milwaukee as a teen ager the summer the drink was introduced and we had several dozen cases of Sugarbush in the basement. Bottled under pressure, the yeast fermented when exposed to heat. I earned several day's pay cleaning up the result, while ducking explosions." **Phil Bolda**, Colorado College.

"I nominate **Hero** detergent. It had to be the advertising, along with the name, that killed Hero. The tv spots depicted a huge box of the product, which had a booming macho male voice. Clustered around the base of the box was a horde of writhing, glassy-eyed, moaning women, their arms raised and waving in supplication to 'their Hero.' Even MCPs would have been repelled at this female adoration of a mere box of soap." Art Chenoweth, Turner Group, Portland, Ore.

Historical note: *Lever Bros. tested Hero in Oregon and Oklahoma in 1969.*

In Doyle Dane Bernbach's commercial, the monumental soap box bearing the imposing likeness of a stone-carved Greek god, much more than 10 ft. tall, has attracted a crowd of women, all of whom gaze up in awe as voiceover says: "I, Hero, am here. I am the strong detergent with the yet unheard-of power. . .I clean with strength. . .Your hands will feel the soft. Friends, housewives, countrywomen, bring me your wash."

By this time, the women can barely contain themselves. They begin jumping around and saying ". . .I wanna Hero kind of clean. I wanna strong yet softer clean. I wanna see it. I wanna feel it. Want my eyes to see the clean. Want my hands to feel the soft. . ." (AA, Sept. 8, '69).

"The best mixed-message advertising disaster was General Foods' **Whip 'n Chill.** Whip 'n Sizzle would have been a different product with a less confusing message." Robert Rosenberg, account service, Brady Co., Menomonee Falls, Wis.

"I have a vivid memory of spending a Sunday afternoon in the early post-war era touring the revolutionary **Lustron House.** It was constructed of light yellow and green enameled panels and looked something like a scaled-down '50s gas station. It never needed painting, couldn't get termites and had utterly no aesthetic quality. It would have been a great home for Charlie the Tuna, but humans rejected it." Bill Lawrence, Fuji

Travel & Tourism

John Pirman

Industry takes road to recovery in 1985

By Joanne Y. Cleaver

Ah, vacation. Which will it be—the beach or the mountains?

That dilemma is complicated this year by a full itinerary of affordable options; 1985 is shaping up to be a traveler's paradise.

Europe has been attracting thousands of U.S. tourists, buoyed by the strong dollar and favorable exchange rates, but it is not the only bargain. Domestically, fare and rate wars are raging in the airline, hotel and cruise industries. Combine those short-term skirmishes with a long-term trend of increased market segmentation, and the total package is one of healthy market growth for the travel industry and a lot of fun for consumers.

Over-all, last year was disappointing, according to the 1984 National Travel Survey, a study of travel trends by Washington-based U.S. Travel Data Center. In 1984, Americans took 528 million trips—2% fewer than in 1983, deflating the industry's expectations for a boom year.

As the economy recovered, consumers let out their pentup demand for such durable goods as major appliances and houses. In 1984, industry observers expected consumers to satisfy their appetites for the basics and turn to discretionary items such as vacations. But it wasn't until 1985 that the growth began.

"It's about time," says Douglas Frechtling, director of the Travel Data Center. "1985 looks like a full recovery year for travel. We see an upturn with a projected 5% increase in trips, and vacation trips will exceed that," he says. "It should continue into 1986, as far as we can see."

> **"We see an upturn with a projected 5% increase in trips."**
>
> *—Douglas Frechtling*
> *Travel Data Center*

Throughout 1984 and into this year, foreign destinations have been swamped by unprecedented numbers of American tourists, unhampered even by such dramatic and dangerous situations as this summer's terrorist hijackings, according to industry observers.

Up to 6% of all travel in the past 18 months has been abroad, Mr. Frechtling says. In 1984, an estimated 5.7 million Americans visited Europe, with a projected 12% increase for 1985, according to the European Travel Commission, New York.

While some industry insiders say the overseas travel is likely to continue, citing the perennial popularity of Europe, others say the wave of U.S. tourists overseas already may have crested.

"If the dollar softens up in advance of next year and stays weaker, it will affect next year [in terms of advance travel plans and reservations]," says Alan Fredericks, associate editor and publisher of *Travel Weekly*. Others say many first time and repeat European travelers already have made their trips, and additional travel from that group is unlikely in the near future.

If the tides turn, keeping tourists closer to home, the domestic tourist business will benefit. Last year, foreign attractions si-

phoned off demand for domestic destinations, industry observers say.

In 1985, according to early trends tallied by the industry, domestic vacation travel has rebounded.

Nearly 85% of all domestic vacation travel is by automobile, truck or recreational vehicle, reports the American Automobile Assn., Falls Church, Va. About 88 million Americans are expected to take car trips this year, up 5% from last year, says Richard White, AAA public information specialist.

Those vacations are not necessarily lengthy—half of the trips are planned to be fewer than 500 miles—but 4% more people than in 1984 are planning to stay at hotels and motels rather than with friends and relatives. The duration of the planned auto vacation trip, 6.1 days, is unchanged from last year, Mr. White says.

The AAA's most recent survey, completed in June, reported that in 1985, more people are budgeting ahead for their vacations. That kind of consumer optimism, combined with other trends, such as the surge in new car sales, indicates that 1985 should be a strong year for the category.

Air traffic also is taking off this year, according to the Air Transport Assn., Washington. The first six months of 1985 revealed a 12.6% increase in revenues per passenger mile, compared with the same period in 1984, for a total of 148.7 billion passenger miles logged. But last year's industry revenue total of $304.5 billion is not likely to be repeated this year because of lagging profits.

It's a classic case of higher volume but lower profits per passenger, says an airline industry insider, who would not speak for attribution. The ATA is projecting that total revenues per-passenger-mile will increase 7% over 1984 by yearend, with 80% of that travel within the U.S.

Deregulation-induced fare slashing is key to why airlines aren't making much money per passenger—only 19% of passengers are paying full fare and the average fare discount is 51%, according to the ATA.

To varying degrees, hotels and cruise lines are facing the same situation. Eighteen months ago, most hotels increased their rates at a healthy clip, apparently hoping to cash in on the travel boom anticipated for 1984, says John Rohs, vp-research for Wertheim & Co., New York.

The rate of increase slowed when not as many travelers as expected checked in, he says. As of June, rate increases had slowed to 6% or 7% more than the middle of 1984, and Mr. Rohs expects that by yearend, hotels will be raising their room rates only 4% to 6%.

Because the accelerated rates were out of touch with demand for rooms, hotel occupancy rates declined two to three percentage points during the first half of this year. The projected industrywide occupancy rate for 1985 is 64%, down from the recorded 66% in 1984, Mr. Rohs says.

Although exact figures aren't available, a similar trend has developed in the cruise industry. The number of people taking cruises has increased 10% to 15% in each of the past 10 years, says Ralph Bahna, president of Cunard Line, New York, and chairman of Cruise Lines International Assn. In 1984, 1.6 million passengers set sail aboard the ships of the 26-member association. To meet the swelling demand, many lines have added 1,000-plus passenger ships in the past 18 months.

Consequently, cruise lines have been pressured to develop a variety of offerings to fill their berths. Such options include weekend cruises, longer excursions and a larger variety of ports.

> **"Many companies are . . . preselecting airlines and hotels and are looking for more ways to cut costs."**
>
> ***—Mike Leeds***
> **Business Travel News**

As airlines, hotels and cruise lines are working to maintain their market shares, they are reshaping their marketing strategies, using rate cutting and special packages. Current financial pressures have fueled the market segmentation that insiders say has been developing for several years.

"We've reached the point where sophisticated marketing is becoming recognized [within the industry]," says Thomas Davidson, president of Davidson-Peterson Associates, a New York-based travel research company. "You're hearing people talk about the need for strategic business plans and the need to be aggressive."

The 1984 level of advertising and marketing spending in the travel industry will double by 1986, Mr. Davidson says.

States of the union—recognizing the benefits of advertising for tourists last year —increased their ad budgets an average 23% for 1985, he says.

In 1985, various locales and destinations will target themselves to select groups of people, rather than simply splashing logos and catchy slogans across newspaper travel sections, Mr. Davidson says.

One method used to promote lesser known or multifaceted destinations is videotapes designed to be viewed either at home or in a travel agent's office, Mr. Davidson says. Canada is one location using this method. "How much Canadian history do you learn about in high school? With the vcr [videocassette recorder] spots, you can really give the story of a destination and you'll have a better informed tourist."

As marketers attempt to carve out niches for themselves, some segments of the travel industry appear to be polarizing. Thus, much of the growth will be in the high end and the budget end of a given industry, industry insiders say. For example, the all-suite hotel is one of two fast-growing concepts in that market. The other is the budget hotel category, with major chains such as Holiday Inns and Marriott Hotels introducing their own lower price, no-frills chains.

Gleefully taking advantage of the rate cutting and competition is the business travel market. That category was the only one to grow, at a 7% rate, in 1984, according to the U.S. Travel Data Center. Currently, the category accounts for 15% of all travel. In 1983, 14% of all travel was for business and convention purposes, according to the Travel Data Center.

More than $80 billion was spent last year by business travelers, and by 1990, that figure is expected to increase to $90 billion, says Mike Leeds, publisher of *Business Travel News*, Manhasset, N.Y.

Business travel benefits as the economy grows: Companies expand sales forces, open new sites and visit increased numbers of clients, customers and suppliers. During the last recession, corporations realized how many miles they could get for their travel dollars.

"Many companies are reducing the options [available to their travelers], preselecting airlines and hotels, and are looking for more ways to cut costs," Mr. Leeds says. Companies are so concerned with containing travel costs that the number of in-house corporate travel managers doubled between 1981 and 1983, and is expected to have doubled again from 1983 to this year, resulting in about 3,000 by yearend.

Although business travelers may not have a choice of destinations, thousands of leisure travelers do. And the most popular direction is south—where 24% of all travelers migrate, according to the U.S. Travel Data Center. The Central Atlantic states and frontier West are nearly tied as the next most popular destinations, with the Eastern Gateway states next, followed by the Far West. The Great Lakes area is sixth choice for incoming visitors, sending out more travelers than it receives.

On a smaller scale, the AAA reports that oceans and beaches remain No. 1 destinations for those planning auto trips this year, followed by small towns and rural areas. Last year, cities were the second most popular destination; this year, they've dropped to third place. Mountains, lake areas, state and national parks, and theme parks are preferred destinations in that order.

So, when all is considered, Americans are ready to go on the road and the travel industry is ready to offer them oceans, mountains and much more.

Marketing enters airlines' flight plans

By Richard Edel

Deregulation plopped like a giant stone into the calm waters of the regulated air transport industry. The date was Oct. 24, 1978, and the Airline Deregulation Act was to be implemented over a six-year period ending Dec. 31, 1984. As the new order marks its first year in 1985, the ripples of deregulation continue as the industry adjusts from its former state as a public utility to a free market entity.

Like giant fledglings pushed from the nest, the deregulated domestic carriers learned to fly on their own, some soaring, some faltering at first but later getting the hang of it, and others falling victim to poor judgment, bad economics, cutthroat competition, corporate raiders and, occasionally, each other. However, with few exceptions, deregulation marked the opening of a new era of competition, and the preeminence of a new force: Marketing.

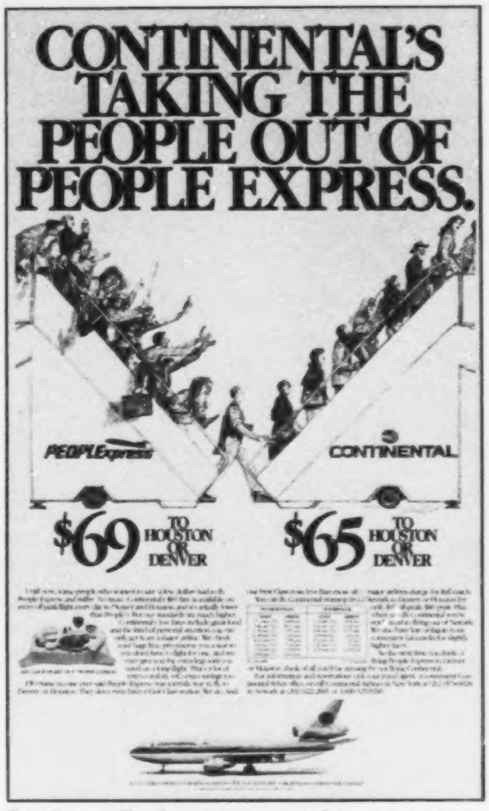
"It's marketing 101 for the airlines," says John V. Pincavage, airline analyst for Paine Webber Mitchell Hutchins, New York. And it has been a slow course of study, he says. "After deregulation, it takes people a little while to figure out what they want to do."

Experts say the air travel industry has evolved in three phases since the law was enacted. The first was marked by the new freedom to enter and leave markets, which enabled large and small carriers to restructure their route systems to make the best use of their resources.

In phase one, regional carriers, such as Piedmont Aviation, Southwest Airlines and USAir, benefited enormously by grabbing short and medium-haul routes and establishing hubs and spokes in new markets. Previously, their main business was in point-to-point traffic and feeder service for trunk carriers. Favorable labor contracts and smaller aircraft more suited to frequent, short hops gave these carriers key cost advantages in their expanding markets.

Phase two belonged to the startups, the nonunion carriers such as People Express Airlines and New York Air, among others. One effect of deregulation was an explosion in the number of carriers from 36 in 1978 to more than 100 today. With low costs and low fares, many of these carriers were the first to openly challenge the established trunk carriers in key markets. For example, Newark, N.J.-based People Express, by virtue of rapid expansion and market entry and exit, is butting heads with the majors in several large markets.

In 1984, People Express shifted its expansion strategy from noncompetitive markets to large established ones, including Chicago, Detroit, Los Angeles, Miami, Minneapolis and Cleveland. During the first half of 1984, about 54% of People's traffic came from markets where it competes with Eastern Air Lines, 47% from Pan American World Airways, 44% from Trans World Airlines and 33% from Delta Air Lines, according to Salomon Brothers, New York.



Continental's changeover to a low-cost operation jolted the airline industry.

Several key mergers, acquisitions and internally generated expansions also laid the groundwork for future developments. Pan Am acquired National Airlines, Miami, and a heap of debt in 1979, and Texas Air Corp. took over Continental in 1981. Braniff ambitiously expanded domestic and international routes, while trunk carriers began staking out claims on key hub cities.

It was between the first two phases of deregulation that air carriers large and small were jolted by several unusual events: DC-10 aircraft were grounded as a safety precaution in the summer of 1979 after several air disasters; fuel prices doubled between 1978 and 1980; a severe recession gripped the economy between 1980 and 1983, abruptly curtailing demand for air travel, and the Professional Air Traffic Controllers Organization strike in 1981 caused traffic restrictions through early 1983.

As a result of these factors and increased competition, Braniff, in dire need of cash flow, slashed prices to boost traffic. But the cash Braniff generated could not keep it from sinking in red ink when other carriers matched its rates. In May, 1982, Braniff filed for reorganization under Chapter 11 of the Federal Bankruptcy Act, signaling the third, and most critical, phase of deregulation: Restructuring of the major carriers.

Continental was next in bankruptcy court, shutting down for a few days late in 1983, and re-emerging with fewer routes and a nonunion work force. Continental's changeover to a low-cost operation jolted the air transport industry, affecting the over-all marketing and internal business strategies of nearly all carriers.

AmericanAirlines
Something special in the air.

In addition to flying to Europe, American Airlines hopes to enter the Japanese market.

"The most significant thing that has happened in recent years to the airline industry is deregulation," says John R. Zeeman, exec vp-marketing and planning at United, Elk Grove Village, Ill. "Deregulation led to creation of the People Expresses and Midway Airlines, which in turn led to Continental's bankruptcy and re-emergence as a low-cost carrier. That single event is the second most important factor since deregulation."

[illegible] Air Transport Association

The new Continental's low cost structure resulted in a chain reaction of strikes against major carriers as unions fought their efforts to remain competitive by reducing labor costs, Mr. Zeeman says. Particularly hard hit have been pilots, who walked out on United in May and June, returning with a two-tier salary scale that must be renegotiated in five years.

"One of the things you learn quickly is that your marketing is only as good as your cost effectiveness," Mr. Zeeman says. "Give me the cost structure of a People Express and I could be a marketing genius."

For obvious reasons, United is watching closely the tentative $900 million acquisition of Trans World Airlines by Houston-based Texas Air Corp., parent of Continental Airlines and New York Air, he says. Such a merger would create an international system second in passenger traffic only to United Airlines and third in operating revenues behind United and American Airlines.

Continental already is United's second leading competitor, right behind American, Mr. Zeeman says.

Although a spokesman for Texas Air says there are no plans as yet to consolidate Continental, TWA and New York Air, each would benefit considerably from coordination of flight schedules, combined reservation systems, facilities sharing and various economies of scale, according to a Texas Air prospectus.

However, doubts persist about whether the Texas Air bid for

(Continued on Page 23)

Richard Edel is a frequent contributor to Special Report and has written extensively on the airline industry.

Airlines

(Continued from Page 19)

TWA will go through. Investor Carl C. Icahn raised his stake in TWA to 45% in early August. While Mr. Icahn has effectively gained control of the carrier, securities analysts speculate that he may be upping the ante, looking for a sweeter bid from Texas Air. The big question is whether Texas Air will try to obstruct Mr. Icahn's takeover, or whether it will be satisfied with selling its TWA shares and options to buy.

In addition to watching developments at TWA, United is waiting for a U.S. Department of Transportation ruling on whether it may proceed with its $750 million purchase of Pan Am's Pacific division. If approved, United would become a major international carrier virtually overnight, acquiring a ready hub in Tokyo and extensive routes throughout the Orient and the South Pacific.

With a powerful feeder system to Seattle, San Francisco, Los Angeles, New York and Honolulu, the Pan Am routes would put United on an equal footing with Northwest Orient Airlines, which controls an estimated 24% of Pacific traffic. The deal also could put a dent in traffic by Japan Air Lines, which has a 40% share of the U.S.-Japan air traffic.

With a chance to unload some of its $1.2 billion debt, Pan Am plans to concentrate on expanding trans-Atlantic, Middle Eastern and South American routes, company sources say.

St. Paul, Minn.-based Northwest Orient, which has the most to lose in the United-Pan Am deal, is leading the opposition. The deal also is opposed by Eastern Airlines and American, which are lined up to enter the U.S.-Japan market if pending negotiations with Japan to increase the number of carriers serving the market are successful.

Pricing is another problem the major carriers are facing as a result of deregulation. Because low-cost carriers compete on the basis of price, the majors are forced into a system of discounts as a means of managing their seating inventory.

In terms of advertising, inventory management means "you start to pick your spots and sell to your inventory," says William H. Dowse, vp-advertising at Miami-based Eastern. "In the summer, you might focus on a market-by-market basis where you have seats to sell."

Frequently, this advertising takes the form of price-destination listings. But the major carriers today are finding ways to justify differences in price through comparative advertising that promotes their superior level of service, Mr. Dowse says.

Pricing also is used to stimulate traffic during weekly and seasonal lulls and to control the number of discounted seats available on flights where demand is high, he says.

An example of pricing used to compete primarily for pleasure travelers over low-cost airlines is American's Ultimate Super Saver fare, which discounts fares up to 70% on 30-day advance purchase, with a 25% cancelation penalty. American's first ads in January for the Ultimate Super Saver generated a 50% to 75% increase in reservations.

Predictably, United offered its own Ultra Saver fares within 24 hours, but the two carriers were aced out a short time later when Continental lowered its 14-day advance purchase fares to the Ultimate Super Saver level, with no restrictions.

Pricing factors work the same way in reverse. Improved projections for air travel in recent months persuaded United in early August to raise fares. United announced a new fare schedule that ties mileage to prices on fares, increasing the average cost of a ticket by more than 4%. United's fare structure also increases SuperCoach fares, eliminates discount fares on seven-day notice and adds a new discount on fares with 14 days' notice. American, TWA, Pan Am and Republic all announced plans to match United's fare structure.

While the increases will dampen passenger traffic, they also will boost yields, the income gained from paying passengers per seat per mile.

Fare increases aside, the overall effect of more competition in the market has been steady, downward pressure on pricing, says Alfred Norling, airline analyst at Kidder, Peabody & Co., New York.

"It's not unusual for an airline to seek a temporary readjustment in pricing. But fares are under downward pressure all of the time. The competition [from deregulation] is intense, and the degree of competition defines the level of fares," he says.

Whether other carriers will match the higher fares or use pricing advantages to stimulate travel on their own lines remains to be seen. Generalities are difficult because each market has its own competitive factors, says Matt Gonring, pr director for Northwest Orient.

"Every market is different. The type of travelers you carry, the kind of aircraft you fly, your frequency, all affect pricing and advertising strategies," he says.

For United and American, an attempt is being made through image advertising to differentiate between price and quality, United's Mr. Zeeman says.

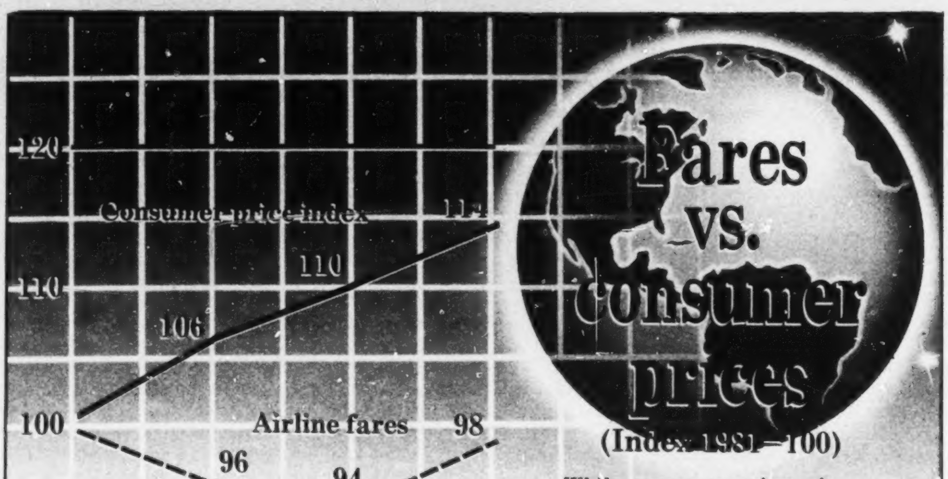
"Ever since deregulation, advertising has been both image-oriented and tactical," agrees Ann Smits, assistant vp-advertising at American Airlines, Dallas. While all airlines engage in tactical advertising of rates and destinations, she says, American also keeps a heavy schedule of image advertising to promote its reputation.

A recent example is its campaign about American's efforts to help restore the Statue of Liberty.

"The goal of that campaign was to affiliate American with a cause for which this country was founded," she says. "But it's not something you can measure in terms of a return."

Analysts point to the fact that United and American are able to influence the direction of the industry on routes and fares as an indication that the fourth phase of deregulation may be near. The chief characteristic of this phase is the growing power of a handful of major airlines as a result of internally generated growth, mergers and acquisitions.

On the other hand, perhaps the mega-mergers, such as United-Pan Am or a TWA-Texas Air, won't really affect more than a few players in each market, Paine Webber's Mr. Pincavage says. "You may have four or five dominant carriers in the future, but you've got that now." ■



While consumer prices rise, deregulation exerts downward pressure on the cost of air travel.

Liquor makers are mixin' it up with cocktails

By GAY JERVEY

Playing catch-up with the $333 million wine-cooler business, manufacturers and distributors of distilled spirits are in the initial stages of christening a new breed of prepared cocktails that blend premium brand names with popular mixers.

Their target: Consumers who crave different, preferably lighter drinks carrying the panache of an established brand name—and that are conveniently packaged.

Among big names currently moving new products to test or considered likely to take the plunge are Beefeater gin, Bacardi rum, Seagram's 7 Crown whisky and Pimm's liqueur.

"We are monitoring the situation with great vigor, with very stong intent," said William Walker, president of Miami-based Bacardi Imports.

"This is becoming a very key growth area," added John Cummock, Bacardi's marketing director-new ventures. "Distilled spirits companies are looking at this in much the same way wine companies have treated wine coolers."

Distilled spirits marketers are following the lead of James B.

New Rx for drug ads

By STEVEN W. COLFORD

WASHINGTON—A voluntary moratorium on prescription-drug advertising to consumers soon will be lifted under pressure from the White House, according to sources at the Food & Drug Administration.

The 30-month moratorium, backed by the pharmaceutical industry, Congress and the FDA, is expected to end in a couple of weeks in response to pressure from the White House Office of Management and Budget, sources said.

"A lot of people here are kind of bent out of shape over this," said one FDA official. "They think this is being shoved down our throats by OMB."

The informal moratorium began in February, 1983, when former FDA commissioner Arthur Hull Hayes asked industry leaders to refrain from consumer advertising until the agency analyzed the benefits and risks of such ads.

At the time, the FDA intended to develop simplified ground rules for prescription-drug advertisers to follow during planned mass-media ad tests.

The agency requires drug makers to make extensive disclosures of side effects and other technical information in their conventional ads to doctors. Without relief from these requirements, industry officials said, effective mass-media advertising for prescription products would be difficult and costly.

Drug companies, by an overwhelming margin, later told Congress they oppose advertising prescription drugs directly to consumers (AA, Aug. 23, '84). The strength of that sentiment cooled the FDA's ardor for pursuing the matter, and the planned mass-media tests never took place. FDA officials say they still won't pursue the test idea or rule changes to make consumer advertising easier, even if the moratorium ends.

The OMB declined to confirm or deny that it wanted the ad moratorium to end. But the FDA is expected to publish in the Federal Register a notice that the voluntary moratorium is no longer in place.

Dyson brings 'vision' to AA's Workshop

By NANCY GIGES

NEW YORK—A winning attitude is the wellspring that fosters the confidence and courage to create a dynamic company, Coca-Cola USA president Brian Dyson told some 900 attendees Aug. 25 at ADVERTISING AGE's 28th annual Creative Workshop.

"This winning attitude begins with a vision of yourself and a vision of your company," Mr. Dyson asserted at the opening session.

Mr. Dyson suggested that his company and key rival Pepsi-Cola Co. have led U.S. industry in staying in touch with the consumer. Together, he said, these companies have discovered needs and innovative ways to address changing consumer desires and trends.

Anticipating and meeting these needs and trends often requires the courage to innovate and the necessity for a strong relationship with ad agencies and a demand for strong creative people, the Coca-Cola executive said.

"It's not enough to be the leader in the soft-drink industry, but you

Clothing, pricey watches join line

Swatch cuts wide swath

By LISA PHILLIPS

NEW YORK—Young people will get a big dose of Swatch this fall, thanks to Swatch Watch USA's $14 million multimedia ad campaign and the 400 Swatch Shops set to open in major department stores by December.

Also soon to be announced is a line of Cosmic Cowboy clothing, which the company says is already sold-out to major retailers, and a Limelight watch, priced at around $100, with four diamonds set in the face, and a limited edition watch whose face is decorated with faceless figures designed by Keith Haring, New York subway-graffiti artist.

With Swatch's sales rocketing from $3 million in 1983 to a projected $125 million this year, Swatch watches, fashion accessories and life-style items such as Italian-made razors and German-made sunglasses, have joined the pop symbols of the 1980s.

The Cosmic Cowboy line, for the moment, consists of shorts and tops in two patterns of cartoon figures in western settings, lassoing planets, and coordinating solid tank tops and t-shirts bearing the Cosmic Cowboy sheriff's star logo. Matching accessories include change purses decorated with a huge metal star matching the clothing, and a plastic purse in the form of saddlebags, which can be reversed from patterned side to solid white vinyl.

The Limelight watch is not associated with the famous nightclubs of the same name, said Steve Rechtschaffner, creative director at Swatch Watch USA. Instead, the

Marketing chief bolts Cal. Cooler

By **BRIAN LOWRY**

STOCKTON, CAL.—California Cooler Inc. has undergone its first major personnel change since it was acquired by Brown-Forman Inc., Louisville (AA, July 8).

Tom Gibbs, California Cooler's director-marketing since December, 1983, resigned last week to "pursue individual opportunities." Jon Shastid, who held the same title at E. & J. Gallo Winery, Modesto, replaces Mr. Gibbs. Mr. Shastid assumes the more-expansive title of vp-sales and marketing.

Mr. Shastid's duties at Gallo were limited to wine marketing, primarily on Gallo's Carlo Rossi brand. It didn't include the winery's Bartles & Jaymes wine cooler, which has become one of California Cooler's leading competitors.

Reached at home, Mr. Gibbs admitted that he left California Cooler due to frustration with the company's reluctance to make marketing decisions pending the Sept. 5 consummation of the sale.

He also said he was disappointed with the decision by company co-founders R. Stuart Bewley and Michael Crete not to share with top executives the $55 million cash they got from Brown-Forman. Mr. Gibbs said that Messrs. Bewley, who is corporate president, and Crete, who is chairman, had discussed voting equity to key executives, but the founders' reluctance to do so "showed their selfishness."

Mr. Gibbs added that he has gotten several offers in the wake of California Cooler's marketing success, and "after making the company millions of dollars, I decided to do something for myself."

Although Mr. Gibbs claimed his sudden departure was not a bitter one, he said California Cooler "lacked direction" since announcing the sale to

Lotus to promote enhanced 1-2-3

By **BRIAN MORAN**

Lotus Development Corp. this fall will strike back at software marketers who have capitalized on weaknesses in its best-selling 1-2-3 program with an improved version of its own.

While recognized as a benchmark program that catapulted Lotus to the top of the personal-computer software business, 1-2-3 also created a flourishing subindustry for smaller competitors to market add-on products. Such offerings have made the 2½-year-old 1-2-3 program more powerful and easier to use.

Now Cambridge, Mass.-based Lotus has a reply to the hundreds of add-on products that analysts say have pointed up the product's limitations. Lotus says its new 1-2-3 will allow users to make spreadsheets—the program's bread-and-butter function—faster and up to four times larger.

Graphics, another problem area on the original package, also have been improved. 1-2-3, which runs on the IBM Personal Computer and compatible machines, also offers a database-management function.

Lotus will support the 1-2-3 retooling with a multi-million-dollar print campaign beginning in early fall in the *Wall Street Journal*, business books including *Business Week*, *Forbes* and *Fortune*, and computer magazines, including *Byte*. Lotus also will target the nearly 1 million owners of 1-2-3 with ads in the company-owned *Lotus*. Hill, Holliday, Connors, Cosmopulos, Boston, handles.

The new 1-2-3 will retail for $495, the same as the original. Lotus will charge registered owners of the program $150 to upgrade to the new version.

In another move to build on 1-2-3's estimated 70% share of the inte-

Late West Coast news

Rainier to bank on Young & Rubicam

Rainier Bankcorp, Seattle, selected Young & Rubicam, San Francisco, to replace its agency of 25 years, Cole & Weber, on its $4 million account. Y&R edged out Elgin/Syferd, Seattle, and Dancer Fitzgerald Sample, San Francisco, in the competition. Rainier decided against splitting the business-to-business part of the account, which Seattle-based Sharp Hartwig hoped to snare.

Great America, Santa Clara theme park, appointed Ketchum Communications, San Francisco, to handle its $2.5 million business, formerly at Smith Burke & Azzam, Baltimore. The account change follows the park's sale to the city of Santa Clara from the Marriott Corp. in June.

El Pollo Loco, La Mirada, Cal., the Mexican-style charbroiled chicken fast-food subsidiary of Denny's Inc., named Hispanic ad specialists Casanova & Pendrill Publicidad, Los Angeles, to develop a comprehensive Spanish-language ad program for the chain. Casanova & Pendrill succeeds McCann-Erickson's La Agencia Hispanic advertising arm. Under Denny's ownership, the 40-location chain intends to nearly double in size by the end of the year. McCann

Ford Aero debut a big 'Hair'-y deal

By RAYMOND SERAFIN

Ford Motor Co. will use music from the archetypal counterculture production of the 1960s in the biggest ad launch ever for a Ford truck.

"The Age of Aquarius" was the most widely known song from "Hair," the self-styled tribal rock musical that in some quarters was regarded as a promotion for drugs, sex, rock music and rebellion. Reincarnated as "The Age of Aerostar," the music will be used to sell Ford Aerostar minivans to a target audience of young marrieds with two children.

Although the first Aerostars already have been made available to dealers, the ad campaign via J. Walter Thompson USA, Detroit, won't break until mid-September. Commercials debut Sept. 15 on National Football League games and "60 Minutes" as well as on network radio, and four-page inside front-cover gatefolds will turn up in five newsweeklies the week of Sept. 16. Print ads carry over "The Age of Aerostar" theme used in broadcast.

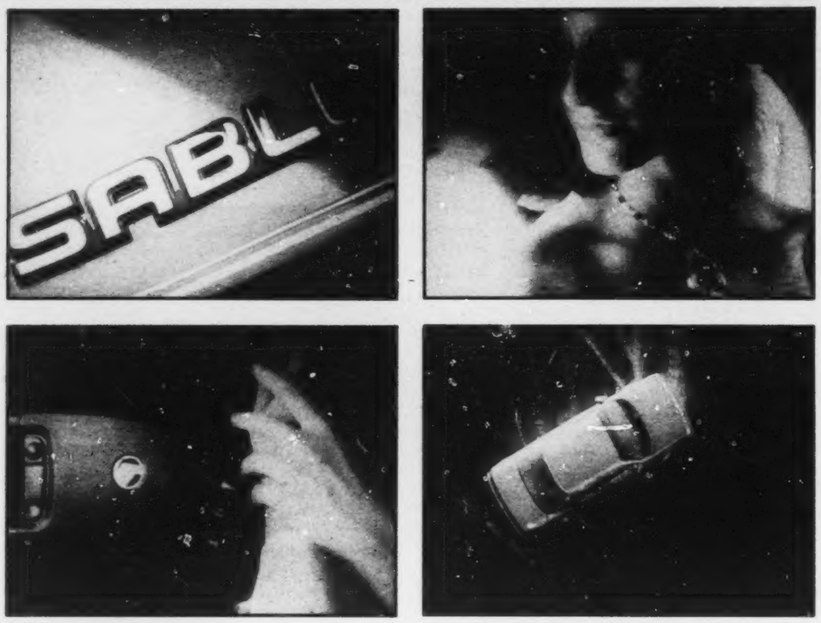
John Vanderzee, Ford division advertising manager, said that test consumer groups didn't associate the music with the controversial "Hair." "Not once did I hear anyone say, 'Oh, that was for its time a very radical musical, with people running around with no clothes on.' But they do remember the song and that's far more important."

"The Age of Aquarius" follows successful use of 1960s music by Ford's Lincoln-Mercury division to develop a more youthful image for the Mercury line. "Searchin'," "Proud Mary," "Be My Baby" and the Beatles' "Help" were used in the campaign that broke early this year via Young & Rubicam, Detroit, and a new wave of songs from that era are planned again this fall for Mercury.

Ford went to "The Age of Aquarius" theme because of what Mr. Vanderzee called "a double marketing problem, registering a new vehicle and a new name. One of the best ways you do it is by linking it up with something else that's remembered."

But there's also a third marketing problem, which is that Chrysler Corp. beat Ford by more than a year in introducing its popular minivans, the Dodge Caravan and Plymouth

(Continued on Page 55)



L-M continues sound strategy

Ford Motor Co.'s Lincoln-Mercury division, Detroit, on Sept. 22 breaks a new round of tv spots featuring '60s music. The new commercials back the launch of L-M's 1986 Sable, due in November. One of the spots, via Young & Rubicam, features Bette Midler performing a rendition of "Do You Wanna Dance."

Nets unwrapping 'pre-premieres'

By JAMES P. FORKAN

New York—The network tv programing chiefs have now slated at least 18 series for preseason premieres or "previews," although the old saying about the "early bird catching the worm" hasn't proven true for newcomers in seasons past.

NBC's "Hell Town" will be the first member of the fall freshman class to bow, Sept. 11. All told, thanks to NBC late last week advancing "Hunter's" return to Sept. 21, 10 new-for-fall contenders will appear on NBC before the season starts officially Sept. 23, compared with four preseasoners apiece for ABC and CBS.

The number of series set for debuts in early October—before postseason baseball grips the nation—rose to six late last week, after CBS delayed "Falcon Crest's" return to make way for a two-hour "Dallas" opener. Only one show, ABC's "Dynasty II: The Colbys of California," is due in the November sweeps.

As many buyers at ad agencies pointed out, most of the shows given preseason introductions are comparatively weak entrants in the A.C. Nielsen fall ratings race. The nets' rationale is that those shows stand a better chance for crucial audience sampling before the full onslaught of original series.

However, that head-start strategy rarely has yielded lasting results for prime time's weak sisters. And it is not expected to help the most marginal entries this fall either, most sources agree. On the other hand, a couple of freshmen shows may benefit, some admen believe.

At J. Walter Thompson USA, Richard Kostyra, senior vp-media director, recalling ABC's "Call to Glory" last year, said, "I wouldn't

Agencies get itch for Lotto

By STEWART ALTER

Lotto fever hit New York's advertising agencies, too, as some splurged to buy tickets for their entire staffs.

McCann-Erickson bought 800 tickets for the Aug. 21 Lotto drawing, giving employes a chance at the $41 million jackpot—a North American record—that would have allowed them to set up their own agencies, or even buy a modest-size client.

The agency's selection method, random numbers and geometric patterns, hit four out of six numbers (third prize) on two tickets and three plus the

Castle & Cooke brands tomatoes

By BRIAN LOWRY

San Francisco—Castle & Cooke hopes to capitalize on the growth in fresh produce sales by putting its Dole trademark on tomatoes—the first step in linking the Dole name to fresh vegetables.

Honolulu-based Castle & Cooke already is forging ahead with plans to market green peppers and cucumbers with Dole's redesigned sunshine stickers. It also may add cantaloupes to the list of fruits that carry the Dole brand, which includes bananas, pineapples, lemons and oranges.

Plans call for the Mexican-grown, extra-large tomatoes, known as beefsteaks, to be distributed nationally, beginning in early September in the Midwest and Northeast. Public awareness will be created with radio, co-op print ads and point-of-sale materials that read "sun-ripened on the vine for full taste."

Company officials estimate the ad campaign will begin in six to eight weeks. Allen & Dorward, San Francisco, handles the Fresh Foods division.

The move is a reflection of consumer trends, said Anthony Wilmer, Fresh Foods division marketing manager. Fresh strawberries and cauliflower, for example, enjoyed nearly 50% sales increases the last two years, while frozen sales dropped 27% and 20%, respectively, according to state statistics.

As the public's demand for fresh produce has increased—resulting in stagnant or declining frozen vegetable sales—Castle & Cooke has emphasized its fresh division and deemphasized frozen goods, Mr. Wilmer said.

In addition, the move reflects Castle & Cooke's redirection from a production-driven organization

ADWATCH

Coke ads score again

Lead recall survey for sixth month

By SCOTT HUME

Coca-Cola continues to turn its "marketing blunder" into an advertising awareness bonanza.

July was the sixth consecutive month that Coke's advertising has received the best recall from consumers, according to Advertising Age's monthly adWatch survey. More impressively, Coke's lead over the No. 2 advertiser (which has been archrival Pepsi for the past five months) steadily has grown since it launched "new" Coke and then reintroduced the Classic formula.

Last month, a nationwide sample of 1,000 consumers was asked to name the first advertising that came to mind from among all they had seen, heard or read in the previous 30 days. Of that sample, 17.7% said Coke's ads came to mind first, compared with 14% in June and 3.6% in February, before the brouhaha began.

The 10 best-recalled advertisers in July were, in descending order, Coca-Cola, Pepsi, Miller/Miller Lite, Burger King, McDonald's, Budweiser/Bud Light, Ford, Chevrolet, Tide and AT&T.

Coke's 17.7% recall share in July is only slightly lower than that of the all-time champ, Wendy's, which captured 20.3% of first mentions in March, 1984, at the height of the "Where's the beef?" mania. Coke has mounted a challenge to Wendy's record without benefit of an especially memorable theme line, a specifically recalled commercial or ad or the presence of an octogenarian cutie such as Clara Peller.

When that consumer sample was specifically asked to name the first soft-drink advertising that came to mind from all they had encountered, Coke's dominance was even stronger.

Coke's advertising came to mind first for 53.4% of the sample, better than double Pepsi's 25.9% share. 7UP trailed in third place with 2%. The consolation for Pepsi is that its

'Tribune' adds Gannett's 'USA Weekend'

By GARY LEVIN

The *Chicago Tribune*, apparently not hurting much from a 5-week-old production workers' strike, is steamrolling ahead with new sections and taking the opportunity to return to its morning-only publishing cycle (AA, Aug. 19).

The paper (daily circulation, 776,000) last week announced plans to insert Gannett Co.'s *USA Weekend* initially in its Sunday editions, to launch a revamped Wednesday *Style* tabloid magazine and to resume a morning-only publishing cycle by discontinuing its late-afternoon Green Streak edition.

The developments came as the *Tribune* was criticized last week in the Chicago City Council for its "bad faith" in bargaining efforts with three unions that struck the paper July 18 (AA, July 22).

The addition of *USA Weekend* upon its debut Sept. 8 will make the *Tribune* the largest paper to carry the new publication of Rosslyn, Va.-based Gannett.

The addition of the *Tribune*—along with the earlier announced additions of the *Denver Post* and the *Dallas Times Herald*—will enable Gannett to make up for half the circulation lost to rival *Parade* when Gannett transformed *Family Weekly* into *USA Weekend* (AA, July 29).

Initially, *USA Weekend* will compete head-on with the *Tribune's* own Sunday magazine, which has racked up impressive ad page gains so far this year. To avoid such direct competition—especially among national advertisers—the *Tribune* will shift *USA Weekend* distribution to Fridays beginning Nov. 1, lowering Chicago distribution from 1.1 million to 776,000.

"I don't see a direct conflict there," said *Tribune* editor James Squires, because, unlike *USA Weekend*, the Sunday magazine is "upscale" and "not a celebrity entertainment section."

Separately, following the success of such zoned products as its "Friday" entertainment tabloid, the *Tribune* Sept. 11 will unveil *Style*, a life-style weekly tab-style magazine to replace the broadsheet fashion-oriented "Styles."

The new magazine, to run a minimum of 32 pages a week with 55% advertising, will be printed on heavier, whiter-stock paper. It is zoned nine ways, and a b&w ad page costs $4,985, about half the paper's full-run broadsheet retail rate for large-volume advertisers. A color page in *Style* costs an additional $2,300.

Combination rates will be offered to space buyers in both *Style* and the *Tribune's* Sunday magazine, perhaps resembling the 20% multiple-page discount offered to advertisers in the Sunday magazine alone.

"It really addresses the whole life style of the market we're after," said special projects manager Robert Reese, and is "something the *Trib* hasn't done very well so far."

Major retailers, including Carson Pirie Scott & Co., Marshall Field's and Neiman-Marcus Co., already have signed yearlong commitments for *Style*, Mr. Reese said.

Separately, the *Tribune's* decision to abandon its Green Streak, which has not been published since the strike began, may further sap the impact of the walkout.

The Green Streak, which the *Tribune* says had daily circulation of 27,000 copies, has been replaced by a 4,000-to-6,000 copy pressrun of a repackaged Midwest edition available downstate and elsewhere in the region.

The new predated "national edition" will be sold at airports, 24-hour newsstands and hotels.

Outside Tribune Tower, picketers continued marching and meetings continued between management and the unions.

The unions claim the *Tribune* is unfairly trying to displace them and break lifetime job guarantees by ordering mandatory transfers to other departments, thus stripping workers of current union memberships. The paper says the moves are necessary due to automation.

The unions have mounted boycott campaigns, seeking cancelations from subscribers and advertisers.

A *Tribune* spokeswoman said "fewer than 2,000" subscription cancelations so far have been received. An advertiser boycott was less successful among large advertisers bound by long-term commitments, though union spokesmen claim smaller advertisers have supported the boycott.

The paper now appears normal in both daily and Sunday editions, with certain combined Sunday sections the only evidence of the stalemated walkout.

That has proved sobering to the unions, which now predict a longer strike than first anticipated.

Across the street at the *Sun-Times*, editorial staffers have voted overwhelmingly to authorize a strike against that paper as contract negotiations continue. No strike deadline has been set.#

Single-copy magazine sales still weak

By STUART J. ELLIOTT

New York—Magazines' fears of more gloomy news on the single-copy sales front have been confirmed by the latest figures from the Audit Bureau of Circulations (AA, Aug. 19).

Not only is the slide in newsstand sales that began more than a year ago still a problem, according to ABC's per-issue averages for the six months ending June 30, it appears to be accelerating. About three times as many major magazines reported sharp declines in single-copy sales as reported significant gains.

The losses in single-copy sales were evident almost across the board in many key categories:

- Business and personal finance: *Changing Times*, 14.4%; *Financial World*, 20.4%; *High Technology*, 30.1%; *Inc.*, 17.8%; *Sylvia Porter's Personal Finance*, 31.8%; *Venture*, 15.1%.
- Computer: *Byte*, 21.6%; *Compute!*, 36%; *80 Micro*, 42%; *Family Computing*, 15.7%; *Infoworld*, 32.7%; *Personal Computing*, 35.9%; *Popular Computing*, 28.4%.
- Men's sophisticates: *Cheri*, 22.1%; *Forum*, 14.3%; *Genesis*, 22.1%; *High Society*, 14.4%; *Playboy*, 18.3%.
- News: *Harper's Magazine*, 14.9%; *New Republic*, 33.1%; *The New Yorker*, 12.3%; *Newsweek International* (Asia), 23.2%.
- Teens: *16*, 37.2%; *Super Teen*, 29.6%; *Teen Machine*, 27%; *YM* (*Young Miss*), 20.5%.

In many cases, magazines suffering on the single-sales side are moving to beef up their subscription operations (AA, March 4). For instance, among the titles cited above, those able to substantially increase their subscription sales included *Compute!*, 33%; *Family Computing*, 39.3%; *Financial World*, 24.5%; *Inc.*, 24.6%; *Infoworld*, 36.6%; *Playboy*, 11.2%, and *Sylvia Porter's Personal Finance*, 61.4%.

Other magazines traditionally dependent on single-copy sales also are moving to derive more of their total circulation from subscriptions. Among these that enjoyed increases in subscription sales: *Cosmopolitan*, 12.8%; *Family Circle*, 55.8%; *National Examiner*, 44.8%; *People*, 20.8%; *Playgirl*, 29.6%; *Penthouse*, 15.3%, and *Weekly World News*, 38.6%.

Conversely, some publications—including ones that have been subscription-oriented—are braving the sagging single-sales field to register increases. Among them: *Food & Wine*, 65.1%; *Health*, 589.4%; *Home*, 32.5%; *Horticulture*, 131.5%; *M*, 33.7%; *National Geographic*, 48.4%; *New Shelter*, 24.8%; *Prevention*, 18.1%, and *Run*, 23.7%.

Turning to total circulation (subscription and single copy) among magazines in all categories with large percentage gains were: *The Artist's Magazine*, 164.8%; *Run*, 96.7%; *Gourmet*, 77.8%; *Sun*, 62.9%, and *Pro Bass*, 60.3%. Among those with large percentage declines: *16*, 34.7%; *World Press Review*, 29.8%; *Super Teen*, 29.6%; *Teen Machine*, 27%, and *Daytime TV Presents*, 24.7%.

A review of the ABC figures also brings to light several special situations. Now that *Gourmet* is fulfilling subscriptions to the now-defunct *Cuisine*, its subscription circulation soared 92.8%. And *Vanity Fair*, after dropping its cover price to $2 from $3 and its annual subscription to $12 from $24, gained 18.1% in single-copy sales and 23.9% in subscriptions.#

ABC 6-month magazine circulation

The ranks of the top 10 consumer magazines changed as *Modern Maturity* moved ahead of *National Geographic* into the No. 3 spot. Reflecting over-all trends, six of the 10 declined in circulation. As with the year-ago period, *Modern Maturity* registered the largest percentage gain, while *Family Circle* registered the largest percentage decline. Figures are per-issue averages for the six months ended June 30. *Source:* Audit Bureau of Circulations.

'85/'84 ranks		Name	Circulation at 6/30/85	% change from '84
1	1	*Reader's Digest*	17,884,818	– 0.7

1 Club joins anti-drunk drive

New York—A contest to design a poster to help fight drunk driving among teen agers will mark the first time the One Club for Art & Copy will judge a competition other than its own One Show.

"It's a touchy thing for a non-profit organization," said Ron Berger, One Club president, who is senior vp-associate creative director, Ally & Gargano, "but it's one of those opportunities we just couldn't walk away from."

The board of directors of the club, whose members are advertising agencies' senior art directors and copywriters, will judge what is being called the *Reader's Digest* Don't Drink and Drive Creative Challenge, to run Sept. 1 to Oct. 15. To avoid conflicts of interest, Mr. Berger said, the board members will not be eligible to enter the contest, which he called "the chance to express yourself other than having to sell a bar of soap or a tube of toothpaste."

Reader's Digest is asking the advertising community to design a poster to be circulated among the nation's 16,000 high schools. It will kick off a contest, running Jan. 1 to May 1, in which students devising the best programs to combat drunk driving among their peers will win $500,000 in college scholarships. "We want to make drinking and driving uncool, a word my 18-year-old son said not to use," said Richard McLoughlin, vice-chairman/publisher, *Reader's Digest*.

While *RD* long has campaigned against drunk driving, both before and after it accepted liquor advertising, this is "the first time we have taken this kind of active, down-to-the-high-school, let's-get-something-done role," said Mr. McLoughlin. The spur was, he said, an article printed in the July, 1984, issue, "I Still See Him Everywhere," by Richard Morsilli, whose son, Todd, 13, was killed by a 17-year-old drunk driver in February, 1983.

The prize for the creative team designing the winning poster—to be published in *RD* next February as well as used to start the high school contest—is a weeklong trip to Paris for two. "I think *Reader's Digest* is being too generous," said Mr. Berger. "What could be better reward than an opportunity to save a child's life?"

Entries in the contest are to be received by *RD* on, or postmarked by, Oct. 15. The address is: Don't Drink and Drive Creative Challenge, *Reader's Digest*, 200 Park Ave., New York 10166.#

AdWatch

(Continued from Page 3)

new Slice brand moved into the No. 4 spot, although garnering only 1.4% of first mentions. Dr Pepper made its first appearance in the top five in nearly a year by capturing 1.2% of first mentions.

Last month's adWatch survey results also contain some interesting developments concerning that other marketing phenomenon with which the Cola Wars have been sharing media attention: The invasion of the wine coolers.

When consumers were asked to name the first wine advertising they recalled, Riunite (with 8.9% of first mentions) and Gallo (5.2%) still held their accustomed places at the top of the list. But No. 3 was E. & J. Gallo's Bartles & Jaymes brand wine cooler (2.8%), while category sales leader California Cooler moved into the No. 4 spot with 2.5%, ahead of Paul Masson (2.1%).

Interestingly, 61% of those who recalled the humorously deadpan Bartles & Jaymes advertising were men.

Those for whom the stand-up comedy style of the California Cooler advertising ("Pink tofu? Excuse me?") was most memorable were fairly evenly divided between men (52%) and women.

Also, of the two, advertising for Bartles & Jaymes was more likely to come to mind first for consumers aged 18 to 34, while California Cooler's advertising scored better among adults aged 35 to 54.

What's minimizing the impact of the Bartles & Jaymes and California Cooler campaigns is that wine advertising as a whole remains largely unremembered. In July, 50% of the consumers polled said they could remember no wine advertising at all.

Only 10% of the sample was unable to recall any soft-drink advertising.

Another product category few consumers have little trouble remembering is fast-food restaurant advertising: Only 9% of the sample drew a blank when asked what such advertising they recalled.

Burger King's celebrity-studded advertising for its bigger Whopper sandwich launched June 16 (AA, May 13) registered with consumers last month. BK's share of first mentions jumped 3.6 points to 19%. McDonald's maintained its comfortable lead with 37.6%, and "Only Wendy's" was only third with 12.5%.

AdWatch is a joint project of Advertising Age and SRI Research Center, Lincoln, Neb. Ad awareness is measured by asking a nationally projectable sample of consumers to name the advertising that first comes to mind—over-all and in a variety of product categories—from among all advertising seen, heard or read in the previous 30 days.

In July, 1,002 adults were polled by telephone. Under adWatch methodology, an increase or decrease of 2.8 percentage points is considered statistically significant and attributable to more than sample variation.

The following are last month's top three advertisers in other product categories:

- **Airlines:** United (20.8% of first mentions); TWA (15.2%); American (9.2%). United's share, which had increased sharply during both May and June as the airline worked to settle its pilots' strike, decreased 5.1 percentage points last month.
- **Apparel:** Levi Strauss (9.2%); Jordache (4.9%); Sears (3.7%).
- **Beer:** Budweiser (11.5%); Coors (10.9%); Miller (10.6%).
- **Bread:** Wonder (17.8%); Colonial (2.5%); Rainbo (2.5%).
- **Breakfast foods:** Wheaties (8.7%); Cheerios (7.5%); Corn Flakes (6%).
- **Cameras & equipment:** Kodak (21%); Canon (14.5%); Minolta (7.3%).
- **Cars & trucks:** Ford (19.4%); Chevrolet (12.2%); Toyota (7.8%).
- **Coffee:** Folgers (22.6%); Maxwell House (21.3%); Brim (5%). Maxwell House's share of first mentions dropped 3.5 percentage points from June's category-leading 24.8%.
- **Computers:** Apple (27%); IBM (15.1%); Commodore (3.5%). IBM's advertising lost much of the 3.8 point gain it had registered in June, falling 2.9 points in July.
- **Cosmetics:** Maybelline (5.8%); Avon (4%); Cover Girl (2%).
- **Electronics:** General Electric (9.9%); Sony (2.3%); Whirlpool (2.3%).
- **Frozen foods:** Birds Eye (9.8%); Swanson (4.5%); Stouffers (3.1%).
- **Laundry products:** Tide (29.2%); Cheer (4.7%); All (4.4%).
- **Liquor:** Jack Daniel's (3.5%); Seagram's (3.4%); Seagram's 7 (1.2%).
- **Medicine & drugs:** Tylenol (26%); Advil (5%); Anacin (3.3%).
- **Pet food:** Purina (11.6%); Alpo (10.1%), Kal Kan (2.9%).
- **Soap & shampoo:** Ivory (11.4%); Prell (5.2%); Head & Shoulders (5%).
- **Tea:** Lipton (41.8%); Nestea (5.7%); Tetley (4.4%).
- **Tobacco:** Marlboro (7.7%); Skoal (4.9%); Salem (2%).#

Nets

(Continued from Page 3)

want to make a wager" that a show such as ABC's "Moonlighting," a hit in August reruns, could carry over its success into the more competitive fall season, any more than "Call to Glory" did a year ago. The odds are better in early September as more viewers return to tv, but then, he added, "The problem with sampling is that with a good program, sampling can help it, but if it's not good, it'll hurt it."

Paul Schulman, president of Gardner Advertising's Paul Schulman Co., agreed, saying, "The show's the thing. . .I believe in starting early—if the show is good. Otherwise, that's the quickest way to kill a bad show. The key is what they're exposing people to in sampling. Just getting the audience to tune in is not enough. You have to back it up."

NBC, eager to maintain its warm-weather ratings momentum into the autumn, will precede "Hell Town," its earliest bird, with a repeat of last season's two-hour "Father of Hell Town" pilot. "Hell Town" will oppose parts of two two-hour pilots, CBS' "Brass" and ABC's "J.O.E. & the Colonel." On Sept. 14, NBC hopes to capitalize on interest in the Miss America Pageant by leading up to that event with its 8 p.m.-to-10 p.m. (ET) comedy block: "Gimme a Break," "Facts of Life," "Golden Girls" and "227." Opposite NBC's shows will be new tv movies, CBS' "Illusions" and ABC's "In Like Flynn."

NBC last week decided to have "Punky Brewster" return Sept. 15 with a one-hour special, rather than spread the story line across two Sundays. "Silver Spoons" will reappear Sept. 22.

"Highway to Heaven" (with the first of two parts) and "St. Elsewhere" will rejoin the Wednesday lineup with original hours Sept. 18, with NBC clearly hoping to blunt preseason audience interest in CBS' totally revamped Wednesday roster, debuting that same night: "Stir Crazy," "Charlie & Company," "George Burns' Comedy Week" and "The Equalizer." CBS, however, still expects to do well with those series, given that ABC's counterprograming will be "45/85," a three-hour "Closeup" news special sponsored by IBM Corp.

Mr. Schulman was pleased that NBC is giving an early airdate to "Golden Girls," its most promising contender, in his view. "It's a smart move," he said, especially since the network is "trying to turn the time period around." He also praised CBS for giving its Wednesday slate a week's head start as "wise," since those shows will be "away from the overwhelming numbers of 'Dynasty.' "

With its two-hour "Knight Rider" return episode Sept. 20, NBC also wants to try to block any Friday mileage ABC hoped for with its early premieres on that night—"Webster," "Mr. Belvedere" and a two-hour "Spenser: For Hire." CBS will weigh in with repeats of the "Dallas" and "Falcon Crest" season finales, hoping to refresh memories of fans and whet their appetites for more.

ABC, which would clearly like to begin its hoped-for Nielsen comeback during the week leading up to "premiere week," is finding that its rivals—headed for a hard-fought battle for households-and-demographics ratings supremacy of their own—do not plan to show mercy.

ABC's first series opener, "Our Family Honor," is set for a two-hour telecast Sept. 17, against which NBC is slating a one-hour Bob Hope special. Winding up the preseason Sept. 22, ABC fully expects the Emmy Awards to beat NBC's preview of its offbeat "Misfits of Science," due as a two-hour Sunday preview, and its "Crazy Dan" pilot; "Misfits" will not appear in its normal Friday 9 p.m. spot until Oct. 4, thanks to two-hour returns by "Knight Rider" and "Miami Vice."

The fact that "Monday Night Football" will begin its new season Sept. 9 has forced NBC to schedule first-run movie titles appealing to women before the season; "Love Child" is due Sept. 9, and "Mirrors" Sept. 16. "MNF's" lead-in "Hardcastle & McCormick," however, will not begin originals until Sept. 23.

Nearly 40 series will bow or return during premiere week, with the Nielsen standouts expected to include ABC's "Dynasty," returning Sept. 25; CBS' "Dallas," whose two-hour opener is set for Sept. 27 versus a two-hour "Miami Vice" on NBC, and NBC's "The Cosby Show," resuming Sept. 26. At ABC, "Lady Blue," the interim Thursday series inserted to enable "Dynasty II" to prepare for its glitzy mid-November start, will begin Sept. 26.

Among the opening week stunts will be NBC's telecast of a two-hour "A-Team" episode Sept. 24 and ABC's 90-minute episodes of "Hollywood Beat" and "Lime Street" Sept. 28. Those long-form installments will delay the returns of NBC's "Riptide" and ABC's "Love Boat" to Oct. 1 and 5, respectively. The other October starts: CBS' "Falcon Crest" and NBC's "Misfits of Science," both for Oct. 4, and CBS' "Crazy Like a Fox" and "Trapper John, M.D.," both for Oct. 6.

The two latter series, preempted by the dramatic movie special, "Amos," thus will avoid NBC's Johnny Carson "Tonight Show" 23rd anniversary special Sept. 29—only to run up against part one of NBC's "The Long, Hot Summer" miniseries (Oct. 6 and 7).

Effective Oct. 8, postseason baseball will begin disrupting whatever initial sampling newcomer series will have attracted. The American and National League baseball playoffs will preempt almost all of NBC's prime time fare from Oct. 8 through 13—except "The Cosby Show" Oct. 10 and "Punky" and "Spoons" Oct. 13. Additional playoffs have been penciled into NBC's Oct. 15-to-17 slates, should they prove necessary.

The World Series then will continue the ratings disruptions, once ABC's all-prime-time coverage gets under way Oct. 19.

NBC already has tentatively set "I Dream of Jeannie: 15 Years Later" as its Sunday movie for Oct. 20, in hopes of drawing some tv fans away from ABC's second World Series clash.#

Lotto

(Continued from Page 3)

supplementary number (fourth prize) on another. None, alas, had the six out of six required to win the gigantic first prize. Lotto officials said there were three first-place winners last week.

After distributing one ticket to each employe, the agency had 77 tickets left over; if any of those won, everybody would split the winnings.

Two of those tickets actually hit four numbers, winning $79 a ticket to split among the more than 700 staff members. Well, there are a lot of things you can do nowadays with 22¢.

Della Femina, Travisano & Partners gave its 150 employes better odds, buying five tickets for each of them. No big winners turned up anyway.

Chairman Jerry Della Femina had placed some stipulations, however, on any winnings. Half of the $41 million had to be split with other people at the agency, he said, in the spirit of altruism. As a result of buying these tickets for the staff, he tongue-in-cheeked, "There would be no Christmas party, bonuses or raises for the next five years."#

Tomatoes

(Continued from Page 3)

to a company responsive to market trends. The transition began under former chairman Ian Wilson, a former Coca-Cola Co. executive, who hoped to transform the company into a marketing power using its well regarded Dole brand name as the catalyst.

Mr. Wilson eventually was forced out of the company as its financial problems mounted, but observers say he set Castle & Cooke on a new direction.

According to Mr. Wilmer, Castle & Cooke research reveals consumers are dissatisfied with the quality of mature green tomatoes—which are gassed to achieve a ripe red color—and have positive associations with the Dole name and healthy, fresh products.

Until now, Castle & Cooke has relied on the Bud of California name for vegetables and the ABC brand name for tomatoes.#

Keeping 'Harper's' afloat

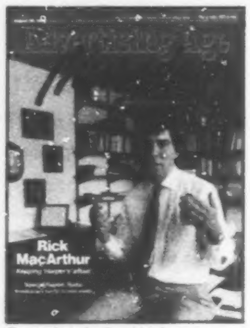
Special Report: Radio

Broadcasters tune in for new vitality

Thursday

Making it with MacArthur

Rick MacArthur, president and publisher of *Harper's*, has carried the concept of on-the-job training into a new realm. Two years ago, at 26, he interrupted his career as a newspaperman to take over the venerable journal of American letters, which hadn't netted a dime for nearly 10 years. Operating on instinct but not on salary, he made some daring changes. And sure enough, the 135-year-old *Harper's* already has begun to rally. *See Page 4.*



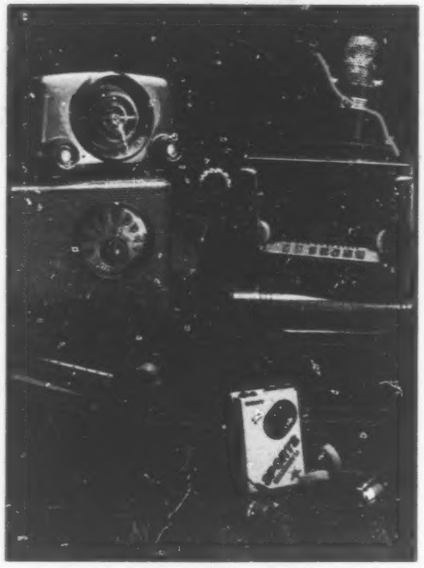
Cover photo by Arnold Adler

Pimm

For years, Pimm's Cup has been the quintessential "gentleman's drink," the kind that requires ownership of at least one polo pony and a wellbred, jutting jaw that is perfect for telling scandalous tales about who made off with who's trust fund (and wife). These days, though, Pimm's Cup—a gin-based concoction with a hint of citrus and herbs—is trotting past the manor gates into a more democratic sampling of homes. *See Page 6.*

Beep

The answering machine, with its limitless (well, 30-second) potential for fun, has become the adult toy of the '80s. *See Page 36.*



Special Report—Radio

The radio industry has tuned in to new formats and programing in order to compete with the wealth of new entertainment options that increasingly are becoming available for consumers as well as for advertisers. *Starting on Page 15.*

Presstime

Stroh cuts off B&B

DETROIT—Stroh Brewery Co. has dropped Benton & Bowles, New York, from its agency roster because of a brand conflict resulting from the proposed merger of B&B with D'Arcy MacManus Masius. B&B handled the $4 million Schlitz malt liquor account, while DMM in St. Louis has Anheuser-Busch's Budweiser account. BBDO, which handles Stroh's Old Milwaukee line, and MCA Advertising, Westport, Conn., which handles the Erlanger, Schaefer, Schlitz and Signature lines, already have made creative presentations for the Schlitz malt liquor assignment. Separately, Stroh within the next 60 days will introduce an imported beer product, Christopher Lole, vp-corporate planning and development, disclosed on Aug. 27 at ADVERTISING AGE's Creative Workshop. Mr. Lole also indicated the company will move its Signature superpremium entry into national distribution by mid-'86.

O&M stars for Columbia

BURBANK, CAL.—Columbia Pictures will consolidate its ad account at Ogilvy & Mather, giving O&M the $8 million-to-$9 million portion of the account in New York, Los Angeles and San Diego that had been at Diener/Hauser/Bates Co. A D/H/B spokesman, who confirmed the move will occur Oct. 1, says his agency would retain the ad assignment for Florida, where it has an office and O&M does not. O&M already handles Columbia's national advertising. Separately, Columbia responded to a published story that John Balson, formerly chief operating officer of D'Arcy MacManus Masius/North America, would be moving to the West Coast as Columbia's president of marketing. The studio said "we just don't comment on rumors or speculation."

ABC follows CBS to 15s

NEW YORK—ABC-TV, as expected, says it will begin accepting 15-second commercial units in sports, news and business briefs. The network follows the lead of CBS, which disclosed a similar plan two weeks ago (AA, Aug. 12, *et seq.*). There was no word as to when the new plan would go into effect, though sources said ABC would begin selling stand-alones this fall.

O&M wins sex bias suit

NEW YORK—Ogilvy & Mather has won the much publicized, sex discrimination suit against it (AA, Oct. 17, '83, *et seq.*). Federal district court judge Lee Gagliardi this week dismissed the class action salary discrimination claim against the agency, as well as the individual salary discrimination claim by ex-employe Jane Zukoffsky. The judge last year had dismissed the individual claims (AA, Nov. 19) but had asked for more information in order to decide on the class action part of the suit.

Smith spot pulled

NEW YORK—The Council for Cable Information has withdrawn a 30-second network radio spot featuring Samantha Smith, who died Aug. 26 in a plane crash. The 13-year-old had gained prominence several years ago after she wrote a letter to

To Burger King, all's fair in love and marketing

By Gary Levin

Burger King Corp. chairman J. Jeffrey Campbell believes his biggest task at the No. 2 fast-food chain is ensuring "a future free of mortal risk: We're trying not to be the Howard Johnson's of 1990." He was referring to the imminent purchase of that once-dominant chain by Washington-based Marriott Corp.

Speaking at the 28th annual ADVERTISING AGE Creative Workshop in New York, the army veteran and student of British history peppered his "Life and Death in the Advertising Battlefield" address with military metaphors, perhaps an appropriate choice for what the executive termed "the battle of the burgers."

Mr. Campbell said agencies and clients too often forget that "advertising, like warfare, is supposed to accomplish something" and stressed that corporate goals of return on investment "have not been suspended for advertising." (Burger King spends $160 million a year in advertising; the company's pretax profits have jumped from $60 million to $220 million in the past four years.)

The first question asked at Miami-based Burger King, he said, is the "three McDonald's question: You have 30 seconds on tv to explain to the average consumer why he should pass three McDonald's, two Wendy's, one Carl's Jr.'s and a Jack in the Box, all of whom have 90 seconds to respond." (His answer: Taste.)

Fight like guerrillas

Unable to compete with Oak Brook, Ill.-based McDonald's on its own sentimental terms, "we had to fight like guerrillas," Mr. Campbell said.

"Rather than having the tears flow, we wanted the saliva to flow after every execution," he added, citing Burger King's transition in the 1980s from an unsuccessful "Make it special" life-style approach to stronger "Aren't you hungry?" food appeal.

In his keynote speech to nearly 1,000 attendees, the youthful executive said he's found military history books far more useful than so-called "how-to" manuals in managing his company and competing with the McDonald's monolith. Execution of the burger battle requires elements of surprise, concentration and maneuvering, he said, while conceding that Burger King has not always followed that advice.

Dismisses copy testing

He cited two recent examples of failed efforts by BK agency J. Walter Thompson USA, New York: The "McDonald's sent you" spot, featuring the "McDonald family" in disguise, and a variation on the "Have it your way" theme stressing the burger's made-to-order appeal.

In the former spot, "we were talking to ourselves, not consumers," Mr. Campbell said, while the latter work was simply "off strategy." Still, he dismissed copy testing as "hokum," ruffling the feathers of some research-minded people in the audience.

In part due to over-all softness in the restaurant industry, he said the "reformulated" Whopper has generated slight incremental business, with Whopper unit sales up only 1% a week.

Mr. Campbell said Burger King may increase its promotional activity to combat the slowdown, though the company won't do so as a "knee-jerk" response to McDonald's. "We're concentrating more on where we want to be than on shooting at them," he said. "We don't consider we're on top enough."

Frogging it

Another Workshop session demonstrated that the fascination with what's "Down Under" may even include a seemingly innocuous ice cream bar.

That's what Good Humor Corp., Fairfield, N.J., found out when it sought to bring to this country Fat Frog, an Australian product made by another unit of parent Unilever.

Good Humor, a division of Thomas J. Lipton Co., latched onto the novelty, a green mint ice cream bar with M&M-like eyes and a partial chocolate coating.

Launched Down Under in September, 1983, by Streets, which like Good Humor is one of 22 Unilever ice cream makers, the product's success spurred the U.S. company to bring the bar into

New formats gain frequency on am band

By Janice Steinberg

Although contemporary hit radio and its sidekicks, adult contemporary and album-oriented rock, continue to make news for the money-making fm side of the radio dial, most of the innovations in radio formats are being broadcast on the struggling am band.

San Francisco's KFRC has made some of the biggest ripples in the industry with midday game shows that recall the golden age of radio, or, according to some critics, '50s tv *(see Page 20)*. It's not the only am frequency taking risks to woo the 70% of radio listeners who seem to have settled on the fm dial.

In Thousand Oaks, Cal., Bob Zeidel's KMDY puts out 20 hours a day of comedy. The suburban am station didn't originate the idea. WJOK in Gaithersburg, Md., tried comedy and failed a few years ago. But Mr. Zeidel says he's found the winning formula: Two and three-minute cuts that conform to the short-spurt way people listen to radio.

This spring, year-old KMDY became the first station in its primary coverage area, East Ventura County, to show up in the ratings book. "We're a 500-watter and we've made this radio station work in the ratings over stations that have tried for a long time but never, never could do it," Mr. Zeidel says.

Bill Osewalt sounds happy as well. He did $2.1 million of research to prove am stations can make money in children's programing. Now he's sold his Marina del Rey, Cal.-based Children's Radio Network to am stations in 13 cities, starting with Jacksonville, Fla.; Grand Rapids, Mich., and Phoenix, Ariz. "It's one of the fastest rising syndications in the history of radio," says Doug Smith, manager of the Phoenix station, KSUN.

Children make for cute stories, like the one Mr. Smith tells about the tot who called and asked the morning disc jockey to play the "Brush Your Teeth" song. "He'd been waiting two hours," Mr. Smith says. "Now his toothpaste was hard on the brush."

Children's Radio Network is betting children and their 18 to 49-year-old parents will be a valuable market for advertisers as well. In Jacksonville, where the kid stuff has been on WEXI since December, Mr. Osewalt says, "We have audience in every Zip code for every single minute of every single day of the week."

Between June 3 and Aug. 1, he adds, WEXI—formerly a big band station with an uncertain future—picked up 170 new advertisers.

RKO station KHJ-AM recently introduced "car radio," which gives its Los Angeles audience traffic reports every 10 minutes, 24 hours a day, plus tips on beach weather and weekend events, as well as information about cars and driving.

Kent Burkhart, chairman of Atlanta-based industry consultants Burkhart/Abrams/Michaels/Douglas & Associates, sees a want ad station in am's future. He predicts an all-sports am format as well. "There will be two-way discussion between an audience and a moderator regarding [New York Mets outfielder] Darryl Strawberry's 24th home run last night."

Only one new am format is attempting to beat fm at music programing. Bonneville International Corp.-owned KOIT-AM in San Francisco recently took new call letters, KXLR, and changed its format to "trend formation," a combination of light jazz, new age music (*a la* the Windham Hill label) and a deliberately nonsensational approach to news.

"We run one trend formation interview an hour, for five, six, seven miuntes," KXLR executive Norm Woodruff says. "We say hello to somebody, chat with them, get their viewpoint on a subject, and then say thanks loads. Then we play back the whole thing, allowing the audience to decide what, if any of it, matters to them—instead of somebody in the newsroom deciding which 20 seconds are the most important."

KXLR comes out of radio guru Frank Magid's study on the future of am, says Jack Adamson, senior vp of Salt Lake City-based Bonneville. "The study said, don't relegate yourself to just the normal format of the golden oldies or the big band [sound] as far as music is concerned, the news and talk like the rest of them—or am will slowly fade into the night."

But Jhan Hiber, consultant and research editor for Los Angeles-based Radio & Records magazine, says, "People who proclaim the death of am aren't looking at a lot of stations who are making a lot of money and laughing all the way to the bank about the so-called death of their medium." Mr. Hiber mentions Minneapolis, St. Louis, Dayton, O., and Louisville, Ky., where the top-rated stations are on the am band.

Nevertheless, most of the big bucks are found in fm. WHTZ "knocked New York over," says Arbitron Ratings Co. pr specialist Alison Conte, when the Se-

Hit radio still tops the charts

Tuning

(Continued from Page 16)

of those companies—including such heavy hitters as Ford Motor Co., which dropped spending by 38.2% between 1983 and 1984, Chrysler Corp. (14.6%) and Adolph Coors Co. (14.8%)—decreased their expenditures on radio.

Although these are profitable times, not all stations are sharing in the success. In the top 100 markets, an estimated 15 to 20 established stations currently are dark. Although this represents less than 1% of total U.S. outlets, according to Mr. Duncan, there is a good chance that more, especially on the am band, eventually will have to suspend broadcasting temporarily or go off the air permanently.

While it is considerable, the success at ABC Radio is not unqualified. Like its competitors in the network radio business, ABC has not been able to turn the corner on long-form programing. Certainly ABC specials such as July's Live Aid concert, the weekly "American Top 40 with Casey Kasem" and various sports events have delivered impressive audiences. But Talkradio—the 108-hour satellite package of talk shows originating primarily from New York and the West Coast—has not yet been a money maker.

"In today's market, radio stations are looking for any edge they can get," says Randy Bongarten, president of New York-based NBC Radio. "The networks are just beginning to understand what stations need and what they can do to help."

Indeed, if radio is used primarily as a familiar medium of immediacy and local personality, the attempt to sell nationally oriented talk shows—especially in markets where big-name guests already appear on local programs—is a difficult task. Cognizant of this problem, Mr. McLaughlin admits, "My personal challenge is great growth in 1986 for Talkradio."

But if the case of Chicago am station WIND is any indication, Talkradio faces formidable hurdles. In the past several years, this Westinghouse Electric Corp. outlet has discharged most of its own talk show hosts and substituted ABC gabbers such as longtime California "talk jockey" Michael Jackson and psychologist/counselor Dr. Toni Grant from Los Angeles.

While the personnel cuts have improved the station's bottom line, the "interlopers" have generated little enthusiasm. Moreover, without its local flavor, once-influential WIND has ceased to be a force in Chicago radio, dropping from No. 5 several years ago to No. 16 in recent Arbitron Ratings Co. results.

Despite the confidence of experts predicting it will not hap-

Music videos

"I think music videos have been good for radio. It's refreshed radio as well as broken acts that might not have had a chance otherwise. They're not really a threat to radio—people use the two media differently. Music video tv is video wallpaper. We try to give listeners a reason to have the radio on."

—Frank Cody
director of programing,
NBC Radio Entertainment
and the Source

Am stereo

"Am stereo is an evolutionary process. I don't think anyone thought it would be otherwise. It's not unlike the cable tv situation. In both cases, everybody's hopes were tied to the simple fact that you could do it. Part of the reason everybody's writing obits is that the hype was so big—just like cable."

—Stephen Soule
vp-general manager,
NBC Radio
Network and Talknet

Creativity

"As far as the listener goes, I think radio is going through one of its most creative periods ever. We're offering more options for more people. The success of that is borne out by the increasing number of viable stations out there. In the 1970s, we were in an almost regressive period of formats; stations all sounded the same. Today there's more risk-taking, which has in turn created more opportunities for network radio."

—Randal Bongarten
president, NBC Radio

caucus, N.J.-based station went to contemporary hit radio and a snappy, irreverent morning drive show (the Zoo) two years ago; WHTZ shot from the ratings basement to the top spot in the New York market.

Some 373 stations in the 173 Arbitron-rated markets now play chr, including WMMS-FM, Cleveland's former aor leader. "Aor was becoming narrowcast," WMMS operations manager John Gorman says. "It was avoiding black music, it was avoiding r&b, it was avoiding straight pop. We felt WMMS would be a lot more successful by playing a wide variety of music." He reports that since WMMS initiated the change in the fall of 1983, it's been No. 1, with a 10-plus share seven books in a row.

That kind of success characterizes chr stations across the county, despite some markets where too many fms jumped on the chr bandwagon and canceled each other out.

Mr. Hiber nominates urban contemporary as the music format to watch. "In Miami and other markets, [we've seen] situations where new urban contemporary stations have come on, been able to project a hip image, play the dance music and be successful with it," he says.

Mr. Burkhart sees two music trends developing: "Mood stations" playing ultra-soft adult contemporary, with an emphasis on oldies, for women 35 to 49 years old, and a soft, oldie album rock geared toward men 25 to 49.

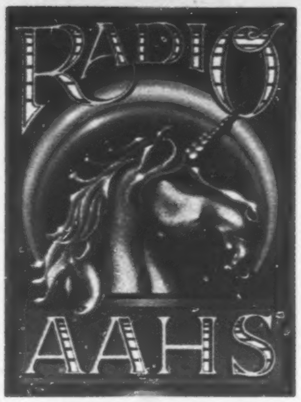
Scottsdale, Ariz.-based industry consultant John Sebastian's yuppie male-aimed eclectic oriented rock (eor) has been picked up by only two stations.

Then there are those stations, and groups of stations, that go their own way regardless of the trends.

Classical radio, for instance, is enjoying better profits than ever, says Peter Besheer, New York-based exec vp of the 13-station Concert Music Network. Once handicapped by a cost-per-thousand approach to spot sales, the nation's 38 classical stations now employ psychographics to sell Mercedes-Benz dealers and other upscale advertisers on their audience.

"Today a well-run classical station can do very well on the profit side, extremely well," Mr. Besheer says, reporting that 43% of one station's gross billing is pretax profit. "I think that's pretty respectable."

Religious stations also are thriving and partly by moving away from some of the Christian radio stereotypes. "It's not necessarily the Gospel music or the Bible-beating disc jockey," says Wendell Wood, director-media and public affairs for the National Radio Broadcasters Assn., Washington. "They have a lot more intellectual topics and contemporary Christian music, like Amy Grant."



Am stations in 13 U.S. cities are playing the Children's Radio Network.

Christian radio has broadened geographically as well. "We used to say this was a Bible Belt phenomenon, but now it follows more the population centers of the country—New York, Los Angeles, Chicago," says Ben Armstrong, executive director of the National Religious Broadcasters, Washington. The NRB directory has picked up more than 155 new listings since January, 1984, Mr. Armstrong says, bringing the total stations broadcasting some religious programing to 1,144.

Woodstock, N.Y., and Santa Fe, N.M., are the artsy, fertile ground where two unorthodox fm stations have made names for themselves—and healthy profits. Woodstock's WDST combines contemporary, country, jazz and classical music, using disc jockeys who are musicians in each of those fields.

KLSK in Santa Fe pays the bills—"You bet we're paying the bills!" declares owner-program director Bill Sims—by playing 10 to 20-minute sets of classical, jazz and light rock back to back.

Mr. Sims credits KLSK's success to careful screening and rotating of everything played on the station, a coherent theme—melodic music—that ties the several genres together and the arts-oriented Santa Fe community, which boasts more art galleries per capita than anyplace in the country. Yet he and WDST's Jerry Gillman think a broader approach can work in major markets as well.

Radio appears to be heading toward more and more specific formating, however. Although a few voices in the wilderness cry out against increased narrowcasting, most in the industry believe radio's ability to deliver specific audiences remains one of its greatest strengths.

"The fragmentation of radio during the past 20 years is not going to quit," NRBA's Ms. Wood says. You really want to target that individual listener."

For Bill Livick, senior vp of Birch Research, Englewood Cliffs, N.J., fragmentation means rich diversity. He looks forward to "a renaissance of the jazz-type station," in a future when ratings reflect parity among stations. "I think the demographic skews will be wildly different. A two share is what I call it," he says.

While that may sound idyllic to radio listeners—and to advertisers looking for well-defined markets—the industry may not share Mr. Livick's enthusiasm for parity.

And despite the dozens of names coined for formats and the detailed way broadcasters describe the differences, radio's tougher critics may continue to find that too many stations sound alike.

Then again, who knows what impact the experimenters will have on radio. As several industry veterans say, both all-news and rock radio started very small. ■

What's in fm's future?

With the spring Arbitron Ratings Co. reports now analyzed, what do the experts say about today's big fm formats?

Contemporary hit radio still "is going stronger than bear's breath" in the spring ratings, says Jhan Hiber of *Radio & Records* magazine. He also sees a comeback for album-oriented rock reflected in the spring ratings and in a repositioning of some aor stations to go after yuppie men.

"Chr and aor are two very hot properties right now," agrees Bill Livick, senior vp of Birch Research, Englewood Cliffs, N.J. Birch measures 130 markets, 85 on a monthly basis, using phone surveys instead of Arbitron-style diaries.

The spring analysis from James Duncan's Kalamazoo, Mich.-based "American Radio" offers format-by-format data on the 2,865 stations in Arbitron's 173 rated markets. Chr looks strong in Mr. Duncan's numbers. Still the top format nationally, it's carried by 5.2% more stations than in spring, 1984.

Adult contemporary also appears strong, but how strong isn't clear. Mr. Duncan looks at adult contemporary and oldies as a single category because they appeal to similar demographics, and he attributes the strong adult contemporary showing to am stations that have switched to oldies formats. Mr. Hiber, looking at the same Arbitron figures for 10 of the top 100 markets, sees "fairly consistent signs of softness" in adult contemporary, especially in the 25-to-54 age group.

Where there's little disagreement is on the poor showing of country stations. Kent Burkhart, chairman of Atlanta consultants Burkhart/Abrams/Michaels/Douglas & Associates, blames a music lull. "Country music needs a shot in the arm with big new artists coming along to bring sort of an urban cowboy revitalization," he says.

"[In the last two years] the country music people have not been able to break out a major artist to be nationally known by the listeners to other forms of radio, people who would listen to country radio to hear a Dolly Parton or a Kenny Rogers or a new star in the making." —*J.S.*

---

pen, there remains the persistent potential for emerging technology to lure listeners to other media. If, as the mavens suggested, that threat exists only as far as new media can serve audiences as radio does, there are indications that this is happening.

Cable News Network and other news services already have cut into the older audience for all-news radio, according to Ms. Ekdom. Morning news-and-features tv programs such as NBC-TV's "Today" and ABC-TV's "Good Morning America" are structured to be heard as much as viewed.

Still another video inroad into radio's traditional role lies in the shifting directions of tv advertising. Independent and cable tv stations, as well as the networks and their affiliates, are discovering the profitability of target marketing. Such specialized salesmanship has been a crucial part of the success of contemporary radio. Questions arise, therefore, about the impact on radio should advertising agencies and tv develop sophisticated, financially competitive targeting strategies for clients.

Some suggest this can never happen until tv also can be formatted. Yet, local tv stations already are building program blocks with specific audiences in mind. At the networks, daytime soap operas continue to deliver adult women. Despite only average ratings, "Cheers" and "Hill Street Blues" have continued on NBC-TV's prime-time schedule in great part because they deliver attractive target audiences—women 18 to 34 in the case of the former, and upscale adults in the latter.

In radio these may be the best of times. Yet, as broadcasting approaches its 65th birthday this November, the history of the medium suggests that changes in American life can have unexpected impacts on radio. In a time of ever-emerging electronic gadgetry with innovative uses, radio must temper its success with a cautiousness learned from history and from an understanding of the society it serves. ■

Narrowcasting

"The radio business has never been in better shape. Radio has found its niche through narrowly defined formats that appeal to specific demographics. Radio is in everybody's lives to a greater degree."

—Norman Pattiz
president-chairman,
Westwood One

Network ratings

"The [RKO ratings scandal] brought up a lot of important questions, ones that we need to address. But out of all adversity comes some good. The network ratings system won't look the same in five years. There's no doubt that we have a lot of tightening up to do. We deal in a business of trust, and that has to be re-established; some people did things they never should have done. But three guys don't kill a medium."

—Nick Verbitsky
president, United Stations

Future of am

"Am is doing something it should have done for a long while, and that's focus attention on the older demographics. As they get that message across—that we all don't have to be centering in on that 18-to-34-year-old market—business should be better for am stations."

—Richard Brescia
senior vp,
CBS Radio Networks

Am stereo

"Am stereo is going to be a very important adjunct for radio. Detroit will install more am stereo receivers in cars, and when the receivers are there, more stations will transmit via stereo. For the driver, stereo won't improve the sound they get from their am car radio, but they'll feel better listening to am radio."

—Jack Clements
president,
Mutual Broadcasting System

People Patterns

Households changing constantly

By PETER FRANCESE

Household and family statistics are like wedding photographs—everything changes soon after the picture is taken. There may be 25 million married couples now, but they are by no means the same 25 million we had 10 years ago.

Some people stay married for life, while others divorce after weeks or months. The picture of human relationships is really a motion picture, but we look at it one frame at a time.

Beginning in 1968, the Institute for Survey Research at the University of Michigan decided to develop the motion picture of household change by interviewing a fixed sample of people every year for more than a decade to determine the stability of various household types. Researchers at the Rand Corp., looking at 10,000 of the interviews over 13 years, found how unstable most American households are.

The longest duration type was, as we would have expected, husband-wife families with children. But even they last a median of only 6.9 years. That means half of all married couples with children stay together less than seven years. No wonder there are so many single-parent families. But single parents apparently don't stay that way very long either. After 3.9 years, half of them have remarried or changed their living arrangements.

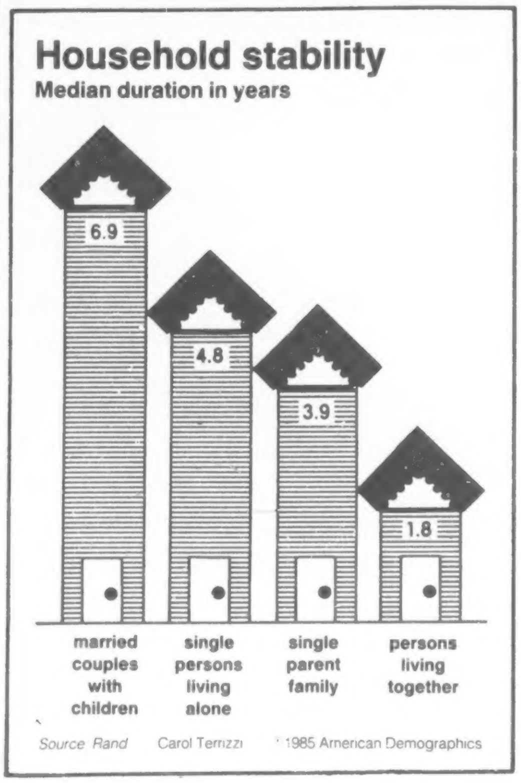
People who live alone also do so for only a relatively short time. Their median length of aloneness is only 4.8 years. It appears that even though the total number of single persons has been growing very fast (84% increase since 1970), most people either get married or move in with someone else within five years.

The least stable household is the one most talked about—cohabitation. People who live together without being married usually do so for less than two years (median duration: 1.8 years). After this brief period, most of these relationships, which are often really trial marriages, either break up or the couple gets married.

The median duration of a childless marriage is only 4.2 years. Half of all married couples either have had a child or split up within that time. If they have children, we can presume that new state will last, on average, about seven years.

The time period of this study was 1968 to 1980, a period of great social upheaval during which millions of young baby boomers tried and often rejected various household life styles. There is some evidence (such as the diminished divorce rates) that we are returning to a time of greater household stability.

As we return toward a more middle-age society, marriages may last longer, particularly those of older people without children. But is it really likely that the less stable states of singleness or single-parenthood will last any longer than they do now? I don't think so, because such household types are considerably less well off economically than married couples, and nobody likes to be poor.



Source: Rand Carol Terrizzi ©1985 American Demographics

Finally, it's important to remember that household transition studies do not tabulate the parttime situations where, for example, couples come together for weekends but otherwise live separately.

Speaking of family relationships, few letters have touched me as deeply as the one I received from a mother soon after my Father's Day column appeared. That column described the phenomenon of the 7.3 million men in their 20s who still live at home with their parents. She writes:

"We have a 24-year-old son living at home, and the reasons for this seem very obvious to me. He works for an aircraft corporation and earns more money than his father. He pays $40 a week room and board, has a sizable investment program, drives an expensive vehicle and owns a boat. He also camps and owns all the necessary equipment along with a growing gun collection. The refrigerator is always filled with food that he doesn't have to shop for. His clothes are laundered, altered and mended at no additional charge.

"His girlfriend has her own apartment, where he is welcome to spend the weekends. She is an excellent cook and does all the shopping and food preparations for camping trips. Coed, of course!

"My 50-year-old husband states that if this life style had been available to him in the 1950s, he would still be single today! Sincerely, Mom."

Dear Mom: Letters like yours never let me forget that behind every cold table of statistics there are warm human beings like you. You didn't ask for any advice, so I won't give any, but I have a question: Why do you allow him to get away with what is obviously an incredibly one-sided arrangement? The market value of the shelter and housekeeping services you are providing is at least five times what you are charging. Surely you have heard of the struggle for equal pay for equal work.

But I suspect I know at least part of the answer to my question, Mom. You are the last generation of traditional stay-at-home mothers who mend clothes, buy all the groceries and probably bake apple pies.

The generation of women after you is not into apple pie. By and large, they didn't become moms like you—they went into the paid labor force. Because they have paying jobs, they don't need your son to support them.

His girlfriend, like many employed young women, has the choice you never had between marriage and parttime, no-strings, cohabitation. She may have difficulty, however, making the transition to wife of your son and mother of your grandchildren.

The tragedy here is that by continuing to mother your grown son, you have ill-prepared him for any future life with a working wife who may expect him to share the household chores equally.

I guess it will take the next generation of mothers to bring up their sons to think of women as something more than providers of low-cost domestic services.

Unfortunately, judging from the last sentence of your letter, it's too late for your husband.

Parting Shot

U.S. should bow to Japanese custom

By RANCE CRAIN

The Japanese have given us a lot of great innovations during the past 40 years, ranging from cameras to sushi, but their greatest offering by far has just come to light. I refer to their recently publicized custom whereby the head of a corporation apologizes and resigns following a major disaster.

After the recent crash of a Japan Air Lines jumbo jet with the tragic loss of 520 lives, JAL president Yasumoto Takegi submitted his resignation to the Prime Minister, despite no showing—thus far—of any corporate or personal wrongdoing.

According to *USA Today*, a JAL spokesman explained, "In Japan when something goes wrong, the head man takes responsibility. Resigning is a way to wipe the slate clean." In short, resignation is the modern day version of *hara-kiri*.

The contrast between typical Japanese and American corporate responses is striking. An editorial in last week's edition of *Business Insurance*, a sister publication of ADVERTISING AGE, pointed out, "In Japan the president of Japan Air Lines stood, with head bowed, to greet in sympathy and apology the arriving relatives of those killed in the JAL crash. In the United States, corporate executives too often remain invisible and silent in the face of massive human tragedy, or at best are represented by spokesmen who merely utter denials or 'no comment.' If U.S. corporate executives instead were to immediately express what should be genuine regret for catastrophes involving their companies and showed sympathy and concern for the victims, they could avert victims' tendency to seek revenge."

Of course, ritual resignation is just one facet of the entire Japanese economic and cultural system that differs vastly from our own. Another intriguing difference: Relatives of the victims probably will not sue JAL. Instead, they'll negotiate settlements that, in all likelihood, will be considerably smaller than those their American counterparts would receive under similar circumstances.

> ***Despite the differences in legal practices between Japan and the U.S., I think the Japanese custom of resigning has a lot to recommend it.***

Despite the differences in legal practices between Japan and the U.S., I think the Japanese custom of resigning has a lot to recommend it.

For starters, General Dynamics Corp. admitted last spring that it overbilled the Pentagon millions of dollars in overhead charges. When the Defense Department briefly considered barring two top officers of the company—chairman David Lewis and chief financial officer Gordon E. MacDonald—from work on government contracts, the company told the *New York Times*, "As far as we are concerned, there are no grounds whatever for suspension or debarment of either the company or of its senior executives." I can think of a few.

And finally, consider Union Carbide Co. After the tragic chemical leak at Carbide's plant in Bhopal, India, last December in which 2,000 people died and many more were injured, Union Carbide chairman Warren Anderson—reputed to be a compassionate and responsible man—went to India to show his genuine concern for the disaster. His effort was admirable, but Union Carbide's problems continue, as evidenced by two more chemical leaks in West Virginia, with still unknown consequences for its victims.

When asked if he would resign, Mr. Anderson replied that resigning would be cowardly. I disagree. Union Carbide's credibility is severely shaken, and the American public will continue to doubt Carbide's ability to safely handle toxic chemicals until a new chief executive takes charge.

As *Business Insurance* concluded, "The substantial cultural differences between America and Japan admittedly dictate the contrasting response of those struck by tragedy." But that needn't preclude Americans from adopting one of Japan's best and most useful customs.

C-E eyes advance buys with multimedia titans

By VERNE GAY

Campbell-Ewald, Warren, Mich., is negotiating with several multimedia conglomerates to make cross-media buys on an upfront basis in exchange for discounts in pricing.

The Campbell-Ewald plan, a variation on a networking system first put forward by Gannett Co., marks the first time an agency has made such a proposal on behalf of all of its clients. The deals will be completed this month, according to agency sources.

The agency is negotiating with CBS Inc., Scripps-Howard and Times Mirror Co. Other companies with sizable holdings in radio, tv, newspapers, magazines and cable that may be approached for "omnibus" deals include Time Inc., Hearst Corp., Dun & Bradstreet Corp., Meredith Corp., Capital Cities Communications, ABC Inc. and Washington Post Co.

The agency is calling such buys "omnibus" deals because they encompass all of the media resources of a particular company. For example, if the congomerate has holdings in newspapers, tv, radio and magazines, the buy could include each one.

Campbell-Ewald, which has made these offers on behalf of General Motors Corp. and other clients it declined to name, would, for example, pay the media company $5 million up front in exchange for about $6.5 million in time and space credits, which C-E would cash in during the course of the contract.

C-E and its clients would gain more media weight for the dollar, while the media company would have its $5 million as much as a year in advance. The divisions within the media conglomerate, however, would be vulnerable to shifts in the media needs of the C-E clients.

In the short term, there appears to be no real advantage for the agency in such "omnibus" buys beyond providing more efficient media spending for its clients. The agency would, in effect, be giving up any money it might make from "float," or the use of client money between the time an order is billed and the payment is made. In essence, C-E would be transferring the float to the media company in exchange for discounts for its clients.

However, making media buying more efficiently could have long-term benefits in terms of keeping existing clients and attracting new ones. Several major advertisers, most notably GM and Procter & Gamble, have made greater media efficiency a primary issue in client-agency relationships.

While Campbell-Ewald says the negotiations for the "omnibus" buys are not a direct result of the GM concerns on efficiency, the agency clearly is responding to mounting advertiser demand for greater efficiencies.

With the exception of Gannett, however, most conglomerates have shunned such "omnibus" buys because their respective divisions maintain separate revenue goals and accounting. Even the networks, with some exceptions, maintain strict divisional sales lines among dayparts.

The buy is complex for the agency because it must pool a large amount of money from various clients who have different strategies. Some observers were skeptical such a plan

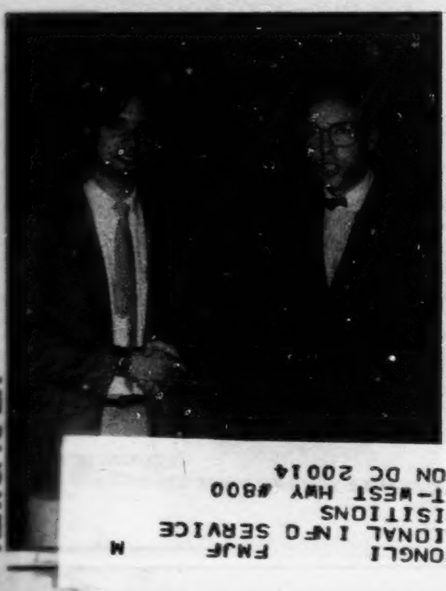
AA Workshop prize: Creative slot at Y&R

New York—John Ferrell, exec vp-creative director, Young & Rubicam, believes agency creatives must be able to distinguish between intelligent and foolish risk—and Y&R's latest copywriter, Vincent Urbanowski, has already demonstrated that ability.

Mr. Urbanowski, a copywriter at the Stamford, Conn., office of Anderson & Lembke, a business-to-business agency, was asked to join Mr. Ferrell's agency after winning a Y&R-designed "test" of risk-taking ability administered at the Advertising Age Creative Workshop.



John Ferrell (r.) of Young & Rubicam gave a creative "test" to participants in the Ad Age Creative Workshop in New York. Vincent Urbanowski (l.) won. The prize, which he accepted: A job at Y&R.

Mr. Ferrell promised a job offer to the winner.

Hundreds of workshop participants took the test, which involved judging five commercials for their negative or positive risk potential. Mr. Ferrell, who said that agencies on the leading edge of creativity will take more risks in the next 12 months to produce breakthrough advertising than in the last 12 years, administered the test to evaluate "consumer insight."

During two sessions at the workshop, Mr. Ferrell collected 900 entries, 13 of which were picked for follow-up interviews. Of those, three finalists were selected, with 28-year-old Mr. Urbanowski emerging as the eventual winner.

"I feel both wonderful and awful," Mr. Urbanowski said, appreciative of the unexpected career move but sad to be leaving his hometown of Stamford. He had worked as a copywriter at Ander-

Sterling appoints worldwide agency

By STEWART ALTER
and NANCY GIGES

Sterling Drug Co., New York, taking its first major global advertising step, has consolidated its worldwide over-the-counter analgesic ad account at SSC&B:Lintas Worldwide.

The two major brands affected are Bayer aspirin and Panadol, an acetaminophen-based pain reliever, both of which are handled in the U.S. by SSC&B.

Bayer, while a big brand in the U.S., is sold by Sterling only in the Caribbean; A.G. Bayer of Germany markets the product elsewhere in the world. Sterling sells its product under the brand name Aspirin

Last Minute News

Y&R loses its chips from Frito-Lay

Dallas—Frito-Lay and Young & Rubicam, New York, have split after 22 years, citing "philosophical differences" over snack-food advertising. Y&R keeps the estimated $17 million account until yearend. Tracy-Locke, here, and Foote, Cone & Belding, New York, both F-L shops, will be included in the coming review, the company says. Brands include Cheetos, Rold Gold pretzels and Ruffles potato chips. Separately, Frito-Lay has begun testing in Pittsfield, Mass., of McCracken's apple chips, which have a texture and appearance resembling potato chips. The agency was not known at press time.

Dairy board to make $34.6M upfront buy

New York—National Dairy Promotion & Research Board, Arlington, Va., is set to place a $34.6 million network tv upfront buy, one of the last big buys of the upfront season. D'Arcy MacManus Masius, Chicago, handles. Other major net tv advertisers that have yet to place prime time buys are Anheuser-Busch, St. Louis, and Miller Brewing Co., Milwaukee. DMM and Backer & Spielvogel handle, respectively.

(Continued on Page 8)

P&G's learned decision

Procter & Gamble's new Puritan oil spokeswoman, actress Michael Learned, makes her debut in this Grey Advertising, New York, tv spot on Sept. 3, replacing actor John Houseman. Ms. Learned, said Grey, is "authoritative but wholesome" and "highly relevant to Puritan's health-conscious target audience." She starred in tv's long-running hit family series, "The Waltons."

Atari rips at 'ripoffs' in key fall campaign

By JENNIFER PENDLETON

Atari Corp. is taking its aggressive "Power without the price" strategy a step further with an ad campaign for its 520ST model that labels competitors "ripoffs."

In the hard-hitting campaign, breaking in October issues of computer specialty and general-interest magazines, the Sunnyvale, Cal.-based company will attack the prices of the 520ST's three closest competitors head-on. Ads show photos of the Apple Mac 512 ($2,795), the IBM PCAT ($4,675) and the Commodore Amiga ($1,795) stamped with their prices and the advice "There's only one word for these prices: Rip-off." Underneath the headline, Atari points out its 520ST's price tag is $799.95.

Body copy states that while competitors' machines cost hundreds of dollars more "Only Atari gives you so much. For so little."

The ad, the first of three expected to take equally aggressive tacks, is the first creative work from Humpal, Leftwich, Lauck & Sinn, Palo Alto. HLL&S became the fourth agency to work on the Atari account since former Commodore International head Jack Tramiel took over as chairman about a year ago (AA, July 29). CPM, Chicago, continues as Atari's media buyer.

Most observers aren't surprised by the aggressive tone of the campaign, given the personality of Mr. Tramiel, who claims to be prepared to bully his staff, companies doing business with Atari and even customers in an effort to market the lowest-price personal computer available.

Atari's vp-marketing James Copland was unavailable for comment. But industry analysts say the campaign is Atari's attempt to preempt Commodore's upcoming introduction of its new Amiga home computer.

Software maker seeks a marketing breakthrough with a $4 million free sample offer in "PC World." See story on Page 56.

Mr. Tramiel's former company is supporting Amiga with a $40 million advertising campaign, breaking within a few weeks (AA, July 29). Agency sources estimate Atari's annual ad budget is $6 million to $10 million.

Atari faces an uphill battle in the personal-computer market. Sources say the company is having difficulty establishing a substantial dealer network, in part because of Mr. Tramiel's past with Commodore. In 1982, while at the West Chester, Pa.-based company, Mr. Tramiel made many computer retailers into enemies

Address all subscription correspondence to circulation department, Advertising Age, 740 Rush St., Chicago, Ill. 60611 (312) 649-5200.

Gannett moves into driver's seat at 'Detroit News'

By WILLIAM F. GLOEDE

Gannett Co.'s $717 million acquisition of Evening News Assn., Detroit, will create the nation's fifth-largest media company. It also will provide an opportunity for ENA's flagship, the *Detroit News*, to merge its business functions with its archrival, Knight-Ridder Newspapers' *Detroit Free Press*.

A spokesman for Miami-based Knight-Ridder, commenting on speculation about a joint operating agreement between Detroit's two major dailies, said, "I wouldn't rule out the possibility of that under certain circumstances. . .It always hinges on whether both sides consider it a fair and equitable arrangement."

The spokesman characterized the relationship between the two media companies as "brotherly."

A Gannett spokesman, however, said, "There's been no discussion about that [kind of agreement in Detroit]."

Combining business-side operations that both Detroit papers now perform separately would result in an immensely profitable enterprise with revenues of more than $350 million, according to some estimates.

Both Rosslyn, Va.-based Gannett and Knight-Ridder are currently involved in joint operating agreements—Gannett's are in Cincinnati; El Paso, Tex.; Honolulu; Knoxville; Nashville; Shreveport,

Late West Coast news

Sizzler Rustling up more work for shop

Sizzler Restaurants International, Los Angeles, has shifted an additional $2.5 million in billings to its agency, BBDO/West, Los Angeles, for media buying and creative for its recently acquired Rustler's Steak House chain, formerly owned by Tenly Enterprises (AA, July 22). Spots adapted from Sizzler commercials for special "All you can eat" dinner promotions begin airing Sept. 9 in Baltimore, Philadelphia and Washington. All Rustler's franchises will eventually be converted to the Sizzler name and format. Silberman Whitebrow Dolan, Philadelphia, continues to have a contract with Rustler's for the balance of the year.

Certi-Fresh Inc., Santa Fe Springs, Cal., will start test-marketing its new Fish Nuggets in Los Angeles, backed by a 30-second tv spot that begins airing Sept. 3. The commercial features a woman, who viewers discover is a mermaid as the camera pulls back, describing the lightly breaded, bite-size fish morsels. The ads will run for 10 weeks in Southern California, followed by flights in northern California and Arizona. Fish Nuggests is the first of several new frozen-fish items the western regional fish marketer has under develop-

P&G ventures into video

By STEVEN W. COLFORD
and JANET MEYERS

WASHINGTON—If advertiser tie-ins prove to be the next wave in the booming video market, then Procter & Gamble—the nation's biggest ad spender—may be riding an early crest.

Cincinnati-based P&G has agreed to sponsor a monthly video magazine to be test-marketed later this year, according to C.W. Wismar, exec vp, Kartes Video Communications, an Indianapolis, Ind., distribution and production house.

The 60-minute video, titled "American Woman," will include recipes, health & beauty tips, how-to pieces and other features that might be found in a wide assortment of women's magazines. If successful in test, it will be officially launched next year.

A P&G spokeswoman confirmed that the company is "very actively pursuing a project along those lines" but said details remained to be worked out.

The KVC video magazine will be available only through video stores, at least at the start, and will offer the sponsor a new vehicle for direct-response mailings and cents-off coupons.

Purchasers will be tracked by "bounce-back" questionnaires included in each cassette. The promise of an additional cassette in return for a completed questionnaire should induce a high degree of response, Mr. Wismar said. Questionnaires will determine consumer receptivity to the format and lead to changes if purchasers express disappointment with content, individual segments or video length.

P&G's interest in committing marketing dollars to what many consider a promotional proving ground could be the catalyst that leads other big advertisers into similar tie-ins and sponsorships of videocassettes.

The hesitancy of major advertisers to embrace videocassettes as a marketing medium has inhibited others, in the view of Mr. Wismar and Weston Nishimura, president of the Video Software Distributors Assn., which just completed its annual convention here.

While an advertiser might willingly spend $1 million on a "safe" tv campaign, the same expenditure in an unproven medium is risky, Mr. Nishimura said.

The question of whether videocassette recorder penetration, now more than 25%, is sufficiently large for major advertisers to exploit also is unresolved. Previous advertiser-videocassette tie-ins have been on a more limited scale than that envisioned by Mr. Wismar.

Reebok footwear, Mareika leotards and Descente sportswear, for instance, sponsor an exercise video from Active Home Video, Beverly Hills, Cal., starring ex-Olympian Bruce Jenner and his wife.

Red Lobster family restaurants, through its agency, Backer & Spielvogel, New York, sponsors a $29.95 "Eat to Win" video version of Robert Haas' best-selling diet book. Critics point out that in addition to getting its logo on the cassette, Red Lobster injected an outright ad at the end of the video—a can't-miss target for vcr zappers.

"There's a lot of thinking going on now as to how to put ads onto these videos," said Mr. Nishimura. "The real problem will be when advertisers try to put an ad from tv on this medium and find out that there's a tremendous amount of consumer objection."

A series of six videos being released this month by *Esquire* magazine, "Esquire Success," landed sponsorships from two major advertisers, Eastman Kodak, Rochester, N.Y., and Vidal Sassoon Inc., Century City, Cal. (AA, Aug. 26).

The *Esquire* videos, which cover career strategies, grooming, personal style, wine and other subjects, are produced on Kodak tape. They carry a Kodak logo on the package and an opening billboard ad for Kodak. Sassoon hair products are used exclusively in a segment set at one of Sassoon's San Francisco salons.

Robert Singer, director of marketing ad sales for Random House's electronic publishing division, New York, said last week that four ad agency representatives approached him at the VSDA convention with ideas for video-marketing tie-ins. One offer under consideration involves a tie-in between a garden-tools company and a video on home gardening.

Advertiser sponsorship of videos drastically changes the financial dynamics of the medium, according to Mr. Singer.

"Production costs are so high that it makes sense," he said. For example, the cost to Red Lobster for underwriting the "Eat to Win" video was less than the cost of a 30-second tv spot.

Nicholas Santrizos, president of Thorn EMI/HBO Video, New York, believes vcr penetration is the key to advertiser involvement.

"The pertinence will increase as sales of vcrs develop," he says. "Once we reach 40%-to-50% penetration, it will take off, well before 1990." But he also believes video advertisers can't rely on tv-like commercials.

"If we were ever involved in advertising in videos, it would be through the application of wholly-sponsored cassettes. We don't believe in ads, and our compact with the consumer just doesn't allow them. But a food marketer that unabashedly sponsors a cookbook-type video, I think that could generate great interest."#

CAMPAIGNS BREAKING

Nestle Foods Corp., White Plains, N.Y., breaks new tv ads Sept. 9 for regular and almond milk chocolate bars, with contemporary, romantic settings and rock music to promote the brands as upbeat, modern and fit for adults. J. Walter Thompson USA, New York, is the agency (AA, Aug. 26).

Del Monte USA, San Francisco, begins test-marketing its Fruit Street juice-based drink in San Francisco and Denver this week. The two-tiered campaign couples 30-second tv spots aimed at children with print ads appealing to adult nutritional concerns. Tv ads start today, and print appears in October issues of national women's magazines. McCann-Erickson, San Francisco, handles (AA, Aug. 12).#

Country-music singer Don Williams (r.) shares a Coca-Cola Classic with Claude Clements, president of Coca-Cola Bottling Co., Nashville. The first 25 cases of Coca-Cola Classic produced at the bottling plant were delivered to Mr. Williams, whose displeasure with "new" Coke was noted in a nationally syndicated newspaper article.

It's Coke versus Coke in Classic battle: Poll

CHICAGO—Coca-Cola Classic is now available at more than eight of every ten stores (82%) nationwide, according to a survey conducted for ADVERTISING AGE by Leo J. Shapiro & Associates, Chicago.

The survey of large retailers in 45 markets around the country is part of AA's continuing tracking of Atlanta-based Coca-Cola Co.'s switch to a new formula and its subsequent decision to bring back the original formula.

Most of the retailers surveyed said they have only had Coke Classic for a month or less, and more than half (52%) have had it on their shelves two weeks or less.

Availability of different containers and sizes of Coke Classic is limited; nearly two-thirds (65%) of the stores surveyed carried only cans or 2-liter bottles or both.

New Coke is available in most, if not all, sizes at about two-thirds (66%) of the retailers.

Two-thirds of the managers whose stores carry Classic Coke believe it is selling better than new Coke. Nearly one-quarter (22%) say new Coke outsells Classic Coke.

Of those reporting higher sales of Coke Classic, more than two-thirds (69%) estimate it outsells new Coke 2-to-1. One store manager said, "If I buy a case of new Coke, I'll have it a month. A case of old Coke will go in a week."

One respondent believed, however, that sales between the two eventually will even out; he couldn't taste the difference.

An interesting sidelight is that two of the 34 store managers interviewed spontaneously answered that Cherry Coke was selling better than either Classic or new Coke.

Nearly nine in ten (86%) supermarkets report that they are not giving Coca-Cola more shelf space to accommodate Classic Coke, even though Classic is outselling new Coke. Specifically, two-thirds of retailers report they have kept Coca-Cola shelf space constant.

Of those who have given more space to Classic Coke, one-quarter have taken away space from other Coca-Cola products to accommodate Classic. Only 14% gave Coke products more space by reducing space for other brands.#

CORRECTIONS & CLARIFICATIONS

- General Motors' Pontiac division is sponsoring the concert portion of *Rolling Stone's* fashion/rock college concert tour, while Pierre Cardin fragrances is the sponsor for only the fashion segment and not the entire program (AA, Aug. 15, P. 6).
- Nancy Kadner, advertising director for Swatch Watch USA, New York, was incorrectly identified in a story (AA, Aug. 26, P. 1). Also, the eight-page Swatch insert in September fashion and consumer magazines was produced by Swatch Watch Advertising.
- In a report on Pet food market shares by John C. Maxwell Jr. (AA, Aug. 12, P. 31), Beef Bites dog food snack was incorrectly listed as a Kal Kan product. It is a product of GrandMet USA's Alpo.
- Godfather's Pizza relocated to Omaha from Costa Mesa, Cal., on Aug. 1 (AA, Aug. 22, P. 48).
- Due to incorrect information supplied by Publicity Clinic, Youngstown, O., it was reported that former world lightweight boxing champion Ray (Boom Boom) Mancini will have a recurring role on "Who's the Boss," an ABC network series (AA, Aug. 22, P. 48). He will have a cameo appearance.#

This data has been provided by Media Records for exclusive publication in Advertising Age and may not be reprinted or published in any form without explicit permission from Media Records. All newspapers represented are subscribers to Media Records. For those newspapers that subscribe to Media Records National Advertising Reporting Service, Total Advertising data shown has been supplied by the publisher to Media Records and included in this compilation. All publisher supplied figures are converted to MRCS SAU inches by Media Records. These newspapers are indicated with an asterisk (*).

REPORTING METHODOLOGY

Media Records continues to measure in linage but due to the introduction of the SAU 6 column format Media Records has designed and developed a methodology with the approval of our subscribers, the INAME Measurements Committee, The ANPA NAB Working Committee, The AAAA Newspaper Committee, and other industry groups.

The approved methodology is titled The Media Records Conversion System (MRCS) and is based upon the printed page area of each product of the newspaper and is a five step approach as follows:

1. Measure Printed Page
   Width and Depth in Inches
2. Determine Square Inches of Page
   Multiply Width by Depth Inches
3. Determine the Number of SAU Inches of Page
   Divide the Square Inches by 2.0625 (SAU Inches)
4. Measure the Total Lines of the Page
   Multiply Column Depth Agate Lines by the Number of Columns on the Page
5. Determine the Factor for Converting Measured Lines to Reported SAU Inches
   Divide the Total Lines of Page by the Number of MRCS SAU Inches of the Page

Minute Maid
Minute Maid

Oh, for heaven's sake!

In a spot for Coca-Cola's new Minute Maid orange soda, a man enters heaven and asks for something to drink. The angels first express shock at his naivete then reply, "All we have up here is Minute Maid orange soda." Marschalk Inc., New York, handles.

Chevy woos women

Sports dollars cut for major effort

By VERNE GAY
and PAUL L. EDWARDS

Chevrolet, in a move that has broad significance to other national marketers, will slash its tv sports spending in order to pursue a new target audience: Women.

The General Motors division today will unveil a radically new strategy using media it either never has used or used on a small scale. For example, Chevy will use women's magazines, direct mail and direct-response print ads.

"Women today are making higher salaries and they have more responsible positions than ever before," said Thomas Staudt, general marketing manager for Chevrolet. "Today they account for about a third of all new-car and truck sales and by 1990 they'll be buying more than half. Even today, counting their influence on purchase decisions, they're responsible for a majority of sales."

Chevy spending in sports, which totaled about $154 million in network tv alone during 1984-85, could drop to $100 million this season. However, one source said sports spending will bottom out at about $125 million.

Chevrolet's 1984 national media spending was more than $200 million, making it the largest single-brand account among advertisers in the U.S.

Chevy also will begin production of its own daytime tv programs. It is not known what the programs will be nor who actually will produce the shows, although they are not expected to be soap operas.

Chevy also will begin a test schedule next month on ABC-TV daytime shows, the first daytime network tv buy for an auto marketer in years except for an earlier test Chevy tried with CBS-TV. That test failed, according to one source, because CBS' daytime demographics skewed too old.

If the ABC test is successful, sources said Chevy could begin a major push in network daytime sometime this fall.

Also in its network tv plan, Chevy is shifting millions of dollars from sports into prime time in a continuation of a trend it started last year. However, this season Chevy will be advertising in programs that last year would have been rejected because of their violence. The most striking example is "Miami Vice," which last year Chevy and all other GM divisions passed on because of program content. It was one of NBC's successful newcomers last season.

Like all domestic and many import auto marketers,

'Coke is it' line gets canned

By NANCY GIGES

Coca-Cola USA will say so long to its three-year-old "Coke is it" ad theme and present new advertising to bottlers in meetings across the country this week.

The new campaign, complete with new music, is intended to run for several months until the soft-drink company has time to regroup and work out executions that fit into its long-term strategy. The series of new spots uses the imagery of packaging to lay the groundwork for a "megabrand" story.

Since the world's largest soft-drink company rocked the American marketplace in April—first by reformulating 99-year-old Coca-Cola, then by reversing its position by bringing back the original formula as Coke Classic—the company has been producing commercials here and there by fits and starts.

Commercials thought to have been put to rest before new Coke appeared were revived; president Donald Keough agreed to appear as spokesman in several spots telling consumers why the company reversed itself, and agency McCann-Erickson quickly threw together some other spots telling

Last Minute News

Agencies joust to win Armour

BALLWIN, MO.—ConAgra is reviewing its $15 million Armour Frozen Foods account. Pitching the business are incumbent Bozell & Jacobs, Dallas; Fallon McElligott Rice, Minneapolis, and one other unidentified agency. Armour says the review doesn't affect B&J's handling of its $10 million Armour Processed Meats account.

Saatchi seeks to acquire Gray pr shop

NEW YORK—Saatchi & Saatchi Compton is negotiating with Gray & Co. to acquire the $18 million public affairs agency, based in Washington. Early this summer Gray held preliminary talks with Ogilvy & Mather. In the past year, Saatchi purchased Rowland Co., New York, one of the nation's top 10 independent pr agencies.

Martin moves Topol creative account

UNION, N.J.—Jeffrey Martin Inc. has assigned creative work for Topol smokers' tooth polish to Saatchi & Saatchi Compton, New York, from its in-house shop, Dunnan & Jeffrey. The latter will continue to handle media buying. Measured media spending for the brand last year was $12 million. Martin also is talking to other shops for some other brands still handled in-house, including Lavoris mouthwash. Other agencies on the company's roster are Sudler & Hennessey Consumer Group, which has

Post Natural Raisin Bran

John Denver touts new Post Natural Raisin Bran in his first product endorsement.

New GF raisin bran a natural

By NANCY GIGES

General Foods, White Plains, N.Y., has reformulated and renamed its raisin-bran cereal and is breaking a $15 million ad effort Sept. 9.

Post Raisin Bran has become officially Post Natural Raisin Bran, now that the company has taken out preservatives and has removed the sugar coating previously dusting the raisins.

The new campaign uses country singer John Denver in his premiere appearance as a product endorser. The introductory spot opens with the music of his ballad "Welcome to My Morning" and then shows the singer talking about the natural, unsugared raisins in the cereal.

Filmed near Mr. Denver's home in Aspen, Colo., the spot ends by playing off one of his

Slumbering Carnation Co. stirs

By JENNIFER PENDLETON

LOS ANGELES—Carnation Co., long considered a sleeping giant among major U.S. food companies, seems to be awakening under the guidance of its new and distant owner, Nestle SA.

Outwardly, Carnation seems little different than when the Vevey, Switzerland-based conglomerate purchased it several months ago (AA, Sept. 6, '84). But there are signs that change is at hand.

Among the indications:

- Carnation has set up a new-business development group to explore the introduction of new products for the U.S. market.

Headed by Nelson Knapp, a longtime Carnation executive and director of new-business development, the six-member team is considering adapting some international Nestle products for the U.S., as well as developing completely new products under Carnation brand names, sources say.

Among the possibilities rumored to be under consideration is using the Carnation brand on a number of new "mother's products," such as baby formula, in the U.S. and abroad. The rationale: The Carnation name, with its pristine image, might help Nestle overcome the hits it took when consumer groups charged it with contributing to the ill health of Third World babies. (Consumer groups singled out the Swiss company in charging that uneducated mothers in poor nations, influenced by advertising, chose canned and powdered formula for their infants, often mixing it with contaminated water, rather than breast feeding.)

Nestle also is said to be interested in opportunities to sell Carnation pet food internationally.

- For the first time, Carnation is working under a five-year plan. In the past, the company functioned under goals set on a yearly basis.
- Carnation's 78-year-old chairman-ceo, H. Everett Olson, an accountant by training, retired a few months ago. His retirement was expected, but it seems to have

(Continued on Page 132)

NEWSPAPER

HIGHLIGHTS

Hill hums with FTC gossip 4

The music has stopped on one of Washington's most intriguing games of musical chairs, with James Miller III still sitting in the chairman's seat at the Federal Trade Commission. How soon he can move to the Office of Management and Budget, and who will replace him at FTC, are the questions of the hour.

Bitters go better 4

Angostura International this week begins a four-week radio campaign in New York and Chicago for its Angostura Aromatic Bitters. The campaign promotes the herbs-and-alcohol concoction as an ingredient in a drink called the Charger, which the spots characterize as a "new adult soft drink."

Overnight quarters 6

Federal Express will challenge business customers to budget an extra 25¢ for their overnight letters in a new $3 million campaign that attacks the U.S. Postal Service's Express Mail.

Getting uppity 10

Cadillac, a symbol of automotive luxury in the U.S., has set its sights on what once would have seemed a redundant goal: Moving upscale.

They're Beatrice, all right 12

Believing it has consolidated sales and marketing functions with the Esmark brands it acquired last year, Beatrice Cos.' U.S. Foods division is wooing retailers with line extensions and new products backed by heavy multibrand support.

It's Jack's turn now 14

Like the vaudevillians who performed after Burns and Allen, *Gentlemen's Quarterly* publisher Jack Kliger has a tough act to follow.

Time to compete 36

Citizen Watch Co. of America is gunning for No. 1-selling Seiko this fall, spending $15 million on a new tv campaign breaking today in 50 markets.

Canadian Club goes classic 55

Hiram Walker Inc.'s new "barrel-blended" superpremium Canadian whisky is getting a rich, superpremium ad boost. The 125-year-old distiller is spending more than $4.5 million in a six-state launch of Canadian Club Classic whisky.

Sign of Scorpio 66

Lincoln-Mercury is considering a regional launch of the Scorpio addition to the Merkur line when it arrives next year from Ford of Germany.

Promoting fun and profit 100

Bally Corp., which last year bought the Six Flags Great America park from Marriott for $115 million, has taken a marketing page from competitor Walt Disney and enlisted corporate sponsors for various attractions, restaurants and shops at the park.

CREATIVE WORKSHOP

Brewing something new 45

Stroh Brewery Co. in the last few years has been taking a microscope to consumers' drinking habits to find new growth areas—no small feat in an industry whose heyday now seems a distant memory.

Getting creative 46

Unleashing consumers' creativity can be the first key step to marketing success, says Robert Burian, senior market-research analyst at IBM Corp.

INTERNATIONAL

Teens of the rising sun 81

Japanese teen agers are becoming important consumers as they continue to spend more and more of their money on alcohol, cars and electronic gadgetry, according to research done by Marplan Japan, the McCann-Erickson affiliated research company.

Gruesome Greenpeace 81

A striking and controversial outdoor board campaign for the environmental group Greenpeace that is designed to discourage consumers from buying fur coats has been made into an even more striking advertisement running in U.K. movie theaters.

VIDEOTECH

LBS bets on daytime 84

Inday, the two-hour first-run afternoon program service that premieres Oct. 7, is the biggest gamble LBS Communications has taken in its nine-year history.

A spirited battle 92

It's Columbia Pictures Television against Casper the Friendly Ghost, Huey Lewis and The News, Bill Murray and Dan Aykroyd over the studio's plans for an animated tv version of the hit movie "Ghostbusters."

OTHER NEWS

After several years as sophisticated sleepers, the two leading imported rums are stepping out this fall with new campaigns that depart dramatically from previous strategies. Page 4.

Quaker Oats Co. is telling the trade it will spend $50 million this fall on its Kibbles n' Bits n' Bits n' Bits and Love Me Tender Chunks soft-dry dog foods. Ad support includes network tv and couponing as well as trade allowances. Page 6.

Gorman Publishing Co. has added to its cart of food manufacturing journals another title on the retailer side—*Grocers' Spotlight*, a tabloid-style magazine designed for supermarket operators. Page 10.

Pizza Inn hopes to take a bite out of the upper-crust pizza market with its new Stuffed Pizz-Aah Pie. Page 36.

CAMPAIGNS BREAKING

The Las Vegas Convention and Visitors Bureau's new advertising campaign, designed to undercut the rise in international travel among Americans, is appearing in September issues of national consumer magazines. The gambling capital is presented as "The American way to play" in the print ads, tv spots breaking in 10 major markets Sept. 12 and on outdoor boards across Southern California. R&R Advertising, Las Vegas is LVCVB's agency (AA, July 22).

Pillsbury Co.'s Green Giant, Minneapolis, begins a network tv campaign Sept. 14 for its 11-item Valley Combinations line of frozen, mixed vegetables, with spots breaking during the "Miss America Pageant." Coupons on-pack and via freestanding newspaper inserts begin in mid-September and mid-October, respectively (AA, May 27).

Ford Motor Co., Dearborn, Mich., begins its network tv and radio campaign Sept. 15 for its new Ford Aerostar minivan. The theme "The Age of Aerostar" is an adaptation of "The Age of Aquarius" from the 1960s rock musical "Hair" (AA, Aug. 26). Magazine ads debut with front-cover gatefolds in five newsweeklies the week of Sept. 16. Agency is J. Walter Thompson USA, Detroit.

COMING THURSDAY

Jeb Brown, 38-year-old president of Earle Palmer Brown Cos., wants growth and fame for his agency. He's taken his father's Bethesda, Md., agency from $3 million in billings in 1974 to $19 million in 1980, and then to $100 million in billings today.

In Special Report—Women are put into segments whether they like it or not. Charting changes in these segments aids advertisers' targeting in marketing to women.

Address all subscription correspondence to circulation department, Advertising Age, 740 Rush St., Chicago, Ill. 60611 (312) 649-5200.

Danish vodka to Whitbread

By GAY JERVEY

Lacking an imported vodka since losing the rights to Finlandia this year, Buckingham Wile has quietly signed with Denmark-based Peter Heering AG to introduce Denaka in the U.S.

Sources report the brand, a relatively new product even in Denmark, will first be available in Florida, Rhode Island and upstate New York, with a national rollout expected by the end of 1986.

Because Buckingham Wile, a Lake Success, N.Y.-based division of Whitbread N.A., expects the brand to yield high volume sales numbers, it will be marketed by Buckingham subsidiary Fleischmann Distilling Co. Fleischmann already handles such big-ticket items as Fleischmann's Preferred whisky, Fleischmann's gin and Fleischmann's Royal vodka. Fleischmann's agency, MacNamara, Clapp & Klein, New York, has been assigned advertising for Danaka.

West Coast news

Cal. lottery sets theme

The California State Lottery will describe what will be the U.S.' largest state-run game as "A good feeling for a lot of reasons," in tv, radio and newspaper ads starting Sept. 26. The $22 million campaign will emphasize the fun of the lottery, rather than the chances of winning—a strategy in keeping with the state's expressed desire to avoid misleading unindoctrinated Californians on their chances of becoming $2 to $2 million richer. The lottery starts Oct. 3. Needham Harper Worldwide, Los Angeles and Sacramento, is the agency.

Southern California Gas Co., Los Angeles, picked Foote, Cone & Belding, Los Angeles, as its agency on its $3 million account, previously at Doyle Dane Bernbach, Los Angeles, for 18 years. Also competing in the review against

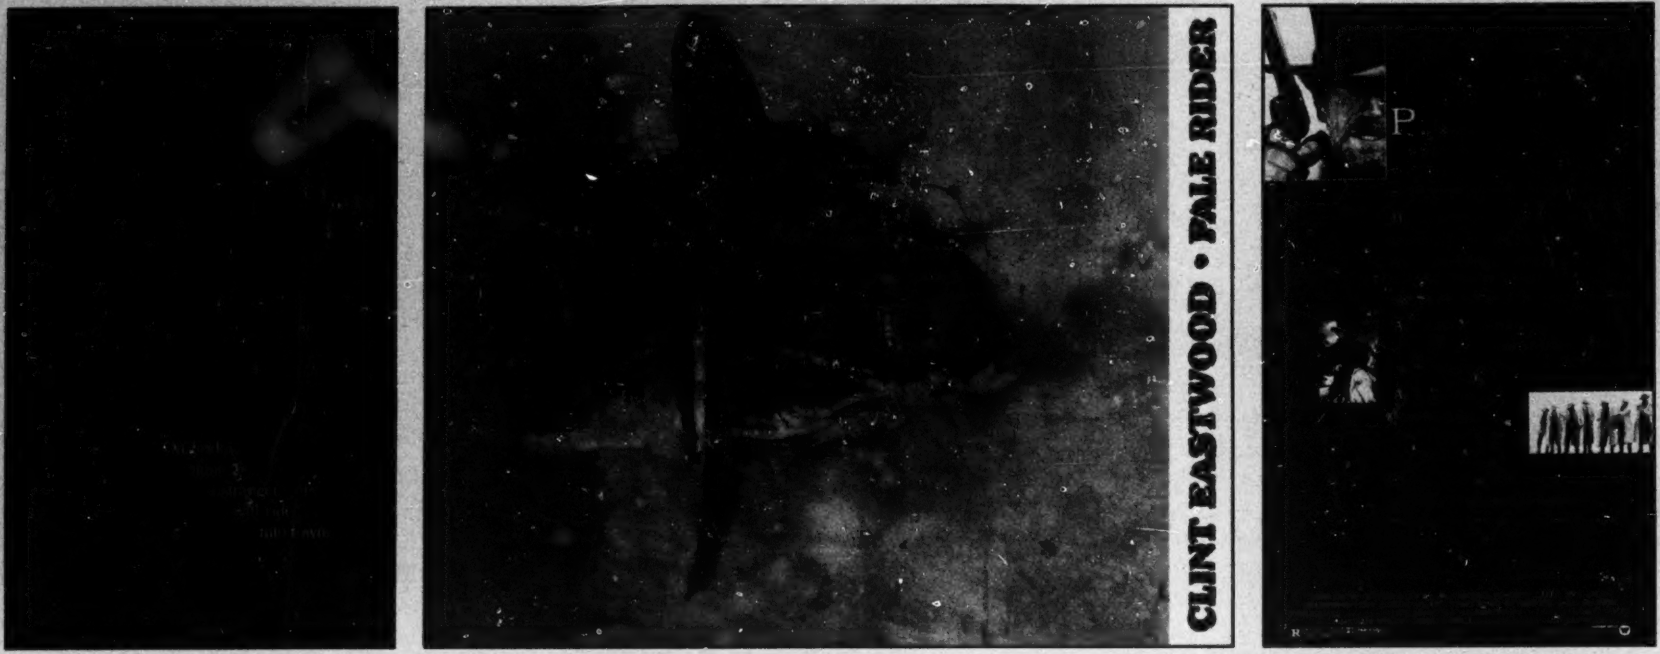
Our new look

With this issue, Advertising Age introduces an expanded Highlights section on Page 2. The Highlights redesign will enable readers to quickly gain access to the latest news developments in U.S. and foreign marketing and advertising centers that are reported in detail on other pages of the publication.

"Additional features, each tailored to serve reader interests and needs, and providing more timely and comprehensive information, also have been developed for introduction in AA's Monday edition," said Fred Danzig, AA editor.#

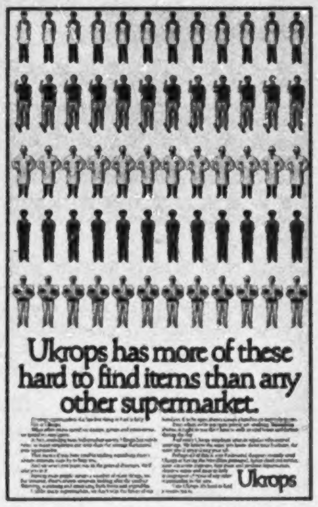
BEST OF PRESS



Warner Bros. announced Clint Eastwood's "Pale Rider" in this special, four-page advertising section in *USA Today*. Created by Bill Gold Advertising, New York, the section contained a poster-size illustration of Mr. Eastwood that ran horizontally across the center spread, with the black pages used as the opening and closing of the section. Creative director: Bill Gold; art director: James Hedden; copywriter: Warner Bros.; photography: Marcia Reed; illustrator: Michael Dudash.

The American dream begins
with the dreams of Americans.
Birthday Greetings from
Coca-Cola
Coke

Coca-Cola wished America a happy birthday in this July 3 ad, via McCann-Erickson, New York. The ad represents an excellent use of newspaper advertising for image advertising. Creative directors: Ira Madris, Bruce Nelson; art director: Tim Shortt; copywriter: Richard Levey; photographer: Chuck White.



Ukrops has more of these hard to find items than any other supermarket.
Ukrops

Ukrops, a grocery chain in the Richmond, Va., area, used this page ad, one in a series created by Westbrook Inc., to take the highly atypical position as a service-oriented business. Art directors: Carylyn Tye and Wayne Gibson; copywriters: Bill Westbrook, Kerry Feuerman; illustrator: Reid Icard.

Merry May for papers

By WILLIAM F. GLOEDE

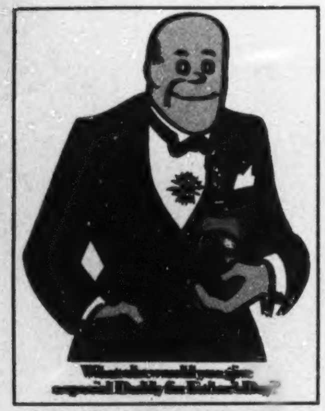
NEW YORK—Advertisers pumped $42.2 million more into major-market newspaper advertising in 16 measured categories in May, 1985, than they did in the same month in 1984, according to the ADVERTISING AGE Flash Report prepared by Media Records Inc.

Gaining categories outnumbered losers by 12 to 4, with losses coming only in the alcoholic-beverages category, where spending fell 4.4% to $3.1 million; cigarets, which were off 47.5% to $2.4 million; cameras, photo supplies and services, which suffered a 42.5% drop to $502,566, and stocks, bonds and investment houses, which were down 15.3% to $1.3 million.

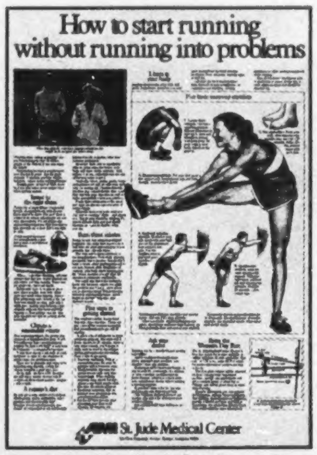
New-car ad spending led the gainers in percentage, with a 37.5% jump to $15.2 million, and department stores led in dollar volume with an increase to $92 million. Other large gainers were food stores, up 28.1% to $31.2 million; general-merchandise stores, up 25.8% to $44.1 million; radio, tv, phonographs and records, up 31% to $17.5 million, and airlines, up 14.9% to $15.1 million.

The amusements category, which includes movie advertising, was up 4% to $24.5 million; computer stores and supplies remained relatively even with May, '84, with a 0.5% increase to $4.8 million; computer equipment and services were up 16.7% to $5.2 million; public service utilities and commissions were up 8.2% to $6.5 million; publishing and media were up 7.3% to $15.5 million, and banks and trust companies gained 5.9% to $6.9 million.

Media Records measures advertising linage/inches in 29 daily and 23 Sunday newspapers in 15 major markets in compiling the Flash Report.#



Daddy Warbucks, of the Tribune Syndicate's "Annie" comics strip, is the celebrity spokesman for Chivas Regal scotch in this Father's Day ad from Doyle Dane Bernbach, New York. This ad demonstrates a fresh usage of a pop culture figure in liquor advertising. Art director: Lester Feldman; copywriter: Mike Mangano.



How to start running without running into problems
AMI St. Jude Medical Center

St. Jude Medical Center, a hospital in Kenner, La., owned by AMI, ran this ad, via Ogilvy & Mather, Atlanta, on the pitfalls of recreational jogging. Creative director: Stephen Heller; copywriter: Julie Burmeister; art director: Charlie McQuilkin.

Best of Press selections are made by a committee of three: Hank Simons, vp-creative director of the Newspaper Advertising Bureau; James Dunaway, vp-information at the bureau, and William F. Gloede, ADVERTISING AGE's newspaper industry reporter. National System Inc., St. Louis, provides tear sheets to the Newspaper Advertising Bureau for much of this work. Agencies, clients and newspapers are invited to submit ads for review. Submissions should be sent to Mr. Gloede at AA's New York bureau.

BUSINESS TO BUSINESS

Advertisers polishing image-ad budgets

By THOMAS F. GARBETT
Crain News Service

The nation's top 500 corporate advertisers boosted their corporate advertising volume in six major media by 67% last year, compared with 1983.

And according to preliminary data, corporate advertising activity is likely to increase 20% this year compared with last—if the economy holds.

Comprehensive corporate advertising data compiled for the first time in the BAR/LNA Report, now published by Interactive Market Systems, New York, show significant 1984 gains in all six media studied: Magazines, newspaper supplements, network and spot tv, network radio and outdoor. Expenditures in spot tv and outdoor more than tripled.

Outdoor's corporate advertising gain last year was due in part to community relations campaigns in corporate plant cities and major efforts by Joseph E. Seagram & Sons and Anheuser-Busch Cos. to promote moderation in the use of alcoholic beverages.

The growth in spot tv reflects a growing interest in that medium among advertisers who cut corporate costs by limiting the number of markets covered. To some extent, the data also reflect spot tv's greater acceptance of issue advertising, compared with network tv.

Nonetheless, the 91 corporate advertisers that used network tv last year spent 86% more, to make it the No. 1 medium in corporate advertising expenditures for the first time.

Magazines continued to be the most popular medium, however, employed by 417 out of the top 500 advertisers. Starting from a larger base, their growth was a still-hefty 33%.

Although comparable data for newspapers are not available from the BAR/LNA Report, *Barron's*, the *New York Times* and the *Wall Street Journal* say they experienced similar corporate advertising growth during the same 1983-84 period.

Notoriously sensitive to business cycles, corporate advertising's surge in 1984 must in good part be attributed to the improvement in last year's economic picture. Many companies that had cut or dropped corporate advertising during the recession came back in mid-'83 or '84—some of them, like Beatrice Cos., in a big way.

Although the top 10 spent one-third more than they did in 1983, it was those spending from $500,000 to $10 million that showed the sharpest increase, particularly those companies clustered at the $1 million-to-$3 million level.

That hard core of the corporate advertising fraternity helped the top 200 register a whopping 69% increase.

Noticeable in that group was increased activity by aerospace and pharmaceutical companies. Although those industries represent very different situations, they share strong bottom-line concerns. Pharmaceutical companies must enhance their reputations in the face of generic-drug market gains. And the aerospace companies seek greater market shares of the growing defense dollar.

During the last recession, a number of industries altered corporate advertising strategies, causing shifts in industry-by-industry rankings. That trend continues.

For example, oil companies, which once dominated the top 10 roster of image advertisers, have yielded to the automotive field. Anxious to battle imports, car makers stress engineering and manufacturing quality.

High-technology electronics companies also have boosted corporate advertising to promote their engineering and research-and-development capabilities. And in many cases, their campaigns are used to prepare the marketplace for a long line of products with short life cycles. Launching each product under a separate name with its own conventional product advertising campaign becomes an expensive proposition with only short-range benefits. Hence companies such as Harris Corp., in hardware, and Peachtree Software and Xerox Corp., in office automation, promote the company and the line all at once.

That creates an umbrella or backdrop effect providing continuity for a changing array of products and services. Complicated product systems requiring custom applications share a similar problem. Companies meet the challenge with strategies such as "establishing the corporation's presence as a major resource."

The targets for such line-wide, "market prep" advertising are business executives—including important segments of the investment community. Therefore, such corporate advertising frequently serves a dual purpose, keeping Wall Street informed of the company's activities as well.

As might be expected, the line between corporate advertising of that sort and product advertising frequently is blurred. It is often necessary to call the advertisers to find out just how a particular campaign should be categorized. That is just one of the difficulties that has plagued those measuring corporate ad activity.

AT&T once again was the largest corporate image advertiser, that despite its reduction in over-all spending in the category. While none of the Bell spin-off companies made it into the top 20, they all used corporate advertising to hold onto stockholders following the AT&T breakup.

General Motors Corp. wrested second from Ford Motor Co., which dropped to third. Chrysler Corp., although spending $1 million more than it did the year before, dropped from the fifth to 11th slot.

Last year, corporate advertisers had to run hard just to stay in place. IBM Corp. did just that, holding on to fourth position by increasing its expenditures by about one-third. Advertisers such as Beatrice, American Express Co. and Wang Laboratories joined the top 10 for the first time in spots five, six and seven, respectively. K mart Corp., one of a number of retail chains that have become increasingly active corporate advertisers, found itself in ninth position. Two longtime corporate advertisers, GTE Corp. and ITT Corp., both increased expenditures and stayed in the top 10. But they dropped to the eighth and tenth positions, respectively.

Amid the flurry of domestic advertiser activity, the invasion of foreign-based corporate advertisers has gone almost unnoticed. The number of foreign companies promoting themselves to upscale Americans is a sign that the world is rapidly becoming one interre-

UPS delivers overnight pitch

By BRIAN MORAN

United Parcel Service, facing mounting competition and sluggish demand in its traditional package business, broke an estimated $5 million campaign last week for its overnight delivery service.

The spot tv and print effort, via Ammirati & Puris, New York, addresses a segment that accounts for only about 10% of UPS revenues. Yet overnight services are the fastest-growing—and most competitive—battlefield in the $11 billion parcel-delivery business.

The campaign promotes the efficiency and low prices of the 78-year-old, Greenwich, Conn.-based company that entered the overnight package-delivery market in 1982. In June, UPS made a more serious move into the segment with the introduction of an overnight letter service.

Both services compete against big players, including the U.S. Postal Service; Federal Express, Memphis; Emery Air Freight Corp., Wilton, Conn., and Purolator Courier Corp., Basking Ridge, N.J.

The new ad effort points up rivals' supposed deficiencies but—in the traditional style of UPS—does not name any competitors. The company's new ad theme is "We run the tightest ship in the shipping business."

Three tv commercials play up UPS' obsession with efficiency. One spot points out that UPS washes all of its airplanes every day, a practice that reduces wind drag and saves thousands of tons of jet fuel each year, leading to lower prices. (UPS also washes its entire fleet of 46,000 trucks daily.)

Another spot traces the history of UPS through the eyes of the company's founder, Jim Casey, and his credo "Hustle where others dawdle."

A third spot shows a group of awed Japanese businessmen touring UPS' Louisville hub, marveling at the company's attention to detail. The spot concludes with a shot of the ever-thorough Japanese visitors filing, assembly line-style, through a familiar UPS delivery truck.

Ralph Ammirati, agency chairman and creative supervisor on the campaign with president Martin Puris, said UPS gets scores of requests each year from Japanese businessmen asking for tours. "We thought that made for a good commercial," Mr. Ammirati said. "It's not too often that the Japanese come here to observe how efficiently Americans can run a business." A fourth tv spot, scheduled to join the pool later this month, will promote UPS' overnight letter service. UPS supported the June introduction of the service with newspaper ads in major markets (AA, May 23).

The tv spots will run in prime, late news and sports programing in 12 major markets, said Derek Hewitt, vp-management supervisor at A&P, which took over the $10 million UPS account last fall (AA, Sept. 24, '84). The commercials also will run on cable, including Cable News Network, ESPN and USA.

Copy for UPS' new print ads promotes a range of services, including Next Day Air, 2nd Day Air, automatic daily pickups and 48-state service. The print schedule includes *Time*, *Forbes* and transportation trade magazines.

Mr. Hewitt said the campaign is targeted primarily at existing users of UPS' two-to-five-day package delivery service.

"We're trying to build awareness among current customers that UPS now has a whole menu of services," he said.

UPS
We run the tightest ship in the shipping business.

A new tv spot for United Parcel Service's overnight delivery services features a group of efficiency-minded Japanese businessmen touring UPS' Louisville hub facilities. Ammirati & Puris handles.

For example, UPS' overnight letter guarantees next-day delivery between any two addresses, a service that the Postal Service and other competitors cannot match.

But some analysts believe that superefficiency in overnight service cannot stem the current slowdown in UPS' key business, small-package delivery. Although analysts estimate that UPS controls about 60% of that $3 billion market, the company is facing a challenge from Roadway Package Systems, a Pittsburgh-based subsidiary of the giant Roadway Services trucking company that entered the market in March.

Roadway's small-package business, which reaches about 35 cities, is scheduled to expand to 48 cities this month. Advertising is handled by Marc & Co., Pittsburgh.#

Budgets

(Continued from Page 125)

lated marketplace.

Those companies view U.S. business people not only as potential customers, but as potential partners. The day of worldwide joint ventures has arrived, and corporate ads act as elaborate calling cards for companies seeking partners. For example, 29 Japanese companies use corporate advertising—corporations such as Toshiba Corp., Hitachi Ltd., Mitsubishi Corp., Nissan Motor Corp. and Mazda Motor Corp.

The foreign influx isn't limited to the Japanese.

A typical European example is Aerospatiale, the giant French aerospace company that launches satellites, builds the Airbus and helicopters and arms the free world with things such as the Exocet missile. Engaged in joint ventures all over the world, Aerospatiale began a campaign in 1984 to become better known to potential U.S. partners.

In addition, there is Lucky Goldstar, a Korean company; Krupp from West Germany; Volvo from Sweden; BAT Industries from England, and so on. Altogether, 74 out of the top 300 corporate advertisers in the U.S. media were foreign-based.

Another trend of note is that growing corporate spending makes possible the use of more expensive print space units.

Some publications report they are carrying more corporate ad spreads than single pages, and more color than b&w.

Insert-like sections are almost commonplace: Singer Co., Westinghouse Electric Corp., AT&T and Korea's Daewoo Industries are among those that have used multiple-page units. Allied Corp., Goodyear Tire & Rubber Co., American Can Co. and Aerospatiale all have used fractional space in multiple units on facing or consecutive pages. The effort to stand out in a growing crowd is obvious.

Just how much was spent on corporate advertising over-all last year? That statistic is hard to pin down.

After years of corporate advertising representing only about 2% of all advertising, it is now between 2% and 3%, or somewhere between $1.5 billion and $2 billion. That's about as close as one can estimate, given the problems with the data available so far.

Tracking corporate advertising activity is as yet an imperfect science. So is forecasting. Yet, at this writing, first-quarter 1985 figures—available only in rough form for two media—show that the greater expenditure levels are not holding but increasing this year. The rate of increase will not be as great, but it should approach 20% if the economy holds, if the new campaigns that started this year continue and, as they say down home about unforeseen events, "the creek don't rise."#

The author, Thomas Garbett, Waterford, Conn.-based consultant specializing in corporate advertising, will be launching "Garbett's Quarterly Corporate Advertising Activity Report," a newsletter analyzing data from a variety of sources, late this summer. He is the author of the book "Corporate Advertising: The What, The Why and The How" published by McGraw-Hill Book Co. in 1981.

Coke back to 'traditional' ads

New theme for both: 'We've got a taste for you'

By NANCY GIGES

Coca-Cola returns to the soft-drink tradition of showing a series of vignettes portraying people's emotions. In the new spots, both the Coca-Cola and Coke Classic brands are shown together to project the image of a single brand. McCann-Erickson, New York, handles.

Coca-Cola USA has not only brought back original Coke to the American marketplace but also the kind of traditional soft-drink advertising that it had been trying so hard to replace over the past few years.

The new campaign also drops any distinctions between Coke and Coke Classic by showing both products in commercials in an effort to project the image of a single brand.

The Atlanta-based soft-drink marketer previewed a series of four new spots with new music and a new theme, "We've got a taste for you," at bottler meetings across the country last week. The company also showed new spots for Cherry Coke, Sprite, Diet Coke and those that have just broken for Minute Maid orange soda (AA, Sept. 9).

The Coke advertising is more akin to the kind of commercials the company was airing several years ago before it took a more aggressive, ultra-contemporary approach to meet Pepsi-Cola on Pepsi's turf.

A return to "traditional values shown in a contemporary way" is the way Sergio Zyman, senior vp-marketing, Coca-Cola USA, describes new Coke advertising, set to break next week on network tv.

Mr. Zyman suggested that the message the company is trying to convey is more important than any memorable theme line, and he is unconcerned whether the phrase will be displayed on t-shirts, trucks and sundry other items across the country, the way "Coke is it" was.

"For so many years we've been telling consumers that Coke belongs to them," Mr. Zyman noted. Coke learned that its message was getting through loud and clear only last spring after the soft-drink marketer took away the product it had been selling all these years.

"With the events of the past few months, people have said, 'It's *my*

Average prime time 30: $118,840

By VERNE GAY
and CRAIG REISS

NEW YORK—The average price of a 30-second commercial on prime time network tv during the fourth quarter will be $118,840, or 14.2% more than last season's $104,000 average, according to estimates by ADVERTISING AGE. (Complete table on P. 128.)

While it was expected that the price of network tv would increase this season, several milestones were set in the fall pricing wars. These include:

- NBC, following its ratings rise last season, has passed ABC as the second-highest-price network, with an average 30-second prime time spot costing $118,100. ABC dropped to an average $117,700, while CBS continues to lead at $120,700.
- Two shows this season will crack the $200,000-per-30-second barrier. They are "The Cosby Show" on NBC, the most expensive tv show at $270,000, and ABC's "Dynasty" at $225,000. The highest-price shows on CBS are "60 Minutes" and "Dallas," both getting $195,000.
- CBS' "Magnum, P.I." dropped to $110,000 from $130,000 after a season against "Cosby." The impact "Cosby" had on "Magnum" is seen in the prices still garnered for "Simon & Simon." Despite having "Magnum" as a lead-in, "Simon" is getting $180,000 per 30.
- The richest nights of the week are Sundays and Thursdays, with the networks' potential $36.1 million and $32.8 million, respectively, each week.
- In terms of revenues, CBS will win Sundays and Fridays; NBC will win Tuesdays and Thursdays, and ABC will win Mondays,

GM to spend big to recover share

By JESSE SNYDER
and RAYMOND SERAFIN

DETROIT—General Motors is preparing a "whatever it takes" marketing effort to recapture share in an increasingly competitive auto industry.

GM's five car divisions have set 1986 model-year sales goals of 500,000 additional vehicle sales in a market that chairman Roger Smith says probably will be lower than 1985's projected 15.4 million cars and trucks.

GM's share of the total U.S. car market fell from 45.5% for the first eight months of 1984 to 42.7% for the same period in 1985.

Marketing executives at GM divisions, who are given more clout under GM's reorganization, blame the loss of share on more than last fall's labor strike. They claim competitors are outspending GM in ad-

General Foods serves Tang to O&M

WHITE PLAINS, N.Y.—General Foods has moved Tang powdered breakfast drink to Ogilvy & Mather, New York, from Young & Rubicam. A spokesman said the move, effective Sept. 30, was made to reduce the number of agencies handling beverages, now divided among Benton & Bowles, Grey Advertising and O&M. During the past 18 months, Y&R has received six new-product assignments from three other GF divisions, plus GF's Ronzoni Foods. Tang's measured media support last year was $8 million, says Leading National Advertisers.

Armour Meats breaks $10M campaign

BALLWIN, MO.—ConAgra's Armour Processed Meats unit on Oct. 21 breaks a $10 million network tv campaign for its five-item lower-salt line. More than 200 million coupons and $1 million in sampling also support, via Bozell & Jacobs, Dallas *(see related story on Page 2).*

CBS takes stand-alone 15s for split-30 slots

NEW YORK—CBS-TV Network on Sept. 30 will begin accepting two stand-alone 15-second spots from different advertisers in all ad time currently available for split-30s from a single advertiser. The stand-alone 15s had been restricted to news and sports breaks but now may run in as much as 25% of CBS inventory. However, there can be only one set of 15s per commercial break.

HIGHLIGHTS

Coke goes for classic ads 1

Coca-Cola USA has not only brought back original Coke to the American marketplace, but also the kind of soft-drink advertising that it had been trying so hard to replace during the past few years.

Pricy prime time: +14.2% 1

The average price of a 30-second commercial on prime time network tv during the fourth quarter will be $118,840, or 14.2% more than last season's $104,000 average, according to ADVERTISING AGE estimates.

Needham wins Y&R's chips 3

Frito-Lay's choice of Needham Harper Worldwide to succeed Young & Rubicam on its estimated $17 million snack-food account caps nearly two years of frustration between the client and its agency.

Coors sees the Light 3

Adolph Coors Co. says it will increase ad spending by 50% in the next year for its fast-growing Coors Light brand. That heftier budget will fuel the "Silver Bullet Bar" campaign.

Playing chicken in the market 4

The leading fresh-chicken marketer, Holly Farms Poultry Industries, and a key eastern rival, Perdue Farms, are about to see who squawks the loudest when it comes to new products.

Ross Roy rolls 6

Griswold Inc., Cleveland, will become a wholly owned subsidiary of Detroit-based Ross Roy Inc. in a merger that will move Ross Roy to among the 25 largest U.S. agencies, with projected 1985 billings of $328 million.

Political ads on the spot 10

The 30-second political spot was boiled in congressional oil last week when a Senate committee began analyzing the state of political advertising. With the advertising industry keeping a discreet distance, the Senate commerce committee opened a series of hearings on a bill to curb what many legislators see as an epidemic of political advertising excesses.

'Good Food' on menu 14

Can Triangle Communications put the "good" back into *Good Food*? The publishing giant began looking to answer that question last week as it kicked off its reintroduction of the food and cooking monthly.

Vision quest 60

Powerful vision is the first ingredient in reinventing the corporation, according to John Naisbitt and Patricia Aburdene, authors of "Re-inventing the Corporation." That vision usually comes from a person with the mental power to create a vision and the practical ability to bring it about.

Ad of the living dead 92

Control Data Institute vividly shows the deadening effect of do-nothing careers in a 60-second ad by Bozell & Jacobs, which shows wide-eyed zombies stiffly marching through fog to work—their desks draped with cobwebs. As the camera focuses on an employe with blackened eye sockets, an announcer intones, "A mindless job drains the life right out of you."

S&l 'holds' WRG/West

American Savings, Stockton, Cal., says its relationship with Wells, Rich, Greene/West, Los Angeles, is "on hold," as it evaluates its future. American Savings senior vp-advertising/marketing Clyde Hendricks acknowledged the s&l had fired the agency earlier in the week, but said it had decided to allow WRG/West an opportunity for "further dialog." Mr. Hendricks said American Savings had considered taking its estimated $8 million in-house. There is speculation it also may consider shifting its account to Cohen/Johnson, Los Angeles, the agency formed a few months ago by two former

(Continued on Page 126)

Rayovac back on beam in battery market

By LAURIE FREEMAN

Shares of the battery market

Battery	Company	Market share	Sales (millions)	Agency	Ad budget (millions)
Duracell	Danbury, Conn.	48%	$1,100	Ogilvy & Mather, NY	$28
Eveready "Supercharged"	Eveready	42%	966	William Esty, NY	22
Rayovac	Rayovac	10%	230	Leber Katz Partners, NY	15

Rayovac Corp., the battery company whose products virtually disappeared from retail shelves a few years ago, has recharged its marketing approach in an effort to break the cast-iron grip of Duracell and Eveready on the estimated $2.3 billion market.

Madison, Wis.-based Rayovac apparently has solved its distribution problems, modernized its battery packaging, brought its advertising up-to-date and is now ready to take on the big players.

Where once the privately held company teetered on the brink of financial ruin, it currently reports positive sales growth, with sales expected to reach $230 million this year.

Rayovac's estimated $15 million ad budget lags behind the estimated $28 million spent by Dart & Kraft-owned Duracell and $22 million for Union Carbide's Eveready. But it won't be long before it matches the others, ad dollar for ad dollar. "We're in a building process right now and we'll build our advertising as we strengthen distribution," said Bob Zimmerman, marketing director-batteries.

The aggressive, new Rayovac reflects internal changes made since Inco International Nickel sold the company almost three years ago to Thomas Pyle, now Rayovac president and ceo, and two other East Coast-based investors, Lionel Sterling and Robert Goergen. At the time of the purchase, Rayovac was losing a reported $25 million annually.

Under Inco's guidance, industry observers say Rayovac placed too much emphasis on production and not enough on marketing and advertising. One result: As the company stopped ad support, Rayovac lost retail shelf space as merchants refused to stock the batteries.

Getting Rayovac's batteries in stores and bringing the company's marketing abilities up to modern standards were Mr. Pyle's top priorities. Putting the batteries back on retail shelves apparently was the easy part, starting with a companywide, grass-roots effort.

Employes were given business cards to help promote sales. The cards read "I am an employe of Rayovac, I shop in your store and I'd like to see Rayovac batteries in the store."

"Some distributors were swamped with the large number of cards they received, and that convinced them to carry our products again," said Judy Pyle, Rayovac vp-marketing and Mr. Pyle's wife. Rayovac batteries can now be found in most stores nationwide.

Next, the company unleashed newspaper ads in Wisconsin papers only, promoting its batteries and offering free Wisconsin tourism-promotion kits.

After drumming up local support for the batteries, Rayovac also committed itself to a new packaging and display program. The company has put AA, C and D batteries in groups of six or eight, alkaline or heavy-duty, in a zip-tab package called "Smart Pack"; this lets consumers remove the batteries as needed. "We hope to encourage volume purchases of batteries," Mrs. Pyle said.

The company also expects the easy-to-handle-and-stock packs will challenge sales of the familiar carded products. In the future, the company expects the Smart Pack concept to convert many impulse battery buys into planned, household necessities.

Finally, in support of its behind-the-scenes reorganization, Rayovac last year launched its first network tv and radio campaign, using slice-of-life vignettes and a fantasy element, said Cynthia Perry, Rayovac vp-account supervisor, Leber Katz Partners, New York.

One 60-second spot shows a young boy enjoying his first backyard campout. He "hears something go thud, and he turns on his Rayovac-powered flashlight—which turns into a 'Star Wars' laser sword," said Ms. Perry.

Rayovac's creative strategy targets battery ads to heavy users with strong, long-term potential, those who are hooked on various portable power devices such as Walkmans. Copy for all the spots includes the theme "We give you the power to enjoy every hour . . .Rayovac, the battery that's power packed."

NOW! THE LONGEST LASTING ENERGIZER EVER.
NOTHING OUTLASTS IT.
THE NEW "AA" ENERGIZER
DURACELL IS PLEASED TO ANNOUNCE SOME VERY BAD NEWS.
The New Copper Top

Eveready recently introduced its "Supercharged" Energizer batteries (l.) with Olympic gold-medalist Mary Lou Retton as the product's spokeswoman. This fall, Duracell is introducing a new, improved "Copper Top" battery. William Esty, New York, handles Eveready; Duracell battery ads are handled by Ogilvy & Mather, New York.

"Consumers have often believed that batteries were a necessary evil, a purchase required when their radios no longer played. We want to turn a negative purchase into a strong, positive one," said Mrs. Pyle.

Tv spots and print ads in major consumer magazines will promote the Smart Pack in a media schedule running through the beginning of next year.

Now is perhaps the best time for Rayovac to make its comeback bid. The battery market is growing at a brisk 10% a year, spurred by the proliferation of battery-operated devices.

Alkaline batteries hold 75% of sales in the estimated $2.3 billion industry and account for 60% of unit sales, a Duracell spokesman said.

According to a study commissioned by Rayovac, the average household uses 26 batteries a year; heavy-user households, 20% of the total, use 92 batteries annually to power "boom boxes," personal stereos, smoke detectors, garage-door openers and toys. An average household contains nine battery-powered devices.

Eveready and Duracell aren't in permanent storage while Rayovac makes its bid, however. Eveready recently introduced its "Supercharged" Energizer batteries, with Olympic gold-medalist Mary Lou Retton as the product's spokeswoman.

The Danbury, Conn.-based subsidiary of Union Carbide is telling the trade, "the new Energizer advertising will focus on the long-lasting energy of Mary Lou Retton and America's newest bundle of energy—the Energizer now supercharged 'AA' battery." The ad schedule includes network and cable tv, including time bought on prime time shows "Miami Vice," "Hill Street Blues," "The Bill Cosby Show" and "Magnum, P.I."

Full-page, freestanding insert ads, which broke Aug. 25, will appear in Sunday newspapers through the beginning of next year. Each insert contains a 25¢-off coupon.

William Esty, New York, is the Eveready agency.

A bright-yellow "Now Supercharged!" banner has been put on the front of AA battery packages.

Eveready also is seeking to raise consumer awareness of the necessity of batteries by reminding consumers that more than 800,000 blackouts occur in the U.S. annually.

Duracell this fall is introducing a new, improved "Copper Top" battery, "a battery so highly improved no other alkaline battery can touch it. A battery so much longer-lasting, it has the power to create a whole new franchise among regular carbon-battery users," the company is telling the trade.

The Copper Top is Duracell's familiar copper-and-black battery, containing "additional active chemical ingredients, allowing a 30% greater life span," a company spokesman said.

Duracell expects the upgraded battery will win market share from the heavy-duty, zinc carbon battery category.

Marketing plans for the reformulated battery include the company's "heaviest media schedule ever," the spokesman said. Network tv spots break in mid-October, "reaching 160 million people an average of five times." A nine-week prime time tv and print campaign, with ads in 12 major consumer magazines, "will reach virtually all U.S. households more than 30 times."

The company also is running its first-ever trade print campaign, in publications such as *Supermarket News*. A schedule of fsis offering 25¢-off coupons will break in October and run through December.

Duracell again will hold a sweepstakes in the first quarter of 1986, although the company declined to release further details. Last year, Duracell ran a 10% savings rebate and the "It's Christmas Again $250,000" sweepstakes. The savings rebate program offered cash rebates of up to $5 when batteries were purchased and small Christmas gifts. The sweepstakes promotion, with in-store entry blanks, offered a chance to win a $1,000 shopping spree.

Duracell battery ads are handled by Ogilvy & Mather, New York; advertising for Durabeam flashlights is done by Jordan, Case, Taylor & McGrath, New York.

Three newcomers to the American battery market, Fuji, Panasonic and Toshiba, are struggling to gain retail space.

Secaucus, N.J.-based Panasonic is concentrating on its new rechargeable line. The nickel cadmium batteries come in a range of sizes and can be charged, used and recharged up to 1,000 times for up to 10 years, the company said.#

Newspaper ad spending slows in June

By WILLIAM F. GLOEDE

New York—Daily newspaper advertising in 15 major markets began its summer slowdown in June, with eight of 16 measured categories showing decreases from June, 1984, according to the Advertising Age Flash Report from Media Records Inc.

Over-all spending increased $45.1 million to $265.6 million.

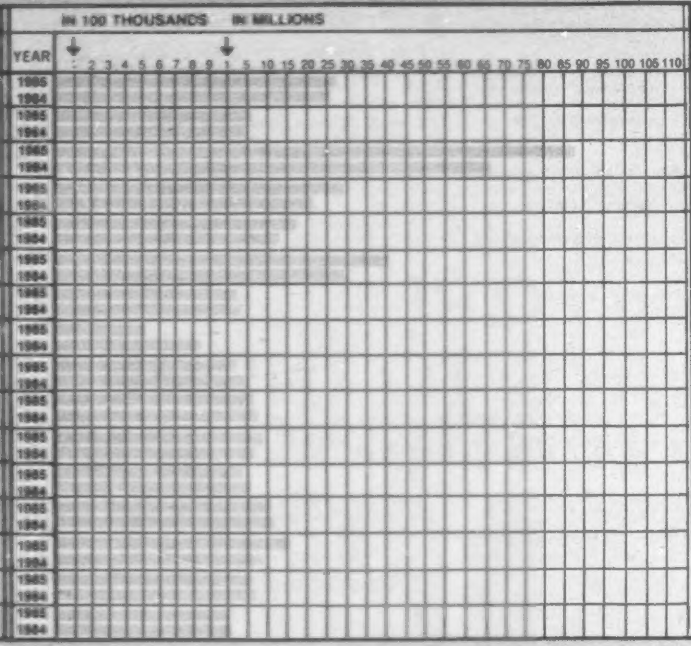
Department stores, the largest newspaper advertising category, led the gainers in dollar volume with a 31.9% increase to $87.5 million. Food stores followed closely with a 31.8% increase to $29 million, and general-merchandise stores chalked up a 37.1% increase to $40.8 million. New-car advertising led all categories in percentage increase, rising 67.4% to $15.8 million.

Other categories with gains were amusements, up 5.8% to $27.3 million; computer stores and supplies, up 3.8% to $5.0 million; radio-tv-phonographs and records stores, up 34.5% to $17.3 million, and publishing and media, the only national category to post an increase, up 18.4% to $9.4 million.

Losing categories included alcoholic beverages, down 32% to $2.6 million; cameras, photo supplies and services, down 39.8% to $503,604; computers, equipment and services, down 48.8% to $2.5 million; public service utilities and commissions, down 24.1% to $5.85 million; cigarets, down 20.7% to $4.3 million; airlines, down 7.7% to $10 million; banks and trust companies, down 0.8% to $6.3 million, and stock, bond and investment houses, down 11.1% to $1.4 million.

The Flash Report is based on linage measurements in 27 daily and 23 Sunday newspapers in 15 major markets.#

FLASH REPORT: Newspaper advertising investment for June



June 1985 CATEGORIES	YEAR	DOLLARS 1985	 1984	CHANGE ACTUAL $ G OR L	 % G OR L

End urged to Swiss media rule

By JOHN PARRY

Geneva—In a book that has hit Swiss media circles with a massive bang, a Geneva lawyer has called for abolishing state control of radio and tv broadcasting in favor of U.S.-style free enterprise.

Radio and tv journalists in Switzerland cannot work with the same freedom as their colleagues in the print media because they are hamstrung by government control, Charles Poncet said in his book "State Control of Information in the Media."

He said the state-run radio and tv networks should be dismantled and private enterprise allowed free rein.

A state monopoly on broadcasting is valid in Switzerland as long as only the state has the means to use these communications tools, Mr. Poncet said.

But the proliferation of privately owned local radio stations in the past few years and the increasing possibility for Swiss tv viewers to watch private satellite tv stations means that the old state monopoly is out of date, he said.#

CBS likes ex-Taft stations as they are

By VERNE GAY

New York—When CBS bought five radio stations from Taft Broadcasting Co. for $107.5 million Aug. 1, the word was that wholesale changes were in store. Formats would be changed and managers would be removed, as CBS put its stamp on the new group.

Or so the predictions went. But in fact, virtually nothing has changed at the stations. Probably, nothing will.

"It was incredible," said Robert Hosking, president of the CBS Radio division. "I could not convince anybody that this was not going to happen. . .It would be like buying Pepsi-Cola and making it into root beer."

Not that CBS Radio shuns change—the division has undergone some dramatic changes in the past few years and with the Taft buy became the largest U.S. radio operator, with revenues near $200 million. Mr. Hosking claims that little needs fixing at the new group—which is why CBS purchased it for a record price.

The purchase reflects a strategy Mr. Hosking has followed since taking the helm of the radio group in 1981: To diversify and grow where the markets, and the advertisers, are.

The Taft purchase most clearly reflects that strategy. The stations are mostly in the Sunbelt (CBS' other stations are in eastern, West Coast and Midwest markets) and their formats are "light rock" or news (most of CBS' stations have "contemporary hit radio" or news formats). CBS now owns six am news/talk stations and 12 fm stations, five of which are contemporary hit radio. The Taft stations (three were spun off from Gulf Broadcast Co. after Taft recently purchased that company) are in Washington, Tampa, Houston and Dallas.

"Managing a large radio group today is like managing a financial portfolio," said Mr. Hosking. "[The Taft stations] provided a geographical balance to spread out our risk [and] the formats give us a much better balance. . .We now have a whole spectrum."

This "whole spectrum" helps remove the peaks and valleys in advertiser demand from one year to the next, said Mr. Hosking. A recent fallout in computer advertising hurt sales on stations that skew toward older audiences. "From year to year you can pick up heavy fluctuations in radio [advertising]," he said. "Right now the greatest demand is in that center area, the 25-to-54 [age group]."

Growth for the CBS Radio group has not been without controversy. When it announced the decision to buy the Taft group in April, some analysts said CBS was loading itself with debt to curtail efforts by Ted Turner to take over the company. Mr. Hosking denied this. He said he had been looking for ways to "balance" the radio group via a major purchase since February, before the Turner bid.

"It's true this was handled during the Turner bid, but that was happenstance, not by design," said Mr. Hosking. "We wanted to expand and this was one of the most unique opportunities to come along. This was the largest station group that did not conflict with what we already had—there were no conflicts. It was a perfect fit."

Now, CBS plans to continue to add pieces to its growing radio empire, despite a corporate clamp on costs. The company, which has narrowed future growth to the top 25 markets, does not yet have a media presence in Detroit and may explore future opportunities there. Four radio stations recently have come on the market in Detroit as a result of the merger between Gannett Co. and the Evening News Assn., which also publishes the *Detroit News*.

CBS has targeted two other areas for future growth: Radio networking and representation. The CBS radio network now has 400 primary affiliates for its news feeds, but opportunities for significant growth lie with RadioRadio, the youth network that feeds regular and occasional programing to more than 1,000 affiliates, said Mr. Hosking. The networks, which Mr. Hosking says are in the black, contribute about one-third to the division's total revenue. Like the owned-station operation, the networks are tailored for a variety of different formats.

"Top 40 Satellite Survey" is geared for contemporary hit radio stations and "Top 30 USA" is tailored for adult-contemporary stations. However, "Entertainment Coast to Coast," a music and talk feed, has found a berth on 125 affiliates with a variety of formats. Other similar networks are planned.

"We will continue to roll these things out until we roll one out people don't want," said Mr. Hosking.

CBS Radio also lays claim to the last of the broadcast-managed representation arms. The other networks backed out of the representation business over the last decade. CBS has a "short list" of 42 stations and wants to add another three. The company decided to stay in the business when it found there were opportunities for expanding in top markets. "Many stations are unhappy with their reps," said Mr. Hosking.#

'Super radio' gets static

Crain News Service

"Super radio" has turned into a super headache for its proponent, the National Radio Broadcasters Assn., following an industry association meeting at which the idea met with a chilly reception.

The mere suggestion of merging existing groups into a single new "super radio" trade association had some industry leaders so angry there was talk of canceling next year's joint radio convention, only the third one since the National Assn. of Broadcasters and the NRBA reconciled.

Peter Ferrara, NRBA exec vp, admitted his organization was "very disappointed" by the reaction of the other groups at the meeting.

Attendees, which included representatives of the Radio Advertising Bureau, the Radio Network Assn., the Radio-Television News Directors Assn. and Broadcast Financial Management Executives, among others, voted down a recommendation by NRBA president Bernie Mann to establish a committee to explore the proposal.

"What it's boiling down to," Mr. Ferrara said, "is either we're ahead of the times or behind the times with this idea."

But, he added, "the unfortunate thing is that those people in the room—rightfully so—are not going to be too terribly open to the idea" of folding their own organizations.

"I thought it was a healthy exercise to get that many people from that many groups in one room to discuss ideas," said Bill Stakelin, president of the Radio Advertising Bureau. "My disappointment stems from the fact that it didn't seem like there was any room for compromise or movement."#

CHINA: A new frontier for advertisers

By LYNNE REAVES

BEIJING—"Beijingexpressaircargodeliveryservice."

This English lettering painted in red on the door of a fast-moving rusty van makes a New Orleans man do a double take as he walks down Jianguomenwai Street in the heart of China's capital city.

"Advertising has come to China," he laughs. "But, it can make you dizzy."

The air cargo sign may be a crude attempt, but the fact that it is allowed at all in this communist nation of 1 billion people is significant.

Advertising has not only returned to the most populated country in the world, it has been encouraged by both foreign and domestic companies. In fact, Chinese officials say their country, under the pragmatic leadership of Deng Xiaoping, spent $20 million in 1984 advertising Chinese products outside the country.

Several dozen foreign companies, led by the Japanese, are splashing their names on outdoor boards and in tv, newspapers and magazines all across China. Although many of their marketing strategies still are in the infancy stage, all see their presence here as a foot in the door and a foundation for a possible windfall.

"The past few years have proven there is a place for advertising in China. The only questions now are timing, and how sophisticated the audience is," says Cecil Yow, account director at Leo Burnett Co. in Hong Kong. "A lot of our clients have shown an interest in advertising in China, and with that many potential consumers no one can afford not to show an interest in it."

First popularized by foreign tobacco and petroleum companies, advertising was practiced by Chinese and foreign companies around the turn of the century. But when the communist state was founded in 1949, advertising was branded a capitalist tool and prohibited for more than a generation.

Millions of Chinese still have never heard the name "Coke" and don't know if McDonald's sells hardware or hamburgers, but advertising has taken off at a pace no one would have dreamed possible when the advertising ban was lifted in 1979.

Its rebirth is just one element in China's daring massive modernization drive aimed at erasing the nation's "developing country" label.

The drive began in 1979 with the end of the cultural revolution and has resulted in an unprecedented surge in wages, prices, production and retail sales.

China's leaders say advertising fits into the reawakening of the country's economy because it not only stimulates sales, but teaches Chinese consumers and business leaders about developments in the rest of the world during the past 30 years.

Still, advertising in China is not without its rules, although the Marlboro man did ride briefly across tv screens in southern China in 1979. Today, tobacco and liquor advertising are banned except in hotels where foreigners stay and in stores where only foreigners can shop.

There is no central media censorship body and each medium is responsible for censoring the advertising it carries, but the government urges that advertising not affect political, moral or social climates.

For the most part, all advertising, even by non-Chinese companies, is fairly basic.

At Ogilvy & Mather, clients are advised to adhere to the following guidelines: "Keep advertising straightforward, factual and single-minded. Interpretation of advertising is extremely literal and it is not desirable to attempt analogy, or humor of any kind.

"Emphasis should be given to performance, quality and durability."

"The Chinese are still very suspicious of fast-talking foreign salesmen," says Harry Reid, regional director of Ogilvy & Mather Worldwide in Hong Kong.

Hong Kong serves as a gateway to China for many areas of foreign business, and advertising is no exception.

A handful of agencies in Hong Kong, led by Interpublic-Jardine and Ogilvy & Mather, are working aggressively with foreign companies in China.

An outdoor board for Sony in Beijing illustrates Japan's strong marketing presence in China.

"Advertising in China is the same as advertising anywhere else," insists Doug King, managing director of Interpublic-Jardine. Interpublic is the only western agency to have registered representative offices (although not full-service agencies) in China. Through its joint venture status with Jardine—one of the oldest China trading companies—it has offices in Beijing, Shanghai and Guangzhou (Canton).

"Before you can be successful in China," Mr. King says, "you have to know your objectives—just like anywhere else. The biggest problem foreign companies have is not setting specific objectives in China. The one billion consumers there makes sense, but only if you know what you are doing."

Mr. King points to his client, Eastman Kodak, as one of the foreign companies that has approached the China market correctly. He said the company started advertising in a Chinese photo magazine in 1979, and now runs a multimedia campaign, including tv. "Kodak is one of the brightest success stories in China," Mr. King claims. "They sell more film in China than in Hong Kong."

A typical Kodak tv spot produced in Hong Kong for the southern China market shows a well-groomed young man snapping photos of his girlfriend and relatives.

"The thought process in making this commercial is interesting," says Mr. King, who speaks Mandarin Chinese fluently. "Kodak does a lot of its advertising based

Guidelines for U.S. marketers planning to expand in China

By ARNE J. DE KEIJZER

What can U.S. companies expect when they try to enter the Chinese marketplace?

Certainly not business as usual. Although China offers vast new opportunities for American marketers, it would be naive for Americans to envision a land of one billion hungry consumers buying aspirin, lipstick and chocolate-chip cookies.

Here is a thumbnail sketch of how doing business in China is different from operating in other nations, along with a handful of tips that U.S. marketers should keep in mind before trying to set up business in China.

To begin with, China is an agrarian, semi-industrial country where 80% of the people toil to feed 22% of the human race. It is a land where cultural custom dictates business dealings rather than legal convention. In China, cobblers and peddlers still ply their trades just outside a biotechnology laboratory.

Consumer demand in China can be exercised only within the confines of an average urban annual income of $300—none of it in the foreign exchange needed to buy western products. Here, Avon does not come calling and washday miracles usually are performed in a wash basin.

Given this environment, how can a company best establish a presence?

There are no hard-and-fast rules. Even "China hands" get surprised. I once briefed a client on the ritual of a Chinese business meeting (interminable cups of tea and endless circumlocutions by protocol-conscious bureaucrats) only to find that, once in Beijing, our Chinese host whisked us off to the bar of the Great Wall Hotel for a business meeting that took but 15 minutes over a double shot of [illegible]. Even so, there are several aspects of business protocol that should be heeded.

> "More than anything else, U.S. marketers should guard against false expectations and impatience. These are the most frequent causes for failure."

For example, more than anything else, U.S. marketers should guard against false expectations and impatience. These are the most frequent causes for failure.

Some Chinese friends once shared a story about an American shoe manufacturer who wanted to form a joint venture. During the first meeting he spent three hours detailing the terms and conditions he would accept. He concluded by saying that since he was leaving China two days hence, he had to have an answer in 24 hours. The Chinese politely said they would study the proposal and the American left the meeting feeling encouraged. Immediately after he left, the Chinese threw away their notes and left instructions never to deal with him again.

So what does work? The first rule is careful preparation. It is a remarkable phenomenon that companies that normally act cautiously forget. As the old song has it—the best way to get to China is by slow boat.

This is all the more surprising since good market research is available. Many U.S. companies, such as Coca-Cola, Boeing and General Foods, have already had direct experience marketing in China, and consulting companies have begun to work with Chinese counterparts on everything from consumer spending habits to factory feasibility studies.

A second rule is to find the right partner. In the early days of U.S.-China trade (1970s) companies dealt mainly with one of a dozen government-run trading corporations.

Now there are more than 800, and China's current open-door policy means that everyone from ministry officials to mayors, from factory managers to self-appointed consultants, will deal with foreign companies. One finds, too, that business is being done not only in Beijing, Shanghai and Guangzhou, but also in quite remote places such as Ningbo, Qingdao, Kunming and Chengdu.

Third, limit your exposure. That

Chinese media a quagmire for outsiders

By LYNNE REAVES

HONG KONG—Doug King snaps a smoldering cigaret out of his mouth and throws a copy of an American newspaper article down on his desk.

"This is rubbish. Unbelievable. Where did they get these figures?" demands the managing director of Interpublic-Jardine, one of the leading Hong Kong advertising agencies doing work in China.

Mr. King was staring at a copy of a story in the *Asian Wall Street Journal* about China tv that reported a U.S. company with ties to China Central Television was selling 60-second spots on the national channel for $35,000.

"This is ridiculous," Mr. King snarled. "You can buy that same ad time directly from CCTV or through us or other agencies at about $4,000 for 30 seconds," he says. "We spend a lot of time here studying the media in China. You have to, to do it right."

Indeed, the media available in China are a bewildering assortment that has scared away some foreign advertisers. Foreign companies are faced with hundreds of newspapers and magazines that can offer regional or national campaigns. Plus there are dozens of local and national tv and radio stations selling ad time.

How does a Texas businessman know whether he should spend his advertising dollars to try to reach the 5 million readers of *People's Daily* at about $63 a column centimeter, or go after the 16 million viewers of Shanghai tv for $1,200 for 30 seconds?

"Advertising can be very effective if it is done with planning in China," says Tom Gorman, president of Hong Kong-based China Consultants International. "But a lot of people are wasting a bunch of money in China doing it the wrong way. The president of a big company wakes up on a Sunday morning and reads a *New York Times Magazine* story about how China is the hottest thing since sliced bread and starts throwing his company's money at China. It is not difficult to waste a lot of money very quickly in China."

Coupled with the problem of selecting from the array of media is the unsettling fact there is very little readership or audience data available. No national media surveys have been conducted, although one-time surveys are being carried out in some cities.

"There are no properly audited figures, but some stats are out there," says Ronald Cromie, China affairs director of Hill & Knowlton. Hill & Knowlton in January became the first international public relations company to open an office in China. "They are not of the statistical standards that you would find in the U.S., but some information is around and we can spend a good deal of time trying to find it for some of our clients," Mr. Cromie said.

A foreign company can go directly to a newspaper, magazine or tv station and place an ad. However, because of the complexities of China, most turn to one of a handful of ad agencies that specialize in the China market or go to one of China's government-controlled advertising corporations, which can also place the ads.

All foreign ads are paid for in the currency of the nation buying the ad. Local businesses pay in local currency and pay lower rates. Advertising by joint ventures in China is handled on a case-by-case basis, with the price and type of currency to be negotiated.

While there is no central Chinese media-censorship body for ads, each publication or station is responsible for censoring its own contents.

In 1982, the government did say that advertising should be clear and truthful and should not "hoodwink or deceive end users and consumers." The government also said advertisements should not contradict state policies, divulge state secrets, be harmful to the dignity of China nationalities or be reactionary, obscene, crude, superstitious or slanderous.

Most products, even many that are not available to the average Chinese, can be advertised, but cigarets, wines and liquor cannot, except in hotels where foreigners stay and in stores where they shop.

Tv is one of the big growth areas for advertisers in China today. Watching the tube has become so popular some Chinese call it the new national pastime. There are 56

(Continued on Page 78)

The People's Daily, China's leading newspaper, also distributes an overseas edition.

China's media

TELEVISION

Tv is becoming the Chinese national pastime. According to the official Xinhua News Agency, 200 million Chinese watch tv, making them the world's largest viewing audience. There are 56 tv stations in China and advertising campaigns can be done nationally, regionally or locally. Major cities are served by two or three channels.

Station	Cover (million)	Cost of :30
CCTV Channel 2	300.0	$4,000
CCTV Channel 8	3.2	1,340
Guangdong TV (Canton)	50.0	1,413
Beijing Municipal TV	3.2	708
Fujian TV	9.0	398

NEWSPAPERS

There are hundreds of newspapers which accept advertising in China, however, reproduction generally is considered poor. The only English-language newspaper, *China Daily*, is headquartered in Beijing and distributed in a number of Chinese cities and several major western cities.

Newspaper	Circulation	Freq.	Rate/col. cm.
People's Daily	5,000,000	Daily	$63
Dianshi Zhoubao	3,000,000	Weekly	40
Jinle Zhoubao	3,000,000	Weekly	14
Worker's Daily	2,700,000	Daily	32
Broadcast & TV Weekly	1,800,000	Weekly	16
Economic Daily	1,500,000	Daily	28
Guangming Ribao	1,500,000	Daily	25
Xinmin Evening Pao	1,500,000	Daily	13
Sichuan Ribao	1,300,000	Daily	18
Beijing Ribao	1,200,000	Daily	38
China Daily (in English)	75,000	6/Weekly	8.50

MAGAZINES

Readers looking for an equivalent to Time or Newsweek in China will be disappointed. However, there is a mass of hundreds of magazines for advertisers to choose from. Most are considered trade publications, focusing on specific audiences. Prices are quote for four-color full-page ad.

Magazine	Circulation	Freq.	Back cover
Technical and Industrial Radio	1,300,000	Mthly	$3,710
Tourism World	350,000	Qtrly	2,085
Guangzhou-Arts & Culture	250,000	Mthly	1,580
Tour	800,000	Mthly	1,485
Mobile Technique	200,000	Mthly	1,413
International Aviation	75,000	Mthly	1,080
Exploration Engineering	35,000	Bi-Mthly	954
Foreign Metal Mining	33,000	Mthly	880
Hydraulics	40,000	Bi-Mthly	812
Yakajian (cultural magazine)	120,000	Mthly	553 (b&w)

on saving memories. Well, the Chinese don't want too many memories. Memories mean the cultural revolution, and they would happily forget that. What they want are today's memories—birthday parties, weddings—so you have to be very careful in choosing what is appropriate."

As western companies plan their advertising strategies for China, these companies often look to the Japanese to see what they are doing correctly because of their dominance among foreign advertisers in China.

"The top 10 advertisers in China are Japanese," says Mr. Reid. "The whole philosophy of the Japanese is different. They believe in the long term, and in China that is very important."

An example is Sony Corp., the Japanese electronic goods manufacturer. The company is a big advertiser in China and has a huge outdoor board in downtown Beijing that advertises many of its products.

The Japanese started advertising many of their products in 1979 before the goods were available in China. Now that the products are being sold, the Japanese have a clear edge over their competitors.

"The Japanese were very smart," says Mr. Reid. "I would certainly advise a western company that is serious about entering the China market to begin advertising their name now even if their products are not available. A lot of companies have a hard time understanding that no one in China has ever heard of them."∎

Guidelines

(Continued from Page 74)

Chinese saying about a long journey starting with a single step really does apply. Until both sides get used to each other, the less complex the project the better.

The Chinese have only limited experience with the flexible trade terms the open-door policy now permits, and the economy (as well as the culture) can absorb only limited change.

A fourth rule is to work at establishing a strong corporate presence. This lets Chinese at all levels know the requisite long-term commitment has been made.

A corporate presence means not only staff commitments and money, but also a willingness to work to establish a strong corporate image.

In the end, the rule that applies to any gold rush also applies to China: The prospector must be willing to take risks and live with the losses and frustrations associated with the search for a bonanza.

That the search is more than worth it seems abundantly clear from the growing list of consumer-product companies now staking their claims.∎

tv stations for advertisers to choose from. Rates vary significantly, but campaigns can be done nationally, regionally or locally.

According to the goverment's Xinhua News Agency, 200 million Chinese watch tv, the world's largest audience.

What they are watching has changed dramatically. Gone are the days when the only thing on the air was hours and hours of one party official reading the works of Mao. Today, while there is still some of that, there are movies, variety shows, sports broadcasts and cartoons.

Last year, China tv also began airing a 64-hour package of news, sports and entertainment programing from CBS. According to the *China Business Review*, CBS agreed to split with CCTV the revenues of the sale of 320 minutes of commercial time, which could be sold to as many as 10 foreign sponsors for as much as $300,000 for a 32-minute package.

Some of the biggest foreign companies advertising in China, such as Boeing and IBM, have bought time on the package as well as time on other Chinese programing.

> ***"When the Chinese find a response card to an ad in a magazine, they send it in, and they really expect to get something in response from the advertiser." —Tom Gorman, media consultant***

Advertising in trade journals

Trade journals covering a vast assortment of industries ranging from aviation and engineering to tourism and mining also are extremely popular in China, and some now-popular western products, such as Kodak cameras, first introduced themselves through the trade press. Many of the magazines do not accept full-color advertising, and the position of the ad in the magazine often is restricted.

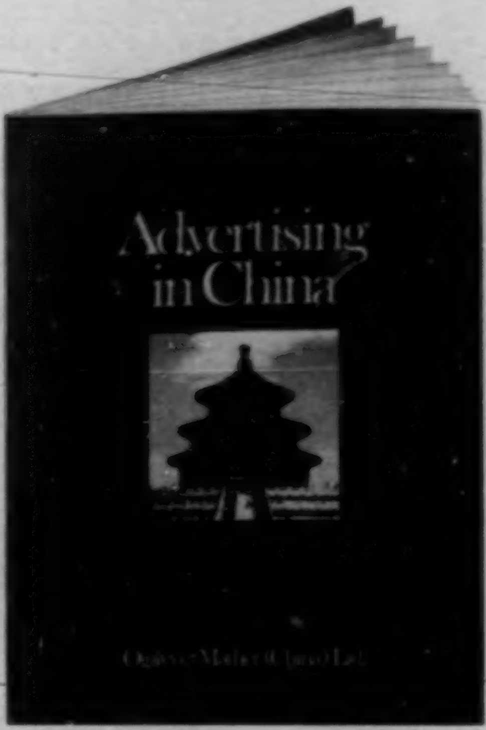
There also are a few western trade publications that are being translated into Chinese and distributed here.

Mr. Gorman's China Consultants International has a joint venture with McGraw-Hill to translate some of the publishing company's trade magazines (complete with ads), such as *Aviation Week*, and distribute them in China. This year, three issues of *Aviation Week* will be translated and sent to China, each with about 100 ad pages.

"The response to advertising in China is phenomenal," says Mr. Gorman. "When the Chinese find a response card to an ad in a magazine, they send it in, and they really expect to get something in response from the advertiser. If they don't get the catalog or whatever it is they were supposed to get, they keep writing until they do. Don't forget, the cultural revolution is not that far in the past. Ten years ago it would have been considered treason to respond to any foreign advertising."∎

The special section on China was written by Lynne Reaves, ADVERTISING AGE's Hong Kong correspondent and edited by John Wolfe, assistant international editor in Chicago. The package was designed by Bob Zeni, AD AGE graphics editor.

An invitation to profit from Ogilvy & Mather's close partnership with China



Over the last seven years Ogilvy & Mather has developed a relationship with China which, we believe, is unrivalled by any other international agency. We have summarized much of the knowledge gained in a new booklet. It is yours for the asking.

Our partners in China

Ogilvy & Mather is formally associated with China's eight major Advertising Corporations. This partnership has been of great benefit in developing programs for such clients as American Express, Boeing and General Foods.

We also work closely with three major Chinese Foreign Trade Corporations in the principal markets of the world. And we have, in fact, placed more international advertising for China than any other agency.

These close relationships have given us invaluable experience in working with China and in developing business contacts.

Our China company

We have been successful in China because we have been patient and worked to a considered, long-term plan. Our China company is based in Hong Kong and fully staffed with professionals who work solely on our China business.

Our newly published 20-page booklet describes the services Ogilvy & Mather offers to assist the marketing and advertising of products in China.

It explains why you should advertise to consumers in China, gives guidelines on creating successful advertising, an overview of media available, plus pertinent facts about China and this rapidly developing consumer market.

Send for your copy of *Advertising in China* today.

Tv pricing

(Continued from Page 1)

Wednesdays and Saturdays.

- If the networks were to consistently get these prices and sell out their inventories, the three-network total weekly revenues this fall could reach $196.8 million, although the actual figure will be less than that.
- If the networks were to sell out all 12 minutes of advertising per prime time hour and if they were to receive the rates shown in the accompanying chart (neither of which is likely), the maximum potential revenue for each network on a night-by-night basis would be:

Sunday: ABC, $11.5 million; CBS, $13.6 million; NBC, $10.9 million.

Monday: ABC, $10.7 million; CBS, $10.2 million; NBC, $8.5 million.

Tuesday: ABC, $8.2 million; CBS, $7 million; NBC, $9.5 million.

Wednesday: ABC, $12.7 million; CBS, $7.1 million; NBC, $8.5 million.

Thursday: ABC, $8 million; CBS, $11.2 million; NBC, $13.6 million.

Friday: ABC, $7.1 million; CBS, $10.3 million; NBC, $8 million.

Saturday: ABC, $7.8 million; CBS, $7.2 million; NBC, $6.2 million.

The average prices for 30-second prime time spots were culled from agency and network sources and reflect prices only during the fourth quarter, traditionally one of the most expensive periods. Each network has price "breaks" which reflect demand during a particular period. For example, prices plummet the beginning of January when advertiser demand is softest. Prices break upward in February, when demand picks up, then peak in April.

An especially strong schedule for one network on a given night can damage the competition's profit seriously. ABC has been a longtime nemesis for CBS on Wednesday nights, and CBS' prices reflect the problem. The network wiped its slate clean this season, and some advertisers were less than enthusiastic. One source insists he picked up some of the new shows for a "dime"—about $60,000 per 30 seconds.#

Advertisers holding on tv football buys

By ROBERT RAISSMAN

Tv ratings for football are rebounding from the disastrous 1984 season, but advertisers have been slow to return and pricing remains soft.

College football faces a more severe problem than the National Football League, and some agency executives say if the glut of college games isn't controlled, the sport could be heading for extinction on tv.

Steve Leff, exec-vp, Backer & Spielvogel, New York, said colleges will be forced to reevaluate their tv situation in the wake of the 1984 U.S. Supreme Court decision that ended the National Collegiate Athletic Assn.'s role as an exclusive broker of tv rights.

'Too much college football'

"I don't want to fly in the face of a Supreme Court decision, but unless college football does something to regulate itself, to clean itself up, in terms of the number of packages sold to different types of broadcast outlets, it's just going to kill the sport," said Mr. Leff. "College football doesn't perform badly [in terms of ratings], but there is just too much of it there and there are not enough dollars in the marketplace to suck it all up."

CBS and ABC, the two networks that carry college football, are a bit ahead of last year in terms of sales. "College football sales are better than last year," said Jake Keever, vp in charge of sales, ABC-TV Network. "The average unit cost is up 25%. But I'm not saying we don't have avails. I'm not saying the market is strong, but I feel that it is turning around."

ABC's College Football Assn. package prices 30-second spots between $35,000 and $40,000, while CBS is getting about $30,000. Network prices are slightly higher than last year, but stand-alone 30s may cost less because many college football buys are packaged with NFL ad schedules.

Some advertisers are playing a waiting game, trying to take advantage of the soft market. AT&T once again is withholding a substantial part of its sports budget—reportedly as much as 50%—with the intention of cutting deals on two and three-week mini-packages during the season. With the market soft and availabilities present close to game time, AT&T can "cherry pick" the best matchups as the season progresses. The strategy transfers the risk of living with a schedule set before the season from the advertiser to the network or syndicator.

Robert Watson, corporate media director, AT&T, declined to say how much of its sports budget was being held back.

Continues same tactics

"Basically, we are employing the same tactics we used in sports last year," Mr. Watson said. "We relied on the softness of the market to make some opportunistic deals. The football marketplace seems to be the same as it was last year."

Industry experts expect the sports market to tighten in November and December; in part, because sports will be used to cover "make-goods."

Most syndicators, as well as Turner Broadcasting System and ESPN, are feeling the softness in the football market, but not to the extent they did last season.

Fred Botwinik, president of TEN, a syndicator carrying eastern independent colleges, said the package is selling a bit better than last year because CBS Sports is not programing an early game in the East.

"Advertisers are also not confused as to who is carrying what, as they were last season, because there are fewer syndicators," Mr. Botwinik said. Mr. Botwinik said 30-second spots for the eastern games, which include independents Boston College, Notre Dame, Syracuse and University of Pittsburgh, are selling for $8,000.

Sales better than '84

Charlotte, N.C.-based Raycom, which syndicated this season's college opener, the Kickoff Classic, as well as the Big 8 and southwestern conferences and the University of Miami, says sales are ahead of last year.

Dee Ray, exec-vp, Raycom, said, "Last year was unusual because of the timing of the Supreme Court decision, but for the last seven years I've tracked sales and they are traditionally slow in September and October."#

Networks' 30-second price list, 1985-86 season

Despite NBC-TV's close second-place finish last season, CBS-TV remains the network getting the most dollars per 30-second spot in prime time. The following chart shows the average price of a :30 for every prime time network show during the fourth quarter, 1985. While the average network :30 this season costs $118,840 (up from about $100,000 last season), CBS' average is tops at $120,700, while ABC is last at $117,700. NBC averages $118,100. *Advertising Age* culled these prices per program from interviews with agency and network sources.

Coloring

(Continued from Page 2)

lightening their hair (AA, April 1).

Clairol's and Sassoon's new products fall into two camps: Permanent hair coloring that has to grow out, and temporary coloring that washes out after shampooing.

Ultress, a permanent gel endorsed by "Dynasty" star Linda Evans, is seen by some as Clairol's first major new-product broadside against L'Oreal, which has been tenaciously pursuing Clairol.

L'Oreal first pitted its Preference against Nice 'n Easy and then set Avantage on Clairol's Loving Care. The result so far has been a slow but steady increase in L'Oreal's market share to 23.3%, leaving Clairol with a decreasing but still dominant share of 60%.

Some financial analysts fear Ultress may cannibalize Clairol's Nice 'n Easy, but chain drug retailers point out that Ultress, with a price of about $4.80, will cost about $1.50 more than its sister brand (about $3.35). The only other major brands that sell for $4-plus are Preference and Avantage.

At Vidal Sassoon, whose products are referred to as "color without commitment," the focus is on easy-to-apply, rub-in and wash-out temporary color. The Sassoon product will cover gray and last through eight washings, says Sassoon president Peter Wilson.

Among the advantages of temporary color products, he believes, is that "they are quick, one-step operations. . .Most younger women today want subtle highlighting or color, which they view almost as a fashion accessory."

Sassoon could be onto something. Salomon Brothers vp Diana Temple calls Chattem's Sun In the biggest competitive surprise of 1985. Though its share is small (4.5% in supermarkets), it is up three points this year compared with two point declines each in the same retail outlets for Clairol and L'Oreal. Sun In dollar sales are up 40.1%, according to Ms. Temple who believes this suggests that women may indeed "prefer a more natural method of hair coloring."

The dogged competitiveness between L'Oreal and Clairol on existing brands, intensified by the rush of new products, is driving ad spending up in the category. In 1984, according to Leading National Advertisers, almost $41 million was spent, 71% of that by Clairol alone. This year, Salomon Brothers vp Patricia Lea is projecting category spending of $57.5 million, 65% which she thinks will come from Clairol. She sees Clairol spending will be up to $37.5 million this year from $29 million last year.

The Ultress commercial, breaking today, shows Linda Evans at a party with six other top fashion models, including Tara Shannon, as Ms. Evans tells viewers, "Let's face it: 40 isn't fatal." Print advertising will begin later this fall, tying in with a coupon drive in November.

Mr. Wilson said the Sassoon print and tv advertising, scheduled to be shot in October, will begin running around March, 1986. Handled by Peter Rogers Associates, New York, Mr. Wilson said the ads will be "very fashionable, very stylish."#

Ogilvy taps Bowen

New York—Ogilvy & Mather Partners has named Gordon Bowen as its top creative director, succeeding Pieter Verbeck, who has moved to William Esty Co. as senior vp-creative director. Mr. Bowen formerly was vp-creative director at Bonneville Media Communications, the Salt Lake City-based in-house agency for the Church of Jesus Christ of Latter-day Saints.

Scali, French shop link

New York—Scali, McCabe, Sloves has acquired a major interest in Cascades, a $15 million ad agency in Paris whose major clients include L'Oreal. The agency will be renamed Cascades/Scali, McCabe, Sloves.

Polaroid is back in shades

Cambridge, Mass.—Polaroid Corp. is introducing, via Cabot Advertising, Boston, optical frames that come with an attachment that converts them into fashion sunglasses. Polaroid, which still markets sunglasses overseas, left the U.S. sunglasses business six years ago when it dropped its Cool Ray-Polaroid line. Polaroid has made sunglass lenses only since then.

Japanese software rolls

Tokyo—Trading company JSE International this week is introducing dCHART as the first Japanese-written business computer software marketed in the U.S. Wordtech, Orinda, Cal., will handle distribution of the graphics program. JSE currently has no U.S. agency.

P&G hikes indie spending

New York—Procter & Gamble, Cincinnati, boosted spending on independent tv stations 29% in the first half of 1985, compared with the same period last year, says the Assn. of Independent Television Stations. P&G's spending on indies hit $102.8 million.

Health club pumps out spot

Los Angeles—Health & Tennis Corp., the health-club subsidiary of Bally Mfg. Corp., Chicago, early next month will break a tv spot featuring female bodybuilder Rachel McLeish. The spot, themed "Before you primp, you've got to pump," is part of the company's continuing celebrity presenter series, which already has included Cher, Brooke Shields and, currently, Joe Theismann. J. Walter Thompson USA handles.

Snappy car-rental move

Sam Chwat, founder and director of the New York Communication Center, teaches dialects from British to Yiddish.

The rising wizard of speechmasters, Sam Chwat's hot

By Lenore Skenazy

How does it feel to be the only silent star of the '80s?

On the talk show circuit for her starring role in "Greystoke," Andie MacDowell grew to expect such snipes. Her strong southern accent had been dubbed over by Glenn Close, leaving an easy target: The stunning beauty fit to be seen, not heard.

"Hello?"

Today when she picks up the phone, MacDowell answers like a native of Walter Cronkite's hometown. No "Ah" for an "I." No "trial" for "trail." In "St. Elmo's Fire," that's her own voice: Mid-American as the corn belt. And on the L'Oreal Riche commercial, that's her voice again, Fr-r-r-ench as foie gras. The modern-day Liza Doolittle had simply had enough. She paid a visit to the modern day H. Higgins, Sam Chwat.

Chwat, founder and director of the New York Communication Center, teaches dialects from British to Yiddish. As in MacDowell's case, he also specializes in eliminating them—or, rather, replacing regional rifts with what he calls the "general America accent," a nondescript, easily understood English "developed between Madison Avenue and Hollywood."

Once muted by her southern drawl, Andie MacDowell now speaks for herself.

Actors of stage, screen and commercials come to Chwat's $40-an-hour one-on-one sessions, anxious to turn "The opportunity of a lifetime" into "Zee oappertunitee of zee life!" or even, "Da oppatuniddy of youze life."

Despite his staff of 36, Chwat never set out to run this glamour business. A licensed speech therapist now getting his doctorate at New York University, he began his career teaching speech to a gamut of needy patients, from stroke victims to deaf children.

Then, one day, an executive he knew asked him a favor: He wanted to promote his employe into a high-visibility position. . ."but he has a Spanish accent." The fellow wondered if Chwat, a speech specialist, could "clean up" the employe's diction.

Chwat tried and realized he could. In fact, it was a lot easier than his therapeutic efforts: This student had excellent hearing, good intellect and a keen desire to learn. Unlike working with the disabled, "You could see the results every single session." Chwat got excited, as did the corporation, which started sending him a steady stream of students.

Next, explains Chwat, came the talent agents. If their client was up for a Shaw play—or silver-polish commercial—they'd send him to Chwat for Queen's English lessons. Occasionally, says Davian Littlefield of New York's J. Michael Bloom talent agency, the ad agencies themselves will send a student. "They may have found an actress with a very womanly presence, perfect for a perfume commercial, but on tape her ps pop and sizzle." Not after a visit to Chwat.

Eventually, the therapist found himself coaching the entire crew at Chippendale's, New York's famed male strip-tease joint. "Because of their exposure—so to speak—they have a good chance at getting disco-

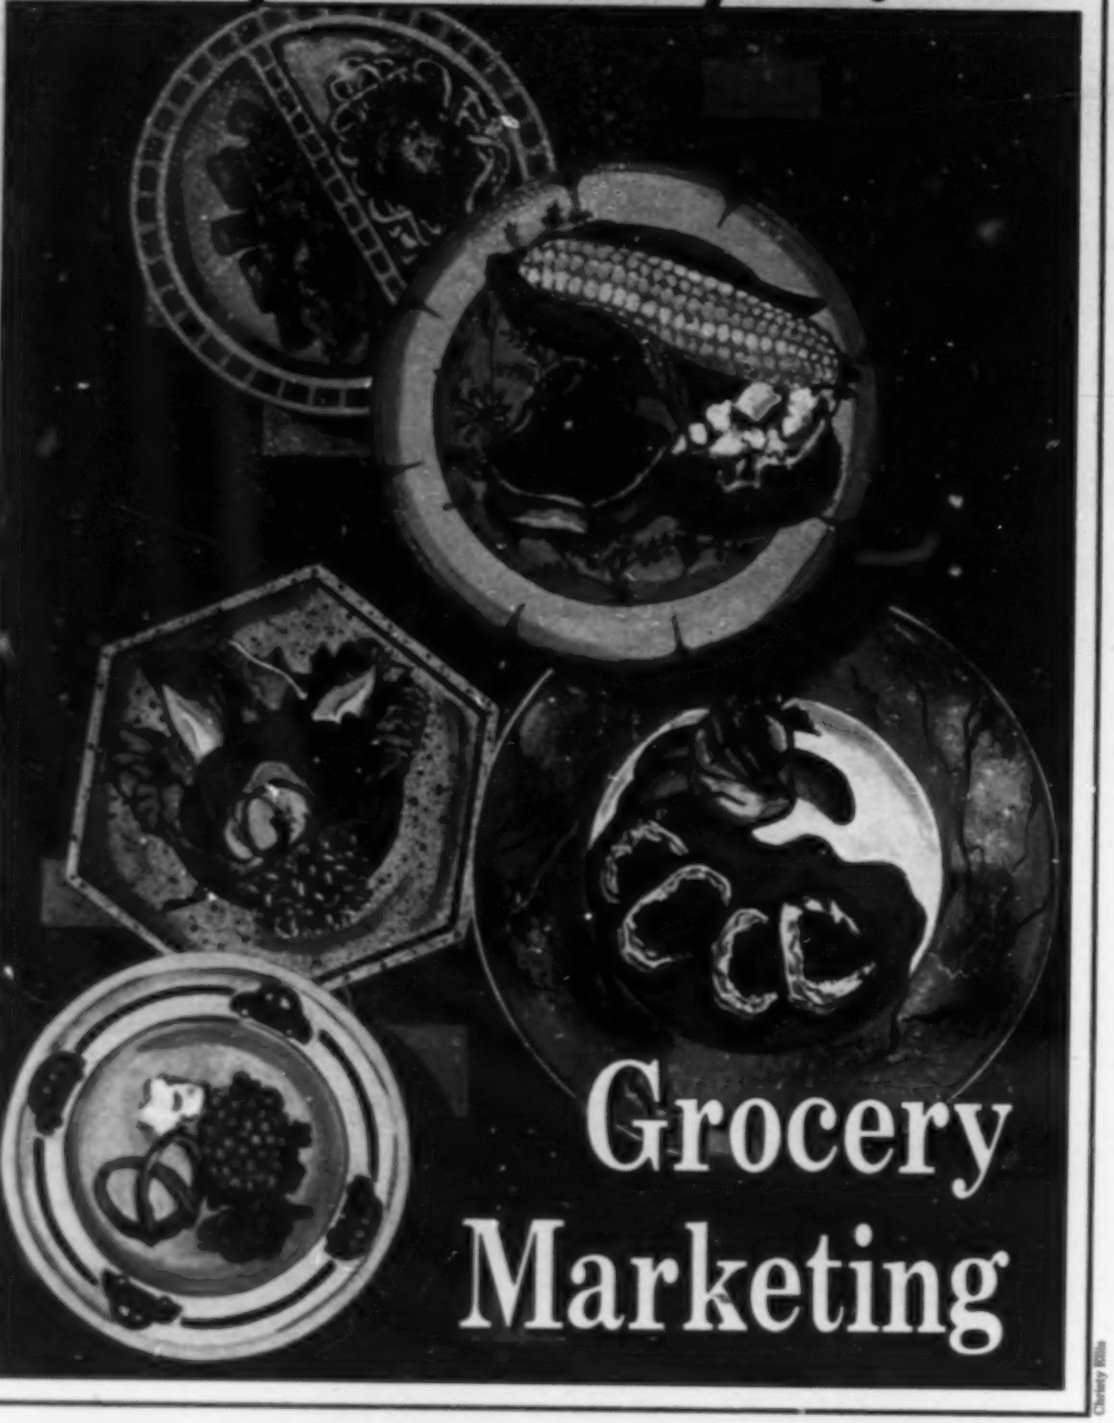
Special Report



Grocery Marketing

Christy Ellis

Catering to different segments

By Mary McCabe English

You can't just pass the meat and mashed potatoes around the family dinner table anymore. The old-fashioned nuclear family isn't there to eat it and if they were, they'd probably want a lot more than pot roast to choose from.

Grocery consumers are changing with the times and grocery marketing is changing with them.

The new consumers are a diverse bunch, according to experts in the food industry. They are virtually everybody, not just the stereotypical housewife but a number of other demographic groups, such as older people, singles, teen agers and men.

The old definition of the primary food shopper as an 18-to-49-year-old woman with husband at work and children in tow doesn't wash anymore, according to New York-based consumer researcher Judith Langer.

Because of changing social trends, such as people delaying marriage and childbearing, widespread divorce, the growing number of two-income households, the graying of America and the influx of ethnic groups, the profile of the typical grocery shopper has evolved from monolith to collage.

The new consumers' attitude toward food shopping is much different from the attitude marketers have dealt with in past decades.

Today's shoppers still are concerned about price, but they also want to save time, and they'll pay premium prices for convenience.

Health and nutritional concerns also play a big part in what today's shoppers toss into their carts, although more than one source, including the Food Marketing Institute in Washington, says nutritional concern has dropped in the past year.

Meat is still popular, despite a drop in red meat consumption, and beef and poultry were cited most often as favorite main course items in FMI's 1985 update of its continuing study "Trends/Consumer Attitudes & the Supermarket." For dessert, premium ice cream, gourmet cakes and candy are favorites.

Consumers also have changed where they eat. Today's consumers eat out more than ever. They

(Continued on Page 16)

The profile of the typical grocery shopper has evolved from monolith to collage.

Mary McCabe English is a frequent contributor to Special Report and a grocery marketing watcher.

Catering

(Continued from Page 15)

also graze rather than eat complete meals and, in many cases, rarely sit down to family meals.

Over-all, less is more when it comes to time spent preparing and buying food. New consumers regard the act of shopping as far less important than their predecessors did. They devote less time to it and use fewer lists, according to FMI studies.

In the words of Chicago food consultant and author Caroline Kriz: "People want their food preseasoned, prepackaged and precooked. They want it quick. Their taste levels haven't gone down, but their time has gone way down. And if they do have free time, they'd rather play tennis or go to the health spa than cook."

One of the most notable changes in who's doing the grocery shopping is along sexual lines. Because of divorce and the trend toward later marriage, men do far more shopping than in the past.

A study by Simmons Market Research Bureau, New York, found that the number of men doing food shopping increased nearly 20% between 1981 and 1984. A 1982 FMI "Supermarket Shoppers' Profile" agreed with the trend. It found about one-third of grocery shoppers are male.

This study, which FMI spokesmen say represents trends that have continued into 1985, pinpoints differences in the way men shop. For instance, men spend less time in stores, less money per in-store minute and less on weekly grocery tabs than women. They spend more per family member.

Men also plan and budget grocery shopping less than women, make less use of unit pricing, product freshness dates, nutritional labeling and newspaper advertising. They also appear to be less economy-minded and more brand loyal, according to FMI.

Significant attitudinal differences also occur among various groups of women, with career women being most like men in their shopping habits.

FMI also notes differences between single and married shoppers. Research shows that although singles spend about the same amount of money per household member for food, they spend less time and less money per trip, per in-store minute and per week, which, FMI reasons, could mean that singles give less priority to planning and shopping in general.

Shoppers 65 and older tend to enjoy food shopping more and plan, use educational information and budget more than younger age groups.

Another important piece in the collage that represents the new consumer is the continued growth of the Hispanic market, particularly Mexican-Americans. FMI predicts that by the year 2000, Hispanics, the second largest ethnic shopping group placed at nearly 15 million by the 1980 census, will be the largest ethnic group of shoppers, supplanting blacks.

In the July edition of Donnelley Marketing's newsletter, "Findings," Anthony Mercado, Donnelley's director of Hispanic marketing, predicts Hispanics will become increasing important in the marketplace during the next five years because of upward mobility and increased purchasing power as they work themselves into the U.S. economic mainstream.

All these factors have changed the grocery store product profile. The demand for convenient, one-stop shopping grows, and services and nongrocery items are booming, but it doesn't stop there.

For example, Dancer Fitzgerald Sample's "New Product News" has described 1985 as the "year of the beverage." At FMI's May convention in Chicago, "NPN" editor Martin Friedman said that during the past six months alone his publication had reported 25 new wine coolers, which he described as "yuppie soda pops."

Mr. Friedman also noted explosive activity in the fruit juice and hot beverage markets, with natural juice introductions and several new decaffeinated teas and coffees. Not to be ignored, either, is the revolution spawned by NutraSweet in the world of low-calorie soft drinks and adult powdered drink mixes.

Other hot categories pinpointed by Mr. Friedman include tofu-based items and—despite the American obsession with dieting—snack foods and frozen desserts, ranging from Dole's icy fruit sorbet to the status-rich Dove Bar.

Soup introductions are also up, ranging from Lipton's reduced-calorie line, Cup-A-Soup with crackers and Oriental line to Knorr's Homestyle soups, Seven-Up Co.'s freeze-dried Nouvelle soups and several items from Campbell, including Creamy Natural soups and a soup that goes into the microwave—container and all.

Mr. Friedman also highlighted what he sees as a move by food marketers to introduce fast food restaurant-originated products into supermarkets, ranging from chicken to pizza to sandwiches and salads.

"I predict we're going to see a speedup in this trend," he told the FMI conventioneers. "Just as soon as you read about a new success in the fast food business, you'll see a similar product in the supermarket in six months."

Supermarket product departments continue to expand in at-

(Continued on Page 18)

Consumers not cutting back

Americans are eating more than ever.

According to Karen Bunch, an economist with the U.S. Department of Agriculture's Economic Research Service, the average person is expected to consume 1,431 lbs. of food this year (retail weight), compared with slightly more than 1,426 lbs. last year and 1,381 lbs. 20 years ago.

The 1985 forecast reflects increases in chicken, fish, vegetables and dairy products and declines in red meat and fruit.

The U.S.D.A. predicts a 2% drop in red meat consumption—150.4 lbs. per capita average, compared with 153.6 lbs. last year. Poultry consumption is expected to jump about 4% to more than 70 lbs. a person, in part because of a continued increase in broiler production.

Ms. Bunch says total per capita consumption of meat, poultry and fish is expected to average slightly more than 236 lbs., or only a half-pound less than the 1984 figure.

"Fruit consumption will decline about 1% in 1985 due to reduced supplies of most major fruits, particularly citrus," the USDA reports. "Despite higher retail prices, strong demand for fruit juice will keep consumption constant."

However, per capita consumption of fresh vegetables is expected to increase about 1 lb. Consumption of processed vegetables is likely to increase slightly as a result of drops in canned vegetables and offsetting gains in frozen foods.

Total per capita vegetable consumption is projected at 210 lbs., excluding potatoes, which should boost the figure to about 300 lbs.

Dairy products also are expected to grow during 1985. Ms. Bunch says per capita consumption in this category should rise anywhere from 0.5% to 1.5% to an average of 308 lbs. because of stable prices and promotional efforts by the dairy industry.

—M.M.E.

In supermarkets, it's fresh vs. frozen vs. canned

Frozen food—entrees in particular—and fresh produce are top gainers and canned goods are a top loser in today's supermarket sweepstakes.

But a look at the latest consumption data for vegetables and fruit—the foods most easily compared as fresh, frozen and canned—shows that canned vegetables still have quite a way to drop before they hit bottom. Even though they are declining, the main contest for now is between fresh and canned, with frozen running a distant third.

In the case of fruit, the contest again is between fresh and canned, but canned is a distant second and, according to one food industry observer, frozen isn't even in the running.

"The decline in canned vegetables is really only in the last decade, and canned actually still dwarfs frozen vegetables, with fresh dwarfing both," says Rick Pfaff, exec vp of the American Institute of Food Distribution, Fairlawn, N.J. "So, even though frozen is growing, it's still only a small percentage of the total vegetables consumed."

The institute's data shows average per capita consumption of fresh vegetables for 1980 to 1983 was 98.8 lbs., versus 46.7 lbs. for canned and 11 lbs. for frozen. The survey for 1970 to 1974 shows fresh at 90 lbs., canned at 52.2 lbs. and frozen at 9.9 lbs. The 1960 to 1964 survey shows fresh at 85.6 lbs., canned at 44.7 lbs. and frozen at 7.2 lbs.

If canned vegetables continue to decline and frozen vegetables continue their upward trend, the balance could shift, but, according to Karen Bunch, an economist with the U.S. Department of Agriculture's Economic Research Service in Washington, the decline of canned vegetables has begun to slow. A significant portion of the canned category should continue to hold its own, simply because it gets no competition from fresh or frozen, Ms. Bunch says.

"It's other things, like carrots, green beans, peas, that are losing people to frozen. Or people are buying premium combinations of things like broccoli and cauliflower that aren't available canned.

> "Even though frozen is growing, it's still only a small percentage of the total vegetables consumed."
>
> *—Rick Pfaff*
> *American Institute of Food Distribution*

"On the other hand, certain canned things—like peas, corn, green beans—haven't really been big losers, because some people prefer the way they taste canned. Beets are another canned favorite. People are still going to prefer canned on some items."

According to Mr. Pfaff, fresh is the big winner in the fruit category, with consumers eating six times more fresh fruit than canned. Canned fruit has done a steady nosedive over a longer period than canned vegetables.

The institute does not keep comparative data on frozen fruit consumption, Mr. Pfaff says.

"Canned fruit generally means apple sauce, peaches, pineapple, pears, fruit cocktail, and frozen fruit usually means strawberries, cherries and blueberries, a good portion of which is distributed in food service containers, rather than to individual consumers," he says.

Average per capita consumption of fresh fruit for 1980 to 1983 was 86.6 lbs., versus 15 lbs. for canned. Comparisions for 1970 to 1974 place fresh at 76.4 lbs. and canned at 21.4 lbs. Comparisons for 1960 to 1964 are 81.3 lbs. for fresh and 22.9 lbs. for canned.

Ms. Bunch says declines have hit almost every type of canned fruit.

"Olives jump around and are generally upward, but everything else is declining," she says. "Peaches, for example, have come down by 50% in the last 25 years. Pineapple is also down, but not so much as peaches."

Ms. Bunch attributes the dramatic drops in canned fruit consumption to the year-round availability of fresh fruit plus the widespread introduction of several new types and strains that in the past were not available or were considered exotic and available only on a limited basis.

Mr. Pfaff says it will be interesting to track the long-term effect of "light" canned fruit, low-salt canned vegetables and ad campaigns for branded produce on vegetable and fruit consumption patterns. —M.M.E.

Stocking up on specialty fruit

By Dave Galanti

Frieda Caplan had a hunch that consumers would never buy anything called a Chinese gooseberry.

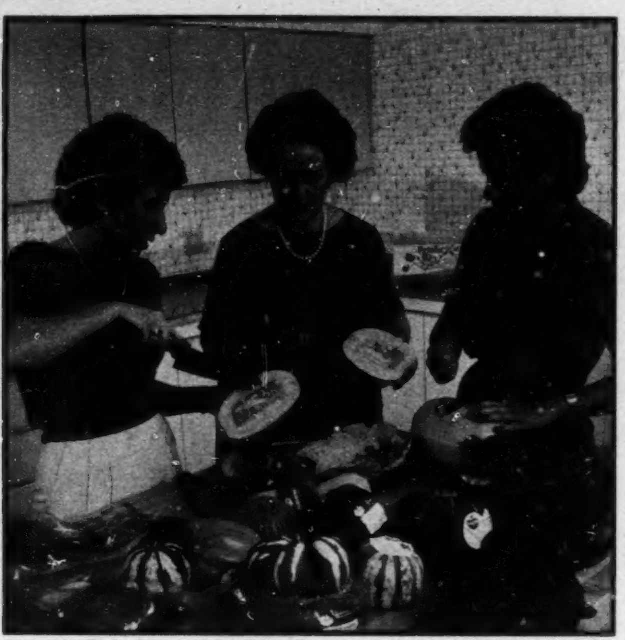
Nobody had heard of the hairy, oval fruit that originated from New Zealand. So, after consulting with her importer, she changed the name to kiwi fruit and sales soared.

Today, so many people are familiar with kiwi that 16,600 tons were grown in the U.S. last year. Ms. Caplan's Los Angeles-based Frieda's Finest Produce Specialties is a major source of both domestic and imported kiwi, selling more than 100,000 10-lb. flats each year.

The kiwi is just one example of the growing popularity of so-called exotic, variety or specialty produce. Shoppers, particularly in areas populated by Asian, Latin and some European immigrants or trend-seeking consumers, are increasingly likely to see black radishes, jicama and lychee nestled next to the peaches and apples in their neighborhood produce stands.

Fruit consumption and production have been stable for the past few years, according to the U.S. Department of Agriculture.

Dave Galanti is a free lance writer and previous contributor to Grocery Special Reports.



Karen, Frieda and Jackie Caplan of Frieda's Finest Produce Specialties have led marketing of exotic fruit.

About 25 million tons of citrus and noncitrus fruit was produced domestically in 1984, according to the U.S.D.A. About 4.1 million tons of apples were produced last year, almost the same amount as the two previous years.

Bananas are the single best seller in the U.S., according to a U.S.D.A. spokesman, but the agency keeps no production or consumption figures because bananas are grown outside the country.

American consumers, however, are always on the lookout for something new, and grocers say the increasing number of unusual produce items is adding needed sparkle to their fruit-and-vegetable sections.

"We feel it's an edge. A lot of consumers are looking for either familiar favorites from home nations or the new and exciting," says Mike Klackle, produce buyer for Dominick's Finer Foods in Northlake, Ill. "The consumer is also thinking fresh, and that leads to more exotic cooking. For those reasons, our company has made a commitment to marketing specialty produce."

Because of the increasing acceptance of specialty items, grocery distributors have added some exotic items to their availability lists, but few have had the national impact of Ms. Caplan, who through a combination of hunch and marketing savvy has been a leader in persuading produce managers and consumers alike to try unusual produce items.

Besides kiwi, Ms. Caplan has been in the forefront of marketing such specialty items as Jerusalem artichokes, which she renamed sunchokes to increase acceptability, and spaghetti squash. She was one of the first to market fresh mushrooms, now a staple on virtually all produce shelves, she says.

"Consumers are always willing to try something new," Ms. Caplan says. "My hardest sell is always the local produce manager. And if we don't sell to the produce buyer, we can't get our product to the public."

Ms. Caplan generally has been successful. Despite losing more than 20% of her business a few years ago when she made the decision to get out of the mainstream fresh mushroom market, Frieda's Finest grosses close to $12 million in sales a year, mostly on small volume sales.

A large grocery chain, such as Safe-way Stores, might take an average of 30 Frieda items on a regular basis from Ms. Caplan's list of about 250. An average store within that chain might handle five to ten items labeled with Frieda's distinctive purple logo.

"We have the confidence of our retailers," Ms. Caplan says. "We deal with perishable items that vary widely in their storage life and the way they should be handled. In this business, you have to prepare the retailers to handle these items the best you can or you won't succeed."

Key to this preparation is a detailed marketing plan, Ms. Caplan says. Because not every specialty item can be marketed 365 days a year, Ms. Caplan says it is essential to keep in close contact with both growers and retailers, so the product can

(Continued on Page 20)

Catering

(Continued from Page 16)

tempts to keep pace with the health and nutrition crowd. In-store salad bars are big and getting bigger, but the craze hasn't stopped with lettuce and tomatoes.

"From our perspective, we see fresh fruits and vegetables as one of the biggest growth areas in the stores," FMI vp Karen Brown says.

"At the same time, we see a growing interest and willingness on the part of the consumer to purchase all kinds of stuff that was considered exotic in the past but not now—things like kiwi and spaghetti squash," Ms. Brown says.

"Part of the reason consumers have been so adventurous is the big interest in health, but at least part of it is also the increase in the food preparation data being provided."

Information is important to the new consumers, and Ms. Langer predicts the continued growth of branded produce such as Sunkist oranges, Del Monte bananas, Dole pineapples and Campbell mushrooms.

Other products can enjoy a tag-along popularity, Ms. Langer says.

For example, dried fruit snacks positioned in the produce department are more likely to be perceived as healthy there than if placed next to the potato chips and pretzels.

A similar analogy can be drawn for the "healthy" treats category that has made granola a household word. Granola snack bars probably would have a tougher time hanging onto the good-for-you connotation in the cookie section than the category has in its usual location near hot and cold cereal.

Frozen foods also are experiencing tremendous popularity these days, especially the low-calorie and gourmet entrees that gratify consumers' desires for convenience and weight control.

Food industry observers believe that part of the category's continued growth will come from modifications to existing products; for example, packaging changes that would provide products to various taste or health requirements, such as low salt or low fat versions.

Ms. Kriz and Ms. Langer both predict that technological improvements in food composition and packaging will make frozen convenience foods "convenient"—even without a microwave—as consumers continue to give ease of preparation a priority in their food purchases.

"I'm talking about things like partially frozen products that are designed to defrost more quickly," Ms. Langer says, "and more use of aseptic packaging."

And, says Ms. Kriz, whose latest book is "Cooking For Men Only," "the ultimate convenience of more foods that are prepared, packaged, cooked, eaten in the same container . . . then throw it away."

Ms. Langer also suggests that packaging changes resulting in simpler, more easily deciphered graphics would be welcomed by many consumers.

Looking at how retailers cope with today's consumers, Ms. Langer says grocery stores are faced with satisfying shoppers who are not particularly brand loyal or store loyal and are in a hurry, and as a result, the stores will have to do more to lure customers.

One-stop shopping convenience with many services or a key combination of services tailored to the locale will continue to be a big draw. But it goes beyond that, she says, when dealing with customers so averse to long lines that they will pay higher, convenience store prices to save time.

"I really think a lot of supermarkets have abused their shoppers by subjecting them to long lines and checkers who are talking about their dates the night before instead of paying attention to customers. These are a couple of things that make today's shoppers angry," she says.

"In today's marketplace, which is so loaded with variables, they're going to have to get more competitive to succeed. They're going to have to differentiate on some basis other than price, which, I realize, some chains are already making an effort to do.

"For one thing, I think there'll be a continued move toward later store hours.

"Also, with certain staples in particular, wouldn't it be nice if they could be delivered every week? I mean, is it really necessary for me to go into the store every week to pick up toilet paper and kitty litter? Or, why not some system that would allow you to order ahead and have it waiting for you at the store?"

And for shoppers who prefer to visit the store, she suggests more visible, easily followed, complete product directories. She sees the possibility of computerized product directory consoles that would provide customers with the aisle number and section at a touch.

"Consumers today welcome anything that helps them save

Chiquita Brands is branching out

By Kate Bertrand

Chiquita. The name summons visions of a castanet-clicking Latin beauty in a Carmen Miranda headdress.

But once you get past the beat, the Chiquita name signifies fresh fruit, a reputation earned over decades of advertising fresh bananas.

Drawing on the strong name recognition and in response to an increasingly nutrition-conscious market, Montvale, N.J.-based Chiquita Brands, a subsidiary of United Brands Co., is expanding into the consumer package-goods market.

Determined to ride the wave of frozen fruit-and-juice bar popularity, a market estimated at $185 million, the company introduced Chiquita Pops in Phoenix, Ariz.; Denver, and Atlanta in mid-June. The product since has been launched in about 25% of the U.S. market.

According to Burton J. Rubin, group vp-general manager of Chiquita's consumer package goods division, the company will roll out Chiquita Pops nationally in 1986.

As the first of a line of new consumer package goods, the pops reflect Chiquita's interest in developing natural, fruit-based products. The company's consumer package goods division, established in April, eventually will introduce other frozen-dessert products, as well as juice-based beverages and fruit-based snack foods, according to Mr. Rubin.

NEW TREAT DISCOVERED IN TROPICS

In an exclusive interview, Mr. Crusoe, the legendary castaway, spoke glowingly about his new discovery, Chiquita™ pops, which are now available in America.

"A fun treat for the whole family," he declared. "They can be secured in four different flavors — Strawberry, Strawberry-Banana, Orange-Pineapple and Pineapple.

"All are 100% natural and pure. Each is real fruit and juices frozen on a stick.

"And with the 25¢ off introductory coupon, it becomes even easier for everyone to enjoy this refreshing fruit treat from the tropics."

Chiquita Pops ads began appearing in mid-June.

The future of the product rides on the strength of the name. To determine what the Chiquita name means to consumers, the company last year commissioned New York-based Yankelovich, Skelly & White to research the issue.

"The results indicated that the Chiquita name has a 93% recognition awareness factor among consumers," Mr. Rubin says. "The name means bananas and more—quality, trust, fun, excitement." Fun is an important part of Chiquita Pops' concept and advertising, he says.

The product, which comes in strawberry, pineapple, orange-pineapple and strawberry-banana, is supported by a comprehensive advertising and promotion program that includes tv, print ads, couponing and sampling.

"Our primary target is 25-to 54-year-old females with children. Yuppies are also part of our audience, but mothers pro-

Chapter XIV:

SURROUNDED BY MY TREASURES

OH, WHAT a comfort it is to have the necessities of life in store on my island. Much did I remove from the shipwreck. But by no means does this accommodate all my needs. Thus, I have my supply of Chiquita™ pops which Friday delivers to me regularly. He brings me Strawberry, Pineapple, Strawberry-Banana and Orange-Pineapple.

They're all favorites of mine, and all proudly bear the name 'Chiquita', which I do highly esteem. Real fruit and juices frozen on a stick. And all pure and natural.

What a wonderful tropical delight! What a refreshing treat! I prophesy they will be equally desirable two centuries hence. People of the new world will be as refreshed as I am by this cold treat, as natural as my tropical island.

A Robinson Crusoe theme was used in Chiquita Pops print and tv advertising from Cato Johnson.

Kate Bertrand is a frequent contributor to Special Report.

---

time," Ms. Langer says.

To reach the new consumers, food product marketers are using old ways—advertising in newspapers and on tv and radio—and new ways.

Actmedia Inc., Westhampton, N.Y., and Darien, Conn., is trying to make it big with in-store advertising designed to reach consumers when their mind is on groceries—while they are shopping.

Bruce F. Failing Jr., Actmedia president, says major food packagers such as Procter & Gamble, General Foods, General Mills, Kimberly-Clark, PepsiCo and Quaker Oats Co. are already among the clients advertising in some 7,700 supermarkets in about 52 U.S. cities.

Actmedia's programs were launched in 1974 and include the placement of advertisements on supermarket shopping carts and aisle directories, the distribution of cents-off coupons, product samplings and demonstrations.

Mr. Failing calls in-store advertising a natural for today's marketplace.

"You can't just go out and buy [through advertising] the women 18 to 49 years old anymore," he says. "So, whom do you make your target audience? And then, after you've determined who that is, where do you go to reach them? A good mix on national tv used to work, but not anymore.

"By definition, the person in the store doing the shopping is the target. So we've not only solved that problem, but our cost per thousand is only about 80 cents compared to $9.30 for a 30-second commercial on prime time tv."

From the media mix to the product selection, food marketers are changing with the new consumers. ■

Teens push the shopping cart

If you think teen shopping starts and stops with clothes, toiletries, records and tapes, think again.

More than three-quarters of the 14 million-plus teen girls in the U.S. shop for groceries, spending about 40% of their families' food budgets, or about $17 billion in 1985, according to Allan Kalish, research director for *Seventeen* magazine.

The *Seventeen* 1985 Rand Youth Poll indicates that 60% of 13-to-19-year-old girls do family food shopping "quite a bit" and an additional 28% do it "occasionally."

Additional information gathered by *Seventeen* last year notes the same group spends an average of 1¼ hours a week grocery shopping for the family.

Although the teen population has been on the decline in terms of sheer numbers since the 1970s, their food market influence and spending power have increased because of demographic changes.

For example, *Seventeen* food director Olga Rigsby says, "Two out of three of the mothers of teen girls work outside the home, and this figure is constantly going up."

Another reason behind the trend is the divorce rate.

"I think one of the most important factors for the advertiser to know about the teen age girl is that the working mother is making her into the family shopper and cook at the same time," Ms. Rigsby says, adding that about 82% of all teen girls do some cooking at home.

"So if there's a teen ager at home, she leans pretty heavily on her, and the girls are doing quite a bit of decision making and brand selection. So they're an important market that should not be overlooked, because they're setting up patterns and establishing product preferences that they'll stick with for life.

"When I came to *Seventeen* many years ago, they used to call the girls 'the home makers of tomorrow,' but now they've become 'the home makers of today,'" Ms. Rigsby says.

Rena Bartos, a senior vp at J. Walter Thompson USA, New York, says 72% of teens cook and 60% bake "including high percentages of both girls and boys." According to Ms. Bartos, nearly half of all teens say they grocery shop "quite a bit."

"Most teen shoppers make out grocery lists, and their influence in brand decisions is considerable," she told the Food Marketing Institute's convention in Chicago last May. "It is almost on a par with their mothers."

Elaborating on the demographic changes, Ms. Bartos says, "Only 27% of teen agers live in a traditional household where mom stays home and dad goes to work." As a result, "there is now both the need and opportunity for teens to do more for themselves and their families."

It's not only the teen ager pushing a cart down the supermarket aisle who affects grocery decisions. Researchers say children of all ages play a significant role in influencing their parents' food store purchases—from teens to the tots who ask for specific soft drinks, cereals or even pet foods they see advertised on tv.

According to Ms. Rigsby, advertisers will find the 13-to-19-year-old female audience a highly receptive one. This group is also extremely brand loyal, she says.

"We have found that they are very eager to try new products and are very responsive to advertising," the *Seventeen* food director says. "Surveys that we have done show that our readers perceive the nationally advertised brands as more nutritious, higher in quality and a better over-all value against store brands and generics."

Ms. Rigsby says a Yankelovich, Skelly & White study done for *Seventeen* found that "a significantly high" percentage of former readers, surveyed in their 20s and 30s, still were buying the same brands they had begun using as teens.

Ms. Rigsby says *Seventeen's* audience is particularly receptive to food ads that tie in with fitness and health.

"This, of course, is very tied to their interest in beauty," she says. "Our readers are very interested in lower calorie-100% natural advertising. They're very, very responsive to this kind of ad pitch."

This early shopping experience may influence the future shopping profile of the general population.

"I think what we're going to see is a much more educated consumer," Ms. Rigsby says. "I think this early training in shopping is going to make for a much more discriminating, educated, demanding shopper . . . better able to read and evaluate labels and make better, more informed decisions.

"These young people are going to be faced with so many more options than the consumers of the past because of the explosion of new products, but the early training will help them to sort things out." —*M.M.E.*

Stores skew styles toward shoppers' needs

By Debra Kent

Billy Joel's "Uptown Girl" blasts through the speakers as a boisterous rock deejay broadcasts on location. Young women and men eye each other across the bar. Some connect while others go home still unattached, and more than a few dance in the parking lot on this balmy September evening.

It sounds like a typical night on the singles scene, but the bar in this case is the kind that stocks bean sprouts, not beer. The locale is a Stop & Shop supermarket in Cambridge, Mass.

The 1983 event was dubbed "singles night," and by 10 p.m., as many as 2,000 young hopefuls had ventured through the store's portals. Some came away with phone numbers. Many more left with groceries.

The 120-store Stop & Shop eastern chain has identified several growing consumer segments and is determined to address their needs. The chain is not alone. Around the country, grocery retailers are trying hard to match their marketing and store design to the needs of various new grocery shoppers.

> "The one common denominator that keeps emerging is the growing demand on people's time."
>
> —*Jack Baen*
> *Stop & Shop*

In college towns such as Cambridge, the Quincy, Mass.-based Stop & Shop hopes to lure the single population with special events and an expanded variety of individual-portion packages.

In communities with a significant senior clientele, store managers arrange for special transportation to and from the stores and emphasize low-sodium products.

Stop & Shop, like many chains, uses broad strokes to market to the swelling ranks of young professionals, working women, two-income families and male shoppers. It groups them under the umbrella of time-stressed consumers and appeals to them with mammoth, full-range stores.

"The one common denominator that keeps emerging is the growing demand on people's time," says Jack Baen, vp-marketing for Stop & Shop. "That's true of working women, men, even teens. The only ones that aren't in a rush are the older shoppers.

"Three years ago we started building superstores and that's all we open today," he says. "By the end of the decade, we'll be a superstore company."

The 20 super Stop & Shops average 60,000 sq. ft. and offer a full range of products and services geared to one-stop shopping, including fresh seafood and hot takeout departments serving such fare as pizza, spareribs, sausages and chicken.

The sprawling frozen food sections are packed with 30% more product than three years ago, and the bakery is another area that's "growing like topsy," Mr. Baen says.

store 24
food&more...

Store 24, Waltham, Mass., updated its design to help reach today's consumers.

The large nonfood division includes greeting cards, automotive products, toys and discounted books. All stores except those in Massachusetts, where it's illegal, have pharmacies, and the newest units have videotape rentals.

To speed its time-stressed customers through the checkout, each superstore is equipped with 20 electronic scanning registers. All the chain's superstores are

Small chain stocks education

By Sharon Donovan

An aggressive independent supermarket chain nestled in the heart of the sultry, swampy southeast Louisiana bayou country has found a way to capture its mostly blue-collar Cajun customer.

A series of educational seminars and programs, designed to give customers new ideas about food, cooking and other things, has generated higher sales and community-spirited pr, say executives of Thibodaux, La.-based Rouse Stores.

Larry Henderson, general manager of Rouse's Houma, La., store and the program organizer, considers the seminars a public service. "Educated customers know exactly what to look for and are very appreciative," he says. "I believe an educated consumer makes a better customer."

Annual sales at Rouse's, a family operated chain of four supermarkets within about a 20-mile radius of each other, are about $50 million.

The stores, ranging in size from 18,000 to 40,000 sq. ft., are run with the help of founder Anthony Rouse's six children, ranging in age from 20 to 35, who are among the company's 400 employes.

The one-day seminars are held about four times a year and most have different themes. The total cost of the program is less than 1% of the undisclosed marketing budget, according to Mr. Henderson.

One of the company's recent successful programs covered various cuts of meat, preparation and tips on using cuts efficiently. Customers also were taught about the grades of meat as defined by the U.S. Department of Agriculture and the techniques of raising animals for slaughter. To round out the show, they were given tastes of different types of meat, from beef to veal to venison.

seminar was followed by a presentation on microwave cooking and one on Cajun cooking.

The stores generally call on experts to give the programs. The meat seminar, for example, was conducted by the Iowa Beef Processors, one of the country's largest meat packers. The Cajun cooking program was delivered by world-renown Cajun chef Paul Prudhomme.

These educational seminars are supplemented occasionally by a more entertainment-oriented seminar. One of these highly successful shows featured well-known Louisiana-born humorist Justin Wilson, and another incorporated a fashion show with a "Color-Me-Beautiful" session at which the store served complimentary wine and cheese.

Frequently, these shows attract crowds exceeding the 200 seats set up in the 40,000-sq.-ft. Houma store. To stage the productions, merchandise shelves are dismantled and a stage is erected.

The programs disrupt the store routine, Mr. Henderson says, but in an industry where customer convenience is a key to success, he does not hesitate to do that for a few hours every quarter. In return, he hopes to generate community notice and good will that will pay big dividends.

"Without customers it doesn't really matter how convenient or accessible the store is. That alone does not win customers. You have to get people inside, where they can see the quality of the store and its merchandise," he says.

Sharon Donovan is an Advertising Age correspondent in New Orleans.

The Cooperative Marketing Company

Stores

(Continued from Page 22)

open around the clock.

Albertson's Food Centers in Boise, Ida., is another advocate of the behemoth store as the best tactic for coping with America's changing buying habits. "We really believe in big stores because they do appeal to everybody," says Gary Michael, vice-chairman of the board for the 443-store chain.

Albertson's attracts teen age girls, for example, with a generous selection of cosmetics from companies such as Revlon and Max Factor. Convenience-minded shoppers have helped Albertson's triple its frozen foods sales during the past 10 years; the department's inventory was increased 30% as a result.

The chain shoved out many of its in-store restaurants to make room for salad bars three months ago. "We saw other people doing [salad bars]," Mr. Michael says. "The more we studied the market—the two-worker families, older people, the diet conscious—the more we realized the potential of a salad bar."

He says the chain was slow to pick up on the trend. "We wish we'd started earlier. We kind of missed the boat."

"The range of supermarket services continues to broaden to meet the needs of consumers who want convenience," says Larry Schaeffer, editorial director of *Progressive Grocer* in Stamford, Conn.

Nine per cent of all supermarkets, he says, have automated teller machines and their numbers are increasing dramatically. Debit transaction systems at the checkout are undergoing widespread testing. "The extreme is Marsh Supermarkets in Yorktown, Ind., which is putting a travel agency in one of its prototype stores."

Mr. Schaeffer stresses, however, that not all chains opt for the mega-store strategy because not all care to appeal to the widest swath of demographics and psychographics. "Stores are getting away from the idea of trying to be all things to all people. It just doesn't work these days," he says.

"In the last few years, the supermarket industry has begun to segment its formats. In today's environment, 'nichemanship' is paramount. On one end you have upscale offshoots like Daitch-Shopwell's Food Emporium in New York and Tom Thumb's Simon David in Dallas. On the other end you have the bare-bones, limited assortment warehouse store targeted at the price-conscious shopper."

But even some warehouse grocers believe that benefits such as convenience and quality may weigh more heavily than low price. Edwards Food Warehouses, a 14-store East Coast division of First National Supermarkets in Cleveland, hopes to capture the time-stressed, quality-oriented customer with its service delicatessens and bakeries.

Edwards Food Warehouses pushes quality in its ad campaign from Hill, Holliday, Connors, Cosmopulos.

"Customers won't go an extra mile to get a nickel less on Pepsi, but they will go an extra mile to get bread that's freshly baked that day *and* a nickel less on Pepsi," says Christine Miller, senior vp-managing director of Hill, Holliday, Connors, Cosmopulos, New York. "We don't think price is the only thing that motivates people."

With that point in mind, Hill, Holliday launched an ad campaign to push Edwards' quality story to the fore. "We show that Edwards goes to great lengths to

(Continued on Page 27)

Independent, in-store bakers battle

It weighed 35 lbs., had green icing outside and strawberry filling inside. And anyone familier with geography recognized it immediately.

John Kino and several fellow bakers made a pilgrimage to Trenton, N.J., last February to present his edible model of New Jersey to Gov. Tom Kean.

The occasion was National Retail Bakers Week, and the cake generated a mayoral proclamation as well as a plug or two on local radio.

But it probably will take more than tactics like these to fortify independent bakers against their supermarket counterparts pursuing the convenience-minded new consumers.

"I don't think you can fight the supermarkets," says Mr. Kino, owner of four Wyckoff Quality Bakeries in New Jersey. "I don't bother the supermarkets and they don't bother me."

The trade association that provided Mr. Kino with the promotional materials for his New Jersey-shaped cake presented the same materials to his in-store rivals. Much to the pained dismay of its independent baker members, the Retail Bakers Assn. of American embraced supermarket bakeries 15 years ago.

But only recently have the independents relaxed their animosity to teeth-gritting resignation. "More and more are beginning to realize that the in-store bakeries are here to stay," RBAA administrative director Peter Houstel says.

In 1980, there were 15,678 retail bakers, according to the trade magazine *Bakery Production and Marketing*, compared with 9,400 in-store operations. By 1984 those figures had risen to 17,000 vs. 15,030 and the 1985 estimates are 17,580 vs. 17,284.

Similarly, retail bakers accounted for $3.1 billion in sales in 1980, vs. $2.1 billion for in-store operations. Last year the figures were $4.1 billion compared with $3.7 billion and the 1985 projections are $4.5 billion vs. $4.2 billion.

The independent baker was hurt in 1974 and 1975 when the price of sugar and shortening skyrocketed and the U.S.-Soviet wheat deal drove ingredient costs to dizzying heights. Unable to sell their goods at competitive prices, many small bakers closed.

"Supermarkets saw an opportunity to jump in and they did," says Carol Meres Kroakey, former baker and retail editor with Gorman Publishing Co.'s *Bakery Production and Marketing*, Chicago. Development of frozen baked goods and gradual product sophistication helped supermarkets get a firmer footing.

Though quick to stress that both retail and in-store segments are doing well as a result of a renewed interest in baked goods, *Bakery Production and Marketing* editor Ed Lee says the convenience of in-store bakeries is a powerful draw for today's time-stressed shopper.

"After all, they're going to the supermarket ostensibly for one-stop shopping," he says. "If they can buy hot french bread in a supermarket, it only gives them greater reason to do their bakery shopping there. From a convenience standpoint, the in-store bakery has cut into the retail business in certain sectors of the country [like the Far West and Southwest]."

Mr. Kino in the Northeast has prevailed against the turning tide. As his peers shutter their stores or lose half the business to in-store outlets, Mr. Kino and his co-owner and wife, Hannah, have done well with Wyckoff Quality Bakeries, a small chain that specializes in ornate cakes and traditional pastries.

Of his 150 employes, more than 100 are in sales. His bakers are all professionally trained, he says. Far from the traditional image of breadbox-sized bakeries, Mr. Keno's stores are large enough to require a paging system. He takes business holidays to places such as Australia where he brings back recipes for things such as povlova, the national dessert of New Zealand.

> **"More and more [independent bakers] are beginning to realize that the in-store bakeries are here to stay."**
>
> *—Peter Houstel*
> *Retail Bakers Assn. of America*

But this good life is relatively new to Mr. Kino. He went bankrupt once, in debt to the bank for $200,000 in mortgage money, not to mention the $52,000 he owed the flour company.

"I shined up my key for the guy. I told him to take my business; I'd work it off by driving his truck. He told me to keep the key. I worked day and night to pay him back," he says.

John Kino has little patience with supermarket bakeries. At one association meeting he was astounded to hear a supermarket baker boast of his 30% minimum profit margin and an ingredient cost of 20%.

"I went over to him," Mr. Kino says, "and I said, how can you possibly have an ingredients cost of 20%? He said, 'Well, I get eggs and butter from the dairy department, I get my mixes from the grocery section . . . .' After five or six meetings I stopped going." —*D.K.*

get the best produce, fresh fish, the best deli," Ms. Miller says.

The tv spot was designed to accommodate announcements of weekly specials. The campaign theme line is: "The best of everything for less than anyone."

Arthur H. Klawans, managing director of the National Food Distributors Assn. in Chicago, agrees that the convenience-plus-quality equation has become a supermarket's most powerful message. The explosion in upgraded frozen dinners, he says, is proof that convenience and quality are no longer mutually exclusive.

"The old tv dinner was rubber chicken, concrete peas and polyester potatoes. Today frozen meals are all very edible, low in calories and healthy." He says that 20 years ago dry grocery items dominated supermarket sales; today, refrigerated goods, from meat to salad bars, account for up to 80% of the business.

"The young professionals and working women just don't have all that much time," Mr. Klawans says, "but because of their better education and worldliness, they want better food. Yuppies may have been raised on McDonald's, but they don't want to eat it when they get home."

Many superstores have used health and beauty aids, as well as better food, to attract the young professionals. "They're a generation that has expectations, and they're looking for immediate gratification," says Donna Italiano, executive editor of the video magazine "HBA Perspectives" in New York, a food marketing broadcast. "Superstores carry prestige fragrances and color cosmetics to appeal to that impulse."

The Lucky Southern division of Lucky Stores, Buena Park, Cal., hopes its emphasis on quality perishables will attract the young professional. The 271-store chain defines its typical customer, however, as a female 24 to 54 years old, low to middle income. Within that segment, the Hispanic population is growing dramatically, according to Dick Frederickson, vp-director of marketing.

While acknowledging the challenge of attracting the young professional, Mr. Frederickson says Lucky has a better chance of succeeding now that its three-year transition into quality perishables is complete. Based on the findings of four outside research and consulting agencies, Lucky moved its produce to the front of the store, expanded the area's square footage and spiffed up the look through the displays. The chain also developed service bakery and deli departments and improved its meat presentation.

Like many stores, Lucky finds it impractical to fragment its target customer beyond one or two subsegments. "We've identified more singles and more male

Coupon machines on the cutting edge

Clipping coupons may become a lost art if coupon-dispensing machines take off as fewer of the new grocery consumers clip coupons than their predecessors.

About 56% of all consumers surveyed by the Food Marketing Institute, Washington, say they use clipped coupons "pretty much every time they shop, or fairly often," according to FMI's 1984 Trends report, slightly lower than previous years.

Demographics watchers are interested in FMI's subsequent findings: Among male shoppers—an increasingly significant group—only 31% say they use coupons "pretty much every time they shop." Of women who work outside the home, 46% of those polled say they almost always use coupons, compared with 59% of women who don't work outside the home.

Leslie Payne is one of those working women who says she doesn't have time to clip coupons. "You get the paper on Sunday, there are hundreds of coupons. I don't even bother. Who has the time?" But Ms. Payne, assistant to senior vp Dick Salmon of New York-based Melmarkets, thinks she would have time for a new coupon-dispensing machine developed by the Adtronics division of Promovision, Jamaica, N.Y.

Melmarkets, parent to 16 Mel Weitz Foodtown stores, is one of seven supermarket chains testing Adtronics' coupon-dispensing machine. Other companies include Pathmark Supermarkets, Grand Union Co. and Finest Supermarkets, all on the East Coast.

By dispensing coupons at the point of purchase, the coupon machine may be the harried shopper's convenient alternative to clipping coupons. But even more important, Adtronics vp-marketing Walt Stern says, the machine offers manufacturers less misredemption and controlled liability.

"I don't know if it will help retailers address any particular segment of the market," he says, "but it will be another innovation that marketers have to offer. It's not going to eliminate waste and misredemption, but it will certainly cut it down."

By modifying an automated teller machine, Adtronics has created a machine that prints coupons on request; preselected, preprinted coupons also can be dispensed.

Using a magnetic-strip card, supplied by Adtronics for the machine, a customer can select coupon offers from a series of menu screens.

The machines can be programed so that once a coupon is selected, it disappears from the screen, limiting distribution to one per customer. If the customer forgets to take the coupon it is drawn back into the machine.

"Chain executives decided to test the machine because customers are so coupon-oriented," Ms. Payne says. "I guess we felt that customers would go into the stores to get the free coupons and we could build traffic."

Among the brands included in the August-September test are Kellogg's Whitney's yogurt, Bristol Meyer's Nuprin pain reliever, Ban Roll-On antiperspirant, Lipton ice tea, Hebrew National franks and Marcal bath tissue.

For their involvement in the series of four two-week flights, marketers pay the face value and a handling charge for each coupon redeemed. There is no other charge during the test, Mr. Stern says.

> **The coupon machine is "not going to eliminate waste and misredemption, but it will cut it down."**
>
> —*Walt Stern*
> *Adtronics*

The test will attempt to measure, among other things, coupon price sensitivity. "We want to see if redemption levels are comparable when there is a differential of a dime," he says. "We want to show manufacturers that they don't have to offer huge discounts on in-store coupons. Ten cents off a free-standing insert isn't worth a dime just to spend the time cutting out the coupon. But if you walked in the store and saw 10 cents off on a dollar item, you might say, why not?"

Intercept surveys conducted by Beta Research in Syosset, N.Y., will determine what percentage of customers are taking the coupons.

"There's definitely a place in the market for a vehicle like this," says Howard McKay, vp-sales for Seven Oaks International, the coupon redemption house in Memphis, Tenn. "We're all waiting for the first one that really works," he says, alluding to the Adtronics' predecessors that either went bankrupt or never made it off the ground. He says he is not familiar with Adtronics' system.

Mr. McKay is enthusiastic about coupon machines joining forces with scanning technology to put tighter controls on misredemption. At least one supermarket chain, Wegman's in Rochester, N.Y., is scanning its Univeral Product Code coupons, a procedure that may reduce coupon handling time at the checkout as it monitors redemption. Pathmark is moving in that direction, Mr. McKay says, beginning by scanning its own store coupons.

"Theoretically," he says, "a person buys a number of items, the clerk scans them at the checkout and the register's computer retains that scanned data. The store then scans the coupons. The checkout person is immediately alerted to any coupons that don't match up with the scanned items."

Adtronics machines, Mr. Stern says, can be programed to dispense coded coupons. —*D.K.*

Stores

(Continued from Page 27)

shoppers," Mr. Fredericksen says. "We know they're out there, but we haven't done anything extraordinary to address them. You hope you do the things that will appeal to all these people."

While some supermarkets toy with ways to attract male shoppers—more automotive items, more point-of-purchase educational material—at least one convenience store chain concentrates its efforts on the distaff side. "The convenience store has always had the male shopper," says Robert Page, president of the 90-unit Quick Chek in Whitehouse Station, N.J. "We wanted the women in the store. After all, they are 51% of the population."

Quick Chek developed a 7,000-sq.-ft. combination drug and convenience store almost eight years ago, a format it recently expanded with the May installment of salad bars. Quick Chek's 13 "super convenience centers" offer a full-line deli, cut flowers, a cosmetics area with lines from Revlon and L'Oreal, greeting cards and on-premise baking.

More women are shopping in the stores, according to Mr. Page. "It's a new concept," he says. "Some people walk in and don't know what the hell it is. But they seem to gravitate to it. They really like it." The new clientele, he says, includes young professionals and seniors.

Store 24 in Waltham, Mass., is another convenience store reaching new customers with an updated design. "The store's old look was balloons, t-shirts piled high, the hippie generation of yesterday," says Elinor Selame, president of Selame Design, the Newton Lower Falls, Mass.-based company that designed Store 24's new corporate identity. "They weren't talking to the yuppies of today."

> **"Demographics are changing, and if we're not doing anything about that, it could be a real problem."**
>
> —*Don Szalanski, Wetterau*

Selame Design developed the chain's logo and color theme, updated fixtures and outdoor window canopies, among other things.

Further down the East Coast, Giant Foods in Landover, Md., has put a tremendous effort into nutrition awareness. In 1981, the 131-store East Coast chain launched a two-year "diet alert" in a brand-specific program that originally detailed 400 items with low-sodium, fat and cholesterol contents. Expanded to include 1,600 brands, the program requires selected marketers to supply their brands' nutritional content.

The chain has sponsored programs with the National Heart, Lung & Blood Institute, publishing the "Eater's Almanac," which focuses on reducing cholesterol, fat and calories. Fliers, seminars and coloring books for children are included.

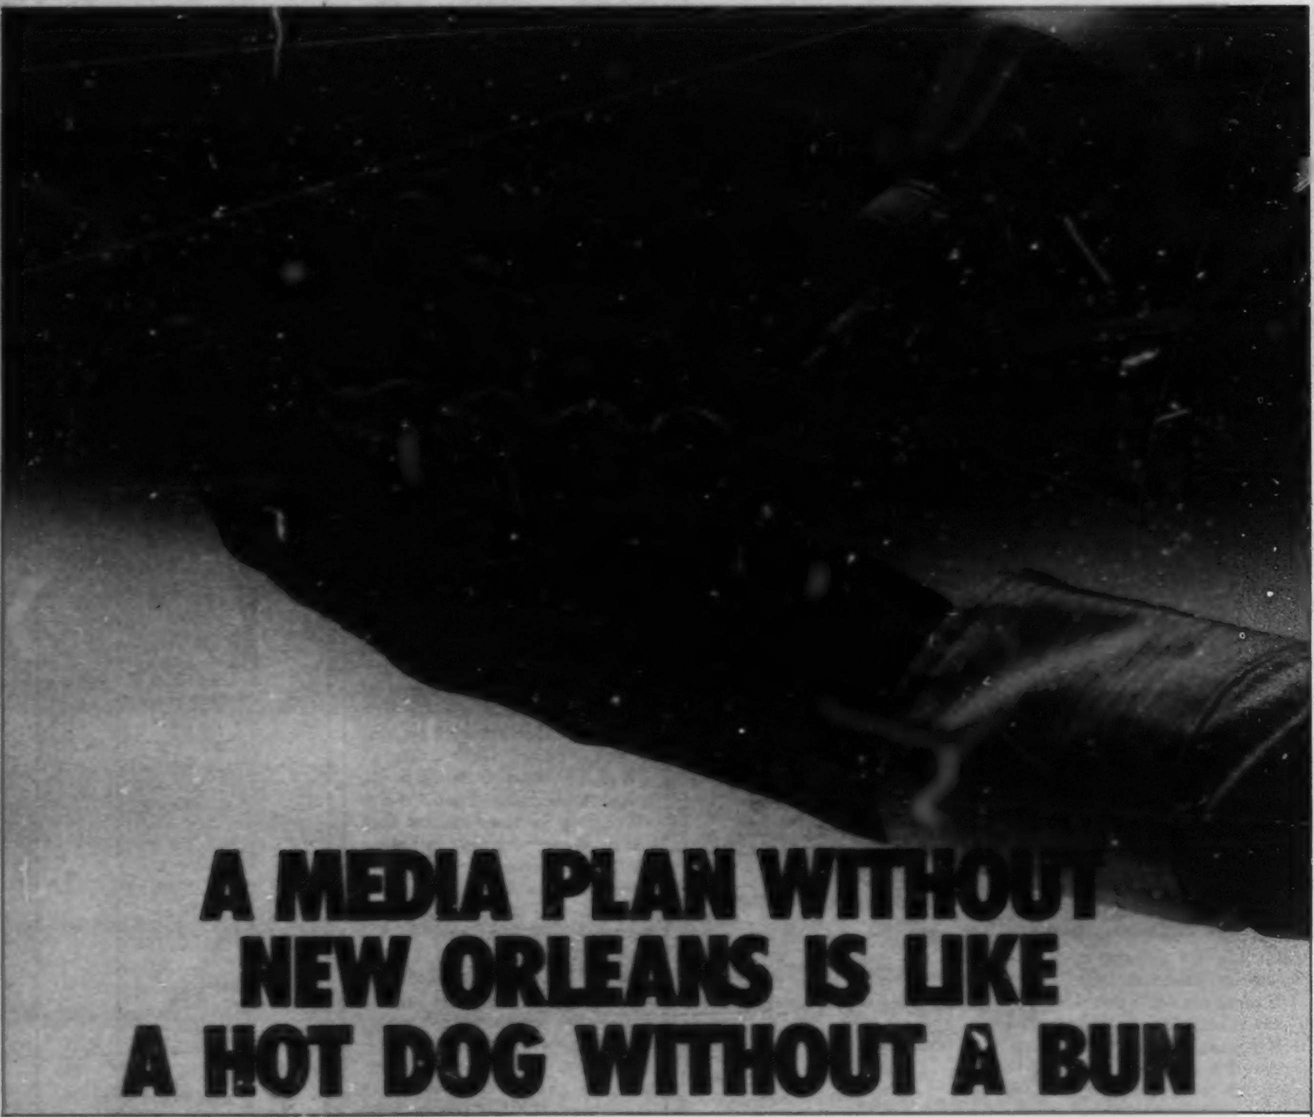
"In some ways, Giant has become the nutrition answer man for the Washington area," says Janet Tenney, manager of nutritional programs.

While major chains such as Giant Foods use corporate muscle to address evolving buying patterns, independent grocers often rely on their distributors to develop strategies. This week the marketing minds of Wetterau, a major St. Louis-based distributor, will convene for their annual brainstorming conference.

High on the agenda is a workshop on "meeting the needs of today's changing buying patterns," says Don Szalanski, vp-advertising and promotions for the 2,000-account company.

"People are creatures of habit and they want to continue doing business in the past," he says. "Demographics are changing, and if we're not doing anything about that, it could be a real problem." Mr. Szalanski refers to a "Supermarket Insights" video report on the death of the mass market: "It said that because all the decision makers are in the older age bracket, many retailers are still stuck in the 'Beaver Cleaver syndrome' instead of 'Three's Company.' They think that today's family is a mother, father, little girl and little boy.

"It's not like that anymore, and the statistics prove it," he says. "Some of us recognize that and we want to change."



Or pralines without the pecans. Or seafood gumbo without the seafood. You just can't cover the food market without America's favorite place to eat — New Orleans. Last year, New Orleanians spent $1.8 billion at area food stores.

Ethnic products satisfy craving for something new

By Sewell Whitney

Intent on satisfying consumer hunger for new dining experiences, food manufacturers are having a food fight—ethnic-style.

New ethnic food products abound, available from both large food conglomerates and small ethnic independents. Mergers and acquisitions, signs of a hot market, are also rampant as industry giants gobble up small, successful ethnic food companies with an appetite that rivals that of their customers.

Why the commotion over previously ignored cuisines? In 1984, sales of ethnic food products surpassed $4.5 billion, according to Business Trend Analysts, a New York-based research company. Moreover, for the past 10 years market sales have increased at an annual average rate of 10%, BTA reports.

Indeed, in-home consumption of ethnic foods has increased 50% since 1974, according to Market Research Corporation of America, a Stamford, Conn.-based research company, which publishes "Menu Census."

Like tv's A.C. Nielsen Co. ratings, the "Menu Census" is a detailed consumption diary. The 26-year-old survey is sent to 2,000 households drawn from the U.S. Census. Subscribers include General Foods, Pillsbury, Beatrice, Del Monte, Chun King and Pet Foods.

Most of the reason for growth falls to increasingly sophisticated and venturesome consumers who are rapidly expanding the frontiers of American cuisine, but other market influences include a burgeoning number of immigrants, an increase in the number of two-paycheck homes and advances in food packaging and preparation.

Both consumers and products have been changing, and all have been ingredients in an ethnic food boom, especially in Italian, Oriental and Hispanic cuisines.

> **"When they discover the variety and versatility of ethnic foods, they want to make them for themselves . . . ."**
>
> *—Mike Paxton*
> *Pillsbury*

Ethnic restaurants also have been more successful, enhancing interest in the various cuisines. In 1984, an annual study by the Washington-based National Restaurant Assn. found that among the 250 fastest growing menu items in the country, Mexican food was fifth, pizza eighth, and Chinese/Oriental 11th. Decaffeinated coffee led the list.

Restaurants have assumed the prime role in educating the American consumer. "There are many quality representatives and a lot are high-profile," says a spokeswoman for the NRA. "The image and reputation of ethnic foods has been enhanced by these establishments."

Food industry experts agree. "Consumers are exposed to new cuisines through the restaurants they visit," says Mike Paxton, business unit manager-Mexican products for Minneapolis-based Pillsbury Co. "When they discover the variety and versatility of ethnic foods, they want to

business. Frozen dinner prices range from $1.60 to more than $4 a serving.

The premium frozen dinner lines, Dinner Classics and Classic Lite, generate about $275 million for Armour and more than 18% of the frozen dinner market, according to Susan Hanley, Conagra manager of product publicity.

Dinner Classics was introduced in 1980 with eight varieties, making it one of the first premiums on the market. Later as the frozen dinner and entree segment began to take off, Armour brought the line up to 20 varieties in three new product introduction waves over four years. Classic Lite, the lower calorie dinners in the same varieties, was introduced nationally in 1984.

The Armour frozen dinner campaign, created by Bozell & Jacobs, New York, emphasized the slogan, "So good, they belong in the dining room," and ran primarily in print media, including the women's service magazines, and spot tv.

In late August, Armour fired the agency and has yet to select a replacement.

Ms. Hanley would not reveal Armour's ad budget for the rest of the year, but did say the budget would be increased with the appointment of a new agency and the development of a new campaign.

Armour's biggest competition in the premium frozen dinner market is Campbell Soup's Le Menu, introduced in 1982. The line, which now includes 19 varieties (11 of which were introduced in the past 12 months), generated about $200 million in sales last year for about 14% of the market, according to Le Menu marketing manager Robert M. Revelle.

Rapid introduction of new products was the hallmark of the premium frozen dinner category during the past three years, Mr. Revelle says, but the introductions may be slowing down because of growing competition from small, entrepreneurial companies, many of them marketing ethnic specialties, and the steady growth and improvement of frozen entrees from such tough competitors as Stouffers' Lean Cuisine.

"A shakeout is imminent," he says. "The category has been growing at 20% a year, and that just can't continue. Manufacturers have been buying their way into the market with heavy trade and consumer promotion—especially a lot of couponing—and they can't keep it up and make money."

Marketing premium frozen dinners, once a breeze, has become difficult for another reason—the limited capacity of the grocer's freezer.

"Everyone is competing for space in the freezer, and you have to work pretty hard to convince retailers that they should stock your present products and your introductions," he says.

As a result, marketers must maintain a strong trade marketing campaign as well as a strong consumer advertising campaign. "You must have a strong trade program because retail awareness of new products is almost as important as consumer awareness these days. And of course, spot television and the women's service magazines remain essentials for consumer awareness."

Ogilvy & Mather, New York, manages the product line's undisclosed advertising budget.

Despite the competition, Mr. Revelle says the Le Menu line will continue to expand. "The future of the business and the

make them for themselves, and in doing so find that they are fairly economical and fun to prepare."

Industry analysts observe that retail sales of food items customarily lag only two to three years behind restaurant sales.

Looking to increase its market share, Pillsbury last year acquired Apollo Foods, a Fairlawn, N.J.-based manufacturer of filo dough and other Greek foods, and Azteca, a Chicago-based maker of corn tortillas.

"We'd like to catch on in the trend in ethnic foods, and we'd like to expand the business that these companies have already," Mr. Paxton says.

Pillsbury also purchased Long Beach, Cal.-based Van de Kamp's Frozen Foods from General Host Corp. Van de Kamp frozen Mexican dinners and R.J. Reynolds' Patio products race neck-in-neck for the top spot in the $235 million Mexican frozen food market. Each has about a 15% share.

Reynolds markets other Mexican items through its Del Monte and Ortega lines of dry Mexican foods. Both offer leading shelf lines, including refried beans, sauces, burrito filling mixes and taco shells/kits.

BENIHANA
中華丼の具

In-home consumption of ethnic foods, such as these varieties, has increased 50% since 1974, according to MRCA.

"Mexican may be the only true ethnic in the frozen food case," says Bill Crosson, director-marketing for Van de Kamp. Frozen food shoppers, he says, tend not to shop for a particular ethnic cuisine, but rather for a particular frozen food concept, such as low-calorie cuisine.

"A frozen entree/dinner user decides he or she wants a particular style of product—image, caloric content, brand name, convenience of preparation. Most of them [frozen food consumers] are buying a concept first and ethnic second," he says.

The big sellers in this "concept" market are Stouffer's Lean Cuisine (the biggest maker of frozen ethnic foods), Campbell Soup's Le Menu, H.J. Heinz' Weight Watchers and Armour's Dinner Classics.

Mr. Crosson ventures that "Almost 50% of Oriental frozen food is bought for the concept."

However, he says, Mexican food has a special appeal for the yuppie market and is more frequently bought for its ethnicity.

Most ethnic food producers say they are targeting their ethnic foods to the largest demographic, the American population at large. However, sales of these food items remain strongest where the ethnic populace has settled.

Sales of Oriental foods are best on the East and West Coasts. Mexican sales are biggest in the Southwest. Italian foods are an exception, since they have already become "American mainstream," say

(Continued on Page 48)

development of market share will depend on how well manufacturers guess at the next consumer taste trends.

"It's not good enough to introduce a three-component dinner and let it sit. You have to keep up with the consumers, and the consumers are always looking for something new in taste," he says.

More ethnic meals are likely to be the next introductions, industry experts say, following the rapid increase in popularity of ethnic restaurant cuisine as well as canned and frozen meal components.

"Frozen ethnic foods did extremely well last year and have been doing well for a number of years," says Mr. Chamberlain of *Quick Frozen Foods.* "They are a certainty for more growth—particularly in the dinner category."

Though Chinese frozen entrees grew rapidly in 1983 with the introduction of the Benihana frozen entrees, Mexican foods generally have been the biggest seller, followed closely by Italian foods, he says.

In 1984, however, Italian frozen food sales passed the $200 million mark to become the new leader in that category, Mr. Chamberlain says.

With that strong support in mind, consumers can expect more Italian-style dinners this year and next as well as a host of other ethnic-style meals, as marketers begin another wave of product introductions.

"Ethnic food is certainly a hot and growing segment of the market," says Mr. Revelle of Le Menu.

"You can expect a virtual explosion of the whole category."

Mr. Revelle would not say what ethnic dinners LeMenu has planned, but he confirms the company is looking at new ethnic varieties.

That means that when the commuter train pulls into the suburb, the tired commuting couple will have a lot more dinner choices waiting in their freezer.

The 8 Essential Food Groups.

When it comes to food sales, Boothland is one appetizing market. We consume over 3 billion dollars' worth of groceries each year, making us the 9th largest food market in America.

You're probably thinking it must be expensive to feed all those people, right? Not as much as you'd expect.

We've cooked up a 15% discount for buying an ad in all eight Booth Newspapers. And we do it with the convenience of one insertion and one invoice.

That's a great deal. Especially when you consider that we're America's 7th largest metro market.

And we don't only rank high in food sales. We're also the 5th largest market in car sales, 8th in drugs and cosmetics and 9th in apparel.

So if your clients' sales are a little undernourished, the award-winning Booth Newspapers can help. Phone Booth today at (313) 540-5600. Represented nationally by Newhouse Newspapers.

Ethnic

(Continued from Page 47)

food company executives.

"Taking Mexican nationwide is tough because 65% of its sales are rung up in the West and Southwest," Mr. Crosson says. "As you move eastward, people's conception of Mexican shrinks. Whereas western consumers appreciate the diversity of Mexican food, easterners think that Mexican means burrito dinners," he adds.

"In order for Mexican food to continue to succeed there must be an altering of two perceptions," says Thomas Brenker, executive director of the Washington-based Mexican Food and Beverage Board.

"People still look at Mexican food in terms of Montezuma's revenge and as very hot. That of course is a purely Mexican anomaly more than anything else."

Greater variety is also needed, Mr. Brenker says. "Expanding their offerings is of paramount importance to Mexican restaurants.

"One of the things that gave rise to Mexican food was that consumers were looking for something new. If they [restaurants] don't come up with new things consumers will look elsewhere."

Elsewhere could be Oriental. Health-conscious Americans are looking for foods that are low in calories, nutritious, natural, tasty and fun to prepare—qualities known within the industry as "hot buttons."

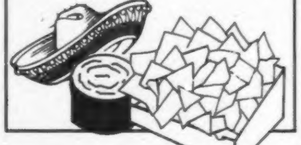
Retail sales of Oriental/Chinese/Japanese foods will double over the next five years to reach $1 billion by 1990, according to Packaged Facts, a New York-based research company.

Americans continue to eat ethnic

Figures represent the number of times Americans eat these ethnic foods at home and away from home per capita.

Hispanic

	1973	1984
In-home	5.2	7.4
Away	2.5	5.2

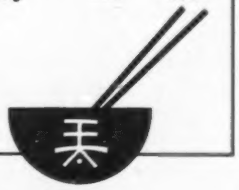


Italian

	1973	1984
In-home	4.5*	13.5*
Away	.8*	8.8*

Oriental

	1973	1984
In-home	4.3	5.4
Away	1.8	4.0



*Excludes pizza and some pastas.
Source: Market Research Corporation of America

Packaged Facts also reports that frozen Oriental food is the fastest growing segment in the entire ethnic foods industry.

Reynolds and Beatrice are at the top in this market. Reynolds' strength is its Chun King line of frozen entrees, recently improved to face the mounting competition. Beatrice's La Choy line of more than 44 shelf-stable Oriental foods accounts for more than 70% of its sales in this market.

However, the diversity of Oriental food makes room for manufacturers and buyers of everything from teriyaki to tofu.

"One of our main target groups is the yuppie. Someone who appreciates gourmet coffee and fine wines and the like," says Joel Dee, president of Premier Japan, a Union, N.J.-based import company.

"When it comes to our products [ramen noodles, soy sauce, kani bo] we don't expect our customer to be too sophisticated. It's more important that they are interested in expanding their horizons.

"Their sophistication and knowledge are really shown in their preference for quality," Mr. Dee says.

California has been the most receptive area for Premier Japan products, Mr. Dee continues. "But we often find that our success is based on income sensitivity rather than regional sensitivity. We are also seeing great success in both the international and nutritional sections of groceries."

Italian food, meanwhile, remains the most popular ethnic food in America.

According to the NRA, 95% of Americans have eaten in an Italian restaurant at least once.

Retail sales of Italian foods have topped $1.6 billion, according to BTA, larger than Mexican and Oriental retail sales combined.

Contributing to this success is the current reevaluation of pasta. With athletes extolling the virtues of complex carbohydrates, pasta sales have soared.

In the four years ending in 1984, total in-home consumption of spinach fettuccini, linguine and other exotic pastas increased 54%, according to MRCA.

Not surprisingly, sales of Italian sauces also have scared at an annual rate of 16.7% for the past 10 years according to BTA.

"With pasta being so popular, it's good to have it in our portfolio," says Corin Gendell, senior product manager for Ronzoni Pasta of Ronzoni Foods Co., Hicksville, N.Y., a wholly owned subsidiary of General Foods, White Plains, N.Y.

Ronzoni, for 70 years a privately owned company, was acquired by General Foods in 1984.

In spite of pasta's new image as a nutritious food, "Ronzoni remains targeted to the world of pasta users, from housewives to athletes," Mr. Gendell says. Ronzoni will be one of the sponsors of the New York City Marathon this year.

Major food companies in the Italian market include Campbell Soup, Stouffer and H.J. Heinz.

Campbell's Italian line includes Mrs. Paul's frozen entrees and a variety of sauces under the Prego label, designed as homemade spaghetti sauces. The Camden, N.J.-based company also makes Franco-American.

In response to declining sales for canned pastas, Campbell recently introduced a gourmet version, Superiora, aimed at maturing baby boomers.

"There has been good response to this product. In fact, we might expand the line," says a Campbell spokesman. "Also, there are plans to market a number of new ethnic items, including some northern Italian-style soups."

Campbell's marketing posture does not include the marketing of only ethnic foods. For years now, it has been selling many of its mainstream products in Spanish to the Hispanic community, using the New York-based Hispanic advertising agency Conille.

Another company in the Italian market is Pillsbury, Minneapolis.

In the estimated $1 billion frozen pizza market, the company's Totino pizza leads a field of more than 175 companies, reports the Westport, Conn.-based "Food and Nutrition Press" newsletter. Totino is market dominant with a 7.5% share, according to a recent in-house survey, says Dick Anderson, director-marketing. In addition, Pillsbury's other pizza offerings help to rack up an over-all frozen pizza market share of 37.8%.

So what is next on the horizon? Cajun? Thai? Indian? All of the above. The American tolerance for spicy and "hot" foods is growing.

One hot contender for a place at America's dinner tables is Austin, Tex.-based Caliente Chile.

The Tex-Mex product comes in a package that includes seven separate packets, allowing users to mix it with beef to suit their own tastes.

The packets include chili powder (an American invention), onions, garlic, salt (allowing its users the option of leaving it out of their meals), cumin, oregano and "two-alarm" red pepper.

Tv ads state: "If you put in all the pepper, it's two alarm. If you use only half, it's one alarm. If you don't use any, it's a false alarm."

"The heat factor does scare some customers off," says John Nuhn, director-advertising and product development. "But heck, that's what pulls the wagon."

It seems whatever a customer wants, he can get in the growing ethnic food marketplace.

WHEN PUSH COMES TO SHOVE...
TRY BREAKTHROUGH MARKETING

It's a strategy for today. One that helps move a product through every avenue of distribution from broker to ultimate consumer.

It's a strategy that powers a product with customized innovative merchandising approaches and a dynamic visual sell that builds volume and profits.

Throughout 1985, we have been involved in moving over 100 products from 78 manufacturers into and out of over 3000 supermarket outlets...and we succeeded.

We have also been just as effective, one product at a time.

Whether you have a new product to introduce or an existing one to revitalize, let our next project be yours... because when push comes to shove, its SHE Advertising for • 'hands-on' merchandising • 'state-of-the-art' promotion • packaging that pulls • strategic advertising.

Cocaine: White-line fever in the ad industry

— Page 1

Net scatter market in turmoil as rates plunge

— Page 1

P&G ready to Crest with paste in pump

— Page 3

Winners and losers in nets' fall lineup

— Page 3

HIGHLIGHTS

DFS, Saatchi deal rumored 1

Dancer Fitzgerald Sample last week was the subject of strong reports that it had re-entered negotiations with Saatchi & Saatchi. It is believed the discussions were for either the sale of DFS or for Saatchi to take an equity position in DFS.

For some admen, coke is it 1

Current or former cocaine users who asked not to be identified say cocaine use is rampant in the advertising industry, and few independent drug-abuse experts disagree. The big surprise, they say, would be to find that cocaine use is not a problem in advertising, as it has been shown to be in entertainment, sports and elsewhere.

P&G gets pumped up 3

After nearly a year of frustrating delays, Procter & Gamble is introducing nationally its Crest toothpaste in a pump dispenser. Analysts believe P&G will spend $20 million to $25 million to introduce its pump.

Fourth-quarter ad budgets stable 4

Although marketers differ on how the economy will fare during the fourth quarter, most expect ad spending to stay generally on target.

CATEGORY REVIEW

Bicycles hit their stride 6

The bicycle market, which had been flat for the past few years, has come full circle, and U.S.-based marketers are pumping up new campaigns to meet the boom. An estimated 10.1 million bicycles were sold in 1984, up 12% from '83. And '85 totals should be even better.

FTC bill on admen's agenda 6

The House last week caught up with the Senate by passing a Federal Trade Commission reauthorization bill. A key obstacle to passage is also a key issue to advertising industry groups following the bill: Whether Congress will restore the FTC's right to regulate "unfair" advertising.

Nike team gets stronger 12

Nike hopes to catch lightning in a bottle twice with a new line of baseball shoes and apparel applying the same formula as the company's highly successful Air Jordan basketball line. The Beaverton, Ore.-based sports shoe marketer has signed New York Mets pitcher Dwight Gooden and Atlanta Braves outfielder Dale Murphy to three-year contracts, creating separate lines of shoes and apparel called Dr. K, after Mr. Gooden's nickname, and Number 3, Mr. Murphy's number.

Taylor thinks young 39

W.A. Taylor Co.'s Drambuie and Tia Maria liqueurs will receive new ad efforts next month designed to woo younger drinkers. The campaigns—budgeted at $3 million each—reflect Miami-based Taylor's aggressiveness with brands that show potential with the consumers who are upgrading the products they are buying.

Avedon Chanels ad efforts 72

What do Barbara Walters, Phyllis George, Jerry Hall and Nan Kempner have in common? Chanel hopes it's Coco, its new fragrance, named for Chanel's namesake and founder. The debut of Coco marks the first Chanel ads shot by Richard Avedon since he caught Catherine Deneuve before the camera for Chanel No. 5.

INTERNATIONAL

More French babies 55

A French survey taken in July has shown that 62% of 900 respondents think there is a birth crisis in France, and on the strength of this, CLM/BBDO and three outdoor advertising brokers in Paris plastered the town with outdoor boards of bare babies and a plea for procreation.

Dutch up tv time 56

After years of debate, the Dutch government finally is launching a third commercial tv channel, which will open up more commercial tv time because of pressure from marketers, agencies and pan-European satellite tv.

NEW PRODUCTS

Smacks of Smucker's 68

J.M. Smucker Co. is using its good name and Knudsen & Sons' juice market know-how to introduce a five-item line of Smucker's 100% Fruit Juices into selected test markets.

OTHER NEWS

A consumer survey in two markets in Texas—traditionally a Coca-Cola stronghold—shows Coke in its various forms is holding market share since the company reformulated regular Coke. But there also are indications of slippage in loyalty that may provide a wedge for the competition. Page 4.

The Assn. of National Advertisers, in tapping Dan Jaffe to run its office, plucked a senior staffer from the American Advertising Federation. The job had been filled by Sam Thurm until his retirement. Page 6.

Amana Refrigeration is injecting some humor into its standard promotional advertising along with the introduction of its new line of lower-price Radarange microwave ovens. Page 12.

Coleco Industries is bringing the cliffhanger to tv ads for Sectaurs action figures. Cliffhanger endings worked for movie serials in the 1940s and 1950s, the "Star Wars" sagas and today's tv soap operas. Page 47.

Philip Morris USA is rolling out an extension of its popular Virginia Slims brand nationally. The new cigaret, Virginia Slims Lights 120s, will begin appearing early next month. Page 62.

CAMPAIGNS BREAKING

Charles of the Ritz breaks its new $4 million campaign, "Confessions of a child of the sixties," for Ritz skincare products in an eight-page insert in October *Vogue*, on the stands by the last week in September. Lord, Geller Federico, Einstein handles (AA, May 20).

Happy trails on way for EPB?

By JANET MEYERS

WASHINGTON—The $15 million Roy Rogers Restaurants fast-food account that has been a key client for Smith Burke & Azzam, Baltimore, is reportedly on the move to another agency that works with its parent, Marriott Corp.

A Marriott spokesperson said SB&A will serve out its contract, which expires at the end of the year, and "at that time we'll decide whether to make a change."

Some agency sources, however, said Earle Palmer Brown Cos., Bethesda, Md., had been approached by Marriott. Others said the company already had settled on EPB, a move that would consolidate $25 million of Marriott restaurant business at that agency.

Preseason skirmishes for ratings

By JAMES P. FORKAN

NEW YORK—The new season's tv ratings war didn't officially begin till today, but the Big 3 networks already have started moving their troops into position and scoring what they feel are important strategic points in preseason battles.

NBC executives were optimistic about their new Wednesday and Saturday programing moves, which got off to a strong start in the A.C. Nielsen Co. ratings for the week ended Sept. 15:

- "Golden Girls" and "227" made their so-called "sneak preview" Saturday debuts with winning shares of 43 and 40, respectively, opposite parts of two

Projects in Knowledge guide readied

New York—Projects in Knowledge has published a purchasing guide to promotional programs in the healthcare field. The guide describes 36 programs that can be adapted to different medical specialties and lay audiences. They include single-sponsored, specialty-oriented symposia, computer conferences for physicians, exhibits, direct-mail services and others.

The guide is available free from the company at 53 East 34th St. 10016.#

This issue $3.00. $55 a year.

P&G retains ad spending crown

Copyright ©1985 by Crain Communications Inc. Quotation or reproduction in whole or in part without written permission is expressly prohibited.

By R. CRAIG ENDICOTT

Procter & Gamble Co. flexed its ad muscle in 1984 to hold off serious challenges from General Motors Corp. and Sears, Roebuck & Co. in remaining the No. 1 national advertiser in the U.S. with spending estimated at $872 million, according to the 30th consecutive report on the 100 leading advertisers published by ADVERTISING AGE.

P&G, the perennial leader that was nearly dethroned in 1983 by this year's No. 3 advertiser, Sears, Roebuck & Co., is expected to be overtaken in 1985 by the combined advertising of No. 5 R.J. Reynolds Industries and No. 21 Nabisco Brands following their merger in 1985. Had the two companies merged in 1984, their total spending would have been $1.01 billion.

P&G increased its 1984 advertising 10.5% and was expected to do the same in 1985, even though it reported its first drop in earnings in 33 years at the close of fiscal year 1985, ended June 30. That performance, its results in 1984, is not far out of line in a year in which many of the top 100 advertisers reported either reduced sales or declining profits.

Advertisers during 1984 for the most part kept to the philosophy that when times get tough the ad gates must open. Proof is in the 15% aggregate advertising spending increase from 1983, a good financial year, when outlays for advertising and promotion were 10.9%. The 1984 ad increase surpassed that of 1982 when advertisers sought to rejuvenate sales by increasing ad spending 13.2%.

The year also was one of great marketing creativity. Advertisers got together for some rather unusual merchandising schemes: Shredded Wheat (No. 21 Nabisco) munchers got $5 off their Sprint (No. 82 GTE) long-distance telephone service with redemption of box tops; Mountain Dew (No. 15 PepsiCo Inc.) bottle caps earned a discount at NBC Records (No. 33 RCA); a joint promotion dubbed "tax relief" linked H&R Block and Alka-Seltzer (No. 74 Bayer AG); Beech-Nut (No. 39 Nestle) baby food touted its pureeing of branded goods such as Chiquita bananas.

It was a year that also enlightened the world with "Rambo" gum, a [illegible]-like shred (No. 93 Wm. Wrigley Jr. Co.), and licensed cereals from No. 14 Ralston Purina: Rainbow Brite, Gremlins, Cabbage Patch Kids and G.I. Joe Action Stars.

Over-all, the top 100 advertisers spent $22.80 billion in national advertising in the U.S., up from $19.40 billion in 1983. Of the total ad spending, $13.46 billion was in the nine media measured in this report, up 15.5% from 1983.

The difference between the total ad spending and measured media is the so-called unmeasured media total of $9.34 billion, up 16.6% from the prior year. Unmeasured media spending represents money that went into such support services as coupon efforts, direct mail, product sampling, premiums and promotions, point of sale, special events and trade shows.

The measured media include network and spot tv, network and spot radio, magazines, newspapers (only national advertising), network cable, outdoor advertising and farm publications. With total advertising in the nine media for all advertisers in the U.S. measured at $25.17 billion, the AD AGE top 100 accounted for 53.5% of all advertising spent in the those media. *(See chart on Page 154.)*

The second 100 leading advertisers monitored by AD AGE in the June 13 issue accounted for 11% of the nation's total for the nine measured media. Those percentages give the nation's top 200 advertisers a 64.5% share of total measured media spent by all advertisers in 1984.

Advertising in 1984 was spent in a dollar-inflated world market that saw total sales in dollars of the top 100 increase only 5.3% from 1983, although U.S. sales, accounting for 60% of the worldwide total, improved a healthy 14%.

U.S. advertising as a percentage of sales thus improved from 3.2% in 1983 to 4.0% in 1984, an increase affected by both lower sales and higher advertising. However, 10 companies on the list cut their ad budgets. Poor financial returns usually accompanied the reduced advertising.

Two of those companies, No. 99 Eastern Air Lines and No. 75 Volkswagen of America, suffered losses in earnings, although the losses were improvements over the previous year. Worldwide sales for No. 45 Sterling Drug, which gathers 35% of its revenues from abroad, dropped 3.8%; No. 30 Colgate-Palmolive's worldwide sales increased only 0.9%, and three others with reduced ad spending had sales gains of less than 5%.

One of the biggest shifts on the top 100 chart was made by No. 2 General Motors, which made a run at P&G as the auto maker increased its advertising 13.2% to $763.8 million, or 1.1% of its U.S. sales of $69.36 billion. GM led a pattern among the auto makers of funneling more ad support dollars into the local markets during 1984. GM rose from No. 4 in 1983, passing Sears, Roebuck & Co., which fell to No. 3 this year. GM also appears among the top 25 advertisers in all nine media—the only one to do so.

International Business Machines charged from No. 58 in 1983 to No. 18 in 1984 on the basis of heavy spending of $32.5 million on the IBM PCjr, a personal computer whose sales forced No. 77 Apple Computer out of its leading market share slot. But sales didn't

(Continued on Page 2)

Ad spending

(Continued from Page 1)

meet expectations, and IBM discontinued the model, dubbed the Peanut, in its second year of production.

Apple, in the meantime, pumped heavy dollars into its more sophisticated Macintosh to rise from No. 128 in 1983 to No. 77 in 1984. The spending—8.4% of sales in 1984 vs. 4.6% in 1983—helped Apple generate a 54% increase in revenues to $1.52 billion. However, beginning in mid-1985, the blush left the computer industry and Apple, now characterized by fading sales, a major reorganization, the absence of its two youthful founders and wholesale layoffs.

No. 3 Sears, the nation's largest retailer, experienced an 8% increase in both sales and net income although operating income dropped 12.1% in 1984, the latter a precursor of more difficult times in 1985. The company's merchandise group, accounting for 68% of total revenues in 1984, in the first six months of 1985 reported revenue gains of less than 1% and a drop in net income of 27%.

Retailers, whose financial returns have been mixed, seem to have adopted the same "unique selling proposition" by spending ad money promoting the idea that each offers a store within a store—"the seven worlds of Wards" (No. 42 Mobil Corp.); couture apparel lines within the mass merchandise aisles at J.C. Penney Co. (No. 11); "there's more for your life [*i.e.* financial services, insurance, real estate, merchandise] at Sears," and the "Store of the '90s" at No. 9 K mart Corp., which is inserting branded goods (the Jaclyn Smith line, for example) into its low-cost image and adding insurance and financial services to its racks while running up a big debt through acquisition.

Newcomers to the chart included two retail-oriented units: Hardware retailer No. 98 Cotter & Co. made its first appearance among the top 100, and retail-supplier No. 67 Levi Strauss & Co. returned after a four-year hiatus.

Publicly traded Levi Strauss, which has been repurchased in 1985 by the founding Strauss family, rose from No. 105 in 1983 primarily because of spending in support of its sponsorship of the Olympics. The company reported declines in both sales and earnings for the year and admits sales in its Olympics-related goods were not as strong as expected.

Cotter, a cooperative of True Value hardware and variety-store dealers, rose from No. 106 in 1983 primarily on the basis of its 182% increase in network tv spending to push the True Value store concept via Pat Summerall and local sports personalities.

Network tv again dominated the media totals for the top 100 advertisers, claiming $6.46 billion of their total measured spending, representing 75.5% of all advertising in the U.S. in that medium. In 1983, the 100 leaders contributed 74% of the total.

P&G maintained its lead in that medium, spending $412.7 million, or 47.3% of its total measured budget on network tv. P&G increased its spending in network tv by 12.6% over its 1983 level.

The U.S. Government and McDonald's Corp., No. 26 and No. 10 overall, respectively, doubled their budgets for the medium in 1984, making them the 24th and 10th largest advertisers in network tv.

Government spending increased primarily because of a $40 million sales program to raise money for the Olympics through the sale of Olympic coins. McDonald's, in a shift in market strategy, moved dollars away from spot tv and promotional spending for the big splash on network tv with a new campaign emphasizing food, folks and fun for the burger monarch that grilled its 50 billionth hamburger.

Spot tv again found P&G riding in the front seat, its $239.3 million expenditure considerably outpacing runnerup PepsiCo's $154.3 million. No. 22 Pillsbury Co., however, took the year-to-year percentage gain honors among the top 25 spenders in spot tv as it laid out $99.1 million, up 63.1% from 1983, to rank the Minneapolis-based company fourth among all advertisers in spot tv. The company's Burger King unit, with spending of $78.1 million in that medium, accounted for $32 million of the total Pillsbury increase for spot tv.

The 100 leaders' spot tv spending increased 8.5% to $2.70 billion in 1984, or 42.6% of all U.S. advertising in that medium of $6.32 billion.

In print (newspapers and magazines), where tobacco advertisers are among the largest contributors, spending for those industries was either down in both, or up in one and down in the other, a seesaw effect that robbed one to support the other.

No. 71 Batus (Brown & Williamson) and No. 62 American Brands (American Tobacco Co.) were down in both; RJR and No. 56 Loews (Lorillard) were up in magazines but down in newspapers; No. 6 Philip Morris Inc. was up in newspapers but down in magazines. Only No. 90 Grand Metropolitan p.l.c. (Liggett & Myers) among the cigaret marketers showed gains in both print media.

In magazines, the nation's two tobacco behemoths, RJR and Philip Morris, held down the top two rungs among all advertisers with total expenditures of $193.8 million and $140 million, respectively. No. 70 Jos. E. Seagram & Sons registered one of the larger declines (16.9%) among leading advertisers in magazines. Most of Seagram's total advertising decline of 3.2%, which dropped the company from No. 57 in 1983, came out of magazines, where Seagram spent 32.7% of its advertising in 1984.

The 100 leaders contributed $2.21 billion in consumer magazine spending, up 16.1% from 1983, in taking a 47.3% share of all U.S. advertising in that medium in 1984. U.S. magazine spending rose 18.5% to $4.67 billion as over-all share of the 100 leaders declined from 48.3% in 1983.

No. 18 IBM spent heavily in both, boosting magazine spending 132.2% to $63.1 million and newspaper spending 207.5% to $36 million. American Telephone & Telegraph (No. 7), an IBM competitor now that that company has linked up with MCI, boosted its spending 29% to $79.1 million in magazines, but dropped newspaper expenditures 19.2% to $58.2 million.

GM was the largest national newspaper advertiser, spending $109.4 million in that medium, up 23.6% from the previous year, although only 14.3% of the company's total ad spending.

In fact, advertising increased across the board for virtually all auto advertisers making the top 25 lists for print—No. 8 Ford, GM and No. 23 Chrysler appeared in the top 25 lists in both magazines and newspapers, increasing their advertising substantially over 1983 levels. No. 47 Nissan Motor Corp. and No. 57 Toyota Motor Sales Co., appearing among the top 25 newspaper advertisers, both pruned their ad budgets. Only No. 75 VW among the auto companies suffered a decline in print—down 11.6% in magazines.

GrandMet's (Liggett & Myers) boost in newspaper spending accompanied a sizable market share growth from a 4.8% share in 1983 to a 5.8% share in 1984—a rather dramatic move in a cigaret market that has shown little growth in the past few years.

Cigaret marketers, however, imitated the retailers in coming up with the same marketing scheme going into 1985—the introduction of the 25-cigaret pack at the same price as the 20-cigaret pack. PM introduced its 25-unit Marlboro brand in early 1985, RJR introduced Century 25s in August, 1985, and Batus (Brown & Williamson) launched its Richland brand touting "five free per pack" in early 1985.

The airlines also raced tobacco marketers in reducing advertising allocations for newspaper. No. 95 Delta Air Lines' spending in the medium dropped 17.2%, No. 96 Trans World Airlines dropped 2.3% and No. 99 Eastern Air Lines fell 16.9%. All three, which are ranked among the top 25 advertisers in that medium, are laboring in a cutthroat market marked by spiraling operating costs traced to high wage contracts and benefit packages and low-cost regional competitors, such as People Express, which are cutting into margins by forcing the major airlines to pare their rates.

With tobacco marketers and airlines among the 100 leading advertisers reducing their spending, the 100 leaders as a group dropped from 36.8% of total national newspaper spending of $2.57 billion in 1983, to 31.2% of total U.S. spending of $3.16 billion in the medium in 1984.

Outdoor advertising—a medium relying heavily on tobacco advertising—faced the similar plight of newspapers as RJR, PM, Loews, Batus, American Brands, each among the top 25 spenders in the medium, cut spending. Again, GrandMet was the lone holdout. Picking up the slack were beer advertisers: No. 84 Stroh Brewery Co. hiked advertising 144.1%; No. 19 Anheuser-Busch Cos., 36%, in outdoor.

Outdoor, which registered a year-to-year increase of 0.7% to $73 million among all advertisers in 1984, saw the 100 leader's share of the total decline to 45.3% from 53% in 1983.

The top 100's 7.6% increase in spot radio spending to $485 million, dropped the group from 40.6% of total spending in the medium in 1983 to 36.4% of the $1.33 billion spent on spot radio in 1984.

Anheuser-Busch was the nation's leading user of spot radio, spending $38.3 million in the medium, down 5.9% from the prior year. While No. 55 Adolph Coors Co. answered the A-B decline with one of its own—12.3%—Stroh Brewery pushed spot radio advertising upward 28%. No. 100 Van Munching & Co., however, increased its advertising in the medium for its import brands, Heineken, Amstel Light and Grizzly, by 110% to $30.7 million, ranking it third in the medium. Apple Computer led all top 25 advertisers in spot radio in year-to-year spending with a 275.9% increase in 1984 over 1983.#

WHO SAYS SEARS ISN'T A
RIOT

Department stores offer more for your life than ever before. Sears has not only gone boutique in merchandise as exemplified by the Silver Unicorn collection filling this tub in the south 40, but in services—financial, real estate, life insurance. Montgomery Ward is trying to revive sales through a stylish remake as demonstrated in this chic direct mail piece. Wards is also dropping the publication of its catalog.

Seagram, bridled by the growing anti-alcohol sentiment, sought to buy airtime on the three networks with this ad equating the alcohol contents of beer, wine and liquor. No dice, said the nets, who don't run ads on liquor. Undaunted, Seagram took its message to print.

Now we're cooking
Tupperware

Tupperware in the oven! Check out your dealer during her office break pitch or delayed rush hour. Those are her new hours—directed from the front office to revive sales.

Things Are Changing At Montgomery Ward

Beatrice

Beatrice's planting of the red banner on its various foods in an attempt to cast an umbrella of quality over its product multitude is symbolic of the company's drive to put order to its house after Hunts, Avis, Danskin, Halston, Jhirmack, Johnnie Walker, Max Factor, Orville Redenbacher, Playtex and STP came to dinner with the Esmark merger.

HEINZ
TOMATO KETCHUP

Ketchup, first recorded in America in 1779, is good to Heinz and sauce to investors who got this bottle delivered on a quarterly statement.

This helps keep it from coming back.
Introducing New Tartar Control Crest.

News entries in the $1 billion dentifrice market are the tartar control toothpastes. P&G brought its Crest tartar line to the market in 1984, but found itself facing a $40 million campaign backing early-comer Dentagard from rival Colgate-Palmolive.

American Brands, the 62nd largest national advertiser in 1984 with an estimated $133 million spent on U.S. advertising, up 9% over the previous year, continued to perform marginally in tobacco and liquor markets during the year, increasing total earnings by 6% on a decline of 1% in sales.

U.S. sales for New York-based American Brands, which accounted for about 44% of the company's total, remained static, climbing only $17 million in 1984 to $3.1 billion. Almost half of those sales came from the company's domestic tobacco operations and were supported by more than 50% of the company's measured advertising spending.

Advertising expenditures in the U.S. were an estimated $133 million, up 9% over the previous year. Worldwide, advertising costs at American Brands were $241.9 million, up 3% over the previous year, according to the company.

The company, however, continued its downward trend of placing less advertising in U.S. measured media. In 1984, AB spent an estimated $68.8 million, down 9% from 1983. Peak year for measured ad spending at American Brands remains 1981, when it totaled $82.2 million.

American Brands, because of its large international operations, felt the effects of the strong U.S. dollar in 1984. Although American Brands through American Tobacco's Gallaher Ltd. subsidiary had record sales and earnings in pound sterling, sales in translated dollars dropped 5.1% to $2.82 billion in 1984 and operating profit slid 7% to $114.3 million.

Domestically, American Tobacco and American Cigar, AB's two U.S. tobacco units, had operating income of $382.4 million, up 3% from 1983, on sales of $1.41 billion, down from $1.44 billion in 1983. As a whole, AB had net earnings of $414.1 million on sales of $6.995 billion.

Performance of the tobacco segment in 1984 was directly related to new product introductions. New styles of Carlton and Lucky Strike contributed as did across-the-board price increases for tobacco products in June, 1984, and another on selected brands in December.

New Carlton Slims Deluxe 100s, filter and menthol, were introduced nationally in September, supported by $3.3 million in six-media advertising spending as measured by Leading National Advertisers, most of which was in magazines. With these latest introductions, Carlton, the pioneer low-tar brand and industry sales leader in the ultra-low-tar category, is now available in 10 styles.

Carlton brands received $21.4 million in measured advertising support, according to LNA. As with the new product introductions, magazines claimed most of the dollars. Outdoor picked up the rest, some $8.8 million.

Two new Lucky Strike brands made their appearance in 1984. In February, Lucky Strike Low Tar 100s made its debut, and by July Lucky Strike Lights in kings and 100s went to market. The Lucky Strike filter line was supported by a major advertising and promotion campaign and achieved sales gains for the third consecutive year, according to the company.

Despite that, ad spending for all Lucky Strike brands was down for the year. LNA measured expenditures for 1984 totaled $11.2 million, off 13.2% from 1983.

Lucky Strike and Pall Mall, another American Tobacco brand, dominate the nonfilter category, together claiming almost 60% of that market. Pall Mall Red, the sixth-best selling cigaret in the U.S., receives no measured advertising support. In 1983, the entire Pall Mall product line was backed by $7.6 million in measured advertising. But last year, that figure was cut to $3.4 million, all of it going toward Pall Mall Light 100s.

American Tobacco's low-tar line includes the industry's best-selling charcoal filter brand, Tareyton, as well as Tareyton Lights and Silva Thins. None of these brands received measured ad support in 1984.

Over-all, the company's share of the domestic cigaret market continued to decline, down to 7.9% from 8.6% in 1983.

Following the industrywide trend, American Cigar experienced lower sales. American Cigar manufactures La Corona and Roi-Tan cigars and Antonio y Cleopatra, the division's largest profit producer. Media spending, primarily for its popular Grenadiers brand, was less than $500,000.

American Tobacco's British subsidiary, Gallaher Ltd., experienced a slight share increase in the U.K. cigaret market from 32% in 1983 to 33% in 1984. Benson & Hedges' Special Filter is the leading brand in the U.K. and Silk Cut is the No. 1 low-tar cigaret.

Gallaher is preparing to launch a "world-brand" type campaign for Silk Cut this October. Saatchi & Saatchi, which has done single-theme international campaigns for British Airways, is handling. The campaign is scheduled to start with the U.K. market, then move to the rest of Europe.

Though American Tobacco, founded in 1890, is the core business of American Brands, it is by no means going it alone. American Brands also offers financial services and office products, distilled beverages, food products, hardware and security, golf products, optical goods and services and personal care products.

In 1984, American Brands boosted its financial services segment in January with the acquisition of Southland Life Insurance. Previously, this segment had consisted solely of Franklin Life Insurance.

Total segment revenues last year, which are not included in consolidated net sales, were $858.3 million, up 47% from 1983. Total operating income, which is consolidated, was up 31% to $172.9 million, an increase brought about by the inclusion of Southland. Southland spent only a modest $17,300 in 1984, all in outdoor, according to LNA.

A major business emerging at American Brands is the office products segment, which includes Wilson Jones Co., formerly headed by Edward W. Whittemore who is now American Brands' chairman; Offrex Group, a British subsidiary of Gallaher; Master Lock, the world's largest padlock manufacturer, and Pinkerton's security and investigative services.

The office products segment had operating income of $33.8 million in 1984 on sales of $335.5 million, representing gains of 8% and 5%, respectively. To Wilson Jones' Ambassador line of shredders was added a line of high-security cross-cut particle shredders and the first portable shredder for computer printouts.

Swingline, which holds 70% of the U.S. stapler market, did not record any measured ad spending in 1984 after a modest $241,600 was spent on the product in 1983.

While the so-called "cookie wars" intensified, the Sunshine Biscuits division used a diversionary tactic by introducing a seven-item line of American Heritage snack crackers. It was termed the biggest new-product introduction in the company's history.

Sunshine chose to promote the regional diversity of the crackers, utilizing such names as Wisconsin-style cheddar and New York-style rye. Heavy trade deals dominated the marketing strategy. Consumer advertising was limited to a free-standing insert in September and a holiday promotion at yearend.

Apparently taking note of No. 1 Nabisco Brands' Almost Home and Chewy Chips Ahoy! and No. 2 Keebler's Soft Batch cookies, as well as other entries in the soft cookie market, No. 3 Sunshine decided it was the right time to carve a larger niche in the snack-cracker market. The American Heritage line was added to Cheez-its, Hi-Ho and Wheat Wafers.

All this activity resulted in the division's higher sales volume of $493.8 million, a 3% gain, but the cracker line introduction and the intense competition in the cookie sector took its toll on profits, off 14% from 1983 to $28.6 million.

The distilled beverages sector, paced by Jim Beam, the world's best-selling bourbon, outperformed the industry in posting record sales and operating results for the ninth consecutive year. Operating income for the sector rose 7% to $39.3 million on a 2% sales gain of $246.4 million.

While liquor sales industrywide continued to slide, sales of Jim Beam climbed. Jim Beam directs promotion for its bourbon to the younger consumer. It also stages the Jim Beam Stakes, a major Thoroughbred horse race, and in 1984 introduced the duck stamp decanter series featuring the artwork of federal duck stamps purchased by hunters. *Impact*, the wine and distilled spirits industry newsletter, ranked Jim Beam the fifth leading brand among all distilled spirits based on its case depletions of 4.04 million, a 2.5% increase from 1983. Jim Beam is one notch ahead of Brown-Forman's Jack Daniel's Black bourbon, whose 1984 case depletions of 3.7 million were down 1.6% from the previous year, notes *Impact*.

Each of the Jim Beam promotions was backed largely by magazine advertising, accounting for $2.2 million of the brand's nearly $2.7 million spending according to LNA, which tracks spending in six media. Outdoor got the balance.

Taylor Food Products, a Beam subsidiary and producer of the Mr and Mrs "T" Bloody Mary mix and other cocktail mixes, continued to achieve greater distribution of its products through supermarket and mass-merchandising outlets. New Mr and Mrs "T" products added in 1984 were Cream of Coconut, Strawberry Colada, Bloody Caesar and Hot Buttered Rum. Mr and Mrs "T" was supported in 1984 with $646,700 in measured ad spending, all of it in magazines.

American Brands continues in the forefront of the golf products industry with its Acushnet Co. products, which primarily include Pinnacle and Titleist golf balls. Acushnet had sales of $122.9 million in 1984, an 8% increase over the previous year, and operating income of $19.9 million, a 17% improvement. The Titleist Collection is the division's entry into the fast-growing golf apparel market. Shipments of slacks, skirts, sweaters and rainsuits to golf course pro shops began early in 1985. The company also is continuing its efforts to improve distribution in Japan, the world's second-largest market for golf products.

American Brands spent $5 million on its golf line on network tv and in magazines, up 11% from the previous year according to LNA.

The company spent $7.6 million in measured media on its personal care products in 1984, primarily on various items comprising Andrew Jergens Co. This compares with $6 million spent on personal care products in 1983.

The Jergens labels received $5.8 million in 1984, some $3.3 million of which supported Jergens Lotion, and $2.4 million backing Jergens Aloe & Lanolin Bar, according to LNA. The Jergens line received only $3.4 million in 1983 measured spending, some $3.1 million of that consumed by Jergens Lotion. Jergens, according to industry sources, is No. 2 in the $450 million hand-and-body moisturizer category with an 11% market share in dollars compared with market leader, Chesebrough Pond's Vaseline Intensive Care, at 19%. Keri lotion by Westwood Pharmaceuticals is No. 3 with an 8.4% share.

The Jergens' advertised line also includes Jergen's Gentle Touch soap, Jergens Aloe & Lanolin lotion & cream, Jergens Clear Complexion Bars and Jergens Lotion soap.

In addition to the Jergens' line, the company in 1984 largely funneled the rest of its ad spending for personal care products into Squeek shampoo where spending increased to $1.2 million from $600,000 in 1983 for shampoo and conditioner.

Fiesta deodorant soap, a new entry in 1982 that received $2.5 million in its introductory year and $2.6 million in 1983, got only $1,900 in measured spending in 1984, according to LNA.

Broadcast	3,304	2,614	26.4
Publishing	316	280	13.0
Video enterprises	54	13	308.0
Motion picture	28	33	-14.4

American Broadcasting Cos., New York, the 94th largest national advertiser, increased its advertising an estimated 40%, to $68.9 million, in 1984, a banner year for the company, attracting the attention of corporate takeover artists and eventually gave in to a friendly $3.5 billion buyout bid last spring from Capital Cities Communications.

When completed, the merger will represent the largest sale in U.S. broadcasting history. It was approved by ABC and Capital Cities shareholders in June, but the deal is not expected to be completed until early 1986.

The merger eventually could force the sale of more than $1 billion worth of broadcasting, cable tv and newspaper properties, because of Federal Communications Commission cross-ownership rules. The FCC forbids a single company from owning more than one media outlet in the same market unless the company is covered by a grandfather clause in those markets.

The selloff has already begun. Stations sold (pending merger approval) include: ABC's KTKS (fm), Denton, Tex., sold to Gannett Co. for $16 million; ABC's KSRR (fm), Houston, Tex., and Cap Cities' KLAC/KLLA (fm), Los Angeles sold to Malrite Communications; ABC's WRIF (fm), Detroit, and Cap Cities' WPAT am/fm, New York, sold to Silver Star Communications, Detroit, for $14 million; and Cap Cities' WFTS-TV, Tampa, and ABC's WXYZ-TV, Detroit, sold to Scripps-Howard Broadcasting for $246 million. Cap Cities also has sold its 55 cable tv systems, representing 375,000 basic subscribers in 16 states, to Washington Post Co. for about $375 million.

Capital Cities, whose principals have a reputation for smart, unsentimental business acumen, has said it might also deal away the ABC Radio Networks if the networks' ability to "serve the public as national sources of information and entertainment" is "seriously impaired" by the forced sale of the station outlets.

ABC was ranked No. 1 in terms of media revenues on ADVERTISING AGE's list of 100 leading media companies in 1984 (AA, June 27). Last year, media revenues totaled $3.65 billion, spurred by profits from the network's broadcast of the 1984 Summer Olympics, the most-watched tv event ever presented by a single network. Media revenues did not include book publishing, motion pictures, research services and insurance.

Total revenues were $3.7 billion, a 26% increase over 1983. The company also registered record earnings of $195 million, a 22% increase. Both revenues and income were down for the first quarter of 1985, while second-quarter figures showed minuscule gains.

Chairman Leonard H. Goldenson and president Frederick S. Pierce attributed the flat profit picture so far this year partly to increased corporate expenses related to the merger. Those expenses are believed to be about $25 million. Poorer upfront tv sales and ABC's third-place prime time ranking also are contributing to poorer sales.

The big winner from the increased ad budget last year was ABC Television Network, whose six-media expenditures of $29.6 million listed by Leading National Advertisers consumed 49% of the company's total measured media budget of $60.5 million. Virtually all of that amount was spent on magazine advertising. Measured media expenditures for the newly acquired Entertainment & Sports Programming Network of $2.5 million were the company's second-largest item.

The engine that drives ABC is the Broadcast Group, which has accounted for 87% of total revenues in each of the past three years. In 1984, the ABC Broadcast Group—which is made up of the ABC Television Network, the five owned tv stations and ABC Radio—amassed $3.3 billion in revenues, an increase of 26% over 1983. Pretax earnings increased 17%, to $427.8 million.

Still, there was an air of trouble at the company's Sixth Ave. headquarters after the final sweeps of the 1984-85 season. Even record-breaking earnings for the Olympics, which generated profits for the network of as much as $50 million, couldn't save ABC's contingent of prime-time ratings losers.

For the first time in 12 years, ABC was third among the Big Three in prime-time ratings for the season. CBS finished first with a 16.9 rating, spunky NBC was second with 16.2, and ABC limped in at 15.4.

The numbers prompted a shakeup in the executive offices, strengthening the hand of Broadcast Group president Anthony Thomopoulos. Sweeping changes were made for the fall prime-time schedule. ABC has added eight new series for September, and it has picked up NBC's "Diff'rent Strokes." The new offerings represent eight weekly hours of network prime time.

A ninth series to start in November, will be "Dynasty II: The Colbys," a spinoff from ABC's blockbuster of the past two years. "Dynasty" was the top-rated tv show last season, with a 25 rating and a 37 share.

ABC will continue its network primacy in sports, though there have been some cutbacks in sports programing. "Monday Night Football" returns for its 16th season, though ratings dipped last year.

Besides the Olympic coup last year, ABC also broadcast for the first time the January Super Bowl, garnering record advertising rates of $1 million a minute. ABC also won 11 Emmys last year, four of them for its newsmagazine show "20/20."

The five owned tv stations (in New York, Los Angeles, Chicago, Detroit and San Francisco), whose revenues are expected to flatten this year with the network's prime-time troubles and the absence of last year's Olympic fare, are under the gun to cut costs.

Dennis Swanson, the recently appointed president of the owned stations division, reportedly has imposed a strict mandate for efficiency on the five, which contributed about $475 million in revenues last year and about $150 million in pretax profits.

Publishing, the second-largest money maker among ABC business groups, generated $316.2 million in revenues, up 13% from the previous year. Record earnings before taxes reached $34.2 million, a 17% increase. The company had continuing success with its business, high-tech and inspirational publications, while the division got an extra boost from Olympic-related publications, such as the "Official Olympic Guide to Los Angeles."

Video Enterprises showed substantial revenue increases in 1984 but a pretax earnings loss of $44.6 million. The major development of the group was the addition of ESPN. ABC paid Texaco $227 million for 85% of the sports network in April (ABC had purchased 15% earlier in the year from Getty Oil). Then in October, ABC sold 20% of its new acquisition to Nabisco Brands for $60 million. ESPN subsequently clinched a three-year, $70 million deal with the United States Football League to broadcast its games.

One of the main virtues of the ESPN-Nabisco deal was the involvement of the widely respected Don Ohlmeyer, former NBC sports executive producer, in the cable network. Under the terms of the agreement, his company, Ohlmeyer Communications, will consult and advise ESPN in such areas as marketing and programing. Ohlmeyer Communications is a joint venture between Don Ohlmeyer, chairman; John Martin, president, and Nabisco. Both men have become ESPN directors.

ABC closed its unprofitable TeleFirst service, the Chicago-based scrambled-signal movie and entertainment network, after fewer than six months of operation. Also, the ABC Motion Pictures group sold its Florida theme parks, ABC Scenic Attractions, for $6.6 million.

Chemicals	1,005	973	3.4
Shulton	528	508	4.0
Formica prods.	373	341	10.0

American Cyanamid, Wayne, N.J., is the 27th largest national advertiser with U.S. advertising of total estimated $284.4 million in 1984, up 40.1% from a restated $203.0 million in 1983.

In 1984, Cyanamid net sales rose 9.1% to $3.9 billion, while net earnings showed a 0.9% increase to $215.9 million.

Of the $3.9 billion in sales, $2.7 billion, or almost 70%, came from domestic sales, compared with 1983 domestic sales contributions of $2.4 billion out of a $3.5 billion total, or 69%. A strong U.S. market, compared with most international markets, and unfavorable dollar conversions for foreign sales contributed to the U.S. showing.

Four out of five Cyanamid business groups showed operating income increases in 1984, including Cyanamid's Shulton consumer group, with sales up 4% to $528.5 million and operating income up 2.4% to $25.5 million. Although Shulton represents only 13% of total sales and 7.3% of operating income, the majority of Cyanamid's measured advertising of $69.7 million is done in this group.

Cyanamid in 1984 spent an estimated $334.6 million worldwide in advertising, up from $289 million in 1983. The U.S. represents an estimated 85% of that total, which includes supplies, fees, commissions, direct mail costs, and some rent, utilities and travel, etc., according to the company.

The Shulton group—which including the No. 1 men's and women's fragrances in Old Spice and L'Air du Temps and other products, Pine-Sol cleaner disinfectant, and Breck hair products—accounted for about 62% of Cyanamid's measured advertising in 1984.

The Old Spice line funneled $15.9 million into measured media, virtually all in spot and network tv, a tally that was up 20.[illegible]% over the previous year.

Men's cologne received the major advertising push, from $6 million in 1983 to $10.1 million in measured media in 1984. Spending on the Old Spice stick deodorant and solid antiperspirant actually dropped 15.4% to $5.5 million.

The Old Spice deodorant line and Lady's Choice ($5.3 million in measured spending, down 2%) antiperspirants lost market share to Bristol-Myer's Ban and Carter-Wallace's Arrid, however.

The Pine-Sol line of liquid cleaners, the leading seller in the fluid cleaning market, received $7 million in measured spending, down 4.1% from 1983.

Cyanamid is investing heavily in two new products in the Shulton group. The company is spending a reported $16 million in marketing, including $6 million in measured advertising, for a new tray bait roach insecticide, Combat. The product is up against Raid, Black Flag and d-Con.

Shulton introduced UltraSwim in the $2 billion-a-year haircare market in 1984. The product is designed to combat the effects of swimming pool chlorine on the hair. Shulton in 1984 spent almost $1.2 million in magazine, tv and radio ads for both the new products, at an $8 million annual rate. In addition, some 200 million cents-off coupons are being distributed through newspapers and magazines.

Shulton also is testing Equa Balance, a hand-and-body moisturizer akin to the company's Sans Soucis brand. The new product is part of a relatively no-growth $450 million mass-outlet facial segment of the hand-and-body moisturizer market. Richardson-Vicks' Oil of Olay leads the market with a 23% market share, but its sales have slipped as have No. 2-ranked Noxzema at 15.6%, according to analyst Diana Temple of Salomon Brothers. Revlon has European Collagen Complex and has relaunced its Moon Drops line in the market category.

Cyanamid began national distribution of its Breck styling mousse in 1985 following test in 1984. The company spent only $64,000 on Breck hair spray and styling mousse in 1984, dropping Breck shampoo from the advertising column after spending $296,000 on the shampoo in 1983.

Cyanamid's largest division in sales and second biggest advertiser is the medical group, accounting for about $22 million in measured spending, virtually all in its over-the-counter vitamin products.

The group had operating earnings of $155.8 million, up 8% from 1983, on $1.06 billion in sales, up 9.3%. Through its Lederle Laboratories in Pearl River, N.Y., and other subsidiaries, Cyanamid develops and markets a wide range of drugs and pharmaceuticals, including anticancer agents, antibiotics and vaccines.

Measured advertising on the division's Centrum vitamin products increased 19% in 1984 to $10.7 million, all of it in tv and magazines.

Despite a big promotional effort tied to the Olympics, sales of Lederle's Spartus multivitamins were down sharply in 1984. The tv spots, which cost almost $3 million, compared with 1983 expenditures of $1.9 million, urged Olympic viewers to "ask more of yourself, ask more of your vitamin."

Lederle expenditures on another vitamin product, Stresstabs, dropped 36% to $2.3 million in 1984.

A Lederle drug, a so-called transdermally active vasodilator, is known to increase the flow of blood to the skin, and is in clinical test to assess its safety and effectiveness in the treatment of bedsores, wound healing and even male pattern baldness, which has raised eyebrows among marketers. Upjohn Co. has a drug reputed to prevent hair loss in some men: The market for baldness treatment currently is worth $200 million annually.

The chemicals division was the one division registering a decline in operating profit—36% to $46.1 million in 1984, on sales of $1 billion, up 3.4%—mirroring a general slowdown in the chemical industry during 1984. Cyanamid says lower profits resulted from a 1% decline in its chemical product prices, compared with an over-all industry price increase averaging 3%.

Among new products developed by the chemical group in 1984 were enhanced oil recovery chemicals, advanced composites and urethane chemicals.

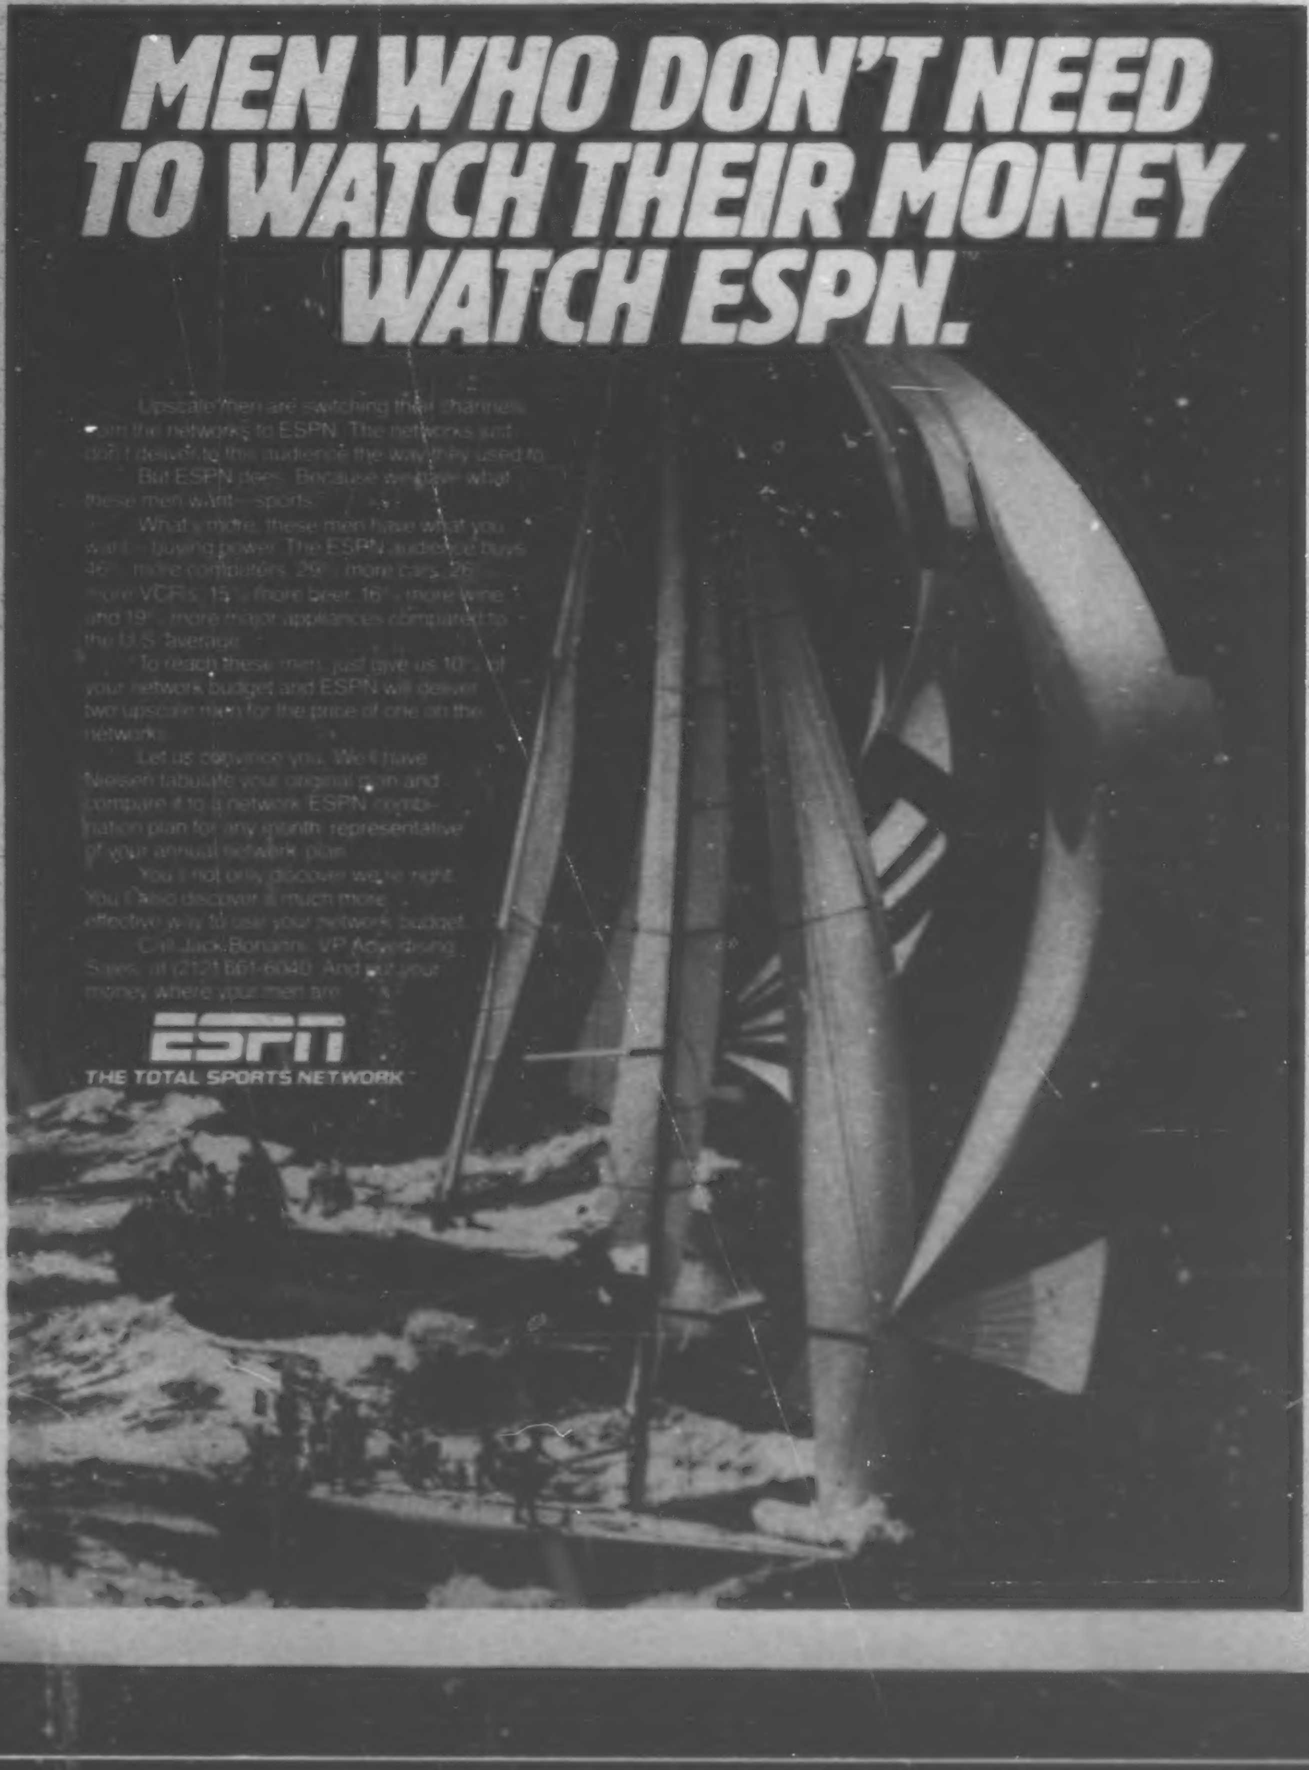
Cyanamid's agricultural group, which primarily markets fertilizers, insecticides, herbicides and animal nutrition and health products, registered 1984 sales of $892.7 million, up 20% from 1983, with operating earnings nearly tripling from $33.9 million to $88.5 million in 1984. Big sellers included Counter insecticides and Prowl herbicide; sales increases corresponded with significant advertising increases.

Advertising for Cyanamid's agricultural insecticides and herbicides increased from almost $750,000 in 1983 to some $1.6 million in 1984, sending the company's farm publication total to $4.17 million. Cyanamid also aired 30-second tv spots for Counter products, with computer-generated graphics, in nine Corn Belt states.

Little advertising is done by Cyanamid's Formica products group, which had 1984 sales of $373 million and record operating earnings of $34.7 million. Advertising for Formica home surfacing material increased from $869,000 in 1983 to $953,000 in 1984, virtually all of it in magazines. The group, however, was sold in October, 1984, for $200 million to a group headed by its own management and Shearson Lehman.

Over-all measured advertising for Cyanamid was $69.7 million, a 21.7% increase over 1983. Of the total, magazine expenditures were up 17%; cable, up 6%; spot tv, up 25%; network tv, up 20%, and spot radio, up 29%. Network radio, for which no expenditures were monitored in 1983, went to $406,000 in 1984, and outdoor advertising was up from $3,000 to $76,000. Farm publication advertising increased 21%.

In 1984, Cyanamid was one of the few advertisers that bought time on the controversial ABC movie "Something About Amelia," which dealt with incest.



Upscale men are switching their channels from the networks to ESPN. The networks just don't deliver to this audience the way they used to.

But ESPN does. Because we give what these men want—sports.

What's more, these men have what you want—buying power. The ESPN audience buys 46% more computers, 29% more cars, 26% more VCRs, 15% more beer, 16% more wine and 19% more major appliances compared to the U.S. average.

To reach these men, just give us 10% of your network budget and ESPN will deliver two upscale men for the price of one on the networks.

Let us convince you. We'll have Nielsen tabulate your original plan and compare it to a network/ESPN combination plan for any month representative of your annual network plan.

You'll not only discover we're right. You'll also discover a much more effective way to use your network budget.

Call Jack Bonanni, VP Advertising Sales, at (212) 661-6040. And put your money where your men are.

RANK 43

American Express, New York, the 43rd largest national advertiser, increased advertising expenditures 59.6% in 1984 over the previous year, to an estimated $172.1 million.

American Express earnings rose 18.4% to $609.6 million in 1984, as sales increased 32% to $12.9 billion primarily because of acquisitions. But continued heavy losses at the company's Fireman's Fund property and casualty insurance operations put a damper on profits through the second quarter of the current fiscal year, though the company's travel business and brokerage operations are showing record profits.

Earnings of $140.2 million for the second quarter of 1985 showed only a negligible increase from $138.7 million in the comparable period in 1984. That included a $21 million increase in Travel Related Services, the division that runs the American Express Card and traveler's checks operations, and a $37 million increase in investment services, primarily Shearson Lehman Brothers. It also included a $72 million loss in insurance operations.

Help is on the way for the beleaguered Fireman's Fund. Some of its problems related to a loss it took last May in its agreement to settle a class-action suit by paying $35 million to investors in a bankrupt California mortgage company.

The company announced plans in June to sell a major part of Fireman's Fund to the public, in an apparent move to reduce the parent company's vulnerability to the up-and-down swings of the property-casualty business. Then in July, American Express hired John J. Byrne, former head of Geico Corp. and a reputed turnaround expert, as Fireman Fund's new ceo.

With the imminent divestiture of American Express' 50% interest in Warner Amex Cable Communications, the company is slimming down, transforming itself into a more streamlined and focused financial services operation.

Warner Amex chalked up total revenues of $472.9 million last year, up 8% from 1983, but the company continued to operate in the red, with a net loss of $23 million, down from its 1983 loss of $98.4 million.

American Express, which is an equal partner with Warner Communications in the cable venture, has signed a buyout agreement with two Denver-based companies, Time Inc.'s American Television & Communications subsidiary and Tele-Communications Inc. But Warner, under terms of the joint venture, elected to match the deal, which would cost it $450 million for Amex's share, and the assumption of all the system's $500 million in debt.

Warner Amex, the sixth largest U.S. cable system in total subscribers with 1.2 million subscribers, also owns 19% of Showtime/The Movie Channel and 40% of MTV Networks Inc., both of which are being sold to Viacom for $510 million.

MTV Networks operates two music-video programs for cable TV—MTV (Music Television) and VH-1 Video Hits One). It also owns Nickelodeon.

Donald E. Pruss, an analyst with Smith Barney, Harris Upham, has estimated that American Express will sell 50% of Fireman's Fund, realizing a possible $560 million.

Advertising expenditures were up sharply last year, most of it for the Travel Related Services segment, which spent $414 million of the company's worldwide total of $490 million in advertising and promotion. The service claims to hold about 60% of the $35 billion traveler's check business.

In domestic measured spending, network and spot tv were especially strong, with total measured expenditures from the nine media tracked in this report increasing 68.4% to $121.4 million.

American Express tv network expenditures more than doubled, from $22.4 million in 1983 to $55.7 million in 1984. The big shift is credited to three areas—the American Express Credit Card Service, which spent $30.6 million in network tv, up 62.2%, out of a six-media total expenditure of $39.1 million, up 32.4% from 1983, according to Leading National Advertisers. American Express Traveler's Cheques spent $12.2 million in network tv, up from $3.9 million in 1983, out of a six-media total expenditure of $17.1 million, up from $8.7 million in 1983, and IDS/American Express, the new acquisition in 1984, that spent $11.4 million in network tv under the Amex banner out of a six-media total of $13.2 million.

Ogilvy & Mather's campaign for the credit card, with actor Karl Malden as the prime spokesman, continued, adding a phase this summer to advertise the company's new three-hour courier service for customers who lose their traveler's checks.

Traveler's check sales in the U.S. in 1984 were up 20% from 1983 sales. First-quarter figures for 1984 showed American Express' credit card and traveler's check unit had a net income of $86 million, a 20% increase over first-quarter earnings in 1984.

Ogilvy & Mather's familiar "Do You Know Me?" campaign for the American Express Card, which has acquainted the American public with the likes of Muppets creator, Jim Henson, and Mel Blanc, the voice of Bugs Bunny, is now 11 years old and still going strong—the most recent being cartoonist Jim Davis featuring an animated appearance by his cat creation, Garfield.

An O&M campaign keyed since 1983 to women who "lead interesting lives" has been credited with making three out of ten new card members women. American Express says there are now more than 20 million American Express card holders, who made $47.6 billion worth of charges last year, a 24% increase over 1983.

Last summer, the company began issuing its new Platinum Card to the top 1% of its card holders. The advertising campaign for the exclusive card, overdirected by McCann-Erickson, has been limited to direct marketing. McCann-Erickson also continued the "Mind Over Money" campaign for Shearson Lehman/American Express.

Acquisitions last year included Investors Diversified Services, now IDS Financial Services, which registered $1.37 billion in revenues for 1984, and Lehman Brothers Kuhn Loeb, which American Express bought for $360 million. The latter became the Shearson Lehman, American Express unit.

The brokerage firm has not yet achieved its avowed goal of overtaking Merrill Lynch, Pierce, Fenner & Smith for leadership in the brokerage industry, says Prudential Bache analyst Jose Hoffer.

Some foreign and/or private companies do not divulge sales or income figures. Where estimates could not be obtained, N/As appear in charts and the boxed information preceding such profiles to indicate "not available."

RANK 16

American Home Products Corp., the 16th largest advertiser, increased its advertising to an estimated $412 million in 1984, a 21.3% rise over the previous year.

Net income for the New York-based company increased 8.7% in 1984 to $682 million as sales rose 5% to $4.49 billion. Sales increased in each U.S. business segment, while the strong dollar resulted in a 4% decline in international sales when stated in dollars.

It was the drug, food and household products marketer's 33rd continuous year of increased sales and earnings. Worldwide sales of prescription drugs and medical supplies were $2.42 billion, or 53.9% of total sales, compared with 52.4% of total sales in 1983. The segment's operating income before taxes accounted for 83.2% of total operating income in 1984 of $1.18 billion, compared with 82.1% of $1.08 billion in operating income before taxes the previous year. Domestic sales of prescription drugs and medical supplies increased 9% for the year, the company says, despite the results in medical supplies.

American Home spent an estimated $214.3 million in measured media in 1984, an increase of 13% over 1983. Its unmeasured spending of an estimated $177.8 million—up 4.7% over 1983—went for samples, coupons, videotapes, films, coupons, point-of-purchase and co-op advertising.

Its Advil brand received the company's biggest ad outlay in 1984 for a single-line product following FDA approval in May for the anti-arthritis prescription drug ibuprofen (generic name for Advil), to be marketed in a lower dose as a nonprescription pain reliever. Young & Rubicam got the $26.3 million advertising account for Advil as market watchers predicted ibuprofen might take a third of the total pain-reliever market of aspirin and acetaminophen. Total market is worth about $1.6 billion.

Four months into the launch Advil had won about 7% of the painkiller market, outdoing Bristol-Myers' Nuprin, which had a 3% share, according to Robert Hodgson, market analyst for Shearson/American Express.

Some of the advertising battling also has ended in court. In mid-July, Upjohn filed suit alleging that the Advil advertising was misleading and deceptive. While American Home Products did make minor adjustments to its campaign, its right to make reference to Motrin was upheld. Then American Home sued Johnson & Johnson, the maker of Tylenol, charging the company used a strategy of false and misleading advertising that deceived the public about the effects of the nonaspirin painkiller.

American Home's Whitehall Laboratories division (Advil, Anacin, Dristan, Preparation H, Primatene, Denorex, Anbesol) spent $97 million in six-measured media monitored by Leading National Advertisers in advertising 12 Anacin products in 1984, down 12.5% from the previous year. Seven Dristan products split a $20.3

Where Ad Age got its data

For the 30th consecutive year, Advertising Age presents its analysis of ad spending by the 100 leading national advertisers. Each company's profile includes a list of its key marketing executives, agency lineup and a rundown of account personnel.

Mixed throughout these 100 profiles and 16 charts are advertising expenditures, sales figures, earnings figures, market shares and other data.

The tracking sources for ad expenditures are:

- Newspaper: Media Records.
- Spot radio: Radio Advertising Bureau.
- Network cable: Broadcast Advertisers Reports.
- Farm publications: Agricultural Marketing Information Services (AGRICOM).

The following media as supplied to Leading National Advertisers:

- Magazine: Publishers Information Bureau.
- Spot tv, network tv and network radio: BAR.
- Outdoor: Institute of Outdoor Advertisers and Outdoor Advertising Assn. of America.

Information for the top 25 business/industrial advertisers was taken from *Business Marketing*, a Crain Communications Inc. publication, as supplied by Rome Reports and was not added into total measured ad expenditures, but instead was included in unmeasured advertising, for which Ad Age went directly to the companies.

Sales and earnings figures were taken from public documents. Where private companies would not divulge this information, estimates were obtained. Where no estimate was available, an "N/A" was used.

million advertising package, down 23% from the previous year. The division equaled the $13 million it spent on Preparation H (cleansing pads, multi-product advertising and suppositories and ointment) in 1983; spent $6.8 million on Primatene, off 6.8% from the previous year; backed Denorex dandruff shampoo with $7.3 million, up 32.7%, and placed $4.3 million behind Youth Garde, off 47.6% from 1983 expenditures. Youth Garde facial care product has achieved a 1.9% of the supermarket dollar share two years after launching.

The company's Ayerst Laboratories spent $10.4 million advertising Riopan antacid, up 53% from 1983. Ayerst split the ad assignment for an old drug Inderal, picking Klemtner Advertising to handle advertising of the product as a relief for nervous system disorder—a use pending approval of the FDA. The original agency, Sudler & Hennessey, continues to handle the account for the drug's other uses—primarily that of hypertension. Inderal competes in the $2.8 billion U.S. cardiovascular market.

In December, 1984, American Home's Wyeth Laboratories introduced Triphasil with the lowest total hormone content of any combination birth control pill on the market. It joins three other oral contraceptives marketed by Wyeth: Ovral, Lo/Ovral and Nordette. Eight months after introduction, Triphasil has won 2.7% of the market, according to Shearson analyst Robert Hodgson.

In the cardiovascular area, Sectral, a cardioselective beta blocker produced by Ives Laboratories, was launched in April, 1985.

The corporation's Sherwood Medical Division is making increased efforts to develop labor-saving devices for hospitals seeking to reduce costs in the face of the new federal reimbursement system for Medicare. The division also is expanding marketing efforts to tap the physician's office and home healthcare.

In 1984, Sherwood's Analytab Products Division rolled out UniScept, an automated susceptibility and identification testing system that improves laboratory accuracy and productivity. Two major product line extensions in 1984, Injectomatic and Monovector, aid diabetics in their daily insulin routines. Corometrics Medical Systems division introduced two advanced units, an intrapartum fetal monitor and a neonatal monitor.

Sales of the food and household products segment increased 4% in 1984, according to the company. Sales of food products, including American Home Foods and Brach candies, increased 9% while sales of household products declined slightly, which American Home attributes to intense U.S. price competition and the continuing decline of currency exchange values.

One of the big gainers in ad dollars was Chef Boy-Ar-Dee, which, in 1984, split $24.6 million among six products, a 49% increase over 1983 spending monitored by LNA. Chef Boy-Ar-Dee now has more than 50% of the $400 million retail canned pasta market, the company estimates.

Leading houseware advertising accounts, part of AHB's Boyle Midway subsidiary, are Black Flag products, $5.2 million, up 28% from 1983, and Woolite, $15.6 million, up 5.4%. Advertising also was down 7.6% for the Easy Off oven cleaner line to $7.1 million in 1934. Pam advertising of $9.2 million was up 1% from 1983 levels.

The company spent $5.5 million on E.J. Brach & Sons candies, a 14.6% increase over the previous year, according to LNA. Expanded distribution of Brach candy was supported by substantial investment in facilities and equipment. In 1984, the division completed the development of a nationwide, full-line warehouse system, and continued to grow in the single-item market, which accounts for 40% of the industry's total sales. The company added Perkys Jellies Bar and Roll-A-Mints chocolate candy rolls to its product line.

In 1984, American Home sold Ekco Products, Ekco Housewares division, Ekco Canada, Dupli-Color (a Canadian and U.S. auto paint company), E-Z Por Corp., maker of disposable aluminum baking dishes, and its 73% interest in the Prestige Group p.l.c, a London-based housewares marketer. Ekco Products was sold to a subsidiary of Tenneco. Prestige Group p.l.c was sold to Gallaher Ltd., a British subsidiary of American Brands. Ekco Housewares and E-Z Por Corp. were sold to Gibbons, Greene van Amerongen in a leveraged buyout. Dupli-Color went to a subsidiary of Sherwin Williams Co. Total price of the transactions was $338.2 million in cash and notes and $10 million in convertible preferred stock.

The corporation expanded its r&d facilities significantly during the year. Ayerst began operation of a new research facility in Princeton, N.J. A new infant nutritional r&d laboratory in Georgia, Vt., came on stream. A pharmaceutical r&d facility at Rouses Point, N.Y., is being expanded. A pharmaceutical plant to manufacture drugs also is opening in Puerto Rico this year. The company has 21 new drug applications and 26 investigational new drug applications filed with the Food & Drug Administration for new drugs or new uses for existing drugs.

Advertising Age, with which is incorporated Advertising Agency Magazine, formerly Advertising & Selling, is published twice weekly by Crain Communications Inc. at 740 Rush St., Chicago 60611 (312-649-5200). Offices at 220 E. 42nd St., New York 10017 (212-210-0100); National Press Bldg., Washington, D.C. 20045 (202-662-7200); 1400 Woodbridge Ave., Detroit 48202 (313-446-0321); 6404 Wilshire Blvd., Los Angeles 90048 (213-651-3710); 8950 N. Central Expwy., Dallas 75231 (214-692-9744). Chicago Telex number: 687 1241 CRAIN UW. New York cable address: CRAINCOM NYK: Telex 64-0207

Vol. 56, No. 75—ADVERTISING AGE (ISSN 0001-8899) is published twice weekly except once a week the first week in January, the first week in July, the fourth week in November and the fourth week in December at 740 Rush Street, Chicago, IL 60611. Second-class postage paid at Chicago and additional mailing offices. Send address changes to ADVERTISING AGE, Circulation Department, 740 Rush Street, Chicago, IL 60611. Microfilm copies are available from University Microfilms, 300 N. Zeeb Rd., Ann Arbor, Mich. 48103. Microfiche copies are available from Bell & Howell, Micro Photo Division, Old Mansfield Rd., Wooster, O. 44691. $1.25 a copy on Monday, 75¢ a copy on Thursday, this special issue $3, $55 a year, $100 two years. Add $143 per year for air delivery to Europe & Middle East. Add $49 for surface mail to all other foreign countries. WILLIAM STRONG, vp-circulation; ROGER DI GREGORIO, fulfillment director; HEIDI SCHULTZ, senior circulation manager. Four weeks' notice required for change of address. Address all subscription correspondence to circulation department, Advertising Age, 740 Rush St., Chicago, Ill. 60611 (312) 649-5200.

American Honda Motor Co. RANK 60

Gardena, Cal.

($ figures = 000,000)

Worldwide	1984	1983	% chg
Sales	10,186	9,100	11.7
Net income	409	368	34.5
Advertising	135	115	17.4

American Honda Motor Co., Gardena, Cal., the 60th largest national advertiser, second largest Japanese auto manufacturer and third largest auto importer in the U.S., increased its ad spending in 1984 to an estimated $134.7 million, up 17.4% over 1983.

American Honda is also the country's motorcycle sales leader in units and value, accounting for 49.3% of the total two-wheel motorcycle market in units.

The Japanese importer owns a dominant 57.6% unit share of the combined motorcycle, all-terrain vehicle (ATV) and scooter U.S. markets, with total sales of more than 700,000 units. In the domestic auto market, it has a 4.9% unit share of market. It also is expanding its U.S. markets for lawn mowers, generators, outboard motors and power products.

American Honda is a wholly owned subsidiary of Honda Motor Co. Ltd., Tokyo, which posted record worldwide sales of $10.2 billion for the 1985 fiscal year ended Feb. 28, up 11.7% over the previous year. Earnings also hit a record $495 million for a 34.5% increase. Sales and earnings for both 1985 and 1984 fiscal years were converted from yen to dollars at the rate of Y259.45 = U.S. $1.

Worldwide sales of Honda autos rose 11.6% to a record 1,252,000 units. In the U.S., sales of imported Honda cars in 1984 rose to a record 374,819 units—137,405 of the sales-leading Civics, 123,045 Accords, 66,924 Preludes and 47,445 Civic CRXs—a 6.9% jump over the 350,670 imported units sold in 1983. Honda also sold 133,181 U.S.-made units at Marysville, O., giving it a total of 508,000 cars sold domestically grossing an estimated $3.8 billion.

Honda is second only to Toyota in total sales (from imports and domestic production) among auto importers in the U.S. But the two top Japanese marketers trail General Motors, Ford and Chrysler in over-all domestic car sales. (Nissan, however, still leads Honda in over-all vehicle sales when compact pickup trucks, a category in which Honda does not compete, are figured into the total.)

Including its U.S.-built Accords, Honda captured a 4.9% unit share of the total U.S. car market, up from 4.4% in 1983, second behind Toyota with 5.4%. Nissan had 4.5%, Volkswagen, 1.7%, and Mazda, 1.6%.

Honda's share of the import market for 1984 stood at 20.9%, up from 16.9% in 1983 and third behind Toyota at 23.0% and Nissan at 20.0%, followed by Mazda at 8.7% and Volkswagen at 6.7%.

Under the Voluntary Restraint Agreement limiting Japanese imports, Honda can send about 427,000 cars to the U.S. this year, a 15.1% increase over 1984. This does not include Honda Accords made in the U.S.

American Honda celebrated its 25th anniversary in the U.S. a much larger and more diverse company in 1984 than the one whose total sales in 1959 were just 200 motorcycles. The quarter century has been marked by a growing commitment to American production, beginning with the founding of Honda of America Mfg. and opening of the plant in Marysville, O., in 1979. With Honda leading the way, other major Japanese auto importers have opened their own U.S. production facilities.

The Marysville operation produces heavyweight motorcycles and Accord cars. Honda is adding a $240 million expansion at the Marysville plant to double capacity to 300,000 cars annually by 1988. The plant reached its full production level of 150,000 units a year last spring. Work is under way to add production of auto engines for the Civic subcompact cars that Honda will begin building at the Marysville plant in mid-1986.

Honda also is constructing a $30 million motorcycle engine plant in Shelby County, O., and a $42 million plant in Marysville that will make plastic parts. Honda opened a $10 million plant in North Carolina in August, 1984, to produce lawn mowers for the Honda Power Equipment Division.

Other U.S. expansion announced in 1984 included plans to market beginning in 1986 a new upscale, Japanese-built cars under the Acura division, a new division. The first of 600 dealerships in the Acura division sales network, which will operate independently of the existing Honda dealerships, will open in 1986.

The Acura division will market a four-door luxury car, code named HX, which is powered by a six-cylinder engine, and a new performance car series, Integra. Priced in the $10,000 to $20,000 range, the Acura models will be positioned against other Japanese luxury cars and European imports such as the BMW and Audi lines. Honda expects to sell 45,000 Acura cars in 1986 and 250,000 a year by 1989.

The Acura ad account, won by Ketchum Advertising, San Francisco, has spending pegged at $10 million annually, part of which is included in unmeasured media expenditure figures. Unmeasured media costs for 1984 amounted for $74.3 million, a substantial portion of the $182 million reported by American Honda for 1984.

While Honda does not break out unmeasured expenditures, company sources report they cover a wide spectrum and vary from product to product. Cars and motorcycles had the support of trade and consumer shows, press introductions, showroom collateral and point-of-sale materials and sporting events. Honda autos sponsored the Honda Classic, an annual PGA golf tournament held in Florida in March. Honda scooters invested heavily in videotaped news releases, cross-promotions with other advertisers and sponsorship of concerts and musical events aimed at a youth-oriented market.

Network and spot tv were the major measured media expenditures in the company's support of its 1985 car and motorcycle models. Tv spending reached $71 million, including $1.1 million for cable. Enthusiast magazines and national newsweeklies accounted for a good portion of the $15 million spent to promote cars and motorcycles in magazines.

Tv also was the main support for Honda's motorized scooters, as well as youth-oriented consumer magazines, which, combined with unmeasured media costs, gave scooters a budget in excess of $8 million. Scooters are expected to get a healthy boost this year as this Honda division continues the promotion of an eight-model line, highlighted by the Elite 150 Deluxe, the $1,450 model.

Honda's share of the motor scooter market, since Vespa went out of the business in 1983, now stands at 88.25%, followed by Yamaha with an 11.60% share in units.

Honda motorcycle advertising continued to carry the established "Follow the leader" theme in a measured $20.1 million advertising program dominated by an $17.8 million expenditure for network and spot tv and $2.3 million for magazines. A new entry level product, the Rebel, priced at $1,298, accounted for a major portion of the budget.

The promotional effort has helped maintain Honda's dominant position in the world and U.S. motorcycle markets, despite tough competition and falling demand. Worldwide sales of Honda motorcycles in fiscal 1985 dropped 7.2% from 1984 levels to 2,954,000 unit sales.

NOTES: All dollar figures in thousands. Some private companies will not divulge sales figures. Estimates were obtained where possible.

In the U.S., for the first five months of calendar 1985, Honda's share of the motorcycle market was 49.3% in units, down slightly from a 51.4% share a year earlier. It was followed by Yamaha at 17.2%, Kawasaki at 15.5%, Suzuki at 9.3% and Harley-Davidson at 6.7%.

Honda also leads the competition in sales of all-terrain vehicles with a 66% share.

After 11 years using only two themes in its car advertising—"What the world is coming to" and "We make it simple"—Honda simplified things in 1984 by dropping slogans entirely. Rationale: Not using one gives Honda a few more costly seconds to sell the car in tv spots.

Product offerings in the 1985 model year included the Civic CRX, the *Motor Trend* 1984 Import Car of the Year, a high mileage (49 mpg EPA) two-seater priced at $6,479. Introduced in February, the CRX riding tandem with other Civic models, and the Accord and Prelude in advertising received measured spending of about $15 million. The Accord in solo ads spent $10.8 million primarily in network tv and magazines.

One CRX tv spot, called the "rocket ad," featured a tilted landscape with the car shown taking off for outer space like a rocket.

Other car advertising included pitches for the new Accord SE-i luxury four-door, five-speed sedan (priced at $10,295), a range of Civic models from CRX to the four-wheel-drive wagon ($8,649), and the Prelude Si five-speed, 1.8 coupe ($10,345).

Honda's print and tv advertising continued to take a lean, product-as-star approach, with the vehicles prominently displayed against plain backdrops.

Sales of Honda power products produced another record year with North America and the U.S. once again the key growth market.

Lawn and garden equipment, including tillers and tractors, and generators, snowmobiles and snow removal equipment, accounted for $13 million in measured media in 1984, led by heavy use of consumer magazines. That was up considerably from $5 million as Honda goes after a bigger share of market, estimated at only 1% before the opening of U.S. production in North Carolina.

American Motors Corp.

RANK 68

Southfield, Mich.

($ figures = 000,000)

Worldwide	1984	1983	% chg
Sales	4,215	3,272	28.8
Net income	15	-258	106.0
Advertising	121	102	18.5

American Motors Corp., Southfield, Mich., which in 1984 recorded its first full-year profit since 1979, was the 68th largest national advertiser with total ad spending of $120.5 million in 1984, an increase of 18.5% over 1983.

AMC turned around a loss of $258.3 million in 1983 into a gain of $15.4 million in 1984 on sales of $4.2 billion, up 28.8% from 1983. The euphoria has been shortlived, however. AMC lost $29 million in the first quarter of 1985 and reported a $70.4 million loss in the second quarter. By mid-year, AMC was predicting it would break even for the last two quarters and a loss for the year over-all.

The No. 4 U.S. auto maker responded to the early 1985 losses by cutting operating costs by 25% and by receiving contract concessions from workers at the company's only U.S. passenger car plant in Kenosha, Wis.

AMC's major problem is that subcompact Renault Encore and Alliance products—its only U.S.-built passenger cars—compete in a segment that is not only showing lackluster sales but also is the most competitive, with increasing numbers of products coming from Japan and in the 1986 model year from Korea and Yugoslavia.

Believing that it must compete in more segments, AMC is sticking to plans to spend $2 billion between 1982 and 1987 to design and launch new vehicles.

AMC's fate also is bound up with the financially ailing French auto maker Regie Nationale des Usines Renault, which owns 46% of AMC. Renault is under pressure from French union leaders and others to curtail North American operations but so far has continued to express support for AMC.

Some analysts have speculated that AMC may be forced to reorganize, including selling its profitable Jeep operations. President-ceo Jose Dedeurwaerder has denied Jeep is for sale.

But Mr. Dedeurwaerder does say AMC is exploring the possibility of a joint project with an unidentified Japanese auto maker. AMC is the only American auto company without a Japanese partner.

Under the Renault brand name, AMC manufactures and sells the Alliance and Encore, which are Renault-designed, front-wheel-drive passenger cars. Under the AMC brand name, the company also sells the Eagle, a four-wheel-drive automobile made in Canada.

Under the Jeep brand name, AMC builds and sells utility and recreational vehicles consisting of the two and four-wheel-drive Jeep Cherokee and the four-wheel-drive Wagoneer, Jeep CJ, Jeep pickup truck and Grand Wagoneer. In addition, AMC imports and sells the Renault R-5 (in Canada only), the Renault Sportwagon and the sporty coupe, Renault Fuego.

During 1984. AMC reached a nine-year high in the retail sales of passenger cars and Jeep vehicles. Unit sales for all vehicles (Jeeps and passenger cars) worldwide were 442,383, up 15.4% from 1983. Jeep worldwide sales were 193,428, up 70.5%. Jeep sales represented 43.7% of total AMC worldwide unit sales. The remainder were passenger cars.

In the U.S. and Canada, which account for 92.3% of total AMC worldwide unit sales, auto sales of 237,309 were down 10.8%, while Jeep sales of 171,036 were up 83.6%. The sizable increase for the Jeep line is largely the result of the sports utility vehicles, Cherokee and Wagoneer, which were introduced in late 1983. Three off-road magazines named Cherokee "4x4 vehicle of the year." Another Jeep product, the Jeep Comanche pickup, has attracted considerable attention prior to its introduction Oct. 1 of this year. AMC says that prelaunch interest in the new pickup has meant stepped up production at the Toledo, O., plant producing the Comanche. Three hundred a day are currently being assembled.

In the U.S. auto market, AMC in 1984 held a 2% market share in units behind leader General Motors' 44.6% share, Ford 19.2%, Chrysler 10.4%, Toyota 5%, Honda 4.9% and Nissan 4.7%. Total market sales were 10,324,000 units, up from 9,147,000 in 1983, according to the Motor Vehicle Manufacturers Assn. (domestic sales) and Ward's Automotive Reports (imports).

Another bright spot in 1984 was Beijing Jeep, the joint venture company that resulted from the historic 1983 agreement between AMC and the People's Republic of China. Beijing Jeep earned the equivalent of $12.5 million in 1984 operations, turning out the BJ212, a five-passenger, 4wd Russian-designed vehicle with Jeep CJ lineage. AMC and its Chinese partner plan to assemble Jeep Cherokee kits in Beijing beginning this fall. Phaseout of the Russian model is expected in the future.

Improving economic factors helped industry sales of passenger cars in the U.S. reach the 10.3 million unit level in 1984, but the increases in sales occurred in the market segments where AMC had no offerings. The company's share of the car market declined from 2.5% in 1983 to 2.0% in 1984, largely because the small-car segment declined to 18.7% of the market, compared with 20.8% in 1983. Alliance and Encore sales actually were up 16% from 1983.

Lagging sales in the small-car segment spurred hot competition on the price front. AMC reduced the price of Encore and Alliance by 1.6%, or $107, in December, and in February, 1985, began offering 8.5% financing on those cars. In mid-June, the low-interest loans were dropped in favor of cash rebates tied to 10,000 miles of "free" gasoline, based on EPA estimated gas mileage.

American Motors in early 1985 threatened to move its production of Encore and Alliance to Europe beginning next year, claiming that the Kenosha plant had the highest labor costs in the industry. After protracted bargaining, the United Auto Workers agreed to cost concessions, and AMC pledged to continue production of the Alliance and Encore in Wisconsin as long as sales of those models justify making them. The company estimates that could be as long as four years.

But in the first six months of 1985, AMC sales of passenger cars in North America plummeted 40% from the previous year because of the squeeze in the small car segment. Jeeps continued to sell well, however, with sales up 7% from 1984.

AMC planned to expand its coverage of the light-truck market by introducing the Jeep Comanche, a compact pickup truck available in both two-wheel and four-wheel drive, for the 1986 model year. Promotion began with the May opening of the Beach Boys/Jeep Comanche "Jeep'n Safari" concert tour that would showcase the pickup in more than 40 cities.

The company in 1984 also announced plans to broaden its lineup with a 1988 model year intermediate sedan to be built in Canada.

Measured advertising in the nine media tracked in this report was $94.7 million, up 13.5% from 1983. Vehicles or ad categories responsible for the boost in measured totals included the launch of the Jeep Cherokee at $10.2 million in measured advertising, mostly tv and some magazine; launch of the Jeep CJ at $3.3 million in measured spending; Jeep Wagoneer spent $6 million, up from $3.2 million; the Renault Encore, $15.4 million, up 45%; and a nonspecific AMC passenger car category, $8.7 million, up from $1.5 million in 1983.

Spending dropped for the Renault Fuego to $6.2 million from $10 million in 1983; the AMC Eagle to $3.5 million from $5.8 million; and nonspecific Jeep vehicles, $3.5 million, down from $11.1 million.

Advertising support remained stable for Renault Alliance at $20.6 million.

Ad themes remained consistent from the 1984 to 1985 model year. The Alliance and Encore continued to "bridge the gap between European technology and affordability," via Grey Advertising, New York. The Alliance convertible, introduced for the 1985 model year, was folded into Alliance advertising as "upward affordability."

Jeep advertising, via Saatchi & Saatchi Compton, used exotic locations and the single copy line "Only in a Jeep," for print.

On tv, the Jeep CJ7 was compared with a buffalo, as the hero sweeps the heroine off her feet, first for bareback bison riding and then for Jeeping in the outback.

The Cherokee and Wagoneer, shown in advertisements with competitors, were identified as the only vehicle (the two are considered one because they come from the same XJ series) to be unanimously selected as the 4wd vehicle of the year by three car buff books.

A print campaign for Grand Wagoneer was aimed at upscale horsemen and boaters, using testimonials from Wagoneer owners including a America's Cup skipper, Dennis Conner, and horse breeder Bob Norris.

In February, 1985, AMC used a $6 million mid-model year 16-page magazine insert and tv campaign to show all of its line at one time and help pump up the Renault name. The "Buyers Guide" insert compared features of the AMC-marketed vehicles with their competition. "We challenge you to find better vehicles anywhere," a headline said.

In July, 1985, AMC chairman W. Paul Tippett took over as president of Springs Industries, a Fort Mills, S.C., textile maker, but retained the title of chairman of AMC's board.

Mr. Tippett was elected chairman in January, 1982, and had been chief executive officer until the fall of 1984, when he was replaced by Mr. Dedeurwaerder, AMC president.

Mr. Tippett relinquished fulltime duties at American Motors Corp. in April, 1985.

Also in July, 1985, Joseph E. Cappy was promoted from group vp-sales and marketing to exec vp in charge of AMC's sales, marketing, international manufacturing and supply.

Mr. Cappy had been credited with encouraging AMC to be promotion-conscious.

The year 1984 was a rite of passage for American Telephone & Telegraph Co., New York, the nation's 7th largest advertiser with an estimated $563.2 million in 1984, up 20.8% from 1983.

Stripped on Jan. 1, 1984, of its flourishing core business—the seven regional telephone holding companies—a leaner AT&T is unleashing its enormous resources in the marketplace for information technology. And like a supertanker changing course, AT&T made big waves in its first full year after divestiture, but was slow in establishing a new direction.

Net income for the year was about 67% of projected earnings, a "disappointing" $1.37 billion, says chairman Charles L. Brown. Likewise, total operating revenues of $33.2 billion were 86% of projected total revenues.

Revenues in 1984 were lower than anticipated because of unexpectedly high fees paid to the local telephone companies for access to their lines; increased competition in long distance and equipment markets; adverse regulatory actions that cut into returns AT&T got in most intrastate toll jurisdictions, and delays in the availability of key products, says Richard A. Gray, division manager-financial information.

AT&T's performance was much improved for the six months ended June 30, 1985, although reported revenues and earnings were somewhat diluted by unusual expenses. Revenues for the first half were $16.86 billion, up 1% over 1984. Net income in the first half of 1985 was $815 million, up 16% over the same period in 1984.

The unusual expenses were $314 million in access charges incurred in the first six months of 1984 but billed and reported in the third quarter, and $120 million in higher depreciation expenses during the first half of 1985, Mr. Gray says.

While AT&T's financial condition is improving, it still has a formidable task in paring down from a quasi-public utility to free-market enterprise, says Ted Moreau, an analyst who tracks AT&T for Robert W. Baird Co., Milwaukee, Wis. Perhaps the biggest effect on AT&T's near-term profit margins will come from internal restructure, rather than from improved sales and marketing, he says.

AT&T is wasting no time in its restucturing. In one of the largest corporate reductions, the company announced in August, 1985, that it was giving notice to 24,000 workers in its information systems group.

About 62% of the layoffs include support staffs in headquarters operations across the country; 17% are involved in installation, maintenance and technical support; 13% of the workers are in product distribution, and 8% include hourly factory workers idled by the closing of two manufacturing plants. The information systems group has about 118,000 employes, about one-third of AT&T's total work force.

The work force reduction is expected to save several hundred million dollars annually, beginning in 1986. The move is in keeping with AT&T's announced intent of reducing costs. AT&T emphasizes, however, that it has no plans for employe reductions in sales, research and development, or computer systems.

The reallocation of AT&T's work force, however, is only a short-term adjustment to the new environment and a temporary solution to the company's profit squeeze, analysts say. In the longer-term, AT&T is laying the groundwork for growth in the electronic movement and management of information, both in the U.S. and abroad. The company's efforts in this enormous and emerging market will have a significant impact on current and future advertising and marketing strategies.

AT&T is evolving into an organizational structure built on two pillars. The first is service-oriented, providing domestic and international long distance service through AT&T Communications for residential and business users, and voice, data and video services for business and government. The second pillar is product-oriented, developing, manufacturing and marketing telecommunications products, including switching and transmission systems for the telephone trade and data processing equipment for large and medium-size business use.

AT&T Information Systems is evolving as the manufacturing and marketing group for large business systems, computers and consumer and general business systems.

AT&T struggled in 1984 with creating some sense of unity between these disparate product and service offerings. Of its total measured advertising spending of $433.2 million, up 19.6% from 1983, the second largest item budgeted was geared to this dilemma—that of general-promotion. AT&T spent $70 million on general promotion, divided 74% network tv, 20% magazine, and about 6% spot tv. The company spent $34.1 million on that item in 1983.

The search for a single identity culminated in April, 1985, with selection of a new corporate theme: "AT&T, the right choice." David Shaver, corporate advertising director, says, "The new theme is designed to define the total range of products and services AT&T offers. We're also trying to look more like a single company."

How soon AT&T will be permitted to act like a single company, however, is a critical unknown in its future. Until April, 1985, AT&T had been forced to maintain a structural seperation between AT&T Information Systems and the rest of the company. This separation effectively prevented AT&T from combining its marketing efforts for telecommunications services and information processing.

In April, the FCC permitted AT&T Information Systems to take over some equipment manufacturing operations, resulting in huge layoffs. In September, FCC further loosened AT&T's regulatory shackles, permitting combination of some sales functions for long-distance service and equipment. A catalyst was International Business Machine's June 25, 1985, sale of Satellite Business Systems to MCI Communications in exchange for 15% of MCI's stock and warrants to buy another 2% at a fixed rate.

"The IBM-MCI deal [gave] the FCC an excuse to relax regulations," says Jack Grubman, analyst with Paine Webber Mitchell Hutchins, New York. Analysts say the FCC is eliminating a double standard resulting in restraints on AT&T while IBM-MCI (both in the same business) would be allowed to run free. Added fuel is IBM's December, 1984, buyout of Rolm Corp., a Santa Clara, Cal.-based telecommunications equipment producer.

Combining its information processing and telecommunications technology is critical to AT&T's marketing priorities in 1985 and beyond, as it begins challenging IBM in the convergent technologies of data processing, where IBM is the main contender, and telecommunications, where AT&T is preeminent, Mr. Grubman says.

Consequently, AT&T is bolstering its product development and advertising in the market for telephone and information processing systems targeted at business and consumers. Measured spending for all business and consumer products exceeded $106 million in 1984, 25% of AT&T's total measured spending.

A few single categories include: Information systems, $34.7 million, divided 50% network tv, 30% magazine, 14% network radio and 6% spot tv; personal computers, $20.1 million, divided 70% network tv, 30% magazine; computer systems, $19.7 million, divided 60% network tv, 40% magazine; telephones, $15.3 million, mostly for network tv, according to the six major media tracked by Leading National Advertisers.

Several key product introductions figure heavily in AT&T's marketing and advertising. In computers, early in 1984, AT&T introduced the 3B family of computers, ranging from a desktop supermicro to a superminicomputer. All use the UNIX System V operating system developed by AT&T Bell Laboratories, the only operating system that can be used across a broad span of computers from mainframes to micros.

AT&T also purchased 25% of Ing. C. Olivetti & Co. in December, 1983. The AT&T Personal Computer 6300, a system that is IBM compatible, resulted from their joint efforts.

AT&T introduced a number of telephone networking and digital switching systems, including Merlin for small businesses; System 75 for medium-size businesses, and a more powerful System 85, for large users. AT&T also introduced its Information Systems Architecture, a communications-based concept to ensure compatibility between AT&T products, and in combination with other vendors' products.

Analysts say AT&T is taking giant steps with its growing line of computer products and its reputation for being able to tie systems together with advanced communications systems. "AT&T is starting to develop a computer strategy and to position itself in the market," says Paine Webber's Mr. Grubman. "They're starting to prove that they're a serious manufacturer."

One area where AT&T does not have to prove its credentials is in the $50 billion domestic long distance telephone service to businesses and consumers and in the $5 billion market for international calling. Network ads using actor Cliff Robertson, ADVERTISING AGE's "star presenter," received the lion's share, $170 million, or 40%, of AT&T's 1984 measured spending for that year.

Not surprisingly, the heaviest emphasis was on service to businesses and consumers, who are being asked to select primary long distance carriers during the transition period to "equal access" connections with local telephone companies. Equal access should be complete by September, 1986.

Consumer long distance ads received a measured $113 million in 1984, 90% in network tv, 10% in network radio, which accounted for 26% of total measured spending by AT&T for the year. Business long distance service was targeted with $27 million in measured spending, mostly for network tv; and international long distance ads received $11 million in measured spending, divided 52% spot tv and 48% magazine.

The advantage AT&T had in gaining equal access connections by default was struck down in June, 1985, in an FCC ruling that local telephone companies must use a nonbiased method when assigning long-distance carriers to customers who do not choose one. AT&T expects 30 million of 46 million total customers to be converted to equal access by the end of this year. In many localities, as many as 50% of customers asked to choose a carrier have not done so.

Under the old system, these customers were automatically assigned to AT&T. With the new system, local telephone companies must send at least two ballots to customers where equal access is being introduced, and divide long distance business in the same proportion for customers who do not respond as for those who do.

The allocation system designed by Northwestern Bell Telephone Co., a unit of U.S. West, is prompting twice as many customers to choose carriers other than AT&T, says Gary Tobin, a spokesman for MCI. In Minneapolis, for example, MCI now has 20% of customers selecting or being assigned a long-distance carrier, as opposed to an average 10% share in most markets, he says.

How primary long distance carriers are assigned will have a significant impact on AT&T's eventual market share, analysts say. AT&T says it has 63% of the domestic toll revenue on intra- and interstate long distance calls, and 83% of interstate toll revenues. Some analysts and competitors say the share could be higher.

Mr. Grubman, of Paine Webber, says AT&T's share of intra and interstate long distance toll revenue is closer to 80% to 85%, with MCI claiming about 7% to 8%, GTE's Sprint 3% to 4%, and all others 3% to 10%.

In the international market, AT&T is much stronger. But competition is moving fast. AT&T now has about 97% of the market and a virtual monopoly on calls to Western Europe, with MCI and Sprint emerging as the principal contenders, each with less than 1% market share, analysts say. Some smaller carriers also are expected to make inroads, including TRT Communications, a Washington-based company offering international service to customers of Starnet, the long distance arm of Ford Motor Co., which opened service in summer, 1985; and Satellite Business Systems, the long distance arm of IBM, which plans to begin offering service to Europe and the Far East next year.

Access charges that long distance carriers pay local phone companies for connections to their networks continue to place AT&T at a competitive disadvantage, draining its profit margins. Access billings represent AT&T's biggest single cost, about 60% of an estimated $35 billion in gross revenues for the AT&T Communications unit, analysts say.

MCI, Sprint and other long distance carriers receive discounts on local connections, which enable them to underprice AT&T. By September, 1986, when the transition to equal access is virtually complete, all carriers will be on equal footing in terms of cost.

But AT&T has not allowed its competitors' cost advantage to deter it from aggressive pricing. The company reduced prices on long distance calling 5% in June, 1984, and 6% in June, 1985, with programs such as Reach Out America, AT&T Opportunity Calling, in addition to other pricing features.

AT&T Communications also introduced a variety of new and enhanced voice, video and data services in 1984, such as Accunet, a service that sends digital packets of information; Alliance, a teleconferencing service; international 800 Service and Dial It 900 Service. As a result of divestiture, AT&T encountered temporary problems in 1984 with local telephone companies in delivery of WATS and 800 Service.

AT&T says its eventual goal is to allow customers of all sizes to literally custom design their long distance telephone service. With AT&T's technology and its new-found freedom to market all forms of information management, some analysts believe that goal, and much more, is in store for the near future.

AMR Corp., based at Dallas-Fort Worth International Airport, is the nation's 72nd largest advertiser, with estimated total advertising expenditures of $110.8 million in 1984, a 25% increase over 1983.

The 1983 return to profitabilty by AMR's principal subsidiary, American Airlines, led to the company's best year ever in 1984 and further records and growth in the first half of 1985.

AMR's 1984 net earnings of $233.9 million on total operating revenues of $5.4 billion reflected a 2.6% increase over 1983 earnings and a 12.4% increase over 1983 total operating revenues.

The record year was achieved despite the third quarter, when yields were depressed by the vigorous discounting and competition for market share from Braniff, Continental Airlines, People Express and American's other major competitors.

Hans J. Plickert, analyst for E.F. Hutton, attributed the third-quarter earnings lag to reduced traffic during the 1984 Olympic Games and political conventions, in addition to the continued heavy discounting.

American Airlines' 1984 fourth quarter was hurt by extensive weather-related service disruptions in December, forcing the cancelation of more than 900 flights.

In the first half of 1985, AMR reported first-quarter net income of $60.2 million on revenue of $1.39 billion, compared with first-quarter 1984 net income of $60.3 million and revenue of $1.27 billion. AMR's 1985 second quarter was the best quarter in the company's history, with net income of $173.9 million on revenue of $1.688 billion, compared with 1984's second quarter in which net income was $71.4 million on revenue of $1.362 billion.

The record first half was boosted by response to American's new Ultimate Super Saver fare, introduced Jan. 17, and by a 29-day strike of United Air Lines, which American has passed in market share as a result of the strike.

American's Ultimate Super Saver fare cut ticket prices by 38% to 70% in more than 2,400 markets, but introduced new restrictions including a 30-day advance purchase requirement, minimum and maximum stays, capacity controls, and a 25% penalty for refunds or changes once the ticket has been purchased.

The new fare represented an attempt by American Airlines to simplify fare categories and to more effectively compete in the growing discretionary travel market with carriers that are able to offer lower fares because their costs are much lower.

Because of the new fare and United's strike, American in each month of the first half of 1985 was reported to have achieved either record traffic for that month or for any month in the airline's history. The trend continued into July when American reported it flew 4.4 billion revenue passenger miles, a 30.8% increase over traffic in July, 1984, and just short of the 4.5 billion revenue passenger miles in June, 1985. A revenue passenger mile is defined as one fare-paying passenger flown one mile.

The performance prompted Standard & Poors to raise its rating on most of American's outstanding debt by two notches to A-minus from BBB, and to refer to American as "the airline industry's most innovative carrier."

The combined effect of the United strike and American's own strong performance during the first half of 1985 thrust American into the lead of domestic traffic and market shares. American's domestic market share for the period was 15.17%, up from 14.07% the previous year's first half, according to First Boston Corp., New York.

In the same period, First Boston research reported United with a 14.35% share, down from its previous year's first half market share of 18.11%. The next largest carriers were Eastern and Delta with 11.59% and 10.99% shares, respectively, followed by TWA (6.42%), Continental (5.78%) and Northwest (4.29%).

In addition to continuing its cost reduction program throughout the period, American continued to expand its operations. This effort was designed to further reduce unit costs and place American on a more competitive cost basis with what First Boston research refers to as the "new entrants and born-again airlines of the industry."

According to that research conducted by analysts Michael Derchin and RoseAnn Tortora, American plans to grow 17% to 18% annually over the next five years to reduce unit costs through hiring new employes at "market rates." "By the late 1980s," their report predicts, "American's unit costs could dip below 7%," a very competitive cost.

American also is expected to expand its fleet between 1985 and 1991, during which time First Boston says American's total fleet is expected to grow from 260 to at least 454 aircraft at a cost of more than $5 billion.

American's chief hubs at Dallas-Fort Worth and Chicago have continued to expand, but according to First Boston research, growth at those hubs will be limited by facilities and, therefore, expansion will come at a slower rate. Thus, American has began development of new hubs at Nashville, Tenn., and Raleigh/Durham, N.C., and has plans for a hub at Denver when new facilities are available. And other hubs may be opened as well, according to First Boston research, which speculates that a Caribbean hub is to be announced, perhaps along with a West Coast hub and a new north/-south hub.

Such hubs enable American to feed traffic into its long haul system while competing more effectively with the lower-cost regional airlines that are thriving on short haul routes.

Also to stimulate feeder traffic at major cities throughout the country, American in October, 1984, began development of American Eagle, a network of regional airlines fully integrated into the American Airlines domestic route system and service, complete with joint marketing efforts, through-fares, luggage service and reservations via American's reservations system.

Metro Airlines, Houston, and Chaparral Airlines, Abilene, Tex., were the first two to fly the American Eagle colors, beginning in late 1984. Air Virginia, Lynchburg, on May 15, 1985, became the third American Eagle carrier.

By the end of 1984, the new AMR Services Corp., designed to offer aircraft handling services to other airlines, had signed 29 contracts that AMR expects to generate annual revenues of about $10.2 million.

Of American's 1984 total passenger revenues of $4.3 billion, 93% were derived from domestic travel, and 7% were derived from international travel (Caribbean, Mexico and Great Britain). In 1985, American expanded its international routes with schedules including Frankfurt, Paris and Montego Bay, Jamaica.

At the beginning of 1985, *American Way*, American's in-flight magazine (named 1985's "magazine of the year" by the American Society of Journalists & Authors) increased its frequency to 26 times a year from monthly. The magazine's design also was updated and streamlined.

The magazine's publishing group, led by Walter A. Damtoft, expanded its operations in mid-1985 to begin publishing magazines for outside entities. American's first outside publishing venture will be Private Clubs, a monthly magazine to be published for Club Corp. of America, starting in March, 1986, with initial circulation of 200,000.

After nine years with the ad theme of "Doing what we do best," American introduced a new theme, "Something special in the air." The campaign broke Sept. 10, 1984, in all media. Bozell & Jacobs/Southwest, Dallas, continued to handle the airline's account.

American chose TBWA in Paris and Frankfurt as its agency to handle advertising in France and Germany, an account estimated at about $2 million.

Although American's total advertising expense, as reported in its 10K, rose 25.4% in 1984, its measured advertising expense rose 92.8% to $68.8 million, from $35.7 million. Most of that increase went into broadcast media, but magazine, newspaper and outdoor expenditures were also increased, reflecting the airline's expansion and strongly competitive posture.

American's unmeasured advertising expense fell 20.2% during 1984 to $42.0 million from 52.9 million. The company declined to confirm its figures or detail the nature of its unmeasured spending. Typically for an airline, sales promotional efforts make up much of the unmeasured spending as do heavy spot market placement in newspapers.

Diversified	170	150	13.5

Anheuser-Busch Cos., St. Louis, the nation's 19th largest advertiser, increased ad spending 18.9% to an estimated $364.4 million in 1984, compared with a revised $306.3 million in 1983.

A-B's brewing operations contributed gross sales of $5.39 billion, or 78% of total 1984 sales, a 9.8% increase over 1983 brewing sales of $4.91 billion. Beer volume for the year was 64 million bbls., up 5.8% from 1983. Those increases are especially significant given the stagnancy of the brewing industry, which grew less than 1%. A-B was the only major brewer to show a gain in barrelage in 1984. As a result, the nation's largest brewer gained an even larger share of the market.

A-B estimates that it accounted for 34.6% of the domestic malt-beverage market in 1984, compared with 32.6% in 1983. A-B's barrelage lead over the No. 2 brewer—Miller Brewing, Milwaukee, increased by 26.5 million bbls. Miller reported flat year-to-year volume of 37.5 million bbls. It had a 1984 market share of slightly more than 20%.

A-B chairman August A. Busch III gave much of the credit for the strong brewery showing to "aggressive advertising and merchandising surrounding Anheuser-Busch sponsorship of the Los Angeles Olympic Games."

Aggressive advertising and accelerated new-product development were needed throughout the year as the beer market's sluggishness brought higher ad spending levels by all major brewers, which fought to hold or build their market shares.

The other method of choice for building sales was through introduction of new products or the attempted creation of new segments within the brewing industry. In January, 1984, A-B announced it soon would begin testing a low-alcohol beer (less than 2% alcohol vs. the 4% to 5% alcohol content of regular beer), a product category that Cincinnati-based Hudepohl Brewing and Philadelphia-based C. Schmidt & Sons already had created.

In April, 1984, A-B entered its low-alcohol product, called "LA," into test markets. The new account was awarded to Budweiser agency D'Arcy MacManus Masius, St. Louis. Barely a month later, before it could really gauge the potential size of the audience for low-alcohol beer, A-B began a national rollout for LA.

Using the theme "Sometimes it's the perfect thing to say," LA was positioned as an alternative for those occasions when regular-beer drinkers want to reduce alcohol consumption. It has not been pitched as a regular choice for those who for health or other reasons are interested in less alcohol. For its LA spokesman, A-B and DMM turned to octogenarian actor George Burns.

Wary of repeating their mistake of the late 1970s when skepticism about the potential for low-calorie beer gave Miller Brewing's Lite brand a headstart in that market and a leadership position it never has relinquished, other brewers quickly introduced their own low-alcohol brands, many of them carrying the letters "L.A." to designate lower alcohol content.

A-B filed a trademark infringement suit against Stroh Brewery, Detroit, which had begun marketing Schaefer L.A. A-B's position that "LA" was a trademark rather than a generic term was upheld by a St. Louis federal court, and Stroh changed its brand to Schaefer Low-Alcohol.

La Crosse, Wis.-based G. Heileman Brewing (which began marketing low-alcohol extensions of its Old Style, Blatz, Rainier and other brands) filed suit against A-B in Milwaukee, seeking a ruling that L.A. is generic. Miller Brewing later joined that suit, which is still pending nearly a year later.

How that controversy is resolved may not be too important. The low-alcohol category has been met with minimal consumer interest. But however large the category, A-B's LA has a commanding share of it thanks to disproportionate advertising support. Analysts estimate that A-B produced only 500,000 bbls. of LA, for which it spent $23.7 million in measured-media advertising. That translates to $47.40 spent on advertising per barrel produced. For flagship Budweiser, A-B spent $1.69 in advertising per barrel.

None of the other brewers could compete with that kind of ad spending. While their low-alcohol beers are still marketed, the category effectively has been conceded to A-B.

The company's other major new product was King Cobra, its first entry in the malt-liquor category since it withdrew Budweiser Malt Liquor from the market in 1973. The new malt liquor was tested during 1984 under both the King Cobra and Jaguar names, with the former name chosen in October. Measured media spending last year for the brand (under both names) totaled only $80,000, all in outdoor.

Michelob Classic Dark, a bock-beer extension of its superpremium brand that had been available on draft since 1976, was introduced nationally in bottles. Measured media spending was $325,000.

Wine is not a new business for A-B, but it is becoming a more important one. Responsibility for the Anheuser-Busch Wines unit was transferred to the brewery subsidiary from the corporate planning department to facilitate its expansion, which quickly followed. Availability of A-B's Master Cellars wines, sold only in taverns and restaurants, was expanded to California and Nevada from the brand's original Colorado test markets.

Despite that wine-making capability, A-B remained one of the few major brewers without an entry in the fast-growing cooler business. Stroh, Heileman and Adolph Coors Co. introduced wine or malt-based coolers, but A-B has resisted.

While nurturing these new products, A-B has continued to focus corporate attention and most of its advertising budget on its existing brands.

Budweiser remains the rock on which the A-B empire rests. To say it is the nation's largest-selling beer doesn't fully communicate its size. The Budweiser brand alone accounts for about 25% of the domestic beer market (No. 2 brand Lite beer from Miller accounts for 10%). A-B produced 44.3 million bbls. of Bud in 1984, about 70% of the company's total volume. The total volume for No. 2 brewer Miller Brewing is only 85% of the volume of Budweiser alone.

Budweiser's ad budget reflects that importance as well as the increasingly competitive tone of the beer market. A-B placed an estimated $75 million behind the brand in 1984, up 25% from the $60 million spent in 1983 and nearly double the 1982 outlay. The longtime "This Bud's for you" theme continues.

One of A-B's best-performing brands in 1984 was Busch, its popularly priced (below the premium category occupied by Budweiser) brand. Production increased from 3.4 million bbls. to 4.3 million as A-B began expanding the brand's marketing territory and increasing its ad budget. Measured-media spending for Busch—with the theme "Head for the mountains"—increased 28% to $8.7 million.

A-B has positioned its two light-beer brands to address different markets. Bud Light, originally introduced as Budweiser Light, is being positioned as an on-premise brand to battle Miller Brewing's dominant Lite beer. A-B dropped the "Bring out your best" approach in favor of a campaign urging tavern patrons to ask for Bud Light by name. In dozens of spots, all of which take place in taverns, patrons who ask only for a "light" receive flaming torches or arrows, lanterns or anything but a beer.

Ad spending for Bud Light has increased steadily since the brand was introduced in 1982. Last year, A-B spent $56 million for the brand, 12% greater than the measured media the previous year.

A-B's other light brand, Natural Light, is positioned to tackle the take-home, off-premise market. Its advertising is the opposite of that for Bud Light: Tv spots all are set in homes, none are set in taverns. Advertising is themed "The beer with a taste for food" to reinforce that at-home positioning.

With increased emphasis on establishing and building the Bud Light brand, ad support for Natural Light was cut to $2.5 million in 1984, less than half the $5.6 million spent in 1983.

A problem category for A-B—as well as other domestic brewers—was the superpremium category, which includes the Michelob and Michelob Light brands. The strength of the U.S. dollar brought down the prices of many imported beers with which the domestic superpremiums compete. An increase in the number of lower-priced beers in the hotly competitive market also hurt the upper-end superpremiums.

A-B reviewed the advertising assignments for both its superpremiums, handled by Budweiser agency D'Arcy MacManus Masius, St. Louis. In July, 1984, responsibility for Michelob was shifted to Ted Bates Advertising/New York; Michelob Light was moved to Needham Harper Worldwide, Chicago.

Bates' new Michelob campaign, themed "Where you're going it's Michelob," and Needham's Michelob Light effort, themed "Who says you can't have it all," both target upwardly mobile young professionals and position both brands as appropriate "regular" buys for this age and income group. Past advertising had portrayed the brands as suited to "special occasions" or weekends.

Measured ad spending in 1984 for Michelob was $35.5 million, up slightly from the $33.6 million spent in 1983. Michelob Light's budget remained steady at $24.5 million.

In 1985, A-B made news with two nonproduct-specific advertising campaigns. One was a "corporate quality" campaign that featured all A-B brands and an unabashedly patriotic tone. The 60 and 90-second corporate ads carry the theme "Somebody still cares about quality" and were created by D'Arcy.

A-B and all other brewers have been caught in an increasingly hot national debate over alcohol abuse, such as drunken driving. Brewers have increased expenditures for anti-abuse efforts by wholesalers and tavern operators. But A-B became the first major brewer to run an anti-alcohol-abuse message on network tv in February, 1985. The 10-second spots, featuring San Diego Padres star Steve Garvey, are themed "Know when to say when."

The company continues to be among the largest cable tv advertisers, although measured expenditures in 1984 of $15.5 million were slightly below the $15.8 million spent a year earlier.

A-B's attempt to create its own cable network ended early in 1985 with the discontinuation of Sports Time Cable Network. That network, a joint venture of A-B and Multimedia Inc., offered primarily sports programing in St. Louis, Kansas City and Cincinnati. An inability to expand beyond those markets as well as failure to gain sufficient advertiser interest led to the shutdown.

A-B still is trying to find its way with Campbell Taggart, the bakery company it purchased in 1982. In January, 1984, the CT ad account was split between Bloom Agency, Dallas (which had handled the account before A-B's acquisition) and Benton & Bowles, New York. Under that split, B&B handled the Colonial, Rainbo, Kilpatrick's and Roman Meal brands, and Bloom handled the Earth Grains variety breads. Less than six months later, however, the B&B brands were moved to D'Arcy MacManus Masius, St. Louis.

Ironically, the merger between DMM and Benton & Bowles announced in 1985 caused Campbell Taggart to drop DMM because of the General Foods (Entenmann's) bakery business handled by its new partner. The CT account ultimately was consolidated at Bloom Agency in August.

Measured ad spending for the various CT brands in 1984 vs. 1983 if advertised both years were as follows: Breakfast Orange bread, $324,200; Colonial, $1.4 million vs. $991,300; Earth Grains, $2.8 million vs. $4.2 million; Rainbo, $2.4 million vs. $1.3 million.

Results were mixed for A-B's entertainment properties. Attendance at Busch Gardens (The Old Country), Williamsburg, Va., rose slightly to nearly 2 million visitors. Busch Gardens (The Dark Continent), Tampa, Fla., registered a 1.6% decline in attendance, with 2.85 million visitors. Attendance at the adjacent water park, Adventure Island, was up 6%. Attendance rose 14% at the Sesame Place park outside Philadelphia, but was down at the Dallas park, which did not reopen for the 1985 season.

Apple Computer entered the ranks of the top 100 national advertisers for the first time in 1984, climbing to 77th position with an estimated $100 million in 1984 ad spending, a 185.7% increase over 1983.

Measured media spending for 1984 was $84.5 million, an increase of 205% over 1983 that reflects the company's showy introduction of the Macintosh computer.

The question for 1985 is will Apple stay in the big leagues of ad spending.

The undisputed champ in personal computers from 1977 to 1981 has some bruises from mixing it up with International Business Machines and other competitors in a market that's lost its zip. Apple co-founder Stephen Wozniac left in early 1985. Steven Jobs, the other half of the duo that founded Apple, resigned in mid-September as chairman after losing any operational control at midyear.

The reins now are held by Apple president-ceo John Sculley, a PepsiCo marketing veteran who is reshaping Apple's sales and marketing staff and tactics.

One change is that Apple's high flying ad budget, which bankrolled some of the most talked about advertising in recent years, is being brought down to earth. The level of 1985 ad spending will depend on the coming fourth-quarter holiday season. There's been widespread speculation that this year's Sculley-inspired, cost-cutting program could put the 1985 ad budget at half that spent in 1984. Apple declines specifics, but Mr. Sculley has indicated he is cautious about prospects for fourth-quarter sales.

For the fiscal year ended Sept. 28, 1984, the Cupertino, Cal., company had total revenues of $1.52 billion, an impressive 54% increase over the prior year. In the nine months ending June 28, 1985, revenue climbed to nearly $1.5 billion, and net income was $38.9 million, up 16.8%. The 1984 corresponding period had a $1.1 billion in revenues and $33.3 million in net income. However, the 1985 nine-month cumulative total hid third-quarter results in which earnings dropped to a loss of $17.2 million from a gain of $18.3 million in the corresponding quarter of 1984, and sales were $374.9 million, off 11.2%.

Much of the loss, however, was a writedown related to Apple's cost-cutting measures taken in mid-1985 to consolidate divisions, close plants and dismiss employes. William V. Campbell, Apple's new exec vp of U.S. marketing and sales, says that without the extra one-time costs, the company presumably would have broken even.

The personal computer business, going into the latter half of 1985, is more static than electric; Compaq is said to be doing well but the others are in the doldrums.

Apple attributes this slowdown to a "pause" in the computer industry caused by a consumer-holding pattern, as potential buyers await new announced models not yet out of the gate, and the general slowdown in the U.S. economy.

Apple in the meantime has taken reorganizational steps aimed at protecting its role as second only to IBM in manufacturing personal computers. Apple was to close three manufacturing sites by September.

In the reorganization, Apple merged its product divisions into a single sales and marketing organization to become more market-driven and less product-driven, with key emphasis on consumer, education and business markets. This replaces a structure in which each product had its own general management, product development, marketing, manufacturing, finance and management information systems staffs. Such actions have led to the elimination of 1,200 jobs, or 21% of the Apple work force.

In a separate action, Stephen Wozniac, the young engineer co-founder of Apple, voluntarily left the company, and his marketing-minded engineer partner and founder Steven Jobs was moved into a board chairman position minus operational responsibility prior to his departure, apparently at the behest of Mr. Sculley, the company's president-ceo since 1983.

In 1984, Apple had measured advertising expenditures of $84.5 million, an Olympian leap over the $27.7 million it spent in 1983. From its first product, a computer construction kit produced in Mr. Jobs' garage, to 1984's Macintosh, emphasis at Apple has been on making the computer simple enough to be quickly usable by just about anybody. Messrs. Wozniak and Jobs chose the name Apple to characterize such simplicity.

New or refined Apple products for 1984 and 1985 to date included the Macintosh and the Apple IIc, further developments for the Apple IIe, accessories to make the Macintosh more attractive to business-office customers, and software to improve compatibility between the Macintosh and Apple II and other systems.

The new Alpha IIe software makes the Macintosh and IIc wholly compatible. Apple is scheduled this fall to introduce a plug-in circuit card that will interface IBM personal computers with the Apple computer link network. Also due in late 1985 is a hard-disc "filing cabinet," called a file server, for users of the AppleTalk network.

Apple's three major product lines now consist of:

- The Apple II line originated by Mr. Wozniak, which includes the new Apple IIe, which is a more elaborate computer system used by businesses and schools; Apple IIc, a portable computer for the "serious" home microcomputer user, and the powerful Apple III, a specialized computer used by professionals in research, business and industry.
- The Apple 32 SuperMicro family, now including the Macintosh.
- Apple accessory products is the third category. This includes the 1984-85 introductions of the Macintosh Office with its AppleTalk, LaserWriter and (promised for fall, 1985) the AppleTalk PC Card. AppleTalk is a network that connects as many as 32 Macintosh computers plus peripherals within 1,000 ft., with provisions for linkage to other networks.

LaserWriter, based on a design by Canon Inc. of Japan, links to Apple computers and AppleTalk to produce high-quality text and graphics. The AppleTalk PC Card, which Apple says indicates its decision to co-exist with archrival IBM, lets IBM's PC communicate with Macintosh and on through the Apple network to other Apple gear.

Apple for some time has supplied accessories that can link its microcomputers to other makers' mainframes and microcomputers.

Apple was the No. 1 personal computer seller from its 1977 entry into the market until 1981, when IBM entered the field. By 1984, IBM had pushed Apple from first place in production, taking a 27% share of the $11.2 billion personal computer industry to Apple's 25% share.

Now IBM has dropped the PCjr, showing how fickle the market is. Before the so-called "Peanut" was discontinued in March, 1985, it did its damage to Apple. Apple this past Christmas was left with high inventories when the public was lured to a technically improved, discounted and heavily rebated ($500 per machine) PCjr that produced sales of about 200,000—90% of which would have gone to the IIc, according to analyst estimates.

This experience has encouraged Apple in its marketing strategies—to be more hard-hitting and less casual, for example, with advertising.

Before Mr. Sculley's arrival, Apple had done well with its Apple II personal computer models, but it had failed to penetrate the business computer field, dominated by IBM, with the two higher-powered computers designed for that mission, the Apple II and Lisa. Apple operated according to the needs of its two product-making divisions—Apple II and Macintosh—not marketing considerations.

Mr. Sculley took a marketing tack that avoided head-to-head competition with IBM in specific areas, such as major corporations, but pursued sales in the larger arena of business. He personally took over management of the Apple II division and created a new Apple sales system by eliminating its many independent manufacturer's representatives.

He hired a new Apple sales force 350-strong and struck new central buying agreements with major chain outlets such as Sears, Roebuck & Co. and ComputerLand. He beefed up Apple's dealer sales force by a third, to 2,000, to take advantage of the fact that in the computer business, dealers make about 80% of all sales.

When the success of a price-cutting strategy on Apple II sales, among others, provided the cash, Apple started across the tv screens with revolutionary Macintosh advertising, the work of Chiat/Day, Los Angeles.

On Super Bowl Sunday in January, 1984, Apple premiered its striking "1984" 60-second tv commercial in which a sledge-hurling female athlete races toward a giant screen to shatter the blue image of an Orwellian big brother. The commercial, with obvious IBM overtones, introduced Macintosh and cost $1.3 million for airtime and production; it sold more than $3.5 million in computers directly after it aired, and within the next 100 days, another $100 million worth—70,000 computers—were sold.

Apple tried to repeat its Super Bowl ad success in 1985. The new Chiat/Day spot, titled "Lemmings," showed business execs marching in lock step over a cliff. It won mixed critical reviews.

After the 1984 tv premiere, a 20-page Macintosh magazine insert appeared as a followup. During 1984, Apple ran additional 20-page Macintosh inserts in popular business magazines, and eight-page IIc inserts in broader-appeal consumer books. In *Newsweek's* election-week special edition the first week of November, 1984, Apple owned the book, as the sole advertisr, with 40 full pages of Macintosh promotion costing $3 million.

Apple's spending for tv in 1984 totaled $45.6 million including $42.8 million for network tv, up from only $11.2 million in 1983. Total measured spending for Apple was $84.5 million, up from $27.7 million.

Spot tv got $2.8 million, up 88%; magazine spending rose sharply to $21.5 million from $7.04 million in 1983; spot radio increased almost fourfold to $8.4 million, from $2.23 million, and newpaper expenditures were up 53%, to $8.03 million. In six media-measured product spendings monitored by Leading National Advertisers, Macintosh received the heaviest advertising support in 1984, with a total of $35.9 million compared with just $3,000 in 1983, all of it for outdoor. Macintosh 1984 spending included $22.8 million for network tv; $2.2 million for spot tv; $10.9 million for magazines, and about $113,000 for newspaper supplements. Apple II spending was up 107% in 1984 to $29.1 million.

The biggest chunk of Apple II spending in 1984 of $24.73 million was spent to promote the IIc, $20.02 million for network tv, $506,400 for spot tv and $4.20 million for magazine space. Spending for combined IIc and IIe advertising in 1984 fell to about a third of its 1983 total, dropping to $4.17 million from $13.8 million in 1983.

Apple, well situated in the home and educational markets, is now attacking the business market with the Mac, but from the small business side rather than the *Fortune* 500 end. For the whole personal computer micromarket in the U.S., IBM has about 28% share; Apple, 13.8%; Compaq, 8%; Commodore, 6.7%; Hewlett-Packard, 5.8%; Tandy, 5%, and AT&T, 2%.

However, in the business office segment of the market, Tandy is in second with 11%, up from 10% in 1983. Apple is down to 9% from 19% in 1983 and 22% in 1982. IBM remains the leader with a 40% market share in 1984, up from 30% in 1983, and 18% in 1982. Others, in their 1984 order, are Hewlett-Packard, 5%; Compaq, 5%; Wang, 4%; Zenith, 3%, and DEC, 3%. In the $20 billion world personal computer market, International Data Corp. says Apple should take a 16% share in 1985.

Duff & Phelps analyst Jay Samstag in Chicago says Apple faces two obstacles on the business front—IBM, which is considered the standard, and Apple does not have a hard disc. Apple, of course, is attempting to remedy both concerns with heavy advertising for the Macintosh aimed at small businesses and the introduction this fall of the hard disc electronic filing cabinet to serve users of the AppleTalk network.

"The important factor now is how well they [Apple] are supporting dealers with advertising—and how well they are supported by dealers," he says. Most small businesses rely on the computer retail store for their computer hardware and software purchases.

Securities analyst John Girten of Birr Wilson, San Francisco, says despite the third-quarter financial reports, Apple is looking strong. "Inventory levels are good. Sculley apparently is not building up inventory too much for Christmas. A good Christmas level of sales would be $450 million to $500 million. Last year's total was about $700 million at Christmas. Purely from a financial angle things are looking better than three or four years ago."

Batus Inc., Louisville, Ky., the nation's 71st largest advertiser, cut its ad spending 22.4% to an estimated $113.4 million in 1984, the second straight year it has slashed advertising outlays.

The cutbacks in ad expenditures paralleled stagnant sales at Batus, the U.S. subsidiary of London-based B.A.T. Industries p.l.c., as it recorded only a 2% sales increase to $6.21 billion in 1984. Net income, however, jumped 21% to $313.5 million. Both were records.

Despite losing market share, Brown & Williamson Tobacco Corp., Batus' tobacco marketing subsidiary and the nation's third-largest cigaret company, contributed heavily to the parent's fortunes. B&W's sales rose 6% to $2.26 billion in 1984 while operating income rose 6% to $427.8 million. B&W operating income contributed 59% of total operating income of $729.2 million at Batus in 1984, about the same percentage as in 1983.

That compares with Batus' retail group, which in 1984 experienced a 10% decline in operating income to $196.1 million. However, sales for the group, which includes Marshall Field & Co., Saks Fifth Avenue and Gimbels, rose 7% to $3.37 billion. Retail accounted for 54% of total Batus sales in 1984, up from 52% in 1983, and 26.7% of total operating income in 1984, down from 31.3% in 1983.

Like 1983, much of the decline in Batus' ad spending can be attributed to B&W. The tobacco subsidiary spent $58.4 million in measured media advertising last year, compared with $82.8 million in 1983, as it focused its efforts on new product development and point-of-sale promotions.

And like 1983, it was B&W that grabbed much of the marketing community's attention. It began testing two brands, launched a brand sold only in vending machines, rolled out nationwide with a 25-cigarets-to-a-pack brand and once again found itself locking horns with Liggett & Myers Tobacco Co. over the generic end of the cigaret market.

Of those events, the battle with Liggett has been the most engaging. It began in the summer of 1984 when B&W entered the generic arena, which had been limited pretty much to Liggett since the North Carolina company began making the low-priced cigarets in 1980.

Liggett immediately filed a suit charging B&W with predatory pricing and other unlawful tactics aimed at eliminating it as a competitor. B&W in March of this year filed a countersuit claiming Liggett was attempting to block it from gaining a foothold in the generic market. The generics segment has been the only one to grow in recent years, accounting for 5.5% of the industry sales last year, according to industry analyst John C. Maxwell Jr.

The strongest blow yet was struck in July, when B&W announced it had reached an agreement with Generic Products Co. of Fort Worth, Tex., to make its GPC approved generic label. The GPC label has been Liggett's since 1980 and is considered one of the top sellers of all generics.

General Products, which also was named as a defendant in B&W's countersuit against Liggett, did not disclose why it made the switch. But industry analysts say the move definitely is a setback for Liggett, which more than doubled its market share between 1981 and 1984 on the strength of generics.

B&W's aggressive moves in the low-price end of the market were not limited to private label generics.

As part of its "segmentation" strategy, the company introduced its 25-cigarets-to-a-pack Richland brand nationwide in the summer, playing up the "five free per pack" and "50 free per carton." B&W retails at the same price others charge for 20-to-a-pack brands. It also introduced a discount brand called Coins that is sold only in vending machines.

On the "high-end" front, B&W began testing in Portland, Ore., a low-tar brand called St. James Court. Dressed in a sleek bronze package, the brand is targeted toward the higher-income, image-conscious smokers much like R.J. Reynolds Tobacco Co.'s Sterling and Philip Morris Inc.'s Players brands.

And in the "macho" category, *vis a vis* PM's Marlboro, B&W is testing Eli Cutter, which is packed in black and gold and named for a mythical character that represents the rugged individualism of the 19th-century pioneer. The brand comes in both filter and nonfilter and is being tested in the Sacramento and Denver markets.

As for its established brands, B&W cooked up some new strategies, too.

For Kool, which remained the nation's fourth best-selling brand despite slipping to 7% in 1984 from 7.1% in 1983, it brought back the "Come up to Kool" slogan with ads that featured a motorcyclist. It also announced that it no longer would sponsor the Kool Jazz Festival, an unsurprising move because it cut measured media spending for the festivals to $85,000 last year from $2.7 million in 1983. Measured media spending for Kool fell to $25.7 million in 1984 from $33.2 million in 1983.

To shore up its Viceroy brands, B&W repacked its Rich Lights and Rich Lights 100s brands by replacing them with the Viceroy nameplate. Rich Lights, introduced in 1978 as a lower-tar version of its regular Viceroy brand, experienced a slight drop in market share last year while the overall Viceroy category held steady at 1.1% share. B&W also strengthened its Raleigh and Belair coupon-redemption program, spending $5.2 million in measured media advertising.

Once again, ad spending for B&W's Barclay brand fell sharply to $9 million in measured media from $23.2 million in 1983. The brand, introduced with a $150 million media campaign in 1981, slipped to less than a 1% market share, leading B&W to test a new marketing strategy that included renaming the brand to Barclay Ultra Lights.

Expansive changes also were made in B&W's relationships with its ad agencies. It first moved its consolidated $80 million media planning and buying account from Cunningham & Walsh, Chicago, to Ogilvy & Mather, Chicago. Other changes resulted overall in making C&W the big loser and O&M and Doyle Dane Bernbach, which grabbed the Kool and Viceroy accounts, the big winners in the agency shakeup.

Whether all the changes help B&W stem its falling market share remains to be seen. But company officials, noting that the market share fell only to 11.2% from 11.3% in 1983 after plummeting from 13.8% in 1981, say B&W already has stemmed the tide.

The revamped marketing strategies represent a three-year program initiated by Ivor Wallace Hughes, former chairman-ceo, who died in March and was replaced by Raymond J. Pritchard, who had been deputy chairman of British-American Tobacco Co., B&W's London-based sister company.

Other top executives who have played a key role in B&W's aggressive moves include Thomas E. Sandefur Jr., who was appointed president-chief operating officer of the company last year and came to B&W from competitor, R.J. Reynolds, and Richard A. Blott, who replaced Mr. Sandefur as exec vp and came to the company in 1982 from Gagliardi Bros., where he was president-ceo.

In its retail group division, measured media advertising fell to $12.4 million in 1984 from $14.8 million the previous year. Outlays fell for most of the subsidiaries except Saks Fifth Avenue, which opened new stores in Cincinnati and South Miami, and Kohl's, its value-oriented specialty department chain that opened three stores.

The company says most of its retail chains chalked up sales gains, but the profit picture was mixed. Operating income rose at Marshall Field's, Kohl's, Breuner's, Gimbels-Midwest and Ivey's-Carolinas, but fell at Saks, Frederick & Nelson, Ivey's-Florida, Gimbels-East and Gimbels-Pittsburgh.

Analysts say Gimbels in Philadelphia and New York as well as Frederick & Nelson in Washington are locked in battles with upscale competitors offering larger discounts. Many of the same forces affected Saks, although company officials continue to mark Saks for expansion. Analysts attributed Marshall Field's performance to its efforts to upgrade its Chicago area stores, most notably its Water Tower mainstay, which received a $100 million facelift.

The largest ad spender among the retailers was claimed by Gimbels, which recorded $2.8 million in measured media spending, down from $4.6 million in 1983. National newspaper advertising for retail stores is not monitored in this report—and it is undoubtedly the largest media category for retailers—leaving most retail spending to two media vehicles, magazines and spot tv.

Saks spending rose slightly to $2.6 million; Marshall Field's fell by about $800,000 to $2.5 million, and Kohl's received $1.4 million. Frederick & Nelson also was down, with $1.8 million in measured media spending compared with $3.1 million in 1983.

Agfa-Gevaert	2,508	2,136	17.4

Bayer AG, whose major U.S. advertising operation is Miles Laboratories, Elkhart, Ind., spent an estimated $105 million on advertising in the U.S., nearly a 17.9% increase over 1983, ranking the company as the 74th largest national advertiser.

Bayer AG, Leverkusen, West Germany, a worldwide supplier of chemical, healthcare, photochemical and phototechnical products, spent virtually all its U.S. advertising on Miles. ADVERTISING AGE this year is featuring Bayer AG, rather than just Miles, because of measured spending contributions from other subsidiaries in the U.S.

Bayer's other U.S. subsidiaries include Mobay Chemical Corp., Helena Chemical and Agfa Gevaert (which includes Compugraphic Corp.), and Haarmann & Reimer Corp. Bayer's U.S. sales were 24% of the world total, all of that coming from the U.S. subsidiaries.

Bayer AG's worldwide sales totaled $15.41 billion in 1984, a 14% increase over 1983, and income after taxes was $420.8 million, up 55.7% from 1983. Sales and earnings for both 1985 and 1984 fiscal years were converted from DM to dollars at the rate of DM2.79 = U.S.$1.

Miles Laboratories, which celebrated its 100th anniversary in 1984, had $1.15 billion in sales in 1984, up 3.2% from 1983, and net income of $27.6 million, down 22.2%, and operating profit of $60.2 million, down 37.1%.

Miles is made up of six groups: Pharmaceuticals, diagnostic products, Cutter, biotechnology products and consumer products. The consumer products group, which attracts the biggest ad dollar, is divided into two segments: Consumer healthcare and household products.

Bayer, however, categorizes Miles financial reporting into two segments: Healthcare and biotechnology. Healthcare reported sales in 1984 of $971.8 million, up 1.8% over 1983, and operating income of $68.9 million, down 33.4%. Biotechnology reported 1984 sales of $184.1 million, up 11.7%, and operating income of $13.9 million, up 54.4%. The poor sales performance is attributed by company officials to the continuing strength of the U.S. dollar. Some 33.7% of Miles' sales were international in both 1984 and 1983.

The largest advertising support at Miles was given to the Alka-Seltzer line, which received $26.3 million in measured spending, excluding last fall's line extension introduction, Alka Mints, a chewable antacid tablet that entered the $640 million category. It is positioned to compete against Warner-Lambert's Rolaid's and Norcliff-Thayer's TUMS, the latter holding a 5.6% share of antacids in drugstores and the No. 1 position in the chewable antacid category.

McCann-Erickson, New York, handles the $4 million Alka-Mints campaign. Network tv and consumer magazines form the bulwark of the Alka-

Mints campaign, with the latter carrying a free-sample offer. In addition, traditional Alka-Seltzer products carry samples of the tablets, and a direct-mail campaign effort sent 1.4 million samples to consumers.

Alka-Seltzer, the primary product of the line, is also Miles' principal consumer product, accounting for 9% of total company sales. Repositioned and supported with new advertising from McCann-Erickson, Alka-Seltzer received $17.2 million in measured advertising funds, up from $13.1 million in 1983. One campaign tied the Alka-Seltzer brand with H&R Block, the tax-form preparation company, to promote Alka-Seltzer as "tax relief." Still in the test-market stage is an extra-strength version of Alka-Seltzer, which contains 500 mg. of aspirin and boasts a higher acid neutralization capacity than the regular strength.

Another line extension product, Alka-Seltzer Plus, demonstrated the largest growth of any of Miles' consumer healthcare products, becoming the fourth leading brand in the cough-cold category, which last year totaled $340 million in drugstore sales. Wells, Rich, Greene, New York, the former Alka-Seltzer agency, continues to handle Alka-Seltzer Plus.

One-a-Day vitamins, an adult vitamin formula, was repositioned and restructured with two combinations of 13 vitamins and 13 minerals in a maximum formula version. One-a-Day Plus Iron was renamed Within, with advertising targeted to the female population. Reformulated with 150% of the recommended daily allowance of iron and 33% of calcium, Within attempts to reach women with the two nutrients said to be lacking in the diets of 80% of U.S. women.

Calcium as a single mineral supplement is being marketed by Miles under the Biocal name. Biocal is being promoted primarily to physicians and pharmacists for professional recommendation to consumers. In the six months ended June 30, 1985, Biocal held a 4% share of the calcium supplement drugstore sales market.

Miles continued to dominate the $80 million children's vitamin category with its Flintstones and Bugs Bunny vitamins. Flintstones advertising stresses the importance of nutrients to a child's growth. With advertising totaling $5.8 million in measured spending, down from $7.4 million in 1983, Flintstones managed to hold on to a 30% share of the children's vitamin market, despite increased competition from six new category entrants, which included E.T. vitamins (from E.R. Squibb), Pac-Man (Rexall Corp.) and Smurfs (Bristol-Myers).

Bugs Bunny vitamins were repositioned as a sugar-free, natural flavor and color children's vitamin product. The measured advertising was nearly tripled, to $3.2 million from $1.2 million, and packaging was updated as Miles sought to bolster its hold on the softening vitamin market. Nearly half of the Bugs Bunny budget was spent on tv. Tatham-Laird & Kudner, Chicago, handles all the Miles vitamin products.

Miles' household products business exceeded sales goals in 1984, though company sources refused to reveal figures. S.O.S. oven cleaning pads, introduced in 1983, have become the No. 2 product in the U.S. in the oven-cleaning segment. Last year, the product was presented to the Canadian buying public. S.O.S. steel wool soap pads are now 67 years old and remain the leading brand in all areas of the country, including the recently acquired lead in the New York market. The Doyle Dane Bernbach campaign stresses additional uses for S.O.S. pads with the theme "More than pots and pans."

The S.O.S. oven cleaning pads' measured media budget was increased to almost $4 million last year, up from $2.5 million, while the scouring pads received nearly $4.4 million, a slight increase over the $4.2 million spent the year earlier.

Cutter insect repellent, a part of Miles' household products division since 1983, was joined by three new line extensions, maximum strength, pump spray and individual packet versions. The product is sold in drug, food and sporting goods outlets.

Hospital-related products manufactured by Miles suffered the effects of a two-pronged attack. Cost-containment measures by hospitals and other healthcare businesses hurt sales, while new companies and new products further diluted performance. Softening the poor sales performance—up only 1.9% in 1984 over 1983—were several new-product introductions and updated versions of existing products.

In the fourth quarter of 1984, the company marketed a series of urine analyzers under its Ames division. The Ames Clinitek Series now includes Clinitek Auto 2000, for use by hospitals and large laboratories, Clinitek 200 for medium-sized laboratories, and Clinitek 10 for physicians' offices.

An updated version of Seralyzer Reflectance Photometers became the first instrument for use in the physician's office that combines tests for routine blood chemistries, therapeutic drug monitoring and tests for electrolytes in a single, flexible system.

The Miles Pharmaceuticals division saw a growth in prescription drugs, including cardiovascular medications, antibiotics, antifungals, dermatologicals and allergens. The company continues to market the Glucometer instruments and the Visidex strip test for self-monitoring of blood glucose by diabetics.

Miles' biotechnology products were led by the citric acid and enzyme businesses. The Marschall Products dairy ingredients division recorded more modest sales gains, despite its first full year's participation in the agricultural products business. Miles expects to see improved performance for Marschall with two new entrants—Ag-Master high moisture corn inoculant, a nutrient preservative, and Naturage, a new system that accelerates the aging of cheese while retaining flavor characteristics.

The Cutter biological division maintained its leadership position in products derived from blood plasma. Sales growth was recorded for the Gamimune immune globulin product, especially in the U.S. and Japan. Among Cutter's new products are the CLX system for seven-day platelet storage and a pasteurization step in the production of Koate and Konyne, used to promote blood clotting in hemophiliacs.

Cutter last year acquired an exclusive license to produce and market worldwide blood-clotting protein, Factor VIII, from Genentech Inc. of San Francisco, which was produced by Genentech's recombinant DNA technology. Cutter's major product receiving advertising spending is Cutter insect repellent, with spending of $889,500 in 1984, down 1.3% from 1983.

Mobay Chemical Corp., Pittsburgh, recorded U.S. sales of $1.55 billion, up 19%, and income before taxes of $135 million, up more than 100% due primarily to high-capacity utilization. Mobay produces agricultural chemicals and high-performance engineering plastics for the electronics, packaging and automotive industries. Its measured advertising in nine media was $3.9 million in 1984, $3.8 million of that in farm publications. Mobay is estimated to have spent more than $12.3 million on all advertising.

Agfa-Gevaert, with worldwide sales of $2.51 billion in 1984, up 17.4% from 1983, achieved a quarter of those sales in North America. A-G, marketer of color and black-and-white films, magnetic tapes, videocassettes and various technical photographic applications, bought a minority interest in Matrix Corp., Orangeburg, N.Y. in 1984. Matrix is active in image recording and processing in the medical profession. A-G spent $2 million in U.S. advertising in 1984, up from $1 million.

Beatrice Cos., Chicago, the 4th largest national advertiser with an estimated $680 million total expenditures, is experiencing a kind of corporate midlife crisis: It has changed its name, reorganized its structure, made a new business marriage, divorced itself from others and changed its leader. And all the while it continues making money.

Total revenue for 1984 was $12.6 billion, up 35% from 1983. For the first quarter of fiscal 1985, ended May 31, 1985, the percentage jump was even greater, up 39%, to $3.1 billion, compared with the corresponding period in 1984. Year-earlier figures except for part of the last two quarters do not include financial results of Esmark, acquired in August, 1984.

Net earnings for 1984 rose 10.6%, to $479 million. Earnings for the 1985 first quarter are down 19.5%, dropping to $58 million compared with the first quarter of 1984. Beatrice ascribes the loss to interest expenses and cost amortization in the 1984 acquisition of Esmark.

In its new organization, Beatrice places great stress on advertising, which has not always been the case: Analysts say Beatrice spent 30 years trying to keep a low profile, lagged behind food competitors in advertising spending, historically focused on production rather than marketing and followed a strategy of decentralization.

Beatrice's mission began to change with the administration of Wallace G. Rasmussen and his successor, James L. Dutt, who became chairman-ceo in 1979. The goal of marketing strategy under Mr. Dutt has been to make Beatrice the world's premier marketer of food and consumer goods.

Mr. Dutt brought centralized control to Beatrice. And although he resigned Aug. 3, 1985, over differences with the board about execution of the new marketing program, it is said the original goals continue to guide the company.

Beatrice for years has needed a national distribution system. Although it is a huge company, most of its brands acquired over the years continued to be regional and were channeled to the market through individual food brokers. The company needed to divest some of its units because they were unprofitable, did not match corporate plans or were not practicable because of heavy competition. Greater national distribution presence came with the Esmark purchase in 1984.

Amid rumors early in 1984 that Beatrice might be the subject of a takeover attempt by Nestle, Esmark or Unilever, Beatrice turned the cards and bought Esmark for about $2.8 billion in August, 1984, merging Esmark into Beatrice. With that marriage, Beatrice got Esmark's distribution system and its range of recognized national brands, Swift meats and Hunt-Wesson tomato products and oils.

Beginning in 1979, and continuing until 1984, Beatrice divested more than 50 companies. The process continues to reduce the $4 billion debt rung up by the Esmark merger and to winnow out the companies that did not fit the food and consumer goods mode that is the new Beatrice. Sold have been whole categories of Beatrice companies in specialty apparel, graphic arts, agri-products, cryogenic equipment, foodservice equipment, leather operations, cookie and bread baking, and chemicals. Proceeds totaled more than $1.4 billion, and the debt has been cut by about $1.3 billion.

Commitment to advertising as the great marketing motivator apparently has never been greater at Beatrice. Beginning Sept. 10, 1983, in a giant $30 million Beatrice corporate identity program, the conglomerate unfurled its red Beatrice stripe logo across a heavy booking of new advertising with the message, "We're Beatrice. You've known us all along." HCM, Chicago, is the agency.

Also, saying that advertising on tv cost too much and was down in impact about 10%, auto-racing aficionado Mr. Dutt arranged for Beatrice to sponsor in 1984-1985 a U.S. and Formula I International auto racing team co-owned by actor Paul Newman and Chicago businessman Carl A. Haas. Cost: $70 million.

With advertising expenditures totaling $680 million in 1984, Beatrice ad spending reached 5.4% of its total 1984 revenue, on a par with other consumer food leaders.

Results of these 1984 Beatrice efforts to energize distribution for competitive combat and field a synapses-snapping advertising message are being reviewed. "Even with Dutt gone, he left a legacy with Beatrice—a lot of marketing effort to raise its profile in the grocery store," says Ronald Strauss, securities analyst with William Blair & Co., Chicago.

Beatrice has stated that through its merger with Esmark—which has a 500-member Hunt-Wesson nationwide distribution system—its goal has been to place a Beatrice product on every supermarket aisle. In the process, Beatrice hopes the Beatrice logo on quality brands—Tropicana, Hunt's, La Choy, Swift—will be transferable to regional and newly introduced brands.

By December, 1984, the first Beatrice product line, La Choy Chinese food, was going into the Hunt-Wesson channel, and following later were three Beatrice regionals: Fisher Nuts, Sanna's Swiss-Miss chocolate-mix products and Rosarita Mexican foods.

The merged company has many leading brands to offer, among them Tropicana juices, leading brand in the $1.5 billion ready-to-serve orange juice market; Peter Pan peanut butter, third among peanut butters with a 14% share; Hunt's All Natural barbecue sauce, with second-highest market share; La Choy Chinese foods, the canned Chinese food market leader, and Hunt-Wesson's Orville Redenbacher Popping Corn, Hunt's Manwich sauce and Hunt's tomato products, all No. 1 in their markets. "In the next two years, the Beatrice grocery companies with their new national distribution system will be Beatrice's great strength," says Laurie Lively, Oppenheimer & Co., New York.

Both Beatrice and Esmark also have many strong nongrocery lines. Beatrice includes Culligan water treatment, Samsonite luggage and furniture, Stiffel Lamps and Rusty Jones rust preventive, while Esmark has Playtex women's intimate wear, Avis car rental, Jensen audio and Danskin sports garments. No divestitures have hit these areas, although some consumer product companies have been sold, including Buckingham Corp. in October, 1984 (Cutty Sark scotch, Finlandia vodka), Shedd's Spread margarine and ButterMatch margarine-butter blend in January, 1985, and STP car-care products in April, 1985.

Analyst Mr. Strauss believes that although grocery line products are not likely to be sold, "there will be some added divestitures. There's a lot of conjecture in the field about, say, Avis or Playtex or Samsonite." Avis is still No. 2 behind Hertz' market share of 33%. Avis' share has dropped from a high of 29% in 1975 to 24% in 1985. Samsonite is a market leader, but its earnings fell in 1984 because selling prices could not stay ahead of sales/marketing costs. The International Playtex line also is highly profitable. It includes women's intimate wear, tampons and rubber personal-use products plus Givenchy hosiery, Jhirmack haircare products, Almay and Max Factor cosmetics, and the Halston/Orlane fragrance and skincare line.

Given the wide swath of Beatrice products, it is understandable that the audience and the players in the Beatrice identity ad campaign have given it mixed reviews. Beatrice's umbrella campaign "was viewed on Wall Street as the least-efficient type of advertising—as far as promotional value goes—in promoting earnings," says Ms. Lively of Oppenheimer.

"What they [Beatrice executives] were trying to do was build a franchise, like Nabisco's, but they didn't have the underlying strength, the solid base of a wide range of familiar, well-liked products like Nabisco. This kind of advertising is viewed [in the investment field] as very inefficient and very expensive. Similarly, the racing program seems too costly for the benefits," she adds.

Beatrice counters that there are statistics to prove its success. Says Jeff Rich, Beatrice director of corporate identity, who designed the increasingly familiar stripe logo, "What we're saying with the Beatrice logo . . . is like an old-fashioned Good Housekeeping seal—when you buy a product with this symbol, Beatrice is standing behind it."

The ID program started on tv with the 1984 Winter Olympics aimed at supermarket customers—60% of whom are female—and the supermarket industry. The advertising continued at the Summer Olympics in Los Angeles, and at the conclusion of the summer games, 13% of those in audience recall testing could name Beatrice unaided and 65% aided. Before the winter games, only 1.3% of those tested could name Beatrice unaided, and 19% aided.

The biggest chunk of Beatrice ad spending was on its U.S. food segment, which produced $6.3 billion in revenue for 1984, about half of the Beatrice total and up 53% from 1984. (Esmark is included in the 1984 results though not in the comparable period.) Results were credited to higher demand for soft drinks and bottled water, new product introductions, and higher prices for fruit juice products. Food segment earnings were up 10%, to $372 million in 1984.

U.S. food, with three subgroups—grocery, refrigerated food and beverage—has 57.5% of Beatrice sales (in 1984); consumer products, 18%; international foods, 17%, and Avis/other operations, 7.5%.

Sales of the consumer product segment were up 106% in 1984, to $1.95 billion, because of volume gains and the inclusion of Esmark. Earnings rose to $201 million, up 51%, although there were declines in the Samsonite luggage line and reduced earnings, too, in the International Playtex tampon business because of the product-exchange program responding to consumer concern about toxic shock syndrome.

International food segment sales rose 6.9%, to $1.95 billion in 1984, but earnings fell 4%, to $101 million, because of lower foreign currency exchange rates.

The Avis/other operations segment jumped to $821 million in 1984 from $28 million in 1983, the sharp increase resulting from including Esmark's car rental business in a Beatrice segment that formerly had included many smaller investment operations (since divested).

Viewed by media, Beatrice in 1984 continued making heavy use of run-of-press newspaper space, increasing its spending to $12.3 million, up from $5.7 million in 1983. Its other major print category, magazines, dropped 13.4%, to $43.5 million in 1984. Cable tv increased to nearly $5.1 million from just $90,000 in 1983. Spot tv spending rose 25%, to $57.5 million; network tv was up 14%, to $111.6 million. Spot radio was off considerably, by 44%, to $2.99 million, but network radio ballooned to $3.4 million. Outdoor display in 1984 fell to $438,000 from $4.42 million.

The 1984 Beatrice advertising/promotional total of $680 million is a composite of $293 million for Beatrice and $307 million for Esmark. On a comparable basis, the 1983 six-media measurement compiled by Leading National Advertisers showed significantly higher spending for Esmark—$154.2 million compared with $47.3 million for Beatrice. This was accounted for by Esmark's own advertising-intense brands like Swift meats, but also by the many heavily promoted Hunt-Wesson brands that Esmark acquired in 1982. For 1984, the six-media total for Beatrice, now including the acquired Esmark, was $217 million, up 7% from the 1983 combined total.

Specific 1984 advertising expenditures by product line and brand show efforts by Beatrice to build its marketing muscle by several different techniques: To push regional brands national, as with Culligan water products and County Line cheese; to begin meeting major competition from other big-gun food marketers head-to-head, again, in the case of its cheese lines vs. Kraft; to capitalize on certain specialized products, like Almay hypo-allergenic cosmetics, and to build on existing strong franchises such as Orville Redenbacher Popping Corn, Playtex, Max Factor, Eckrich meats, Fisher Nuts, Swiss-Miss and Tropicana.

Major media ad spending increases for 1984 were made for the Almay cosmetic line, formerly Esmark, climbing to $8.3 million from $1.9 million in 1983. County Line cheese spending swelled to $2.2 million from $453,600 as Beatrice expanded its distribution in stages. In 1984, it went from its original Midwest marketing area to the Southeast; to Texas, where it competed hotly with Kraft (1983 cheese budget—$45 million); to Denver, and then this year, to the east and west coasts. D'Arcy MacManus Masius, Chicago, is the agency.

Beatrice increased the Culligan water treatment systems major media budget to $4.4 million from $1.5 million in 1983. Spending was for a new national network tv campaign out of HCM, Chicago, that promotes Culligan's Aqua Clear home drinking water filtration system under the themes "the future calls for Culligan." Culligan formerly advertised regionally, in hard-water areas, where its water softening and purifying products were most in demand.

Other sizable ad spending increases for 1984 include: Orville Redenbacher Popping Corn brands, up 44% to $10.2 million; Swiss-Miss chocolate drink mixes, up 42% to $11.5 million; Eckrich meats, up 161% to $8.9 million; and Fisher Nuts, boosted 106% to $5.4 million.

Also increased were Tropicana frozen and ready-to-serve fruit juices, up 37% to $12.3 million; Max Factor cosmetics, a former Esmark line, rose 36% to $9.6 million, and the two Playtex lines—the tampons, increased 7%, to $4.2 million, and the intimate wear, up 16% to $15.9 million.

The Jhirmack haircare line was continued at $8.8 million for 1984, about even with 1983, and a number of other brands were decreased, apparently in tradeoffs as the new Beatrice ad machine gets under way. Major media decreases for 1984 included the Danskin line, dropping just shy of $800,000 for 1984 from $4.8 million in 1983; Avis, down 14% to $12.1 million; the Halston line, including fragrances, off 10% to $1.2 million, and clothing, off 14% to $86,700; Jensen audio down 50% to

Source: Rome Reports as reported in *Business Marketing*, a Crain Communications Inc. publication.

$873,000; Hunt products, off 31.6% to $17.7 million; Wesson oils, down 46% to $10 million; La Choy Chinese foods, down 62% to $1.3 million; the Martha White baking mixes line, down 45% to $914,700; Swift meats, down 28% to $11.7 million, and Samsonite luggage and furniture, off by 34% to $2.7 million.

In a time of change at Beatrice Cos., shifts in agencies and personnel continue. Among the agency changes were a shift of the $14 million account for Almay, an International Playtex division, to Saatchi & Saatchi Compton, New York, from Geer, Dubois in New York; a shift of the $15 million Tropicana account to Leo Burnett USA, Chicago, from Benton & Bowles, New York; and—a first for Beatrice—the selection of black-oriented Burrell Advertising, Chicago, to handle U.S. foods segment advertising aimed at black consumers.

At the corporate level, Beatrice has replaced Mr. Dutt as chairman-ceo with a Beatrice retiree, William W. Granger Jr. He started at a Beatrice dairy plant in Norfolk, Va., in 1946, rose through the ranks to become vice-chairman of the Beatrice board, and coordinated the 1984 Beatrice-Esmark merger. As new chairman of the board executive committee, the company has brought back William G. Karnes, 74, former Beatrice chief executive who started to build the many Beatrice companies back in 1952.

Beecham Group p.l.c., a British pharmaceutical and consumer products company, spent an estimated $137 million on U.S. advertising in 1984, a 1.8% increase over 1983, making it the 58th largest national advertiser.

The U.S. operations of Beecham include Beecham Products Division, Beecham Cosmetics, Beecham Home Improvement Products, Beecham Laboratories Division and the newly acquired Germaine Monteil Cosmetiques.

For Beecham Group's fiscal year ended March 31, 1985, the company reported worldwide sales of $2.84 billion, up 14.8% from the previous fiscal year. The company's worldwide sales increased by 17% when calculated in British pound sterling. Western Hemisphere operations account for $1.02 billion, or 34.5% of the company's total sales volume. Beecham does not make a separate accounting for U.S. sales figures.

Beecham U.S. operations spent $92 million on advertising in nine measured media, up 1.2% from 1983. Of that total, $78.5 million was spent on network tv. The estimated $43 million in unmeasured advertising included co-op, free sampling, sports sponsorship and direct mail.

Beecham Products division, the biggest ad spender of the group's U.S. divisions, continued to heavily advertise its Aqua-fresh toothpaste, spending $22.9 million in the six media measured by Leading National Advertisers, off 6% from 1983. Aqua-fresh, which introduced a pump dispenser with a clear plastic collar in early 1985, holds an 11% market share in the $1 billion dentifrice market, as compared with Crest at 34%, Colgate at 32%, Aim at 10%, Closeup at 7% and Pepsodent's 3%.

Spending for Ace combs increased from $248,000 in 1983 to $1.39 million in 1984. The bulk of this spending—$1.19 million—was for network tv. Fruit-Fresh preservatives, up 158% to $2.09 million, was another product with a major advertising increase, while N'Ice sugarless lozenges' 1984 ad spending fell 65% to $2.2 million in measured media.

Advertising for Calgon bath products also slipped 27.5% to $7.9 million in 1984. Spending for Cling Free fabric softener increased 27.8% to $6.9 million, Geritol in liquid and tablet form increased 17.5% to $9.4 million; Massengil disposable douche increased 12.5% to $8.1 million; Sucrets lozenges for adults and children received $4.8 million, equal to 1983 spending; Sominex received $4.3 million, the same as in 1983.

Sominex is doing battle against Block Drug's Nytol, which received $3.3 million in measured spending in 1984, up 65% over spending levels in 1983. Also going into 1984, the company discontinued Sculptura by Jovan and Star Wars children's bath toiletries—products that received only minimal support in 1983.

During 1984, Beecham Products joined the move toward split-30-second tv spots (combo spots each 15-seconds for two different brands). Calgon, Aqua Velva and Aqua-fresh brands have used split-30s. Avrett, Free & Ginsberg, New York; Cunningham & Walsh, New York, and Grey Advertising, New York, share Beecham products assignments.

In a transaction begun in late 1984, Beecham Group acquired Germaine Monteil Cosmetiques in January, 1985. The cosmetics and fragrance company was purchased from British American Tobacco (B.A.T.) Industries p.l.c., London, for $105 million.

Germaine Monteil, with operations in Europe and the U.S., is operated as a separate subsidiary within the Beecham Group. However, within the U.S. some products from Chicago-based Beecham Cosmetics and Germaine Monteil's New York operation were to be moved from one to the other to effect a better marketing fit by mid-September, 1985. The move represents the breakup of Beecham's Beaute division.

Diane von Furstenberg and Lancaster lines will be sent to Germaine Monteil, New York, from Beecham Cosmetics in Chicago in exchange for Lentheric and Tuvach fragrance and bath products, two brand lines that will be merged into Chicago's Yardley division. Germaine Monteil is expected to further develop the Diane von Furstenberg and Lancaster businesses through its strong distribution network in department and specialty stores.

Vitabath will remain with Beecham Cosmetics, along with Yardley of London and Jovan. Monteil handles its advertising in-house though Beebe & Sons. In 1984, Beecham Cosmetics consolidated all advertising at Zwiren & Wagner, Chicago. Yardley products had been handled by Bozell & Jacobs, Minneapolis, and Beecham Beaute products by Cunningham & Walsh, Chicago.

In February, 1984, Jovan introduced Whisper of Musk fragrance in a move to solidify its 54% share of the $100 million musk segment of the fragrance market. Coty has a 24% share of the market, with Houbigant holding a 16% market share. A $4 million media campaign promoting the Whisper of Musk introduction was aided by a 31 million-piece sampling program.

The new Yardley of London fragrances, Love Notes perfume for young women and Black Label, a revised scent for men, were introduced in the fall of 1984. Yardley also introduced a kitchen hand soap in pump dispenser in May, 1984.

During the second half of 1985, Lancaster rolled out nationally its Lancaster Immediate Peeling Fresh Complexion Masque, a clarifying skin mask.

Spending on other Yardley and Jovan brands remained at or near 1983 levels, which were relatively modest. All Yardley products pulled only $295,100 in measured spending in 1984 compared with $781,600 in 1983, according to six-media figures of LNA. Jovan measured spending reached $3.8 million in 1984 vs. $1.3 million in 1983, primarily the result of the Whisper of Musk campaign.

Barry E. Shipp, founder of Jovan, in June, 1985, assumed the presidency of Beecham Cosmetics, replacing Richard Meyer, who has left the cosmetics industry.

Allan Mottus, a health and beauty products industry consultant and publisher of "The Informationist" newsletter, predicts the Germaine Monteil acquisition will present a challenge for Beecham. "Monteil has had trouble attracting younger women to its counter," he says. Mr. Mottus estimated Beecham Cosmetics sales volume at about $150 million in 1984. The newly reorganized Germaine Monteil, with the addition of Diane Von Furstenberg and Lancaster lines, will have about $50 million in sales volume.

With the purchase of DAP Inc. in March, 1983, Beecham Group entered the home improvement market. In April, 1984, the company purchased Roberts Consolidated Industries, another maker of adhesives and home improvement products. Sale prices for these transactions were not revealed. The two companies were consolidated in April, 1985, as Beecham Home Improvement Products. Product line includes DAP caulk and seal, Weldwood adhesives, Derusto coatings, Woodlife wood treatments and Permabond superglue.

Upon consolidation, Cunningham & Walsh, New York, was named agency of record for the division. According to a spokesman for Beecham Home Improvement Products, spending has been targeted at $1.8 million for the current year, to be divided among trade publications (20%), newspapers (75%) and direct marketing (5%).

Paced by continued popularity of the prescription drug Amoxil, Beecham Laboratories has had further growth with the introduction of two other prescription antibiotics, Augmenten (November, 1984) and Timentin (May, 1985). The company's veterinary products division increased its visibility by being named official supplier of antibiotics and products to the U.S. Equestrian Team during the 1984 Summer Olympics.

Household prods.	438	397	10.1

Bristol-Myers during 1984 continued its strategy to place a greater emphasis on its pharmaceutical and nonprescription health products divisions, a ploy to produce better gross margins. In doing so, it spent an estimated $258.4 million in U.S. advertising, a 7% increase over $241.5 million in 1983.

The New York-based company, ranked 31st among the nation's advertisers, spent $257.4 million purely in advertising worldwide in 1984, up from $237.4 million in 1983. The company reports that $486.5 million was spent in product promotion worldwide, up from $414 million in 1983.

During the year, the company improved gross margins despite the marketing shift, which many industry observers say has eroded the company's market share in its traditional segments. In fact, margins edged up from 64.6% in fiscal 1983, to 66.4% in 1984.

Sales for the second quarter ended June 30, 1985, were up only 1.9% to $1.08 billion. Earnings jumped 13.3% to $125.9 million. Unfavorable exchange rate fluctuations reduced total company sales for the quarter by about $37 million, or 4%. U.S. sales improved 4%.

For fiscal 1984, Bristol-Myers reported sales of $4.2 billion, up 7% from 1983. Net earnings improved 15.8% to $472.4 million.

The pharmaceutical and medical products segment, which contributes 38% of sales and 42% of operating profits, registered a 5% increase in sales and 42% boost in operating profits in 1984. Nonprescription health products increased 11% in sales, the greatest sales increase of all segments. The toiletries and beauty aids segment reported a 6% sales increase, and the households products division showed a 10% sales improvement during 1984.

Introductory support for Nuprin, Bristol-Myers' ibuprofen entry, coupled with a high level of spending on new and existing products, increased the percentage of sales for advertising and product promotion expense to 17.8%. That was up from 16.6% of total sales in 1983 and 15.8% in 1982.

In 1984, Bristol-Myers' pinned its hopes on Nuprin. Bristol was able to get into the ibuprofen category, which many thought would garner as much as $400 million of the $1.6 billion analgesic market, early by licensing the brand from Upjohn Co., which sells the product in greater dose forms by prescription under the name Motrin.

But it was a tumultuous year for Nuprin, starting with a lawsuit filed by Johnson & Johnson to halt Nuprin's ad campaign. When advertising finally was launched, consumers were confused by the prescription to over-the-counter conversion message. "One big mistake the ibuprofens made was to assume the public was awaiting these formerly prescription brands," says industry consultant Allan G. Mottus. "For the most part, Americans have been satisfied with their pain relievers." On top of that, Nuprin could use the conversion campaign for only six months, meaning it had to take a new tack in midyear. Nuprin appears to have found a better spot with sympton-specific ads.

With a measured spending budget of almost $20 million (mostly network tv), Nuprin added about $35 million in business to Bristol's product division. Nuprin's addition pushed Bristol's total analgesic sales past $200 million, a 20% increase over 1983. Nuprin, however, did not achieve the share of the market Bristol-Myer had hoped for. Bristol probably is giving it another shot in 1985.

In 1984, Bristol also encountered difficulties trying to inject new life into Datril. Measured media of about $7.2 million could not push Datril past a 1% share of the market. Bristol's other brands, Excedrin (measured media $15.9 million) and Bufferin (measured media $9.7 million), maintained shares of 5.5% and 4.9%, respectively. Competitor Bayer holds 5.7% of the market, while the Advil brand of American Home Products' Whitehall Labs controls a 4.3% share.

Last year, Bristol-Myers sank a great deal of its ad dollars into analgesics. If the measured media dollars devoted to Datril and Nuprin ($27.1 million) are subtracted from total spending, Bristol's spending is actually flat when compared with 1983.

In Bristol's pharmaceutical division, industry analysts are optimistic about the company's new BuSpar, an anti-anxiety drug. BuSpar, according to Robert Benezra, an analyst with Alex, Brown & Sons, Baltimore, is unique in the market because it is not addictive and not a sedative. Mr. Benezra predicts BuSpar could grow into as much as a $300 million brand at maturity in three or four years.

BuSpar will require very little advertising support, analysts say, because 90% of its promotion will be via detail work to doctors and pharmacists.

Toiletries and beauty aids sales hit $1.02 billion in 1984, up from $986.4 million in 1983, but despite the sales increase, Bristol lost some ground in its core business areas. Bristol's Clairol is still the dominant force in hair color, with about 60% of the market, according to Nancy Hall, an analyst at Prudential Bache, New York. But its share did slip a few points in 1984, according to Diana K. Temple of Salomon Brothers, New York.

This year, Bristol is revving up for a hair coloring battle with Cosmair's L'Oreal. L'Oreal will be pitting its new semi-permanent Avantage hair color lotion—backed with a $6 million budget—against Clairol's Loving Care, which received $8.2 million in measured spending in 1984, up 8% from 1983. Loving Care now claims about 11% of the $400 million (manufacturers' dollars) market. Clairol also will stir things up when it takes Ultresse, the first gel hair coloring, national by yearend. Ultresse was test marketed in 1984 on the West Coast with spending at the equivalent annual rate of $10 million.

According to Ms. Temple, Clairol also lost share in hair spray in 1984. Clairol brands sank from a 21% share in 1983, to 19.7% in 1984.

In the $3 billion haircare category, Clairol's share suffered as a marketing battle erupted involving eight major players. Even with the relaunch of Clairol Essence line (a relative of its Herbal Essence brand and Klorane), the company's total share of shampoos was pared from 3.8% last year to 3.3%. In the first quarter of 1985, that share has dropped to 2.8%. In hair conditioning, Clairol brands garner 4.5% of the business, vs. 4.8% in 1983. Clairol extended its Sea Breeze cleanser with a lotion in 1984. Spending behind Sea Breeze totaled $8.5 million.

Ban deodorant, Bristol-Myers' only deodorant line, received measured media spending of $10.1 million. That was not enough to keep the market share for the new, popular sticks from eroding. Ban's share dropped from 9.3% in 1983, to 8.8% in 1984. In 1979, Ban had 16% of the category.

Market share for Bristol's Comtrex, which pioneered the multi-symptom segment of the cough cold business, continued to slip in 1984, to 5%. Spending behind Comtrex dropped 17% to $10.3 million. That is down significantly from the $17 million budget Comtrex enjoyed in 1982.

In Bristol's Drackett division, with sales of $426 million, Bristol introduced O'Cedar No Wax Power Strip sponge mops and Lemon Endust in 1984.

Drackett brands received $28.8 million of measured spending, up 3.6% from 1983.

Management and advertising agency shifts last year at Bristol included the naming of Ronald A. Ahrens as president of Bristol-Myers Products, succeeding Poley H. Disney. Mr. Disney left after two years in the post and almost 20 years with the company.

Bristol split with Kenyon & Eckhardt, assigning many of its accounts to Laurence, Charles & Free. Ally & Gargano, New York, snared Datril, with billings of $13 million, when K&E and Bristol parted ways.

In 1984, Bristol also made its first move into cable program sponsorship with a fitness series called "Alive & Well."

Brewers' bated breath

There has not been an increase in the 65-cent-a-case federal tax on beer since the Korean War, and no one is seriously considering one right now. But the brewers are worried because federal levies on beer and wine are the only "sin taxes" that have not been increased recently. Last year, tax writers raised the federal tax on hard liquor by 19%, effective next Oct. 1. And, in 1981, they doubled the federal excise tax on cigarets, to 16 cents a pack. More recently, bills have been introduced to increase tobacco and hard-liquor taxes even more, to help finance the troubled Medicaid system.

Apple is getting riper

Apple Computer Co., which has undergone hard times, also entered a new era in 1985 as it parted ways with its two founders, Stephen Wozniac and Steven Jobs, who built Apple into the No. 2 producer in the U.S. Employment had grown to 14,800 before 1985 reductions cut that by 2,200 as part of a reorganizational move. Mr. Wozniac left prior to the reductions. Mr. Jobs, chairman, resigned in mid-September saying under the leadership of president-ceo, John Sculley, he had "no work to do and no access even to regular management reports."

Introduction of new products through reformulation and repositioning, continued aggressive marketing and development of new technology in containers and packaging helped push U.S. advertising spending up an estimated 11.6% to $142 million in 1984 at Campbell Soup Co.

The Camden, N.J., company, ranked the 53rd largest national advertiser, is continuing to develop these same market-building techniques in fiscal 1986 when total ad expenditures are expected to reach $165 million alone for the Campbell U.S. division.

Over-all, the company reported worldwide earnings for the fiscal year ended July 28, 1985, of $197.8 million, up 3.7%, on sales of $3.99 billion, up 9.1% over the prior year.

The company was paced by its Campbell U.S. division, Campbell's largest operating unit, which accounted for $2.5 billion in sales, or 62.7% of consolidated sales, and $292 million in operating income, or 82% of the company total in fiscal 1985. Sales in the division were up 9.2% and operating income, 4.9%, compared with fiscal 1984. Unit volume rose 4% compared with a 9% increase in fiscal 1984. Marketing expenditures were up 14% to $488 million.

As Campbell moved into fiscal 1986, the company's flagship U.S. soup division which accounts for about 25% of the company's consolidated sales—was the focal point of company marketing efforts as it began to roll out nationally a line of new products that fell under the Campbell Quality Soup and Recipe Mix labels.

The line, in test market the past two years, gives Campbell entry into the $430 million dry soup category. In what the company describes as the most aggressive soup introduction in its 116-year history, Campbell will spend an estimated $20 million in the first yearof promoting the six-item line. Print, tv and coupon campaigns are planned. The Quality line features chicken noodle with white meat; noodle soup with real chicken broth; chicken rice with white chicken meat; onion for soup, dips and recipes; onion mushroom for soup, sauce and recipes.

Chunky soups, backed by $5.3 million in ad spending, according to six-media figures monitored by Leading National Advertisers, during fiscal 1985 registered a sales increase, paced by the new Chunky New England clam chowder variety introduced in 1983. Plans to develop, introduce or expand distribution of soup products include dry and refrigerated Home Style soups and frozen varieties of Home Cookin' soups.

Le Menu, with measured media spending totaling $9 million, mainly in tv and print campaigns for the national introduction of Le Menu frozen dinners, completed its first year of full distribution with sales of $150 million. Le Menu introduced five new dinners in 1985, bringing the total number of varieties to 17. Sales for the frozen foods business unit increased 43% in fiscal 1984 ending July 29, 1984. Campbell had not released intradivisional sales by this writing.

Swanson's basic frozen dinner business, with a 55% market share, continued the positive momentum in 1984 that resulted from the previous year's product quality improvement program. The traditional frozen dinner varieties, backed by $11 million in measured media spending, rose 6% in units sold in fiscal 1984. In calendar 1985, Swanson entered test markets with its dinners in table-ready trays suitable for use in either microwave or conventional ovens. Swanson plans to roll out its new packaging across the rest of the country by the end of the year.

The repositioning of the Swanson breakfast line under the Great Starts name, backed by $1.3 million in media spending, doubled the brand's growth during the past year as the product line moved toward national distribution. The line features two new varieties: Cinnamon swirl french toast with sausages, and pancakes and strawberries in sauce.

Prego spaghetti sauce, backed by $12.1 million in tv and print campaigns, went national in 1984 with Prego Plus, a premium spaghetti sauce containing large chunks of meat and slices of vegetables. Prego Plus comes in three varieties: Italian sausage and green pepper chunks, veal and sliced mushrooms, and sliced mushrooms and chunk tomatoes.

Prego has built a 25% market share against Ragu's 50% share in the four years Prego has been on the market. Before Prego's entry into this category, Ragu dominated with $19.3 million in measured media spending, predominantly in tv, radio and magazine campaigns.

Among the Franco-American and Campbell's beans lines, a new product, Superiore canned ravioli, was introduced regionally in print and tv advertising, including couponing. The introduction came near the end of fiscal 1984. The grocery unit entered fiscal 1985 after recording an increase of 14% over fiscal 1983.

The new fruit juice segment of the beverage business unit, created in 1982 with the acquisition of Juice Bowl—said to be the largest producer and supplier of citrus juices to the airlines—provided 22% of the total volume growth. This was in part because of the introduction among grocery retailers in Milwaukee and Chicago of its six-item, 100% pure fruit juice line. Advertising spending totaled $2.3 million in tv advertising.

The JuiceWorks line of 100% pure, natural fruit juices aimed at the children's market expanded into the East and the Midwest in August, 1984, powered by a $10 million campaign in tv and coupons. Themed "Kids are really asking for it," the campaign featured pajama-clad children talking about how much they like JuiceWorks, how it tastes all-natural.

The tomato-based segment, made up of V-8 juice, Campbell's brand of tomato juice and its line extensions, made a good showing within the declining category. In fiscal 1984, V-8 maintained its 50% share of the market. Measured media spending totaled $10.7 million on tv advertising.

The company was able to expand distribution for Campbell's Farm Fresh mushrooms created by the new mushroom-growing facility in Georgia. This led to a 7% sales increase for the Campbell's fresh produce division in fiscal 1984. Sales of the division have not been released in 1985. A similar facility is planned for Hillsboro, Tex.

Fresh tomatoes bearing the Pepperidge Farm and Farm Fresh labels also were marketed for the first time in 1984 in the Northeast and the Midwest.

The pet foods business unit, which markets Recipe canned dog food, Recipe Treats and Dinner Rounds, reported flat results much in line with the general state of the market in 1984. During that fiscal year, the unit showed a 4% increase in sales and a decline in operating earnings and unit volume.

Domsea Farms, Bremerton, Wash., which produces and markets fresh and frozen plate-size salmon, started shipment of fresh salmon to upscale restaurants and supermarkets in large eastern cities in fiscal 1984 when sales increased 90%. That expansion was continued into the 1985 fiscal year for the company, said to be the largest coho aquaculture company in North America.

Near the end of fiscal 1984, Campbell acquired Puerto Rico-based Casera Foods, producer of a line of beans, tomato sauce, olive oil and other canned products that compete in the growing U.S. market for Puerto Rican foods. Casera's preacquisition sales were about $50 million in 1984.

Campbell's Pepperidge Farm subsidiary, the company's second largest, reported fiscal 1985 sales of $426.4 million, down 2.1% from fiscal 1984, and operating income of $38.5 million, up 10.6%. Connecticut-based Pepperidge, which accounts for 10.7% of the company's consolidated sales, in fiscal 1984 had recorded a sales gain of less than 1% over the previous year.

In an attempt to create a secure base for future growth, two new cookie production lines at the Willard, O., plant and the construction of two cookie lines at the Downingtown, Pa., facility are in the works. Pepperidge also divested itself in 1984 of Lexington Gardens, a garden center chain, and several other small operations.

A Dijon rye bread and a new poly-bag packaging, which was developed for the rye bread line to add shelf life, were introduced in 1984 in selected regions. A line of all-butter croissants also was introduced. Pepperidge Farm also rolled out Dijon frankfurter rolls and buns in August, 1984.

A new "distinctive cracker," toasted wheat with onion, completed a national rollout and the Special Collection cookies added "milk chocolate macadamia" to the line.

Pepperidge Farm subsidiary Godiva Chocolatier introduced a line of Petite Truffles during the past year and began offering an assortment box of Grande Truffles. In addition, the New York-based company introduced Grande Truffles a la Menthe to the line. Other new products include a line of Godiva chocolate bars, featuring filled, plain and nut flavors, and Nut Delice, a chocolate bar with nuts.

Campbell's third largest division, Vlasic Foods subsidiary, maintained its position in the retail pickle category as the market leader with a 31% unit share. Sales for fiscal 1985 rose to $198.6 million, a 3.1% increase over the previous year. Operating earnings rose 10.6% to $15.7 million.

With an improved product line and packaging, Bloomfield, Mich.-based Vlasic continues to spend more than 80% of its consumer advertising dollars in the pickle category. Measured media spending for 1984 totaled $7.2 million, mostly from tv and print campaigns.

Three line extensions—Bread & Butter Chunks, Half the Salt pickles and Deli dills—contributed to Vlasic's growth. Late in fiscal 1984, Vlasic introduced new labels that use color bands and a flavor rating scale to help consumers find their favorite tastes quickly on the grocery shelf.

Mrs. Paul's Kitchens subsidiary strengthened its position as the leading marketer of frozen seafood with a 22% share of the frozen prepared seafood market. Mrs. Paul's introduced nationally in 1984 a seven-item entree line under the Light Seafood Entrees banner. Tv and print campaigns in magazines and newspapers, coupons and retail trade promotions stressed the theme, "It tastes good because it is good," for measured media spending totaling $2.2 million.

In fiscal 1985, Philadelphia, Pa.-based Mrs. Paul's sales represented more than 3% of Campbell's total business. Sales reached $138.4 million, up 9.5%. Operating earnings decreased to $14 million, down 21%.

Responding to consumer preferences for convenience seafood products, it strengthened its dominance in the frozen seafood category with Mrs. Paul's Light & Natural fillets in 1983. The improved Mrs. Paul's Crispier Crunchier fillets and sticks were major contributors to the improved sales and earnings performance.

Market testing for Light Seafood Entrees, establishing Mrs. Paul's Kitchens as a producer of upscale, convenient, nutritious, low-calorie, microwavable frozen seafood items, began in early fiscal 1985. The new product line features entrees: Fish Dijon, Fish Florentine, Scallops Mediterranean, Shrimp Oriental, Shrimp Primavera, Seafood Newburg and Fish Mornay.

In 1984, Campbell's continued its strategy to acquire businesses that either give it entries into other markets or build its product positions. In May, 1984, it acquired Mendelson-Zeller Co., a San Francisco-based international distributor of fresh produce. The acquisition enables the international divisions to offer consumers fruit and vegetables with the Campbell brand as well as the opportunity to expand produce sources. In July, 1984, Campbell also acquired D. Lazzaroni, an Italian manufacturer of cookies including the well-known Amaretti di Saronno variety and Biscuits Delacre.

Triangle Mfg. Corp., acquired in 1983, suffered an operating loss in its first full year as a Campbell business in fiscal 1984. It tripled its sales in fiscal 1985, but still reported a net loss due to marketing costs.

The Raleigh, N.C.-based manufacturer of physical fitness and sports medicine equipment diversified its distribution to include mass merchants, department stores, sporting good outlets and drugstores. Its major U.S. retail chains are Sears, Roebuck & Co., J.C. Penney Co. and Montgomery Ward & Co.

The company produces The Band wrist and ankle weights. New products include Triangle Softbells equipment products for the home, sports medicine products and home and healthcare products during the remainder of 1985.

No measured advertising was monitored for the Campbell business.

Sales	1,260	893	34.9
Operating profits	N/A	N/A	N/A
Advertising	100	80	25.0

Canon U.S.A., Lake Success, N.Y., a division of Tokyo-based Canon Inc., is the 76th largest advertiser with total estimated advertising expenditures of $100 million in 1984, up 25% from a restated $80 million in 1983.

The company, focusing on restimulating sales in the sluggish 35mm single lens reflex camera market while maintaining a leadership position in the business machines market, increased spending in all but one area of measured media.

The largest spending levels were in magazines, a 47% increase to nearly $24 million; a 26% increase in network tv to $33.2 million, and network radio, where spending increased 40% to $2.1 million. The only area where spending was reduced was in outdoor, down 12% to $360,000.

For 1984, Canon U.S.A. reported sales in North America of $1.26 billion, a 34.9% increase over 1983. Worldwide sales of $3.31 billion were up 26.3% over 1983 for the present. Earnings were $139.6 million worldwide, up 23.9% from 1983. Sales and earnings for both 1984 and 1983 fiscal years were converted from yen to dollars at the rate of Y251 = U.S. $1.

In worldwide sales, the business machines segment was up 36% to $2.11 billion, including $1.39 billion for copiers, up 23.3%. Business machines accounted for 63.8% of the company's total sales. Camera sales of $890.6 million remained flat, up 1.9%, and optical and other products rose 59.1% to $308.5 million.

To help boost stagnant sales of 35mm cameras, Canon introduced in the spring of 1984 its T70, a technologically elaborate SLR camera for advanced amateurs and beginners, and the MC, a lens shutter model designed for those looking for the ease of a "point and shoot" camera. Ads for the MC broke that June.

The T70 was kicked off at the Summer Olympics, around which Canon focused its entire 1984 multiproduct campaign. As the official camera of the 1984 Olympics, Canon reportedly purchased some 100 spots broadcast from July 27 to Aug. 13. It is estimated that the company spent nearly $20 million on the launch of the two products. Grey Advertising handles Canon's tv advertising and DYR has print.

To tout the T70, Canon signed hockey superstar Wayne Gretzky. The commercials featuring Mr. Gretzky broke on network tv in September and ran through December.

Canon views the introduction of the T70 as possibly the most significant introduction in its history. Leading National Advertisers, which monitors advertising in six media, reports Canon spent about $25.5 million in measured spending in 1984 to advertise its camera lenses and accessories.

In April, Canon introduced the VC-200 color video camera; in December the company brought out its first 8mm video system, Canovision 8.

At the 1984 Summer Olympics, Canon tested its Color Electronic Still Camera, which transmits photos recorded on miniature floppy discs via telephone lines.

Canon copier sales remained strong in 1984. For more than two years Canon has been the sole entrant in the personal copier field. While its leadership position may be firmly in place, industry talk reported in September, 1984, that Xerox Corp. was preparing to introduce its version of the personal copier. The Xerox home copier would compete directly with Canon's PC-10 and PC-20 Personal Cartridge Copying System. But Xerox subsequently dropped its plan to market a personal copier.

In the meantime, Canon can expect others to enter the market. It was reported that Mita, Sanyo, Toshiba, Ricoh and Minolta also are preparing to enter the personal copier market.

According to Dataquest, a San Jose, Cal., market researcher, the small photocopier market is expected to grow to $452 million in retail sales by 1988, up from $74 million in 1983.

Canon spent more than $26 million in copier advertising last year, reports LNA. More than 60% of that went into network tv.

Adding to its reprographic line, Canon introduced its Laser Copier 9030. The 9030 is the first digital copier capable of manipulating the original image as well as transmitting the image through wire..

In another development, Canon and Rochester, N.Y.-based Eastman Kodak announced in September a cooperative business relationship in the plain copier field. Under the agreement, Canon will supply Kodak with medium-volume copiers employing new photoconductive materials. The copiers will be sold under the Kodak name.

CBS Inc., the country's 41th largest advertiser, which has fended off a takeover attempt initiated this spring by Turner Broadcasting System chairman Ted Turner, raised its U.S. advertising expenditures 26.9% in 1984 to an estimated $179.8 million over a restated $141.7 million in 1983.

Advertising expenditures for the New York-based entertainment and communications giant were up significantly in all categories of measured media spending except network cable and outdoor.

During the year, CBS financial results were at peak levels. Earnings in 1984—led by the broadcast group, which has made CBS the prime time leader in household ratings for six consecutive seasons—reached $212.4 million, up 13.4% from 1983. Sales were $4.9 billion, up 11.8%.

CBS Television Network achieved an unprecedented coup last year in winning all four elements of the ratings competition. It finished in the prime-time ratings with a 16.9 share, compared with 16.2 for NBC and 15.4 for ABC. That translated into pretax profits in 1984 of about $310 million, making it tops in network tv.

CBS in the first half of 1985, however, lost steam on the financial side, its operating income falling to $216.3 million, down 21.5% from the corresponding period in 1984, on sales of $2.35 billion, up only 0.8%. Declines in operating income in three of its four business segments—records, publishing and "other"—could not be offset by growth in the broadcast segment.

CBS spent April to July of 1985 in an elaborate financial chess match with Mr. Turner, whose takeover offering amounted to $5.4 billion in so-called "junk bonds" and stock. In June, CBS responded with its own buyback plan, offering to pay $150—$40 in cash and $110 in debt—for each of up to 6.4 million of its shares, in an effort to stymie Mr. Turner.

The strategy foiled Mr. Turner's bid. He dropped the offer in late August and promptly struck a complex deal with Metro-Goldwyn-Mayer Film Co. in which TBS would end up with the MGM film library, film and tv-program production studio and some real estate for about $1 billion in cash.

Last year, CBS continued its strategy of diversification initiated two years ago, paying $362.5 million for the Ziff-Davis magazines and investing $57 million to become a partner in cable's SportsChannel and in Rainbow Service's two national pay cable services, American Movie Classics and Bravo.

Last May, the company agreed to pay $107.5 million to buy five radio stations from Taft Broadcasting. The stations include an am-fm combination in Tampa, Fla., two fm stations in Texas and an fm station in Washington.

In recent years, CBS has entered joint ventures—CBS/20th Century-Fox home video business, the Tri-Star movie studio, production and distribution of the compact laser disc with Sony and the Trintex videotex joint venture with International Business Machines and Sears, Roebuck & Co.—but none has shown profit yet.

The long-term strategy appears to be to involve the company in growth businesses, because CBS managers anticipate trouble down the road for CBS' main money makers. Revenues for the CBS/Record Group still have not built back from the 1980 high-water mark as the baby boomers have begun to mature past the below-24 age group where most records are bought. However, revenues and operating profits have improved each of the past two years. At the same time, cable, videocassette recorders and independent tv stations are eating away at the CBS/Broadcast Group's audience.

Analysts attribute CBS' good earnings picture in recent years largely to an exceedingly successful stable of tv shows, the phenomenal appeal in 1983 of CBS recording superstar Michael Jackson and his "Thriller" album and the cost-cutting and organizational abilities of Thomas H. Wyman, chairman-ceo.

The short-term effects of the diversification strategy were to tie up company funds in acquisitions. This, in itself, discouraged a hostile takeover by depleting corporate cash. Last spring, the company opened a $1.5 billion line of credit with a consortium led by Swiss Bank and Chemical Bank, which was viewed by some analysts as a possible source of funds for new acquisitions.

But Drexel Burnham analyst John Reidy discounts the long-term gloom for broadcasting. "Don't hold your breath waiting for broadcasting to go out of the business," Mr. Reidy says. "Yes, there are pressures on broadcast electronics, and the company is responding with rigorous cost controls. Broadcasting is still CBS' dominant business. It's not possible to diversify away from it."

The company is reported ready to divest itself of such losers as its toy company, last year's "one significant disappointment," according to Mr. Wyman. In August, 1985, CBS did sell its Dallas-Fort Worth cable system to Sammons Communications, Dallas. CBS had bought the system three years ago under a waiver from the Federal Communication Commission, which normally prohibits tv networks from owning cable systems.

CBS this September disposed of its musical instruments (Steinway pianos and Gemeinhardt flutes, among others) and in July it halted manufacturing of videodiscs, after videodisc player suppliers halted operations.

Among CBS' leading "products" drawing company advertising in 1984 was CBS Television, which drew $22.7 million, up 52.3% from the previous year, according to Leading National Advertisers, which monitors six major media. Columbia Record & Tape Club drew $24.6 million in 1984, more than doubled its $9.2 million draw in 1983. Ideal Toys got $11.2 million in measured media spending, up 56%.

Media spending rose most dramatically in magazines. The measured magazine advertising expenditure last year was $47.4 million, more than half of CBS' total measured spending in 1984. The figure represents a 54% increase in that category from 1983.

It was a good year for CBS Television Network, for the first time outperforming the competition in prime time, evening news, daytime and late night. The network hauled in 10 Emmys, four for the perennial ratings leader "The CBS Evening News With Dan Rather." One of its five owned tv stations—WBBM-TV in Chicago—placed first in its market for total audience delivery for the late local news in the Nielsen February sweeps.

Revenues in 1984 for the Broadcast Group reached $408.6 million, an increase of 14%. In the first half of the current fiscal year, the Broadcast Group sales increased only 6.5% as operating income increased 12.5%.

In 1984, CBS/Records Group—which has Cyndi Lauper, Boy George and Bruce Springsteen, as well as Michael Jackson, under contract—saw revenues increase to $1.27 billion, up 9.2% over the previous year, and operating profits improve 12.8% to $123.5 million. But the record company's failure to come up with a blockbuster album so far in 1985 has begun to affect the group. For the first half of the new year, sales for the group were down 12.5% to $574.2 million, and operating income was off 50.1% to $43.8 million.

The picture at the publishing group was pretty bleak in the first half of this year. While sales were up 18.7%, the group suffered a loss of $12.9 million compared with a loss of $5.4 million for the period in 1984. CBS cited the costs associated with its purchase of 12 Ziff-Davis magazines for the drop, primarily coming in the first quarter.

Because CBS has been involved in celebrated lawsuits—from issues of libel to takeover attempts—much of the news about CBS in the past year has come from the courts. Early this year, it beat back a lawsuit by retired Gen. William Westmoreland, who claimed that a special CBS report on the Vietnam War had libeled him. The case reportedly cost CBS $10 million in legal fees.

A few months after the Ziff-Davis purchase was concluded, CBS sued the former publisher, claiming it had overstated the earnings of the 12 consumer magazines that CBS bought. Much of the Turner imbroglio has been argued before the FCC.

CBS also is suing the conservative group, Fairness in Media, after the group and its congressional spokesman, Sen. Jesse Helms (R., N.C.), sent out a circular in January to a million conservatives, urging them to buy shares of CBS stock. CBS is maintaining in federal court that the group is guilty of Security and Exchange Act violations.

Chesebrough-Pond's, Greenwich, Conn., turned in another static year in 1984, boosting its advertising budget a mere 2.2% to an estimated $145.5 million. Among the nation's top 100 advertisers, C-P dropped to 51st from 46th in 1983.

Following the trend of the past two years, advertising and promotion amounted to nearly 8% of sales, which in 1984 rose 10.2% to $1.86 billion. But earnings fell to $119.5 million, down 6.5% from the previous year.

First-quarter results for 1985 show the company is still in a holding pattern. Although sales hit $515.9 million, up 22.5% from the previous year's quarter, and net income reached $18.9 million, up 1.4%, the results included those of Stauffer Chemical Co., acquired in March. Without Stauffer, first-quarter sales increased 4.5% to $440 million and net income dropped 9.5% to $16.8 million.

In an effort to streamline its operations, in June, 1985, C-P agreed to sell its Health-tex division to a management group in a leveraged buyout headed by Robert A. Breakstone, a group vp and former president-general manager of the children's apparel line. Terms of the buyout were not disclosed.

Health-tex division sales of $335.3 million were up 11.6%, but operating income fell, down 10.7% to $34.4 million, proving how the company's slow reaction to changes in fashion and novelty-items hurt earnings. The divestiture relieves the company of a strongly cyclical business.

Sound Waves, Health-tex's upscale line of children's sportswear, was introduced in 1984 with an initial measured ad budget of $119,700, according to Leading National Advertisers. The

Our Gang sportswear took a tremendous jump in the ad budget, up 140% to $372,200, primarily in spot tv and newspaper supplements. The Our Girl apparel line was dropped.

Health-tex acquired Imperial Reading Corp. in June, 1984, for $4.9 million, an acquisition that includes Brittania brand children's apparel.

Bass shoe division was C-P's sales growth leader, chalking up $172.1 million in sales in 1984, up 20% from 1983. The strong sales, however, came in the face of an operating loss of $1.26 million, an 80.7% drop from 1983. Strong retail operations from the Shoe Box chain, acquired in 1983, and sales of men's styles, especially the black penny loafer made popular by singer Michael Jackson, attributed to the division's sales success. But efforts to lower operating costs and become more competitive by closing two U.S. plants and shifting much of its manufacturing overseas contributed to the substantial fall in profits.

Bass spent $1.5 million in advertising, up 2% from 1983 levels, according to Leading National Advertisers, with heavy spending in magazines.

Also scoring well in sales for C-P in 1984 was the Prince Matchabelli division, aided by the introduction of major new fragrance lines and a fancy new nail color innovation. Sales were up 9.7%, to $139.7 million in 1984, marking a second year of sales growth for the division.

The debut of the Aziza Polishing Pen in December, 1984, was likely the company's most revolutionary product introduction of the year. The quick-drying nail color, applied with a fiber-tipped applicator, is the first in the industry.

The Polishing Pen received about $2.8 million in network tv and national print advertising for its introduction. C-P expects the product to garner an 8% market share in its first three months, an impressive goal in its $216 million category in the retail business, according to T.H. Augenbraun, vp-marketing, cosmetics. Revlon is the present market leader with 21% share in drugstore sales. L'Oreal is second with 15% share followed by Noxell's Cover Girl with 13% share.

Several new fragrances were introduced in the $2.5 billion fragrance industry, despite the relatively flat year industrywide. Verve body scenting mist, for the whole body, was introduced in the spring of 1985. Verve is sold in stores' fragrance departments, rather than in the deodorant sections. William Esty Co. handles the print and tv campaign, themed "Play play play. Verve."

Beret also was introduced last year with an ad budget of $2.74 million, nearly 75% in network tv and the remainder in magazines. This fall, Musk for Him will be introduced with ad assignment going to William Esty Co.

Prince Matchabelli also organized a new fragrance branch called Parfums International to handle costlier fragrances such as Decadence, to be introduced in fall, 1985. Parfums International will fold a mail-order program into its ad plan, following the lead of Giorgio, the high-end fragrance sales leader of the decade. Advertising duties were assigned to Kobs & Brady in August, 1985.

Cachet was updated in 1984 with new pink cartons and backed by a $2.4 million campaign. Ad theme is "Make a fantasy real today." Cachet Noir, two years after introduction, saw its budget fall 78% to $662,500 in 1984.

Prince Matchabelli plans to introduce a skincare line in 1986 and has sought actress Barbara Eden to endorse the product. No agreements have been reached at this writing.

In the packaged foods division, C-P racked up sales of $347.5 million for the year, a 3.9% increase from the previous year, yet another falloff in earnings, down nearly 4%, to $59.2 million.

Ragu spaghetti sauces, still No. 1 in its category, lost market share as it fell from 66% to 50% in 1984 in the $760 million-a-year sauce market. Market share for its nearest competitor, Campbell's Prego, has grown from 5% to 26% in 1984 in its four years on the market. Measured spending for Prego in 1984 was $12.1 million. Ragu spaghetti sauce took the largest share of C-P's measured advertising budget in 1984, with $19.3 million, a 129% increase, that helped introduce two new flavors of chunky garden style spaghetti sauce.

C-P reports Ragu Pasta Meals, a combination of pasta and sauce in a jar, received good response in initial testing.

The packaged foods division turned to radio for the first time in several years to advertise Ragu Homestyle sauce, and also turned to the medium for its Pizza Quik brands. C-P dropped measured advertising for Adolph's instant meat tenderizer, a line that spent $378,100 in 1983.

The health & beauty products division scored a rather flat sales year, with $304.3 million, inching up 2% over the previous year. Operating income, however, grew 11%, to $59.2 million in 1984.

In September, several extensions of established lines were introduced, including Cutex lipsticks, Vaseline Lip Therapy petroleum jelly and Q-tips cosmetic applicators. Cutex lipsticks received $2.36 million for its introduction, in magazine, spot tv and network tv. Q-tips applicators got an ad budget of $593.700 for 1984. Rave Hair Masque conditioner was introduced in December, 1984.

One product without significant competition, Vaseline petroleum jelly, received new advertising, predominantly in print. Vaseline has 78% of the petroleum-jelly market, primarily competing against generic brands.

Q-tip cotton swabs received new ad support, spending $6.22 million in measured media, down 35% from 1983 levels.

Vaseline Intensive Care took the second largest share of the C-P's measured advertising budget in 1984, up 34% from 1983, to $12.1 million. In 1984, Vaseline Intensive Care led the $500 million hand-and-body moisturizer category with a 19% share in dollars, according to industry analysts, who peg as the No. 2 market brand, American Brands' Jergens, with 11% share, followed by Westwood Pharmaceutical's Keri lotion at 8.4%; Lubriderm from Warner-Lambert at 5%-plus; Beiersdorf's Curel and Nivea at 4.8%, and Soft Sense by S.C. Johnson & Son at 4.7%.

The two-year ad-claims dispute between C-P's Vaseline Intensive Care and Procter & Gamble's Wondra lotion was settled this year. The Council of Better Business Bureau's National Advertising Division said in June, 1985, that both companies agreed to modify or discontinue ads for their hand lotions. Both stood by their claims, but agreed to modify the claims to end the controversy.

Wondra's advertising, by Benton & Bowles, claimed it has the "most moisturizing glycerin of all leading lotions and . . . is best at turning rough, dry hands soft and smooth." Vaseline Intensive Care ads, by William Esty Co., claimed, "When it comes to relieving dry skin, no leading lotion beats Vaseline Intensive Care."

In its second year, Rave Soft Perm home permanent's ad budget fell 55%, to $3.07 million. Rave Spot Perm home permanent was introduced in 1984 with a $2.35 million ad budget, all in magazines.

The Prince division, marketer of tennis equipment and apparel, was active in new product introductions, including two new sizes of rackets introduced in September, 1984: The midsize Series 90 and a supersize Series 125 for doubles players. Two new advanced additions to the original Prince Series 110 line, the Prince Precision Graphite racket and Prince Magnesium Pro, also made the scene in 1984.

Prince introduced a men's tennis apparel line and warmup gear in January and plans to follow through with a line of women's apparel and an athletic footwear line by the end of this year.

Prince's market share increased, despite the reduction in number of tennis rackets sold in the U.S. Prince held No. 1 with a 30% share of the $250 million quality-tennis racket market in 1984. Head and Wilson, No. 2 and No. 3, respectively, also faced heavy competition in the midsize racket category.

Over-all, Prince tennis rackets combined to spend $2.24 million in measured media, falling 35% from year-earlier levels.

Elsewhere in the company, the hospital products division expanded its Kangaroo line of internal feeding systems and introduced a Respiradyne pulmonary function tester in 1984. The polymer division recorded the company's fastest growing product line with its coating powders. In the international division, an increase in markets brought strong sales for Pond's creams and Vaseline Intensive Care lotions.

C-P was busy in acquisition activity throughout the past year, expanding into new areas and extending its established lines of business. The Polymer Corp., a worldwide manufacturer of engineered plastics, was acquired for $95.6 million in 1984 and became its own operating division.

In March, 1985, the company acquired Stauffer Chemical Co., Westport, Conn., for nearly $1.25 billion. Stauffer, with combined annual sales of more than $3 billion, manufactures and sells chemicals and chemical-related products and services. C-P believes that the acquisition provides needed research and development sources for new consumer products and chemicals.

C-P borrowed most of the purchase price to acquire Stauffer and is expected to reduce the debt by selling Stauffer assets and holding down costs, a measure including a staff reduction. The divestiture of the Health-tex line should help raise cash to reduce the debt incurred in the Stauffer acquisition.

H. Barclay Morley, chairman-ceo at Stauffer since 1974, announced his retirement effective Oct. 1, and Stauffer's executive vice president Roy Sambrook was named president-chief operating officer of Stauffer in June, 1985, elected to the Chesebrough board and given the new title of vice-chairman. He has been running Stauffer since the purchase. Mr. Morley's position will not be filled.

C-P held out the year with its agency affiliations intact. Klemtner Advertising, New York, was added to its roster for professional advertising for Vaseline Petroleum Jelly line, the first agency on record for professional advertising of that brand.

Chrysler Corp.

Highland Park, Mich.

($ figures = 000,000)

Worldwide	1984	1983	% chg
Sales	19,573	13,264	47.6
Net income	2,380	701	239.6
U.S.			
Sales	17,240	11,666	47.8
Operating profits	2,187	642	240.4
Advertising	317	231	37.2

Chrysler Corp., Highland Park, Mich., the 23rd largest national advertiser, increased advertising spending 37.2% to an estimated $317.4 million in 1984.

Chrysler reported 1984 worldwide sales of $19.57 billion, up 47.6% from 1983. Earnings rose to a record $2.4 billion in 1984, a nearly 240% increase from $700.9 million in 1983.

The company's financial position continued to improve during 1984. At yearend, its debt was 19.7% of the total debt plus equity—down from 52.7% in 1983. Chrysler also paid dividends on common stock for the first time since 1979.

Tax-loss carry-forwards were prominent in the company's financial success in 1984. Their exhaustion in 1985 was reflected in returns for the second quarter in which earnings dropped 25.7% to $596.4 million compared with the similar period a year earlier. On a pretax basis, earnings showed a gain of 6% to $852 million.

Sales for the quarter, however, rose 13.9% to $5.98 billion as Chrysler improved its market share dramatically to 14% for the first seven months of 1985, according to analysts. They note the increase basically has been at the expense of General Motors.

Chrysler's share of the U.S. car market rose to 10.4% in 1984, up slightly from 10.3% in 1983. The company's share of the combined U.S. car and truck market rose to 11.1% compared with 9.9% for 1983.

Companywide, Chrysler sold 986,998 cars in the U.S. last year, up 17.3% from 1983. Dodge car sales were up 17.6% from 1983, with unit sales of 369,255 units. Chrysler division sold 328,499 units, up 25.9%, and Plymouth sold 289,244 units, up 8.9%.

The company's biggest sales gains came from the new-for-1984 Dodge Caravan and Plymouth Voyager minivans, and the Chrysler Laser and Dodge Daytona sport coupes. The minivans were so successful that Chrysler sold out the vehicles by spring and was unable to fill a number of orders because it could not make the vehicles quickly enough.

Dodge sold 44,717 Daytonas and Chrysler sold 53,131 Lasers in 1984, the first full year of availability. But Chrysler's K-cars—the Plymouth Reliant and Dodge Aries—continued to be the company's top sellers with unit sales of 138,154 and 111,984, respectively. Truck unit sales were led by pickups, with sales of 134,264.

Chrysler's measured ad spending rose 21.5% to $245 million, paced by a 37% gain for magazines. Network tv remained the big ad line item at $93.6 million, up 11.2%. Some of the major ad spenders in the Chrysler lineup, according to the six media monitored by Leading National Advertisers, included the Dodge Aries K at $12.1 million, up from $3.1 million in 1983; Dodge Caravan, $11.5 million, up from $1.3 million; Dodge Daytona, $15.1 million, up from $6.8 million; Dodge Omni, $7.6 million, up from $3.7 million; Dodge Ramcharger compact trucks, $6.7 million, up from $173,000, and Plymouth Reliant K, $14.6 million, up from $10.8 million.

Declines in spending were recorded for Chrysler New Yorker, down 41.9%, to $7.4 million; Dodge Ram compact trucks, off 23%, to $4.9 million; Plymouth Horizon, off 8.8%, to $6.2 million, and Chrysler passenger cars (unspecified brand), off 37%, to $11.6 million.

Factory contributions to dealer advertising associations increased by more than 46%, from an estimated $28 million in 1983 to $41 million in 1984 as Chrysler followed the industry into much closer cooperation with dealer ad groups, which are collections of dealers in individual markets that pool funds on a per-car basis.

As Chrysler moves toward greater regionalization of national image advertising, it supplements that by putting up matching funds for specific projects with dealer ad groups.

While publicly continuing to battle the GM-Toyota joint venture, in 1985 Chrysler started the wheels turning on a number of moves it had been preparing throughout 1984. Many hinged on the virtual lifting (quotas went up 24%) of Japanese car import restrictions April 1, 1985.

In the spring of 1985, Chrysler announced plans to: Form a joint venture with Japan's Mitsubishi Motors to build 180,000 subcompacts a year in a midwestern state beginning in 1988; increase Chrysler's holdings in Mitsubishi Motors to 24% from 15%; purchase parts from Korea's Samsung Industries, bring an Italian-built, two-seat, front-wheel-drive, $25,000 to $30,000 Maserati luxury sports car to the U.S. for the 1987 model year.

The Maserati will come in hardtop and convertible models based on Chrysler platforms and powertrains, will be limited to 5,000 to 6,000 units annually and will be aimed directly at the 1987 Cadillac Allante and Mercedes 380SL. Chrysler had purchased 5% of Maserati in July, 1984.

The company also signed U.K. auto maker Lotus Cars to develop a performance-oriented cylinder head for Chrysler four-cylinder engines and started studying a joint venture to let the Chinese government build Chrysler's 2.2-liter engine there for Chinese domestic use.

In August, 1985, the company raised capital spending by $1 billion to $11.5 billion over the next five years, much of that going into efforts to improve manufacturing systems and to back Chrysler's Liberty project—the development of a small car competitive with Japanese models.

In 1985, Chrysler announced a long-term goal of diversifying into other high-tech areas of business. In the spring, it bought 20% of Gulfstream Aerospace, Savannah, Ga., for $127 million. The merger will give Chrysler advanced technology in aerodynamics and instrumentation.

Chrysler's Financial Corp. and General Electric Credit Corp., Stamford, Conn., formed CGE Associates as a joint-venture commercial lender, and Chrysler agreed to buy E.F. Hutton Credit Corp., New York, for $125 million and merge it with Chrysler's own financial arm.

In 1984, Chrysler decided to import about 3,000 compact K-cars from its Mexican plant for sale in the Southwest and to move production of some limited-volume vehicles—those with 25,000 to 50,000 in sales—to Mexico.

This was followed by efforts to beef up image and corporate presence in the South and Southwest, traditionally weaker territory than the industrial northeast. Chrysler created more dealers, opened zone offices in New Orleans, Houston and Phoenix and increased dealer participation in regional ad groups from 5% to 97%. Vehicle penetration rose 1.4 points by mid-June to 10% in the region.

Chrysler chairman Lee Iacocca starred in two corporate tv commericals and a four-page color gatefold in newsweeklies. "I have one and only one ambition for Chrysler. To be the best. What else is there?" Mr. Iacocca said. Another ad had him in a factory that produces K-cars, saying, "If it weren't for the great success story of the '80s, I wouldn't be here today."

In September, Chrysler joined Chevrolet in shunning high-cost tv advertising by cutting network spending 8% for the 1985 model year, paring tv's share of the Chrysler ad dollar by 2% or 3%. The company diverted $7 million to $10 million from tv. Chrysler-Plymouth shifted ad dollars to print, radio and cable tv, and Dodge moved toward cable and magazines.

In October, Chrysler "swore off" ambitions of overtaking Ford Motor Co. in sales, deciding to aim at being a profitable No. 3 rather than a struggling No. 2. The philosophy took public form in a 1985 corporate ad theme line, "We want to be the best, not the biggest." The company's two-step strategic plan called for concentrating on high-volume cars in the largest and enduring segments and on beating GM and Ford to market in emerging segments and specialty niches. Holes in product lineup were expected to be filled on the low side by Japanese or Korean-made vehicles and on the luxury side by the joint venture with Maserati.

In late October, Chrysler embarked on a network tv ad strategy that included participation as a multi-million-dollar investor in the production of made-for-tv movies. The five-year plan included co-production ventures for at least two movies per season, beginning in 1986. The scheduling of movies will be pinned to launches of new Chrysler cars, with Chrysler as the exclusive automotive sponsor.

Source: Broadcast Advertisers Reports as supplied to Leading National Advertisers Inc.

Chrysler began preparing for life after Mr. Iacocca, who will likely retire in three to five years. The charismatic leader "is the persona of the corporation," said James Tolley, vp-public affairs. "He is seen by millions as Chrysler itself." The company started plans to convert the virtues of Mr. Iacocca's image to that of Chrysler, with a "be the best" corporate image-building effort.

Chrysler introduced its H-body sport sedans, the Chrysler LeBaron GTS and Dodge Lancer, in January, 1985.

In February, Chrysler began a "rebate rerun," packaging incentives into a "Thank you, America" campaign. C-P concentrated on tv and radio, and Dodge on magazines, radio, newspapers and tv. A corporate print ad ran in national newspapers and newsweeklies.

In March, Chrysler launched a corporate image campaign in California, spoofing Chrysler's stodgy image. A tv spot presents quick cuts of cars and California life-style scenes set to hard-rock music. It ends with cars shooting past three men sitting in front of a ramshackle building. One puts down a newspaper and is revealed to be Mr. Iacocca. A wry voiceover says, "This message brought to you by those dull but dependable builders of predictability, Chrysler Corp."

In July, 1985, Chrysler set up a performance-oriented unit to develop high-performance and luxury-image cars. The Special Vehicle Management department, under general manager Donald P. Morrissey, will combine the development of low-volume image-makers at each end of Chrysler's price ladder into a single group.

Meanwhile, Dodge continued to use "new wave" tv spots and the "American Revolution" theme for 1985 model vehicles.

Arthur Kasteloot was named Dodge national ad manager in early 1985, from the same position at C-P, succeeding Joseph Cronin, who went to an ad agency. Michael Howe, former ad director at Volkswagen of America, succeeded Mr. Kasteloot as national ad manager at C-P.

In September, 1984, Chrysler began reestablishing Plymouth as a real competitor through higher quality products. The new Caravelle, a fancy K-car, six-passenger sedan, was presented as a move-up car for Reliant buyers. Ads dared competitors to "Match it! (if you can)" and challenged Buick Century and Olds Ciera.

Chrysler Laser again took on the Camaro Z28, Mustang SVO and Nissan 300ZX with, "We never forget the competition is always on our tail. We intend to keep them there."

C-P introduced the 1985 Chrysler XT, a sportier version of Laser, with a multimedia campaign. A cable and tv ad played on the full-line ad theme, "Because the competition is hot, we had to be hotter."

In May, 1985, two ad managers were named for C-P. George Hunt took the new post of Chrysler ad manager, from forward planning manager. James Jandesek was named to the new post of Plymouth ad manager, from truck ad manager for Dodge marketing.

Plymouth dropped magician Doug Henning as ad pitchman for Voyager minivan after 18 months, as part of a brand repositioning. It also replaced "Match it!" with a transitional "We're doing it right" on a testimonial series of tv commercials for Voyager, preparing for a new theme for 1986.

Plymouth brand image is moving toward a younger, better-educated, family-oriented target. Chrysler brand will stay with luxury, Dodge will keep performance and Plymouth will become functional convenience.

The next vehicle featured in Plymouth advertising as an "image car" will be the 1987 Plymouth Sundance, Chrysler's P-car. Its twin will be the Dodge Shadow.

Clorox Co.

Oakland, Cal.

($ figures = 000,000)

Worldwide	1984	1983	% chg
Sales	1,050	975	7.7
Net income	86	80	7.5
Advertising	110	91	19.6

Clorox Co., whose product of the same name is becoming less and less dominant in the company as its Lucite paints, Hidden Valley Ranch salad dressings, Liquid-plumr and various charcoal products continue to grow, was the 73rd largest national advertiser with an estimated spending of $109.6 million in 1984.

Total advertising, representing an increase of 19.9% in the fiscal year ended June 30, 1985 over a restated $91.4 million for fiscal 1984, outpaced earnings, which rose 8% to $86.1 million over the previous year as sales rose 8.2% to $1.05 billion.

During 1984, Clorox expanded its ad budget primarily to boost new products or line extensions—an activity also reflected in the $25 million spent on research and development, up 30% from fiscal 1984. Of the total outlay for advertising, Clorox spent $81.7 million in the nine measured media tracked in this issue, up 31.8% from the previous year.

New products at Clorox included line expansion of the newly gained Lucite paints; national rollout of Fresh Step cat litter; flavor, liquid and reduced calorie additions to the Hidden Valley Ranch salad dressing line; a microwave browning agent under the Kitchen Bouquet brand, and continued testing of Fresh Scent, a scented version of Clorox bleach.

Clorox brand line, pacesetter in the company's core household products business which accounted for 70% of total sales in 1984, covers Clorox 2 bleach, regular liquid bleach, pre-wash spray and Tilex tile cleaner. The brand continued to win the largest ad expenditures among company products with $25.2 million in measured spending in the six media monitored by Leading National Advertisers. That was an 8.2% increase over 1983 media expenditures for the brand.

Clorox is market leader in the $500 million-plus retail bleach business with a 49.9% share in dollars. Individually, its liquid bleach has a 50% dollar share of the liquid bleach market, and Clorox 2 dry bleach holds a 42.6% dollar share of all fabric bleaches.

Clorox continues to test Fresh Scent, a sweeter smelling version of its well-known Clorox liquid bleach. Test cities are Dallas, Memphis, Wichita, Kansas City and Oklahoma City.

Tilex mildew stain remover, introduced in 1981, remains the leader in its category.

Media spending for Tilex dropped 8% to $2.3 million in 1984.

After testing two different versions of Clorox 2 dry bleach, the company introduced Clorox 2 containing an "advanced whitening formula" in 1984. Ads supporting the launch claim it "whitens like a liquid bleach, but is safe on all colors."

Following two efforts at market testing, Clorox withdrew Wave, a heavy duty dry bleach, from test after it failed to perform adequately. Wave competed against Vibrant, a Procter & Gamble brand that has been in test since 1981.

Other household products receiving sizable media backing were Liquid-plumr, a liquid drain cleanser, with $4.8 million in media spending in 1984, up 4.3% from the previous year, and Soft Scrub cleanser, $5.9 million in 1984, the same as in 1983.

Capitalizing on the success of its Hidden Valley Ranch salad dressing mixes, Clorox introduced a bottled version of its product nationally in the spring of 1984. The product first appeared in June, 1983, in three test markets. Already dominant in the dry mix salad dressing market, Clorox hopes its Hidden Valley name will translate to the rapidly growing pourable salad dressing category.

In 1985, the company introduced a Thousand Island flavor to its Original, Country Recipe and Garden Herb bottled varieties.

In March, 1985, Clorox expanded the Hidden Valley Ranch line further. The company introduced a reduced-calorie salad dressing mix.

Clorox spent $13.3 million on Hidden Valley Ranch dips, dressing mixes, salad dressing and sauce mixes in 1984, according to six-media figures provided by LNA. The company spent $5.6 million on the line in 1983 when sauce mixes and dips were not included in the line.

The company expanded further into the food products area in late 1984. Buoyed by increasing microwave usage (microwaves are expected to be in more than 50% of U.S. households by the end of 1985), Clorox became the first major company to market a microwave browning agent nationally. The company introduced Kitchen Bouquet microwave browning spray in December, 1984, backed by magazine, newspaper and tv advertising. The spray is a line extension of its Kitchen Bouquet browning seasoning sauce and gravy aid.

In fiscal 1985, the architectural coatings business (paint and stains) contributed 12% of total sales. The division at Clorox is basically three years in the making, beginning with Clorox's purchase in 1981 of Olympic and Carver Tripp paints and stains from Comerco Inc. and followed by the acquisition in 1983 of marketing rights to Lucite from Du Pont, the latter of which brought Clorox into the interior paint market. Measured advertising for a full year of promoting Lucite was $4.4 million in 1984, up from $324,200 for partial-year 1983. The Olympia brand drew $4.8 million in measured media in 1984, off 29.4% from the previous year.

While the paint and stain lines continue to be profitable, earnings for the division fell because of higher costs associated with new distribution and marketing programs. Combined shipments of the Olympic and Lucite brands of stains and paints were up modestly for the year and were improving at yearend. National market for architectural coatings is $4 billion (retail).

In a consolidation move in 1985, Clorox shifted its Lucite paint account from N W Ayer, New York, to Needham Harper Worldwide, Chicago, which also handles several other Clorox brands.

Clorox also made a major push into the $260 million cat box filler market, introducing nationally in 1984, Fresh Step, an odor-controlling cat litter. The clay-based product, which features a microencapsulated fragrance released whenever a cat steps on or scratches the litter, had been in various test markets since the fall of 1981.

Fresh Step is Clorox's second entry in the category, one of the fastest growing among pet products. Its first, Litter Green, an alfalfa-based cat litter introduced in 1971, has lost share. Clorox denies speculation it may dump the brand. Fresh Step drew $6.6 million in 1984 in measured spending against only $363,900 during tests in 1983. Litter Green spending was far off the new product's mark, with $299,300 in 1984, up 50%.

The company continues to update existing products to keep abreast of changing consumer preferences. In April, 1985, it came out with Kingsford with mesquite, and Clorox is expanding into new household product categories.

In August, 1985, it began testing Act, a heavy-duty laundry detergent combining the active ingredients of both powder and liquids, in a sealed plastic pack, dissolvable form, in Bakersfield, Cal.

During the year, group vp John W. Collins was appointed to the new position of exec vp-operations and Sheldon N. Lewis, group vp, to the new post of exec vp-technology. The company sold in March, 1985, its 75% interest in Sunpole-Clorox Co. Ltd. of Japan to its original Japanese owners. Clorox, in much of its overseas activity, particularly in the developing world, concentrates on building its bleach business. The sales of the Japanese company, a household products operation, is in keeping with that corporate strategy.

In July, 1985, the company signed agreements to build bleach plants in Turkey and Colombia. The company currently is building plants in North Yemen and Egypt.

Coca-Cola Co. showed its aggressiveness in 1984 and so far in 1985 that marks the style of Roberto C. Goizueta, who took over as ceo four years ago: It has bought two major tv production companies, turned around its Columbia Pictures with movie winners such as "Ghostbusters," begun licensing the Coca-Cola name on more than a dozen products, including a Murjani International line of casual clothes, and unveiled two major new soft drinks.

The Atlanta-based company, the nation's 20th largest advertiser, increased its U.S. advertising spending 20.6% in 1983, to an estimated $343.3 million in 1984. The company spent $535.8 million worldwide on media advertising, up 15.6% from the previous year.

U.S. sales in 1984 increased 12.2%, to $4.57 billion, 62% of worldwide sales of $7.36 billion. Worldwide earnings of $629 million represented a boost of 12.5% over 1983. That pace continued into the current year. In the second quarter, earnings of $196.1 million increased 6% over the corresponding year-earlier period, and sales were $2.04 billion, up 5.7% from the previous year. Revenue growth overseas was at a rate of 11%.

The once-staid company also tinkered with the 99-year-old Coca-Cola formula, replacing it with a sweeter New Coke in late April this year, before electing in mid-July to reintroduce the old formula as Coca-Cola classic. Introduction of the reformulated flagship brand, created to meet the "Pepsi challenge," has been the marketing story of the year so far in 1985.

But by the end of the third quarter, the increased marketing expenses related to the New Coke and then the reintroduction of the old formula led Coca-Cola to project operating income for 1985 would be "up slightly or flat for the year." Sales of Coke's three sugar-sweetened colas increased by more than 10% during July and August, 1985. However, international sales were being affected by unrest in South Africa and Nigeria, two key African markets. Competition in the domestic citrus beverage market also was affecting earnings.

Coca-Cola apparently came out of its odd marketing maneuvers unscathed, with neither Coke nor its major competitor, Pepsi, shifting market shares significantly, according to industry analysts. "I expect them each to end up in about the same place," Prudential-Bache analyst George Thompson says. "If anything, Coke may have a marginal advantage because it has a stronger diet drink."

According to *Beverage Industry* magazine, Coke commanded 21.8% of the domestic soft-drink market in 1984, down from 22.5% in 1983. Pepsi had a 17% share in 1984, up from 16.9% in 1983. Diet Coke, just 2 years old, was in third place by the end of 1984, with 5.1%, edging past 7UP, also with 5.1%. Sprite had a share of 3.3%, compared with 2.8% in 1983; Diet Coke Caffeine Free 0.9% vs. 0.5% in 1983, and Caffeine Free Coke, 0.6% vs. 0.5% in 1983.

All Coca-Cola soft drinks contributed to a market share of 36.4% in 1984, up from 35.3% in 1983 based on a case sale increase of 9.3%.

Last year was a respectable one for Coca-Cola, with all of its business sectors—soft drinks, food and entertainment—showing sales increases. The soft drink sector, with $5.02 billion worldwide sales, up 6.9% from 1983, represented 68% of total sales at Coca-Cola. The segment's operating income of $879.6 million in 1984 was up 2.4% from the prior year and represented 83.2% of total company operating income.

Aggressiveness was the theme in Coca-Cola's soft drink advertising. Among the 1984 advertising highlights were a $20 million Olympics budget for Coca-Cola soft drinks and a five-week tv blitz last November and December, during which ads for Coca-Cola drinks were aired an average of once every three hours.

Responding to Pepsi-Cola's appeal to youth through the signing of rock superstars Michael Jackson and Lionel Ritchie for multi-million-dollar endorsement contracts, Coca-Cola aired its own youth-oriented tv spots. The company put $48.3 million of measured advertising into the old standby, Coke, in 1984, more than $45.4 million of it going to network and spot tv. This compares with $36.6 million for the brand in 1983, some $34.4 million divided between network and spot tv.

A measure of the rivalry between the two titans of soft drinks—Coca-Cola and Pepsi-Cola—has been the testiness of the two companies toward each other's commercials. Last December, Pepsi-Cola accused Coca-Cola of misrepresenting a claim in commercials that its 100% NutraSweet Diet Coke was available in all markets. Coca-Cola took aim at Pepsi-Cola commercials for claiming all Diet Coke contained saccharin.

The fireworks continued this year after Coca-Cola introduced the reformulated Coke in April. Coca-Cola dropped out of tv sponsorship for the July Live Aid concert when it became apparent that other soft drink companies, including Pepsi-Cola, also would sponsor.

Among the Coke spots, handled by McCann-Erickson, were variations of the "Coke is it" theme, with a new subtheme, "The one you grew up with," featuring youth-oriented vignettes, such as a teen ager getting his first driver's license and a boy learning baseball skills. There were also special-market commercials, including one featuring singer Julio Iglesias.

The same agency also handled the New Coke campaign this year, with commercials such as the one featuring comedian Bill Cosby saying Coke tastes better than ever.

The company continued its Diet Coke spots, using the theme "It's One of a Kind," handled by SSC&B. Coca-Cola doled out $42.2 million in measured advertising for Diet Coke last year, again the bulk of it for tv. That was up from $21 million in 1983, the product's debut year.

The Tab account moved to SSC&B as well, after McCann's "Let's Taste New Tab" campaign was widely misinterpreted as sounding like, "Less taste, new Tab."

Tab line's 1984 ad spending was $28.4 million, up 15% over the previous year.

The company began a national rollout of new Cherry Coke in mid-July, 1985. The national introduction took place several months ahead of schedule after successful testing in four geographically dispersed markets with $15 million in support spending. In test market are a reformulated Fresca, a repackaged Mello Yello and a Minute Maid orange soda with 10% real orange juice.

Coca-Cola's foods sector, based in Houston, had another profitable year, with sales up 14% to $1.46 billion, or 19.8% of total company sales. The food sector performed better on the income side than the soft drinks segment, increasing operating income 13% to $137.7 million in 1984, which is 13% of total company operating income of $1.06 billion.

Minute Maid maintained its lead position in the orange juice market, with a 24% share. Actor Richard Thomas, his wife, their 8-year-old son and 3-year-old identical triplets were introduced last December as the new Minute Maid family.

Measured ad spending for the 14 Minute Maid products was up in 1984 about $1 million, to $14.6 million.

Coca-Cola expanded several product lines last year in its food sector, including the introduction of Five Alive citrus beverages in aseptic packages and the national expansion of Bright & Early breakfast beverage in 64-oz. cartons.

The Columbia Pictures subsidiary—Coca-Cola's entertainment segment—was a disappointment in 1983, but it made significant strides in 1984, with operating earnings of $121 million, a 34% increase, and sales of $884.7 million, up 4.2%.

Much of the credit goes to several hit movies. "Ghostbusters," the No. 1 comedy movie ever, grossed more than $220 million. Another major release was "Karate Kid," which grossed more than $90 million.

Columbia's measured ad spending dropped to $33.4 million from $40.6 million in 1983. Some $30 million of that was spent on network tv, with the remainder going to spot tv, outdoor and magazines. "Ghostbusters" and "Karate Kid" each received about $4.5 million in measured media to lead the promotion spending. "Starman" received $3.7 million; "The Razor's Edge," "Sheena," "Moscow on the Hudson," "Micki & Maude," "Body Double," "Against All Odds" and "A Soldier's Story" each received spending in the $2 million range.

In June, 1985, Coca-Cola bought the tv production company, Embassy Communications and its affiliate Tandem Productions, for $485 million. Both were controlled by Norman Lear, with Embassy being the tv production operation and Tandem primarily a holding company for Mr. Lear's tv series library. Frank Biondi, exec vp of the entertainment sector, says the company is looking to expand in various areas, including film, tv and production, music production, publishing and tv stations. The company sold its pasta company, Ronco Enterprises Memphis, to Borden Inc. in October.

Colgate-Palmolive Co., New York, which is selling its food, athletic equipment and textile business to contentrate on its household and personal care product strengths, pared U.S. advertising in 1984 to an estimated $258.7 million, down 4.1%.

The major decline at Colgate, the nation's 30th largest advertiser, was in what it does best, the dentifrice market—Ultra Brite, Dentagard and Colgate toothpastes. Measured spending dropped 22.5% to $27 million. Most of the spending was for the Colgate brand which came close to unseating Procter & Gamble's flagship Crest brand as No. 1 in the U.S. market.

Worldwide sales in 1984 rose a scant 0.9% to $4.9 billion. Net income fell sharply to $72.0 million, down 63.8% from 1983. The decline in earnings reflected heavy marketing spending, the relatively high value of the U.S. dollar, intense price competition and a restructuring program aimed at improving productivity and reducing manufacturing costs worldwide. Earnings also were hit by an after-tax charge of $114 million that accounted for the costs of the restructuring program.

U.S. sales in 1984 rose to $2.34 billion, up 6.1% from 1983, but U.S. operating profit declined 8.9% to $181.1 million. In Europe, sales of $1.1 billion, dropped 6%, and operating profit declined 44.6% to $25.7 million. In the rest of the world, Colgate-Palmolive saw sales slip 1.2%, but it increased its operating profit by 4.6%.

The pattern continued into the current fiscal year. In the first half of 1985, worldwide sales fell 1.3% to $2.49 billion. Income from continuing operations fell 5.8% to $97 million.

In July, Colgate-Palmolive, long rumored on Wall Street to be a takeover target, announced plans to divest businesses outside of its core household-products categories. These include Bike Athletic Co. and Etonic units, which make athletic equipment, and Riviana Foods, the world leader in packaged rice. The company plans to keep its Hill's Pet Products business, however. The company also will sell the medical-electronics and textile operations of its Kendall unit.

The operations to be sold accounted for about 15% of 1984 sales and 22% of 1984 operating profit. Eric J. Larson, investment analyst at Paine Webber, New York, says the divestiture is a "long-range plus" for the company because Colgate is "getting rid of lower gross-margin business that takes a lot of time.

Now they can become a more focused management team and concentrate on household products."

Mr. Larson says he expects advertising as a percent of sales to rise dramatically because Colgate had not been spending nearly as heavily on the lines to be divested as on its household-products items.

On Aug. 1, 1985, Colgate-Palmolive launched an effort to buy back up to 15 million of its shares (18% of outstanding shares) at $29.50 a share, a slight premium over the market price. The buyback could cost $442.5 million.

Reuben Mark, who became ceo in mid-1984, denies takeover speculation and pushed the company into the divestiture. Sir James Goldsmith, the British investor, was known to be one of the suitors in recent months.

The company's strategy is to concentrate on lines "we know best and in which our market position, expertise and technology create the best opportunity," he says. As for the common stock buyback, he says the company believes its shares were undervalued.

Mr. Larson says Colgate-Palmolive under Mr. Mark's leadership is turning out to be a much better marketing company and much more profit-oriented than in the past. One thing Wall Street looks for under Mr. Mark is an acceleration of new products. The company at mid-year 1985 was testing a new automatic dishwashing detergent (Bright Side) and a liquid extension of its Fab laundry detergent with fabric softener. "I believe they [Colgate] are working on a lot more products," says Mr. Larson. "They have bumped research and development spending to 1.7% of sales. They've done a lot of positive things. But it still takes a lot of time to get a good flow of new products from increased r&d spending."

The company shocked the advertising world in 1983 when it lured Young & Rubicam away from P&G as part of a move to consolidate most of its advertising with three agencies (Y&R, Ted Bates Advertising/New York and Foote, Cone & Belding, New York). Agency shifts in 1984, by comparison, were relatively minor. In May, 1984, Colgate abandoned a long-term relationship with William Esty Co., New York. Y&R picked up Ajax work that had been handled by Esty, and FCB got Fab and Ultra Brite.

In measured advertising, spending for all Colgate-Palmolive brands fell 8.3% in 1984 to $96.8 million. Colgate's drive to regain market share in toothpaste, where it has run a distant second to P&G since the mid-1950s, has paid off.

In 1984, Colgate backed its regular and gel dentifrice lines with more than $27 million in measured spending, down from $34.8 million in 1983. Despite reduced spending, by yearend 1984, the Colgate toothpaste brand line was within three share points of Crest, according to warehouse withdrawal figures. Mr. Larson of Paine Webber says that as of mid-1985, Colgate had attained a share of about 31% vs. P&G's Crest line's 32%. Beecham's Aqua-fresh holds a 12% share, Lever Bros.' Aim a 9% share, Lever's Close-Up, 8%. None of the other brand exceeds 4%, with Minnetonka's Check-up, the first to be in a pump dispenser, holding a 1-2% share.

While spending on the Colgate toothpaste line was down as a whole, measured spending on combo ads for Colgate's regular and gel toothpaste soared to $25.6 million, according to six-media figures provided by Leading National Advertisers. Colgate spent only $12.2 million for the tandem promotion in 1983. Colgate has all but abandoned spending for its Ultra Brite brand, dropping its measured spending to $1.5 million in 1984 from $3.5 million in 1983.

Dentagard, in tests in 1983 and 1984, is hitting the market in a big way this year with a $40 million national rollout. Aimed at adults concerned with gum care more than cavities, Dentagard is pitched by agency Young & Rubicam as the "only fluoride toothpaste accepted by the American Dental Assn. that has been proven to help fight gingivitis." The Dentagard brand beat P&G's Crest with tartar-control formula into the national market—a pattern that has helped Colgate gain giant strides in the $1 billion toothpaste market.

Colgate also outraced P&G to the national market with its gel extension and then with the introduction both of its regular and gel versions in pump dispensers.

In laundry detergents, Colgate more than doubled spending for Fab with fabric softener, its leading brand, with a 5.3% national share in its market. Measured spending jumped to $13.4 million in 1984 from $5.3 million. It also rolled out big guns in support of its Dynamo Action Plus liquid laundry detergent, with a 3.4% of the market, boosting measured spending to $9.9 million from $5.1 million. Fresh Start concentrated laundry detergent spending fell to $8.3 million from $11.6 million in 1983.

Measured spending for Palmolive dishwashing liquid was virtually unchanged for 1984 at $9.9 million, yet the company is thought to have boosted its share of the market for this product from about 12% in 1983 to more than 15% in 1984.

Irish Spring deodorant soap, which was reformulated and repackaged late in 1984, was backed by $5.8 million in measured spending in 1984, down about 12% from 1983. But this trend is to be reversed in 1985, with the company pouring an estimated $10 million into the product, which has about 5.3% of the category.

Ajax liquid cleaner got the biggest share of spending on this brand in 1984 at $3.6 million, down from the $7.1 million Colgate pumped into this item in 1983. Ajax dishwashing soda was backed with $2.7 million of measured spending; the line was not reported separately in 1983. Over-all spending on Ajax brands last year declined about 42% to $6.3 million.

Colgate also pulled back on its Curad bandage line, reducing measured expenditures about 26% to $2.9 million.

Sales	1,263	1,110	13.7
Net income	45	89	-49.9
Advertising	139	119	17.0
Division sales			
Beer	938	947	-1.0
Other	195	163	19.5

Adolph Coors Co., Golden, Colo., the nation's 55th largest advertiser, spent an estimated $138.7 million on advertising in 1984, a 17% annual increase that was used largely in support of Coors' entry into nine states during 1984.

That expansion continues into 1985. In the first half of the new fiscal year, Coors entered an additional seven states, and in late August, 1985, Coors announced it would build a $70 million packaging plant near Shenandoah, Va., and considered building a $500 million brewery there as well.

Measured spending by the company in 1984 was $58.5 million, up 8.6% from 1983. Martin Romm, a beverage industry analyst for First Boston Corp. in New York, estimates Coors spent an additional $75 million in unmeasured advertising, which includes point of sale, signage and sports event promotion.

Coors' total ad expenditure does not include an additional $120 million attributed to marketing and general administrative costs. Part of that money was used to fund extensive pr efforts during 1984 aimed at improving relations with blacks and Hispanics.

With its first purchase of network prime time tv in late 1984, Coors entered the ranks of advertisers with mass exposure nationwide. By mid-1985, Coors and Coors Light were sold in all but six states. Its presence in 44 states and the District of Columbia justified Coors' decision to make its first major national print buy in July, an extension of its "Coors is the One" tv campaign.

Coors says it has been precluded from sponsorship of some sports events because the networks have exclusive contracts with the leading brewers. In July, 1985, Coors vice-chairman Joseph Coors wrote a letter to the Justice Department expressing sympathy with an effort by Stroh's to open such sponsorship to smaller breweries. The Justice Department issued a statement in late August backing the legality of the exclusive agreements in which advertisers (namely Anheuser-Busch and Miller) pay premium rates to be the only advertiser in a product class for a particular program.

Despite aggressive expansion, worldwide sales for the fifth largest brewer rose only 2% during 1984, and that increase was posted by Coors' nonbeer operations. Beer shipments dropped 4.4% to 13.1 million bbls. in 1984. Net beer business sales dropped 1% to $938 million in 1984. Coors blames the decline on intense competition and a drop in total U.S. beer consumption. Coors' total market share also slipped, from 7.6% in 1983 to 7.4% in 1984.

While sales were dropping, market expansion forced expenses higher, resulting in a drop in net income of 49.9% to $44.7 million in 1984. Coors reached deep into its pockets to pay for advertising to an ever-wider audience.

Coors has one of the highest advertising per barrel spending ratios of major brewers. The company spends $94.50 per bbl. in measured and unmeasured advertising. Last year, using Coors' figures, total spending on advertising and marketing was 11% of gross sales, up from 9.9% the previous year. That expense appears to be reaping rewards.

"For years, Coors has been spending more on advertising per unit than other brewers," says Alan Katz, beer industry analyst for Merrill Lynch, New York. "That strategy finally looks like it's succeeding."

According to Mr. Katz, 1985 shows promise of being Coors' first peak year since 1980. Coors' second-quarter earnings report shows a 25% increase in shipments over the second quarter of 1984. For the 12-week second quarter ended June 16, net income increased to $27.1 million, up 60.8% from the corresponding period a year earlier.

The company is projecting a 10% increase in total sales for 1985. If that projection holds, in 1985 the company will exceed the 14 million-bbl. mark for the first time.

According to Benj Steinman, executive editor of *Beer Marketer's Insights*, Coors' April rollout in New England has produced spectacular results, with Coors capturing 20% of the market in Massachusetts and New Hampshire. The Shenandoah packaging facility, to be on-line in the spring of 1987, will provide shipping efficiencies along with additional packaging capacity (2.5 million bbls per year) that Coors needs in building up the promising Northeast markets and in reaching the states yet to be penetrated—New York, New Jersey, Pennsylvania, Michigan, Indiana and Delaware—areas scheduled for entry by the end of the decade.

Coors has posted impressive results before in new areas—such as the Southeast—only to have market share decline to a mediocre level after the newness wore off. More important, according to Mr. Romm from First Boston, is that Coors' market share in established markets such as Texas and California has stopped declining, and the brewery's market share throughout the country appears to be stabilizing after slipping over the past five years.

He attributes that to more effective advertising, noting that the company has a higher profile than in the past.

Foote, Cone & Belding, Chicago, broke the "Coors is the One" campaign in February, 1985, featuring actor Mark Harmon quietly explaining the merits of Coors' brewing process. In April, Coors was the No. 1 beer for consumer recall, according to Ad-Watch, ADVERTISING AGE's consumer survey; in May it ranked No. 2 and in June, No. 3. Measured spending for Coors' flagship brand grew 23%, to $20.8 million in 1984.

Also contributing to optimism at the brewery was the continuing strength of Coors Light, which in the summer of 1985 ranked No. 2 in sales nationally in the low-calorie segment, although it was distributed in only 44 states. FCB, which also handles Coors Light, created the "Silver Bullet" theme in 1984. Measured spending on Coors Light went up 11% to $11.2 million in 1984.

Coors withdrew Golden Lager in the fall of 1984 after what Rob Klugman, vp-marketing for Coors, terms "disappointing results" in test marketing that began in April, 1983. It had been positioned directly against Anheuser-Busch's Budweiser.

Still seeking success with a heavier-tasting beer, in April, 1985, the company released Coors Extra Gold in 17 test markets. Mr. Klugman says Coors learned something from the Golden Lager experience, and it's taking a different approach with Extra Gold. The advertising, by Tatham-Laird & Kudner, Chicago, delivers a macho message and prominently displays the Coors name. TLK also handled Golden Lager.

In July, Coors began test marketing Colorado Chiller, a nonwine product, to tap the growing market for wine coolers. TLK is handling the test, being conducted in San Diego, Cal.; Orlando, Fla.; Dayton, O.; Lubbock, Tex.; Charlotte, N.C., and Spokane, Wash.

Last fall, J. Walter Thompson USA resigned the assignment for Herman Joseph's 1868, a superpremium, so the agency could pursue the Miller High Life account, which it won. Coors reassigned the business to FCB, which replaced JWT's "Best of Time" theme with "Labor of Love." Herman Joseph's continues to be available only in limited markets. Ad support for the brand rose 46% to $1.2 million in 1984.

FCB also handled advertising for George Killian's Irish Red Ale under the theme "Killian's Red, Instead." Killian's limited market territory was extended into New England in July, 1985. Killian's remains the poor sister among Coors brands in terms of measured advertising, which dropped by 40% to $376,000 in 1984.

Last fall, Coors' corporate advertising moved from Broyles, Allebaugh & Davis, Denver, to Evans/Bartholomew, also Denver. E/B also is handling the market test for Cocono candy bar, a product of Coors Food Products Co., made of a chocolate substitute derived from the company's beer-production by-products.

In May, the company was reorganized into two divisions—brewing and corporate. The reorganization was viewed as an opportunity to give more power to the next generation of the Coors family. William Coors, 68, became chairman-ceo while Joseph Coors, 67, became vice-chairman and chief operating officer. Peter Coors, 38, took over as president of the new brewery division.

Cosmair Inc., New York, laid out the cash to do market battle with the nation's beauty marketers in 1984, paying $146 million for Warner Cosmetics and increasing its own advertising expenditures to an estimated $119.5 million. The ad expenditures, which increased 70.7% from 1983, made Cosmair the 69th largest national advertiser.

Privately held Cosmair is the U.S. licensee for L'Oreal and Lancome, and traces its origins to 1953 when it opened as a wholesale distributor of L'Oreal hair-care products to American beauty salons.

Cosmair, with sales estimated by the industry of $665 million in 1984, had an annual growth rate in 1984 of 40%, far exceeding Revlon's 1% gain with sales of $798 million in North America, and Estee Lauder's estimated 12% increase on sales of $660 million. Heavy spending on research, advertising and promotion has kept Cosmair from reaping huge profits.

On the basis of those sales results, Cosmair is the third largest beauty company in the $7 billion U.S. market, trailing No. 1 Avon Products ($850 million in sales in 1984), No. 2 Revlon, and nudging No. 4 Estee Lauder, which it passed in total sales for the first time in 1984.

Warner Cosmetics, purchased in January, 1984, may have contributed as much as $160 million to Cosmair sales from its lead products, Lauren perfume, Ralph Lauren cosmetics and Vanderbilt perfume.

Cosmair is challenging Revlon both in market dominance and in advertising outlays. Cosmair's total measured advertising in nine media of $78.7 million in 1984 represented an increase of 80%. Revlon spent $85.4 million in measured advertising, up 3.9%. Estee Lauder trailed at $38 million in measured media. Considerable more monies, however, are spent by all players in the market in promotions, couponing, special events and the like.

Cosmair spent more on tv than Revlon, $42.4 million vs. $41.1 million in 1984, and in magazines, $23.1 million vs. $21.2 million, but trailed in spot tv spending $12.3 million to $18.7 million.

Cosmair's largest ad outlay went in support of L'Oreal Mousse Styling Foam—some $13.7 million in tv, mostly network—according to Leading National Advertisers Inc.

In this new category worth $150 million, Cosmair's Free Hold mousse still outdistances the competition. However, its onetime 40% share of market, claimed prior to the new launch activity by competitors in this market, has dwindled to an estimated 23% of market. Second is Alberto-Culver Mousse Styling Foam, No. 3 is Suave by Helene Curtis, No. 4, Finesse also by Curtis, and No. 5, Flex by Revlon.

L'Oreal, which accounts for an estimated $90 million of Cosmair's total sales, attracted $11 million in measured spending backing eye makeup, $9.8 million of which is network tv and $1.2 million of which is magazines.

L'Oreal, which began the repackaging and reformulation of its lip and nail line three and a half years ago, has built its products into a complete cosmetics line similar to offerings of makeup rivals Revlon, Noxell and Maybelline, especially with the introduction this May of Visuelle facial makeup with a $5.4 million network tv flight and print ads. McCann-Erickson created the network and print for Visuelle, L'Oreal's first foundation, pressed powder and powder blush.

Over-all, L'Oreal spending was up 45.2%, to $44 million. Lancome division spending was up 33.7%, to $10 million in 1984.

The Lancome division, defined as the "cash cow" at Cosmair, spent $10.1 million in measured advertising in 1984, up 34%. New products included Clarifiance, an oil-free moisturizer, Forte Vital night cream, Maquivelours, a liquid foundation, and Stylocerns pencil-tubed lipstick. In 1985 new products included: Conquette du Soleil, a sun skincare; La Crayette Caprice, a powder pencil that releases three colors at once; Boite a Poudre, a powder box and brush in one container, and two waterproof makeup products—Le Crayon eyeliner, and Les Aquatiques cream eyeshadow.

La Crayette and Boite a Poudre were innovative in this highly animated industry that keeps priming the new product pump. For 1986, Lancome will launch in January, Transhydrix, a 24-hour moisturizing cream, and in May, a seven-line men's skincare product family.

Notable advertising shifts occurred behind established fragrances Anais Anais, in which spending was down 15.9% to $3.7 million, and Fidji, where spending dropped from $758,600 to only $91,100.

Among the Warner Cosmetics contributions, Lauren perfume drew $2.8 million, up from $277,600 in 1983; Polo, $2.2 million, up from $1.3 million; Chaps, $3.5 million, down from $4.1 million.

The Vanderbilt line garnered $8.8 million compared with $7.2 million in 1983. Vanderbilt sales of an estimated $65 million-plus trail only Revlon's Charlie in sales among mass market perfumes. Market shares reported in early 1984 were 7% Charlie, and 4% Vanderbilt.

The market for Cosmair and others, however, is tightening. Unit sales for cosmetics rose only 2% in 1984, and will remain stagnant in the next few years, say analysts.

Sales grew steadily during the 1960s and 1970s, reflecting the surge of women into the work force. But that has since leveled off.

Cosmair is fighting for a bigger share of sales from mass market outlets, where 60% of all beauty aids are now sold. The Lauren fragrances and the Vanderbilt line are new entries in that market.

Revlon currently outsells Cosmair 3 to 1 in drug stores. However, the margin used to be about 5 to 1. Cosmair's growth has been faster than that of Revlon in this mass market sector in which Cosmair is positioning L'Oreal at higher, department store prices and getting away with it. Rationale behind the strategy is one-stop shopping—convenience—with a lot of prestige thrown in.

In department stores, where 40% of all cosmetics and fragrances are sold, Cosmair's 20% share is a distant second to that of Estee Lauder's 37%.

L'Oreal is trying to cut into the lead of Bristol-Myers' Clairol in the $400 million (manufacturer's dollars) hair coloring category where it holds a 23.3% dollar share against a 60% dollar share held by Clairol. Moving against a category decline of 2% in hair coloring sales, L'Oreal had a 1% gain in hair coloring share in 1984.

L'Oreal this year introduced its new semi-permanent Avantage hair color lotion with an ad budget of $6 million. It is going head-to-head against Clairol's Loving Care, which holds about 11% of the market.

Loving Care got $8.2 million in measured spending in 1984, up 8% from the previous year.

Avantage is being handled by Geers Gross. So is the introduction of the Biotherm treatment line, the launch of Warner Division's Norma Kamali fragrance in the spring of 1987 and the newly introduced Monogram, a men's fragrance by Ralph Lauren. Monogram, priced 25% higher than Lauren's Polo men's fragrance, could achieve sales of as much as 40% of the Polo line in its first year. Polo has estimated sales of about $30 million, report industry analysts. Chaps is the third Lauren fragrance.

Fragrances at Cosmair represented 33% of sales in 1984; haircare products, 34%; makeup, 25%, and skincare, 8%.

Distribution of media expenditures on a percentage basis remained relatively constant between 1983 and 1984.

Nestle SA owns 62% of Cosmair, with the remaining 38% divided largely between L'Oreal interests—L'Oreal itself; Francois Dalle, head of strategic planning and former chairman at L'Oreal; Liliane Bettencourt, who is the daughter of L'Oreal founder, Eugene Schueller, and Jacques Correze, Cosmair chairman.

Cotter & Co.
Chicago

($ figures = 000,000)

Worldwide/U.S.	1984	1983	% chg
Sales	1,653	1,459	13.3
Net income	56	62	-6.5
Advertising	64	52	22.0

Cotter & Co., continuing in the steps of a historic Chicago hardware tradition, has become the biggest U.S. hardware company. It is now an organization of more than 7,500 True Value hardware and variety stores, which in 1984 was the 98th largest national advertiser with advertising of $63.9 million, up 22% from 1983.

In 1984, Cotter revenues totaled $1.65 billion, up 13.3% from 1983. Net earnings fell to $58.2 million in 1984, a decline of 6.5%. Cotter, which is owned by its dealer members and functions as a cooperative, says the decline is a change in the payout of the company income in the form of "patronage dividends" to its members.

These dividends are based individually on the value and volume of goods and services each dealer-member orders from headquarters, and Cotter attributes the apparent 1985 earnings decline to a change from charging the dividends against operating costs in arriving at net earnings to computing the net and then paying out the dividends.

For the latest quarter reported by Cotter, ended March 31, 1985, revenue was $404.9 million, down just 1.5% from $411 million in 1984's corresponding quarter. Net earnings fell 5.5%, to $11.2 million in the 1983 first quarter. Again, says Cotter, the reason was the new method of computing the patronage dividend.

As a private company, Cotter does not delineate its performance record by publishing a promotional annual report, but the record is known. The 10K that Cotter files with the SEC describes its organization as "the largest wholesaler of hardware and related products in the United States."

The 1984 annual letter to its stockholders states, "1984 was a reasonably satisfactory year for your own wholesaler in terms of shipment/billings, with an over-all increase of 13.3%."

Cotter advertising probably has succeeded in familiarizing almost every American with its name, but not *that* name. For 1984, its measured spending of $43.9 million was up 22% from the previous year as the company again leaned heavily on spot tv where it placed 33% of its ad expenditures, followed by 27% on network tv, 23% on network radio and 12% on magazines.

True Value is the moniker that Cotter promotes most widely, using three major forms of advertising: The "Pat Summerall sent me" series on tv and radio, the gravure fliers and the ads in magazines aimed at the homeowner.

The radio and tv commercials are conceived and written by Cotter's in-house agency, Home Products Marketing. For the magazine ads and Yellow Pages promotion, Cotter uses the creative and media services of its outside agency, Christenson, Barclay & Shaw, Chicago. For the electronic media, Cotter is using not only the ubiquitous Summerall but other personalities such as Harry Caray, long known for his "Holy Cow!" as he broadcasts Major League Baseball, and Lee Phillip, a Chicago tv personality.

The big hardware wholesaler produces more than 15 million fliers 12 times a year. Each dealer takes a quantity of fliers in a co-op program with Cotter and distributes them to mailing lists within a five or ten mile radius of the stores.

According to Edward Lanctot, Cotter secretary, treasurer and advertising/merchandising manager, "About 60% of our members are now using this direct mail, mostly in quantities of 10,000 each or less."

In other major marketing efforts, Cotter conducts new-product markets each spring and fall at its Chicago headquarters, giving dealers a chance to see what's new and what will be coming. In response, says Cotter, the dealers "generally place substantial orders."

During 1984, Cotter made marked increases in certain advertising expenditures by media and by product line. Spending for network tv rose 182%, to $11.8 million. Spot radio was up 36%, to $986,000. Outdoor went up 285%, to $35,400. Network cable tv climbed 13%, to $686,000. Other increases were 6% for network radio to $10.2 million, and 4% for spot tv to $14.5 million. Only magazine spending was off for Cotter in 1984, dropping 20% to $5.5 million.

The big increases by product category in 1984 were spent to promote the True Value store concept, while the long, heavily promoted paint line was off sharply. At $40.9 million, total spending to advertise True Value stores in 1984 was about 97% of Cotter's total 1984 six-media spending of $42.4 million. It also represented an increase of 24.3% over measured advertising for True Value stores in 1983, according to Leading National Advertisers, which monitors advertising in six media.

Declines in spending for the True Test paint and finish lines—most of it in magazines—included True Test home paint, down 53% to $341,300 in 1984 from the previous year; True Test home stains, down 65% to $98,600; and X-O rust primer, True Value's Rust-Oleum fighter, down 67% to $45,500. Bucking this trend, spending for the True Test varnish line was up 10%, to $45,500 in 1984.

Across the board, Cotter spent 34% less promoting its household finish lines in 1984 than in 1983, dropping to about $829,000. It spent 25% more in general promotion of the True Value name, jumping to $41.3 million in 1984.

Unlike the household finishes promotion that ran almost entirely in magazines, with only a small fraction in outdoor, the 1984 general True Value promotion spread across print, tv, radio and outdoor media. Magazine spending was the only decline, falling 17.5% to $4.2 million in 1984. Network tv expenditures nearly tripled, climbing to $11.8 million in 1984 from $4.2 million a year earlier. Outdoor also nearly quadrupled, going to $32,800 in 1984 from $8,700 in 1983.

Other gains were more modest, including 5% for spot tv, going to $14.64 million in 1984, and 4% for network radio, rising to $10.2 million in 1984.

Spending for the V&S variety stores fell notably in 1984, to $55,700 from $312,200 in 1983. At the same time, though, Cotter apparently is not dissatisfied with the V&S picture. It says the variety division made "reasonable increases" in 1984, with shipments up 11% over 1983. The variety stores, which are in the dime store mode, typically are family-owned enterprises.

Cotter is expanding the variety product line it offers to the 900 V&S outlets in addition to the approximately 825 combination True Value Hardware and V&S stores. Pure True Value Hardware stores are by far the biggest part of the business.

By product category, Cotter's business breaks down for 1984 into 40% hardware, 30.8% home and maintenance supplies, 19.3% variety goods and 9.9% appliances.

Cotter's main competitors are Ace Hardware Corp., Oak Brook, Ill., with more than 6,000 dealers and exceeding $800 million in sales annually, and Hardware Wholesalers Inc., Fort Wayne, Ind., with more than 4,000 dealers and sales topping $560 million a year. Like Cotter, both are merchandise-buying wholesale co-ops with voluntarily associated dealers, but the nature of the association varies among the three.

Another difference is that Cotter not only buys merchandise for resale to its members but also manufactures it. The general paint and chemical division produces paints and other finishes at a manufacturing plant in Cary, Ill. The general power equipment division produces lawn and garden equipment, electric heaters and snow-clearing products at a plant in Harvard, Ill. Cotter also produces paint at facilities in Chicago and near Allentown, Pa.

It gets the goods to its members' stores from 14 regional warehouses. The newest distribution center, in Woodland, Cal., near Sacramento, will serve Cotter's fast-growing West Coast trade.

As in other fields, foreign competition is a factor in the hardware business. Taiwan is the biggest overseas hardware source; in addition Japan contributes 36% and Korea, 26%.

Cotter advertising and merchandise manager, Edward Lanctot, says "imported tools are getting a good reception. And business is heaviest in tools.

"But we don't go overboard on imports," he notes, indicating that the imports are generally of lower quality, an image TrueValue does not want to court.

Wherever the hardware is coming from, U.S. consumers are not hesitating in taking it home. Chilton's *Hardware Age* reports that although mid-1985 retail sales generally were declining by 0.8% from the same 1983 period, hardware sales were averaging 17% higher at two-thirds of the dealers reporting.

CPC International

Englewood Cliffs, N.J.

($ figures – 000,000)

Worldwide	1984	1983	% chg
Sales	4,373	4,010	9.0
Net income	193	136	42.0
U.S.			
Sales	1,815	1,526	19.0
Operating profits	180	160	12.4
Advertising	124	118	4.7
Division sales			
Grocery products	2,555	2,344	9.0
Corn wet milling	1,660	1,531	8.5
Other	158	136	15.8

CPC International demonstrated strong sales worldwide in 1984 but mixed geographic results during 1984 as it boosted advertising to an estimated $123.5 million in 1984, up 4.7% over a revised $118 million in 1983, making CPC the 66th largest advertiser

The Englewood Cliffs, N.J.-based company, which markets such products as Hellmann's mayonnaise, Mazola corn oil, Knorr soups, Skippy peanut butter, Thomas English muffins and Karo syrup, spent $190 million on advertising and promotion worldwide in 1984, up from $181.5 million in 1983, according to the company.

During 1984, CPC had record sales of $4.37 billion, up 9% from 1983. Net income rose 42% to $193.4 million over $136.2 million in 1983, the latter of which included a write-off of $55.4 million.

The company's operating income rose 4% from the previous year to $401.9 million. Two-thirds of the increase in operating income was because of a 12% improvement in the company's corn wet-milling segment, a segment accounting for 38% of total sales and 22.5% of operating income. However, this segment is finding 1985 less hospitable. In the first quarter of the new year, CPC suffered a decline in earnings of 5.1% to $33.2 million and a 1% slippage in sales to $1 billion primarily traced to the strength of the dollar against foreign currencies and competition in the corn wet-milling industry.

CPC's main business line, grocery products, which includes Best Foods, S.B. Thomas Inc. and Knorr-Special Products, in 1984 accounted for sales of $2.56 million, up 9%, and operating income of $315.5 million, up only 0.2%. Sales of the segment accounted for 58% of the company's worldwide total while operating income represented 78.5% of the company total.

Operating income in the grocery products segment reached the same level in Europe, Africa and the Middle East, where it faced considerable local currency erosion against the dollar. There was a 33% decline in Latin America where consumer buying power dropped because of poor local economies, but a 9% increase in North America and a 37% increase in Asia.

In the U.S. where the Best Foods division is the major arm of the grocery products segment, Best Foods reported sales increased 20% in 1984, with about half the gain stemming from the December, 1983, acquisition of C.F. Mueller Co. for about $122 million.

This division attracted most of the advertising spending at CPC as in the past. Measured spending in nine media tracked for this report, however, dropped 1% to $44.8 million in 1984 from 1983.

Mueller's pasta products received a substantial increase in measured advertising support from CPC, with $1.5 million spent in media, all spot tv, up from $127,700 in the previous year, according to Leading National Advertisers, which monitors six media. CPC is No. 2 in the U.S. pasta market with a 15.5% share, trailing Hershey Foods Corp.'s (American Beauty) 17.2% share. Borden is third at 11.9%.

Hellmann's mayonnaise recorded media spending of $9.3 million, up 5.7%. Best Foods mayonnaise received $1.5 million, up 15%. Both Hellmann's and Best Foods mayonnaise were promoted in 1984 as having high quality, good taste and creative uses. According to George Novello, food industry analyst with E.F. Hutton Inc. in New York City, Hellmann's and Best Foods hold together a 50% dollar share of the mayonnaise market, with the closest competitor being Kraft mayonnaise, which has a dollar share in the low teens.

Both Best Foods and Hellmann's were marketed individually as well as in combination with other products—Lipton soup, Progresso bread crumbs, Hershey's cocoa—to show versatility.

Skippy peanut butter advertising—$9.5 million in 1984 vs. $8.6 million in 1983—was apportioned two-thirds network tv and a third spot tv. Skippy is the market leader holding a share of more than 20%, followed by Procter & Gamble's Jif and Beatrice's Peter Pan, respectively.

Skippy advertising continued to tie into strong consumer interest in good health and physical fitness.

A new 5-lb. container for use in the food service business was introduced by CPC Foodservice in September, 1984.

Thomas English muffins were expanded to Atlanta in January, 1985, following the expansion into 14 new markets in early 1984 making the muffin available in 73% of the nation. The muffins were backed by $6.2 million in measured advertising, all in spot tv, an increase of 11% from 1983.

Some foreign and/or private companies do not divulge sales or income figures. Where estimates could not be obtained, N/As appear in charts and the boxed information preceding the profiles to indicate "not available."

Thomas Toast-r-Cakes were expanded to Atlanta and Pittsburgh and were supported by a 42% increase in advertising in 1984 to $481,200, all in spot tv, according to LNA.

S.B. Thomas also tested a three-item croissant line that feature butter, chocolate and almond-flavored croissants. Supported by $185,900 in spot tv, the croissants were linked to Thomas English muffins with the tag line, "As French as our muffin is English." The croissants, however, were subsequently withdrawn from the market and there are no immediate plans for the line, the company says. Thomas' cinnamon raisin and sourdough muffins also were introduced in the fall of 1984.

CPC's line of Knorr dehydrated soups, sauces, bouillons, seasonings and mixes reported higher volume sales in 1984, but the brand suffered a decline of 3% in worldwide dollar sales primarily because of fluctuating currency values in Europe, where 60% of Knorr product revenues are derived.

Knorr introduced several new products in 1984, including Knorr Homestyle soup, a hearty dry soup; Knorr salad dressings, imported oil and vinegar dressings, and line extensions to Knorr soups and sauces. Minimal advertising support is given Knorr products. Knorr soup mix received $421,800 in new ad support and Knorr-Swiss Mixes garnered ad support of $325,800, up from $93,400 in 1983.

The major drop in spending at CPC was in Mazola oil, a year-to-year decline of 31% to $6.4 million. Mazola margarine, which received some $2.4 million in measured media spending in 1983, was pared back to $83,900 in 1984.

Other grocery products included Argo packaged corn starch, Karo and Golden Griddle syrups, Niagara spray starch and Alsa desserts. The Karo syrup line received $1.9 million, all spent in magazines, a 20% decrease from the year before, according to LNA. As in the past year, Karo syrup was advertised in conjunction with other food products such as Hormel hams. Argo received $654,500 in measured media, down 12% from 1983, while Niagara received about $50,000 both years.

In early 1985, Best Foods introduced Best Foods Instant Thickener for gravies and sauces. Positioned to "end lumpy gravy," advertising asked, "Doesn't your famly take encugh lumps in life without taking them in your gravy?"

CPC also restructured its Best Foods division in October, 1984. Best Foods U.S. and the Consumer Development Cos. were merged to form Best Foods North America. Business unit directors were given responsibility for a group of Best Foods' traditional brand products.

CPC's corn wet-milling operations, which include 40 plants in 21 countries, showed an increase in worldwide sales of 8% in 1984 to $1.66 billion. Worldwide operating income also was up 12%, to $90.4 million. About one-fourth of CPC's grocery products volume is derived from ingredients supplied by corn wet milling operations.

The company invested more than $180 million in 1984 to expand capacity, lower costs and boost productivity in its wet-milling operations. The project includes rebuilding CPC's Argo, Ill., plant and other projects in plants in the Netherlands, North Carolina, California and Brazil.

In April, 1984, a CPC corn wet milling division entered into an agreement with John Labatt Ltd. of Canada to merge the two companies' corn wet milling operations into a partnership called the Casco Co., which produces a full line of corn wet milling products. CPC holds a 70% interest in the partnership.

An expansive market

Big League food producers are savvy enough to sense a good thing in the possibility of supplying victuals to the most numerous of all the world's peoples, the Chinese, and they are doing so.

The Pillsbury Co. entered a joint venture in October, 1984, with the Great Wall Co., Taiwan, the Republic of China, to produce flour and specialty foods.

Beatrice Cos. in November, 1984, announced a joint venture, Guangmei Foods Ltd., in Guangzhou (formerly Canton) in the People's Republic of China. Beatrice owns 50% of the venture.

Dart & Kraft, the nation's 29th largest advertiser in 1984, increased ad spending 27% to an estimated $269.2 million during a year in which the Northbrook, Ill.-based company found stagnant: Net earnings were $455.8 million, up 4.8% from 1983, on sales of $9.76 billion, up 0.5% from the previous year.

D&K again was dominated by its food products division, which accounted for 70% of the company's sales and 63% of its operating profit. Sales for the Kraft division increased 3% to $6.8 billion for the year.

Dart & Kraft, which collected 23% of its sales and 34.7% of its operating income from international business in 1984, had worldwide advertising expenditures of $418.6 million, up 23% over 1983 expenditures of $339.6 million, according to the company.

The most disappointing results were turned in by the Direct Selling division, otherwise known as Tupperware International. Profits for Tupperware declined 27% to $138.8 million as sales, which accounted for 8% of total D&K sales, fell 6% to $776.9 million.

In an attempt to reverse the division's fortunes, the company has announced plans to restructure the Tupperware party format, adding one-hour, lunch-hour and rush-hour parties to bring working people back into the fold. Tupperware also launched its biggest advertising effort—a $10 million tv campaign, focusing on products such as the new Ultra 21 cookware line, rather than parties and salesperson positions. The company expects to begin seeing signs of a turnaround late this year or in early 1986, after absorbing the startup costs associated with Ultra 21.

Over-all, D&K continued its period of transition in 1984. It purchased four businesses during the year: Precor, a Redmond, Wash.-based marketer of exercise bicycles and rowing machines, and Health Examinetics, a San Diego-based health testing service, in April; Celestial Seasonings, a Boulder, Colo.-based maker of herb teas, and Lender's Bagel Bakery, West Haven, Conn. The company says these acquisitions reflect its intention to focus on food and consumer products in growth categories.

D&K attempted to purchase Chicago-based CFS Continental, the nation's second-largest foodservice company, but was outbid by A.E. Staley Co., now known as Staley Continental. D&K says it plans to make up for the lost opportunity by acquiring a number of smaller foodservice companies. Foodservice already accounts for 11% of total Kraft sales.

In turn, the company sold some businesses that did not fit into its plans, including fluid milk, packaging and plastic specialties units.

D&K carried those reorganizational practices into this year. In January, it purchased Borg-Erickson, a Chicago-based maker of bathroom scales. In March, it acquired Frusen Gladje, a Lindenhurst, N.Y.-based maker of superpremium ice cream. In February, it announced plans to sell to Whirlpool Corp. its KitchenAid division, for which it spent more than $6 million in measured media advertising in 1984.

The KitchenAid sale was contested by White Consolidated Industries and Magic Chef, which filed an antitrust suit to stop the transaction, claiming it would lessen competition. After a five-week trial in district court, an injunction was placed on the sale. That bar was then lifted in August, 1985, pending an appeal.

Following completion of all but the KitchenAid deal, the company declared that "the period of reassessment is winding down."

Part of that reassessment program included separating the retail food group into three divisions: Refrigerated, dry grocery and retail ventures. The latter will be reponsible for managing two new businesses—Celestial Seasonings and Lender's—and the development of new food lines, such as Cheese Classics frozen entrees, which are being tested in Phoenix.

D&K intends to increase distribution and marketing support for Celestial Seasonings, which held an estimated 40% share of the $90 million to $100 million herb tea category at the time of purchase. The company has said it also will introduce new products in herb tea and other categories under the Celestial Seasonings name.

For Lender's, whose baked goods have been marketed primarily on the East Coast, D&K plans to increase capacity about 50% in 1985 and greatly expand its distribution area. D&K sees the bagel maker as an ideal match for its market-leading Philadelphia Brand cream cheese products.

Kraft's dairy group, which accounts for 9% of Kraft sales, made a poor showing in 1984, despite a substantial increase in advertising. While Breyer's ice cream performed well in initial midwestern expansion markets, Sealtest ice cream volume was lower. In 1984, Kraft doubled measured ad spending for Sealtest to $7 million and increased Breyer's from $3.4 million to $8 million.

The most positive news from the dairy group was created by Light n' Lively lowfat yogurt six-packs, whose volume was up about 40%, the company reported. National rollout of the yogurt, which received $2.8 million in spot tv support in 1984, was scheduled to be completed in 1985.

Because D&K is placing more emphasis on consumer products, it says, it has given higher priority to marketing and advertising. In 1984, the company projected a 12% to 15% increase in ad spending for 1985.

Cheese represented almost 57% of the retail food group's sales, despite continued lower demand caused by the federal government's cheese giveaway program. Consumer demand lowered as more than 470 million lbs. were distributed through the government program, about 28% of the pre-giveaway commercial market, the company says.

The most heavily advertised products in 1984 were Kraft cheeses and Velveeta, both of which received about $21.5 million in measured media support, according to six media LNA figures. Velveeta process cheese food measured spending represented more than a 40% increase over 1983.

Two new Velveeta products introduced in 1984 included Shells & Cheese dinner and Mexican Velveeta pasteurized process cheese spread in mild and hot versions. Mexican Velveeta, which hit the shelves in the fourth quarter, was responsible for a sales gain of almost 2% in the total Velveeta loaf category, the company says. Early this year, Velveeta extra thick slices were introduced.

Those were among 15 products that were introduced nationally and 30 others that were either placed in test markets or introduced regionally, making for Kraft's busiest product-introduction year ever.

One line extension that is expected to contribute substantial volume is Miracle Whip Light, a reduced-calorie version of Miracle Whip salad dressing. In May, 1985, Kraft followed up by rolling national with Kraft Light reduced-calorie mayonnaise. Ads for Light, via J. Walter Thompson USA, say it has "creamy taste with half the fat of real mayonnaise."

Another line extension is Cracker Barrel cheese balls and cheese logs, which were placed in national distribution in time for the holiday season.

Kraft placed three different blend spreads into test markets in 1984. Parkay Plus, a margarine with 28% real cream, was testing in midwestern and western markets, while two butter blends—Sheffield Farms and Touch of Butter—also were in test.

In March, Kraft introduced Presto Italian salad dressing into national distribution. Presto's special blending process makes it thicker and it stays mixed after shaking.

The most dramatic increase in spending for any one product in 1984 was for Kraft barbecue sauce. Measured support for the product in 1983 totaled $1.9 million; in 1984 that figure jumped to more than $10 million, $8 million of which was on network tv. Kraft showed it means to hang on to its leading market share when it introduced a premium barbecue sauce called Thick 'n Spicy.

The company's interest in sauces was spelled out further when it revamped its sauce department and produced Sauceworks, a repackaged line of sauces that includes hot dog sauce, hamburger sauce, tartar, seafood cocktail, sweet and sour, and horseradish.

The consumer products and commercial products segments, consisting of Duracell, Hobart Corp. and West Bend Co., contributed 22% of D&K's sales and profits in 1984.

Duracell, the world's leading producer of high-performance consumer batteries, continued strong ad support for its batteries and Durabeam line of portable lighting products.

Duracell and Union Carbide's Eveready are locked in combat for market share. The two are estimated to hold a combined 90% of the battery market. Measured spending for the two product lines in 1984 totaled about $28 million each, up from $23 million in 1983.

West Bend, which the company says has been "redirected" and focused on faster-growing, more profitable businesses, is led by a new cordless iron that went into national distribution late in 1984. New product lines attained through acquisition of Precor and Borg-Erickson are expected to strengthen the West Bend unit, which reported that products introduced since 1980 accounted for one-third of its 1984 sales.

In August, Kraft consolidated responsibility for its approximately $100 million in network tv buying at Foote, Cone & Belding, Chicago. That responsibility previously had been split between FCB, Needham Harper Worldwide and J. Walter Thompson USA, both of Chicago. N W Ayer retained responsibility for all tv spot buying for Kraft.

Delta Air Lines

Atlanta

RANK 95

($ figures – 000,000)

Worldwide	1985	1984	% chg
Sales	4,684	4,263	10.0
Net income	259	176	48
Advertising	67	65	2.9
Division sales			
Passenger	4,376	3,960	10.5
Cargo	235	240	-2.1
Other	72	61	18.0

Buoyed by rising passenger traffic and improving passenger yields, Delta Air Lines recorded record profits in fiscal 1985. But the Atlanta, Ga.-based carrier, the nation's 95th leading advertiser in 1984, is fine tuning its advertising and marketing strategies in the face of formidable competition from low-cost and regional carriers, and from aggressive expansion by other major carriers.

Delta, with estimated ad expenditures in 1984 of $66.9 million, up 2.9% from 1983, had net income for the fiscal year ended June 30, 1985, of $259 million, up 48% from the previous year. Operating revenue was $4.68 billion, up 10% over fiscal 1984.

Delta is making a strong comeback from its fiscal 1983 net loss of $86.7 million, which resulted mainly from cutthroat fare wars with low-cost airlines. Fiscal 1984-85 improvements reflect increasing passenger traffic, higher passenger yield (a measure of revenue from flying one paying passenger one mile) and better cost-control measures. Delta also benefited from lower fuel costs and a 29-day strike at United Airlines in May and June, 1985.

Revenue passenger mileage flown in fiscal 1985 was up 11%, but passenger yield was down 1% from fiscal 1984, indicating downward pressure on fares as a result of rising competition, analysts say. Revenue from cargo traffic also was down 2% from fiscal 1984. Operating costs increased 7% in fiscal 1985.

Total measured advertising in calendar 1984 as monitored in nine media was $63.1 million, up 2% from 1983. The largest single category, however, $26 million in retail newspaper spending, fell 17% in 1984 as Delta shifted some of its media spending to more image-oriented spot radio and spot tv advertising, using variations of its "Delta Gets You There" theme. Spot radio was up 26% to $19.3 million in 1984, and spot tv was up 32% to $10.8 million, the latter according to Leading National Advertisers.

Delta's improved financial performance allows it to modernize its fleet of 244 aircraft, and expand operations through internally generated revenues, Delta executives and securities analysts say. Delta invested $365 million in flight equipment improvements in fiscal 1984 and $529.6 million in fiscal 1985. Projected equipment improvements through fiscal 1987 will average $500 million annually, a Delta spokesman says.

Delta accepted delivery through the end of fiscal 1985 of ten Boeing 757-232, 13 leased Boeing 737-232 aircraft and three L-1011-500 Lockheed aircraft, the latter for international routes, which join the three already in service. Delta has orders and options for an additional Boeing 767-332s through 1992 and 60 Boeing 757-232s.

The purchases help Delta in controlling long-term fuel and labor costs by replacing older aircraft with fuel-efficient newer models that require two-instead of three-pilot crews.

The extensive aircraft purchases are possible because of Delta's falling levels of long-term debt, which totaled less than $600 million at the close of calendar 1984, representing a 34%-to-66% debt-to-equity ratio. For comparison, Delta's debt of $1.1 billion at the end of fiscal 1983 represented a ratio of 55% debt to 45% equity, according to company reports.

Aircraft acquisition is an integral part of Delta's conservative growth strategy in domestic and international routes, says Robert Coggin, Delta's assistant vp-marketing development. Delta is concentrating on expanding service through its Atlanta, Dallas-Fort Worth and Cincinnati hubs, and its smaller hubs in Boston and Memphis, in addition to international routes, Mr. Coggin says.

Delta's expansion may increase slightly its domestic market share, measured in terms of total operating revenues, from 1984 levels of 8.9%, compared with United Airlines' 14%; American Airlines' 12.3%, and Eastern Air Lines' 10%.

On the domestic scene, Delta faces stiff competition from American in the East and Southwest with Delta's greatly increased presence at Dallas-Fort Worth, the nation's fourth largest airport with 32 million passengers arriving and departing in 1984. Dallas-Fort Worth also is American's base of operations. American is seeking a greater presence in the East and has created hubs at Raleigh-Durham, N.C., and Nashville, Tenn., to accomplish this.

Delta initiated nonstop service 1984 between Dallas-Fort Worth a Detroit; El Paso; Louisville; and Ontario. Delta also began nonstops 1984 between Dallas-Fort Worth, Honolulu and Nassau, Bahamas. Del inaugurated international service June, 1984, between Dallas-Fort Worth and Frankfurt, West Germany, markets.

From its Atlanta hub, Delta beg nonstop service to Paris on April 1985, and nonstops to Honolulu o June 1, 1985. Six months earlier, Delta had introduced a one-stop to Honolulu from Atlanta.

Delta has dramatically increased flights into and out of Atlanta, where is the dominant carrier. It set tra records in spring, 1985, with three consecutive months of 1 million passengers boarding there.

In the East, Delta competes mo heavily with People Express Airlines and Eastern Air Lines for north-south business and vacation traffic in t eastern U.S. Meeting these carri head-on, Delta built a $100 milli terminal at New York's La Gua Airport in fiscal 1983. It opened stop service June 1, 1985, from Lauderdale to Nassau, with con tions from Delta's domestic route tem, and made La Guardia its York gateway to Nassau. Delta added a second daily flight to Nas from Atlanta. These changes increa the number of available seats Delta's Bahamas markets by 40.8%.

In July, 1985, Delta began offeri 375 daily departures from Atlanta, a total of 58,000 seats. Atlanta was nation's second busiest airport 1984, with 38.9 million passengers a riving and departing that year.

It is Atlanta and other hubs wh Delta has benefited from its De Connection program, initiated 1984, which links several commu airlines into Delta's passenger reserv tions system to provide direct connections with Delta's long-haul flights, plus some fare advantages. Partici pants include Atlantic Southeast Air lines, Rio Airways, COMAIR and Ransome Airlines.

Other major carriers are starting similar programs. For example, American introduced its equivalent, the American Eagle connections. Eastern is making connections with regional Metro Airlines.

Delta also is seeking to extend its Pacific routes. The U.S. Department of Transportation is considering opening three new routes between the U.S. and Japan, and Delta is fighting to be one of possibly three carriers selected, Mr. Coggin says.

Delta faces a formidable problem in reducing its operating costs. Before deregulation, labor costs reached nearly 58% of total operating expenses for most air carriers. Since 1981, many carriers have been able to drastically reduce labor costs as a percentage of total costs through wage rollbacks, new work rules and bargaining with unions for the right to hire new workers at much lower wage rates. Delta, primarily a nonunion company, continues to be plagued by high labor costs.

In the second quarter of 1985, for example, labor costs were 43% of total operating expenses, up from 41% in the same quarter of 1984. That compares with highly unionized Eastern's labor expenses of 36% in second quarter of 1985, and 23% at Continental Air Lines, a nonunion company that pared its labor costs to the bone through Chapter 11 bankruptcy proceedings.

Delta has the chance in coming months to make some headway in labor negotiations. The pilots' union contract expired Aug. 31, 1985, and is in renegotiation.

Delta's board on May 1, 1985, appointed Whitley Hawkins senior vp-marketing, succeeding J.A. Cooper, who retired. At the same time, Delta promoted several system managers to directors, including Harry Dunham, director-marketing services; Al Kolakowski, director-field marketing; Charles E. Doherty, director-dining service; and Jenny R. Poole, director-inflight service.

E.I. du Pont de Nemours & Co., Wilmington, Del., which reported net income of $1.43 billion in 1984, up 27% from 1983, on sales of $35.9 million, up 1.5%, was the nation's 79th largest advertiser.

Estimated total U.S. advertising was $91 million, up 18.2% from a restated $77 million in 1983. Of the total, measured advertising increased to $57.2 million from $50.3 million in 1983.

Sales were down substantially in the second half of 1984 and continued to slide into the first quarter of 1985, forcing earnings down in the process. In the second quarter of the current fiscal year, Du Pont earnings dropped to $268 million from $437 million in the corresponding period a year ago, as sales dropped 6% to $8.5 billion.

During 1984, five of Du Pont's eight industry segments showed sales gains: Industrial and consumer products were up 11.2%, to $2.83 billion; polymer products rose 7.1%, to $3.64 billion; agricultural and industrial chemicals showed a 4.8% increase, to $3.7 billion; petroleum exploration and production was up 10.8%, to $2.07 billion, and coal sales increased 11.7%, to $1.57 billion.

Sales losses in almost identical percentages were experienced in biomedical products, down 2.4%, to $1.03 billion; fibers, down 2.4%, to $4.66 billion, and petroleum refining, marketing and transportation, down 2.3%, to $16.42 billion.

Du Pont fibers accounted for the biggest part of the corporation's $57.2 million in measured 1984 advertising. Antron fibers, used in carpets and wearing apparel, drew $8.5 million in measured advertising, up 16.4% from 1983. About $2.3 million was spent in tv and radio for the products; the remainder was in magazines and newspaper supplements.

Du Pont's Dacron fibers drew $3.6 million in measured advertising in 1984, down almost 22% from 1983. All the 1984 Dacron advertising was in magazines and newspaper supplements.

Another big advertising category was Du Pont's Lycra fabrics, with $3.5 million in measured advertising, again all in magazines and supplements. Lycra advertising was down almost 35% from 1983. A general fabric category, which includes Jantzen and Sea Fashions of California brands, drew slightly less than $2 million in advertising, up 33% from 1983.

Other large advertising expenditures in 1984 were Silverstone cookware coatings, $8.8 million, up 17.3%. Of that total, $4.1 million was generic tv advertising, with the remainder magazine ads for specific Silverstone-coated products such as Bake King, Mirro and Regal Ware.

Du Pont's Teflon products accounted for $2.9 million in advertising expenditures for carpeting protectors, coatings and stain repellents, all but $78,000 of that was in magazine ads. Expenditures for Remington Arms, a subsidiary of Du Pont, dropped 32% to $359,300.

For years one of nation's largest corporate-image advertisers, Du Pont spent $9.3 million in that category in 1984—99% of it on tv—a 24% increase over 1983.

Over-all in 1984, Du Pont spent $27.4 million in magazines, $22.5 million on tv, $2.2 million in radio and $4.1 million in farm publications. Network cable expenditures increased 58% to $152,000 in 1984.

F.G. Smith, manager of Du Pont's industrial accounting section, says the $33 million in unmeasured 1984 advertising included prizes, premiums, promotions, trade shows and salaries for advertising staff. Among specific expenditures in 1984 in this category were $10 million for trade shows and $11 million for technical literature for corporate customers, he says.

Like many other large companies that once dealt almost exclusively in chemical products, largely a no-growth industry in the past five years, Du Pont has been diversifying.

In 1981, Du Pont paid $7.8 billion for Conoco, a petroleum company, a move that drew criticism among industry analysts. But Du Pont has reduced its debt ratio to 25% from 42% since 1981, at the same time investing $12.5 billion in capital products, petroleum exploration and r&d. Last fall it opened an $85 million life sciences complex near Wilmington, a new biotechnology development facility at Glasgow, Del., and a new biomedical research laboratory in Billerica, Mass.

More than 50% of Du Pont's businesses are specialty products; it has been regularly buying into electronics and biotechnology companies.

In 1984, Du Pont was licensed by the University of Pennsylvania School of Medicine to develop and market an artificial blood product patented by the institution. The product could be on the market within three years.

New areas in which Du Pont is advertising heavily include a $1 million tv and radio campaign for a new stretch polyester fiber called Denimotion and a radio and tv campaign keyed to Detroit designed to persuade auto designers to abandon steel in favor of a new generation of plastics in automotive bodies. Developed by N W Ayer, New York, the tv commercials show the use of Du Pont thermoplastic auto body parts in the Pontiac Fiero and other cars. Spots carry the theme, "For quality in automotive development."

The $2 billion-a-year automotive plastic market will increase to some $10 billion by the year 2000, Du Pont executives forecast.

Eastern Air Lines, long considered an endangered species, is flying high as it makes its way back to record profitability in 1985 after five consecutive years of losses. But Miami-based Eastern, the nation's 99th largest advertiser in 1984, still may be in for a bumpy flight in the hotly competitive market for air passenger travel, analysts say.

Eastern's estimated ad spending in 1984 fell 14.4% over-all to $60.8 million, including $53.5 million in spending in nine measured media. The biggest cut in measured spending was for newspapers, which fell 18% to $18.7 million.

The largest percentage cut was for network tv, dropping 58% to a measured $3.8 million as Eastern shifted its advertising strategy to bolster traffic in spot markets, a company spokesman says. Measured spending for spot tv increased 30% to $15.9 million in 1984, but spot radio fell 32% to $5.7 million in 1984.

The year 1984 was a watershed financially for troubled Eastern, with $4.36 billion in revenues, up about 10% over 1983, a year characterized by bloody fare wars between major carriers and upstart low-cost airlines.

Eastern's $189.6 million in operating profits for 1984 was the highest in its history, and compared with an operating loss of $100.1 million. Despite this performance, however, Eastern took a net loss in 1984 of $37.9 million, which still was a vast improvement over its net loss of $183.7 million in 1983.

First-half performance in 1985 was significantly improved with total revenues of $2.5 billion, up 13% over 1984. Net income in the first half of 1985 was $49.8 million, compared with a net loss of $52.3 million for the same period in 1984.

But Eastern's net income in the first half of 1985 was even better than reported figures would indicate, considering Eastern deducted $72.5 million in profit sharing before arriving at the $49.8 million figure. During labor negotiations, Eastern granted profit sharing payment if 1985 earnings exceeded $90 million.

Under cost-saving agreements, which Eastern said it needed to avert bankruptcy, most employes gave up 18% to 22% of their pay in exchange for 25% of Eastern's common stock, according to company reports. Employes also received 3 million shares of junior convertible preferred stock and representation on the board of directors. The wage agreements gave Eastern a $290 million improvement in operating profits in 1984.

Because Eastern made provisions in mid-1985 to disburse profit sharing funds, its earnings for 1985 are expected to well exceed the $90 million target, analysts say. Earnings in 1986 will not be hurt because the dispersement is for one year only.

Eastern's 1984 advertising focused heavily on its 38,400 employes, emphasizing their service and commitment, expressed in the theme: "We earn our wings every day."

Another important reason for Eastern's increased profitability is record-setting U.S. domestic and international passenger traffic. Experts say discount fares have stimulated discretionary air travel. Salomon Brothers, New York, estimates over-all domestic traffic growth for the industry through 1985 could reach 12%.

Industry capacity growth also has lagged traffic growth, resulting in increased load factors of more than 5% per month for the months March through July, 1985. Eastern's traffic in July, 1985, for example, was up 17.5% over July, 1984. The added traffic outstripped Eastern's capacity increase of 9.8% in 1985, increasing its load factor 4.2% over July, 1984.

At the same time, however, Eastern's passenger yield, a measure of average revenue from flying a paying passenger one mile, fell 2% in the second quarter of 1985. This followed an industrywide downward trend in yields during the first half of 1985, especially in the second quarter when many carriers matched fare reductions introduced by United Airlines as it sought to recover from its 29-day strike in May and June, 1985.

While Eastern's domestic market share in the first half of 1985 remained virtually unchanged at 11.3%, the number of passengers systemwide increased to 21.3 million in the first half of 1985, up 12% over the same period in 1984. United's market share dropped to 14.4% from 18.6% over the same period, according to First Boston Corp., New York.

For the industry as a whole, the percentage of passengers flying on discount increased from 77.6% in January, 1984, with an average discount of 48.1%, to 84% in June, 1985, with an average discount of 55.2%, according to Salomon Brothers. But the rising number of discount fares, in some instances, had a positive effect on earnings as a result of innovative marketing.

Eastern, for example, introduced in late 1983 its "Get-Up-And-Go" passport for senior citizens, which sold for $1,199 and allowed unlimited travel between 100 mainly domestic Eastern cities as often as once a week. The program generated millions in revenue for Eastern, which announced its continuation in 1985, with international travel options through British Airways, El Al, Air France, Alitalia and Eastern's Latin American service.

Route restructure and yield management, which help to make the most of limited resources, also played a role in Eastern's improved performance. For example, in the Houston market, where Eastern competes heavily with Houston-based Continental Airlines, the nation's largest low-cost carrier, Eastern in 1984 announced a 50% reduction in operations. Eastern cut daily flights from 36 to 20, and reallocated 12 aircraft to its more profitable Atlanta hub, where it added 35 flights and service to four cities.

This paid off in the northeast-to-Florida markets, where it competes heavily with low-cost People Express and with Delta Air Lines. Eastern in 1984 matched People's fares, and increased capacity in this market by 23% in 1984, strengthening its dominant position.

In scaling back scheduled service in Houston, Eastern found a way to compete with low-cost carriers' fares, and to capitalize on its passenger and cargo handling strengths there through an agreement with CF Airfreight, a Palo Alto, Cal.-based subsidiary of Consolidated Freightways. Eastern also began April 1, 1985, providing overnight freight delivery to and from 10 U.S. cities and its Houston hub, and no-frills, low-cost passenger service that it calls "Moonlight Special."

Using seven wide-body A-300 Airbus planes, Eastern is able to offer the aircraft's 252 seats at almost pure profit, covering operating costs with the freight-hauling agreement. Load factors for the new service have been running about 90%, company sources say. Another advantage of Moonlight Special is that it taps into price-sensitive markets without drawing heavily from higher-yield business travelers.

In the important business passenger

segment, Eastern nearly doubled membership in its Frequent Traveler Bonus Program to 1 million members in 1984 with added incentives and a membership drive. Eastern expanded the program to include travelers using Trans World Airlines, British Caledonian, Aer Lingus, SAS, CP Air, 11 commuter carriers, plus Hertz Rent-A-Car, General Rental and Marriott Hotels.

Eastern also wooed vacation travelers in 1984 with "See Your Way Clear" vacation packages designed to increase off-peak travel to the Caribbean. The attractively priced vacations included airfare and land arrangements utilizing a three-zone pricing scheme for travelers originating in the East, Midwest and West.

Eastern's international routes were bolstered in July, 1985, when Eastern began service between Miami and London, a route previously operated by now defunct Air Florida.

Eastern Airlines also benefited in 1984 by a 27-day strike at Pan American World Airways in February and March, 1985.

International air travel, however, is an area of concern to securities analysts. While industrywide international traffic in the summer of 1985 experienced double-digit growth rates, capacity increases exceeded traffic additions, and load factors (percentage of seats filled) fell 2.5%, with a corresponding drop in earnings. Trans-Atlantic traffic is projected to fall in 1986 by 5% because of a weakening U.S. dollar.

In other developments at Eastern, a major reorganization of senior management early in 1985 gave Joe Leonard, formerly senior vp-operations service, responsibility for day-to-day operation of the company.

It was the first indication of a possible successor to Frank Borman, chairman, president and ceo. Mr. Borman, 57, said he is turning his full attention to strategic and external issues affecting the long-term course of the airline.

Mr. Leonard left American Airlines in April, 1984, to join Eastern as vp-operations services and was promoted to senior vp in January, 1985. Other possible successors to Mr. Borman are members of the newly created office of the chairman, including Morton Ehrlich, senior vp-planning, and Wayne Yeoman, senior vp-finance.

Other appointments Aug. 1, 1985, included John Nelson, senior vp-marketing; G.J. Brennan, vp-passenger sales, and R.F. Blake, vp-marketing, planning and research.

Also noteworthy was the departure in mid-1985 of Russell Ray, former senior vp-marketing, to PSA Airlines.

Mired in a mature market for photographic products, Eastman Kodak Co., Rochester, N.Y., underwent fundamental change in 1984 as it sought new opportunities in electronic imaging and information handling.

The company was the 24th largest national advertiser in 1984 with an estimated $301 million spent in the U.S. on advertising and promotion, up 10.2% over a restated $273 million in advertising and promotion in 1983. Worldwide, Kodak spent $430 million in 1984, compared with $390 million on advertising and promotion in 1983, according to the company.

While still deriving 80% of its $10.6 billion in 1984 sales from photographic products, Kodak began focusing on high technology in 1984, consumer and commercial electronic products and magnetic media. Their growing importance was indicated by a restructure early in 1985 of the huge photographic division, breaking operations into product lines handled by 17 operating units, each with profit-and-loss responsibility. Kodak also created a venture capital review board to stimulate fast entrance into new markets.

The renamed Photographic and Information Management division signals Kodak's decision to place development of new business on an equal footing with film sales, Kodak's cash cow, analysts say.

"What they are doing is trying to have more entrepreneurial groups so they can move into high technologies much more quickly than in the past," says Eugene G. Glazer, securities analyst with Dean Witter Reynolds, New York.

"They want to become a lot more flexible," agrees Peter Enderlin, of Smith Barney, Harris, Upham, New York. "They're looking for products with shorter life cycles, and they are trying not to do everything internally."

Kodak's centralized, vertical integration, which traditionally has controlled every step in manufacture of a product, to the extent of making the plastic in camera housings, limits its ability to compete in fast-paced markets, Mr. Enderlin says. The company needs to further trim personnel, decentralize and hone the ability to react quickly in new markets, he says.

Mr. Glazer says Kodak hasn't much choice but to pursue new opportunities if it hopes to meet its eventual goal of 20% annual growth. Its huge market share of amateur color film leaves little room for growth. Partly for this reason, average return on assets has slipped from 20% in the late 1970s to 7.5% in 1983 and 12.6% in 1984.

Although 1984 was a strong year for earnings, the anticipated lukewarm followup in 1985 points up weakness. Sales in 1984 were $10.6 billion, up 4% from 1983, with net earnings of $923 million, up 63%. Sales for the first half of 1985 were $4.58 billion, down 2% from the same period in 1984, with net earnings of $279.5 million, down 28%.

Colby Chandler, chairman-ceo, and Kay Whitmore, president, attributed the declining 1985 results mainly to the adverse impact of the overvalued U.S. dollar, coupled with depressed selling prices in the chemicals industry, among other factors.

Analysts recognize these conditions, but also point out the increasing competition and Kodak's reliance on sales of amateur film and cameras as other problems. Competition, for example, forced Kodak to hold steady on film prices in the first half of 1985 and offer a 3% dealer rebate on sales exceeding 1984 levels, Mr. Enderlin says.

Such wariness for a company with an estimated 80% to 85% market share of amateur color film reflects concern about competitors, such as Fuji Photo Film Co., which is believed to have a 9% market share, and Agfa-Gavaert, 3M and Konishi Roku, which are thought to control about equal shares of the remaining 10% to 12%.

Kodak's new marketing directives had an impact on 1984 ad spending. Measured outlays for amateur film fell 21% to $32 million in 1984, 66% of which was for network tv, 20% spot tv, 9% magazine, and 5% network radio and outdoor. However, measured spending for instant cameras and film received $12.5 million in 1984, divided roughly 80% network tv, 20% magazine. The spending was nearly quadruple 1983 introductory levels.

Kodak's measured media boomed for product categories in markets with fast growth potential, such as office automation, consumer electronics and commercial imaging systems. Measured spending for copiers, for example, jumped 67% to $3.4 million. Kodak also announced plans in mid-1985 to introduce electronic publishing and image management systems, further evolving its base from photography to imaging.

An acquisition binge that began in 1981 has brought five new subsidiaries into the corporation, making ink-jet printing systems, electronic publishing and magnetic data recording systems. Kodak executives say these acquisitions and others may be necessary to acquire technology not available in-house, or to buy market share that would be hard to build.

An example of the latter is Kodak's entrance into the $4 billion market for floppy discs with its March, 1985, acquisition of Verbatim Corp., Sunnyvale, Cal., for $174.5 million. Verbatim, the market leader, has an estimated 18% share, about equal to Xidex Corp. Next are 3M, Hitachi and Maxell, each with 10%-plus market-share, analysts say.

The move puts Kodak well ahead of archrival Polaroid, which also aggressively entered the floppy disc market in 1984. Kodak and Polaroid are keen on the technology because the product increasingly will be used to store photographic and electronically produced images.

Videocassettes represent another new market for Kodak with introduction in 1984 of half-inch tapes in VHS and Beta formats. Measured 1984 spending for Kodak videocassettes vaulted to $7.5 million. Analysts say Kodak, with its far-flung distribution system and its image as America's premier picture-taker, is positioned to dominate the $500 million market, although its market share is now estimated to be less than 10%.

Kodak's videocassettes are made by TDK Corp. of America, but analysts speculate manufacturing will be brought in-house. Once again, Polaroid, which introduced half-inch videocassettes in 1984, is a key competitor.

Kodak also attacked the consumer electronics market with its "camcorder," an 8mm camera/video recorder unit introduced in September, 1984, which received only $1.2 million in 1984 measured media, but is expected to blossom in 1985. The product is manufactured by Matsushita Corp. McCann-Erickson, New York, received the advertising assignment.

Kodak is encountering tough competition in the fledgling camera/recorder business from Sony Corp., RCA and General Electric. The latest development in spring of 1985 was introduction of 8mm videocassette recorders by Kodak and Sony with digital stereo sound, indicating evolution beyond simple picture-taking/playback devices.

Kodak apparently is having difficulty cracking the sagging instant camera and film market. Polaroid dominated the market in 1984 with sales of 3.6 million cameras, down 5.6% from 1983. Annual unit sales of instant cameras have fallen dramatically from their peak of 9.4 million units in 1979. Analysts attribute the problem to a saturated market and consumer preference for better-quality photos from 35mm cameras.

Kodak announced in March, 1985, plans to produce a 35mm unit in a joint venture with Chinon Industries of Japan, a technology partner. However, analysts doubt the camera will see U.S. introduction because of competition at mid- to high-price points, and because it would erode sales of Kodak's other cameras at lower price points.

Other major measured spending in 1984 included $6.2 million for photographic paper, mostly in network tv, which was unchanged from 1983 levels.

Kodak also had measured spending of $30 million, mostly network and spot tv, for several new disc cameras and new color disc film, down 3% from 1983.

Ford Motor Co.

RANK 8

Dearborn, Mich.

($ figures = 000,000)

Worldwide	1984	1983	% chg
Sales	52,366	44,455	17.8
Net income	2,907	1,867	55.7
U.S.			
Sales	36,788	28,375	29.6
Operating profits	2,391	1,516	57.7
Advertising	559	484	15.5

Ford Motor Co., Dearborn, Mich., which in 1983 recorded the largest turnaround from a loss position in U.S. corporate history, built on that strong performance in 1984 as it increased U.S. advertising spending by 3.8%, to $559.4 million, over the previous year.

Ford, the 8th largest national advertiser, posted worldwide earnings of $2.91 billion, up 55.7% from 1983. Worldwide sales rose 17.8% to $52.4 billion.

The increase was a result of higher unit sales and an increased mix of larger vehicles.

In the U.S., net income was $2.4 billion, compared with $1.5 billion in 1983. The company's 1984 U.S. car market share improved to 19.2%, a 2% surge from 1983 and Ford's highest share since 1979. General Motors share was 44.6% and Chrysler's 10.4%.

Ford is expected to build on that market share in 1985. In the first half there was heavy selling of Tempo, Topaz and Escorts although profits were reduced because of financing programs. Such stepped-up marketing costs added to a higher tax rate (38% in 1985 vs. 27% in 1984) contributing to a 23.1% drop in second-quarter income to $699 million. Sales slipped in the quarter 1.3% to $13.8 billion on factory sales of 1.45 million units compared with 1.51 million a year earlier.

Outside the U.S., net income during 1984 rose 47% to $516 million because of higher earnings in Canada and the Asia-Pacific region and reduced losses in Latin America. In Europe, 1984 profits declined even though Ford was the car sales leader there for the first time. The decline reflected higher marketing costs and a less profitable mix of vehicle sales. Analysts say Ford, like General Motors, "bought share" with lower prices.

Ford channeled virtually all of its increased ad spending into factory contributions to dealer advertising associations: Groups of dealers in individual markets that pool advertising funds to promote special sales or ongoing events and are usually big enough to hire their own agencies.

Ford and Lincoln-Mercury divisions plan special projects with various dealer associations and typically contribute $1 for every $2 or $3 the dealer groups put up.

Ford's direct factory media spending actually dropped $2.06 million in 1984 to $477 million, which can in part be traced to less rebate and low-cost financing advertising and fewer new products than in 1983. Ford division factory advertising was virtually unchanged at an estimated $297 million and L-M rose 15% to an estimated $115 million.

But Ford division contributions increased to an estimated $59.4 million from $45 million in 1983, and L-M rose to an estimated $23 million from $16 million in 1983. Cars in the Ford division recorded some of the larger measured media totals, according to the six-media monitored by Leading National Advertisers—Escort $17.5 million, down 11% from 1983; Ford LTD $13.9 million, up 10.3%; Ford Mustang $14.8 million, up 59%; Ford Tempo $28.1 million, up 1.8%.

Ford sold 1,979,317 cars in the U.S. in 1984, up 26% over 1983. Ford division, which accounted for 1,300,644 units, showed a unit sales increase of 22.7% over 1983. L-M sales reached 678,673 units, up 32.8%.

The Ford Escort continued to be the company's top seller with 353,578 units sold in 1984, reflecting an 8.4% increase over 1983. The Lincoln Continental, however, showed the greatest unit sales increase—up 127.2%—with 31,110 vehicles sold.

Ford also sold 1,166,715 trucks in the U.S., the greatest volume coming from pickups and the Ford Ranger with unit sales of 540,885 and 220,687, respectively. The largest increases were in heavies, up 59.1%, and the Bronco II, up 55.2%.

Ford has been on the diversification path since 1983 and has had the cash to do so. In 1984, Ford purchased a 70% interest in the California-based Starnet Corp., a commercial telecommunications company. In 1985, Ford made a bid for Hughes Aircraft Co., El Segundo, Cal., but lost out to GM.

In July, Ford Motor Credit Co. formed a heavy equipment leasing company and Ford agreed to purchase for $493 million First Nationwide Financial Corp., San Francisco, the ninth largest U.S. sales & loan, to diversify its financial services. Ford also announced it will spend $20 million for a minority interest in American Robot Corp., Pittsburgh, and it has an agreement with General Electric to jointly develop a fully automated operation to produce electric motors.

During 1984, Ford increased its measured advertising 4.5% to $387.4 million. In doing so, it boosted newspapers 25% to $62.1 million; magazines 21% to $97.1 million; network cable 33% to $6.9 million, and spot tv 5.4% to $39.5 million. However, it cut spending in three media—network tv by 4.7% to $164.3 million, spot radio 17% to $10.8 million and network radio 79% to $1.5 million. Outdoor and farm, both minor media for the agency, remained stable.

Ford got into advertising hot water in April, 1984, when BMW of North America sued Ford for a comparative magazine ad, via Wells, Rich, Greene, Detroit, that said the Ford Thunderbird Turbo Coupe "outhandled" the BMW 633CSi. The case was settled out of court when Ford agreed to drop the ad.

In early 1984, Ford division asked for magazine concessions of rate, position and circulation guarantees in return for guaranteed ad spending. Response was "almost 100%," says Charles Schneider, ad media analysis manager. Newsweeklies that refused to go along with rate-freeze guarantees lost ad pages.

In June, Ford decided to extend the program into 1985. However, several publications rapped the division for "rate busting" when Ford asked for increased emphasis on multiyear rate protection and less on merchandising awards. Ford's 1985 magazine planning requests included a positioning package and "discounts, network pricing and multiyear commitments." The division also cut 31 magazines from its 1985 new-car announcement quarter. Instead it went with spreads that cost twice as much as single-page units, reducing the number of insertions.

Ford's tv media strategy in 1984 called for buying total or partial exclusivity on high-profile tv events. Network tv ad spending for the year dropped 4.7% to $164.3 million, however, as the company swung to what it considered better values in magazines, newspaper, network cable and direct mail.

In November, the company closed a deal with ABC-TV, snagging the domestic auto sponsorship of the 1985 Super Bowl after GM's Chevrolet division relinquished it. The $10 million package buy included the Super Bowl sponsorship as part of a prime-time big-events package rather than a standalone sports buy. It also included $7 million in time on the fall, 1985, ABC 10-hour Civil War miniseries, "North and South."

Ford also bought U.S. auto exclusivity on NBC's 1984 World Series coverage.

With the relaxing of car import restrictions, Ford began gearing up for the import deluge in 1985. In January, it introduced the Merkur XR4Ti, known as the Sierra XR4 in Europe, with projected first-year sales of 12,000-14,000. The sporty coupe is imported from Germany and marketed by L-M. By 1990 Merkur will market four import models based on three different platforms. Ford has projected 100,000 Merkur annual sales by 1990, but later revised that figure downward.

Ford continued plans to import into the U.S. and Canada a car built in Mexico by Ford and its Japanese affiliate, Mazda. It, too, will be marketed by L-M and may replace the Mercury Capri in the next few years. An Australian version is called the Telstar and is similar to the popular Mazda 626.

Ford plans to market an undetermined portion of the small cars that Mazda will begin producing in 1987 in a former Ford plant in Flat Rock, Mich. Ford also plans to import a minicar made by Korean manufacturer Kia for North American marketing beginning in the 1988 model year. Importing the Korean car will be a joint venture with Mazda, of which Ford owns 25%.

In February, 1985, Ford underwent upper management shifts. Philip Caldwell retired as Ford chairman-ceo and was succeeded by Donald Petersen. In the same move, former exec vp Harold Poling was named president-chief operating officer, replacing Mr. Petersen.

Top officials quickly went to work to shore up the bottom line, announcing a plan to cut the white-collar work force on the auto side by 20%, or 10,000 workers, by 1990. Cuts, to be made primarily through attrition, a retirement incentive program and voluntary termination plan, are designed to hold costs down and make Ford cars more competitive. Such payroll reductions are not without precedent in the industry. Chrysler pared its white-collar work force in half during its crisis period between 1979 and 1982.

In other management moves, Thomas Page's retirement as exec vp-diversified products operations triggered other changes: Mr. Page was succeeded by Philip Benton Jr. Louis Lataif succeeded Mr. Benton as vp-sales operations for North American automotive operations. Robert Rewey succeeded Mr. Lataif as vp-general manager, Ford division. Thomas Wagner replaced Mr. Rewey as vp-general manager of L-M. Ross Roberts succeeded Mr. Wagner as general marketing manager, Ford division. Edsel Ford II succeeded Mr. Roberts as general marketing manager of L-M division. John Vanderzee succeeded Mr. Ford as ad manager of Ford division. And Thomas Ryan Jr., former manager at Ford's Houston district sales office, replaced Mr. Vanderzee as ad manager of L-M.

In April, 1985, Ford signed a multiyear deal with ABC Sports for sponsorship of "Monday Night Football," breaking the domestic-auto-exclusivity hold that Chevrolet has had for years. Under an alternating arrangement. Ford and Nissan will share a game, and the next Monday Chevrolet will be the exclusive auto sponsor. Ford also became a major sponsor of NBC-TV's Major League Baseball coverage.

Meanwhile, ads for Ford division continued to aim at the young, upwardly mobile professional market with messages attuned to the group's life style. Ford used youthful personalities such as football stars John Riggins and Joe Montana and skater Dorothy Hamill. A magazine ad for Ford's lineup of station wagons used clothing sizes to describe "Ford people carriers."

To further attract these young professionals, Ford began testing computerized "selection centers" in dealerships. The division will install the system in 1,500 to 2,000 dealerships in the 1986 model year if successful. The selection center also is part of a larger Ford program exploring other potential sales methods, including satellite dealer showrooms, telemarketing and direct-computer ordering.

On the Lincoln-Mercury side, three cars got most of the spring attention in 1984: Cougar for a sales success, Topaz to strengthen brand awareness and Mark VII because the luxury car was new for the model year. The Cougar got $20.9 million in measured spending, down 12.6%; Topaz $22.9 million, up 16.8%, and Mark VII $14.1 million (for all Continentals), up 90.5%.

With the fall introduction of 1985 cars, L-M took a five-state "complete car" test program national. The "complete car" has some optional equipment standard or available in packages, with option availability severely reduced. It is expected to be companywide by 1987. The idea was part of Ford's marketing thrust to cover new segments of the market "that seem to be identified every six months," said Philip Benton, then vp-sales operations, North American Automotive Operations.

L-M singled out only those vehicles with aerodynamic designs for company media spending for model year 1985. The stars under the Mercury label were Cougar, Cougar XR7 and Topaz. For Lincoln it was the Continental Mark VII LSC. All others were banished to dealer group ad efforts, except for the Mercury Capri, which received virtually no ad spending.

Music from the 1960s dominated ads. A Topaz ad cut between a young couple at a drive-in and the same couple, married and with children, returning to the drive-in. Merkur ads compared it to Audi, BMW, Saab and Volvo. A Cougar commercial showed a male baby boomer fleeing his office for a driving vacation "out on the highway looking for adventure." Mark VII took on Mercedes-Benz with "judge it by the competition."

In early 1985, L-M ads took after young buyers. L-M said it had intentions on capturing 10% of the U.S. new-car market by 1990. It used Beatles music as part of this ambitious effort and broke four 60-second commercials during CBS' Grammy Awards telecast that were designed to start forging emotional links between Mercury cars and younger buyers. The Beatles song "Help" played over one spot as 30-ish actors scattered in their Mercurys on a scavenger hunt for surfboards, hula hoops and old-fashioned Yellow Cab caps. A Topaz ad was pitched to "Be My Baby" as a father loaded two preschoolers into the car for a trip to the hospital, where mom is a doctor.

In June, 1985, L-M decided to delay until the 1990s plans to capture that full 10th of the U.S. market. Instead it focused on splitting L-M into three separate brands: Lincoln, Mercury and imported Ford of Europe Merkur. While dealers would still carry all three lines, each would get a separate umbrella campaign. L-M expects to distinguish Merkur as a brand name before it brings over the Scorpio from Europe.

Ford trucks continued to be "built Ford-tough." However, Ford quit running ads showing its Ranger pickup truck being parachuted from airplanes or over cliffs. Instead, the 1985 model Rangers went to the moon. Ads for the compact Ranger show the truck handling city potholes with the line, "Some of the roughest roads aren't in the mountains but on city streets, perhaps your street." Ford spent $40.3 million in measured media on trucks, down 7.4%, placing $15.3 million of that behind Ranger, down 33.5%, and $4.8 million in support of Bronco, down 20%.

In spring, 1985, Ford prepared for the fall introduction of its 1986 Aerostar minivan. Ads for the "yuppiemobile" positioned the Aerostar as a second personal-use vehicle for young families. They also stressed ease of driving for women and versatility for recreation. Aerostar will get an initial ad push of $20 million, and Ford expects calendar 1985 sales of 50,000.

Both Ford and L-M began gearing up for the November, 1985, debut of the high-volume, midsize front-wheel-drive 1986 models Ford Taurus and Mercury Sable, with projected 400,000-unit first year sales. Other future products include a U.S.-built small car, code-named Alpha Project to compete with GM's Saturn, aimed at competing profitably with Japanese imports; an on-demand, four-wheel-drive option for its Tempo-Topaz compacts, and a turbocharged engine for a Beatrice-sponsored Formula One team for the 1986 Grand Prix season.

General Electric Co., Fairfield, Conn., the 37th largest national advertiser, increased its U.S. advertising by 3% to an estimated $202.4 million as sales in 1984 showed narrow gains of 4.3% to $27.95 billion.

Earnings, however, showed a substantial increase of 12.6% to $2.28 billion.

But earnings, too, have slipped in the first part of 1985. Second-quarter results compared with the year-earlier period show earnings increasing 1.9% to $590 million and sales advancing 2.7% to $6.84 billion.

GE in the second quarter of the current fiscal year also paid the U.S. government about $2 million as part of a fine and payback required after the company pleaded guilty in May to defrauding the Air Force. GE had allegedly filed false claims for payment on a missile contract.

GE holds a 3.5% share in dollars of prime government contracts valued at $4.52 billion, ranking it fourth behind General Dynamics, McDonnell Douglas and Rockwell International, in that order. GE, indicted for the alterations in March, 1985, was immediately suspended from receiving new military contracts, but that suspension was lifted in April for all divisions but its space division, a minor government contractor.

During 1984, the company tuned up for a number of new entries in the consumer products and small appliance segments. It introduced an automatic shutoff iron and spent an estimated $5.8 million touting its line of highly featurized phones.

Company chairman John Welch Jr. also was reported as saying the company might discontinue manufacturing tv and audio products or even pull out of the consumer-electronics business. However, subsequent published reports indicate GE instead might carve up its consumer electronics business into a smaller, more manageable business, or that the company could merely become a distributor of products manufactured to GE specifications.

During 1984, the largest increase in measured media appeared in spot tv, where spending went to $7.8 million from $4.5 million in 1983. The largest cut came in magazine spending where it fell to $8.5 million from $13.1 million in 1983. The company also began to dabble in network radio, spending $75,000 in the medium.

GE products receiving most advertising attention in 1984 besides home telephone included color tv sets backed with $6.7 million in advertising, up from only $406,000 in 1983; major appliance (nonspecific) advertising of $7.4 million, up from $1 million; rechargeable battery system, $3.2 million, up 14.3%; refrigerator and freezer $5.1 million, up from $927,700. Home light bulbs dropped 24.8% in advertising to $7.6 million; dishwashers fell 42.9% to $3.6 million, and general promotion dropped 17.7% to $6.5 million.

GE acquired new businesses in 1984 and sold a number of properties. It acquired Employers Reinsurance Corp. for $1.1 billion and entered partnerships with Ungermann-Bass, a company that makes networks for everything from personal computers to mainframes, and Coherent Inc., involved in laser technology, supporting its industrial electronics segment.

GE entered new areas of businesses: Ceramics for the electronics packaging market; and a graphics processor venture—a highly leveraged means of substituting silicon for software in image generation.

The company created a new affiliate, General Electric (U.S.A.) China Co. Ltd., designed to serve as the focal point for all GE business activities with the People's Republic of China.

At the same time, the company completed the sale of Utah International, its natural resources subsidiary, to Broken Hill Proprietary Co. Ltd. in April, 1984; sold its housewares business to Black & Decker for $300 million in April, 1984, and sold its Family Financial Services, a second mortgage subsidiary of General Electric Credit Corp., to the Philadelphia Saving Fund Society. In total, the three divestitures were valued at $3.3 billion.

Also, late last year, GE agreed to merge its General Electric Cablevision Corp., its cable tv subsidiary, into a wholly owned subsidiary of United Artists Cable TV unit, United Artists Cablesystems Corp. Under the agreement, GE received $132 million plus 37% of the stock of United Artists Cablesystems.

During the third quarter of 1984, GE introduced HomeMinder, a space-age device that makes it possible for the user to control household lights, heating, cooling and appliances through a tv set. HomeMinder is available in two models. For $1,300 the consumer gets the top-of-the-line GE tv set equipped with the system. The HomeMinder module, which resembles a videocassette recorder and connects to an existing tv set, can be purchased for $500. BBDO, New York, is the agency.

Last year, GE introduced its Automatic Shut-Off iron. Priced at about $60, the iron features an audible signal that beeps when the temperature selected by the user has been reached and when the iron has not been moved in 10 minutes. Print and tv via BBDO supported the introduction.

The company had an estimated 50% market share for irons when it was beaten to the market by Sunbeam's Monitor automatic shutoff iron. Sunbeam's share was expected to rise from 15% to 20%, stealing points from GE. Hamilton-Beach and Dart & Kraft's West Bend division joined the fray, with West Bend adding further heat by introducing an automatic shut-off iron that was also cordless.

Jumping headlong into the phone manufacturing fracas, GE spent $5.8 million in measured media, mostly network tv, pushing its line of new and revised highly featurized phones. The segment of the market for its sophisticated unit grew an estimated 2.8 million unit sales by the end of 1984, up 55% from the previous year—primarily the result of marketer and retailer advertising.

GE is providing additional advertising support to its appliance line in Mexico. Early last year it named J. Walter Thompson de Mexico to handle its $900,000 appliance account.

The company also shifted its major appliance business group account to Symon & Hilliard, New York, from BBDO. The account is estimated at $3 million.

In the industrial sector, GE's plastics group, Pittsfield, Mass., assigned its $4 million-plus account to Marsteller Inc., New York, from R T. Blass Inc., Old Chatham, N.Y.

On the corporation front, GE began an image campaign last fall on Screenvision Cinema Network, a service that places commercials in movie theaters before films are shown. The campaign, by BBDO, is aimed at young adults.

Also, GE reassigned its corporate business print advertising to Jim Johnston Advertising from Chiat/Day.

General Foods Corp., which has been rumored on Wall Street this fall as being a possible buyout candidate, ranked the 12th largest national advertiser in 1984 with estimated advertising of $450 million, a 13.2% increase over 1983.

The White Plains, N.Y.-based company plans to prime its ad budget with a 20% increase in 1985. The 1984 outlay pushed the company past the record $429.1 million it spent two years ago.

The heavier ad support accompanied worldwide sales of $9.02 billion, up 4.3%, for the fiscal 1985 ended March 30, as net earnings increased 2.5% to $324.9 million worldwide.

In mid-September of this year, GF was purported the subject of a buyout by Philip Morris Inc., the beer, cigaret and soft drink marketer. GF stock took off when it was learned that Philip Morris, viewed as a potential buyer of GF for several months, had arranged a $6 billion line of credit, presumably to make an acquisition. GF also was believed to be a target of Unilever N.V., which made a bid in mid-September instead for Richardson-Vicks, the Wilton, Conn.-marketer of personal care and otc drug products.

General Food's modest returns for fiscal 1985 felt the impact of several special items: The sale of the Gaines pet food division, a provision to restructure certain international operations and an accounting change relating to advertising/promotion costs of powdered drink mixes. Excluding these items, net earnings from operations were down 4.5% to $302.8 million. For the first quarter ended June 30, sales rose 0.4% to $2.27 billion, while net earnings increased 7% to $77.7 million.

While GF got out of the pet food business by selling Gaines to Anderson, Clayton & Co. for an after-tax gain of $59.8 million, the company expanded its operations with the $60 million acquisition of Oroweat Foods Co., a specialty bread company, and the $52 million purchase of Ronzoni Foods Corp., a pasta maker.

Although GF continues to reduce its dependence on the grocery coffee business, that division received the most measured media dollars last year at $87.9 million. Of that, the Maxwell House line received $29 million, including $17 million for a newly introduced decaffeinated version.

Leading both the ground and instant segments, regular Maxwell House coffee holds an 18.9% unit share of the ground market and 22.5% of the instant business. Maxwell House Master Blend holds an additional 8.7% of the ground segment, while Maxim has 2.4% of the instant.

GF did not limit its new product introductions to that line. Over the past 18 months, the company also has launched Yuban decaffeinated coffee, International Coffees with NutraSweet, and in a limited test, a line of premium ground items called the Maxwell House Master Collection. For consumers who prefer a full-flavored decaffeinated coffee, the company added Dark Roast to the Brim line.

With higher margins and greater growth opportunity, GF is committed to retaining the lion's share of the decaffeinated business.

The company invested $20 million in the International Coffee launch and by yearend held 1.9% of the instant segment. Brim, which has 4.5% of the instant market, also was supported heavily in measured media with $19 million. The brand holds about 2% of the ground segment.

Sanka, which pioneered the decaffeinated segment, held onto 10% of the instant market and 4.4% case share of the ground market. The line received $17 million in measured media backing.

Yuban, the only nationally marketed product in the premium category, was put on notice to gear up for a battle by the entry into test of a product, Gold Blend, from Nestle's Hills Bros. subsidiary. Yuban holds less than a 1% share of the instant and regular categories. It received $3.3 million in ad support last year.

Although disappointed by sales and earnings growth of beverages last year, the company still invested $63 million in measured media to support them. GF cited poor summer weather and a large number of competitive products as reasons for flat sales and a decline in earnings.

Although Kool-Aid was especially disappointing, the company invested $27 million in measured media in the line, adding new flavors and aseptically packaged cartons, called Kool-Aid Koolers. The powdered line holds an estimated 65% of the $800 million powdered beverage market.

During its first year of national distribution, Crystal Light, an adult powdered drink mix, received $20 million in measured media support. The brand already had achieved a 10% market share while in only 40% of the country and continued to perform well during its national rollout.

The company also invested $7 million in the restaging of Country Time lemonade mix, including a sugar-free version, and achieved close to a 5% market share.

In March, GF sold its Awake and Orange Plus frozen orange concentrates to TreeSweet Products for an undisclosed amount. Sales of the two brands exceeded $20 million.

In the separately considered orange/breakfast beverage category, Tang holds about an 8% share and received $8 million in measured media last year.

This year, GF began testing still another powdered drink mix called Diet Sun, with emphasis on the taste attribute of the diet beverage and its 10% juice content.

Desserts, led by the frozen novelty business, had a banner year. Projected to grow from $150 million in manufacturer dollars today to possibly $500 million soon, GF's frozen novelties now include Jell-O Pudding and Gelatin Pops as well as two test items, Fruit & Cream and Soft Swirl.

Pudding Pops were supported by $9 million in measured media last year, while Gelatin Pops received $13 million during their national rollout. Also in the division, Cool Whip whipped topping received $10 million in measured media support.

After years of declines, the gelatin dessert market received a shot in the arm from the introduction of Jell-O sugar-free gelatin, sweetened with NutraSweet. The product was backed by $12 million in measured media during its introductory year, a separate campaign from the $13 million invested in regular Jell-O gelatin. Also contributing to strong growth was the regular Jell-O pudding and pie filling line, supported by $11 million.

GF holds a major share of the frozen novelty market as well as the package dessert business.

In breakfast foods, GF has long struggled to remain a strong No. 3 in the $4 billion cold cereal market. Of the top 17 brands, accounting for 58% of the ready-to-eat cereal market, GF has only two, Grape Nuts and Post Raisin Bran. According to Paine Webber figures, these are the No. 9 and No. 10 brands, respectively, holding 3.3% and 2.9% shares.

With new products, the company has been most successful recently with Fruit & Fibre, which has grown to a 1.5% market share. This summer the company added two new flavors to the line using the same "tastes so good you forget the fiber" ad theme.

The company also has put into test Post Cheyenne corn cereal, with the theme, "Eat right to live right."

Of the $52 million spent to advertise Post cereals, $12 million each went into Grape Nuts and Raisin Bran and $10 million into Fruit & Fibre.

Other brands receiving between $2 million and $4 million each were Alpha Bits, Honeycombs, Pebbles, Strawberry Crunch and Super Golden Crisp.

The focus in GF's reorganized meals division is on future growth, although established brands continue to perform well. Stove Top stuffing mix, which holds more than 70% of the category, received $10 million in measured media. The division introduced a new container during the year that allows a flexible number of servings.

Shake 'n Bake coating mix, also a category leader, was supported by $8 million in measured media. Minute Rice, also a dominant brand in its category, received $9 million.

Although Birds Eye frozen foods—vegetables and fruits—had good growth, earnings were lower than expected because of heavy competition in the regular vegetable segment. Spending in measured media was about $9 million. Several new varieties of frozen vegetables with sauce were added to the line.

The division expanded its salad dressing business, adding Good Seasons Lite mixes and supported the line with $8 million in measured media.

The company is working on several projects that would put it in the growing entree business, both in frozen and refrigerated products as well as possibly shelf stable. At least one of those projects should end up in test market this year, the company said.

Although still a small business, Ronzoni pasta has been integrated into the Birds Eye division. GF plans to expand geographically as well as add frozen Italian entrees to the line. Spending totaled $2 million last year.

In processed meats, a business GF entered through the 1981 acquisition of Oscar Mayer, the company found niches in the difficult red meat market with bacon and cheddar cheese hot dogs and Stuffin' Burgers, the company's first entry in the frozen meat case.

Louis Rich processed turkey products turned in an excellent performance with volumes exceeding 15% over last year. The company says Rich processed turkey luncheon meats are No. 2 behind Oscar Mayer. Spending last year for Mayer totaled $12 million and for Rich, $13 million.

Although Entenmann's baked goods and Oroweat specialty breads did not receive heavy ad spending (less than $1 million each), the company has begun a major geographical expansion of these businesses.

Other areas of interest include specialty cheeses and direct mail distribution of specialty foods. The company began testing Beaux Villages cheeses in four markets and introduced via direct marketing Gevalia Kaffee, brought to the U.S. from the company's Swedish operations.

Last November, the company introduced a new corporate logo that began appearing on all brands and company communications. The symbol above the company name is a two-tone green leaf surrounded by a black band.

Several agency changes occurred during the year. Louis Rich products were moved to Ted Bates Advertising/New York from Tatham-Laird & Kudner, Chicago. Ronzoni pasta was assigned to Young & Rubicam, New York, from Firestone & Associates. Oroweat Foods went to Benton & Bowles, Los Angeles, from Foote, Cone & Belding, New York.

General Foods this month moved Tang and sugar free Tang orange drink mix to Ogilvy & Mather, New York, from Young & Rubicam as part of a move to reduce the number of agencies handling its beverage division.

*For calender 1984

General Mills, the country's 28th largest advertiser, increased ad spending 1.6% to an estimated $283.4 million in 1984 as measured ad spending went up 1.1% to $266.1 million.

Declaring its intent to "get back to basics," the Minneapolis company spun off or sold several of its operations this year. As a result, it showed a net loss in fiscal 1985 closing the end of May of $72.9 million on sales of $4.29 billion. The loss includes a charge of $188.3 million for discontinued operations. In fiscal 1984, the company earned $233.4 million on sales of $4.12 billion (restated from $5.6 billion to reflect discontinued toy, fashion and non-apparel specialty retailing operations).

In January, General Mills announced it would sell both its toy and fashion divisions with the hope of raising $750 million. By spring, the company had decided to spin off the two properties, leading to speculation that bids for the properties failed to meet expectations. General Mills plans to complete the spinoffs by the end of the year.

The new toy company will include Kenner Products, Parker Brothers games and Fundimensions, a unit selling model kits and Lionel trains. The company will be headed by Ronald Jackson, former president of Stride Rite Corp. and one-time president of General Mills' The Talbots division, and is expected to come onto the market at $7 to $10 a share. James G. Fifield, former exec vp-toy group, had been expected to head the company, but he resigned in June saying the position did not meet his personal career goals.

The toy group contributed $782.7 million in sales to General Mills in fiscal 1984 ended May 27, 1984, up 7.5% from fiscal 1983. At $72 million, profits were down 31.2%, a decline attributed to the soft market for videogame software. The company did not break out operating results of the toy segment in fiscal 1985.

In 1984, General Mills spent $25.6 million advertising Kenner Products, up slightly from $25 million in 1983, according to six-media LNA figures. The company spent an additional $6.5 million to advertise stuffed Care Bears, a product developed jointly with American Greetings. Sales for the bears exceeded $50 million in 1984, the product's first year on the market. Care Bear Cousins, a line featuring other stuffed animals, will debut in 1985. Measured ad spending for Parker Brothers games, books, records and tapes reached $13 million, $17 million less than in 1983, according to LNA. Advertising for Fundimensions products also declined to $883,500 in 1984, down 15% from 1983.

General Mills' fashion division had a tough time in fiscal 1984. Sales declined 4.7% to $587.4 million and operating profits dropped nearly 36% to $48.8 million. The company did not break out operating results for this segment in fiscal 1985. The 1984 fiscal results were attributed to a continuing slump at the company's Izod Ltd. unit, which produces classic knitted sportswear, a declining category. In November, 1984, the company announced plans to cut expenses at Izod by one-third, but by early 1985, the decision was made to divest that division.

The spinoff fashion company will be headed by Richard F. Kral, former exec vp-fashion at General Mills, and is expected to go public at $3 to $4 a share. The company spent $884,400 in measured media for Izod Lacoste in 1984, compared with $4.7 million in 1983, according to LNA. In addition to Izod, the new fashion company will include Monet jewelry and Ship 'N Shore separates.

Monet expanded its costume jewelry line in 1984 from classic, tailored pieces to more contemporary fashion designs. The unit, considered the fashion group's most promising, was supported with $700,000 in magazine ads and an additional $85,000 in newspaper supplements.

Demand for Ship 'N Shore moderately priced separates declined in 1984, but the company experienced some success with the Wyndham Collection, a line developed for distribution in J.C. Penney Co. stores. Ad spending for Ship 'N Shore products reached $268,000 in 1984, primarily in magazines, with some spot tv. The company spent $346,000 advertising the line in 1983.

In April, General Mills sold its Foot-Joy subsidiary, formerly part of the fashion group, to American Brands for $53 million. During 1984, the golf shoe and accessories unit introduced Ultra-Joy, a lightweight leather golf shoe. The company spent $2 million advertising Foot-Joy products in 1984, some 48% of that in network tv.

In July, 1985, the company sold its Lee Ward crafts retail operations to Munford Inc. for an undisclosed sum. The 46-store chain contributed $61 million to General Mills sales in fiscal 1985. The company also has decided to sell its 22-store We Are Sportswear chain and the 87-store Wallpapers To Go decorating centers. Also this summer, W.R. Grace & Co. agreed to buy the company's 27 Darryl's theme restaurants, and W.R. Grace's majority-owned El Torito's chain will buy General Mills' 25 Casa Gallardo restaurants. General Mills also is planning to sell its Good Earth restaurants.

The restaurant segment as a whole contributed $1.14 billion in sales and operating profits of $91.5 million in fiscal 1985, up 4.7% and 30.7% respectively. The operating profit figure was prior to redeployment of toy, fashion and several specialty operations.

The company is maintaining its presence in the restaurant market with Red Lobster Inn seafood restaurants. At the end of fiscal year 1984, the company had 367 company-operated Red Lobster restaurants in 36 states. A $104 million chainwide remodeling was completed, giving the restaurants oyster/seafood bars, salad bars and open mesquite grills—all additions based on consumer preference tests. Red Lobster advertising topped $30 million in 1984. In addition to Red Lobster, General Mills has maintained its 130-unit York Steak House chain, adding lighter meals to its menu of budget steaks.

General Mills acquired two properties in May, 1985, Leeann Chin's, a Minneapolis-based Chinese restaurant chain, and Vroman Foods, an ice cream novelties manufacturer and distributor based in Toledo, O. Ad agencies have not been assigned for the new units, and it is not known how General Mills' sales and spinoffs will affect advertising for other brands.

Analysts generally applaud General

Mills' decision to play to its strengths by concentrating on package foods. Clinton O. Mayer III, a food industry analyst with Bear, Stearns in New York, says the company is looking good. "Everything is finally in order, the problem areas of the past year have been dealt with, and they have paved the way for future growth," he says. "I think we're going to see some good numbers there."

Mr. Mayer says General Mills always has done well with its cereal business and he expects even better results in that category now that the company will be "devoting even greater energy to it." He also predicts more intensive promotion in the cereal area.

The consumer foods segment, by far the largest business segment at General Mills, had sales of $2.77 billion, up 2.1%, and operating profit of $265.6 million, down 3.5% from $275.3 million in 1983. The operating profit figure was taken prior to redeployment of toy, fashion and several specialty retailing operations.

In 1984, General Mills spent $90.7 million promoting Big G cereals, up 25% from 1983. The company maintained its dollar volume share of the $3.8 billion ready-to-eat cereal market at about 23%, second only to Kellogg Co., with 40%, according to market estimates.

Cheerios remained the company's market leader although it slipped to a 5.2% pound-volume share last year from 5.5% in 1983 and to a 5.5% dollar-volume share in 1984 from 5.8% in 1983.

General Mills spent $14.1 million in measured media on Cheerios in 1984, up from $12.8 million in 1983, according to LNA.

Wheaties continued its ear-catching "Big Boys" campaign in 1984, with a slight twist. Olympic gold-medalist Mary Lou Retton signed a three-year, estimated $400,000 pact with the company, putting her face on Wheaties boxes and her gymnastic feats on the brand's tv spots.

The "Big Boy" jingle was retooled to accommodate the new spots. The company spent $9.7 million to advertise Wheaties in 1984, up from $4.8 million in 1983.

General Mills dropped advertising for Strawberry Shortcake cereal to only $1,300 in 1984 from a high of $3.9 million in 1983. Advertising for Donutz cereal, billed at $2,400 in 1983, was dropped.

The company introduced Bran Muffin Crisp cereal nationally in June, 1985, followed by a July rollout of Fiber One cereal, backed by a $13.5 million tv, coupon and magazine campaign.

Last fall, General Mills tried to update the image of trademark Betty Crocker with male-targeted tv spots touting Betty Crocker cake mixes and frosting. The company spent $9.9 million advertising its cake and muffin mixes in 1984, up 15% from 1983. It added a "Butter Recipe" line of mixes in December, 1984, a banana-nut muffin mix early in 1985, and it dropped its Dark Chocolate Fudge flavor of Ready-to-Spread frosting. The company's Supermoist cake mix achieved a 25% market share in fiscal 1984, and reformulated Creamy Deluxe Frosting reached a 50% share. A new Betty Crocker Classics dessert, cheesecake, is expected to be distributed nationally this fall.

New Tuna Helper varieties were added in May, 1985—Tuna au Gratin and Tuna Salad—and a new Chicken Helper—Chicken, Potatoes and Country Gravy—rolled out in April. The company also added PizzaBake, a new home pizza kit, to its lineup.

The Yoplait yogurt line took a 23.2% share of the national $750 million yogurt market in 1984. Still in second place, the brand increased unit sales 14% over 1983. General Mills gave its Yoplait lines $13.3 million in ad support in 1984, up 77.3% from 1983, according to LNA. New additions to the Yoplait line include Fruit-on-the-Bottom yogurt, rolled out in August, a mixed berry flavor extension to the custard-style line, Sunrise Peach and Strawberry-Banana added to the Breakfast Yogurt line, and the addition of Strawberry-Rhubarb to the original Yoplait.

To the $126 million dried fruit snack category, General Mills added orange-flavored Fruit Roll-Ups, and a raspberry flavor is planned for the fall. During fiscal 1985, the company completed its national rollout of Fruit Bars in strawberry, cherry, grape and orange-pineapple flavors.

The company spent more than $14 million advertising its dried fruit snack lines in 1984.

Unmeasured ad spending at General Mills increased 10% in 1984 to $17.3 million and includes direct mail promotions, contests, co-op advertising, free-standing inserts, point-of-purchase displays and sampling.

According to Randy Mayer, director of promotion services and Betty Crocker enterprises, the General Mills promotion budget also includes a significant amount of couponing.

General Motors Corp., Detroit, the 2nd largest U.S. advertiser, increased 1984 ad expenditures in the U.S. by 18.4% to an estimated $763.8 million on record sales and earnings.

Net income in 1984 was $4.517 billion, up 21% from 1983, on $83.89 billion in revenue, up 12.5%.

Returns for General Motors in the second quarter of its current year, however, showed net income of $1.16 billion, a 27.9% drop from the year-earlier period when GM took a $422 million tax credit related to an accounting change.

Second quarter revenues were $24.8 billion, up 14.8%. New product expenses, plant development costs and declining market share caused in part by shortages of some cars were credited with the earnings decline.

Of total ad expenditures in 1984, $520.9 million was in the nine media measured in this report, up 14.8% from 1983. GM's major increases were in newspapers, up 23.9% to $109.4 million; magazines, 7.9% to $96.1 million; spot tv, 52% to $38.5 million, and network tv, up 14.1% to $231.4 million, the largest outlay for any media.

The year was characterized by a massive effort toward diversification and acquisition, expansion in overseas markets and implementing a huge domestic reorganization into small-car and big-car marketing groups.

All activities were masterminded and coordinated by chairman Roger B. Smith, who is putting more of a personal imprint on the No. 1 auto maker than any individual since Alfred Sloan, who ran the company first as president, then chairman from 1923 to 1956.

While acquisitions helped reduce somewhat GM's dependence on the highly cyclical auto industry, the new companies were in related fields and increased the giant auto maker's technological capability. The purchases (computers, aerospace and manufacturing technology and financial services) also provided clues to Mr. Smith's vision of future auto making.

GM kicked off 1984 by purchasing Dallas-based Electronic Data Systems for $2.5 billion. EDS' task is to streamline GM computer and internal communications operations, help diversify the company with ~~outside~~ computer systems management business and eventually serve as the marketing agent for GM computer-aided manufacturing technology.

GM entered the financial services field by acquiring Norwest Mortgage of Minneapolis and the Colonial Mortgage Service group (seventh largest mortgage banker in the U.S.) from Philadelphia-based CoreStates Financial Corp., making GM the nation's fifth largest mortgage lender, but also giving it an entree into financial services beyond its car-loan and dealer-servicing arm, General Motors Acceptance Corp.

Norwest and Colonial mortgage banks were merged Sept. 1, 1985, into a new company, General Motors Mortgage Co., which falls under General Motors Acceptance Corp. G.M.A.C., established to finance cars, through Norwest alone, gains the right to service $11 billion of real estate loans. Colonial has seven companies that together service a mortgage portfolio valued at $9.8 billion.

In mid-1985, GM agreed to purchase for $5 billion Hughes Aircraft, El Segundo, Cal., which gives GM a greatly enhanced presence in U.S. defense contracting and access to aerospace and satellite communications technology. It outbid Boeing and Ford for Hughes.

In between GM bought into five companies, one a specialist in knowledge engineering and the rest specializing in machine-vision processes, a developing technology that allows industrial robots to "see." Typically, GM purchased a minority position and an option for more in exchange for large investments for research and development.

The reorganization of GM domestic operations is designed to make it leaner, more market-oriented and quicker to react to changing market conditions.

Much of 1984 was needed to flesh out key marketing and engineering positions in the Buick-Oldsmobile-Cadillac large-car group headed by Robert Stempel, vp-group exec, and the Chevrolet-Pontiac-GM of Canada small-car group headed by Lloyd Reuss, vp-group exec.

The reorganization moved much of the responsibility of engineering and developing new cars from the divisions to the two groups and made the divisions much more marketing oriented.

In mid-1984 as the reorganization began to take form, the GM Media Council was formed to take a comprehensive look at GM's relationship with its advertising agencies and to maximize effectiveness of the auto maker's advertising. Several sweeping changes occured in the first year of the council's operation.

GM accelerated its one-to-two matching contributions to dealer advertising groups (associations of dealers in individual markets), making that the fastest growing area of GM ad spending with an estimated $105.8 million in factory contributions to match contributions from dealer groups.

Following a month-long study by McKinsey & Co., New York, a management consultant, the media council changed the rules for GM advertising in 1985. Its core agencies were forced to accept lower compensation equivalent to cutting the standard 15% agency commission on media buying to between 12.5% and 13.5%.

Negotiating tv and magazine buys were consolidated corporatewide with individual agencies being assigned to dicker for all GM divisions in a particular tv daypart or in a specific magazine group, although actual media buys once negotiated still were placed by that division's agency.

GM's biggest surprise came Jan. 8, 1985, when it announced the formation of a new subsidiary, Saturn Corp., which eventually will form a sixth car division when the new product is ready in the late 1980s.

It will be GM's "experimental laboratory" for new manufacturing technology, marketing methods and labor and management relations aimed at making GM fully competitive with Japanese auto makers.

Competition between states hoping to land the $2 billion new plant for Saturn became so fierce and widely publicized, GM delayed naming an ad agency until 1986, saying it needed to cool public anticipation of Saturn.

In the midst of these activities, GM's share of domestic car sales slipped 2%, from 59.7% in calendar 1983 to 57.7% in 1984. Its total market share remained at a constant 44.1% but that largely reflected a decline in Japanese share because of import restrictions.

Chevrolet posted a sharp increase in both sales and share with its passenger cars in 1984, reflecting the continued recovery of the domestic auto market. Sales of cars rose 217,696 in 1984 to 1,565,000, or 16.2%. That pushed the Chevy total market share up .38 percentage points to 15.06%. Chevy trucks sales rose from 904,672 in 193 to 1,089,853 in 1984, but Chevy's share fell 3.46 percentage points to 26.93% amidst a market surge to more than four million units.

Chevy altered its marketing strategy to broad-based promotions of large-volume "core vehicles" like the Caprice, Celebrity and Cavalier and supplementary and narrowly-focused campaigns for "niche-fillers" like Corvette, Camaro and Chevette. This was part of a drive to push Chevy's share to 20% of the U.S. market by 1987-88 announced in early 1985 by general manager Robert Burger.

Chevrolet concentrated on rolling out its three-car "Japanese strategy" in 1984-85 despite supply problems due to tighter than anticipated Japanese import quotas. The effort is aimed at increasing penetration in the small-car market and the number of younger buyers, both important if Chevy is to achieve its one-fifth of the market goal.

The first link came in June, 1984, with the West Coast introduction of the Chevy Sprint, a three-cylinder Japanese minicar built by Suzuki Motor Co., Mamamatsu, Japan, in which GM holds a 5.3% stake.

Later in 1984, GM unveiled the Chevy Spectrum on the East Coast. Spectrum is a slightly larger small car built in Japan by Isuzu Motors Limited, Tokyo, in which GM has a 34.2% stake.

The capstone of the strategy is the Chevy Nova, a California-assembled version of the Toyota Corolla made by New United Motors Inc., a joint venture between GM and Toyota. The car was initially marketed in 25 midwest states starting in June, 1985, with a Campbell-Ewald campaign themed "The best of both worlds" and aimed at import-inclined buyers with guilty consciences about not buying domestic.

Although Nova is the only one of the three not completely imported, it is the only one prominently identified in ads as having Japanese roots.

The regional distribution is expected to end early in the 1986 model year as supplies increase.

Chevrolet led a mini-revolt among auto marketers towards the continually rising network tv time costs in the fall, when it dropped its domestic-exclusivity for the 1985 Super Bowl, saying the $1 million-a-minute price-tag was too high to justify.

Pontiac division continued the "We build excitement" advertising campaign into a third year as part of an effort to move its marketing image into younger and sportier territory. Unit sales surged 27.4% to 704,684 in 1984. Pontiac also posted GM's largest divisional share gain, up .76% to 6.78%.

Under the reorganization, Pontiac is charged with holding down the GM lower-cost-sporty quandrant, less expensive than Buick and "more expressive" than Chevrolet. That makes it the division most directly positioned against Japanese imports.

Pontiacs that cannot compete against imports, the aging 1000 subcompact and large Grand Prix, Bonneville and Parisienne, were relegated to a total of $3.26 million in magazine advertising, and ignored in the heavy tv spending Pontiac is using as an imagery tool. "If we can move the public perception of Pontiac to where we want it in a decade, we'll be doing great," says Ed Benson, Pontiac director of market planning. Over-all, tv network and spot spending got four-fifths of Pontiac weight via agency D'Arcy MacManus Masius, Bloomfield Hills, Mich.

The Grand Am, Pontiac's version of the two-door "N-body" compact, became the fifth Pontiac "image" car with a fall 1984 introduction. With roughly 100,000 unit sales in its first model year ending Oct. 1, 1985 and 175,000 projected for 1986, Grand Am is the locomotive for Pontiac sales gains. Introductory ad spending for Grand Am totalled $6.3 million in the last three months of calendar 1984, 90% in network tv and most of the rest for magazines.

Other spending, which was for all of 1984, was concentrated on the other four image cars: Sunbird (formerly

2000), $8.28 million; 6000, $6.59 million; Firebird (including Trans Am), $6.71 million; and Fiero, $779,000. Among the image cars, tv got $27.04 million, magazines got $3.84 million.

To bolster the youthful, sporty pitch, Pontiac sponsored concert tours and increased its participation in motorsports.

Pontiac sent rock duo Hall & Oates on a multi-city U.S. tour, backed by a $200,000 promotional ad budget.

And to top off stock car and sports car racing efforts, Pontiac sponsored the 1984 Trans Am-series race in Detroit to support the Formula One Grand Prix there. Ford Motor Co.'s Mercury division swept the 1984 race and sponsored it in 1985.

Oldsmobile kept to its policy of consistency in advertising that has served it the past decade. Olds' biggest visible change in 1985 advertising was putting gold borders on magazine ads.

Sales rose marginally to 1,056,000 from 1,008,000 in 1983 for another record, but share slipped .81 percentage points to 10.16% as the market for diesel-powered cars evaporated.

Olds had been the biggest diesel-car marketer, so it was hit hardest. GM dropped diesels for passenger cars for the 1986 model year.

Olds' stand-pat attitude on imagery is in line with its task of reaching upscale, conservative buyers under GM's reorganization. All divisions are trying to make their marketing image more distinctive from the others. But as the market moves toward more expressive, sporty cars, Olds only has to stay put to gain that distinction while Buick and Pontiac must leapfrog the market.

Buick division's efforts to move its marketing image were reflected in introductory advertising for the front-wheel-drive Electra in the spring of 1984.

Although plush Park Avenue models dominated sales, ads featured the sporty Electra T-types being tested in Australia and Europe, complete with rally lights, 'roo bars and lots and lots of dust and mud splashes. Copy stressed functional capability, not beauty or deep upholstery. Buick hopes for younger buyers showed up in the fall with the debut of Somerset Regal. "Introducing Buick on the move," trumpeted ads showing the small personal coupe taking a corner.

Buick continued experimenting with a variety of innovative marketing programs, many coordinated by a new Marketing Through Technology office headed by Kirk Aubrey. Computer information centers in shopping malls, telemarketing pilot programs in two cities, a toll-free number for consumers to contact directly Buick personnel and others are designed to make it easier for potential customers to learn about Buick products without having to go to a conventional dealership and to serve as a referral service for dealers.

Cadillac increased corporate sponsorships and broadcast ties to upscale, toney sporting events such as polo and golf and sponsored the competition to select the U.S. entry for the 1986 America's Cup 12-meter ocean racing.

Cadillac's long-term plan calls for moving its marketing image even more upscale and sportier, to appeal to younger, more affluent buyers and head off pricy European imports.

The fwd De Villes introduced in early 1984 are touted as Cadillacs of the future and designed to appeal to younger prospects, although continued demand among traditional, older buyers and resistance from limousine converters has scotched plans to discontinue the rwd Fleetwood Brougham, at least until 1990.

With all-new 1986 Seville and Eldorado models coming in November, 1985, Cadillac's lineup—except for the pardoned Fleetwood Brougham—has changed to front-drive and smaller since 1982. A sports-luxury, two-seater, Allante, is due in 1987 with an Italian body from Pininfarina on a U.S. platform and assembled in Detroit. Cadillac is considering importing an Opel from GM's German operations as a replacement for the Cimarron for 1988.

General Motors continued to establish separate brand identities, for parts and services. Ad spending on Delco Electronic division's stereo systems and the GM-Bose Electronics premium sound systems rose 30% to $3.9 million. Mr. Goodwrench brand oil in its first year on the market received $3.85 million in measured ad support.

Corporate advertising handled by N W Ayer rose 18.1% to $29.4 million in measured media. Only G.M.A.C. saw a sizable decline, 33% to $8.17 million.

---

You say tomato . . .

For those who wish to celebrate, let it be known that last year marked the 206th anniversary of the first recorded mention of catsup in America, tomatoes having been used for that worthy purpose in New Orleans in 1779.

In The Nation's Richest Hispanic Market, We Deliver The Cream.

The Miami Hispanic Market is unlike any other Hispanic market in the U.S. It's richer in per capita income. More dynamic. More powerful. More loyal to the Spanish language than any other Hispanic community.

And Miami's biggest Hispanic spenders spend a lot of time with one media in particular: Diario Las Américas—The Spanish language daily newspaper.

	Miami Hispanic Market Households	Diario Las Américas Reader Households
FAMILY INCOME	$24.996	$28,050
PERSONS PER HOUSEHOLD	3.2	3.4

Gillette Co.
RANK 46
Boston

($ figures = 000,000)

Worldwide	1984	1983	% chg
Sales	2,289	2,183	4.8
Net income	159	146	9.2
U.S.			
Sales	1,102	1,020	8.1
Operating profits	183	173	5.9
Advertising	166	178	-6.7

Gillette Co., the 46th largest national advertiser, decreased its U.S. ad spending 6.1%, to an estimated $165.7 million in 1984. Worldwide sales for the year increased 4.8% to $2.29 billion, and earnings rose 9.2% to $159.3 million. Sales for the U.S. and Canada rose 8.1% to $1.1 billion.

Gillette continued to show increases in the first half of 1985 with sales for the six months ended June 30 rising 4.8% to $1.153 billion and net income increasing 4.6% to $81.9 million.

Worldwide advertising, including sampling, decreased slightly to $242 million from $243.7 million. Sales promotion rose 13.1%, to $148.1 million, according to Boston-based Gillette.

For 1984, among the four business segments, sales of blades and razors rose 2%, to $768 million (still below 1982's $781 million), while operating profits advanced 4% to $256 million. Sales of toiletries and cosmetics inched ahead 1%, to $697 million, while operating profit declined 7% to $57 million.

Operating profits had been $66 million in 1982. The two segments respectively make up 34% and 30% of Gillette's total sales.

Writing instruments and office products moved ahead 9% to $275 million, accompanied by an operating profit increase to $11 million from $3 million, or 367%. Sales of the West Germany-based Braun Products segment rose 3% to $394 million, with operating profits of $44 million, up 16%.

In the crucial blades and razors segment, Gillette holds a 60% share of the blade market, 70% of the razor market, according to David Preston, president of Safety Razor division. Diana Temple, vp of Salomon Brothers, New York gives razor blades a 61.5% share of a $680 million market.

Atra cartridges and razors increased their market shares in the U.S. Contour-pivoting head razors remained the best seller in Europe. Led by the Good News! Pivot razor, domestic sales of disposable razors moved ahead, and the brand held the top position in its category. Gillette also maintained the top position in the declining double-edge blade market.

As measured by Leading National Advertisers, spending in six major media on Atra razors declined 6.7% to $9.7 million. Measured spending on the Good News! disposable razor increased 9.6%, to $5.7 million. Network tv accounted for $2.8 million of the spending, and network radio for $1.1 million.

"We are very steady in support of major systems and disposables," Mr. Preston says. "Atra and Good News! get relatively equal weight, reflecting the significance of the segment."

New in 1985 is the Atra-Plus shaving system, a refillable Atra cartridge with a lubricating strip. It sells for $3.99 to $4.95. Late this year Gillette will ship the disposable MicroTrac twin blades razor, with a package of five expected to sell for 99¢. The campaign is expected to receive $11 million. Ms. Temple says the product's importance stems from its use of low-cost manufacturing technology. She linked this to Gillette's "emphasis on cost savings," as well as a move into lower-priced products.

In toiletries and cosmetics, gains by White Rain hair spray countered weaker sales by other brands. Gillette held a 17.8% share of hair sprays. Broader European distribution of Silkience hair spray boosted international sales for that category. Silkience's market share among conditioners slipped a point, to 8.2%. Domestic shave cream sales moved ahead, buoyed by the Brush Plus shaving system introduced in October, 1984. Measured spending on Brush Plus, a shave cream and brush package, was $3.2 million. Network tv took $2.8 million of that.

Foamy brand products remained the top seller in the U.S., according to Gillette, as Ms. Temple gave them a 27.5% market share. Measured spending for the Foamy gel rose sharply to $4.9 million from $1.4 million, while spending on Foamy shave cream dipped to $435,000 from $3.1 million. Measured spending on Right Guard antiperspirant more than doubled, to $2.7 million from $1.3 million, while spending on Right Guard antiperspirant spray dipped to $3.6 million from $9.5 million.

Domestic shampoo sales fell, and advertising for Mink replenishing shampoo, for example, nose dived to only $331,000 from $5.4 million. Measured spending on For Oily Hair Only shampoo disappeared, from $6.1 million in 1983. Ms. Temple says market share for shampoo slipped a point, to 3.2%, noting, "They didn't increase advertising to match the great battles in shampoo."

Measured spending for Body Flowers body spray was $8.6 million, although market share came slowly. Ms. Temple says, "I'm not sure why it hasn't lived up to its earlier promise. Maybe a broader position would help."

Gillette also shifted measured spending among Soft & Dri antiperspirants, cutting back on support for roll-ons and solids in favor of sprays.

Gillette started to extend its Good News! brand name, previously used only on disposable razors. This spring Gillette introduced deodorant, antiperspirant, shampoo and shaving cream with the brand name in a Seattle test market. If it works, the new line could be rolled out nationally next year. Ms. Temple saw this as a means of getting more floor space from retailers. Also, it fits with increasing "polarization" of income levels, as the number of lower-income Americans rises. "A lot of people are constrained on budgets and want value," she says.

In a growing U.S. market for ball-point pens, Gillette's writing instruments division increased measured advertising for Paper Mate ball-point pens to $4.5 million from $1 million. Sales fell in the refillable category, but rose in disposable ball-point pens, especially with the Write Bros. stick pen.

New product introductions were Accu-Point rolling-point pen and the Paper Mate Sharpwriter pencil, Gillette's first disposable mechanical pencil. Also new was the Rollerstick pen and the Advancer pencil. Office products rose, with Liquid Paper correction fluid improving its leading share as measured advertising rose to $1.3 million from zero.

The Braun segment set up an American subsidiary with plans to market electric shavers and personal care products in the U.S. A Northeast rollout was set for July with men's and women's shavers. The market is led now by Norelco and Remington with 50% and 35% market shares, respectively.

Gillette also assumed a leadership role in using split-30s in its tv advertising. Foamy, Bare Elegance and razor blades got the treatment. Gillette also used them during the World Series telecasts. Ultimately, 22 major brands were to be affected, with the 15-second units used to build reach and frequency, as well as build exposure for products with smaller budgets. The creative approach is to edit 30-second commercials to a core message of 15 seconds.

In October, Gillette sold its Cricket disposable lighter line to the Swedish company, Stockholm.

Westlake Village, Cal.

Ronald B. CLark, president

Goodyear Tire & Rubber Co.
RANK 97
Akron,. O.

($ figures = 000,000)

Worldwide	1984	1983	% chg
Sales	10,241	9,736	5.2
Net income	411	306	34.5
U.S.			
Sales	7,092	6,672	6.3
Operating profits	643	577	11.6
Advertising	65	59	10.2

Goodyear Tire & Rubber Co., Akron, O., the world's largest manufacturer of tires and rubber products, was the 97th largest national advertiser in 1984 with an estimated $64.7 million in ad expenditures, an increase of 12% over 1983.

Goodyear reported net income of $411 million, up 34.5% from 1983, on sales of $10.2 billion, up 5.2%. Revenues from U.S. operations accounted for $7.1 billion, or nearly 70% of total sales.

Goodyear's principal business is the manufacturing, distribution and sale of tires, where it is the market leader with a 31% share, but the company also produces and sells a broad spectrum of metal, rubber and plastics products for the transportation industry and various industrial and consumer markets.

In addition, the company manufactures synthetic rubber, chemicals, numerous high-tech products for aerospace, defense and nuclear energy applications. The company also engages in various gas and oil transmission, exploration and production activities, primarily through the Celeron group of companies acquired in 1983.

For the first quarter of 1985, Goodyear reported a drop in net earnings of 22.5% to $86.7 million from the comparable quarter of 1984. Revenues for the first quarter declined 2% to $2.46 billion. The company attributed the lower sales and earnings to a general decline in the replacement tire market, a strike at its Valley Field, Quebec, plant, price-cutting by some competitors and the strong U.S. dollar.

In early 1984, Goodyear, along with other U.S. tire marketers, began reshaping its marketing strategy in an effort to ward off low-priced foreign competition. The emphasis shifted from low-priced goods to upgraded all-season tires and performance tires.

Early last year, Goodyear launched a tv campaign for Vector, its all-season tire. It also put heavy advertising support behind Eagle GT, its premium performance line. Last October, Goodyear introduced the Unisteel G159, a radial light truck tire for commercial vehicles.

The company also introduced Wing-Fil, a soft durable polyurethane rubber that replaces air in the tire and rim cavity. Wing-Fil is being offered by truck tire dealers, following its initial introduction through 19 Goodyear truck tire centers.

During the year, Goodyear, which had measured advertising in nine media of $47.4 million, up 13.7% from 1983, plowed most of that increase into Goodyear car tires. Car tire spending was $11.5 million, up from $4.8 million. Other fluctuations included a decline of 10.2% to $21.8 million for auto & truck tire promotions as a combo; a drop of 7.6% in Goodyear Service Stores automotive advertising to $6.2 million.

Increases in 1984 measured spending were registered in magazine, spot tv, network tv and network radio advertising. The largest increase was in spot tv where spending was increased 36% to $5.8 million. This was followed by magazine advertising, up 32% to $6.6 million, and network tv, up 8% to slightly more than $30 million. The company spent $420,000 on network radio last year. In 1983, network radio was not on the schedule.

During the first quarter of 1984, Goodyear awarded its $30 million international account to McCann-Erickson, New York. McCann, which handles most of the company's overseas business, beat out J. Walter Thompson USA, which handles the $40 million domestic business for Goodyear.

Goodyear announced in June that Tenneco Inc. had agreed to buy three of its natural gas pipelines for $440 million.

The sale appeared to indicate that the company, in part, has been re-evaluating its decision to diversify into the gas and oil industry.

In 1983, Goodyear reportedly paid $822 million in stock for the pipelines and other assets of Celeron Corp. According to one report, Goodyear has called the sale to Tenneco a "refinement" of that diversification and indicated that it will retain oil reserves and certain other assets of the Celeron Group.

Humble Nebraska start

Beatrice Cos., Chicago, began in 1894 as a butter and egg supplier in the Southeastern Nebraska town of Beatrice, about 40 miles south of Lincoln. Spreading beyond its original area, the company marketed a wider range of dairy products, and by the 1940s and 50s its Meadow Gold dairy brand was familiar in the central U.S. Beatrice now reaches around the world, producing products in more than 30 countries and marketing in more than 100. It has 600 brands, 350 companies, nearly 9,000 products, and in the past two years alone has introduced more than 140 new products.

GrandMet USA, Montvale, N.J., which includes Liggett & Myer's tobacco products and Alpo dog food, was the nation's 90th largest advertiser, spending an estimated $76.2 million advertising in the U.S. in 1984, a 34.2% increase over 1983.

GrandMet USA is a subsidiary of Grand Metropolitan p.l.c., London, which had worldwide sales of $7 billion in 1984, up 12.2% from 1983. Net income increased 17.8% to $661.4 million in 1984.

Sales and earnings for both 1984 and 1983 fiscal years were converted from pounds to dollars at the rate of £1.3774 = U.S.$1.

U.S. sales for GrandMet USA were up 27% to $1.7 billion in 1984. GrandMet USA figures do not include several nonconsolidated U.S. subsidiaries of Grand Metropolitan p.l.c. Among these nonconsolidated units are Paddington Corp. and Carillon Importers.

GrandMet by October, 1985, will have added another U.S. subsidiary—Pearle Health Services Inc. of Dallas—when it completes a purchase it began earlier in the year.

Paddington, marketer of J&B Scotch, had 1984 sales of $240 million, and Carillon Importers (Absolut vodka) had sales of $95 million, according to the 1986 edition of *Impact Yearbook*. Sales from these companies, GrandMet USA and minor contributions from other subsidiaries, delivered $2.04 billion in total U.S. sales to Grand Metropolitan p.l.c. in 1984.

Liggett & Myers Tobacco Co., Durham, N.C., which accounts for most of GrandMet's U.S. sales, increased its total share of market 21% to 5.8% in 1984 from 1983, according to a report by analyst John C. Maxwell Jr.

The dramatic increase in market share in the static cigaret market was because of Liggett's generic brands, despite the influx of generic competition from market leaders R.J. Reynolds Tobacco Co. and Brown & Williamson. (Philip Morris leads the cigaret market with a 34.5% market share.)

Competition has been so intense that it has even been waged on marketing nuances.

When Brown & Williamson introduced its generic cigaret in 1984, the package had an "O" on the top seal. Liggett, whose generic cigaret packs display a "Q"—the Quality Seal—sued Brown & Williamson alleging trademark infringement and predatory pricing. The litigation continues.

Liggett spent the bulk of cigaret ad dollars on the Eve brand. Total measured spending for Eve decreased 2.9% to $6.8 million in 1984, but the brand steadily receives one of GrandMet's largest advertising commitments.

Although L&M and Dorado brands had combined advertising expenditures of less than $1 million, Liggett research found the L&M name had good recognition. New packaging and advertising are being tested in the northeastern U.S.

Liggett introduced Stride as a mid-price cigaret ($1 less per carton, 10 cents less per pack) in January, 1985. Testing of the new brand during 1984 accounted for $455,000 in measured media spending, according to Leading National Advertisers, and was partially responsible for GrandMet's 193.5% increase in newspaper advertising as reported by Media Records.

Operating income for cigarets in the U.S. increased 28.8% to $77.9 million in 1984.

GrandMet sold Pinkerton Tobacco Co., Owensboro, Ky., in July, 1985, for about $138.5 million to Svenska Tabaks A.B. Pinkerton's principal brand is Red Man, a smokeless tobacco, which in 1984 accounted for about $2.4 million in GrandMet ad spending.

GrandMet's largest single advertising expenditure, however, went to Alpo Petfoods (formerly Allen Products). Alpo canned dog food was the market leader, with a 27.5% share of dollars, in canned dog food sales in 1984 with sales up 15.0% to $230 million from 1982, according to the Maxwell Report. Alpo's share in 1983 was 25% of the market.

Ad spending of $10.8 million in 1984 for Alpo canned dog food increased dramatically from $4.7 million in 1983, according to LNA. Alpo canned, dry and beef bit products had combined ad spending of $17.7 million in 1984, up 38.3% from 1983.

Nearly 63% of ad spending for Alpo brands, or $11.1 million, went to network tv. About $2.5 million went to spot tv and another $2.5 million went to magazine advertising.

Another Petfoods product, Liv-A-Snaps, showed a 51% decrease in ad spending, to $177,500 in 1984.

Paddington Corp.'s largest ad spending went to J&B Scotch, the 16th largest distilled spirit by case depletion, according to *Impact Databank*, and the second largest scotch by case depletion, behind Schenley Imports' Dewars.

New York-based Paddington boosted J&B's ad spending 15.8% to $6.6 million in 1984.

Paddington decreased measured spending for Baileys Original Irish Cream liqueur, the 40th largest distilled spirit by case depletions, according to *Impact*.

Spending dipped 1.9% from 1983 to $5.1 million in 1984. Liquor industry estimates place Baileys' share of the cream liqueur market at 50%, making it the undisputed leader.

Among Carillon Importers' products, Absolut vodka got an increase in ad spending of 40.9% to $2.4 million in 1984. Bombay English gin also received an ad spending boost of 72.7% to $1.7 million in 1984.

Some foreign and/or private companies do not divulge sales or income figures. Where estimates could not be obtained, N/As appear in charts and the boxed information preceding the profiles to indicate "not available."

Greyhound Corp., Phoenix, Ariz., the 86th largest national advertiser, cut its advertising by 4.6% in 1984, to an estimated $80.2 million, as Greyhound Lines continued to be hounded by poor results.

The bus line's continued plight in 1985 prompted the company to undergo major restructuring, including abolishing 400 management jobs and laying off 1,500 rank-and-file workers involved in the intercity bus business.

During 1984, over-all company sales rose 4.8% to $2.7 billion, and net income went up 18.5% to $125 million. None of the company's 1984 growth, however, was in the scheduled bus service that founded Greyhound. That service is estimated to have dropped to an estimated loss of $3.2 million.

During 1984, the net income for the entire transportation services group, which includes several subsidiaries besides Greyhound Lines, the bus service, rose to $20.5 million, compared with a loss in 1983 of $8.8 million. But 1983 brought a costly 47-day strike against Greyhound Lines, so comparisons are meaningless.

What does have meaning is that, 1983 aside, revenues for the transportation service group have been dropping steadily since 1981.

The company was optimistic at the end of 1983 that a 15% cut in labor costs would make Greyhound Lines profitable. But in 1984, both number of passengers and passenger miles continued to fall.

So, despite improved performance by transportation services during the first half of 1985, Greyhound Corp. has been rolling straight ahead on a strategy that calls for shrinking its bus service while using the cash it generates to move into more profitable areas such as the acquisition in March, 1985, of the consumer products division of Purex Industries for $264 million.

In announcing employe reductions, amounting to 16% of the work force, but 30% of management and supervisory staff, John W. Teets, chairman, said later phases of the plan call for some of Greyhound's 127 terminals to be sold and unprofitable routes to be shut down. The routes were selected, according to the company, because "low passenger traffic has resulted for many years in chronic losses, despite massive infusions of advertising, marketing and promotional dollars." The cutbacks could save Greyhound as much as $45 million a year.

Greyhound apparently has withdrawn from an earlier view that aggressive marketing would bring the bus lines around. In 1983, the marketing department for the bus lines had grown from five to 19 people, and in 1984 the bus company's $21 million ad budget, a 33% increase from the previous year and its biggest ever, focused on a campaign stressing lowered fares and aimed at increasing Greyhound's 66% market share of the intercity bus business. Greyhound has more than three times the market share of its nearest competitor, Trailways Inc., Dallas. But Greyhound cut that campaign short in September in order to reconsider the marketplace.

That process of reconsideration is still going on, according to Ralph Borland, director of marketing for scheduled passenger service. Mr. Borland says a similar amount to 1984's $21 million was budgeted for 1985, but all of it would not be spent because of the cutbacks. He says although 1985's spending would be down "only a couple of percentage points" from 1984, in 1986 he expects advertising for Greyhound Lines to drop "a double digit" percentage. Measured spending for the Greyhound bus lines was $4.1 million in 1984, down 30% from $5.9 million in 1983.

In its advertising, handled by Bozell & Jacobs Southwest, Dallas, Greyhound Lines focused on a safety message and closely targeted the limited groups that remain loyal to buses—students, military personnel and the elderly. It also expanded its base by launching an airport service in conjunction with People Express Airlines in late 1984 and extended its casino, charter and package express services. Greyhound Lines is lowering overhead and raising cash—as much as $200 million over the next two years—by selling or leasing downtown terminals and garages throughout the country and by offering bus line franchises.

Greyhound calls its franchising program, implemented in April, 1985, "the keystone of Greyhound Lines in transition." The company hopes that, by offering franchises on routes it found unprofitable, it can generate cash while cutting expenses and feeding traffic into its system.

Greyhound is part of an industry whose profits have declined from $132.1 million in 1980 to $40 million in 1984, according to figures from the American Bus Assn. Much of the decline is from an infusion of small, low-cost companies. In fact, the number of bus companies has grown from 1,100 to 3,000 in that four-year period.

But the March purchase of the 30 household cleaning products made by Purex Industries emphasizes that Greyhound Corp. does not see its future along a bus route. The purchase makes Armour-Dial Greyhound's largest division, with annual sales of about $1 billion.

Chairman Teets has said he intends to boost advertising for the Purex products, which in addition to Purex bleach, include Brillo soap pads, Sta-Puf fabric softener and Old Dutch cleanser. In the last year before acquisition, Purex spent $5.5 million in measured media, according to Leading National Advertisers.

Analysts expect Greyhound to use a

Mercedes-Benz
Directory of Diesel Fuel Stations and Authorized Mercedes-Benz Dealers

Mercedes Benz Filled Their Diesels With Our Premium.
So did Mazda, Volkswagen, Volvo and Peugeot.
It's not that we invented the wheel, we reinvented the premium.
From Hammond atlases and maps, to our library of books—we offer something everyone values: information.
We also offer total flexibility for you.
Because as publishers, we can put together anything, on any subject. Customizing your premium or incentive to your business and your budget (there are a lot of ways to slice a book).
Just like we did for Time Magazine, General Foods, Burger King and Mercedes (they're still getting mileage from the diesel stop directory we created for them in 1976).
Talk to Dean Hammond. He'll tell you how we can fill your tank with our premium.
Maybe we should say —super premium.

"push" marketing strategy for the newly acquired line, promoting the products as bargains, as opposed to the "pull" strategy that has created demand for Dial and Tone because of their quality name brand.

Analysts see the purchase as a good fit. Soap industry analyst Hercules Segalas of Drexel, Burnham Lambert in New York says Purex products have suffered from poor distribution and will benefit from Armour-Dial's access to store shelves. Phua Young of Shearson/Lehman Brothers sees very little overlap between Purex and Armour-Dial and adds that so far the purchase has been ahead of schedule in terms of profitability.

Net income for Greyhound's consumer divison rose 20.5% in 1984, to $26.8 million. During the first half of 1985, profit surged by another $6 million, rising 31% year-to-year.

Dial is one of the best-selling brands in the $1 billion, bar-soap industry. Armour-Dial's top two soaps, Dial and Tone, account for a 16% market share; it is estimated that 14% of that belongs to Dial. The company reported that Dial sales rose in 1984. That despite the fact that the entire deodorant soap segment has been declining, with industrywide sales for the most popular size dropping 4.7% in 1984, according to Selling Areas-Marketing Inc.

In LNA measured media, Greyhound spent more than twice as much in 1984 advertising Dial than on any other of its products—$11.9 million, up 6.2% from 1983. LNA measured media spending for all Armour-Dial products in 1984 was $20.2 million, down 10.1%.

After a year of test marketing, in 1984 Armour-Dial rolled out Pure & Natural, a competitor to Ivory, in the eastern 10% of U.S. markets. It is test marketing a premium soap, Imperial Leather, in Denver, Colo., and Grand Rapids, Mich.

Armour-Dial also launched a summer promotion this year with $15 million marked for Dial and Tone soaps. Ancillary promotional support, including an inflatable boat, canvas beach chair and nylon windbreaker, is part of the "fun in the sun" theme, with supermarkets carrying the items on display.

The Armour Star canned meat product line introduced three new items in 1984: Hot chili, Hot 'n Spicy Vienna sausage and Hot 'n Spicy potted meat. Distribution was expanded for three products introduced during 1983: A 24-oz. can of Armour Star chili, a 15-oz. can of roast beef hash and sliced beef in vacuum-sealed foil pouches.

GTE Corp., Stamford, Conn., the 82th largest national advertiser, increased U.S. ad spending 27.6% in 1984 to an estimated $89.8 million, as earnings reached $1.1 billion, up 17.7%, on revenues of $14.5 billion, an increase of 12.4%.

For the first quarter of 1985, revenues continued moving upward, at a 6% clip to $3.7 billion, and net income was $273 million, compared with $267 million in the similar period in 1984, a figure excluding a one-time credit of $45 million because of an accounting policy change.

GTE's lead revenue generating group, telephone operating group, logged revenues during the year of $9.1 billion, up 8.3%, with a 14% increase in operating income to $2.6 billion. This includes telephone companies, directories and Mobilnet, a cellular mobile telephone service.

The diversified products group, consisting of communications and electrical products segments, had a 2.2% sales drop to $2.5 billion, while operating income sank 83% to $24 million. Overcapacity and excessive inventories in the retail telephone market, combined with lower prices and sales, caused much of the problem.

Revenues of the communications services group rose to $1.2 billion from $578 million, although operating income dropped 18% to $82 million. This group consists of GTE Sprint Communications, the long-distance service; Spacenet satellite communications, and Telenet data communications network with Telemail and medical and financial information services. The group saw the most action in 1984 in terms of new activity and ad spending. MED/MAIL, a mail service for medical device problems, debuted in April. The group expanded its GTE TeleMessager voice messenger service, after a 1983 Dallas introduction, to other leading markets, and inserts in leading national newspapers announced the introduction of new service centers.

Major advertising outlays supported GTE Sprint Communications, Burlingame, Cal., and GTE corporate advertising. Measured spending on Sprint increased 7% to $22 million, according to six media measurements of Leading National Advertisers.

Yet, the company pulled back on 1984 advertising through September, according to Ralph Sherman, Sprint's director of advertising. Spending for the year was 30% to 40% below initial plans, although this paralleled Sprint's income.

"There's not a lot to gain in advertising when there's no product to deliver," Mr. Sherman says. Spending picked up last fall as capacity emerged, accelerating in April and May, 1985.

Sprint ran a consistent schedule in the *Wall Street Journal* and business publications to reach business users, while the sell to residences consisted of tv and direct mail. Mr. Sherman says direct mail worked well with ad messages reaching target households where "equal access" had arrived. This is done in "very finite" geographic areas defined by telephone prefixes, ranging from hundreds to hundreds of thousands of households. Sprint lobbied for equal access to new customers, because AT&T was automatically assigned customers who did not state a preference for a long-distance carrier. The FCC in June, 1985, approved a non-biased method of assigning carriers to such non-preference parties.

Tv marketing retained the "straight talk" theme used since late 1983. The over-all strategy was to stress value and price. That approach evolved over two years as Sprint has added features such as WATS service and "The Billing Solution" for businesses.

Sprint also explored alternatives to advertising as a means of message distribution. The fall boxes of Nabisco Brands' Shredded Wheat cereal carried coupons worth $5 in calls for new and current customers. In July, business audiences read about the "Sprint to the Series" Sweepstakes, with 10 World Series tickets as the grand prize. Through August the promotion attracted 13,000 inquiries.

Mr. Sherman places 1985 advertising and marketing spending at $60 million for Sprint, which by year's end hopes to have 1.5 million customers. Neil Yelsey, telecommunications analyst for Salomon Brothers, gave Sprint a 2% share of the $45 billion domestic long-distance market. AT&T leads with 90%, followed by MCI with about 4.5%.

GTE corporate advertising measured spending rose almost 50%, to $15 million, according to Leading National Advertisers. Almost $8 million went into network tv. The approach continues the "Gee! (No GTE!)" campaign with shifts to a more pragmatic message, according to Philip C. Stevens, corporate ad manager. Three or four applications-oriented ads will appear in October, highlighting activities of various GTE units.

In advertising for specific product areas, Phone Mart stores, Sylvania light bulbs, Mobilnet and Telenet are getting substantial support, says Dennis P. Crosley, group senior vp at Doyle Dane Bernbach. Measured advertising in Phone Mart stores doubled to $2.5 million. They operate in regions where GTE provides local telephone service, such as Tampa-St. Petersburg, Fla. In some regions the stores also are selling business products and services.

On election night, 1984, GTE launched a tv campaign for Sylvania light bulbs with a $4 million to $5 million campaign. A four-spot campaign beginning in April introduced spokesbeing "Mr. Light," a million-dollar animated creation, for soft white light bulbs. It introduces product differentiation, such as longer life and energy savings, to a commodity-type product category, Mr. Crosley says. The approach will continue this fall in network and spot tv, with some print. Measured spending on Sylvania home light bulbs rose 27%, to $3.7 million. Almost all of that went into network and spot tv.

In March, GTE introduced a Sylvania Blue Dot disc camera, in its new Consumer Communications Products Division. With a list price of $19.95, the disc camera aims to create a niche for low-priced cameras. A campaign will start this fall.

'Gee, GTE'

The spreading voice of GTE began as a whisper in 1918 when three men combined their resources of $33,500 and bought a local telephone company in southwest Wisconsin. John F. O'Connell, Sigurd L. Odegard and J.A. Pratt entered into the independent telephone company field, which had recently opened up after all the Alexander Graham Bell telephone patents had expired.

Gulf & Western Industries, New York, the nation's 50th leading advertiser, spent an estimated $149.2 million in advertising in 1984, an increase of 2.3% from 1983 as it took steps to focus on entertainment, publishing and financial services businesses.

Of the advertising total, G&W spent $59.2 million in nine measured media in the U.S., up 1.5% over 1983.

And of the measured total, 50% was in its divisions divested in June, 1985. The group includes clothing licensed under the Calvin Klein, Liz Claiborne and Jonathan Logan labels, as well as Simmons mattresses, automotive parts distribution and manufacturing.

G&W, which announced in 1984 that it was launching a program of targeted divestiture and acquisition to become a "stronger, leaner, more profitable, more growth-oriented" company, sold $900 million in stock held in other companies and 46 G&W-owned businesses.

Then in 1985, it continued the divestiture policy by disposing of its sugar operations and related holdings in Florida and the Dominican Republic before unloading its entire consumer and industrial products group in June to Wickes Cos. for $1 billion in cash and the assumption of $90 million in long-term debt. The businesses sold to Wickes accounted for more than half of G&W's measured media advertising buy last year of $58.8 million.

At the same time, with G&W's acquisition of Esquire Inc. and, last December, of Prentice-Hall Inc., Gulf & Western has consolidated and strengthened its publishing holdings to become a factor in every important segment of the book publishing business.

The takeover of Prentice-Hall, at a cost of about $700 million, represented the largest acquisition in G&W history.

The takeover is all part of a restructuring plan devised two years ago by chairman-ceo Martin S. Davis to focus on G&W's profitable core group in entertainment, publishing and financial services.

The sale of the Gulf & Western's consumer and industrial products group "substantially completes" the restructuring plan, Mr. Davis said this June.

Net sales in fiscal year 1984 (the company is on an Aug. 1 to July 31 fiscal year) were $4.18 billion for continuing operations, up 13.3% for the equivalent sectors in 1983. Earnings for continuing operations were $263.3 million, up 8.5% from the period a year earlier.

The entertainment and communications group grossed $1.49 billion, the major part of that—$1.01 billion—from Paramount Pictures Corp. The motion picture and tv production and distribution company also consumed the greatest portion of G&W's advertising expenditures in 1984—$20.6 million, up from $19.2 million in 1983.

Paramount had its most successful year at the box office in fiscal 1984, led by the summer blockbusters "Indiana Jones and the Temple of Doom" (spending: $2.3 million) and "Star Trek III: The Search for Spock," ($2.1 million) which were followed during the Christmas holiday by "Beverly Hills Cop" ($1.6 million). The latter became the highest grosser ever among nonsummer releases.

Those feature films have been followed this year by the high-grossing "Witness," a detective story starring Harrison Ford.

During June and July, 1984, the peak summer months, Paramount had booked 5,000 screens, 25% of the nation's total, to show the "Indiana Jones" and "Star Trek" movies.

Last January, *Variety* listed Paramount as the leading film distributor in the U.S. and Canada, ahead of Warner Bros. and Columbia Pictures.

Paramount Home Video continued to have great success in the videocassette field.

The company has accounted for seven of the ten all-time best-selling cassettes, including "Raiders of the Lost Ark," which became the first million-seller ever.

Paramount's tv group won five Emmy awards in 1984; four for the comedy show "Cheers" and one for "Solid Gold," the highest-rated weekly syndicated tv show, now seen on 204 stations, covering 97% of the U.S. Paramount also has spun off the "Solid Gold Five-Day Workout" videocassette. The company boasts a record for the "America" daily tv magazine show, which begins airing this month, saying it's the first syndicated tv show to achieve full placement in all major markets.

The big corporate news at Paramount was the departure of chairman Barry Diller, who in September, 1984, moved to the top spot at 20th Century-Fox Film Corp. after a 10-year reign at the G&W affiliate. He reportedly had some policy differences with Mr. Davis, who wanted Paramount to emphasize distribution over capital-intensive production. Mr. Diller has been replaced by Frank Mancuso, formerly the company's president of distribution and marketing.

Under Mr. Diller, Paramount had become a major money maker, exploiting the music video potential of "Flashdance" and devising new strategies for marketing home video and tv syndication, as well as turning out a series of high-grossing and critically acclaimed feature movies.

Simon & Schuster had its fourth straight record-breaking year, commemorating its 60th anniversary by generating operating income of $31.6 million, a rise of 89.2%, and sales of $285.7 million, up 35%. It doubled its size through the expansion of Esquire Inc., a leader in educational publishing.

Measured media spending at Simon & Schuster was up slightly, to $404,200 from $320,700 in 1983. The company had a memorable summer in 1984, at one point placing 11 books on the *New York Times* best-seller list, including "Wired" and "The Kennedys."

The company is researching and developing a magazine spinoff from Paramount's syndicated tv series "Entertainment Tonight," along with Paramount's partners in the show, Cox Broadcasting, Taft Television Productions and Tele-Rep.

First issue of the new magazine, which is in keeping with Mr. Davis' strategy to expand communications and leisure-time ventures, is imminent, a spokesman says.

Prentice-Hall, which spent $94,800 in measured advertising during fiscal 1984, moved G&W into the college textbook, business information and training and professional information services, all growth markets.

G&W last year reorganized its publishing group into six operating units, each with its own president reporting to S&S chairman Richard E. Snyder.

The company's financial services sector, whose cornerstone is Associates Financial Services Co., continued expanding into new markets. The financial services institution now operates 515 branches in 40 states under the title of Associates Financial Services Co. The sector accounted for $179.2 million in operating income on revenues of $1.17 billion, a 27% increase over 1983.

A careful retraction

Last Christmas, the Mental Health Assn. of Indiana complained bitterly when Hasbro marketed its Zartan enemy doll as a "paranoid schizophrenic who grows into various personalities." Hasbro changed Zartan's label, apologized and made a donation to mental health research.

Hasbro Inc., Pawtucket, R.I., vaulted into a virtual tie with Mattel as the nation's largest toy marketer following its 1984 acquisition of Milton Bradley Co., Springfield, Mass. A corresponding leap in ad spending made Hasbro the 85th largest national advertiser in 1984.

Hasbro increased total advertising to an estimated $83.7 million in 1984, compared with $56.6 million in 1983—the latter figure a combination of Hasbro and Milton Bradley in 1983.*

Dramatic increases in spending, primarily for spot and network tv, reflect the growing strength of the company's toy lines and the acquisition of Milton Bradley begun June, 1984, with the purchase of 51% of stock, and completed in September, 1984, with payment of $180 million cash for the remainder.

Hasbro's reports its own ad spending in 1984 of $71 million for both Hasbro and a merged Milton Bradley, which is an increase of 132% over expenditures of $30.6 million reported by Hasbro separately in 1983.

The company says its tv spending is below that reported by Broadcast Advertisers Reports (supplied to Leading National Advertisers) because the company's tv time is calculated at rate card rates by those monitoring its advertising, but the time is actually bartered (obviously at a discount). Hasbro advertises often on its own syndicated programs such as its weekly "TransFormers," and on its two shows appearing periodically, "My Little Pony" and "G.I. Joe," and is paid in tv time.

The merger of Milton Bradley, including its Playskool subsidiary, into a wholly owned subsidiary doubled Hasbro's revenue base. Net revenues for 1984 were $718.9 million (including a contribution of $205 million in Milton Bradley net revenues from July 1, 1984) with earnings of $52.4 million. That compares with Hasbro Industries' 1983 net revenues of $223.9 million and earnings of $15.2 million.

Hasbro's revenues for the first six months of 1985 were $537.4 million, up from $191.9 million for the same period in 1984. (If including Milton Bradley revenues of $121.2 million in the first half of 1983, the comparable period would have been $313.1 million.).

Net earnings for the first six months of 1985 more than doubled to $41.6 million from $18.5 million over the similar period in 1984. (Again, including Milton Bradley's net income of a loss of $4.3 million, combined net earnings for the prior year would have been $14.2 million.).

Hasbro's net revenues in 1985 are expected to top $1.1 billion, with earnings of about $90 million, a projected 25% improvement over 1984, analysts say.

With the addition of Milton Bradley's strengths in games, puzzles and children's educational toys, the merger reduced Hasbro's single product risk, says John Campbell, U.S. equity analyst with Pemberton Houston Willoughby in Vancouver, B.C.

For example, TransFormers, transformable robots and vehicles introduced in May, 1984, accounted for about 30% of Hasbro's net revenues in 1984, but the percentage drops to about 13% as a result of the merger, Mr. Campbell says. Milton Bradley's Playskool subsidiary, which accounts for about $120 million in annual sales, also gives Hasbro a base in educational toys, putting it in competition with the Fisher Price subsidiary of Quaker Oats and Mattel, the category leaders. This is a difficult market to crack, Mr. Campbell says, but Playskool should do well with Hasbro's more aggressive style. The addition of Playskool also will create synergies with Hasbro's expanding array of soft toys for infants and toddlers, he says.

In addition, Milton Bradley's far-flung manufacturing and distribution also give Hasbro instant access to international markets, particularly Europe, where Hasbro has had little presence. TransFormers, for example, are being introduced in the U.K. in 1985, Mr. Campbell says.

Analysts are predicting a long-term growth rate for Hasbro of 15% to 20% a year. Slow growth in 1985 in the market for children's educational toys and in board games, following the phenomenal success in 1984 of competitors such as Trivial Pursuit, means the addition of Milton Bradley may not produce a positive effect on earnings immediately.

Analysts are optimistic about 1985 earnings, however, because of the great success of the Hasbro Toys division, which by far represents the largest portion of Hasbro's sales and advertising. Led by TransFormers, G.I. Joe and My Little Pony, the category received $13.5 million in ad spending in 1984—63% spot tv and 37% network, according to Leading National Advertisers. Spending in 1984 was 60.4% more than 1983 expenditures, which were divided 76% spot tv, 21% network tv and 3% magazine.

One of the largest advertising shifts was for TransFormers, the No. 1 boys' toy of 1984. TransFormers accounted for $105 million in sales in 1984, more than triple original estimates. In 1985, the line is expected to bring in $200 million. Equally important, however, is the long-standing G.I. Joe line of products, which accounts for an equal level of sales (about 13%) and a similar level of advertising.

In 1985, Hasbro is introducing an extensive line of new and reformulated products to reach additional niches in the toy, games and crafts markets. Topping the list is a co-venture with Walt Disney Productions called Wuzzles. These six plush fantasy characters from the "Land of Wuz" combine elements of two animals. For example, a Hoppopotamus is part bunny and part hippo.

Advance licensing of Wuzzles has exceeded that of any new character ever, the companies say. Hasbro licenses in the U.S. and Disney licenses internationally. A multi-million-dollar print and tv kickoff began in May, 1985.

New products in the girls' toy line include: Get in Shape Girl!, a line of workout equipment and accessories promoted by Mary Lou Retton; Real Baby, a soft vinyl re-creation of master doll maker Judith Turner's porcelain collectibles, and extensions of the My Little Pony line of vinyl collectibles and plush toys.

For infants and preschoolers, the company is introducing several products scheduled for extensive tv and print advertising around "spokesmom" Joan Lunden, co-host of ABC's "Good Morning America." Ms. Lunden also hosts "Mothers' Minutes," a daily series of one-minute public service programs on child rearing that are fully sponsored by Hasbro Preschool and Playskool divisions.

Most unusual of the preschool products is a rough-and-tumble doll called My Buddy, targeted at boys. Also new is the Muppet Babies Talking Phone, rounding out a group of phone products that includes characters such as Mickey Mouse and Big Family, introducing Baby Potato Head; Musical GloWorm, which has a touch-sensitive computer chip, and additions to the Hasbro Softies and Activity Toys lines.

The lead item in Playskool's 1985 line is Casey, a sing-along, read-along cassette player supported by a multi-million-dollar print and tv campaign beginning in August. Casey's eyes and mouth appear on an electronic screen and make about 64 facial expressions corresponding to sounds from cassette recordings. Casey comes with book and tape sets of stories and educational materials. The product is an attempt to establish Playskool in the audiovisual toy category, which has seen 60% growth over the past two years, analysts say.

Milton Bradley is pursuing an aggressive strategy on its 125th anniversary in 1985. This follows spending last year of about $2.6 million, most of which was for spot tv promoting game products. Tapping the market for trivia games, the division is introducing Stage II, with a tv and print campaign featuring Gene Shalit, NBC's "Today" show movie critic. Mr. Shalit's message is: "Once you've played Trivial Pursuit, you're ready for Stage II."

The division also is introducing a variety of board games this year, including Rodney Dangerfield's No Respect, a strategy game, and Scotland Yard. Other new products include word games, action/adventure and other games, many of which relate to licensed characters, such as the Wuzzles, and are targeted at children and adults.

Hasbro has undergone some corporate restructuring in consolidation. Milton Bradley remains relatively autonomous in its domestic and international operations, while its former Playskool subsidiary has been folded into operations at Hasbro. Playskool headquarters were relocated early in 1985 from Chicago to Hasbro's Pawtucket, R.I., headquarters.

Production facilities in 1985 are being relocated to Milton Bradley's East Longmeadow, Mass., facility. The goal is to consolidate Playskool and Hasbro's marketing and research and development staffs.

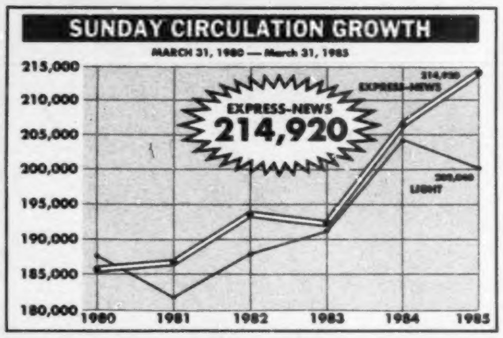
H.J. Heinz Co., Pittsburgh, the nation's 34th largest advertiser, spent an estimated $227.3 million in U.S. national advertising in 1984, a 3.1% increase over the previous year.

The company's marketing budget increased 9% in fiscal 1985 to $303 million, and is slated to rise about 10% in fiscal 1986.

Sales for the 1985 fiscal year, which ended May 1, 1985, were $4.04 billion, a 2.2% increase from the 1984 fiscal year. Net income rose nearly 12% to $265.9 million. Operating income rose 8.2% to $491.4 million. Sales for the year were reduced by about $200 mil-

New ABC Audit Shows Express-News Strengthens Its Lead, Grows Faster Than San Antonio And South Texas...



Latest Audit Bureau of Circulations figures for the period ending March 31, 1985 (and released Aug. 3) show the Sunday Express-News continues to exceed the population growth rate of San Antonio and South Texas while the Sunday San Antonio Light is losing circulation.

The fully audited figures show the Express-News leading the Light by 14,880 on Sunday and by 32,549 daily.

The Express-News continues to be the paper of choice for the state's third largest market area.

The San Antonio ADI is home to more than 1½ million adults who earn $13.1 billion annually and spend $7.3 billion on goods and services.

Growing South Texas demands a quality and aggressive newspaper whose circulation is outpacing the area's growth. In addition, we lead the San Antonio Light in number of pages printed, volume of news presented, and in all categories of advertising. The Express-News also leads in the all-important area of upscale demographics.

lion because of foreign-currency exchanges.

Anthony J.F. O'Reilly, president-ceo, called the year "satisfactory, given the strength of the U.S. dollar, which adversely affected translation of foreign operations." Fourth-quarter sales for the year were $1 billion, down 3.5% from the previous year because of lower foreign exchange rates and an extra week in the 1984 fiscal period, the company says.

Measured advertising for calendar year 1984 was $90 million, an 18.2% increase over the nine-media measurement in 1983. Heinz ketchup received the most measured ad support, with $17 million in network and spot tv, up 5.6% from 1983, according to six-media figures monitored by Leading National Advertisers.

Weight Watchers frozen meals received $10.6 million in ad support, up 79.7% from 1983, and 9-Lives canned cat food with $8.8 million spent in network and spot tv advertising, was up 20.5% from 1983, according to LNA.

Heinz ketchup, for which the company is best known, continued to gain market share in fiscal 1985, holding a 51% share in case sales and 58% in dollar share for the 52 weeks ended June 21, 1985. Heinz's introduction of ketchup in a 28-oz. squeezable plastic bottle in 1983 fostered the line extension of ketchup in a 64-oz. plastic bottle in 1984. The larger unit is being tested in more than 50% of the country and is scheduled for national distribution, although the company won't say when.

Heinz also introduced Pouch Pak ketchup in metalized bags in 1985 as a replacement for 10-lb. cans used in the foodservice industry.

Ad spending for Heinz vinegars rose substantially, to $3.4 million in 1984 from $256,000 in 1983, virtually all in network and spot tv, according to LNA. While Heinz five specialty vinegars had been the focus of the previous year's advertising to support redesigned packaging, Heinz white and cider vinegars received attention in 1984. New uses were pushed.

In the spring of 1984, Heinz built on a print campaign with tv advertising urging consumers to use Heinz white vinegar to clean automatic drip coffee makers. Sales of Heinz white and cider vinegars rose 30.1% in three test cities as a result of test advertising, the company says. Heinz also launched a network tv campaign for the white and cider vinegars with the theme "The natural vinegar for 100 years."

The company introduced Heinz picante sauce in 1984. Supported with $100,400 in advertising, all magazine, the 12-oz. jars of seuce in mild, medium and hot varieties were promoted as containing "fresh chunks of jalapeno, onions, tomato with just the right kick."

A reformulated Heinz 57 sauce received $5.03 million in network and spot tv advertising, using as spokesman, actor Vic Tayback who plays Mel on CBS' "Alice." Mr. Tayback also promoted the sauce as "all-purpose" on an extended media tour.

Hoping to boost its 13% share in the $650 million baby-food market, Heinz introduced a line of dried-instant baby foods. Prepared by adding water, Heinz instant baby food initially was available in 23 varieties.

Rolled out in September, 1984, in test markets in the Southeast, Southwest and West, the product was expanded to national distribution in February, 1985. Ad spending for the new product line through the end of 1984 was $966,500, some 94% of that in spot tv, according to LNA.

Heinz has added four new varieties to its instant baby food line, which will reach western markets first, with national distribution slated for January, 1986. The company says its share in the wet and instant baby food market has risen to 17% as a result of the 1984 dried-instant line introduction.

Heinz barbecue sauce was reformulated and given the name of Heinz Thick and Rich barbecue sauce. Available in six varieties, it was rolled into national markets in the spring of 1985.

The company has repositioned its Alba hot cocoa mix as a high-calcium drink to reflect a growing interest among women for high-calcium products. New packaging displays the product as Alba high calcium sugar free hot cocoa mix. The Alba line got $3 million in ad spending in 1984, up 67% from the previous year.

In food for four-legged creatures, Heinz subsidiary Star-Kist Foods, Terminal Island, Cal., retained finicky Morris the cat for promotions for two new cat food lines under the 9-Lives brand—9-Lives Tender Meals semimoist cat food and 9-Lives Crunch Meals dry food products. The company is targeting the semimoist and dry cat food market segments for strong growth opportunities; it already has garnered the top spot in the canned cat food market segment, according to Stephen Carnes, food industry aalyst with Piper Jaffray & Hopwood Inc., Minneapolis, Minn.

In a $20 million campaign, the largest ever for Star-Kist Foods, Morris the cat was featured in commercials with the message: "Now there is a dry cat food and a soft moist good enough for Morris." Ad spending for 9-Lives canned cat food rose 21.2% in 1984 to $8.8 million, divided almost equally between network and spot tv.

Ad spending for Meaty Bone dog biscuits rose to $3.5 million in 1984 from $1.4 million in 1983, and advertising focus shifted to network tv from spot tv. The product reached national distribution in May, 1984.

Continuing to slice up the frozen potato market, Heinz subsidiary Ore-Ida Foods in Boise, Ida., introduced a low-calorie line of fried potatoes called Lites. Lites french fries have 100 calories per serving as compared with 160 calories in other potato cuts and were introduced in test market in July, 1984, with a national rollout in the summer of 1985.

Ore-Ida also expanded its Cheddar Browns frozen hash brown and cheese potatoes from test markets to national distribution in October, 1984. Ore-Ida bolstered its ad spending for its line of Ore-Ida Tater Tots to $1.4 million in network and spot tv from $124,900 in 1983, mostly in newspaper supplements. The new low-calorie line was supported with $466,200 in spot tv advertising in 1984, according to LNA.

Ore-Ida spent $8.8 million on its entire line in 1984 with Golden Fries and French Fries getting the big dollars, up 39.7% from 1983. Ore-Ida continued to use the theme, "You can't go wrong with Ore-Ida," to support its existing products, with a combination of 30-second and split 30-second spots.

In a move to concentrate resources elsewhere, Ore-Ida sold its La Pizzeria frozen pizza and Mrs. Goodcookie frozen cookie lines to United Products, Sarasota, Fla. The company would not disclose the amount of the August, 1984, sale. Under terms of the sale, Ore-Ida will continue to produce La Pizzeria pizzas for three years at its Ohio plant, and Mrs. Goodcookie will be produced by United Products, which distributes Dutchies brand frozen pretzels and Butter Gems frozen rolls.

Weight Watchers International, Manhasset, N.Y., in the six media measured by LNA, increased its ad expenditure in 1984 by 22.9% to $21.5 million, with frozen meals getting about half of that.

Spending was increased 78% for the Weight Watchers diet program to $5.4 million.

Weight Watchers entered test markets with a line of turkey-based, low-calorie luncheon meats.

The meats, which have fewer than 100 calories per serving, include franks, sausage, ham, salami, pastrami and turkey breasts.

The Weight Watchers bread line was expanded to include cinnamon-raisin and honey multigrain breads, joining light rye, white and cracked wheat breads.

Heinz shifted its Weight Watchers ice cream, bread, fruit snacks and new products to MCA Advertising from Doyle Dane Bernbach in July, 1984. DDB continued as the agency for the Weight Watchers frozen meals and other Weight Watchers products sold through Heinz subsidiaries Foodways National and Ore-Ida Foods.

Weight Watchers products that received new ad spending in 1984 included Weight Watchers margarine, mayonnaise, meat products, non-fat yogurt in four varieties and spaghetti sauce in three varieties. Most of the spending was concentrated in magazines.

Other food	178	163	9.1

Hershey Foods Corp., Hershey, Pa., spent an estimated $79.2 million in U.S. advertising, a 15.3% increase from 1983, making it the nation's 88th largest advertiser.

Hershey had $1.89 billion in worldwide sales in 1984 and $109 million in earnings, for a 11.3% increase in sales and an 8.5% increase in net income from 1983.

The company's business is primarily in the chocolate and confectionery business, but other business range from Friendly Ice Cream and Family Restaurants to pasta products and a commercial coffee service.

Hershey Chocolate led Hershey's three divisions with 68% of sales or $1.3 billion, and operating income of $195.8 million. Friendly Ice Cream Corp. contributed 22% of sales, $427.1 million, and operating income of $41.7 million, while other food products and services contributed $178 million in sales and operating income of $4 million.

Increased sales for Hershey Chocolate resulted from both an increased sales volume and a hike in the bar product retail price from 30¢ to 35¢ in early 1984, according to the company.

Hershey spent $60.5 million in measured media during 1984. Its estimated $18.7 million in unmeasured advertising was spent on coupons and promotional advertising, according to a company spokesman.

Hershey Chocolate continued in a heated battle with Mars Inc. for dominance of the $8 billion-a-year U.S. candy market. Combined, the companies sell about 70% of the candy bars in the U.S., while Peter Paul Cadbury sells about 9% and Nestle about 6%.

Such Hershey familiars as the Hershey Bar, Reese's peanut butter cups and Mr. Goodbar anchor Hershey in the competition. The company now heavily promotes new products that last year contributed 20% to the company's candy sales.

"Increasingly, Hershey is looking to tap an adult market for its products," says G. Leonard Teitelbaum, an analyst at Merrill Lynch, New York. "They want to reposition candy away from a kid's snack."

Such products as Skor and Take Five are aimed at adult consumers. Spending on Skor, a chocolate-coated toffee bar introduced in 1982, was increased by 32% over 1983 levels, to $3.2 million in measured media, according to totals for six-media monitored by Leading National Advertisers.

In a move to broaden product lines, Y&S licorice Twizzlers were rolled out nationally with the support of $1.2 million worth of spot and network tv.

Another important diversification for Hershey has been its entrance into the highly competitive $440 million granola bar market. Quaker holds a key 45% to 49% share of the market; General Mills, 28% to 30%; Pillsbury, 8% to 10%; Hershey's New Trail, 6% to 7%, and Ralston Purina, less than 1%.

"We're still in there fighting," says Tony Pingitore, director of new product development for Hershey Chocolate.

To maintain its stake, Hershey last year increased its measured advertising spending on New Trail by 62% to $4.7 million. Network tv claimed $4 million of the total, with the remainder spent on magazines. New Trail also expanded its product line to six varieties and unveiled new packaging.

In another big move, Hershey rolled out nationally its Hershey chocolate milk in 1984. Licensing its name to the dairies which produce the milk, Hershey spent $2 million in measured spending for the chocolate milk which represented an increase of 135% over product-introductory spending levels.

Measured spending for Friendly Ice Cream and Family Restaurants declined by 24%, to $3.4 million. During the year, the company opened 47 restaurants for a total of 707 in 16 northeastern and midwestern states.

"The company is making a move to broaden its geographic dispersion from the Northeast where emphasis on a seasonal business based on a dessert item has deterred its growth," says Mr. Teitelbaum of Merrill Lynch. Friendly Ice Cream is sold at a counter in Family Restaurants a la Howard Johnson's. With many patrons using the restaurant just for its ice cream, Nestle needs to either expand the business where ice cream is more year-round, or emphasize the restaurant part of the business.

The company also is testing a concept for ice-cream dip shops called O'goodies! A second store opened in 1984 where customers create their own sundaes and ice cream flavors and can obtain a variety of beverages and products baked on the premises.

With the November acquisition of American Beauty Macaroni from Pillsbury for $55 million, Hershey has bought the No. 1 market position in the $1.3 billion domestic pasta industry. To signify the consolidation, this Hershey subsidiary was renamed Hershey Pasta Group from San Giorgio-Skinner Co. Hershey holds an estimated 17.2% share of market followed by CPC International (Mueller pasta) at 15.5% and Borden 11.9% (Creamette, Luxury and Ronco). In 1983, Mueller held a 16% share to Hershey's 10%.

Hershey's five regional pasta brands, San Giorgio, P&R, Skinner, Delmonico and American Beauty, are carried in stores in 40 of the 48 continental states.

The only down note to Hershey's bottom line during 1984 was Cory Food Services, which sustained an operating loss, despite a modest increase in sales.

Significant changes at the top of Hershey Foods Corp. found Richard A. Zimmerman becoming chairman-ceo upon the retirement of William E.C. Dearden. Kenneth L. Wolfe succeeded Mr. Zimmerman as president-chief operating officer from senior vp-chief financial officer.

IC Industries has evolved from a Midwest railroad into a diversified, multinational company with a strong concentration in three areas—specialty foods, consumer services and commercial products. The railroad, Illinois Central Gulf, remains a successful, albeit less-dominant, part of the operation.

Consumer products at the Chicago-based company, ranked 65th among national advertisers with an estimated $127.3 million in advertising in 1984, up 13.5% from 1983, accounted for $1.86 billion of the company's sales for the year, a 2.7% increase over 1983.

Of total sales, St. Louis-based Pet Inc. products accounted for $1.14 billion, down 1% from 1983, primarily because of a restructuring of Stuckey's operations and closing of 29 of its marginal roadside units. Pet sales would have increased 4% excluding Stuckey's from the figures.

Then in May, 1985, Stuckey's was sold back to W.S. Stuckey Jr., whose father began the group in the 1930s in Eastman, Ga., as a roadside resting place that sold pecans and candies made by his wife.

Pet, the main advertised line at IC, continued a strategy of developing high-margin specialty food products and concentrating on four core businesses—Old El Paso Mexican foods, frozen foods, Whitman's candies and confections; and international operations, which utilize Underwood's manufacturing facilities and distribution systems.

Of the company's total advertising, promotion and marketing spending of $170 million in 1984, more than $90 million was spent by Pet in advertising and promotion, according to the company. Most was in support of Pet's high-margin specialty food products. Change was evident late in the year as the Pet units divided assignments for the specialty and dry grocery groups between Grey Advertising, New York, and Workshop West, Beverly Hills, Cal., which previously handled both.

Workshop West was assigned the creative for Old El Paso dry grocery items and given selected projects for Pet evaporated milk, Underwood spreads, Ac'cent flavor enhancer, B&M baked beans and other small brands.

The same agency also is involved with the unveiling of a collection of 18 new products by the dry grocery group. These include a three-item line of Thick & Chunky Mexican sauce mixes without preservatives, two new Ac'cent products and two new baked bean varieties.

The creative work for the specialty group turned over to Grey Advertising included Downyflake frozen breakfast foods, Old El Paso frozen Mexican entrees, Pet-Ritz pie crusts and Whitman's chocolates.

Pet has been a leader in the frozen pie-shell market with its Pet-Ritz pie crust claiming 60% of that market, but it is facing challenges from Pillsbury, Keebler, Kellogg and others. A tv and magazine campaign, launched in September, 1984, was aimed at expanding that market by emphasizing convenience. The "just fill and bake" theme was targeted for daytime and prime-time tv and women's magazines, with a special *Reader's Digest* eight-page supplement offering new recipes. Media spending for the campaign was slightly less than $600,000.

Pet products received 38% of IC's six-media measured spending of $46.1 million, according to Leading National Advertisers. Measured totals for newspapers and spot radio—not part of LNA totals—increase IC's total to $57.2 million. Major advertising support for Pet products, focusing on broadcast, included $3.2 million for Ac'cent flavor enhancer, up 28%; Old El Paso Mexican line, $6.4 million, down 4.5%, and B&M baked beans, $1.5 million, up 50.9%. The company puts heavier emphasis on point-of-purchase and other nonmedia advertising.

Midas Muffler Shops had record revenues of $298 million in 1984, up 10%, and pretax income of $37.6 million, down 4.8% from 1983 when Midas had a $6 million favorable adjustment to its warranty expenses. Midas shops were supported by $46 million in advertising and promotion.

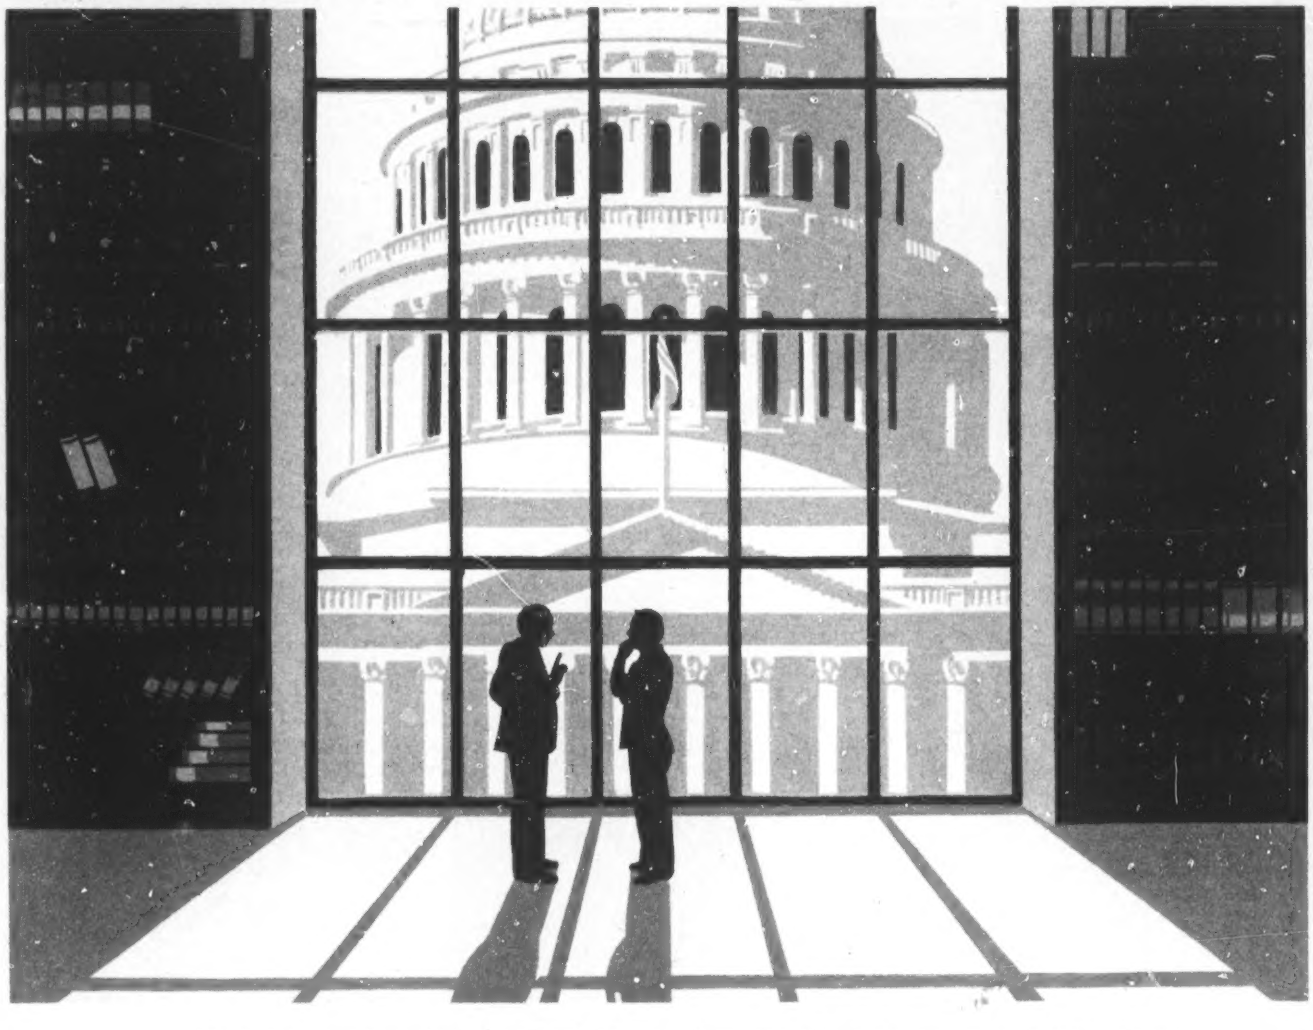
Of that total, $37.7 million was spent in measured media, about $26.5 million split evenly between spot and network tv, and the rest in spot radio. The balance was used for production, point-of-purchase materials, dealer incentive programs and a pr effort now in its fourth year. Midas spent $32.1 million in measured media in 1983.

Midas added 74 automotive service shops in the U.S. in 1984. It also expanded its services to include front-end suspension systems, brakes and shock absorbers. By the end of the year, there were 1,415 Midas shops in the U.S., 165 in Canada, 209 in Europe and 36 elsewhere in the world.

IC's soft drink operations, principally Pepsi-Cola General Bottlers (IC also has Dad's root beer), had record sales of $420.2 million, a 7% increase over the previous year. Profits were $37.8 million, down 8.3% because of increased competitive pressures and higher ingredient costs.

By acquiring three new franchises in Missouri and Iowa, the company expanded its total market to more than 16 million people. Pepsi-Cola General Bottlers now has 11 franchise areas, including the major market areas of

We Are Movers, Shakers, And Opinion Makers.



The Washington Post

No city shapes America the way Washington does. This is where movers and shakers the world over come to lobby and legislate, influence and negotiate.

These powerful people have access to every newspaper in the free world. Yet, there's only one paper Washington's decision makers read every day. Without fail.

The Washington Post.

All 100 Senators, 438 out of 439 Congressmen, and 99.9% of key Washington-based executives regularly read the daily Post. And use it on the job as a primary source of information.

All of which makes The Post the primary advertising medium when you want to influence the people who influence America. **The Washington Post**

We Are Everything Influential In Washington.

Source: Arro Interviews. ©1985, The Washington Post. Represented nationally by Sawyer • Ferguson • Walker Co.

Chicago, Kansas City, Des Moines, Louisville and Cincinnati.

The changing face of the soft drink market had its impact on Pepsi General, as the bottler was in the forefront of bringing to market a new diet Pepsi-Cola sweetened entirely with NutraSweet. It also test-marketed Slice, a new lemon-flavored product from Pepsi-Cola.

Pepsi General, in a joint effort with Pet, developed Orchard Sun to compete in the $59.3 million aseptic fruit-drink market. Orchard Sun is a 10%-juice beverage packed in 12-oz. aseptic boxes. It is available in orange, punch, grape and apple flavors.

Orchard Sun faces competition from Shasta's Capri Sun, which has 35.6% of the market, and from other products such as Coca-Cola's Hi-C, Del Monte's Hawaiian Punch and Ocean Spray Cranberry juice drinks. The regional introduction of Orchard Sun was supported by a $250,000 ad schedule on spot tv.

In October, 1984, IC Industries acquired for $592.8 million Pneumo Corp., a Boston-based defense contractor. First-quarter 1985 results at Pneumo showed a backlog of $1.2 billion, 75% of which are firm contracts and the balanced authorized contracts. Of those, about 70% were military.

Pneumo has four operating divisions, including Cleveland Pneumatic, a designer and producer of aircraft landing gear. National Water Lift Division in Kalamazoo, Mich., designs and manufactures aircraft flight and engine controls. The Claud S. Gordon Co. in Richmond, Ill., produces thermocouple wire. Carls Drug, Rome, N.Y., is a chain of drugstores.

IC's fifth division, P&C Food Markets, the country's 26th largest supermarket chain, was sold in May to a company formed by P&C senior management and an investor group. In commenting on the sale, IC officials said it was consistent with its plan to concentrate on specialty foods, consumer services and aerospace products.

The dairy division was sold in August, 1985, to Southern Dairy, a new unit of Miami-based KMC Group. The sale did not affect Pet's evaporated milk business.

Other companies under the IC umbrella are Abex Corp., maker of hydraulic pumps and motors and servovalves for many of the free world's airplanes and space vehicles; Hussman Corp., manufacturer of environmental control and refrigeration systems, and the Illinois Central Gulf Railroad operations.

As a result of the acquisition of Pneumo, the managements of both Pneumo and Abex have begun to explore ways they can combine their expertise to develop complete aircraft flight control systems. This could generate combined aerospace sales and earnings greater than either could achieve separately.

Illinois Central Gulf regained profitability in 1984 and is reshaping itself as a balanced transportation company serving the area between the Great Lakes and the Gulf of Mexico. The ICG has a system of freight movement with expanding trucking services to complement its railroad operations.

In keeping with this streamlining, the railroad unit announced during the third quarter of 1985 the sale of 713 miles of rail lines, located primarily in eastern Mississippi, to Gulf & Mississippi Railroad. ICG is the country's seventh-largest railroad, with $1 billion in revenue, and represented less than one-fourth of IC Industries' income in 1984.

IC Industries has struck it rich in the franchise business, both as a franchiser with Midas International and as a franchisee with Pepsi-Cola General Bottlers. The company is relying on that experience as it plies the acquisition trail in search of one or more service-oriented companies cast in the Midas mold.

In a campaign created by Gardner Advertising, St. Louis, the company spent close to $1 million in an attempt to attract investors. Each of the ads emphasized a single market fact about one of the IC companies. The ads were placed in carefully selected media targeted at the investment community and resulted in a 500% increase in queries from potential investors.

International Business Machines Corp., Armonk, N.Y., the 18th largest advertiser, increased national advertising spending by 26.6% to $376 million in 1984.

A significant boost in measured spending was recorded in IBM's line of personal computers, which received $62.6 million in 1984, up 160%. Uncertainty reigns, however, in 1985 because of softness in PC sales and IBM's decision to halt production in, March, 1985 of PCjr, a product accounting for $32.5 million, or 17.1% of 1984 measured media spending.

PCjr represented IBM's largest 1984 outlay, divided 60% network tv, 36% magazine, and 4% spot tv.

But halting PCjr is expected to do less damage to IBM's profitability than to its reputation. While shipments of IBM personal computers tripled in 1984, jumping IBM's marketshare to 35% from 24% in 1983, their sales accounted for less than 7% of IBM's $45.94 billion in 1984 sales, says Bill Ablondi, vp-markets group at Future Computing, Dallas. And while home PCs accounted for 40% of units shipped in 1984, they accounted for only 20% of revenues. IBM's earnings in 1984 were $6.58 billion, up 20%.

IBM has perhaps 100,000-plus PCjrs to unload, but being a low-cost producer, it is not expected to take a beating even if predictions by Future Computing hold that home computer sales fall to 3.2 million units, compared with 4.6 million units in 1984. Future Computing predicts that total personal computer sales will fall from 7.6 million units in 1984 to 7.3 million in 1985, jumping to 9.2 million units in 1986.

Price-cutting and rebates on the PCjr stimulated sales in the fourth quarter of 1984, when about a third of all PC sales normally take place. About 275,000 PCjrs were sold in 1984. But the discounts also cut heavily into Apple Computer's sales.

Apple had a 17% share of personal computers in 1984, but was pushed out of first place by IBM, with a 35% share. Apple's share is expected to drop to 14% in 1985, Mr. Ablondi says.

IBM's sales for the first six months of 1985 were $21.2 billion, down 2% from the same period in 1984, with net earnings falling to $2.4 billion, down 15%.

Matthew Meehan, analyst for Salomon Bros, New York, attributes the decline to delays in orders as a result of announcing key new products. Another factor was the strong U.S. dollar, which slashed foreign sales from roughly 50% of revenue in 1980 to 40% in 1984, and cut net revenue in the first half of 1985 by 8%.

IBM accelerated introduction and-delivery of the 3380 "double capacity" disk drive, and the IBM 3090, a new generation mainframe known as Sierra. IBM began shipping the products in August 1985, three months ahead of its October target.

IBM, which controls 78.2% of the U.S. market for mainframes, needed the introductions to maintain growth objectives that would make it a $200 billion company in 1995, says Thomas Fontana, research analyst for The Gartner Group, Stamford, Conn. Accelerating Sierra and the 3380 drive could add $1 billion-plus to IBM's third quarter revenues, analysts say.

IBM spent $16 million in 1984 on measured media for business computer systems, divided 83% network tv, 15% magazine and 2% spot tv. Another $4 million in measured media was for medium-size business computers in 1984. The measured outlay for general promotion was $22.7 million, divided 70% network tv and about 30% magazine. Much of IBM's general promotion focused on its sponsorship of the 1984 Summer Olympics.

Revenues for the first nine months of 1985 are expected to fall as a result of sluggish domestic orders, Mr. Meehan says. Perhaps for this reason, IBM announced price cuts of 6% to 23% in June, 1985, to stimulate demand for mainframe and minicomputers. IBM derived an estimated 60% of its 1984 revenues from sales of mainframes services, Mr. Fontana says.

Additional growth is expected from IBM's moves into convergent technologies, such as telecommunications. IBM on Nov. 21, 1984, acquired Rolm Corp., Santa Clara, Calif., a maker of telecommunications products, for $1.26 billion. But IBM was forced to sell Rolm's Mil-Spec military computer division to Loral Corp., New York, for about $100 million.

IBM's pending trade of Satellite Business Systems with MCI for 16% of MCI's stock and warrants for 2%, would enable IBM to rid itself of a marginal business and open opportunities in telecommunications with the second largest long-distance carrier, Mr. Meehan says. The trade is valued at about $400 million, depending on the price of MCI stock on regulatory approval of the trade, which is expected by year-end. IBM can acquire

as much as 30% of MCI without MCI's further approval.

In February, 1984, IBM formed a joint venture with CBS Inc. and Sears, Roebuck & Co. to form a videotex service for people with personal computers, dubbed Trintex. IBM also formed a joint venture in March, 1984, with Merrill Lynch, called International MarketNet, to replace "dumb" stock quote terminals on brokers' desks with personal computers that perform a variety of functions.

Yet another joint venture in September, 1984, with Genoa, Italy-based Selenia Elsag Group seeks to develop software and automated products used in various manufacturing environments.

John F. Akers, IBM's president since February, 1983, was elected chief executive in February, 1985. John R. Opel retains the title of chairman.

ITT Corp., New York, was the nation's 44th largest advertiser in 1984 with total estimated U.S. ad spending of $168 million, up 25.2%. Product line was narrowed through divestiture by the conglomerate to firm up three broad areas of concentration—telecommunications, engineered products and services.

The sale of oil and gas interests and a publishing arm earlier this year are part of a two-year plan to divest another $1.7 billion in assets through 1986. Not included in this total was the sale in September, 1984, of Continental Baking Co. As of September, 1984, the book value of ITT's assets totaled $14.1 billion.

Funds obtained from the divestments will go to lessening ITT's $4 billion debt load and providing the money needed for its expansion plans, primarily in the hotly competitive telecommunications industry.

In July, 1984, ITT reduced its quarterly common share dividend from 69¢ per share to 25¢ per share. This cash-saving measure brought the company's dividend-to-earnings ratio in line with the high-tech environment in which ITT is concentrating.

During 1984, net income totaled $448 million, down 33.6% from 1983. Sales totaled $12.7 billion, up 1.7%. Discontinued operations were factored out of prior year reporting to show year-to-year comparables. As of the end of the first half, 1985, ITT sales had increased to $5.1 billion, up 5.7%, and net income improved 50.7% to $118 million.

Total measured advertising expenditures for 1984 were $43.5 million, down 20.8% from 1983. ITT budgets much of its advertising on consumer-oriented businesses like Scott lawn products, Sheraton Hotels and Hartford Insurance. Its biggest outlay generally is for general promotion to build ITT recognition.

Major shifts in media in 1984 included spot tv, down 54.6%, to $11.8 million, and spot radio, down 65%, to $1.1 million. Network tv expenditures went up 33.4%, to $13.2 million. Newspaper spending was up 21.8%, to $4 million, and network cable jumped from $8,000 in 1983 to $681,000.

ITT general promotion received $13.1 million in measured advertising in 1984, mostly network tv and magazines, compared with spending of $6.1 million the previous year.

ITT's entry into the personal computer field, the Xtra, took one of the largest media budgets—$5.7 million—with spot tv receiving $3.6 million and magazines, $1.3 million, and spot radio, $833,000. It was given a voice command option in an effort to make the Xtra more competitive with other personal computers. The Talking Xtra will respond to a vocabulary of up to 200 words; to promote this, ITT's corporate agency, Biederman & Co., created a tv spot featuring a boy, accompanied by his St. Bernard dog, who operates an Xtra with voice commands and barks.

Spending on Sheraton was down 11.4%, to $8 million, according to Leading National Advertisers, which monitors six media. The Sheraton system presently includes more than 475 hotels and inns in 55 countries, with a projected increase to 700 hotels in 60 countries by 1989. In March, 1985, the Sheraton Corp. signed a contract to operate a 1,007-room luxury hotel in Beijing. The Great Wall Sheraton Hotel Beijing is the first hotel in the People's Republic of China to bear the name of an international hotel company.

Spending for Hartford Insurance Group was down 22.4%, to $2.8 million. The major reduction came in the life insurance category. According to six-media LNA figures, spending in life insurance dropped from $1.1 million in 1983 to $6,300, all in magazines. Hartford ranked 10th in the U.S. property and casualty field on the basis of 1983 written premiums. Earnings were off for 1984, principally because of weather-related losses.

ITT's billion-dollar gamble—its attempt to adapt the 3-year-old System 12 digital switching system to North American standards—appears to be paying off. In the first half of 1985,

Outthink.

Why do some of America's best-managed companies come to a marketing communications agency in Westport, Connecticut (when they could pick and choose from just about any agency in New York, Los Angeles, Chicago, Dallas or *wherever*)?

Because that agency delivers *consistently* superior results, and does so by outthinking (not outspending) its clients' competitors.

Outthinking is only the beginning at Promotion Development Corporation. We translate our strategic thinking into hard-hitting executions with on-time, on-budget performance in:

☐ Consumer & Business-Directed Sales Promotion Campaigns
☐ Direct Response Programs
☐ Audio-Visual Presentations
☐ Field Marketing & Sales Force Motivation
☐ Collateral Material Development

The PDC Case History Series, an ongoing program of valuable special reports, can tell you something about how outthinking allows us to outcreate, out-write, outdesign, outproduce and, ultimately, *outperform* the competition

The most recent special report in this valuable series tells how we helped the makers of Ecotrin capitalize on a major marketing opportunity.

A call to Sam Stryker, PDC's Senior Vice President – Business Development, will bring you a copy of this valuable document. And we'll also send you a copy of our PDC brochure detailing the Five-Phase process we use to help implement winning programs for Citicorp, General Foods, Duracell, Parker Brothers, MCI Communications and other major American corporations.

PDC. The marketing communications agency where outthinking the competition is only the beginning....

We help you outthink the competition.

ITT sold System 12 equipment to Southern Bell and Pacific Bell—the first time a Bell operating company has purchased the equipment. The system will enable the companies to provide customers with new custom local-area voice and data services, new credit card applications, 800 number projects within the service area and city-wide centrex.

Reflecting the introduction of new products and improved market share in its retail segment, spending for O.M. Scott & Sons Co. was up to $2.8 million from $670,000 in 1983, primarily in spot tv for Scott's Turf Builder and lawn multi-product advertising, according to LNA.

ITT also divested in August, 1984, one of its perennial ad spending leaders when it sold Continental Baking Co., Rye, N.Y., to Ralston Purina for $475 million in cash. Continental's 1983 sales were $1.5 billion, yielding net earnings of $41 million. Wonder and Home Pride breads and Hostess baked goods are the primary brands at Continental, which spent about $20 million on measured advertising in 1983. Also, during the first quarter of 1985, ITT sold a majority of the assets of Eason Oil to Sohio and Sonat Inc. for $239 million.

In April, 1985, ITT's publishing businesses were sold to Macmillan Inc. for $75 million. Included in the sale were Bobbs-Merrill Co., Intertec Publishing Corp., Marquis Who's Who, G.K. Hall Corp. and Michie Co. Also sold were Research & Review Service of America, Character Licensing and ITT Bobbs-Merrill Educational Publishing Co. The ITT publishing group had 1984 sales of more than $95 million.

ITT sold 12 Industrial Technology Corp. companies for $400 million to Forstmann Little & Co., a private investment company specializing in acquiring companies through management buyouts. Additionally, the company has on the block a bevy of companies from its Industrial Technology group. The companies involved had sales of about $600 million last year, or about 13.8% of the total sales and revenues of the Industrial Technology group.

In May, 1985, ITT announced plans to sell Pennsylvania Glass Sand Corp. to United States Borax & Chemical Corp. of Los Angeles, a subsidiary of Rio Tinto-Zinc Corp. p.l.c. of London. Pennsylvania Glass Sand is a producer of silica sand and attapulgite clay products for the glass, chemical, oil and gas, and agricultural industries. Net sales in 1984 were $83.5 million.

During 1984, ITT acquired Valtec in West Boylston, Mass., from U.S. Philips Corp., to complement its position in fiber optics, and took a 44% interest in Christian-Rovsing in Denmark to enhance its presence in software systems.

In April, 1985, ITT acquired Baylock Mfg., Leonard, Mich., a producer of high-quality plastic tubing and other plastic parts and assemblies for the automotive industry.

ITT named Edmund Carpenter president-chief operating officer in July, 1985, giving him one of the titles held by Rand Araskog, who continues as chairman-ceo. It also consolidated management of the company's businesses into two groups, manufacturing and services. ITT also promoted two exec vps, DeRoy Thomas and M. Cabell Woodward Jr., to vice-chairmen.

Industrial	224	223	0.3

Johnson & Johnson, the 25th largest national advertiser with an estimated $300 million in spending, returned a static performance in 1984, a period marked by encroachment from competitors in its analgesic and sanitary protection markets, reduced hospital admissions caused by hospital containment measures, and fluctuations in foreign currency against the dollar.

The New Brunswick, N.J.-based company's worldwide earnings increased 5.2% on sales that improved only 2.5% in 1984 as Johnson & Johnson boosted its U.S. advertising 1.1% over the previous year—a percentage that, coupled with J&J's aggressive introduction of new products and movement, meant considerable fluctuations in the ad support of its battery of products.

Domestic sales rose 3.5% in 1984 to $3.74 billion, or 61% of worldwide sales, while operating profit in the U.S. dropped 5.9% to $429.9 million, or 48.7% of worldwide operating profit. Foreign sales over-all rose 1.2%, to $2.39 billion.

Johnson & Johnson's consumer segment continues to pace the company's business segments in both sales and advertising. In 1984, 42.5% of total sales, or $2.60 billion, was generated by the consumer division, although operating profit slumped 26.1% to $305 million, or 34.6% of total operating profit. The company says declining operating profits were the result of increased investment spending to meet competitive activity in consumer markets. Johnson & Johnson spent virtually all of its measured media of $210.7 million, up 24.5% from 1983, on consumer products.

Despite the pressures, Johnson & Johnson in 1984 still ranked No. 1 in the U.S. in nine consumer product markets: External sanitary protection, baby toiletries, sunscreens, adult and children analgesics, adhesive bandages, dental floss, first aid products, fluoride mouth rinses and over-the-counter female contraceptives.

Some of Johnson & Johnson's key brands are experiencing strong competition, including its three sanitary protection brands—Stayfree, Sure & Natural and Assure!. Elbowing their way into J&J's traditional markets were new products introduced by Tambrands' Petal Soft and Procter & Gamble's Always. J&J's Tylenol is being pressured by new nonprescription analgesics introduced by American Brands' Whitehall Laboratories' and Bristol-Myers's Datril.

Increased competition in these areas has led Johnson & Johnson to spend about $62.2 million alone on Tylenol in its various forms, an increase of 9.5% over the previous year. The company reported that the dollar market share of Tylenol has improved from 33.5% a year ago to 34.7% in a market with substantial new high priced entries.

In the January/February period of 1985, Tylenol had 98% of the dollar share that it had in the period immediately preceding the 1982 Tylenol cyanide poisoning tragedies. Moreover, the new share is in a market worth $1.2 billion, some 35% larger than it was just prior to the scare. Included in the Tylenol measured ad figure is $2.6 million J&J spent to introduce Extra Strength Tylenol Caplets, capsule-shaped, coated tablets that are smaller than both Extra-Strength Tylenol and Extra-Strength Tylenol tablets and easier to swallow.

Similar in consistency is the newly introduced Junior Strength Tylenol tablets. Designed for children 6 through 14, this Tylenol product also features the same ease-of-swallowing benefit of its adult-strength counterpart. Advertising expenditures for the introduction of this product were $3 million. From the over-all Tylenol line, the Tylenol Regular and Extra Strength pain reliever received $22.1 million in measured spending.

PediaCare, introduced nationally in 1984 by the McNeil Consumer Products unit of J&J, is the company's first line of cold products designed especially for children. PediaCare cough formula received $1.1 million in ad backing and the children's cold products received $356,100 in backing. The medication is available in three forms: cough suppressant, decongestant/antihistamine and combination cough suppressant, decongestant and antihistamine. The PediaCare line is alcohol-free and is the company's first non-Tylenol analgesic product line marketed nationally. The company has launched a $3.6 million multimedia campaign.

J&J continues to hold a 42% over-all market share of the $730 million sanitary product market, despite heavy competition, spending $23.4 million on Stayfree products vs. $12 million in 1983, $13.9 million on Sure & Natural vs. $16.6 million in 1983, and $8.9 million on Assure! in its first year.

J&J's over-all market share in this category was buttressed in 1984 with the introduction of Stayfree Maxi-pad Thins, Sure & Natural Maxishields and Stayfree Silhouettes Body-Shape Maxi-pads on which the company spent $3.6 million in measured advertising. J&J's Ortho Pharmaceutical's Dimensyn Maximum Strength menstrual discomfort relief product received $989,000 in measured spending in its introductory year. It claims to relieve irritability and nervous tension, menstrual cramps and swelling. The total Dimensyn line of capsules, remedy and tablets collected $2.9 million in spending.

Johnson & Johnson Products commands a 64% share of the adhesive-bandage market. This year, the company launched a Band-Aid brand line-extension: Band-Aid medicated adhesive bandages designed to kill germs and help prevent infection. J&J spent $8 million in measured media for Band-Aid products in 1984.

Johnson & Johnson's personal products division launched Take-Off makeup remover cloths in 1984 under the direction of Saatchi & Saatchi Compton. A new product within the category, Take-Off cloths are moistened with special makeup removal ingredients. A minimal $60,300 was spent on Take-Off in test at the close of 1984. The product has gone national in 1985.

Measured spending for J&J's Reach toothbrush increased to $5.1 million in 1984, up 10.9% from the previous year. To date, Reach holds the leadership position among dental products along with Johnson & Johnson dental floss ($5.1 million in measured spending, up from $1.8 million in 1983) and Stim-U-Dent interdental cleaners ($210,200 in measured advertising vs. $28,200 in 1983).

This year, the Health Care Division's ACT fluoride dental rinse was accepted by the American Dental Assn.'s Council on Dental Therapeutics. ACT, with measured ad spending in 1984 of $4.5 million, down 19.6% from 1983, was the leading fluoridated dental rinse.

Affinity shampoo was backed with $12.8 million in measured spending in its introductory year beginning February, 1984.

Among J&J's baby items, these are the leading advertised products with their 1984 measured expenditures followed by 1983 spending according to the six-media monitored by Leading National Advertiser: Johnson's Baby Shampoo, $5.9 million vs. $7.2 million; baby oil, $5.6 million vs. $4.3 million; child development toys, $2.2 million vs. $2.4 million, and baby powder, $2.6 million vs. $4.8 million.

Other consumer products with sizable measured advertising outlays were Micatin athlete's foot remedy, $3.8 million vs. $3.3 million; Johnson & Johnson o.b. tampons, $4.2 million vs. $3.5 million; Co-Tylenol adult and children cold medicine products, $11 million vs. $9.6 million; Secure denture adhesive seals, $2.9 million in its first year on the market; Sine-Aid sinus remedy, $4.7 million vs. $4.3 million, and Stretch 'n Dust cleaning cloth, $5.3 million vs. $384,100.

Internationally, Johnson & Johnson launched Affinity shampoo in Austria, Germany, Ireland, Italy, Sweden, Switzerland and the U.K. In Ontario, a new plant was constructed to manufacture Tylenol. In Brazil, Johnson & Johnson completed the national introduction of Shower-to-Shower deodorant body powder.

In the pharmaceutical division, 1984 sales of $1.3 billion accounted for 21.3% of worldwide sales but operating profit of $427 million contributed 48.4% of the company total. J&J introduced in 1984 Ortho-Novum 7/7/7, the first triphasic oral contraceptive in the U.S. The new prescription product provides three gradually increasing levels of progestogen and a constant low dose of estrogen during the first three weeks of the menstrual cycle. The fourth week is drug-free. Ortho Pharmaceutical in 1984 also introduced Advance, a home pregnancy test.

Have you ever felt like this when choosing a telemarketing service? They're all alike. Each parrots the other with seemingly interchangeable personnel, technology and services. What's more, in some cases they can barely provide you with the basics.

But you don't have to settle for parrots.
There's an innovative alternative. One that will make a big difference. One you'll notice every time you check your results...and your profits. A professional telemarketing service, backed by decades of American experience in perfecting one of the most flexible and sophisticated telecommunication systems in the world.

American Airlines Telemarketing Services.
The people, the technology, the management and the performance capabilities to customize a program that gets the results you need for your business.

With a separate resource totally dedicated to telemarketing, American offers you thoroughly trained experts who know how to sell, qualify, upgrade, research, handle customer service, raise funds and service accounts. Backed by some of the most advanced, computerized telemarketing technology available today.

So when you're ready to talk to telemarketing experts — instead of parrots — return the coupon below or call toll-free:

S.C. Johnson & Son

RANK 81

Racine, Wis.

($ figures = 000,000)

Worldwide	1984	1983	% chg
Sales	2,000	2,000	0
Net income	N/A	N/A	N/A
Advertising	90	87	3.3

S.C. Johnson & Son Inc., the 81st largest national advertiser, supported its brands with an estimated $90 million in advertising during 1984, up 3.4% from the previous year.

For the third consecutive year, the Racine, Wis.-based company felt the poor economic conditions worldwide. Worldwide sales were at an estimated $2 billion, the same level as reported in 1983. The privately held company is estimated to have had U.S. earnings for the fiscal year, ended June 30, 1985, of $80 million.

Johnson entered the marketplace in 1886 as a manufacturer of parquet flooring. After a number of transitions, the company in the past few years has concentrated its expansion on the personal care and over-the-counter drug categories, although it continues backing its polishes and waxes with heavy ending and new-product introductions.

However, in 1984, those traditional categories did not receive as much support as did the company's line of Raid insecticides. Those 24 brands, advertised both nationally and regionally as the insecticides that "Kill bugs dead!" received more than $10.2 million in magazine, newspaper, radio and tv support, or 22% of total measured media advertising of $46.3 million as monitored by Leading National Advertisers, a measured media total 28% off spending levels in 1983. The Raid brand spending in measured media was 20.3% off spending levels in 1983, the main difference being spending for Raid insecticides (nonspecific) of $2.5 million, down from $6 million in 1983.

The largest single share of measured media spending in this category, $2.6 million, went to Raid Flea Killer. That was up from only $616,200 in 1983. Raid Fogger got $2.4 million, up from $203,700 in 1983, and Raid Yard Guard receiving $1.1 million, up from $150,900.

Raid's case share grew 2.9 points to a record high 47.3% in 1984, and Raid now outsells its nearest 10 competitors combined. According to Charles Kline & Co., a Fairfield, N.J., marketing consulting company, Raid holds a 45% share of the estimated $637 million insecticide category.

Off! personal insect repellent held media spending even at $2.5 million, and continued to lead the market by a wide margin with a 77.7% case share in 1984.

In a late year introduction from the personal care division, the company launched Halsa, its third major entry into the $3 billion haircare category. The 10-item line of Swedish botanical-formulated shampoos and conditioners comes in five formulas for five different hair colors. Each formula contains natural ingredients to accent the hair and emphasize shine, the company says.

Halsa received an estimated $12 million in advertising support, the largest single share of media spending. According to Hugh Zurkuhlen, household products analyst with Salomon Brothers, New York, Halsa has achieved a 2.5% share of the shampoo category and a 5% share of the conditioner segment since January. The company's own estimate is a 3.5% share of market in the shampoo category. J. Walter Thompson USA, Chicago, handles.

While Halsa is targeted to an older audience, Johnson's other main shampoo and conditioner entry, Agree, remained a young adult's brand. Agree received more than $5 million in measured media spending with heavy emphasis on spot radio. The line was repositioned as the products to "Turn up the volume in your hair and add softness."

In a further attempt to reach its 12-to-25-year-old target audience, Johnson joined forces with NBC's "Friday Night Videos" and American Airlines for a "Be a video star sweepstakes." The sweepstake marked Agree's debut on a noncable music video show.

Capri haircare products, marketed by Johnson's Northern Laboratories subsidiary, received an estimated $500,000 in national support.

"S.C. Johnson made a couple of good moves with Halsa and Curel [the company's new therapeutic skin lotion]. Halsa could turn out to be Johnson's best new product introduction. By luck or design, the company wisely waited until this year to roll out a new shampoo, avoiding the thundering herd last year trying to get through the revolving door at the same time," a new-products consultant says. "At the same time, Halsa does what Clairol does, but at a lower cost."

Curel, a therapeutic entry in the $440 million hand and body lotion category, was introduced nationally in October, 1984, after a year in test. The brand is supported by an estimated $10 million ad budget, with at least $3 million spent on network tv.

By the end of the first quarter of 1985, Curel had achieved a 6.5% retail market share, trailing Buffalo, N.Y.-based Westwood Pharmaceutical's Keri lotion, 7.0%, and Greenwich, Conn.-based Chesebrough-Pond's Vaseline Intensive Care (VIC), the market leader with 22%, Salomon Brothers' Mr. Zurkuhlen says. Other analysts put the VIC share as low as 19% in dollars and Keri at 8.4%, and Lubriderm from Warner-Lambert at 5%-plus.

Soft Sense, Johnson's earlier hand and body lotion entry, has an estimated 6% share. The brand continued losing media support, dropping 9.7% to $3.7 million in measured media spending. Soft Sense continued stressing its cosmetic benefits and returned to 1981 introductory positioning with a campaign via Foote, Cone & Belding, Chicago.

Johnson is testing a new skincare product, Skintastic, in Bakersfield, Cal., and Lexington, Ky. Called a moisturizing all-over body gel, Skintastic comes in five fragrances—floral breeze, snow blossom, flower shower, cool musk and spicy tingle. The budget for Skintastic was not disclosed.

The company has high expectations for Skintastic, which an industry consultant says "is more satisfactory than Vaseline Intensive Care when applied on the skin, but I'm not sure women will pay more for that."

Johnson's Edge shaving gel continues to hold the No. 1 position in the men's shaving preparation category, despite heavy competition from Gillette Co.'s Foamy gel. Edge received more than $2.1 million in measured media spending, spread between magazines, network and spot tv.

Johnson's Rydelle Laboratories subsidiary paid $18 million to acquire Cooper Dermatological Laboratories, Palo Alto, Cal., for further development of its skincare activities. Marschalk Co., N.Y., remains the agency of record for the $2.9 million account, which includes Aveeno cleansing bars and bath products, Pentrax medicated shampoo, Rhuli antiseptics and anti-itch products for treatment of skin irritation.

Rydelle also set up a joint venture with Lion Corp., one of Japan's largest consumer product companies, to market oral-care products in the U.S. and Canada. Rydelle initially is distributing Lion's Zact, a smoker's toothpaste.

The over-the-counter drug division in early 1985 also introduced Fiberall laxative wafers, a line extension to its Fiberall sugar-free, high-fiber laxative powder. Fiberall has carved out an estimated 10% share of the bulk laxative market and 3.4% of the total market, according to the latest readings, says Johnson. The laxative category is worth an estimated $380 million, according to Charles Kline & Co. Laurence, Charles & Free, New York, handles the estimated $7 million ad account.

Despite Johnson's new emphasis on its personal care and otc divisions, the company also breathed new life into its Home Care group by introducing in March, 1985, Duster Plus, a wax-free dusting and cleaning aid.

Johnson's Pledge furniture wax continued leading the home care division in measured media spending of $5.2 million, down 20% from 1983. Pledge commands a 37% case share of the $141 million household polish market, down three share points from 1983. The company has a 49% case share of the total category, according to Charles Kline & Co. Favor, holding less than a 7% share, received $365,000 in measured media spending, while Complete, with an estimated 2.0% share, received no measured media support.

Glade Spinfresh air freshener bathroom tissue holder has a 6% case share, down one share point from 1984, of the $222 million (manufacturer's level) air freshener segment. Spinfresh received $1.7 million in measured media spending, down 43% from $3 million spent in 1983. Glade aerosol spray, holding a 21% share, received $665,000 in measured spending.

Johnson in late 1984 introduced Glade Fabric Fresh dry aerosol air freshener in Spring Green and Ultrafresh scents. The introduction was supported by an estimated $1.7 million print and tv campaign via JWT.

The company reformulated Shout prewash laundry soil and stain remover, which continues holding a 31% case market share of the $139 million (manufacturer's level) category. Shout, the No. 2 brand behind Dow Chemical's Texize division's Spray 'n Wash, held measured media spending even at $3.1 million. Among Johnson's floor care products, Future liquid floor finish and Brite liquid floor finish received the most in measured media spending, with $2.1 million each. Clean 'n Clear, an all-purpose cleaner introduced in January, 1983, received almost no measured media support, dropping 88% to $836,300.

Of the declining $108 million floor care category, Johnson continues holding a 55% share, with Johnson's Future, a 34% share, and Brite, 12%, leading the company's entries in that category. Johnson's Glo-Coat received modest media expenditures of $1,800, down 72% from 1983, while Step Saver, a one-step liquid floor wax, received $656,600, a 65% drop, mainly spent in magazines.

In addition to its skincare activities, Northern Laboratories introduced two J/Wax automotive products—Sleek Ultimate Performance car wax (liquid and paste) and Kit car wash concentrate. Its companion Kit liquid car wax was restaged with a new formula that removes film and grime. Johnson spent $253,000 in measured media spending on its J/Wax car care products in magazines and spot tv.

The subsidiary also introduced Capri Moisture Rich bubbling bath foam in November, 1984. The collagen-based product moisturizes skin. The Capri bubbling bath oil line was restaged also in November, with new packaging and an improved, emollient-enriched formula to soften and moisturize skin.

In October, Northern Labs switched its accounts to Zwiren & Wagner, Chicago, from G.M. Feldman, Chicago. In addition to the J/Wax and Capri product lines, the account includes advertising for Hot-Shots, a new hand warmer, receiving $69,200 in measured media media, and Goddard household cleaners.

A beginning for bikers

American Honda Motor Co. began 25 years ago in a small storefront office on Pico Blvd. in Los Angeles. During the first year, it produced only six motorcycle models and had eight employes. The odds against the company were high; after all, Americans at that time thought little of motorcycles—or the people who rode them.

Kellogg Co.

Advertising	209	179	16.8

Still battling back from a slip in market share in the early 1980s, Battle Creek, Mich.-based Kellogg Co. increased its advertising in the U.S. 16.8% to an estimated $208.8 million, making the company the 35th largest national advertiser.

Worldwide, the company spent $261 million on advertising in 1984, and will increase that 20% to about $313 million during 1985, says Kellogg chairman William LaMothe.

Kellogg's 1984 earnings rose 3.2% to a record $250.5 million on sales of $2.6 billion, up 9.3% from 1983. For the first half of fiscal 1985, Kellogg reported a 2.7% increase in net earnings to $133.3 million on sales of $1.42 billion, up 10%. Kellogg does about 30% of its business outside the U.S., making the company vulnerable to foreign exchange rate fluctuations resulting from a strong dollar.

Kellogg continued to cement its lead position in the domestic cereal business, regaining the market share it lost between 1980 and 1982, when its share hit an all-time low of 35%. Generic and private label copies of old-line Kellogg favorites abounded then.

Kellogg's share in the $4.1 billion U.S. ready-to-eat cereal market is now 42.5%, up from 37.8% last year, according to analysts. Growth came from steady volume gains averaging 12.5% across the board for Kellogg brands and timely new product introductions. Only Kellogg's flagship Corn Flakes sales remained relatively flat.

The company's pound volume grew faster last year than the cereal industry as a whole. Kellogg's pound volume jumped 10% while pound volume for the industry only gained 3%.

Kellogg's nearest competitors, General Mills and General Foods, reported mediocre years. General Mills' share remained stable at 20%, while General Foods lost ground to 14% from 16% in 1983.

Despite industry analysts' predictions, Kellogg doesn't see an end to growth in the domestic cereal market, Mr. LaMothe says. The U.S. rte (ready to eat) cereal market's expected growth of 3% to 4% a year is good enough for Kellogg, which said it expects its own cereal volume to grow between 7% and 11% in 1985.

In measured advertising, Kellogg spent $176.5 million in nine media, up 47.7% from 1983. Once again, Kellogg relied heavily on spot and network tv advertising to keep its brand identities strong. The company's network tv budget jumped 75.4% in 1984 to $128.0 million, and its spot tv spending shot up 68.8% to $40.6 million. Kellogg's magazine spending fell 70% to $1.9 million.

Keeping its tradition of successful new product introductions, Kellogg added Apple Raisin Crisp to its line in April, 1984, backed by a $16 million to $20 million ad campaign. Measured media totals for its abbreviated intro year was $7.6 million, all in network and spot tv. The company added Kellogg's Raisin Squares in August, 1984, and added peaches to Kellogg's Fruitful Bran, originally introduced in the fall of 1983. Fruitful Bran was one of the company's big spenders in measured media, with $10.7 million, all in network and spot tv.

Thus far in 1985, the company sounded a winner with Kellogg's OJ's, introduced in March. The presweetened corn, wheat and oat cereal also

Without our reports, a media analyst is at a slight disadvantage.

We're not saying you can't do your job without us.

We are saying it may be harder—and riskier.

You see, no other database of advertising expenditures is as complete as LNA's.

So without us, you could be losing time assembling data from different sources.

Worse, you might even miss some crucial information that could affect your job.

With LNA it's another story. You get the complete media picture for the consumer marketplace.

That's data on seven media: magazines, newspaper supplements, network TV, spot TV, network radio, outdoor, and cable TV.

And products by brand, company and category.

You can select any of our standard reports, covering the consumer, trade and international markets.

Or, if you prefer, order a custom report designed to your own specifications.

Whatever you choose, it's all available either in hard copy or on-line direct to you.

So for everything you need in the way of competitive ad data, call us at this number: 1-800-LNA-DATA, or 725-2700 in New York.

After all, in a field where what you don't know can hurt you—you can't afford to be in the dark.

The definitive source for competitive advertising data.

Leading National Advertisers, 136 Madison Avenue, New York, NY 10016

contains 10% real orange juice.

Already this year, Kellogg is the growth leader in the cereal segment with 12% volume growth in February and March, according to A.C. Nielsen Co. data.

General Foods' volume was down 8% in the period; General Mills', down 2%; Quaker Oats, down 10%; Nabisco, down 1%, and Ralston Purina, down 12%.

To keep momentum, Kellogg's 1985 ad plans include promotional tie-ins with the singing Jacksons, the Statue of Liberty and M&M's candies for Kellogg's "big four" cereals: Corn Flakes, Raisin Bran, Rice Krispies and Frosted Flakes. Those brands are handled by Leo Burnett USA, Chicago.

Kellogg kept up with America's health kick in an October tv and print campaign for its All-Bran cereal. The ads quoted National Cancer Institute findings that a high-fiber, low-fat diet may reduce the risk of some cancers.

The ads have continued to run despite Food & Drug Administration scrutiny. The FDA is working on new package labeling guidelines that would encompass food products that make health claims.

General Mills recently introduced Fiber One, with 12 grams of fiber per serving rather than All-Bran's nine grams per serving. General Mills also quotes the NCI data.

Meanwhile, Kellogg has been testing Extra Fiber All-Bran, now with 12 grams of fiber. Ads for the new product downplay the NCI data while highlighting the cereal's high-fiber, low-sugar content.

With its upstate New York factory complete, Kellogg has expanded distribution of its Whitney's yogurt. Kellogg also began regional distribution of its Rice Krispies Bars, a granola-type bar it had been working on since early 1984.

Whitney's was first expanded from its original Baltimore/Washington and New York City markets into San Francisco and northern California in January, 1985. By mid-May, Whitney's was in Chicago and upstate New York. Entry into Florida was set for mid-July. The yogurt pulled in $1.4 million in measured spending in 1984, mostly in spot tv, up 50.7% in spending for a more restricted area of coverage the previous year.

In April, 1985, Kellogg began regional distribution of its granola bar entry—Rice Krispies Bar. The bar pits Kellogg against familiar cereal category rivals including Quaker Oats Co. and General Mills.

Quaker Oats has gained a 40% share in the $400 million granola bar market. Running a close second is General Mills' Nature Valley granola bar line.

Especially strong sales of Kellogg's Mrs. Smith's Natural Juice and Lattice Crust pies, introduced in June, 1984, pushed that unit's market share to 52% of the frozen pie market last year, the company says.

Kellogg's Eggo unit's market share jumped 8 percentage points in 1984 to 35%. This year, Eggo added Nutri-Grain frozen waffles made from whole grains for the health-conscious. The name was taken from Kellogg's Nutri-Grain cereal.

In September, Kellogg's Salada Tea unit introduced naturally caffeine-reduced tea in bags in New England, New York, Pennsylvania and Ohio. Leo Burnett USA, Chicago, handles.

Kellogg is currently analyzing its international operations to see where potential for long-term growth is greatest. In 1984, 46% of Kellogg's assets were abroad, but international operations accounted for only 22% of operating profits. Profits fell 23% abroad while sales there fell 1% for the year. Domestic profits and sales increased 14% and 15%, respectively.

Capital improvements cut deeply into foreign earnings, especially the $229 million Kellogg spent boosting production capacity, including more than $150 million spent at its London, Ontario, plant in Canada, the company says. Another $250 million in capital improvements is set for 1985.

International raw material prices (excluding grain) rose last year, also cutting into profits, Kellogg says. Drops in noncereal volume, especially from the sale of NeoCitran cold remedy in Canada, also hurt foreign earnings.

Additionally, Kellogg has added former Ford Motor chairman Philip Caldwell and G.D. Searle & Co. chairman-ceo Donald Rumsfeld to its board, hoping to benefit from their "strong international marketing experience," Mr. LaMothe says.

In 1984, Kellogg introduced Kellogg's Start in the U.K., Kellogg's Extra in Belgium and France, Mueslix in West Germany, Honey Nut Corn Flakes and Just Right in Australia, Marshmallow Krispies in Canada, Sky Corn Twists in Brazil and Genmai Flakes in Japan.

Analysts predict demographic factors will continue to look promising in the cereal market through the end of the decade as the number of children and young adults in both the U.S and abroad continues to grow and consumers' health concerns continue to make grain-based products a popular diet staple.

Kimberly-Clark Corp., Neenah, Wis., the 87th largest advertiser in the U.S., spent an estimated $80 million in advertising, up 2.5% from 1983.

Sales increased 10.4% to $3.62 billion in 1984. Net income rose 19.2% to $225 million. After two years of posting lower earnings, K-C made a strong earnings comeback, primarily on the continued success of its Huggies premium disposable diapers.

The company says larger unit sales volumes and higher prices for consumer products in the U.S. were major contributors to K-C's improved results in 1984. The larger unit volumes accounted for about two-thirds of the gain in sales.

U.S. operations provided K-C with sales of $2.66 billion, or 73.4% of total sales, and net income of $170.5 million, or 79.6% of total net income.

The company's sales and earnings momentum carried through into the first half of 1985, with sales up 12% to a record $2 billion from $1.79 billion in the same period of the previous year. Earnings increased 26.5% to $151.2 million. Again, the company attributed the earnings gain to strong unit growth of disposable diapers in the U.S.

In the last quarter of 1984, the company divided its products into three classes. Class I includes household and institutional tissues; feminine, infant and incontinence care products; industrial and commercial wipers; hospital and home healthcare products and related products. Class II includes premium business and correspondence papers, tobacco industry papers and products, newsprint and other printing papers, technical and specialty papers and related products. Class III includes aircraft services, air and truck transportation and other miscellaneous products and services.

The largest group, Class I, accounted for $2.73 billion in sales, or 74.4% of combined class sales in 1984, up from 73.9% of the total in 1983. The class again had strong volume sales for most of its products. Operating profit for Class I in 1984 was a record $262.6 million, or 63.5% of combined class operating profit, up 19% for the year, with volume gains particularly strong for Kleenex facial tissues and Huggies disposable diapers.

Class II accounted for 23% of K-C's sales, while operating profit rose 18.4% to a record $139.2 million in 1984. Newsprint operations provided the largest portion of the gain through a combination of higher product prices, high-capacity mill operations and moderately higher unit volume.

In Class III, an outgrowth of the company's air fleet is the one-year-old Midwest Express, which received $5,600 in measured media spending in 1984. The business-class airline was founded in the summer of 1984 to fill the gap left by Republic Airlines when it skuttled its Milwaukee-Atlanta run. Other markets were subsequently added. The airline suffered a setback earlier this month when one of its three planes crashed near Milwaukee killing all 31 aboard.

The consumer division, which receives virtually all of K-C's ad dollars, devoted most attention in 1984 to marketing Huggies disposable diapers. In the U.S., unit volume growth of the disposable diaper provided more than half of the 14% increase in combined sales, more than offsetting the effect of lower unit sales of feminine care products due to intense competition.

In the $2.8 billion disposable diaper market, K-C grabbed an estimated 32% share, according to George Adler, a paper products analyst with Smith Barney of New York. Huggies quickly outpaced sales of rival Procter & Gamble's Pampers disposable diapers, which currently holds a 30% share. Huggies overtook P&G's Luvs brand, currently holding a 20% share. However, P&G's combined 50% still leads K-C. K-C continued to upgrade Huggies, launching in mid-1985 Huggies Extra Absorbent Medium 40s. Mr. Adler calls the new Huggies "a front-loaded diaper," containing a cellulose crotch insert panel as well as an elasticized gathered waistband.

Ad spending for Huggies rose again in 1984 to $24.8 million, an increase of 31% over 1983. The bulk of the measured media spending went to network tv, with additional magazine and spot tv support, according to Leading National Advertisers, which monitors six major media.

"K-C has the momentum since consumer loyalties have switched from Pampers to Huggies. It remains to be seen whether K-C can stand up to P&G's diaper steamroller," Mr. Adler says, referring to P&G's new improved Pampers currently being distributed nationally.

For feminine hygiene products, K-C continued its ad support of the New Freedom line, spending $17.1 million in measured media, up 9.3% over 1983. However, K-C faced intense competition as P&G launched nationally its Always line of feminine protection products. K-C currently holds an estimated 26.7% share, split between New Freedom and Kotex, in the $1.5 billion category. P&G's Always, supported by a $100 million introductory budget, holds an estimated 18%, according to Mr. Adler.

Mr. Adler says K-C was wise to pull back from the promotion wars for feminine hygiene products waged by Johnson & Johnson and P&G, "waiting instead for P&G to end its introductory year spending." K-C's Kotex, its economy-priced feminine protection line, received $6.7 million in measured media spending, down 19% from $8.3 million in 1983.

PIB/LNA
U.S.News

The company added a new Kotex thin supermaxi and regular maxipad to the line to better position the brand against other "thin" pad marketers. Ads themed, "The sensible choice," ran in magazines and in tv spots.

Ad spending on K-C's Kleenex facial tissues was $10.3 million, up 22.6% over spending for the brand in 1983. Kleenex Softique tissues continued to receive the lion's share of measured media spending, $5 million, up 16% from 1983. An animated, sore "Runny Nose" character was introduced via Foote, Cone & Belding, in what K-C hopes will be a long-running campaign.

American Greetings Corp. and K-C joined forces to market the Care Bears collection of Kleenex brand tissues. The rainbow-colored tissues are packed in boxes with Care Bears graphics, which can be cut out and made into badges, mobiles or clips.

K-C in late 1984 began testing Avert virucidal tissues in two upstate New York markets, supported by $294,000 in measured media spending. The three-layer tissues were treated with citric acid, malic acid and sodium lauryl sulfate, substances K-C says are effective in preventing the spread of cold germs.

In mid-1985, K-C withdrew the tissues from retail shelves for further research and development.

With all its Kleenex brand tissues, K-C controls 50% of the $1 billion facial tissue category.

K-C's economy priced Hi Dri paper towels received $172,000 in measured media spending, up 160% from $66,000 in 1983.

Measured media support for K-C's Depend line of incontinence products rose 81.2% to $5.8 million, the majority placed in network and spot tv commercials.

The brand's competition comes from Procter & Gamble's Attends line. While P&G is concentrating on attracting the institutional incontinent market, K-C is positioning Depend for the general consumer market. Depend holds an 8% share of the $250 million consumer market, with P&G holding a 52% share, according to Smith Barney's Mr. Adler.

Late in 1984, K-C chairman Darwin Smith announced the company had formed an office of the chairman consisting of himself and three vice-chairmen. Joining Mr. Smith in this restructuring, which took effect Jan. 1, were Robert C. Ernest, currently president of Kimberly-Clark; Marvin F. Gade, vice-chairman, and Donald R. Hibbert, senior exec vp-chief financial officer.

Mr. Hibbert continues as chief financial officer. Mr. Ernest is the senior corporate officer at K-C's Neenah headquarters, and Mr. Gade is in charge of operations at the company's Roswell, Ga., offices.

At the same time, K-C also is moving its main headquarters to Irving, Tex., a suburb of Dallas. Mr. Smith, along with about 50 employes, will be based there.

K mart Corp., Troy, Mich., the nation's No. 2 retailer in sales volume, increased its advertising 38.6% to an estimated $554.4 million in 1984, making K mart the 9th largest national advertiser.

Ad spending was bolstered by a $20 million Olympics tv campaign that emphasized an upgraded image and also by an effort to raise customer awareness of new merchandise choices, including national brand name goods.

K mart's net income in fiscal 1984, which ended Jan. 23, 1985, was $499.1 million, an increase of 1.4% over 1983. Total sales were $21.1 billion, up 13.4% over the previous year.

The retailer's strategy for growth is twofold, involving both a diversification into new retailing ventures and attracting bigger-spending customers to K mart stores.

That strategy is cutting deeply into earnings as well. In the first six months of the current fiscal year, K mart net income decreased 34.2% to $133.3 million on sales of $10.44 billion, up 13.2% from the corresponding period a year earlier. The problem has been a slower-than-expected movement of both high margin, upscale merchandise and interest payments relating to K mart acquisitions. Interest paid in the first six months was $92.6 million, for example, compared with payments

THE WALL STREET JOURNAL
What's News—

Now you can advertise in The Wall Street Journal on the weekends.

There's only one way you can advertise in The Wall Street Journal on the weekends because there's only one "weekend edition" of The Journal. It's The Wall Street Journal Report on Television.

Employing a network of over 85 stations in 74 major markets, The Wall Street Journal Report on Television is the perfect complement to your existing Journal advertising and an ideal medium on its own. Like its printed namesake, The Wall Street Journal Report on Television offers the same authority and comprehensiveness to its advertisers.

And no matter how many programs have business news, one, alone, carries "Journal" brand reportage. If you'd like to see your advertising message in this formidable environment, call Art Pickens (Dow Jones) at 212-285-8212 or Bill Koblenzer (Syndicast) at 212-921-5091.

The Wall Street Journal Report
On Television

of only $23.7 million in the corresponding six-month period in 1984.

Analyst Jeffrey Edelman of Dean Witter Reynolds, New York, says the results indicate consumers have been slow to buy the new upscale image. "So far it [upscale image] has not worked, at least on the surface. Earnings are down because sales are down." In the second quarter, for example, sales in comparable K mart stores open a full year declined 1.5% from the same period in 1984. Mr. Edelman calls the interest expenses from acquisitions "a minor negative." The acquisitions "will probably work out in the long run," he says.

Diversification was accomplished largely through a $900 million buying binge in 1984 and into early 1985, as K mart acquired specialty retailers Waldenbooks, Builders Square (formerly Home Centers of America) and Pay Less Drug Stores Northwest.

The retailer that coined "blue light specials" set out to woo upscale shoppers by offering more name brands, a larger assortment of higher-price merchandise and a more contemporary presentation of its goods.

One result of offering more name brands is that K mart boosted co-op ad spending from $24.6 million in 1983 to $90.4 million in 1984 to promote availability of brand name goods. Co-op spending, newspaper inserts, direct mail and point-of-purchase are among the unmeasured media ad expenditures that have boosted K mart ad spending far beyond the $80 million the company spent in the nine monitored media in this issue. That measured total was an increase of 60.7% from the previous year.

K mart is going after new customers while trying to keep its strength with its traditionally price-conscious shoppers. "While our objective was to reposition our assortments of merchandise, it was always with the understanding that this would not affect our reputation for offering good retail prices," chairman Bernard Fauber says.

K mart in 1984 decided to restrict its interest in acquisitions to retailing. It has looked for prospects in segments with high growth potential and then narrowed its choices to companies with a management team that would commit to remain at the helm of the business as an operating subsidiary. The strategy was based on a belief that acquisition was a fast and effective way of diversifying.

Before 1984, K mart's acquisitions were limited to two regional cafeteria chains, Furr's Cafeterias and Bishop Buffets, purchased in 1980 and 1983, respectively.

K mart acquired Walden Books Co., the nation's largest U.S. retailer of books, in August, 1984, for $300 million in cash. There were 898 Waldenbooks stores at yearend, and K mart intends to add 70 units a year for five years in both shopping centers and free-standing locations, along with the expansion of Builders Square.

Builders Square, formerly Home Centers of America, was taken over in September, 1984, for $88.2 million in cash. Builders Square operates warehouse home centers that cater to do-it-yourselfers and small building contractors. There were 15 centers at the end of 1984; K mart intends to add 50 by 1986 and to reach 100 by 1987.

A retail drugstore chain, Pay Less Drug Stores Northwest, with 164 units, became a wholly owned subsidiary of K Mart Corp. in March, 1985, in a transaction estimated at $500 million. K mart intends to add 30 units this year.

In addition, K mart has its homegrown Designer Depot, a 51-unit, off-price apparel chain started in 1982. It operates Accents, a Birmingham, Mich., outlet for top-quality home accessories.

K mart's 2,400 general merchandise stores accounted for more than 95% of the company's total sales in 1984, but specialty retail stores are targeted to provide 15% of the company's projected $40 billion in sales in 1990.

Diversification also is going on inside the general merchandise stores, with K mart adding a range of insurance and financial centers.

Insurance centers, offering life, health, home and auto insurance and individual retirement accounts, were operating in 118 stores at the end of the year, with 29 of them allowing customers to apply for certificates of deposit and money-market accounts.

Meanwhile, the company is testing a wider variety of financial services, including discount brokerages, real estate services, consumer lending and mortgage financing, with an eye toward eventually mixing and matching programs nationally, based on demand and regulatory climate.

K mart in 1984 continued its program of giving its self-described "piperack" stores a contemporary face lift. The K mart "Store of the '90s" makes each department more visually distinctive, giving branded merchandise more prominence than in the past.

National brand, higher-priced merchandise began to be featured in new departments such as Kitchen Korner, Home Care Centers and Home Electronic Centers. The most noticeable upgrading may have been in soft goods. In 1984, 18% of sales in family apparel came from national-brand products.

The emphasis on upgrading image continued with the August, 1985, launch of a Jaclyn Smith line of women's fall sportswear. The actress touted the line in tv and magazine ads, via the Ross Roy agency, Detroit. Ms. Smith's husband, Tony Richmond, directed the commercials, as he does her work for Max Factor.

Lines of Jaclyn Smith swimwear and lingerie are planned in 1986, as K mart uses Ms. Smith as a way to focus attention on its changed image, much the way No. 1 retailer Sears, Roebuck & Co. uses model Cheryl Tiegs as a spokeswoman.

K mart's 1984 Olympics campaign was part of its effort to reach an upscale audience. Network tv and print ads were tied to in-store promotions, a customer sweepstakes and promotions with outside companies to generate awareness of the retailer's sponsorship of ABC telecasts of the games.

After emphasizing that upscale image, K mart in early 1985 sought to reassure its traditional customers that its general merchandise stores were still centers of value. Effects included revival of "the savings place" theme line and downplaying the Olympics year theme of "we've got it good."

It also meant a tilt toward print and away from tv advertising until 1987, flat ad spending in 1985 with a final figure expected to come in at $590 million and a temporary loss in billings by Ross Roy, which handles broadcast and some magazine advertising. Media Momentum, the Troy, Mich.-based in-house agency, handles the bulk of K mart print advertising creative, particularly rotogravure newspaper inserts.

K mart in December, 1984, announced a major restructuring of its organization, partly as a reflection of its diversification and partly to groom managers for the 1990s.

Board chairman Bernard Fauber appointed three executives to head the company's three operating units, K mart stores, specialty retailing and administration, with each of them to report directly to Mr. Fauber.

Norman Milley, who had been exec vp-merchandising and subsidiaries, filled the new position of group president for the K mart stores, the bread-and-butter division. Frederick Stevens was named to continue as exec vp-specialty retailing, which gained in importance as a result of diversification moves. Joseph R. Thomas filled the new post of exec vp-chief administrative officer.

Larry Parkin moved from chairman of the K mart apparel subsidiary to exec vp, K mart stores, reporting to Mr. Milley.

President-chief operating officer Samuel Leftwich became vice-chairman of the corporation. The post of president was replaced by the group president title, filled by Mr. Milley, and the ceo title was eliminated. Grant Morck moved from exec vp-store operations to exec vp-new concepts implementation, to assist Mr. Leftwich.

Michael Wellman, who had been director of planning and research, received the new post of vp-corporate planning.

Levi Strauss Int'l	591	701	-12.6

Levi Strauss & Co., San Francisco, the nation's 67th largest advertiser in 1984 with estimated advertising of $122 million, up 28.2% from the prior year, was taken private on Aug. 30, 1985, in a $1.45 billion buyout led by Robert D. Haas, Levi Strauss's president and ceo.

Worldwide, Levi Strauss spent $152 million on advertising and promotion, up 27.7% from $119 million in 1983, says the company.

Worldwide ad spending this year is expected to fall to this year's U.S. level of $122 million, including cooperative programs, media and sales promotion, according to the company.

The leveraged buyout of 30 million common shares, financed by a group led by Wells Fargo and 10 other banks, returns ownership of the 134-year-old company to the families that are descendants of founder Levi Strauss. Mr. Haas is a great-great-grandnephew of the elder Strauss.

Levi Strauss & Co. had been public for only the past 14 years. It began selling common shares in 1971 to finance expanded manufacturing capability during the jeans craze. At the time of the buyout, it was 60% publicly owned.

But the fashion trends that made Levi Strauss a huge company have been waning in recent years. The apparel giant had boosted total measured ad spending 50% in 1984 to $55.2 million, in hopes of pumping new life into the sagging jeans category.

The spending increases were accounted for almost entirely by a 94% hike to $42 million in measured network tv promoting Levi's sponsorship of the 1984 Summer Olympics, and a huge campaign promoting its 501 jeans line. The company admits sales of Olympics-related products were not as strong as expected.

Examples of measured spending increases in 1984, according to Leading National Advertisers, include a 90% jump to $19 million in media for family sportswear, 1984's largest single category, divided largely between network tv (87%), and spot tv (7%). Measured media also jumped 105% in 1984 to $23.9 million for jeans advertising targeted at men, women and families.

Network tv accounted for 84% of the total for jeans.

Internal problems, however, overshadowed marketing moves in 1984. Net sales for the year ending Nov. 25 totaled $2.5 billion, down 8% for the year, while net income fell 78.7% to $41.4 million.

Sales for the first half of 1985 were $1.1 billion, down 5% from the same period in 1984. Net income in the first half of fiscal 1985, however, jumped 165% to $45.6 million.

The seemingly large net income jump, however, includes a 1984 expense of $24.5 million in business consolidation costs.

The huge differential between 1984 sales and earnings resulted from higher production costs from underutilized capacity, inventory adjustments and markdowns, and the expense of closing facilities, and other business consolidations.

Levi Strauss reduced production capacity 15% in 1984, closing 14 plants in the U.S. and five in international locations, which eliminated 5,000 jobs.

Levi also discontinued its Accessories division, with 1984 sales of $14 million, and sold Rainfair Inc., a $10 million producer of protective apparel. And the company streamlined its apparel offerings in 1984, reducing the breadth of its product range by more than 25%.

At the same time, Levi reorganized its corporate structure in October, 1984, shifting domestic operating units to enhance marketing of its core jeans products, and to more effectively support diversification into more fashion-sensitive businesses.

The former Levi Strauss USA division was renamed "The Jeans Company," and "Battery Street Enterprises," a unit formed late in 1983, was expanded with the transfer of men's and women's sportwear and all other nonjeans product lines.

A new business development unit in Battery Street Enterprises started a new company in January, 1985, with Perry Ellis, called Perry Ellis America, to manufacture and market a collection of men's, women's and children's active sportswear.

Battery Street Enterprises also established a joint marketing venture in March, 1985, with Andrew Fezza to market and license couture sportswear for men and women.

In a third business development, exclusive agreement was reached in March, 1985, to design, manufacture and market an Alexander Julian couture collection and the "Colours by Alexander Julian" line.

The structural realignment at Levi also caused significant shifts in top management.

Key changes include: Robert D. Haas was promoted from coo to president-ceo in April, 1984, following retirement of Robert T. Grohman; Thomas W. Tusher replaced Mr. Haas as senior vp-coo in October, 1984; Peter Thigpen, senior vp, was named president of "The Jeans Company"; Lee C. Smith replaced Mr. Tusher as president of Levi Strauss international, and was elected senior vp; Leo P. Isotalo, president of Battery Street Enterprises, was elected senior vp; and Thomas Kasten, a corporate vp and former president of the Jeanswear Division was appointed to head the corporation's new business development function.

Theatres	80	70	11.9
Watches	148	152	-3.0
Investment	48	50	-3.2

Loews Corp., New York, the nation's 56th largest advertiser, lowered its ad spending 1.9% in 1984 to an estimated $137.9 million, as revenues rose 6.5% to $5.6 billion and net income declined 3.7% to $329.6 million.

Loews was engaged in five businesses in 1984, though that number was pared to four with the $165 million sale of its Loews theaters unit in the spring of 1985.

The movie theater unit, which operates 226 screens in six states, was sold to a group headed by A. Jerrold Perenchio, producer and former co-owner of Embassy Communications. The division accounted for $20.3 million in 1984 Loews revenues, or 1.4% of the corporate total. The theater chain was expected to add 40 new screens in 1985.

The remaining contributors to Loews operations are Lorillard Tobacco Co., Loews Hotels, CNA Financial Corp., an insurer, and Bulova Watch Co.

The company's CNA unit, including property-casualty and life insurance, accounted for $3.73 billion in revenues, or 66.5% of the corporate total. Lorillard Tobacco, maker of Kent,

---

Some foreign and/or private companies do not divulge sales or income figures. Where estimates could not be obtained, N/As appear in charts and the boxed information preceding each profile to indicate "not available."

Newport and other cigaret brands, represented another 25.5% of corporate revenues.

In a stagnant tobacco market, Lorillard's revenues declined 3.9%, with unit sales down 9.9%. These contributed to a 1 point share decline, to 8.1%, in the unit's over-all share of the cigaret market, following a 1983 increase of 0.4% to 9.1%. Still, Lorillard remained in fourth place among cigaret makers behind Philip Morris Inc., R.J. Reynolds Industries and Brown & Williamson.

Lorillard's Newport brand nonetheless remained one of only two ongoing brands in the industry to report unit sales gains in 1984. (The other was Philip Morris' Marlboro). The Newport family—including all packaging and size formats—gained a 0.2 market share, rising to 3%, while sales volume increased 7.7%, to 18.12 billion units. In contrast, Newport claimed only a 1.9% market share in 1980. Newport ad spending in measured magazines and outdoor media was up 25%, to $18.9 million, via MCA Advertising, New York.

Lorillard in 1984 discontinued its nonmenthol Newport Red brand, distributed in about half the U.S., as sales plummeted to half their 1982 peak of 140 million units (AA, May 17, 1984).

Significant share declines threatened Kent's position as the No. 1 Lorillard brand. Though Kent still commanded a 3.2% share at yearend 1984—compared with 5.1% in 1980 and 3.9% in 1983—Newport remains close behind at 3%.

Kent unit sales were off 15.9% in 1984, to 19.62 billion units. The brand *family, including Kent, Kent III and* Kent Golden Lights, had 1984 measured ad spending of $14.6 million, down 32% from 1983.

True, which introduced a new laser-cut filter in 1984, slipped to a 1.2% share of the market, down from 1.8% in 1980 and 1.4% in 1983, as unit sales fell 15.4%, to 7.05 billion cigarets. Measured ad spending for the brand, via Dancer Fitzgerald Sample, New York, was $12.2 million, down 15.7%.

Among all of the company's brands, Satin 100s—introduced in 1983—ranks as perhaps the biggest disappointment. It now commands only a 0.3% share compared with 0.5% in 1983. The company cut measured ad spending 35% to $14.7 million for the brand in 1984.

Other marginal brands and their respective market shares are Old Gold (0.3%), Max (0.1%) and Spring 100s, whose 40 million units don't show up in market share tallies. None were advertised in 1984, though Max, a 120mm cigaret, received $791,000 in 1983 measured ad support, according to Leading National Advertisers.

In a move to increase efficiency, Lorillard will shut down in early 1986 cigaret operations in Louisville, although little cigars and chewing tobacco will continue to be produced.

In addition to cigaret brands, Lorillard markets Beech-Nut, Big Red and Havana Blossom chewing tobaccos, which received combined ad support totaling $1.6 million in 1984, up 23%.

In the 10th year since Loews acquired a controlling interest in CNA Financial Corp., the unit blamed "severe profitability pressures" due to "unrealistic pricing" for the property-casualty division's weaker performance. Despite $2.25 billion in 1984 revenues, a 15.6% increase, net income from property-casualty insurance was $59.7 million, down 34% from 1983. The life insurance segment performed considerably better, with $1.47 billion in revenues representing an 11.6% gain and $66.2 million in net income, up 59%.

To spur performance, CNA has improved compensation for insurance agents, while equipping them with automated marketing and sales lead generators. It has increased ad spending 35%, to $4 million, and has introduced new Universal Life products and a new commercial insurance program.

In 1984, Loews Hotels opened two new Arizona properties and completed expansion of two others. The Loews Paradise Valley Resort opened in February, 1984, in Scottsdale, Ariz., while Loews Ventana Canyon Resort last December opened in Tucson. Completion of a $110 million renovation program at the Loews Anatole in Dallas made the 1,620-room hotel the "largest [hotel] in the Southwest," the company says. The Loews Regency in New York also completed the first phase of a $10 million program by constructing a new fitness center.

The division posted revenues of $156.7 million, up 27.8%, though net income plummeted 75%, to $12.5 million. (The 1983 results included one-time gains from sales of two international properties.) The unit spent a modest $550,000 on measured advertising.

The Bulova Watch division posted revenues of $147.7 million in 1984, a 3% gain, and produced its first profit in several years, earning net income of $11.7 million compared with losses of $8.4 million in 1983 and $17.4 million in 1982.

Competition and oversupply of watches and other timing devices have made price discounting a fact of life for the unit, which contributed 2.6% of Loews revenues. Bulova spent $2.6 million on advertising in spot tv and consumer magazines last year, about the same as in 1983.

The division introduced 172 new Bulova watches and 79 new timepieces in the Caravelle line in 1984. It also became the U.S. representative for the L'Epee line of French-made carriage clocks.

In other corporate developments, Loews earlier this year purchased 9.9% of CBS Inc. stock, then tendered its shares in a CBS stock buyback program aimed at thwarting a takeover move by Atlanta-based media mogul Ted Turner.

Some foreign and/or private companies do not divulge sales or income figures. Where estimates could not be obtained, N/As appear in charts and the boxed information preceding each profile to indicate "not available."

Mars Inc.

McLean, Va.

RANK 54

($ figures = 000,000)

Worldwide	1984	1983	% chg
Sales	N/A	2,083	N/A
Net income	N/A	N/A	N/A
Advertising	139	121	14.8

Mars Inc., confronted by increased competition in the candy and snack foods market, boosted ad spending 14.8% in 1984 to an estimated $139.3 million in 1984. That hefty increase for the nation's 54th largest advertiser contrasts with its meager 0.3% ad budget hike in 1983 over 1982.

Mars Inc., headquartered in McLean, Va., is privately held and refuses to release sales figures, ad budgets or profit statements. The company has been the focus of much scrutiny this year by the confection industry as analysts predict candy-rival Hershey may surpass Mars' sales for the first time.

M&M/Mars candy division monitored ad spending rose 20.1% in 1984 to $66.9 million, with one of the more notable promotions being the naming of M&Ms and Snickers as the "official snack food of the 1984 Olympic Games."

Analysts estimate Mars has about 37% of the candy bar market, a 4% drop in share from a year ago, while archrival Hershey, which leads in introducing new products, has about 36%.

Part of the Mars problem, according to industry watchers, is the marketer's failure to introduce any new products nationally since Twix caramel bar in 1976. Royals mint chocolates, an M&M-like confection aimed at the adult market, remains in test for the second year in Washington, Baltimore and several other markets.

A kingsize version of Snickers, still considered the nation's best-selling candy bar, was introduced late last year and is doing well, according to M&M/Mars executives.

Measured media spending for major Mars Inc. candy brands includes: 3 Musketeers, $4.8 million, up 118%; M&Ms (plain and peanut), $14.2 million, up 6.8%; Lockets cough drops, $300,000, down 36%; Mars bar, $3.4 million, down 24.7%; Milky Way, $6.4 million, up 39.1%; Royals mint chocolates (in test), $100,000; Skittles, $3.9 million, up 200%; Snickers, $18.2 million, up 4.4%; Starburst, $4.9 million, up 14.4%; Summit, $1.1 million, up 31.7%, and Twix, $7.4 million, up 21.1%.

Spending for Uncle Ben's rice products rose 89% to $17.4 million, although the brands' sales still lag behind market leader Colgate-Palmolive's Riviana rice. Uncle Ben's is believed to retain about a 20% market share. Uncle Ben's has introduced nationwide its premium mixed rice product, Rice Florentine, but has yet to expand into other flavors as has rival Lipton's.

Mars' Snack-master division showed a jump of 10.5% in ad spending in 1984 to $6.3 million, a year in which ad support jumped 211%. Kal Kan pet foods spending, however, dropped 34% to $19.4 million.

The snack food line expanded last year with a new Combo flavor, cheddar cheese filled crackers. Combos cheese-filled pretzels are also now available in 60% of the country; the new cracker, sold in 21% of the U.S., received $4.3 million in measured spending, down 14.3% from 1983. Cornquistos filled snacks are sold largely in the Southwest, with two new flavors, mild and jalapeno cheese. Measured spending on the snack was $2 million, up from $466,000 in 1983.

Dooley's, a crispy potato chip shell filled with sour cream, onion or cheese, is Snack-master's newest venture, introduced this summer in Minneapolis, Des Moines, Kansas City and St. Louis. Advertising is handled by D'Arcy MacManus Masius, St. Louis.

Mars' pet food division, Kal Kan, the only division to cut spending in 1984, did not lose pet food market share, which increased slightly to 8.9% in 1984 with sales of $421.8, according to estimates by John C. Maxwell, an analyst for Furman Selz Mager Dietz & Birney, New York. The division introduced no new products in 1984.

Kal Kan remains the No. 2 position behind Alpo in canned dog food, according to Mr. Maxwell, with 1984 sales of $149 million. Kal Kan canned cat food, with $165 million in sales, remains behind top-selling H.J. Heinz Co.'s 9-Lives, while Crave dry cat food moved to fourth place in its category with $57.2 million in sales. Mealtime dry dog food moved up to fifth place with $80.5 million in sales, replacing Carnation's Come 'N Get It.

In measured spending, Kal Kan canned cat food received $4.6 million, down 15.3%; Kal Kan canned dog food, $9.5 million, up 23.4%; Crave dry cat food, $5.3 million, down 18.5%; Mealtime dry dog food, $7.5 million, down 16.7%.

After being on the brink of bankruptcy and shifting from financially draining videogames to concentrate on one major category—toys—Mattel Inc. rebounded in 1984 and faces a profitable 1985. The company also increased U.S. advertising 50.2% to an estimated $132.9 million to become the 63rd largest advertiser.

According to market analyst Carlton Lutts of the "Cabot Market Letter," the company is poised for major growth and profit after experiencing "an orgy of expansion way beyond reality."

Mattel had sales of $880.9 million, up 39%, for the fiscal year ended Dec. 29, 1984, and net income of $71.3 million, up from a loss of $394.1 million for the year-earlier period. Operating profit was $136.9 million, compared with $81.5 million the previous year.

Advertising got the benefit of the Mattel sales volume growth, rising from 15% of sales to 16%. Worldwide, Mattel spent $139.9 million in advertising and promotion in 1984, compared with $93.1 million in 1983.

By hitching its star to its toy division, the company is soothing its fiscal ills that have led to a subsequent sell-off of subsidiaries that had nothing to do with toys (including a circus, theme parks and other amusements).

Three of its toy products rank among the nation's top 10 sales producers in 1984. Masters of the Universe, Rainbow Brite and Barbie doll, posting second, seventh and ninth place, respectively, in the 1984 Christmas polls. Hot Wheels also was a big sales-getter.

While conditions began to turn around in 1984, indications so far in 1985 show that Mattel's recovery is continuing to gain momentum. For the first six months ended June 29, Mattel posted sales of $478.5 million, up 51% from the same period in 1984. Net income climbed 61.5% to $42 million.

Perhaps setting the trend for the next six months, advertising and promotion for the first half of the year increased 56% to $77.7 million. Sales increases during this period are traced to Mattel's new emphasis on shipping products earlier in the year and stepped up advertising.

Over the past three years, Mattel's share of the domestic toy market has risen from 7.5% to 12%, while its share of the international toy market has nearly doubled from 4.5% to 8.5%.

In 1985, Mattel has introduced four new lines of toys and has begun to expand into related markets. New products, with advertising handled by Ogilvy & Mather, Los Angeles, introduced during the first six months of 1985 include the Angel Bunny collection of 14 infant toys and the four-member Heart Family doll line.

Based on the success of the He-Man and Masters of the Universe boys' action figures, Mattel also created a "fashion-action" collection for girls called She-Ra: Princess of Power. Mattel also developed a Wheeled Warrior line of plastic cars, delivered to stores in May.

The Angel Bunny products were introduced early in 1985 with print ads directed at young mothers in a number of women's service books and followed by insertions in baby books, as well as some late-night network television.

Princess of Power debuted in early April with spot tv. As the national rollout began, commercials shifted to weekend network, syndication and cable, as well as additional coverage via print in women's service books.

The Heart Family's introduction occurred in late spring with full-page newspaper announcements in key markets, supplemented by late-night tv spots.

Wheeled Warriors was the last to arrive at market, in mid-June, with heavy spot tv and as it rolled out nationally, it moved to weekend network, cable and an expanded use of spot tv.

In 1984, the vast majority of Mattel's $59 million ad spending in measured media was directed at network and spot tv, which combined accounted for $50.4 million.

Dolls and doll accessories accounted for nearly $25 million of the measured ad budget, with the boys' action toys representing the second highest allocation of ad dollars—$24 million.

This year's larger ad budget is supporting production of nearly 85 tv commercials that are in various stages of production, and officials, forecasting an over-all shift in the media mix, see more use of syndicated and cable placement than in the past when network weekend tv was the primary target.

Mattel stepped up production at its worldwide manufacturing operations by 27% and initiated a new operations planning function to speed up the filling of orders. This means that a line of products can be produced for advance order well before the annual Toy Fair in February. According to a Mattel spokesperson, prefall consumer spending, as opposed to the traditional Christmas season, has greatly increased in recent years.

In January, 1985, Mattel showcased a new line of products in Scottsdale, Ariz., one month before the industry Toy Fair in New York. This year the company plans an October preview of its 1986 toys in Tucson. Additional toy shows highlighting Mattel products will be in Scottsdale next January and February.

Mattel established a new corporate structure. The company's 10 senior officers now report to what is called the Office of the Chief Executive, headed by chairman Arthur S. Spear and president Glenn A. Hastings. Thomas J. Kalinske is president of Mattel, U.S.A. and John W. Amerman is president of Mattel International.

Mattel in November, 1984, split its advertising between Ogilvy & Mather, Los Angeles, which has handled the company almost exclusively since 1954, and Dailey & Associates, Los Angeles, part of Interpublic Group of Cos. Dailey will handle Mattel's $6 million Hot Wheels account and unspecified future projects.

Ed Libov & Associates, Los Angeles, the media buying agency, no longer handles occasional special projects. The changes came after Mattel conducted a 60-day search, considering several top contenders in the Los Angeles area, all full-service agencies with strong international networks. Mattel says the new assignments are simply a result of increased advertising, rather than a loosening of the grip Ogilvy & Mather has had on the account.

In 1984, Mattel placed unprecedented emphasis on licensing tie-ins and cooperative promotions. Royalty income from sales of licensed products increased 72% to $8.1 million.

Mattel had licensing agreements with Marvel Comics, Ralston Purina Co., Telepictures Inc., Group W Productions and SRM Entertainment among others.

Over-all, Mattel has concentrated its licensing agreements on Masters of the Universe, Barbie and Hot Wheels as well as three of its four product introductions: Princess of Power, Wheeled Warriors and Angel Bunny.

In the U.S., the company has 159 different licensing agreements with 83 companies on one or more of Mattel's products. Overseas, Mattel has about 300 licensing agreements with 226 companies. Licenses for animated tv series based on Mattel toys are expected to be the most lucrative of these deals.

Mattel also participated in cooperative promotions with Kellogg, Nestle and Campbell Soup Co.

Following the success of last year's 30-minute series, "He-Man," produced through Group W Production, Mattel has licensed "She-Ra: Princess of Power," for back-to-back programing. Through SFM Enterprises, a third program, "Wheeled Warriors," based on Mattel's new line of plastic cars, was to be aired this month. Hallmark Cards is producing a five-part, miniseries based on its Rainbow Brite characters, which Mattel has licensed as a successful line of dolls.

In addition, Mattel and Filmation Inc., Reseda, Cal., produced a feature-length animated film, "The Secret of the Sword," which showed this summer in theaters nationwide. Telepictures Inc. has found another market for Mattel toy-related products. Its licensed *Barbie* and *Masters of the Universe* "fashion and life style" quarterly magazines aimed at children have each exceeded 1 million in circulation.

Magazines and animated tv programs linked to toy manufacturers have been criticized by the National Assn. for Better Broadcasting and other nonprofit consumer groups that argue these products are essentially advertising for Mattel and should be classified as such. FTC regulations prevent advertisements for Barbie, for example, from appearing on the pages of the *Barbie* magazine. However, Barbie is featured prominently in the editorial content of the *Barbie* magazine, but not in ads.

In the future, Mattel ads may take on a different look. The FTC lifted restrictions on the filming of toy commercials that had been in effect since 1971. Mattel may now use camera tracking methods, stroboscopic lighting and other special effects to enhance the appearance of its Hot Wheels die-cast cars.

Mattel agreed to submit to the FTC market research demonstrating that the commercials are not deceptive to children. In response to angered consumer groups, the FTC pledged it will provide "additional guidance as to the circumstances under which these camera techniques may be used."

Mattel says the change in regulations has not led to any significant changes in advertising policy nor is it expected to in the immediate future.

Mazda Motors of America

RANK 92

Rancho Dominguez, Cal.

($ figures = 000,000)

Worldwide	1984	1983	% chg
Sales	5,844	5,566	5.0
Net income	121	105	15.7
Advertising	72	75	-4.5

Mazda Motors of America, the fourth largest Japanese auto importer in the U.S. and latest to announce plans to produce cars in the U.S., was the 92nd largest national advertiser in 1984 with ad expenditures estimated at $71.8 million, down 4.5% from a year earlier.

Mazda set record highs in worldwide sales and earnings for fiscal 1984 for the ninth consecutive year, posting a 15.7% increase in net income to $121.1 million and a 5% gain in sales to $5.84 billion. Sales and earnings for both 1984 and 1983 fiscal years, ending Oct. 31, were converted from yen to dollars at the rate of Y245 = U.S.$1.

An upgraded model mix helped produce the boost in total sales over fiscal 1983, because factory sales were down worldwide at Mazda Motor Corp. to 1,331,541 units (including knockdown sets), down 0.8% from 1983. Of total production, factory sales for the Japanese market declined 9.6% to 367,805 (for cars and trucks), while export sales improved 3.1%. Exports account for 72.4% of total factory sales.

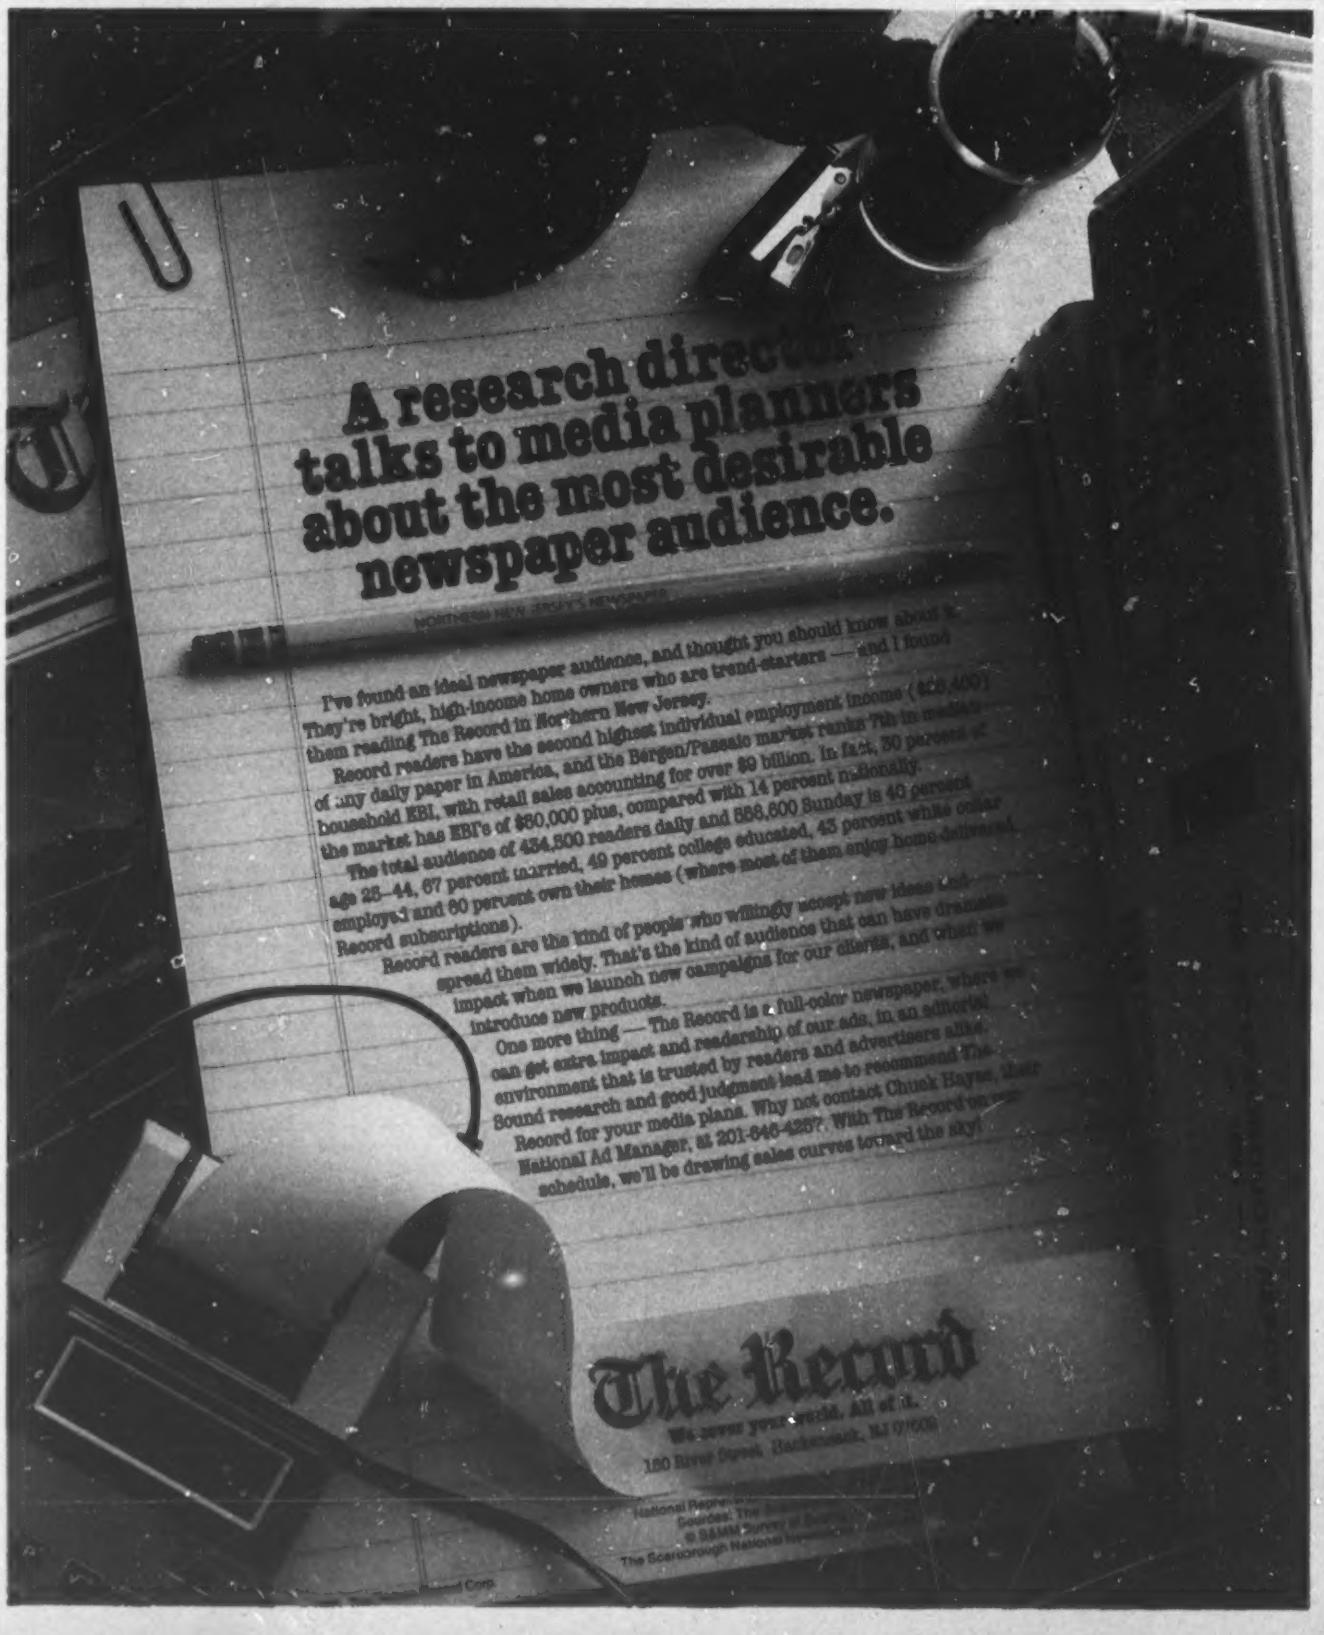
Mazda's U.S. sales for 1984 increased 2.2% to a record 288,793 units—169,666 cars (down 2.2% from 1983) and 119,127 trucks (up 56.4% over 1983). The car/truck combination gave Mazda a 2.3% share of the total U.S. market (1.6% share just for the autos). Mazda took an 8.7% share of the total import market in the U.S., up from 8.4% in 1983. Over-all, its share made it the fourth largest Japanese importer to the U.S. behind Toyota at 23%, Honda at 20.9% and Nissan at 20%.

For the year, Mazda car sales were just below the "voluntary" restrictions imposed on the company (173,500 for Mazda) by the Voluntary Restraint Agreement. The quota for 1985, beginning April 1, 1985, has been raised to 229,720 imported cars. That does not count domestically produced Mazda cars or foreign or domestically produced trucks, which Mazda took great advantage of in 1984 by increasing truck sales 56.4%.

Aiming to ensure continued future success in the face of VRA limits, Mazda said it will begin production at a new $450 million auto assembly plant in Flat Rock, Mich., in the fall of 1987. The plant, operated by the newly formed Mazda Motor Mfg. (USA) Corp., will have an annual production capacity of 240,000 vehicles and will make Mazda the fourth Japanese auto maker to locate vehicle assembly operations in the U.S. Honda, Nissan and Toyota already have plants here.

Ford Motor Co., which has a 25% stake in Mazda, is expected to place its nameplate on as much as 50% of the Flat Rock plant's car output. The car to be produced will be a version of Mazda's popular front-wheel drive 626 model.

Mazda in the U.S. is a combination of Mazda Motors of America (Central), Rancho Dominguez, Cal., and Mazda Motors of America (East), Jacksonville, Fla. The California unit



A research director talks to media planners about the most desirable newspaper audience.
NORTHERN NEW JERSEY'S NEWSPAPER
The Record
We cover your world. All of it.

I've found an ideal newspaper audience, and thought you should know about it. They're bright, high-income home owners who are trend-starters — and I found them reading The Record in Northern New Jersey.

Record readers have the second highest individual employment income ($26,400) of any daily paper in America, and the Bergen/Passaic market ranks 7th in median household EBI, with retail sales accounting for over $9 billion. In fact, 30 percent of the market has EBI's of $50,000 plus, compared with 14 percent nationally.

The total audience of 434,500 readers daily and 558,600 Sunday is 40 percent age 25–44, 67 percent married, 49 percent college educated, 43 percent white collar employed and 80 percent own their homes (where most of them enjoy home-delivered Record subscriptions).

Record readers are the kind of people who willingly accept new ideas and spread them widely. That's the kind of audience that can have dramatic impact when we launch new campaigns for our clients, and when we introduce new products.

One more thing — The Record is a full-color newspaper, where we can get extra impact and readership of our ads, in an editorial environment that is trusted by readers and advertisers alike.

Sound research and good judgment lead me to recommend The Record for your media plans. Why not contact Chuck Hayes, their National Ad Manager, at 201-646-4237? With The Record on our schedule, we'll be drawing sales curves toward the sky!

The Scarborough National [illegible]

is a joint venture of Mazda Motors Corp. (formerly known at Toyo Kogyo Co. Ltd. until the name change in May, 1984) and Sumitomo Corp. and handles car and truck imports to the Pacific Northwest, Great Lakes and Gulf regions. The Florida operation is a subsidiary of C. Itoh Co. and handles imports to an 18-state region in the East and Midwest.

Mazda spent $51.8 million in measured media in 1984, up 11.2% from the previous year. The measured total for 1984 includes $1.3 million for cable tv, a category not reflected in last year's monitored figures. However, it does not include a measured $10.2 million in dealer advertising.

Network and spot tv and continued use of auto enthusiast magazines and national newsweeklies once again were the media mainstays behind the introduction of Mazda's 1985 model line. Measured ad spending broke down to $26.3 million in network tv, down 3.3% from 1983; $4.1 million in spot tv, up 78.3%, and $16.8 million in magazines, up 15.1%. Mazda probably spends a higher percentage of media dollars for magazines than most other automotive advertisers.

Mazda's lineup of advertising and promotion for the 1985 model year stayed close to the successful patterns established earlier. Tv and print ads continued to keep up the price/value theme of previous years, as well as stressing the "total performance" of the full Mazda line.

In the fall, the company continued its "weekend" use of network tv, with the promotion strategy aimed at reaching the upscale male audience with annual incomes of more than $35,000. Sponsorship was heavily weighted with sports programing, highly rated weekend shows such as "60 Minutes," weekend movies and prime time programs on Friday nights.

In the fall of 1984, as U.S. auto makers Chevrolet and Chrysler both announced plans to cut back on tv sports buys, Mazda maintained and aggressively expanded its sponsorship of football, basketball and other events. This included use of televised games of the NCAA, NBA, NFL and USFL. The "Mazda Sportslook" series of sports journalism programs on cable's ESPN continued for a fifth year with Mazda sponsorship, as well as the new "Monday Night Match-Up," also on ESPN, which profiles the two teams matched in the Monday night football game on ABC-TV. "Match-Up" returns to ESPN this fall.

Mazda continues to build a presence in ladies professional and senior professional golf. The company is an advertiser on the 74-tournament LPGA women's tour and was major sponsor of the first tournament of the year, the Mazda Classic at Deer Creek, Fla.; the Mazda Hall of Fame Classic in Texas over the July 4 weekend, and the final LPGA tournament of the year, the Mazda Japan Classic in Hiroshima. Mazda was also a sponsor of the Senior PGA golf tour.

Mazda continued its involvement in auto racing with its RX-7, high-performance rotary engine sports passenger car winning an unprecedented fifth consecutive GTU championship of the International Motor Sports Assn. Sales of the RX-7, priced at $10,945 for the S model five-speed coupe, gained slightly in 1984 to 53,038 units, up from 52,514 the previous year. But a competitor, the Fiero from Pontiac with sales of 92,374 units, unseated the RX-7 as the top-selling, two-seat sports car in the U.S. Measured ad spending on the RX-7 was $6.1 million, including $3.7 million in network, $2.3 million in magazines, and $183,400 spot tv.

The popular 626 model, with sales of 71,407 units in 1984, continued to be the company's best-selling car for the second straight year. The 626 model, priced between $8,845 and $11,625, was supported with an expenditure of $9 million, of which $4.7 million went to magazines, $3.2 million to network and $1.1 million to spot tv.

Sales of the GLC economy cars ($5,195 the lowest price for the four-speed three-door hatchback) totaled 45,221 units in 1984. Measured media spending for the GLC models totaled $6 million—$3.5 million in network tv and $2.5 million for magazines.

Print and tv advertising for the 1985 line once again incorporated the "Experience Mazda" theme, with print ads featuring full-body shots of the GLC, RX-7 and 626 cars. The theme also played well in network spots that showed the cars on a track, stressing over-all performance and features.

Aggressive promotion of the 1985 B2000 and SE-5 pickup trucks accounted for more than one-third of the total annual budget and included $19 million in measured media. The major portion, $14.8 million, went for network and spot tv and $3.5 million for magazines. Such was the main thrust of the media effort that accounted for record 1984 truck sales using a price/value theme for a fourth year, "Sakes Alive! Only Mazda has a truck for $5,995."

The "Sakes Alive!" theme was discarded in early 1985 when Mazda unveiled its redesigned pickup truck line and announced plans to go after a bigger share of the compact truck market. Introduced as 1986 models, the new B2000 was promoted as "bigger and better, a redesigned technically sophisticated product that is still a great value for the money." Base price of the standard truck is $5,995. The sportier SE-5 starts at $6,395, while the higher-content LX model is priced at $7,645. Mazda truck marketers forecast 1985 truck sales of 120,000 units, about the same as in 1984.

MCA Inc., Universal City, Cal.-based parent of Universal Studios, was the nation's 89th largest advertiser with advertising of $77.1 million, up 5.5% from the previous year.

The rise in advertising, coming mainly from the Filmed Entertainment division, primarily reflects an increase in film advertising, particularly in the use of network tv to promote film openings.

Filmed entertainment accounted for 54% of total sales of $1.65 billion at MCA for the year ended Dec. 31, 1984, down 4.2% from 1983. Earnings of $94.9 million, were down 35.4% from 1983. Despite improvements in the first-quarter 1985 earnings from tv, home video and pay tv operations, overall net income dropped 13% to $18.4 million on revenues of $431.6 million, up 10% from the year-earlier period. Operating losses were recorded in retail and mail-order businesses. Merchandising revenues were lower compared with the year-earlier period, while book publishing, records and music group revenues reached record highs for the quarter.

During 1984, most of MCA's media advertising as usual went toward Universal Pictures. Frank Price, chairman, MCA motion picture group, and Marvin Antonowsky, exec vp-advertising, publicity and promotion, brought a philosophy favoring large network tv campaigns to the studio when they joined the company in November, 1983.

The result can be seen in an 11% increase in tv advertising, but more significantly in the division between network and spot ads. Whereas the two categories were split fairly evenly —54% network, 46% spot—for 1983, network accounted for more than 90% of tv advertising in 1984. MCA spent $30.5 million on network tv, nearly doubling its network expenditures in 1983.

By the same token, magazine advertising has become a low priority, plummeting from more than $2.5 million to $739,000 in 1984, while network radio increased 400% to $1.2 million.

Most new releases received between $2 million and $3 million in measured backing.

They included: "All of Me," "Cloak & Dagger," "Conan the Barbarian," "Dune," "Hard to Hold," "Iceman," "Psycho II," "Streets of Fire," "Tank" and "The Wild Life." The studio's "The River" received only limited promotion in 1984 before its yearend release.

Universal plans to increase its number of theatrical productions, a strategy designed to tap the growing pay tv and home videocassette markets.

Home video sales and pay tv licensing contracts were up 34% over 1983, exceeding $160 million. In a statement to stockholders, president-ceo Sidney Jay Sheinberg noted videocassettes and major pay tv contracts have combined "to significantly reduce the risk of investment in theatrical production."

The drop in motion picture revenue in 1984 alarmed some MCA stockholders but comes as no surprise. Universal enjoyed two years of huge profits largely because of "E.T.—The ExtraTerrestial," the $360 million blockbuster that put the filmed entertainment division's gross at more than $1 billion in 1982 and spilled over into 1983's $927 million output.

Lacking a blockbuster of "E.T.'s" caliber, Universal had a respectable 1984, with revenues of $888.9 million, down 4%.

Revenue could drop again for 1985 because the studio released only 17 films, compared with 21 in 1984. Another blockbuster would make a difference, however.

Of this year's releases, Universal's relationship with Steven Spielberg—whose Amblin Entertainment took up residence on the lot in the spring of 1984—continues to bear fruit.

In addition to the hit "Back to the Future," the No. 2 attraction (behind Tri-Star Pictures' "Rambo: First Blood Part II") in an otherwise-sluggish summer at the box office, Mr. Spielberg is producing 44 half-hour segments of "Amazing Stories" for Universal tv and "The Money Pit," a theatrical romantic comedy, for Christmas release. Both productions figure to receive heavy advertising capitalizing on the Spielberg name.

Universal also reaped bountiful rewards in tv syndication in 1984, raising $470 million from licensing agreements.

That figure should rise markedly in 1985, as a number of successful Universal shows become available for syndication. Among them is "Magnum P.I.," "Knight Rider" and "Simon and Simon." "Magnum" alone is expected to produce more than $200 million in syndicated revenues.

MCA also took a step toward increasing its potential viewers abroad to 1 billion consumers. Universal is negotiating to be the first American studio to broadly distribute its film product to the People's Republic of China.

Skip Paul was named president, MCA Enterprises, in June to oversee the effort. Mr. Paul's duties entail expanding existing lines—including film, recorded music and video—into China and throughout the Pacific Rim, as well as exploring the creation of new product lines tailored to those markets.

Universal's other operations were relatively stable in 1984—with the exception of the Universal Studios Tour, which, like other local theme parks, suffered a summer decline in attendance attributed to the 1984 Olympics.

MCA Development remained active in local real estate, completing construction on three major projects during 1984. Foremost among these is the Sheraton Premiere, a 457-room luxury hotel, which opened in May, 1984.

McDonald's Corp., Oak Brook, Ill., was the nation's 10th largest advertiser in 1984, increasing domestic advertising and promotion spending 54% to $480.3 million.

The company says 6% of systemwide sales of $10 billion, or $600 million, was spent worldwide on advertising and promotion by the company, its franchisees and affiliates. An estimated 80% of that total was spent in the U.S. While the amount spent on advertising increased from 1983 to 1984, the percentage of systemwide sales allocated to advertising declined to 6% from 6.1% in 1983 and 6.7% in 1982.

A shift in advertising expenditures that skewed spending more heavily to network tv and away from local tv and promotional spending created efficiencies that account for the decrease in ad spending as a percentage of sales.

McDonald's retained its status as the world's largest foodservice company last year as it became the first restaurant company to achieve sales of $10 billion, a 15% increase over 1983. Total number of restaurants open by yearend rose 7% to 8,304.

The company's foreign presence continued to increase. The 1,709 stores outside the U.S. accounted for sales of $1.94 billion, or 21% of the systemwide total, up from 1,527 stores and sales of $1.62 billion (20% of the total) in 1983. In 1984, McDonald's opened its first stores in Andorra, Finland and Taiwan. Thailand, Mexico, Yugoslavia and Venezuela were scheduled to be added this year.

For many years, McDonald's marketing strategy has been built on four main elements: Heavy media advertising to reinforce the chain's "food, folks and fun" message; a limited but flexible menu selectively changed to reflect consumer preferences; steady physical expansion that has meant adding at least 500 stores to the system each year, and community involvement that keeps the McDonald's name visible while returning some of the profits to the local communities.

In 1984, McDonald's made significant changes in all four of those areas.

To begin with, the over-all message of the chain's advertising was changed to "food, food, folks and fun," a more substantial alteration than it might at first appear. McDonald's advertising long has sold the chain's image, atmosphere and a "good feeling"—what the company calls the "McDonald's Experience"—as much as it has hyped hamburgers. While a touch of warm sentimentality still can be found in some commercials, it's sandwiched between more evident product photography and fast-paced, upbeat elements reminiscent of music videos.

Along with that change in style, McDonald's and national agency Leo Burnett USA, Chicago, in June changed the ad theme to "It's a good time for the great taste of McDonald's" from "Together, McDonald's & You." Chain executives endorsed the new theme because its emphasis on "taste" fit the plan to pay more attention in advertising to individual menu items. McDonald's media schedule is built around those products, with each major food item getting several weeks of attention throughout the year.

The new Burnett theme was similar to one experimented with in the Washington and Baltimore markets. Needham Harper Worldwide, local agency for the operators' co-op in those two markets, produced a campaign themed "I've got a taste for McDonald's" that used an offbeat, avant-garde visual style to sell the chain. Speculation that Needham might win back the national McDonald's account on the basis of those spots didn't pan out, and the D.C. campaign was phased out in July, 1984, after a six-month run.

But it did show that McDonald's corporate marketing staff would accept a more modern advertising approach, and that lesson was quickly learned and absorbed by Burnett's creative. The chain's tv commercials have become much more visually contemporary and less sentimental.

The media schedule itself came in for some changes. McDonald's owner/operators voted to increase to 2% from 1.25% of their sales in contribution to the Operators National Advertising Fund, which funds network tv advertising. Concurrently, the system's commitment to local tv advertising and promotional expenditures was reduced.

The results of that shift were evident in 1984. Spending for network tv more than doubled to $162.5 million from $80.9 million. Spot tv expenditures fell 13% to $91.5 million.

The dramatic increase in the network tv budget required an adjustment in buying strategies. McDonald's already was one of the major sponsors of children's programing, so the added funds were channeled into prime-time adult programing, where McDonald's message previously had had only limited presence.

McDonald's has become a significant factor in the upfront prime-time market and has bought time during such programs as "Dynasty," "Dallas" and adult-theme, made-for-tv movies.

A significant portion of that tv budget was spent during the 1984 Summer Olympics. McDonald's was a major sponsor of the games; its operators contributed $4 million to construct the complex used for swimming and diving events. During ABC-TV's telecast of the games, McDonald's spent an estimated $35 million for commercial time.

Additionally, the chain ran a scratch-card promotion during the games called "When the U.S. wins, you win." The boycott by the U.S.S.R. and other Eastern Bloc countries greatly helped the showing by American athletes and increased the number of food-prize winners, a development that McDonald's maintained was surprising but welcome.

The Olympics were not McDonald's only involvement with sports. A controversy erupted at the start of the 1984 baseball season when McDonald's, working with San Diego Padres first baseman Steve Garvey, enlisted at least one player on every major league team to wear a wristband that carried the McDonald's Golden Arches logo and the Ronald McDonald House logo. The wristband was intended to call attention to the 10th anniversary of the Ronald McDonald House charity.

Some critics questioned whether such a program might lead to baseball players wearing endorsement logos on their uniforms as tennis pros and other athletes do on their clothing. An agreement finally was reached that allowed players to wear the wristbands, but without the Golden Arches logo.

McDonald's also expanded its sponsorship of amateur athletics, including swimming, diving, gymnastics and cycling competitions. And it signed Olympic gymnast Mary Lou Retton as a national spokesperson (while its Chicago operators signed Olympic star and NBA rookie-of-the-year Michael Jordan).

While picking up the pace on ad spending, McDonald's also was moving more quickly when it came to new menu items. The chain traditionally has been slow to begin in-store testing of new products and slow to make yes-or-no decisions about those products once testing began. McDonald's claims never to have killed any item that had been introduced nationally, but such items as the McRib and McChicken sandwiches languished in several thousand stores before being pulled.

Lately, McDonald's and its franchisees have become more experimental and more bold in new-product testing, seemingly less afraid to learn that they might be wrong about a product's appeal. Two items, the McCrescent sandwich and Maple McCrisps breakfast nuggets, got the ax after brief regional tryouts. But other test items continued to be evaluated.

Sales of its Quarter Pounder reportedly have been weakening, and McDonald's has tested several new variations for that and other sandwiches. These include the Cheddar Melt, a ⅓-lb. cheeseburger tested in late 1984 in Wisconsin, and a sandwich originally tested in Shreveport, La., and Cleveland as the Lettuce & Tomato Special and redubbed the

When you have a $100,000 home in the suburbs,
you want to protect your investment.

After all, a home is probably the largest investment a person makes in their lifetime. To protect its value, you'd have to know the circumstances that could hurt its worth, and prevent them from happening. You'd have to know about zoning board meetings, tax proposals, proposed school closings, and countless other proceedings. You can't find out about local issues and events from the network news.

If you live in the suburbs, the only place to get the news, issues and information that affect your everyday lives is from Suburban Newspapers.

USSPI makes it simple for you to reach this suburban audience, where nearly 70% of all metropolitan sales are made. USSPI is a nationwide network of over 1000 quality newspapers covering 45 major metro areas, with an audience of 31,000,000 readers.

USSPI papers have won over 500 local and national editorial awards. All are audited, and subscribe to the new SAU standard advertising units, so your ad can run unaltered from coast to coast.

We can give you demographics and CPMs by market. And you can buy as many as you like with just one insertion order. One rate. One invoice. One check. To reach the suburban market, buy what the suburban market reads. USSPI.

USSPI
U.S. Suburban Press, Inc.
The suburbs' source for news

McD.L.T. when the test was expanded. By mid-1985, the sandwich was available in about 1,800 stores and showing potential. The McD.L.T is sold in a special two-compartment container that allows the beef patty to remain warm without wilting the lettuce and tomato (which are in the adjoining compartment).

Other sandwiches tested have included the Lite Mac, a lower-calorie version of the Big Mac; Chicken McSwiss, a cheese-topped version of the McChicken, and regular and bacon double cheeseburgers. McDonald's officials even confided that its test-kitchen staff has developed a McPizza item, although it hasn't yet been tested in a restaurant.

McDonald's also has begun exploring salads, a labor-intensive, low-margin product category from which it has shied despite other chains' rush to add salads and salad bars. McDonald's so far has limited itself to pre-prepared salads rather than salad bars, but has been testing some innovative versions. In several urban markets, the chain has been evaluating tossed salad, chef salad, shrimp salad and pasta salad. Ad support has been limited to in-store materials because the salads have been tested only in selected (primarily center-city) stores within the test markets.

The chain's most daring new-product test has been breakfast biscuits prepared from scratch and baked fresh within the test stores. Requiring additional equipment and extensive staff training, the biscuit test (ongoing in several major markets) will tell McDonald's how feasible on-site food preparation can be for its tightly regulated system. If it proves viable, biscuits could be only the first of several subsequent menu items—such as pizza—that could be evaluated.

The third element in McDonald's marketing strategy is physical expansion. The decision to patronize a fast-food restaurant often is made on the road, so the first chain a customer encounters likely will get the business. Continually increasing the number of stores continually increases the odds in McDonald's favor.

Every year it exceeds its annual goal of adding 500 stores to its system (526 opened in 1984) and every year critics ask how it can possibly repeat the feat the next year. The good sites have all been taken, the critics say, adding that the fast-food market is saturated. McDonald's founder and past chairman Ray Kroc, who died in January, 1984, once replied to that criticism with the observation that "saturation is for sponges," and the chain continues to add restaurants at the rate of nearly three every two days.

The growth strategy has not changed, but the kind of sites McDonald's is looking for has altered as the number of streetcorner plots diminishes. McDonald's and rivals Burger King and Wendy's are looking to add stores wherever large numbers of potential customers congregate. As a result, McDonald's has opened restaurants in office buildings, zoos, train stations, hospitals and schools. In 1985, it opened a store in Chicago's Field Museum of Natural History and 10 stores on the Connecticut Turnpike.

In August, 1984, the chain was awarded a contract with the U.S. Navy that could put McDonald's units on as many as 300 naval bases around the world.

Similarly, it has become flexible and imaginative in the design for its free-standing units. In some small sites it has opened limited-menu "McSnack" stores. Where major off-highway sites are available, it is opening "McStop" complexes that include gasoline stations and convenience stores as well as large McDonald's units.

McDonald's reached two milestones in 1984. On Oct. 12 in Duluth, Ga., it opened its 8,000th store. That unit includes a number of technological innovations—including a laser-disc point-of-purchase advertising system—that will be used in selected future stores.

On Nov. 20, the 50 billionth hamburger was served in New York, almost 30 years after the chain began. The second 50 billion is expected to go much faster: Burger 100 billion is projected to slide off the grill May 13, 1993.

One major change in the chain's marketing staff was the addition in October, 1984, of Peter Nelson as senior vp-marketing. Mr. Nelson previously had been president-chief operating officer of Needham Harper Worldwide, an agency he had been with for 28 years.

Mobil Corp., New York, the nation's third largest corporation and second largest oil company, was the 42nd largest national advertiser in 1984 when it increased estimated ad spending 7.8% from a restated $160 million to $172.5 million, most of that going to Montgomery Ward & Co., which Mobil intends to sell.

Despite a continuing energy glut, worldwide sales at Mobil increased 2.5% in 1984 to $60.48 billion. Earnings, meanwhile, fell to $1.27 billion, a drop of 15.6%.

The company has stated it is "taking advantage of the present business climate to prepare ourselves for a better market in the future." One obvious attempt at doing so was the $5.7 billion acquisition of Superior Oil Co., a move that substantially increased Mobil's North American production capacity and reserves, both of which have been named as major corporate goals.

Petroleum operations, both foreign and domestic, was the only segment of the company's four that turned in negative results. Other operating segments are chemical, paperboard packaging and retail merchandising.

Mobil's single biggest ad expenditure was for subsidiary Montgomery Ward, the nation's sixth largest retailer, which operates 322 conventional retail stores, 2,099 catalog facilities, 44 Jefferson Ward upscale discount stores and 38 liquidation centers.

In 1984, Montgomery Ward posted its second consecutive profitable year, with earnings of $53 million on net sales of $6.5 billion. Those figures represented increases of 33% and 8%, respectively.

Montgomery Ward's total measured ad budget for 1984 was $11.1 million, up about 15% from 1983, according to six media figures of Leading National Advertisers. Virtually all ad spending for Ward went into spot tv buys; none went to network tv.

Montgomery Ward's discount retail chain, Jefferson Ward, had measured media spending of $1.4 million after getting almost none in 1983. Again, nearly all Jefferson Ward spending went to spot tv. Newspaper inserts, direct mail and catalog production are among unmeasured media that drive up the retailer's ad budget.

Mobil chairman Rawleigh Warner Jr. announced earlier this year the company's intention to spin off or sell the Montgomery Ward & Co. unit.

That announcement came six months after Ward ceo Stephen Pistner bailed out to become chairman of McCrory Corp., the retail subsidiary of Rapid-American Corp., New York. Bernard Brennan, brother of Sears president Edward Brennan, returned to Montgomery Ward in June to replace Mr. Pistner. Mr. Brennan had been exec vp of Montgomery Ward before leaving to head Household Merchandising, a subsidiary of Household International.

Mr. Brennan returned to Ward in the midst of an austerity and improvement program that may lead to the closing of as many as 100 department stores within two years. Meanwhile, the retailer continued testing a new merchandising strategy that it calls "the seven worlds of Wards." The plan calls for creation of specialized "stores-within-a-store" in seven merchandise areas: Apparel, automotive, home electronics, home furnishings, appliances, recreation and leisure.

In 1984, Ward tested automotive and home electronics units in Las Vegas; home electronics and home furnishings in Colorado Springs, Colo., and Lombard, Ill.; automotive in Phoenix, Ariz., and appliances in Albuquerque, N.M. On Aug. 15, 1985, the company opened its first full-scale prototype store in Annapolis, Md. It planned to open two others later this year, one in Lombard, Ill., and the other in Torrance, Cal.

The company, founded by one of the pioneers of direct merchandising, announced in early August it would abandon its catalog operations at yearend to concentrate on retailing. The move came as a surprise because Ward had begun revamping its catalog operations to focus on specialty catalogs aimed at specific customer groups.

Measured media ad spending for Mobil Chemical Corp.'s Hefty plastic trash bags was slightly more than $12 million, an increase of more than 30% over 1983. In October, Mobil introduced nationally Hefty Cinch Sak trash bags, which sport a yellow drawstring that makes them easy to open, close and lift. Advertising for Cinch Sak was created by Ted Bates Advertising/New York, but the account was awarded to Wells, Rich, Greene, New York, in September. Bates refused to participate in an agency review for the Hefty and Baggies plastic bags accounts, both won by WRG.

Baggies freezer bags were backed with about $3.3 million in measured media support in 1984, split almost evenly between network and spot tv. Mobil spent only about $670,000 in measured media on Baggies food storage bags.

Mobil oil and gas product advertising attracted sizable ad outlays, including about $5 million in measured spending for gas and about $4 million for Mobil 1 motor oil. Advertising for both was concentrated in spot tv buys. Doyle Dane Bernbach, New York, handles the account.

In August, 1984, Mobil was forced to revise ads for Mobil 1 after the National Advertising Division of the Better Business Bureaus found that a superiority claim the company made came up short. In response, Mobil removed the claim, "The best engine protection for your car," from its ads.

The 1984 acquisition of more than 100 service stations in Florida, Texas and Arizona furthered the company's marketing strategy of concentrating in areas of most potential. The company also moved ahead with a worldwide program to construct new stations and refurbish existing ones. Many full-service stations are being transformed into self-service stations combined with "Snack Shop" convenience stores.

Measured spending for Mobil's corporate advertising campaign, also via DDB, held steady at about $4 million. The company in December announced it had "adopted a policy of not having anything to do with" the *Wall Street Journal*, and no longer advertise in or provide information about corporate developments to the *Journal*.

The company said the decision came about "after five years of problems" with the paper, but it apparently was touched off by a Nov. 16 article that described Mobil's plan to build an office tower in Chicago in conjunction with a real estate company that employed a relative of Mr. Warner.

The ad boycott, estimated to cost the *Journal* about $500,000 a year, seemed odd because of the type of corporate advertising Mobil runs: Op-ed messages from Mobil management to the general public, often attacking what it apparently perceives as a liberal bias within the media.

William P. Tavoulareas retired in November after 16 years as Mobil's president-chief operating officer. Allen E. Murray succeeded Mr. Tavoulareas, who will remain with the company as a member of its board of directors. Mr. Murray is expected to become chairman-ceo of Mobil upon Mr. Warner's expected retirement in February, 1986.

Despite limited success in its cigaret business, 1984 was not particularly hospitable to Philip Morris Co. The nation's 6th largest advertiser faced a year of advertising and marketing shakeups, continuing government and societal pressure, and off-years in its beverage subsidiaries.

New York-based Philip Morris had total U.S. advertising of an estimated $570.4 million in 1984, up 7.7% from 1983. The company reported worldwide revenues of $13.8 billion, up 6.5% from 1983, and net earnings of $888.5 million, down 1.7%. U.S. sales accounted for $10 billion of PM's total revenues.

Philip Morris' business is organized into five operating groups: Philip Morris USA, Philip Morris International, Miller Brewing Co., Seven-Up Co. and Southern California's Mission Viejo Realty Group.

After a sharp decrease in earnings for the fourth quarter of 1984—due to a write-down on Miller Brewing's unused Trenton, O., plant—the cigaret and beverage giant reported earnings increases of 25% each in the first and second quarters of 1985.

In addition, the first-half 1985 cigaret statistics compiled by John Maxwell of Laidlaw Ansbacher show Marlboro brand increasing its No. 1 market share to 22.3% in a declining market.

Despite these successes, barrel shipments of the company's Miller subsidiary and revenues for Seven-Up Co. both were down in 1985's second quarter, reflecting continuing problems in reaching profitability in these two acquisitions of the 1970s.

Of PM's $13.8 billion in revenues, Philip Morris USA, the company's domestic tobacco-products division, contributed 44.5%, or $6.1 billion.

Although its lead decreased slightly, PM remained ahead of R.J. Reynolds Industries as the nation's largest cigaret marketer.

PM, which grabbed the No. 1 position from RJR in 1983, commanded a total market share of 34.5% in 1984, compared with 32% for RJR. PM chalked up a 34.4% share in 1983 vs. RJR's 31.5%.

PM USA upped its measured-media spending, according to Leading National Advertisers, which assembles six major media totals, to $209 million in 1984, up about 12%, in support of a product list that includes three of the nation's top 10 cigaret brands. The division also contributed 75% of PM's 1984 operating profit.

Sources within the tobacco industry say PM's Marlboro brand contributes 60% of that profit.

According to analyst Mr. Maxwell, this world's best-selling cigaret increased its U.S. market share to 21.1% in 1984, up 1%—a remarkable accomplishment in an industry where 0.5% share is considered a success.

Marlboro 25s were rolled out across the nation Jan. 1, 1985. Analysts say PM's strategy with the larger packs—available at the same per-cigaret price as conventional 20-unit packs (25s means 25 cigarets)—is to increase consumption and thus market share in the essentially stagnant cigaret industry. LNA measured-media spending on Marlboro dipped 7.1%, to $55.3 million in 1984.

Reportedly disappointed with the performance of Players, its upscale but popularly priced brand, PM introduced a line extension, Players Lights 25s, into test June 1, 1985. Simultaneously, the company moved Dunhill, another low-tar premium brand targeted at an upscale audience, into test. Two PM agencies, Leo Burnett USA and Wells, Rich, Greene, are handling the test campaigns for Players Lights and Dunhill, respectively.

After 1983, its big introductory year, when LNA measured ad spending totaled $41.5 million, Players' ad support predictably leveled off at $17.4 million, as PM directed ad dollars to support sagging brands.

Merit, the nation's No. 7 brand, received a 42.4% boost in LNA-reported ad dollars, to $45.4 million, partly in support of the November rollout of low-tar Merit in boxes. The brand's market share dropped from 4.4% to 4.1% in 1984 and remained there for the first six months of 1985.

Benson & Hedges also received renewed ad support, as LNA measured-media spending rose 11.2%, to $37.1 million. The No. 5 cigaret watched market share slip to 4.8% in 1984 and to 4.7% most recently, from 1983's 5%.

In 1984, PM withdrew Cambridge, Saratoga and Raffles from test market, as well as its Virginia Slims line extension, Ovals 100s, pulled after a five-month test. Presumably PM is scuttling the brands. Total ad spending for the Virginia Slims brand decreased slightly, to $26.5 million, in 1984, according to LNA.

After considerable talk about working on new creative approaches with Doyle Dane Bernbach, New York, PM shifted the creative work on its Parliament brand to the longtime Miller agency, Backer & Spielvogel, New York. Parliament, which had dropped to a 1% market share by 1984, received no measured ad spending last year.

Although PM as yet has no entry in the cigaret industry's fastest-growing segment, low-priced generics, the company has left the door open for that possible expansion.

Philip Morris International, which coordinates overseas sales of both PM tobacco products and soft drinks, achieved revenues of $3.74 billion, up 2.5%, and operating profits of $420.9 million, up 15%.

Milwaukee-based Miller Brewing, still struggling to right the slipping market share of its flagship High Life brand, reported 1984 revenues up 0.2% to $2.94 billion—representing 21.2% of PM's business. Operating profits were $116.2 million, down 48.9%.

The decline in operating profits primarily was the result of writing down the assets of Miller's newly completed Trenton, O., brewery to net value levels. The new facility remains fallow because of general market declines in beer sales, including sales of Miller High Life, and improved productivity in other Miller breweries.

According to Beverage Industry statistics, Miller's total shipments rose slightly in 1984, from 37.4 million bbls. to 37.9 million bbls. That increase, however, was primarily because of the introduction of two popular-priced brands, Meister Brau and Milwaukee's Best; High Life shipments fell 15%, to 14.5 million bbls. in 1984, while Lite shipments remained virtually unchanged.

Miller held even with an over-all U.S. market share of 21% of total industry shipments in 1984, as estimated by R.S. Weinberg & Associates, St. Louis. That placed Miller second behind giant Anheuser-Busch (which increased its share to 36% from 1983's 33.6%) and far ahead of No. 3 Stroh

Brewery, at 13.4%. Miller's industry market share peaked in 1981, at 22.5%; A-B has increased steadily its over-all share of shipments.

Miller is trying to boost sagging market share, shipments and profits with continuing attempts to revitalize High Life and by expanding its product line. That latter helps satisfy volume requirements of distributors and retains shelf and cooler space in retail outlets.

Although everything from the U.S. economy and the product formula to Lite's cannibalizing influence has been tossed out as a reason for High Life's decline, sources say PM blames poor advertising and market positioning for at least part of the brand's six-year sales slide.

Accordingly, on Nov. 12, advertising for the nation's No. 3 beer brand was shifted to J. Walter Thompson USA, New York, from Backer & Spielvogel after a drawn-out, 11-month review. During the process, several key members of the High Life brand-management team resigned from Miller.

LNA measured-media spending in six media for High Life increased 11%, to $57.2 million, over 1983. Although creative responsibility for High Life has moved to JWT, media buying for all Miller brands remains in the hands of Backer & Spielvogel, New York, which had control of the High Life account since 1979.

Other agencies participating in the High Life review received assignments from Miller. PM favorite Leo Burnett USA, Chicago, was handed Sharp's LA low-alcohol product, while Chiat/Day, New York, took the new Plank Road premium brand, which moved into test in October, 1984. Six-media spending for Plank Road totaled $421,000 in 1984; Sharp's received $798,000.

JWT received an early thanks for its "Made the American Way" High Life work when its Chicago office was awarded Miller's Lowenbrau account in July. Ad spending for the superpremium beer, suffering from competition with A-B's Michelob brands, declined 10.5% in 1984, to $18.6 million. *Beverage Industry* reports Lowenbrau production fell 20% in 1984, as the brand's shipments declined to 1.2 million bbls.

Despite losing High Life and Lowenbrau, however, Backer & Spielvogel retained Miller's largest account, Lite. LNA measured-media spending for the nation's No. 2 beer rose 33%, to $67 million, in 1984; shipments stayed even at 18 million bbls. Although industry insiders have reported some grumbling between client and agency about the freshness of Lite's longtime celebrity sports stars campaign, B&S continues to produce the "less filling-tastes great" ads.

Lite has retained nearly 50% of the market, depite the influx of brewers into the light beer category. A-B's Bud Light, however, came on strong with nearly a 10% increase in shipments in 1984. *Beverage Industry* editor Gary Hemphill predicts the brand's 1985 numbers will look even stronger.

B&S also retained creative control over Meister Brau, Miller's October, 1983, entry into the popular-priced beer category—a segment growing much faster than anyone had expected. Meister Brau, acquired by Miller in the 1970s under PM, was reintroduced and positioned as a lower-priced alternative to A-B's Budweiser. Meister Brau received $21.3 million in LNA measured-media support during 1984; spending for Milwaukee's Best, another popular-priced beer introduced in spring, 1984, hit $4 million. Shipments for each totaled 2 million bbls. in 1984.

Although pulling Miller Special Reserve superpremium beer from the market in 1984, the brewer recently put yet another new beer, Miller High Life Genuine Draft, into test in the Midwest.

Despite this boom in new products, Miller keeps its new but never-used Trenton, O., facility vacant; industry analysts estimate that Miller's 1984 production was 15% below the capacity of its half-dozen plants. The brewer also reduced its work force in September, 1984.

Like Miller, thus far in 1985, advertising battles have made the biggest news for PM's Seven-Up Co. subsidiary, as seven-year agency N W Ayer was fired in July. Longtime PM agency, Leo Burnett, will take over the estimated $60 million account in October, 1985.

Seven-Up posted a 2% sales increase in 1984, as case shipments rose to 479.5 million. That growth, however, lagged far behind the total industry's 6.1% increase.

LNA measured-media spending for flagship 7UP brand rose to $22.8 million in 1984, up about 8.8%—similar to 1983's increase. Sales for brand 7UP increased slightly in 1984, to 355.5 million cases, representing 5.2% of the total U.S. soft drink market.

Diet 7UP had a banner year, posting an 11.6% increase in shipments and claiming a 1.4% market share. LNA figures for Diet 7UP show 1984 spending at nearly $12 million, up a slight 0.9% from 1983.

Although 7UP and Diet 7UP together still hold 51.7% of the lemon-lime soft drink market, according to *Beverage Industry*, the company faces a tough challenge from Coca-Cola USA's renewed focus on Sprite and diet Sprite. The latter two brands received $30.7 million in LNA measured-media spending in 1984, up more than 18% from 1983. Spending was especially heavy for diet Sprite, which received $7.5 million, up nearly 60%.

Apparently, the bet has paid off for Coca-Cola; combined sales of Sprite and diet Sprite rose to 301.5 million cases in 1984, representing 34.6% of the lemon-lime market. That's a 24.6% increase in case sales over 1983, leaving Seven-Up's 3.1% total sales increase in the dust.

In addition, PepsiCo has rolled its with-juice Slice product into major markets. Although numbers are scarce, Mr. Hemphill says Slice is doing very well in preliminary reports.

Despite these signals that the nation's two largest soft-drink companies may be invading Seven-Up's territory with a vengeance, the No. 3 producer in 1984 reported its first profitable year since 1979 (the year after it was acquired by PM). The subsidiary reported revenues of $734 million in 1984, up 12.9% from 1983, and operating income of $5.3 million, up from a loss in 1983 of $10.8 million.

Burnett had been handling Seven-Up's new products and international accounts since 1983, and was awarded from Ayer the domestic account after a reported client-agency dispute over the resurrection of the company's "Uncola" theme. Created in 1968 by then-Seven-Up agency JWT, the theme returned in spring's "Un's the One" ads, which replaced Ayer's previous no-caffeine emphasis.

Both of Seven-Up's low-calorie drinks, Diet 7UP and Sugar Free Like cola, were reintroduced with a 100% NutraSweet formulation during 1984. In addition, Like and Sugar Free Like, introduced in 1982, were reformulated recently. Typical of Seven-Up's problems, the new products were introduced almost simultaneously with Coca-Cola's flashy debut of its new Coke.

Like cola, Mr. Hemphill says, has three basic problems stymieing growth. First, he says, the no-caffeine market is not as strong as many bottlers hoped. On top of that, most of the consumers interested in a caffeine-free drink also want that product to be sugar-free (which may account, he says, for Sugar-Free Like's 1984 sales increase of 19% in the face of regular Like's 16.7% decline). Finally, the lack of available bottlers has knocked Like out of several markets; most bottle either rival Coke or Pepsi.

Reflecting those problems and the reformulation, LNA measured-media spending for Like and Sugar Free Like was cut in half during 1984, dropping to $5.8 million.

Seven-Up also consolidated its food products companies into two divisions, the freeze dried division and the citrus products division. The California-based citrus products division has rolled Juice Up frozen concentrated lemonade and lemon-limeade—branded with the 7UP logo—into markets nationwide.

PM sold its Philip Morris Industrial division in two separate transactions in early 1985, commenting that the paper-products businesses did not fit into the company's longterm strategies.

Biscuit prods.	1,799	1,549	16.1
Confectionary	1,110	1,053	5.4
Grocery prods.	1,041	1,020	2.1

Nabisco Brands, which merged with R.J. Reynolds Industries in June, 1985, during 1984 ranked 21st among the nation's leading advertisers with an estimated $335 million in spending on U.S. advertising and promotion, compared with a restated $250.3 million in 1983, or an increase of 33.8%.

The Parsippany, N.J., company, which beefed up its ad and promotional spending worldwide by 30% to $478.5 million, plowed a major chunk of its domestic budget into Almost Home cookies, which is battling in the dynamic soft cookie market against such competitors as Frito-Lay, Keebler and Procter & Gamble.

The extraordinary marketing expenses had an impact on the company's 1984 earnings. Over-all earnings were $308.9 million, down 4.2%, on sales of $6.25 billion, up 4.5%. Nabisco Brands USA, the company's domestic operation, contributed sales of $3.95 billion, a 9.1% increase over the previous year, although operating income declined 5% to $451 million.

The segment of Nabisco's domestic business that attracted the most attention in 1984 was the biscuit division, home of cookie products, Oreo, Chips Ahoy! and Almost Home, as well as Ritz premium crackers.

Sales of $1.8 billion were recorded for that division in 1984, a 16.1% increase over the previous year. Operating income was $177 million, down 15.3%. The division received an aggregate $47.4 million of measured advertising, up 53.9% from 1983. Nabisco's cookies got $27.9 million of the division spending.

The Oreo chocolate sandwich cookie is the world's best-selling package cookie, but even Oreo could not do to the $4.2 billion cookie market what the introduction of the moist and chewy brands did when they were introduced in 1982.

Even though many of the line extensions were not in national distribution through all of 1984, the package cookie segment grew by 24% over-all, thanks to Procter & Gamble's Duncan Hines chocolate chip cookies, Frito-Lay's GrandMa's Rich 'n Chewy cookies, Keebler's Soft Batch and Nabisco's Almost Home. The volume increase was more than double the 9% increase registered by the total industry.

Nabisco entered the cookie wars in August, 1983, when it introduced its 15-item line to 10% of the country.

Called the "king of cookies" by analyst Stanley H. Fishman of Fahnestock & Co., Nabisco introduced its Almost Home line to protect its market-leading position. Not only did Nabisco maintain market share, but with the Almost Home line contributing annual sales approaching $250 million for the first year, the company's market share increased to almost 40%.

Nabisco's biscuit division in 1984 introduced into test a blueberry flavor addition to the Newton cookie line, which also includes apple and fig. The Chips Ahoy! line also was extended, and through a licensing agreement with Popsicle Industries, Oreo Cookies 'n Cream ice cream made its debut.

DETAILS
MAGAZINE

Nabisco's Ritz crackers, supported by $4.7 million of measured advertising, completed 50 years on store shelves and maintained market leadership with a volume gain of 3%. A new snack cracker, Herbs & Spice Twigs, was introduced early in the year, and low-salt varieties of Triscuit Wafers and Wheat Thins made their debuts during the year. The introductions received nearly $3 million in measured advertising.

The snack cracker lines were given a heavy boost in the early stages of 1985. Advertising and trade support for Wheat Thins, Better Cheddars, Great Crisps! and Triscuits focused on health and nutrition plus convenience, and included network tv and free-standing inserts in Sunday newspapers.

Nabisco extended its Mr. Salty snack food line, adding seven new products for a total of 10. Mr. Salty is the country's top-selling pretzel. The new products were introduced with a campaign that included newspaper inserts and was supported by an additional $7[illegible]0,000 of measured advertising.

Nabisco's confectionery and snack products segments had sales of $1.11 billion in 1984, up 5.4%, and operating income of $134 million, up 5.5%. Both represented gains over the previous year. Life Savers and Breath Savers sugarless candy, both market leaders gained in market share—Life Savers to 87% of the hard-rolled candy market. In the mint-flavored market, Life Savers took 13% of market and Breath Savers 12%, a combined total close to market leader Warner-Lambert's Certs at 29%. The products were backed by heavy media advertising, $7.8 million for Life Savers and $4.5 million for Breath Savers, all in tv and radio.

In bubble gum categories, Nabisco's Bubble Yum and Care*Free's sugarless bubble gum, are the market leaders. Bubble Yum was supported by $4.3 million of measured media advertising. Care*Free's advertising support totaled $7.4 million.

Nearly $2.5 million in measured advertising support helped introduce Bonkers! chewy fruit candy last year in the fastest-growing industry category. A strong "Guaranteed Fresh" advertising campaign for Butterfinger and Baby Ruth candy bars led to significant sales increases for the brands during 1984. The $5.1 million campaign in measured media was coupled with merchandising help from the Life Savers sales force.

In the meantime, Planters Nuts maintained its position as the top-selling nut brand, even though the brand did experience a volume decline. More than $18 million in measured advertising backed the various Planters products in 1984, and indications are that 1985 will see product innovations and new introductions in an effort to stimulate sales. A new product, Planters Sweet-N-Crunchy peanuts, was available throughout the country in February, 1985.

Charleston Chew candy bar, Eat More candy bar, Glosettes candy, Junior Mints candy, Sugar Babies candy and Sugar Daddys together together got less than $500,000 in spending.

Nabisco's third domestic segment, the grocery products division, contributed sales of $1.04 billion, up 2.1%, with earnings of $140 million, up only 0.7%. The segment includes Nabisco cereals, cold and hot, pet foods and Fleischmann's margarine and yeast.

Shredded Wheat is Nabisco's best-known and best-selling entry in the cold cereal category, and it receives a sizable chunk of the company's advertising dollars. In 1984, that amount grew to $6 million, up substantially from $1.8 million the previous year. The line also includes Spoon Size Shredded Wheat and Toasted Wheat & Raisins, a recent addition and an answer to consumer demand for fruit.

Nabisco teamed up with GTE Sprint for a promotional campaign, which had as its central theme "Phone home for the holidays." Ten million specially marked boxes of Shredded Wheat in 30,000 grocery stores around the country carried the offer of a $5 credit on long-distance calls, redeemed with two proofs of purchase.

In the hot cereal category, which is experiencing resurgence as a result of the popularity of instant cereals, Nabisco's Mix & Eat Cream of Wheat and regular Cream of Rice gained close to a 20% share of the market. Measured advertising support for the brands exceeded $1.1 million.

Advertising expenditures for Nabisco's pet snacks were down last year, although Milk-Bone brand dog biscuits remained the market leader in that category. Measured ad spending included $1.25 million for Milk-Bone Butcher Bones biscuits and $3.6 million for Milk-Bone dog biscuits.

Nabisco's efforts to stimulate the use of its home-baked products consisted of the introduction, in 1983, of Home Hearth yeast bread mix that requires no kneading or second rising and, in 1984, the debut of Fleischmann's RapidRise yeast, advertised as cutting rising time in half.

In the $50 million yeast market, Fleischmann's is the clear leader, and its recent moves are a clear indication it intends to stay there and build the market.

RapidRise got more than $10 million in introductory spending, much of which went into couponing. Fleischmann's Light margarine was supported by $2.9 million in measured advertising.

It appears that Nabisco will give cable tv a greater role in its ad media mix given the company's September, 1984, purchase of 20% of Entertainment & Sports Programming Network for $60 million from ABC. ABC had bought it earlier in the year from Texaco. In the deal, the principals of Ohlmeyer Communications, which Nabisco co-owns with principals Don Ohlmeyer, chairman, and Dean Heitler, president, will consult and advise ESPN in marketing and programing. Messrs. Martin and Ohlmeyer also will serve on the ESPN board. Mr. Ohlmeyer was a former executive producer at NBC Sports. ESPN has clinched a three-year, $70 million deal with the United States Football League to broadcast its games.

Nabisco spending of $1.7 million on network cable tv in 1984 more than tripled its spending on that medium in 1983.

In management changes, John Greeniaus was named president of the biscuit division. He had headed the company's London operations. Larry Kleinberg became president of the combined Planters/Life Savers division. He was former president of Life Savers.

RANK 39

Nestle Enterprises

White Plains, N.Y.

($ figures = 000,000)

Worldwide	1984	1983	% chg
Sales	5,100	2,508	103.3
Net income	N/A	N/A	N/A
Advertising	-187	169	10.4

Nestle Enterprises, the Vevey, Switzerland-based food giant which increased its presence in the U.S. market in 1984 by acquiring Carnation Co. and Hills Bros., spent $186.9 million in estimated U.S. advertising, up 10.4% from 1983, ranking it as the 39th largest national advertiser.

The privately held company, whose U.S. operations are based in White Plains, N.Y., generated less than one-fourth of its worldwide sales from the U.S. operations prior to the Carnation acquisition, but now Nestle is thought to obtain one-third of its sales from the U.S. operations.

Prior to its acquisition spree, Nestle had sales of an estimated $10 billion in 1983, up slightly over the prior year. Carnation will add another $3.37 billion (1983 figure) to that $2.2 billion of which was domestic. Together, Nestle and Carnation would generate an estimated $5.1 billion in U.S. sales. Carnation's brands added to those of Nestle have created a powerful advertising force, one whose measured spending in 1984 was estimated at $148.3 million, up 54.5% over 1983 (includes Carnation).

Carnation in 1983 had total ad spending of an estimated $54.3 million, which included a measured media total of $39.3 million.

The Carnation acquisition brings to the Nestle product mix several pet food lines.

In this area, Nestle will be plowing new ground, since it has had no presence in that market.

Significant advertising expenditures in this category in 1984 were for Bright Eyes canned cat food, $3.78 million, up from only $889,300 in 1983; Carnation Come 'N Get It dry dog food, $900,000, down from $3 million; Fancy Feast canned cat food, $4.4 million, up from $3.9 million; Friskies Canned Buffet cat food, $3.2 million, down from $4.2 million; Friskies dry cat food, $7.16 million, up from $3.1 million; and Mighty Dog canned dog food, $4.2 million, up from $3.9 million.

The total almost matched ad spending for all of Carnation's pet food products the year before.

Acquiring Carnation made the biggest splash, but Nestle also bought Fruit Crest, a Florida-based juice company in 1984, and then in January, 1985, purchased Hills Bros., San Francisco.

In the meantime, the company also picked up Ward-Johnston Co., a Chicago candy marketer. Foremost among the Ward-Johnston candies are O Henry!, Chunky, Bit-O-Honey, Goobers and Raisinets.

Nestle threw its considerable advertising muscle behind its chocolate candy bar and Nestle's morsels in 1984. Total measured ad spending for the two was $21.1 million.

This was down fractionally from 1983 spending, according to six-media measurements in Leading National Advertisers.

As the Ward-Johnston line formed a nice fit with Nestle's other candies, so did the Hills Bros. acquisition fit nicely with Nestle's coffee lines. Nestle S.A. managing director Helmut Maucher, in an interview with Advertising Age, described it as an important first step in establishing Nestle in the domestic roast and ground coffee market.

Before the Hills Bros. acquisition, Nestle's coffee presence in this country was in the instant coffee market, with Nescafe, Taster's Choice and Sunrise. Nestle had 25.8% of the soluble coffee market. Hills Bros. has a 7.4% share of the ground coffee market.

Building its coffee presence further, Nestle in May, 1985, acquired MJB Co., a San Francisco-based coffee, tea and rice producer. Add the Hills Bros.' purchase in September, 1984, of Miami-based Chase & Sanborn—popular in the Northeast and Southeast—and Nestle has gained U.S.-wide coverage.

Such moves underscored the Nestle philosophy of growth through acquisition. And in this case, Nestle had reason to move aggressively into the ground roast market inasmuch as the instant market has remained relatively flat.

With level sales of instant brands in 1984, Nestle remained No. 2 behind General Foods, even though the leader's market share declined three-tenths to 44%.

On the other hand, ground coffee consumption is on the increase. Nestle faces an uphill climb, because General Foods and Procter & Gamble between them hold more than 60% of the U.S. coffee business.

Merely establishing a presence in the ground roast market will not necessarily guarantee increasing market shares for Nestle and Hills Bros. A new entry in the premium coffee market was Gold Blend, which Hills Bros. began testing in the fall, 1984, in Green Bay, Wis.

And while Nestle invaded the ground roast market with Hills Bros. and other coffees, the company also took steps to pump new life into Nescafe, Taster's Choice and Sunrise, its instant brands.

The company spent heavily—some estimates placed the spending at an annual rate of $30 million—to introduce Nescafe Custom Blended coffees, a line of four instants with differing flavors.

Still another Nestle brand, Taster's Choice, attempted a repositioning by scrapping its "Times like these are made for Taster's Choice" theme and emphasizing flavor with "The choice for taste is Taster's Choice." More than $11.5 million in measured media was used to promote Taster's Choice, and some estimates placed total spending for the brand at $20 million.

Nestle's total measured spending for Nescafe, Nescafe Decaffeinated, Sunrise and Taster's Choice amounted to $15.1 million. That figure pales in comparison to the $67.5 million General Foods spent in measured media on Maxwell House, Sanka, Yuban and Brim in 1984, and the $49.5 million that Procter & Gamble spent on its Folger's and High Point brands. In 1984, Folger's led the regular coffee market with a 24.9% share, Maxwell House was No. 2 with a 19 share, Maxwell House Master Blend was No. 3 with a 7.5 share, and Hills Bros. was fourth with its 7.4 share.

To perk up sales for its Nestle's Quik powdered chocolate drink mix, Nestle went the repackaging route in 1984. The effort, which followed research showing most people favored cold milk for their chocolate drink, featured cold milk prominently on the package along with increased visibility of the Nestle name.

Nestle's Quik was supported by $6.1 million in measured advertising, up 5.2% from 1983.

Selling Areas-Marketing Inc. (SAMI) shows total sales of $1.8 billion in the frozen single-serving category. Lean Cuisine, a recent Stouffer entry in that category and aimed at that growing segment of the diet and nutrition conscious American public, is said to be heading toward $500 million in annual sales.

Measured spending for Lean Cuisine increased 35.8% over 1983 to more than $11 million, the most for any of Stouffer's frozen food entries. Stouffer's frozen pizza was backed by $4.2 million of advertising, up 5%, while Stouffer's other frozen entrees received $8.9 million of media support, including $2.6 million for Stouffer's frozen side dishes.

Nestle's candy distribution has found new life. The unit had almost totally ignored impulse buying at movie theater counters. In 1984, with substantially more distribution outlets and a greater checkout counter presence, Nestle's candy bar sales increased 70%.

Another dramatic product change has occurred with Nestle's Beech-Nut baby foods. Responding to the Stouffer influence, Beech-Nut's reformulated line now features name-brand ingredients (such as Chiquita bananas) and uses no preservatives. Beech-Nut was promoted as a "natural" alternative, and backed by $3.4 million in measured spending.

Nissan Motor Corp. in U.S.A.

RANK 47

Carson, Cal.

($ figures — 000,000)

Worldwide	1984	1983	% chg
Sales	15,447	14,237	8.5
Net income	315	426	-26.1
U.S. advertising	164	124	32.5

Nissan Motor Corp. U.S.A., Carson, Cal., a subsidiary of Nissan Motor Co. Ltd., Toyko, was the 47th largest national advertiser in 1984, with an estimated expenditure of $164.2 million, up 32.5% from 1983.

In the 1984 fiscal year, ended March 31, 1984, the parent Nissan Motor Co. Ltd. reported earnings of $315 million, down 26.1% from 1983, on sales of $15.45 billion, up 8.5%. Sales and earnings for both 1984 and 1983 fiscal years were converted from yen to dollars at the rate of Y224 = U.S.$1.

Fiscal 1984 also saw worldwide sales of the Japanese marketer of Nissan cars and trucks of 2,499,368 units, up 1.5% from the previous year, but down from highs of 1981-82.

Nissan's sales of cars and trucks in the U.S. rose to an all-time high of 689,022 units, up 4.5% from the 659,257 units sold in 1983.

Limited by availability under the Voluntary Restraint Agreement, 1984 car sales slipped to 485,298, down from 521,902 sold a year earlier. Nissan sees market conditions improving in 1985 in the U.S., followed by growth in other markets.

In an effort to overcome VRA restrictions on the importation of cars (Nissan's share in 1985 is 547,920, compared with 1984's 551,800), Nissan boosted its truck promotions and this spring began building the popular Sentra subcompact at its truck plant in Smyrna, Tenn., becoming the third Japanese auto maker to build cars in the U.S.

Honda and Toyota also build cars in the U.S. and Mazda recently broke ground for a new plant.

Initial production at Smyrna will total about 10,000 trucks and 5,000 cars a month. The first U.S.-built Sentra rolled off the Smyrna assembly line on March 26, 1985. Car and truck output will be 240,000 per year by the spring of 1987.

The company's share of the over-all U.S. market dropped to 4.5%, down from 5.5% in 1983. It trailed Toyota at 5.4% and Honda at 4.9%, but remained ahead of Mazda at 2.3% and Volkswagen at 1.7%. Nissan's share of the import market stood at 20%, down from 22% in 1983 and behind the leading Toyota at 23%.

The best-selling Sentra, priced at $5,499 for the standard five-speed, two-door sedan, accounted for U.S. sales of 189,480 units, down 10.8% from 209,861 units in 1983, but still the No. 1 selling import model in the U.S. The Sentra was also the highest volume production car in the world.

Sales of other Nissan models in 1984, compared with the previous year, were Pulsar, 37,287 (62,183); Stanza, 44,619 (64,429); Maxima, 68,209 (76,209); 200SX, 63,465 (31,158), and 300ZX, 73,907 (71,144). The Maxima, priced at $13,499 for the five-speed, four-door sedan, was the leader in its upper-middle price market segment, positioned against Toyota Cressida, Audi, Volvo, BMW 318i, Peugeot and Saab.

The upscale cars in the Nissan lineup accounted for a major portion of the measured ad spending in 1984, with a total of $15.5 million recorded for the 300ZX, up 115% from 1983, and $12.2 million for the 200SX model, up from $1.9 million in 1983, according to Leading National Advertisers, which tracks six media spending. Tv, both spot and network ($22.9 million), and magazines ($4.5 million) provided the main thrust of the promotional effort behind these models. Nissan spent only $1.9 million on the 200 SX and $7.2 million on the 300 ZX in 1983.

Measured media ad expenditures for the top-selling Sentra dropped to $8 million, from $14.6 million in 1983. The Maxima drew $7.3 million in measured spending, up from $1.2 million the prior year.

General promotion as a category drew $7.4 million, up from $2.6 million in measured spending in 1983, and Nissan passenger cars, apart from specific promotional budgets, spent $4.9 million vs. $288,500 in 1983.

In addition to the total ad expenditure of $129.3 million in measured media, Nissan Motor Co. local dealers and franchises spent $12 million. In unmeasured media estimated at $35 million, spending was for a wide spectrum of promotional activities: Dealer promotions, auto racing program, trade shows, point-of-sale materials, merchandising aids and collateral materials and expenses related to the re-signing and re-identification program for the company, formerly known as Datsun.

It also encompasses such marketing activities as a telemarketing/direct mail program that was tested in connection with fleet sales.

During the year, Nissan set a new sales record in the U.S. for compact trucks at 203,724 units, up 48.3% over 1983. The number of trucks sold was 29.8% of all Nissan units sold in the U.S. in 1984, up from 26.3% the previous year. Truck production at the company's assembly plant in Smyrna accounted for 47% of all Nissan trucks sold in the U.S.

Truck sales got the benefit of both a steady source of supply from its domestic production facilities in the U.S. and a special 8.8% financing, which was heavily promoted in both national and local advertising at the dealer level.

Nissan compact trucks drew $36.9 million ($20 million in spot tv and $13.8 million from network tv); King Cab compact trucks got $6.1 million, up from $1.2 million in 1983, and the S/T compact truck received $4.2 million, up from $1.6 million in 1983.

The spending trend in measured media for virtually all Nissan/Datsun lines in 1985 was network tv, 39%; spot tv, 32%; magazines, 11%; newspapers, 10%, and lesser amounts in the remaining measured media.

The first half of the 1985 model year at Nissan saw a continuation of the creative umbrella, "Come alive, come and drive, major motion from Nissan," with sustaining support behind most of the product lines.

The effort, split almost evenly between cars and trucks, had the support of the biggest advertising budget in Nissan history.

Introduction of the all-new 1985 Maxima, the $14,399 luxury sedan model, took place at a dealer announcement show in late 1984 at the Shrine Auditorium in Los Angeles, officially completing the transition of all products from the Datsun name to the Nissan badge.

Nissan began dropping the Datsun name from its cars and trucks in 1981 with the introduction of the 1982 model Nissan Stanza and now has completed the change with the 1985 Maxima. Rather than change names of the vehicles and dealerships overnight, Nissan chose to stretch the process over several years to establish the Nissan name in the minds of car and truck buyers. The replacement of Datsun identification with the 6,000 new blue

Hollywood weather without Hollywood overhead.

and white Nissan signs at 1,100 U.S dealerships began in the Dallas market. It's expected to be completed by next summer.

Major cost of the sign conversion is being borne by Nissan, with the support of a new ad campaign and creative focus, "The name is Nissan," which became the official theme in May, 1985. Creative executions of the old "Major Motion" theme were adapted and updated with "The Name is Nissan" slogan. The campaign began in mid-May on tv and radio and in June in national and local print and out-of-home ads.

Start of "The Name is Nissan" promotion coincided with the midyear introduction of new 1986 truck models, the first to employ the new slogan. Once again the campaign focused on Nissan's commitment to quality and technologically advanced products.

Making use of network and spot tv, heavily weighted with sports programming and magazines, the commercial message positioned Nissan trucks as a full line of quality-built compact vehicles featuring toughness, durability, power and economy in terms of purchase price and operation.

Print ads focused on features, and tv spots established the tough truck value-oriented positioning and emphasized the change in corporate name to Nissan. One midyear introduction in print ads featured the new 1986 Stanza wagon, "the first and only wagon with dual sliding doors" with the headline "Nissan Innovation Strikes Again."

In support of the 1985 car line, the media mix of tv, radio, newspapers and magazines followed patterns established a year earlier, but with greater support in local markets. Network tv exposure with the Olympic Games campaign found Nissan the dominant advertiser with 121 major network spots. The year included continued sponsorship of "Monday Night Football" on ABC-TV, the seventh consecutive year. Nissan also bought five 30-second spots on the NFL's Super Bowl, the first such buy by Nissan.

Passenger car advertising led off with strong support for the Maxima in the fall (the world class sedan that doesn't cost the world), followed mainly by car line advertising through the winter and spring, promotion of trucks and the first 1986 wagon models at midyear, and wound up with strong support of 300ZX sports car and Sentra at the end of the model year.

"The Name is Nissan" theme and umbrella now cover all the company's product offerings, and although critics had regarded the massive name conversion as "unsound marketing," the name "Datsun" seemed to be fading from memory.

Noxell Corp.

Baltimore

RANK 91

($ figures = 000,000)

Worldwide	1984	1983	% chg
Sales	350	304	14.9
Net income	28	23	22.0
Advertising	74	68	9.3

Noxell Corp., Baltimore, the 91st largest national advertiser, increased its U.S. advertising spending 9.3% in 1984 to an estimated $74.2 million, as net income improved 22% to $28.3 million on sales of $349.5 million, up 14.9%.

Domestic sales of cosmetics, toiletries and specialty foods increased in dollars and units for the year. As in previous years, Cover Girl brand products derived the greatest volume gains according to market analysts who note the brand continued to benefit from the surge in lower-priced cosmetics sales in supermarkets.

Cover Girl makeup, in its 23rd year on the market, had a 1984 ad spending increase of 30% to $11.9 million, according to six media Leading National Advertisers figures. Cover Girl makeup had the largest supermarket dollar share with 56.4% of the market in 1984, double the share of Cutex by Chesebrough-Pond's, its next leading competitor, according to Salomon Brothers analyst Diana Temple.

The special category of Cover Girl MoistureWear makeup got $5.5 million in advertising, down 31% from last year.

Cover Girl eye makeup was backed by $3 million in advertising, a 77% increase over last year. Cover Girl mascara received $9.8 million in advertising. Cover Girl mascara's 29% of the supermarket dollar share is second only to the leading Maybelline, according to Ms. Temple. Cover Girl also is second after Schering-Plough's Maybelline in eye shadow, with 23.8% of the dollar market share, but it surges into first place with its eyeliner, taking 35% of the dollar share. This growth was due in part to the introduction of Thick 'N Thin pencils, a color-coordinated pencil with a thin tip for lining and a thick tip for shading and contouring eyes.

Cover Girl lipstick achieved a 19.6% dollar share in supermarkets, second to leader Maybelline. The company spent $4.5 million in lipstick advertising in 1984, an increase of 64%.

Cover Girl spent $10.6 million advertising nail polish in 1984, up 79% from last year. Although supermarket shares declined one percentage point to 32.6%, Cover Girl led the market, far outpacing runnerup Cutex.

Cover Girl introduced the new Opulence nail color line in March, 1984, and strengthened its presence in the nailcare category with the June, 1984, introduction of Ten Terrific Nails, a line of nail treatment products.

Tv accounts for 69%, or $44.3 million, of total measured spending for the company, with Cover Girls Cheryl Tiegs, Christie Brinkley, Kelly Emberg and Jennifer O'Neill promoting "That Clean Make-Up Look." Company spending on tv declined slightly over last year, while magazine advertising increased by $9.3 million, or 14%.

Noxell's Noxzema slid to a 15.6% market share in the first quarter in the no-growth $450 million mass-outlet facial segment of the hand and body moisturizer market, continuing its steady descent from a 1979 peak of 28%. A new advertising campaign—"Are You Washing Your Face or Drying Your Face?"—will try to put the product back on the growth track. A more convenient package, Noxzema skin cream in a pump, was introduced to the trade in July, 1985, with national ad schedule slated for the autumn.

Richardson-Vick's Oil of Olay leads the highly competitive market with a 23% market share, but its sales have slipped, too. Revlon has made progress with its European Collagen Complex and has relaunched its Moon Drops line. American Cyanamid's Shulton USA division has been testing Equa-Balance, aimed at Oil of Olay, a more upscale mass brand. St. Ives brand, with heavy promotion, has taken 5.8% of the market.

Advertising expenditures for 1984 for Noxzema medicated skin cream amounted to $10.5 million, an increase of 34% over last year.

Strategically, Noxell has adapted its Cover Girl line to the "graying of America," continuing to use Cheryl Tiegs (now in her late 30s), while promoting its separate MoistureWear line for the over-30 age group. In light of continued benefits from expanding shelf space and consumers "trading down" to lower-priced cosmetics, says Salomon Brothers analyst Ms. Temple, the Cover Girl brand—61% of total sales in 1984—should grow by more than 20% this year.

Sales of RainTree hand and body lotion continued to decline, to 1.1% of net sales in the first quarter of 1985, down from 1.4% in 1984. The company did not advertise in 1984, but is planning to promote it in the spring of 1986 with a 16-oz. package for the price of the 10-oz. size in an effort to regain diminishing sales.

Noxell's acne treatment group achieved a 6.3% market share in 1984, down slightly from 7.1% in 1983. In mid-1984, Noxell completed restaging Noxzema antiseptic skin cleanser and Acne 12. This included the introduction of a new advertising campaign behind each item and new package graphics. Medicated cleansing pads also are being restaged, with the name change to Noxzema Clear-Ups. The product also will get new package graphics and a new ad campaign.

In January, 1984, Noxzema for Extra Sensitive Skin was added to the aerosol shave cream line. As a result, the supermarket dollar share rose to 12.2% in the first quarter of 1985 despite competitive new product introductions and advertising. A market analysis by Salomon Brothers finds the shaving creams fourth in the market.

In household products, Lestoil liquid cleaner sales remained even with 1983, contributing 4% of net sales. In January, 1984, Noxell assigned its $1.5 million Lestoil household cleaner advertising to William Esty Co., from Backer & Spielvogel, and a new tv campaign was introduced.

The Caliente Chili subsidiary increased sales with Wick Fowler's 2-Alarm Chili ingredients during 1984. The brand was supported with spot tv for the first time. Concentrated in a narrow market within the Southwest, the chili is being expanded into the broader Southwest market.

Other retail	1,079	1,045	3.3

J.C. Penney Co., the nation's third largest retailer, spent an estimated $460 million on advertising in the U.S. in 1984, a 22.3% jump from the year earlier ad total of a restated $376 million, as it continued to reposition itself as a fashion center.

The New York-based retailer, the 11th largest national advertiser, spent $465 million worldwide in 1984 vs. $381 million in 1983. The only major center of company activity outside the U.S. was in Belgium, where sales of $488 million were recorded in 1984, down 4.9% from 1983. The total ad figure includes major media, but not catalog preparation and distribution costs, according to the company.

The company had sales of $13.45 billion in 1984, an 11.4% increase over 1983. Earnings were $435 million, 6.9% below 1983's record figures, reflecting an intensely competitive retail environment fueled by accelerated markdowns and promotional activity.

Most sales were in Penney's so-called metropolitan stores, divided into department stores with sales of $9.18 billion, up 12.2% among comparative units from 1983, and soft line stores with sales of $1.02 billion, up 9.6% among comparative units. Metro store sales represented 85.6% of total store sales, with the remainder, $1.71 billion, coming from so-called nonmetro stores, up 8.3%.

Reflecting similar moves by competitors both in the department and specialty retail business, Penney moved to promote catalog sales more heavily. The company reported that 1984 catalog sales increased 5.6% among comparative units over the previous year, to $1.93 billion.

Penney is in the throes of an image change. Systemwide rehab has been completed. Apparel lines from design-

ers Halston, Lee Wright and Mary McFadden among others are attempting to replace the company's private-label image with a designer-tag one.

This new image is going to take some getting used to. Financially, so far it has not borne fruit. However, most retailers are battling a tightening market regardless of their image.

During the first half of fiscal 1985, Penney has continued to struggle. Sales have increased slightly to $5.82 billion from $5.81 billion, but net income has dropped 33% to $80 million from the corresponding period in 1984. Profits during the period were affected by markdowns in summer and spring merchandise and higher spending for promotions.

Commenting on Penney's drop in net income, some market observers consider the retailer as being hampered by dislocation. Walter Loeb, a senior retail analyst with Morgan Stanley, says the movement toward fashion has "blurred the company's identity... Penney's has not captured the customer as [a store] being on the leading edge of fashion. Even though Penney's move into the fashion world is bold and many of its fashion presentations are innovative, the customer has not gotten the message."

Penney, nevertheless, continues a costly modernization program geared to fashion. About 30% of the stores contributing to 1984 department store sales have been updated. The updating program, now completed, involved rehabbing 150 stores during 1983 and an additional 200 units in 1984. The new face has basically involved space reallocation to accommodate the new merchandise mix and a more contemporary look conveyed through minor refixturing and carpeting. Expenditures have run an average $4 million per store.

Sales of both women's and junior lines increased about 17%, and national brands in these categories rose more than 26% in 1984, results the company attributes to a customer vote for fashion.

The company has characterized its key customer as "the contemporary, fashion-conscious consumer who expects timeliness and fashionability in merchandise as well as quality and value."

Both the Wyndham line for the contemporary career woman, supplied by Ship 'N Shore, and the Lee Wright Collection of men's wear have produced good results during their first year with the retailer in 1984, the company says. A line of updated junior sportswear for women by Lee Wright was introduced this spring. Additional designer wear scheduled to be introduced at undisclosed dates includes a Mary McFadden collection of sportswear and dresses for career women and a men's sweater and shirt line by Alan Flusser to be developed into a coordinated sportswear collection.

In step with the popularity of both classic and trendy British fashions, the company is planning a three-week "Best of Britain" promotion Oct. 16 to Nov. 9 that will feature merchandise from the U.K. A national marketing program of about $9 million will support the promotion.

Highlights of both national and local advertising campaigns designed to reach two-thirds of all metropolitan households include an insert about the British event to be sent to 20 million J.C. Penney credit card customers; network tv advertising as well as local radio and tv advertising; full-page ads in newspapers, and a color circular to be distributed as a supplement to newspapers throughout the country.

In 1984, a large portion of the unmeasured advertising totaling $305.7 million, up 27.8% from the previous year, was directed at the catalogs, although not their production or distribution. In measured media spending in 1984, Penney's invested $69.3 million, down 1.5%, according to Leading National Advertisers.

Among individual media, the mass merchandiser increased network tv expenditure 6.6% to $34 million. Spending in magazines dropped 14.7% to $16.9 million, and spot tv dropped 8.3% to $16.6 million.

Penney spent $22.9 million on joint promotion of men's and women's apparel, up from $11.9 million in 1983, while advertising allocations for men's and women's sportswear dropped to a combined total of $3.2 million from $10 million last year, reflecting the retailer's move to incorporate designer lines.

The retailer had 564 metropolitan stores in 1984, after opening 14 and closing two. There were 801 stores in nonmetropolitan areas operating at yearend, after 30 were opened and 52 closed.

Penney's catalog centers numbered 1,815 at yearend, up from 1,805 the year before. The company's drugstores, operating under the name Thrift Drug or Treasury Drug Center, opened 16 stores and closed six, for a 1984 total of 369. Drug units recorded total sales of $591 million, up 11% for all units and 9.9% for comparative units. The drug units spent $3.9 million, the same as in 1983, in advertising, virtually all in spot tv for both years.

In 1984, in the course of its image makeover, Penney's severed its 14-year relationship with McCaffrey & McCall and took its $50 million-plus national advertising account to N W Ayer.

Have your promotional marketing plans been properly diagnosed?

Often, even the most carefully planned marketing program requires a promotion specialist. One who can examine your promotional plan and help it achieve its sales, trade and consumer objectives.

At Marden-Kane, we specialize in helping solve the problems of marketers by analyzing their sales goals...jointly working with marketer and ad agency to create the right promotional program...and then implementing a program that's as trouble-free as it is impactful.

For over 27 years, we've been serving the promotional needs of corporate America with innovative programs that are anything but "off the shelf". Whether it's a contest or sweepstakes, self-liquidator or incentive program, rub-off game or any other promotional vehicle, we carefully design it to address your specific objectives—and then deliver the desired response. From creation to implementation to administration to fulfillment, you'll find that a Marden-Kane promotion is as professionally orchestrated as the most demanding medical procedure. And while some "sales promotion" companies try to be general practitioners, our training enables us to specialize in only one thing—the promotion that brings you more consumers, more sales, and more healthy sales graphs than you've ever enjoyed before.

Have your promotional needs looked over by a specialist—call Marden-Kane for a consultation today. We even make house calls.

MARDEN-KANE

Advertising's Promotion Partner for over 27 Years

410 Lakeville Road, Lake Success, NY 11042. (516) 326-3666.
Also in New York, Boston, Chicago, Houston, Los Angeles,
San Francisco and Canada.

PepsiCo Inc., which reorganized in 1984 to concentrate on its strengths—beverages, food products and foodservice—was the 15th largest national advertiser in 1984 with estimated spending of $428.2 million, up 20% from 1983.

The Purchase, N.Y., company, parent of Frito-Lay, Pizza Hut, Taco Bell and Pepsi-Cola soft-drink empire, continued to cut into the market leadership of Coca-Cola. It sharpened up for further battle by divesting a money-losing subsidiary and preparing plans to sell two others. PepsiCo also lost its president to Harvard University Graduate School of Business Administration, a move that triggered a wholesale change in the executive ranks.

PepsiCo reported sales for the year of $7.7 billion, up 7.4% from the previous year, and net income of $212.6 million, down 25%—a decline that included a $15 million after-tax loss on the sale of Lee Way Motor Freight.

The sale of subsidiaries Wilson Sporting Goods and North American Van Lines in the first half of 1985 have shored up the bottom line. In the second quarter of the current fiscal year, the company reported earnings of $256.3 million compared with a year-earlier loss of $42.5 million, the 1985 period including a gain of $129.7 million, the difference between the sale of North American Van Lines and a loss from the sale of Wilson Sporting Goods. Sales increased 5.8% to $3.56 billion.

Beverages continued to be PepsiCo's major segment with $2.9 billion in worldwide sales in 1984, a decline of 1.1% that excluded results from foreign bottling operations, which were omitted when the company refranchised the operation. Beverages captured 37.8% of total sales.

PepsiCo's domestic soft drink entries under the Pepsi-Cola USA banner—Pepsi, Diet Pepsi, Diet Pepsi Free, Pepsi Light, Mountain Dew and the new Slice lemon-lime flavor—recorded a growth rate of 8% in 1984, according to the company. All Pepsi brands grabbed a 25.6% share of market (case sales) in 1984, up from 25.3% in 1983. Coca-Cola's soft drink brands had a market share of 36.4%, up from 35.3%, according to *Beverage Industry*.

The company's main brand, Pepsi, had a market share of 17%, up from 16.9% on the basis of a 6.8% increase in case sales in a total market that expanded at a 6.1% clip in 1984. This compares with Coke's 21.8% share of market, down from a 22.5% share despite an increase in case sales of 3.1%, according to the *Beverage Industry*.

Reformulated Diet Pepsi had a 2.9% share of market, up from 2.4%. Diet Coke, however, rose to 5.1% from 3.2%. Mountain Dew maintained its market share of 2.7% vs. Coca-Cola's Sprite's 3.3%, up from 2.8%. Sugar Free Pepsi Free was 1% for both years. Diet Coke Caffeine Free had a market share of 0.9% compared with 0.5% in 1983. Pepsi also had a boost in fountain syrup sales, helped by Burger King's late-1983 decision to convert to Pepsi-Cola products in its 3,200 restaurants nationwide.

The logo, "Pepsi. The Choice of a New Generation," was introduced in March, 1984, in commercials by popular singing star Michael Jackson. At no small cost, and perhaps with an assist from rival Coca-Cola's decision to reformulate and then bring back Coke Classic, it seems to be working.

By midyear, Pepsi's ads had climbed to the top of the charts in ADVERTISING AGE's monthly survey of unaided recall. More than one-third of the respondents queried by the SRI Research Center in Lincoln, Neb., identified Pepsi when they first heard the spots.

The upfront cost for Pepsi to strike a deal with Michael and the rest of the Jacksons was an estimated $7.5 million—$5.5 million for the Victory Tour and another $2 million to produce the spots. Pepsi spent another $40 million for the advertising time and space.

Measured media expenditures for the Pepsi brand, including Diet Pepsi and Pepsi Light, totaled $86.9 million, according to six media figures from Leading National Advertisers. Coca-Cola on the other hand spent $121 million on its Coke brand products (including the diet and Tab products). This does not include the expenditures for Mountain Dew ($7.8 million) or the introduction of Slice ($1.8 million). Of the $86.9 million targeted Pepsi brand, more than 95% was committed to network or spot tv.

Lionel Ritchie followed Michael Jackson in the Pepsi Generation spotlight, and San Francisco 49ers' quarterback Joe Montana joined the huddle, following his stellar performance in the January, 1985, Super Bowl XIX, to do three spots. Mr. Montana, paid $400,000 in a two-year contract for the spots, appeared in the first spot with his friendly adversary in that Super Bowl matchup, Dan Marino, quarterback of the Miami Dolphins.

One of the challenges for Pepsi-Cola USA in 1984 was to narrow the gap between diet Coke and Diet Pepsi, Diet Pepsi Free and Pepsi Light. Diet soft drinks are about 20% of the $25 billion soft-drink industry. But estimates put the share for diet soft drinks as high as 50% by 1990. Diet Pepsi is riding the fame of New York Met pitching ace Dwight Gooden, who has joined Jim "Catfish" Hunter in a 30-second spot.

In November, Pepsi-Cola USA announced it was switching to a 100% NutraSweet formula for all of its diet cola products. At the time, Roger A. Enrico, president of Pepsi-Cola USA, compared the move to the Michael Jackson commitment, maintaining that the investment in Jackson had been returned in five short weeks and a similar return was likely on the switch to the NutraSweet formula.

It did not take long for the rest of the industry to follow Pepsi's lead, and the company seems entirely satisfied with the results. Similarly, the introduction of Slice into the lemon-lime market has been successful. With 10% real fruit juice, Slice is already in 70% of the country and standing second in the category, behind Philip Morris' 7UP but ahead of Coca-Cola's Sprite.

Among the nonmedia buys that boosted Pepsi's 1984 advertising expenditures was its $72,000 partial sponsorship of Educational News Service's package of sound filmstrips about the 1984 political campaign. "Campaign '84: The Primaries" was distributed to 16,000 high schools nationwide along with Pepsi's Michael Jackson commercials.

On the international front, there were two significant developments involving advertising for Pepsi-Cola. In April, 1985, new Pepsi spots were introduced in 30 foreign markets. The spots debuted in Spain and with minimal changes were scheduled to run later throughout the world.

Taking a page out of the Michael Jackson book, Pepsi International signed the Puerto Rican rock group Menudo to make a series of commercials for the market in Mexico, where Pepsi has been running a distant second to Coca-Cola in market share. Elsewhere in Latin America, Pepsi is continuing to issue the Pepsi Challenge taste test in an effort to bolster market share.

PepsiCo's food products segment includes Frito-Lay, a Dallas-based, snack-food concern, and PepsiCo Foods International, which operates in 10 foreign markets. The segment in 1984 recorded sales of $2.7 billion, up 11.2% from the previous year, and operating profits of $393.9 million, up 13%. The segment accounted for 35% of total sales and 49% of operating profits.

Frito-Lay's $25 million campaign to introduce O'Grady's brand extra-thick potato chips was launched in February on the network tv premiere of the movie "Arthur." Hailed as the largest new-product launch in the company's history, the 40-week effort enabled O'Grady's to quickly surpass the $100 million mark in annual sales. O'Grady's became the seventh Frito-Lay "core" brand to top that annual sales figure.

The year also saw Frito-Lay reformulate the nacho-cheese flavor in its Doritos brand tortilla chips, the nation's largest-selling snack food. Industry estimates place 1984 sales of Doritos at $513.6 million, a sizable share of the snack food market. Future growth projections for the brand are in the 7% annual range.

A new 60-second musical and special effects extravaganza, first aired on ABC's telecast of "Star Trek II: The Wrath of Khan," ballyhooed the addition of one-third more nacho cheese to the Doritos chip. Ad spending for Doritos in 1984 exceeded $18 million, according to Earl Shirley, Frito-Lay marketing director. More than $13 million of that was spent on the tv schedule.

Frito-Lay continued to heavily promote its products in the soft and chewy cookies war, backing the introduction of GrandMa's brand Rich 'n Chewy. Measured advertising support for GrandMa's topped $5 million, a marked increase over the $3.8 million of the previous year.

Over-all, Frito-Lay products received $57.5 million in measured advertising support in 1984. This compares with $41 million expenditure in 1983 and does not include expenditures in the cookie category.

In late summer, Frito-Lay gave the pink slip to Young & Rubicam, its agency of 23 years, pulling $15 million in billings divided among Ruffles potato chips, Rold Gold pretzels and Chee-Tos cheese puffs from the New York agency. Needham Harper Worldwide, Chicago, was assigned the business in mid-September.

Change, controversy and continued growth marked the foodservice division in 1984, which had sales of $1.8 billion, up 19.9%, and operating profits of $175.2 million. The segment's sales accounted for 24% of the company total and operating profits, 22%.

In May, 1984, Pizza Hut named Chiat/Day, Los Angeles, to replace Foote, Cone & Belding, its agency of long-standing. The controversy surfaced during the agency review process when it was learned that a number of former Pizza Hut executives had joined rival Godfather's Pizza, also in agency review. Chiat/Day withdrew from an agency review by Godfather's and subsequently won the Pizza Hut business, amid conflict of interest charges.

Despite the controversy, Chiat/Day and Pizza Hut launched the first systemwide promotional campaign and a series of well-received tv commercials featuring "Pizza Hut people." The promotion, geared to children, offered coloring/sticker books featuring Care Bear characters. Spending for the four-week promotion, including network and regional tv, was estimated at more than $10 million.

Late in the year, Pizza Hut began to test a pizza-related product called Priazzo. A product with top and bottom crusts filled with pizza toppings, Priazzo was priced comparably with a large pizza and designed to feed several customers. Priazzo was rolled out nationally in 1985. Like the introduction of Personal Pan pizza aimed at singles and other recent new products, Priazzo is part of an over-all strategy to expand the chain's customer base.

Measured ad spending for Pizza Hut increased 19% in 1984 to $58.4 million. This was divided among spot tv ($40 million), network tv ($18.2 million), and minor outdoor and magazine contributions.

PepsiCo's other foodservice chain, Taco Bell, is the leader among the Mexican fast-food restaurants. Taco Bell is in the top 10 among all fast-food chains. Fast-food sales nationwide totaled $40.3 billion in 1984, up 9%. Of that, Mexican fast food accounted for $1.61 billion, a 25% increase from 1983. Taco Bell's increase exceeded that as sales reached $918 million by year end, up from $600 million in 1983. The growth was spurred by an expansion program that added 170 new restaurants to the chain, bringing the total to 925 company-owned and 908 franchised, and by new products, Taco Salad and Nachos BellGrande.

Taco Bell is in the process of a face lift to reposition the chain in the mainstream of the fast-food chains. A redesign of the corporate logo and of the restaurant exteriors begun in Denver in 1984 and is to be completed nationwide within three years. Accompanying the repositioning was a significant increase in the advertising budget. Whereas measured expenditures in 1983 totaled $18.7 million, the 1984 total was $28.7 million.

In October, PepsiCo president-coo since 1971, Andrall E. Pearson, announced he had accepted an offer to join the faculty at Harvard Business School, effective Jan. 1, 1985. Mr. Pearson's retirement set in motion a chain of events that will culminate with the retirement in May, 1986, of Donald M. Kendall as PepsiCo's chairman-ceo. D. Wayne Calloway has been elevated from exec vp-chief financial officer to replace Mr. Pearson, and he in turn will be succeeded by Michael H. Jordan, president-ceo at Frito-Lay.

Willard Korn, who had been president of Wilson Sporting Goods, replaced Mr. Jordan at Frito-Lay, and W. Leo Kiely was named to the new post of senior vp-sales and marketing.

A major restructuring of the company throughout 1984 and continuing into the midpoint of 1985 has enabled PepsiCo to focus on the businesses that historically have produced the best results. The restructuring was accomplished in three steps.

First, a number of company-owned international bottling operations were refranchised and placed in the hands of local businessmen. The hoped-for result when the program is completed this year is a stronger international franchise bottler network. PepsiCo is taking immediate aim on increasing its soft drink market share in Latin America.

Second, the company withdrew from the transportation business by selling its North American Van Lines and Lee Way Motor Freight subsidiaries.

Finally, the company in May sold its Wilson Sporting Goods division. The division has sales of $247.6 million in 1984, up 6.8% from the prior year, and an operating loss of $16.7 million compared with an operating loss of $11.2 million in 1983. The division, acquired in 1970, has failed to turn a profit since 1982. It was sold to Wesray Sporting, a division of Wesray Capital Corp., a New York-based investment banking company. The sales price was not disclosed, although estimates suggested a range of $150 million to $200 million.

Generics mainstream

Generic drugs now command 20% of the U.S market, and many industry specialists think the generics' share of the market will continue to rise over the next few years, according to *Business Week* (Jan. 11, 1985). The driving force: Washington's prospective payment plan for reimbursing the medical bills of medicare patients, which will continue to force hospitals and nursing homes to restrict their drug purchases.

Pfizer Inc., New York, whose products include Coty, Pacquin, Visine, Barbasol and Ben-Gay, ranked as the 83rd largest national advertiser with an estimated $86.4 million in total ad expenditures in 1984, up 19.8% from 1983.

Pfizer, which spends virtually all of its measured advertising on its consumer division, was monitored allocating $58 million in nine measured media, a 13.2% increase over the previous year. Worldwide advertising, however, dropped from $166.5 million in 1983 to $161.6 million in 1984, according to the company.

Earnings at the largely pharmaceutical company rose to $508 million, up 13.6%, although sales increased only 2.8% to $3.85 billion. Financial returns held to the same pattern in the first two quarters of the current fiscal year as earnings rose 15% to $147.3 million on sales of $945.7 million, up 15%, in the first quarter over the corresponding period in 1984. In the second quarter, sales flattened out at less than a 1% gain as earnings rose 15.6% to $137.5 million over the year-earlier period.

Consumer products made up of two divisions, Leeming/Pacquin and Coty, accounts for 8% of Pfizer's business. Sales increased 9% to $319.8 million in 1984. A similar sales increase continued into the first quarter of 1985.

Pfizer's consumer product market leaders—Visine, Desitin, Barbasol and Unisom—helped to lead the segment to an all-time high in earnings. Visine eye drops and Ben-Gay analgesic ointment were the segment's best performers. Visine, available in two formulations, Original and A.C. (allergy and colds formula), leads the $100 million eye drop category. It received measured backing in 1984 of $12.3 million, up 20.6%.

Uses for Ben-Gay—the ointment that debuted to the French public at the turn of the century—are being extended, along with the age spread of the audience. Measured ad support was $12.2 million, up 64.9%. Close to $8 million was spent on a campaign that seeks to establish Ben-Gay as a family-fitness product, in addition to its traditional use in treating arthritis and sore

muscles. Ben-Gay holds a 35% share of the $100 million topical analgesic category, in which Thompson Medical Co.'s Aspercreme reportedly occupies second place with a 25% share. Thompson Medical is suing Pfizer over an offshoot product of Ben-Gay, SportsGel, which Thompson claims infringes on its Sportscreme trademark.

In the perfume category, Pfizer's measured expenditures declined for Nuance (down 55% to $583,500) and Sophia (down 38.5% to $2.3 million), and were slightly up for Emeraude (up 11.4% to $2.9 million).

The budget for Coty's Wild Musk (for women) was raised substantially because of heavier support of the men's musk version. Advertising for Musk, with men's and women's versions each receiving close to $900,000 in support, was concentrated on tv. Coty's other fragrance for men, Stetson, also received substantial backing, $5.7 million, up 35.7%, as Pfizer augmented its presence in the growing men's fragrance category. Sales of the Stetson line, which accounts for one-fourth of Coty's business, grew 41% in 1984.

The measured media budget for Coty's Overnight Success women's skincare product more than doubled, from $1.5 million to $3.1 million. Support for Pfizer's established brand of baby care products under the Desitin banner was minimal, $171,000, and the product received no advertising support the prior year.

Pfizer spent $4 million on advertising in medical journals, one of the largest media print budgets in the pharmaceuticals industry.

Pfizer's ongoing "Partners in Healthcare" print ad series was supplemented by four 30-second tv spots that dealt with common health problems such as hypertension, diabetes and depression.

Pfizer was one of the few pioneering companies to support a controversial subject for tv fare, incest, when it advertised on ABC's "Something About Amelia," a made-for-tv movie that was aired in January, 1984.

Pfizer continued its commitment to r&d in 1984, pumping more than $250 million into that area. That expenditure is expected to hit $300 million in 1985. Beneficiary of such r&d is Pfizer's healthcare segment, which includes hospital products and pharmaceuticals divisions. The segment represents 62% of Pfizer's business.

Fully 80% of the healthcare segment is dominated by the pharmaceuticals division, which garnered $1.9 billion in sales in 1984. A 14% increase in U.S. sales was offset by a 9% drop in international sales, sharing the plight of U.S. companies with large foreign interests in a dollar-strong worldwide economy. Consequently, pharmaceutical sales rose by only 1% for the year.

More encouraging was healthcare's hospital products subdivision in which over-all sales rose 7% to $491 million and domestic sales 13%. Sales of the agricultural segment increased 2% to $472.2 million in 1984, although sales for the segment dropped 2% in the first quarter of 1985.

The performance of Pfizer's pharmaceutical products was enhanced by sales of a few key products. Topping the list was Feldene, which had $406 million in sales. Feldene, an arthritis treatment product, is the top-selling anti-inflammatory agent in the world. Sold in more than 100 countries, Feldene has been on the market in Europe since 1979, and in the U.S. since 1982. It holds between 25% and 30% of the $3 billion U.S. market for anti-inflammatories, competing against Upjohn's Motrin and Syntex Laboratories' Naprosyn products.

The $4 billion cardiovascular category in the U.S. is dominated by another Pfizer pharmaceutical product, Procardia, with sales of $159 million in 1984, a 29.8% increase for the product leased from Bayer A.G. of West Germany since 1976. The drug, company spokespersons say, holds half of the U.S. market for calcium channel blockers. Its primary competitor is Cardizem from Marion Laboratories. Pfizer is conducting studies to further stimulate use and sales of the product beyond the prevention of spasms of the coronary artery in angina sufferers—Procardia's current usage. The drug also is undergoing testing in the treatment of two other ailments, Silent Myocardial Ischemia and hypertension, which is said to affect more than 40 million Americans.

Another Pfizer drug, the antihypertensive Minipress, increased its sales 19% in 1984, to $200 million, becoming the segment's second biggest seller. It will go off patent in a few years, however, making it available for generic distribution.

Cefobid is the third member of a trio, which also includes Feldene and Procardia, that accounted for one-third of Pfizer's pharmaceuticals' worldwide sales. The broad spectrum antibiotic's sales rose 5% to $124 million last year, aided by its low dosage (twice a day), which presents Cefobid as a cost-efficient choice for hospital use. But as a category, antibiotic sales plummeted 13% at Pfizer. The company attributes part of the downward trend to the increasing use of generic substitutes for Pfizer's Vibramycin product.

Pfizer's own participation in the $2 billion generics market through its Pfipharmecs division is a matter of controversy within the company. Still a small part of the Pfizer business, (about $50 million worth), Pfipharmec's future role may expand, including the possible marketing of non-Pfizer generics, which would naturally become the thrust of the new division. Continued erosion of Pfizer's branded products through off-patent action is certain to be a determining factor. Diabinese, an antidiabetic treatment product that went off-patent last October, contributed more than $150 million in sales last year.

Pfizer is fighting back generic competition to its drugs through the development of new products. Among these is Glucotrol, an oral antidiabetic drug that entered the market through Pfizer's Roerig division in June, 1984. Advertising for the new drug, targeted for use by diabetics not dependent on insulin, is handled by William Douglas McAdams Inc., New York. Another product, Sorbinil, which counters the complications of diabetes, is still under study, and Pfizer hopes to launch the drug within the next few years.

Acquisition activity dominated Pfizer's hospital products division of the healthcare segment. The most recent was Pfizer's purchase of American Medical Systems on May 10, 1985, for $106 million in stock. The Minnetonka, Minn.-based company manufactures urological devices for the treatment of impotence and incontinence. Other purchases included Brent Surgical, a Canadian distributor of hospital cardiovascular products, which Pfizer bought in May, 1984, at an undisclosed price, and Swiss-based Schneider-Medintag, manufacturer of angioplasty products such as the MultiPro balloon catheter, used to dilate narrowed coronary arteries, providing an alternative to coronary bypass surgery. The hospital products group also sold its dental division in a leveraged buyout to management.

The hospital product group's performance was bolstered by $90 million in sales of various new specialty products. Pfizer's share of the $200 million cardiovascular supplies market totals 10%, an area dominated by American Hospital Supply Corp.'s 50% share and C.R. Bard and Baxter-Travenol's 15% and 12% respective shares.

Pfizer's agricultural division received FDA approval in February, 1985, for a system that protects cattle against parasites.

Pillsbury Co., Minneapolis, ranked as the 22nd largest national advertiser in 1984, increasing its total U.S. advertising and promotion spending to an estimated $318.4 million, up 48.7% from the previous year.

Worldwide, the company says it recorded $473.7 million in advertising and promotion-related costs in 1984, compared with $390.6 million in 1983. Worldwide figures also include some selling costs.

Fiscal 1985, ended in May, was

Successful Marketers Know:

Positioning is Everything

If Consumers want something in a product that their current brand is "under-delivering," there is a marketing opportunity for a new brand or a re-positioning of an existing brand.

The more successful marketers will fill these category "gaps." At VOPAN, our innovative research techniques are helping many marketers to optimize their positionings by finding these gaps.

For more information about our strategy/positioning research, call or write to Douglas Bate, VOPAN Marketing Research, 545 Boylston Street, Boston, MA 02116, (617) 247-2363.

U.S.NEWS

Pillsbury's 14th consecutive year of increased sales and net earnings. Revenue for the period was up 12%, to $4.7 billion. Net earnings rose 13% from fiscal 1984, to $191.8 million.

Pillsbury's domestic spending in nine measured media during calendar 1984 was $224.2 million, up 49% from 1983. The big increase came in spending for its restaurants, including Burger King, and for Green Giant frozen foods, new formula yeast-dough products and the new microwave food line.

The image of the flour miller, the purveyor of basic ingredients for home food making, is hardly accurate anymore. In 1984, Pillsbury spent about $80,000 to advertise Pillsbury's Best flour. It spent $130.5 million to advertise Burger King, its biggest restaurant subsidiary.

Reflecting the evolution affecting the company, Pillsbury in February, 1985, reorganized its corporate structure along consumer lines instead of distribution lines. Essentially, food product function (meals) rather than commodities is the new approach.

In marketing goals and expenditures, microwave items were Pillsbury's biggest food new-product area in 1984. Introductions included Totino microwave pizza and Pillsbury microwave pancakes. These products are based on a new technology making use of a pad in the product to collect and concentrate microwave energy. Totino is the No. 1 producer of frozen pizzas, accounting for more than a third of the $550 million U.S. market.

A second area of new development in 1984 was bakery products. Among those introductions were items based on a new yeast-dough technology that is said to bring "bakery-fresh flavor" into the home kitchen. Included were soft breadsticks and also apple danish and cinnamon sweet rolls, all refrigerated to-be-baked products.

Other new bakery products were Pudding Pockets cupcakes, small cakes with a custard-like filling, and the heavily promoted Toaster Strudel, available with several fillings. Also introduced were several new flavors of Pillsbury cake mixes.

Disappointing in this baked goods area were the 1984 introductions of Dry Mix yeast bread, a home baking product, and the Milk Break bar, a cereal snack bar, both of which fell flat in the marketplace, although Pillsbury continues to push the products.

New vegetable products for 1984 included a line of prepared combination Green Giant frozen vegetables and boil-in-bag stuffing, a side dish, both supported by heavy advertising—$4.2 million for the Green Giant vegetables (including existing line items also) and $2.6 million for the stuffing.

Consumer foods segment sales for fiscal 1985 were up 4.3%, to $2.4 billion. Operating profit was up 22%, to $211.5 million. Sales of the meals and snacks section were up 46% to $373 million. Vegetables and side dishes sales rose 12% to $434 million. Bread and baking products increased just 1% to $1.21 billion, and ice cream climbed 34% to $130 million in sales.

Major developments in consumer foods included the acquisition of Van de Kamp's Foods, Long Beach, Cal., from General Host Corp., Stamford, Conn., in November, 1984, for $102 million. The addition gives Pillsbury a frozen fish line, one of the fastest growing areas in grocery sales. Van de Kamp is the third-ranking frozen fish processor behind Mrs. Paul's (Campbell Soup Co.) and Gorton's of Gloucester (General Mills).

Pleased with the performance of its Haagen-Dazs Ice Cream acquisition of 1983, Pillsbury added another premium ice cream maker in 1984—Sedutto Co., a New York producer of premium ice creams.

Pillsbury is now the biggest single operator in the $125 billion-a-year restaurant industry with its two restaurant companies, Burger King Corp. and S&A Restaurant Corp.

Serving more than 40 million meals a week, the restaurant group had fiscal 1985 sales of $2.05 billion, up 16.1%. Operating profits climbed 17.4%, to $220 million. The group had 477 new restaurants in 1984, the most ever in a single year, bringing the total to 4,601.

Current developments for Burger King include introduction of the Croisan'wich, a breakfast croissant that has pushed Burger King's breakfast sales share to 12% of market from 5%; beefing up of the famed Whopper hamburger with a meatier patty and kaiser roll-style bun, and the Burger King debut of a new restaurant concept, the Quik Wok, an Oriental-mode eatery.

Burger King bought the nine-unit Quik Wok chain in San Antonio, Tex., and expects to use it as the base for blending its fast-food savvy with ethnic food in a new restaurant effort.

Perhaps the biggest development from Burger King is the acquisition, in May, 1985, of Diversifoods, Itasca, Ill., for approximately $386.4 million in cash. This was Burger King's largest franchisee, with 377 units, many in Chicago and New Orleans, and its acquisition will enable Burger King, by 1986, to reach its goal of 20% company-owned units in the chain.

Also owned by Diversifoods were 1,000 other restaurants, including Godfather's Pizza, Luther's Bar-B-Q, Moxie's Delux Grille, Cork & Cleaver and Cisco's Mexican restaurants. Pillsbury is keeping Godfather's, but has yet to decide whether to develop or dispose of the other properties.

To back marketing strategies in its three business segments, Pillsbury says that its ad spending will increase 20% in 1985-86.

Heavy increases in spending for 1984 were made for restaurant advertising, most of it on tv, both network and spot.

According to product advertising in six media monitored by Leading National Advertisers, spending for S&A unit, Bennigan's, quadrupled, to $2.7 million in 1984 from $621,900 in 1983, nearly all for spot tv.

Burger King spending was $130.5 million, up 53% from 1983. Magazine spending by Burger King dropped 62% in 1984, to $320,100, but network tv was up 44%, to $51.3 million. Spot tv rose 67% for Burger King, to $78.1 million.

Steak & Ale 1984 ad spending in measured media was $6.4 million, up 39% from 1983. While spending was roughly an even split between network and spot tv in 1983, network grew to 63% of the total in 1984, with the balance going to spot tv.

Over-all, Pillsbury spending for media advertising in 1984 included: Magazine expenditures, about even at $2.5 million for both years; network cable, up 37%, to $757,000; spot tv, 63% higher, reaching $99.1 million; network tv, 44% higher, rising to nearly $107 million, and spot radio, larger by 25%, reaching $12 million. Outdoor spending by Pillsbury in 1984 dropped 14%, to $849,000.

Spending for media advertising of the Green Giant frozen vegetables and entrees nearly tripled, going to $12.7 million in 1984. All was for spot and network tv in 1984 and 1983.

Measured spending for the new microwave foods line reached $4.8 million in 1984, more than triple the $1.3 million spent in 1983, and largely because of introducing the new microwave frozen pizza, which received backing of $1.7 million.

Advertising backing for the new-formula yeast dough products was slightly more than $8.5 million, including $8.47 million on network tv, $177,200 on spot tv, and $29,100 in magazines. Media spending for the refrigerated dough line rose 14% in 1984, climbing to $16.4 million over 1983. In 1984, network and spot tv received all but $617,000 of this total, which went to magazines.

The Pillsbury line of cake mixes, brownie mixes and frostings received ad backing of $8.5 million in 1984, down 18% from 1983. Refrigerated biscuits had total ad spending of $2.4

Bringing good news to people in Small Town, U.S.A.

Good things in life pass the test of time . . . improving with age. That's the story behind GRIT and CAPPER'S WEEKLY, America's family publications. If you want to reach C and D counties, we're too important to ignore. Over 4,000,000 readers depend on GRIT and CAPPER'S WEEKLY for their reading pleasure. For over a 100 years, we have been giving the people of rural and small town America a varied editorial that includes "how to" articles on cooking, gardening, home improvement, what's new in medicine as well as human interest stories. Our readers spend over 1½ hours with each issue. That's loyalty. They've grown accustomed to our style and depend on us for hours of "easy chair" entertainment and information. What better stable environment for your products!

Procter & Gamble Co. remained the largest national advertiser in 1984 with total U.S. advertising and promotion expenditures of an estimated $872 million, an increase of 10.5% over the previous year.

The Cincinnati-based household products marketer had fiscal 1985 sales of $13.55 billion, up 5% from the previous year. Worldwide earnings, however, were $635 million, a drop of 29%. The U.S. contribution to earnings was $521 million.

Procter & Gamble spent an estimated $1.09 billion in worldwide advertising in fiscal 1985, up 11.7% over fiscal 1984, according to household products analyst Hugh Zurkuhlen of Salomon Brothers. Of that total, an estimated 80% was spent on U.S. advertising—$132 million of which was in unmeasured media and promotions.

According to nine measured media, P&G measured advertising for 1984 totaled $740.4 million in the U.S., up 3.8% from 1983. P&G became the leader in network cable spending in the U.S. during 1984 with an expenditure of $24.[illegible] million, up 59.2%, passing 1983's No. 1 cable advertiser, Anheuser-Busch.

U.S. sales for P&G in fiscal 1985 were $10.24 billion, 75.6% of the worldwide total, and up from 73.8% of the worldwide total in 1984.

About halfway through fiscal 1985, P&G announced it would report the company's first earnings decline in 33 years. P&G's last earnings decline was a 19% drop for 1952. This year's drop of 29% was more dramatic. Analysts attribute the drop to a series of marketing mistakes the company made in a number of its key product categories.

However, analysts are more optimistic about earnings potential for fiscal year 1985-86. Hercules Segalas of Drexel Burnham Lambert, New York, predicts a positive earnings swing for P&G in the new fiscal year, which began July 1, because "there will not be as heavy a level of spending, [allowing] earnings to climb again."

During 1985, P&G found itself spending more than it expected in its key product categories of disposable diapers, dentifrices and laundry detergents, while at the same time supporting the introduction of 15 new products. However, all of the new P&G products introduced during 1984 sported familiar brand names as the company moved full speed ahead with a brand-expansion strategy not previously associated with it. Analysts say the strategy reflects P&G's facing up to the realities of today's competitive marketplace.

Products introduced nationally this year under established brand names are Bounty Microwave paper towels; Citrus Hill Select; Crest tartar control formula toothpaste; Duncan Hines oatmeal and peanut butter ready-to-eat cookies; Folgers decaffeinated instant and regular coffee; Lilt shampoo and conditioner, plus a reformulated line of Lilt home permanent products; Luvs Baby Pants; new Pampers diapers; Prell conditioner; Pringle's sour cream & onion potato chips; Spic & Span pine cleaner, and Liquid Tide laundry detergent.

In the $2.8 billion disposable diaper market, P&G still holds a 46% total market share, although its Luvs and Pampers diapers have steadily lost market share to Neenah, Wis.-based Kimberly-Clark Corp.'s Huggies disposable diapers. K-C's share has grown to 32%, cutting deeply into P&G's once-most-profitable division.

P&G in January announced a $500 million revamping of its diaper production facilities "to market a new generation of Pampers." In addition, P&G will spend another $225 million in advertising and promotion to launch the new diaper via Benton & Bowles, New York.

In measured media spending, P&G spent $26.4 million, up 12% from 1983, with almost all that amount put into network and spot tv time. P&G also spent $23.2 million in measured media to support its Luvs premium disposable diapers. Luvs regular or premium also was upgraded in mid-1985 and renamed Luvs Baby Pants, with an elasticized waistband as well as elastic legbands. Dancer Fitzgerald Sample, New York, is the agency.

The Always line of feminine protection products, P&G's first entry into the estimated $1.5 billion feminine protection category since its Rely tampons were pulled from the market because of their link to toxic shock syndrome, did very well in its first year of national distribution.

P&G spent an estimated $100 million to launch the four-item line and got quick results. Latest market share estimates show Always with a 17% share, slightly less than P&G's projected 20% share. Market leader Johnson & Johnson, New Brunswick, N.J., has a 38% share for its two lines, Stayfree and Sure & Natural; Kimberly-Clark, 32.1% for New Freedom and Kotex, and Tambrands, Lake Success, N.Y., has 9% for Maxithins.

Always received $17.8 million in measured media spending, almost evenly split between network tv and magazines.

Support for P&G's other consumer paper products appears to be gradually dropping. The company's 1984 measured spending totaled $29.4 million, down 12.5% from 1983 for the eight products in this category.

Only Bounty paper towels and Banner bathroom tissue recorded increases, with Bounty up 27% to $11.2 million in measured spending, and Banner up 38% to $7.6 million. Bounty holds almost 20% of the $1.3 billion paper towel business, and late in the year introduced Bounty microwave towels.

At the same time, P&G also began testing Special Touch by Puffs, a facial tissue impregnated with lanolin. The lotioned facial tissue is similar to Procter & Gamble's Certain, a lotion-impregnated bathroom tissue.

Special Touch, positioned as the tissue that "helps take the 'Ow' out of blowing," was backed with $67,200 in measured media spending, compared with $5.09 million for regular Puffs. Puffs is the third-largest facial tissue in the $1 billion category, trailing K-C's Kleenex and Philadelphia-based Scott Paper Co.'s Scotties.

P&G is the leading marketer nationally of bathroom tissue, holding close to a 30% share of the $2 billion market. In addition to Charmin, which received $7.5 million in measured media spending, other brands include White Cloud with 8.3% and Banner with 3.1%. White Cloud was backed with $2.56 million in measured spending, down 12% from 1983.

In the personal care area, P&G had trouble defending its market share in the $1 billion dentifrice category. At the end of 1984, Crest's share had fallen to 30.5%, from 36% six months earlier. New York-based Colgate-Palmolive Co.'s Colgate gained the most, picking up at least 3 share points to hold a 26% share. Latest figures show Crest at slightly more than 29% and Colgate a bit more than 28%.

Industry watchers predict Crest will win back some share with its $37 million introduction of Crest tartar control formula, P&G's effort to combat Colgate's $40 million national launch for its plaque-fighting Dentagard toothpaste.

In measured media spending, P&G spent $31.7 million on Crest, down 14.5% from 1983 measured spending, including $2.1 million for a separate Crest gel toothpaste campaign. The bulk of Crest's media buy consisted of network and spot tv, with some magazine support.

P&G's cosmetic Gleem toothpaste spending dropped 46% to $4.4 million in measured media spending, mainly through spot tv buys. Leo Burnett USA, Chicago, handles.

Measured media support for Scope mouthwash declined slightly to $12.8 million.

In the nearly $1.3 billion (retail sales) deodorant/antiperspirant market, P&G's Secret and Sure held steady throughout the fiscal year. Secret holds an 11.1% share and Sure has 12.5%.

Exactly how much is the competition spending in the Wall St. Journal?
Turn to LNA for answers.
See page 101

Measured media spending increased slightly to $31.8 million for both Secret and Sure.

P&G last summer introduced an eight-item Ivory shampoo and conditioner line into the $3 billion haircare category, backed with an estimated $35 million budget, $10.5 million of that in measured media spending. The economy priced line to date holds an estimated 5.1% share of unit sales in the shampoo category, according to the A.C. Nielsen Co., Northbrook, Ill.

P&G's Head & Shoulders dandruff shampoo is considered to be the No. 1 product in the category, claiming an estimated 10% share of unit sales. Salomon Brothers' Mr. Zurkuhlen estimates P&G owns 28% of the retail shampoo market, a coverage split between five brands—Head & Shoulders, Ivory, Lilt, Pert and Prell.

In early autumn, P&G introduced a premium-priced shampoo and conditioner for permed hair under its Lilt franchise, making the company the fourth competitor to enter the permed and color-treated haircare category. The line is positioned as "the permed haircare system," via Burnett.

Measured media spending fell for Pert and Prell during fiscal 1985, Pert declining 10.4% to $6.3 million, and Prell plummeting 33% to $8.4 million, despite the introduction of new Prell conditioner. Head & Shoulders' budget increased 21% to $16.7 million.

After battling Greenwich, Conn.-based Chesebrough-Pond's over advertising for their competing hand lotions, both companies in July finally agreed to modify or discontinue ads for Vaseline Intensive Care and Wondra hand lotions, respectively.

The Wondra ad claimed the product "has the most moisturizing glycerin of all leading lotions and Wondra is best at turning rough, dry hands soft and smooth." Benton & Bowles, New York, is the agency.

The Vaseline Intensive Care ad claimed, "When it comes to relieving dry skin, no leading lotion beats Vaseline Intensive Care." William Esty Co., New York, handles.

Measured media support for Wondra decreased 2.1% to $3.9 million during fiscal 1985.

P&G decreased measured media spending for its bar soaps, dropping 14.8% to $44.3 million during the fiscal year. Ivory bar and liquid soaps were up slightly to $16.5 million, although all other brands reported decreases, including Camay, Coast, Lava, Safeguard and Zest. Measured media spending also dropped 30% to $306,000 for Monchel, a face and body soap currently in test market.

P&G fared slightly better in the $3 billion detergent category, mainly because the company responded early to coming competition. The company rolled nationally an unscented Tide powder and added a Tide liquid to its line in recognition that liquids, though accounting for only 22% of total business, are the fastest growing segment.

That trend hit close to home when New York-based Lever Bros.'s Wisk ousted Cheer for the No. 2 slot in the total market. P&G backed the late 1984 introduction of Liquid Tide with a $50 million campaign via Saatchi & Saatchi Compton, New York.

For the April-and-May 1985 period, Liquid Tide captured 6.9% of the total category, but regular Tide slipped from 14.7% in December and January to 13.2% in April and May, while unscented Tide is down to 4.7% from 5.3%.

Backed by slightly lower measured media spending of $16.5 million, Era Plus dropped to a 3.5% market share. Cheer, backed with $9.4 million, slipped to less than 7% from 7.3%. With the exception of Liquid Tide, P&G's laundry detergent division recorded a 25% drop in measured support to $71.6 million.

P&G also faced heavy competition from Lever in three categories—fabric softeners, automatic dishwasher detergents and dishwashing liquids—that P&G has dominated for years. Lever's Snuggle fabric softener, now with both liquid and sheets-for-the-dryer versions, has taken share from P&G's Downy liquid and Bounce sheets by carving out a lower-price but parity-performance niche.

While Bounce lost 16% of its measured media support during the year, Downy's budget was up 50% to $19.5 million over the previous year. Biz all-fabric bleach also rose 53.6% to measured media support of $7.1 million.

With the introduction of Sunlight for automatic dishwashers, P&G's Cascade automatic dishwasher detergent has dipped under the 50% share mark for the first time in years, despite a 27% increase in Cascade's measured media spending to $16 million and the introduction of lemon-scented Cascade.

Sunlight light-duty liquid, although still in fifth place, has eaten away at the shares of P&G's Joy, Ivory and Dawn liquids. P&G increased spending 4.4% to $41.5 million in the light-duty dishwashing category.

In the general household cleaning category, P&G introduced Spic 'N Span pine liquid cleaner, backed with $2.8 million in media spending. Comet cleanser received a 26% increase to $6.4 million, while both Mr. Clean and Top Job lost measured media support—Mr. Clean dropped 5.6% to $7.2 million, while Top Job slipped 2.5% to $7 million.

Over the past few years, P&G has been relatively quiet on the coffee front; however, last August, the company did move swiftly into national distribution with Folgers instant and regular decaffeinated coffee, without prolonged test-marketing.

Instant coffee accounts for some $1.5 billion in retail sales, about half the size of the ground-coffee market. P&G's share in instant, with High Point and Folgers brands, has edged up to 17%. In ground coffee, Folgers holds a 27% market share.

Last September, P&G ended its 20-year relationship with Mrs. Olson, restaging Folgers with a Folgers' ad campaign.

P&G's key coffee competitor, General Foods Corp., White Plains, N.Y., unleashed several new coffee products during the year, including Yuban decaffeinated coffee; Maxwell House decaffeinated, both instant and ground; International Coffees with NutraSweet, and is testing a line of premium ground items called Maxwell House Master Collection.

"P&G's feeling is that it's time to make some money, so they're calming down in terms of marketing expenditures in coffee, which historically has been big in sales and small in profits," Mr. Zurkuhlen says.

Folgers increased measured media spending 33% to $34.6 million in 1984. Spending for High Point rose 20.7% to $14.7 million.

In 1982, P&G acquired the Tender Leaf tea business, but to date has not done much in this companion category. Measured media spending totaled $174,000 in 1984.

P&G tried to make a major splash with its Citrus Hill Select chilled and frozen concentrate orange juice brand, but to date, has made only small waves. The company knew it would be expensive to enter the $2.5 billion market, and some analysts peg P&G's loss between $80 million and $110 million during calendar year 1984.

The juice has garnered an 11% share in the chilled segment and a 7% share in the frozen segment for an estimated 9% total share, according to Eric Larson, an analyst at Paine Webber, New York.

Analysts don't expect Citrus Hill to rise above a 10% share during 1985 in a market that's dominated by generic and private-label brands, even though ad spending is estimated at $50 million.

P&G may have bitten off more than it could comfortably chew by entering the $3.1 billion ready-to-eat cookie market in 1984 with a product that's now considered a parity product at

best.

During the year, P&G concentrated on expanding its Duncan Hines soft center cookies. The 10-item line now includes oatmeal chocolate chip, oatmeal cinnamon, oatmeal raisin and peanut butter nut, in addition to its original chocolate-chip based varieties.

The latest available market share data show P&G has a 5% share of the category; Nabisco Brands, Parsippany, N.J., has retained its tight grip on the market, however, with an estimated 40% share.

P&G entered the market with a product based on a new technology—a cookie that was crunchy on the outside, soft on the inside. However, Frito-Lay, Dallas, Nabisco and Keebler Co., Elmhurst, Ill., came up with the same kind of cookie before P&G concluded its lengthy test marketing, leaving P&G with a parity product. P&G now has patent-infringement suits pending against the three cookie companies.

P&G spent $14 million in measured media during 1984 to support the Duncan Hines cookie line, with an additional $27 million for its other Duncan Hines cake, cookie and muffin mixes and frostings.

The company's soft drink business, which started with the purchase of Crush International, has done little more than gain a 1% share of the $25 billion retail soft-drink market. The major brands are Orange Crush (and other Crush flavors), Hires root beer and lemon-lime-flavor Sun Drop. Ad spending for Crush and Hires is minimal, less than $7 million in measured media for all soft-drink brands last year.

Fiscal 1985 was thought by many P&G analysts to be the breakthrough year for the company's Norwich Eaton Pharmaceuticals division, Norwich, N.Y. The unit's best-known consumer product is Pepto-Bismol stomach remedy, which received $15.1 million in measured media support during the year.

After what was possibly one of the shortest market tests in P&G history, the company rolled nationally in May, 1984, with Encaprin, an enteric-coated, extra-strength arthritis pain reliever.

Unfortunately for P&G, Encaprin's launch into the $1.2 billion analgesics category was answered by the introduction of ibuprofen-based pain relievers by Bristol-Myers Co. and American Home Products Corp., both based in New York.

B-M's Nuprin, via Grey, and AHP's Advil, via Young & Rubicam, each received more than $50 million in advertising and media support. The Encaprin budget is estimated to be between $35 million and $50 million; the brand received $18.7 million in measured media support. However, the brand's market share has failed to rise much above 1%.

"The introduction of Advil and Nuprin made for a competitive environment, but we feel Encaprin's introduction was not overshadowed nor drowned out," a P&G spokeswoman says.

P&G also handed longtime agency Leo Burnett USA, Chicago, two additional accounts in the division: Chloraseptic sore-throat spray and lozenges and Head & Chest cold medicine, which had been handled by Henderson Advertising, Greenville, S.C. Henderson is no longer a P&G agency. Head & Chest received $4.3 million in measured media spending in 1984 and Chloraseptic received $6 million.

During fiscal 1985, P&G also battled a resurgence of rumors falsely connecting the company to the Church of Satan. However, in April, P&G announced it would drop its familiar moon-and-stars logo from product packaging, following repeated unsuccessful efforts to stem rumors that the logo's symbolism represented an association with the devil. The company also filed suits against a minister, a schoolteacher and two others, alleging they spread "false and malicious" rumors that the company worships Satan. The suits are pending in federal courts in Virginia, Pennsylvania and Kansas.

As in product development, P&G used its internal advertising department and agencies to get the fastest and most cost-efficient ad response. As part of its re-evaluation, P&G and the ABC Television Network in November announced cancelation of "The Edge of Night," ending a 28-year run.

Cable tv and broadcast syndication now are thought to be the company's major growth areas for its product advertising budgets.

Over-all, P&G's spending for eight measured media increased 11.2% to $788.8 million, including network cable tv up 59%; broadcast network tv, 12.5%; spot tv, 4.3%; magazines, 23.7%; spot radio, 25.7%; network radio, 164%, and outdoor, 98%. Only newspapers declined, falling 33%.

Quaker Oats Co., Chicago, boosted it advertising budget 8.2% to an estimated $161.3 million in 1984 to become the nation's 49th largest advertiser. The company already has announced it will increase that figure by another 24% in 1985 to about $200 million and bring its total advertising, merchandising and selling budget to $600 million.

The company's increased commitment to advertising comes on a sales rebound the past two years. In fiscal 1985, ended June 30, for example, sales at Quaker rose to $3.52 billion, up 5.3% from fiscal 1984, itself a 28% improvement over the prior year. Net earnings, meanwhile, have shown similar movement, rising in fiscal 1985 to $156.6 million, up 13% over net earnings in 1984, up 144% over the prior year.

Quaker is structured in four major segments: U.S. grocery, which produces about half of Quaker's total sales and almost two-thirds of its operating income; international grocery products, about one-third of sales and a fifth of operating income; Fisher-Price toy division, good for about 12% of sales and 10% of operating income, and specialty retailing group, about 5% each of sales and operating income.

Having shed unproductive businesses during the past decade, Quaker has begun some internal belt-tightening. Chairman William Smithburg reorganized Quaker's $2 billion U.S. and Canadian grocery products division, possibly to begin grooming a successor to president Frank Morgan, due to retire in a few years.

The division that was chopped up accounts for two-thirds of Quaker's sales and has expanded its product mix beyond the traditional breakfast and pet foods strengths to include beans, beverages, frozen foods and snacks.

Hedric Rhodes, formerly president at Quaker's food division, is now exec vp-U.S. foods, which includes cereals, corn products, frozen foods, mixes and syrups, snacks and grocery business development.

New exec vp of Quaker's diversified grocery products unit is Douglas Maxwell, former pet foods division president. The group includes foodservice, Gatorade thirst quencher, pet foods, Quaker-Canada, Van Camp products and Wolf brand chili.

The new exec vp-grocery products services is David Nogle, former vp-operations, food division. He is responsible for advertising, distribution, marketing research, r&d and sales as well as watching over Quaker's controller and personnel departments.

Quaker also began consolidating its international division to increase that unit's profitability. The company sliced capital expenditures by increasing brand sharing of production facilities and distribution networks while beefing up its marketing, promotion and ad outlays in that division.

The strong U.S dollar held back growth in international profits last year. Quaker's operating income in its international grocery products division fell for the second straight year to $41.5 million, down 11.5% from fiscal 1984, a year that dropped off 20.6% from fiscal 1983.

Most of Quaker's international revenues—representing almost 29% of total sales—come from highly competitive European markets. Pet food sales account for more than half of Quaker's international businesses and ready-to-eat cereals for much of the rest.

The continued strength of Quaker has made the company a likely takeover target. To reduce the risk of such an event, shareholders approved two measures in 1984 designed to discourage takeover attempts. One measure requires that certain tender offers gain 80% shareholder approval unless approved by a majority of directors.

In another, shareholders voted to authorize 100 million common shares, up from 35 million, to allow the company to take advantage of favorable market conditions. Quaker also bought back 2 million of the 40 million outstanding shares, hoping to cash in on its own 20.3% return on investment ratio.

The majority of Quaker's new product efforts during 1984 came from line extensions. To the $425 million granola bar catagory, Quaker added three new Granola Dipps flavors: Caramel nut, rocky road and mint chocolate chip. To its Chewy granola bar line, Quaker added banana chocolate chip and chocolate mint chip. The company introduced Quaker Peanut Butter Whipps granola bars covered with a whipped peanut butter coating.

Quaker added ButterLite syrup, a low-calorie, butter-flavored syrup backed by a $12 million ad push, and frozen pancakes, in plain, buttermilk and blueberry flavors to its Aunt Jemima line.

New Quaker Instant Oatmeal flavors—strawberries & cream and raisins, dates & walnuts—were added in September. To help boost sagging pet food sales, Ken-L Ration Smorgasburger semi-moist dog food was introduced in May, 1985, and Ken-L Ration Burgers, its semimoist, hamburger-shaped dog food, was reformulated then. Fisher-Price added more than 60 new toys, too.

In January, Quaker bought Arden Organics, an Asheville, N.C.-based rice cakes marketer. The move by Quaker seems to have been more of one upmanship than buying market share through acquisition in a growing market, because the move into this new but small market followed H.J. Heinz Co.'s purchase of Chico, Cal.-based Chico-San, another rice cakes marketer.

Quaker also purchased Liqui-Dri Foods, Louisville, a custom blending and packaging company, to strengthen its foodservice unit. The acquisition will help Quaker expand that business in the breakfast category, where it already sells items such as hot and ready-to-eat cereals, pancake mix, grits, English muffins, juices, jams and jellies.

Also in foodservice last year, Quaker began distributing its Chewy granola bars in smaller, single-serve sizes for schools and hospitals.

NEWSPAPER SALES

ucts, a Chicago marketer of industrial products made from vegetable oils and detergents.

Last year, Quaker concentrated on growth from its top profit centers, grocery products and Fisher-Price toys.

The toy division's over-all sales reached $422.4 million in fiscal 1985, up 10.2% over 1984. Domestic sales accounted for an estimated 75% of sales. Domestic sales have grown at a compound rate of 8% a year for the past six years. Over-all operating profit improved 8% to $47.1 million. Quaker says increased sales in the division came particularly from the U.S. and Canada and credited advertising and merchandising spending levels, up 15% over the previous year, with stimulated product movement.

The division's volume increases have been driven by growth in its infant and preschool categories, its new space and alien themed building set line, Construx, and the expansion of its existing audiovisual line, according to R. Bruce Sampsell, Fisher-Price president.

Fisher-Price boosted its $18.5 million advertising budget to about $22 million for fiscal 1985. Included in that was a spring campaign, via Waring & LaRosa, New York, themed "Fisher-Price toys keep their promise." Network tv and print in women's magazines touted new products, including the Sesame Street Cookie Counter, a calculator-type toy to help preschoolers learn mathematics that is Fisher-Price's first venture into licensed characters.

To combat the strength of the U.S. dollar abroad, Fisher-Price increased operating efficiency and expanded its Peterlee, U.K., plant to provide almost 95% of its self-manufactured finished goods, rather than bring those products over from the states, Mr. Sampsell added. Fisher-Price will concentrate on the preschool category, more significant abroad than in the U.S., and become more aggressive in advertising and merchandising its products.

Production problems tripped up Fisher-Price's infant and toddler playwear line earlier this year. The company had to cancel its spring line but will be back on the market for fall.

Quaker's specialty retailing unit is made up of Brookstone, a supplier of hobby tools, Jos. A. Bank Clothiers and Eyelab, a New Jersey-based eyewear chain. Eyelab opened seven new stores in second-quarter 1985, bringing its total to 19.

This July, Quaker sold Herrschners, the nation's largest mail-order crafts company, for $19.3 million to H I Acquisitions Corp.

Quaker concentrated on four food categories in 1984: Convenient breakfast foods, grain-based snacks, Gatorade thirst quencher and convenient dinner foods. These were grouped in its U.S. grocery products segment, which in fiscal 1985 had operating income of $238.4 million, up 13%, on sales of $1.92 billion, up 12%. Sales of the segment represent 55% of total sales.

The company is predicting 10% growth in its convenient breakfast food division this year, after growing 8% last year. Quaker is doing particularly well in hot cereals, pancakes, syrup and frozen waffles. Its ready-to-eat cereal market share has slipped to 8% from 8.6% in 1983, mostly because of Kellogg Co.'s aggressive stance in gaining back its own lost market share.

Quaker again is rolling over competitors in the $425 million granola bar category, where it holds a 43% share versus General Mill's 35% share. Flavor extensions of existing product lines and the introduction of Peanut Butter Whipps helped solidify Quaker's standing in that market.

Gatorade Thirst Quencher sales should reach $170 million this year with a 23% increase in sales volume, despite pressure from Coca-Cola Co.'s Max Energy & Fluid Replacement Drink as well as several regional entries. Gatorade reportedly was backed by $15 million in advertising via AdCom last year. That budget should reach $18 million this year, analysts report.

Gatorade also spends about $3.5 million yearly on promotions, mostly surrounding sporting events such as the slam-dunk contest in conjunction with the National Basketball Assn.'s All-Star Game. Marketing expenditures for the product should reach $50 million in 1985.

Quaker's 1984 over-all measured media spending rose 26% to $107.7 million from calendar 1983. Unmeasured ad spending fell 18.9% to $53.5 million.

Major shifts in media spending came in spot radio, where spending leaped 147.6% to $5.5 million; network cable, where spending rose 92% to $1.3 million, and network tv, where spending increased 48% to $71 million. Outdoor advertising spending dropped 95.6% to $1.7 million, while magazine spending fell 20% to $9.1 million.

Agency shifts or additions last year included the addition of Norton Associates, Los Angeles, to handle foodservice products.

The company moved its $1.5 million Van Camp's pork & beans and specialty products account to Berry-Brown, Dallas, from Foote, Cone & Belding, Chicago. That was Foote, Cone's last Quaker account, having lost the Gatorade Thirst Quencher account to Quaker's in-house AdCom last year.

J. Walter Thompson USA, Chicago, which already handles ad work for Granola Dipps, was assigned the new Quaker Peanut Butter Whipps account.

Recently, Quaker shifted about $20 million in business, including the coveted $8 million Life Cereal account, to BBDO, Chicago, from that agency's New York office.

Other brands involved in the move were the $3 million Quaker 100% Natural cereal, $1 million Quaker puffed cereals, $8 million Ken-L Ration Love Me Tender Chunks dog food and $1.2 million Puss'n Boots cat food.

Also completed in late July this year was Quaker's sale of its in-house agency, AdCom, to Backer & Spielvogel, New York, for an undisclosed sum.

B&S is expected to pay between $5 million and $10 million for the agency, Quaker's largest with 30% of its business. AdCom (now B&S/Chicago) under new ownership has not lost any Quaker business. B&S also handles the $1 million Celeste frozen pizza account and several new product assignments.

GOOD GOT BETTER.
THEN IT GOT GREAT!

From an advertiser's point of view, good got great when all accredited CMESat program series for health-care specialists converted to videotape distribution as the primary means of reaching viewers in each specialty.

Just as each of our series was developed on the highly successful EyeSat® model to produce CME television programs of undisputed quality, the problems associated with our broadcast-based distribution system have been overcome by re-shaping the system to match its reach-oriented Canadian prototype. That Canadian prototype puts the reach of each CMESat program *above every professional journal serving its specialty as well as all other forms of continuing education*—annual meetings, symposia, foreign medical journals, audio tapes and other audio-visual services.

Delivering the Incomparable Reach You Need

When good got great, it brought with it eight kinds of results-oriented opportunities to put you in meaningful contact with specialists in the health-care professions through our:

- special videotape launches for each health-care specialty we serve
- 24 yearly accredited programs on videotape
- opportunities for new-product launches
- additional videotape programs (up to 12 annually)
- weekly television programs broadcast across the U.S.
- printed program index
- prime-time television programs
- residence-oriented mailing lists.

Of course, all advertising on CMESat programs is agency commissionable.

Now's the Time to Act

The following program series are in test-market or have been launched in videotape form:

- CardioSat (cardiology)
- EyeSat (ophthalmology)
- MedSat (internal medicine)
- SurgSat (general surgery)
- OrthoSat (orthopaedics)
- AnesthSat (anesthesiology)
- DentSat (dentistry)
- PedSat (pediatrics)

When good got great at CMESat, we began to deliver the incomparable reach you need. But, you can begin to take advantage of that reach only by advertising on one of our regular, accredited videotape program series. That's a *pre-requisite* for taking advantage of the other seven advertising vehicles our program can deliver.

And, with only 60 minutes of time available yearly on each specialty series, we suggest you not hesitate too long. Some sponsors already have bought 60 seconds per program in several of our series. At that rate, each series will be able to accommodate only *a total of 10 advertisers*.

We're very excited about the new CMESat programs and hope you are, too. When you're ready to find out more about the extraordinary advertising opportunities associated with our programs, please call or write to arrange a no-obligation presentation:

Diversified bus.	235.1	236.9	0.8

Ralston Purina Co., St. Louis, the 14th largest national advertiser, trimmed its 1983 ad budget by 2.2% to a 1984 spending level of an estimated $428.6 million.

Measured advertising in nine media for Ralston Purina, best known for its cereal and pet food products, experienced a similar pattern, dropping 1.1% to $157.9 million.

The difference between the measured and total advertising is the "unmeasured" spending figure that includes Ralston's promotional budget, mostly made up of couponing and case allowances to retailers (to put product on sale), which runs high in the cereal and pet food businesses.

For the fiscal year ended Sept. 30, 1984, Ralston's net sales rose only 2% to $4.98 billion. Net income dropped 5.2% to $242.7 million as strong gains by the pet food division were not enough to offset losses from cereals, cookies and crackers, according to the company. Additionally, tuna operations were hit by high operation costs at its San Diego cannery, which since has been closed. Over-all, the company felt the impact of lower margins for agriproducts caused by inflated worldwide commodity prices.

However, the company's Jack in the Box restaurants operating profits were above 1983 levels, and Ralston's protein technologies unit continued to be a strong performer.

For the first nine months of fiscal 1985, Ralston showed a 15.8% gain in sales compared with the same period in 1984, to $4.44 billion. Earnings for three quarters increased 7% from the previous year to $197.5 million.

Pet food sales are up again this year, bolstered by a flurry of new product introductions, while agriproducts, restaurants and protein technologies operating profits are off 1984 levels.

Advertising expenditures thus far in 1985 are at the $400.2 million level, 28.2% ahead of third quarter 1984, and running about 9% of total sales as compared with 8% in the previous year.

Fiscal 1985 results also reflect the $475 million acquisition from ITT of Continental Baking Co. in October, 1984. Quarterly comparisons for the three quarters in 1985 take into account a full three quarters' results from Continental Baking, best known for its Wonder and Home Pride breads and Hostess baked goods. The unit's fleet of direct-to-store delivery trucks may carry additional Ralston brands in the future.

Continental Baking has been testing two new snack foods, Peanut Putters and Chip Flips, but expansion plans have not been announced. Continental spent $20 million in measured media for the year. Total annual spending for Continental, which includes unmeasured media, has run about $25 million the past several years.

Ralston has been hot with new product introductions in its main businesses—cereal and pet foods. Last year, Ralston introduced Sun Maid hot cereal, Rainbow Brite, Gremlins, Cracker Jack and Donkey Kong Jr. cereals. In pet foods, Purina added Happy Cat and Special Dinners Gourmet Dinners for cats and Sea Dog, Waggles and T-Bonz for dogs.

Also introduced in 1984 were S'Mores Chewy granola bars and Chex snack mix, a boxed snack product using Ralston's recipe from its Chex brand cereals.

Thus far in 1985, Ralston has added Sun Flakes, a cereal sweetened with NutraSweet, Sun Flakes wheat & rice, Cabbage Patch Kids ($12 million in spending), Almond Delight ($20 million) and G.I. Joe Action Stars ($12 million) cereals. In cat food, Purina added Alley Cat, Tender Vittle Pick-a-Pouch, Happy Kitten and Catviar ($25 million). It expanded its dog line to include Lucky Dog, Puppy Chow Chewy Morsels ($35 million) and Field Master dog foods.

The company also has begun testing Goody Two Chews cat food in seven markets and Purina Kibbles and Chunks dog food.

A skinless, boneless canned salmon product under its Chicken of the Sea brand name also is in test.

The flurry of new products in test market gave a 7.6% boost to Ralston's magazine spending to $15.7 million, leaving spot and network tv spending relatively unchanged. The company bolstered its network cable tv budget 94%, spending $2.1 million on that medium in 1984.

Ralston's share in the $5.3 billion pet food market slipped to 27.1% from 28.3% in 1983. The company's share in the $3.3 billion dog food segment also fell, dropping to 23.7% from 24.1% the year earlier. Ralston also lost ground in the $1.2 billion cat food segment to a 33.1% share from 34.3% a year earlier, according to data from Furman, Selz Mager Dietz & Birney, New York. Much of Ralston's sales are lost to tracking services through sales from livestock dealers and feed stores, a segment Ralston dominates.

Ad spending on cat foods fell 6.8% to $53.2 million in 1983, while spending on dog foods dropped 3.1% to $55.4 million, although that decline is being reversed—Ralston hit the market earlier this year with a $35 million introduction of Puppy Chow Chewy Morsels, a softer version of its market leading Puppy Chow.

While new cereal introductions—such as last year's Cracker Jack and Gremlins and the recent flood of licensed cereal products—have helped boost Ralston's cereal sales, Ralston's private label business was down 7% in 1984, according to John C. Maxwell, a Furman Selz Mager Dietz & Birney analyst.

Ralston's market share remained relatively stable at 6.3% of the market, making it the fifth largest U.S. cereal maker behind Kellogg Co., General Mills, General Foods and Quaker Oats Co. Measured ad spending dropped 17.2% to $1[illegible].2 million from $23.2 million in 1983.

Ralston's S'mores Chewy granola bars, introduced in July, 1984, have garnered a 5% share in the $425 million granola bar market. The product pits the company against Quaker Oats and General Mills, rivals familiar from the cereal market. S'mores is backed by a $20 million to $24 million multimedia campaign via MCA Advertising, New York.

The company took a big step toward becoming *the* canned seafood company by introducing into five test markets a skinless, boneless canned pink salmon under its Chicken of the Sea brand name. Sources also say the company may add canned shrimp and canned crab to the line, but Ralston declined comment.

Themed "No waste. All salmon," the $7 million campaign focuses on Ralston's new packaging method that makes the product more closely resemble canned tuna. TBWA, St. Louis, handles paid media; Kosmas Advertising, Minneapolis, handles point-of-purchase.

Measured spending on Chicken of the Sea tuna fell 62.7% to $254,100, but the product held its 20% share of the $1 billion chunk-light-tuna market.

Agriproducts sales rose 6% to $2.2 billion on higher prices due to higher raw materials costs. Operating profit fell 12% to $92.5 million though, mostly due to lower over-all volume in the formula feed business.

Higher sales and operating profits in the protein technologies division continued to be a big contributor to Ralston's total sales and net profits. Soy protein product sales were the biggest contributor to that unit's 7% gain in operating profits. Ralston then sold its soybean processing operations to Cargill Inc., Minneapolis, on Jan. 2, but continues to market protein products.

Average unit sales for a Jack-in-the-Box fast food outlet was $753,000, up 7.6% from 1983. Average sales should hit $1 million per unit during 1985, Ralston says. Over-all, sales generated by the company's restaurant division fell 6% to $628.3 million while operating profits rose 5% to $61.4 million.

Jack in the Box added eight new units for a total of 788. In October, the chain sold six Brazilian units, its only outlets outside the U.S.

An attempted $500 million leveraged buyout of Jack in the Box backed by Forstmann Little & Co., New York, failed when lower Jack in the Box earnings in the second-quarter of 1985 made it less attractive.

Last November, Ralston announced it would begin changing the fast-food chain's name to Monterey Jack's. A 30-second tv spot explains that the former name is childish in light of menu improvements made since the late 1970s. Wells, Rich, Greene/West, Los Angeles, handles.

Jack in the Box put the $20 million account on review in July, 1985, which should be completed this fall, the company says.

The chain added several new products to its menu last year, including Ham & Swiss Burger Classic, Mushroom Burger Classic, Pita Pocket Supreme, Deli Crescent sandwich, Canadian Crescent breakfast and nachos.

RCA Corp., the 33rd largest national advertiser, has seen its financial fortunes brighten in the past year as its NBC TV Network rose dramatically to second in the prime-time ratings in 1984, and as it divested poorly performing Hertz Corp. to concentrate on its core businesses—entertainment, communications and electronics.

RCA in the process increased total U.S. advertising spending an estimated 14% to $239.4 million in 1984.

Of that, the company spent a reported $128.5 million in measured advertising in nine media tracked in this report and $110.9 million in unmeasured advertising consisting of direct mail, point of purchase, promotion and co-op advertising.

RCA reported its worldwide advertising costs as $329.5 million, a figure that also includes in-house ad department expenses including salaries, supplies and equipment and cost of space.

The company, ranked fourth in terms of revenue among the nation's media companies, continued its pattern of spending the bulk of its measured advertising dollars in magazines. The advertising media getting the largest percentage increase was cable television, which rose 68%.

Its magazine advertising budget climbed 34.8%, to $47.6 million; newspaper advertising was up 17%, to almost $37 million; cable tv rose 67.8%, to $1.03 million; spot tv increased by 23%, to $12.8 million; network tv climbed 14%, to $24.2 million; spot radio was up 35%, to $4.7 million, and outdoor advertising rose 35%, to $523,000. The big loser was network radio, which dropped 73% from $2.6 million to $712,000.

RCA's product advertising, according to Leading National Advertisers, was paced by color televisions. The company spent $7.08 million on the product in 1983, and more than doubled that to $16.1 million in 1984.

Other major spending categories included advertising for the NBC television network, which rose 23% to $23.4 million in 1984; and Hertz, up 0.8% to $12.3 million.

The company put $521,200 into advertising its new Dimensia audio-video system late in 1984. Dimensia is considered RCA's predecessor to a new generation of integrated audi-video products. The system includes a color tv set, videocassette recorder, hi-fidelity speakers and more that can be operated through a single remote control.

Dimensia, according to George J. Podrasky Jr., an analyst who follows RCA for Duff & Phelps, is expected to play a larger role in RCA's electronic segment this year. In fact, it could be RCA's answer to setting it apart from the influx of imports that have forced RCA to drop its prices resulting in high unit sales but low profits. RCA in fact has become the No. 1 U.S. maker of color tv sets in addition to being the leading importer of video recorders from Japan.

RCA this fall also plans to introduce larger, flatter square-screen color tvs, along with its new camcorder vcr, which is a portable videotape camera and recorder combination. The user still will need a separate vcr to play the tapes.

After 2½ years of dormancy, the company resurrected its corporate image advertising program, after switching the account to Needham, Harper Worldwide, New York, from Ted Bates Advertising, New York.

Joel S. Wolk, director-advertising liaison and media services, says part of the decision to renew the corporate image advertising, which focuses on the accomplishments of the company, was the fact that RCA had returned to profitabilty.

During the year, RCA set records for both sales and net income, as sales jumped just under 12.6% to $10.11 billion; and net income rose a dramatic 50% to $341 million, compared with restated 1983 net income of $227 million.

Earnings in 1983 were lowered from $240.8 million because of a change in accounting requirements for the multinational company. The U.S. contribution was $9.2 billion, or 94% of total sales.

For the first half of 1985, sales are running slightly ahead, up 2.1% to $4.9 billion, and income is $180.8 million,

up 12.6%, compared with the first half of the 1984. Income in the 1984 period, however, was affected by a $97.7 million loss in the first quarter.

Major developments at RCA in 1985 have included the elevation of its president, Robert R. Frederick, to ceo, assuming that title from chairman Thornton F. Bradshaw.

In June, 1985, RCA agreed to sell Hertz Corp. to UAL Inc., the parent of United Airlines.

RCA had been trying to sell the Hertz Corp. for about three years as it moved to concentrate on its core businesses.

The company reported that Hertz, which has a 33% market share, had generated record revenues in 1984 of $1.4 billion, but because of heavy competition in the business and less traffic than expected as it geared up for the Summer Olympics, its pretax profits were only $50 million, compared with a restated $68.2 million in 1983.

In July, the company affirmed that it had been conducting merger talks with MCA Inc., the parent company of Universal Pictures, but no agreements have been reached. MCA has been considered an attractive takeover candidate.

RCA's 1984 performance was led by the entertainment component, particularly NBC, its broadcasting arm. RCA's entertainment segment—broadcasting, records and tapes—had sales of $2.99 billion and pretax income of about $250 million for 1984, compared with $2.7 billion and $186 million, respectively, the previous year.

NBC alone accounted for one quarter of the RCA's annual revenues. The tv and radio network together accounted for $2.37 billion in sales, up 13.4%, and pretax earnings of $218.1 million, up 40% from 1983.

A major reason for its performance was its surge in ratings tracked by A.C. Nielsen Co., which showed NBC advancing from third to second in the 1984-85 prime time season behind only CBS. NBC held a 16.2 share compared with a 16.9 share for CBS and 15.4 for ABC.

However, the network is still third in daytime television.

NBC touts its demographic reach more than the sheer numbers, because it led during the ratings period among adults aged 18 to 49, the greatest appeal to advertisers, and among those aged 25 to 54—the segment CBS has long touted as the most attractive.

RCA Records got a new marketing manager and a new approach to record selling last year when Michael Omansky came over from Nabisco Brands Inc.

He brought many of the same techniques used at Nabisco to the record industry—money-back coupons, sampling and joint promotions with other consumer-oriented companies. Promotional linkups with Pepsi-Cola Co.'s Mountain Dew, whose bottle caps could be redeemed for record discounts, boosted album sales by 30%, he contends.

Such techniques should stimulate sales in the nation's record industry where shipments rose 15% in 1984 to $4.37 billion. According to LNA figures on product spending in six measured media, RCA supported records and tapes with some $1.6 million in measured advertising, down 15.8% from 1983.

In the electronics segment, which includes consumer products and services, commercial products and services and government systems and services, sales totaled $4.9 billion and pretax income, $199 million, compared with $4.2 billion in sales and $163.6 million in pretax income for 1983.

This division is in charge of the new Dimensia audio-video system, which will get a satellite receiver and signal decoder attachment sometime this year.

Although a satellite dish still will be needed with satellite receiver and decoder, the company's new K-band high-powered satellites will require a much smaller dish for reception. RCA is to launch the satellites this fall.

The decoder will be available through cable companies initially, says Mr. McCann, but later will be built into the Dimensia system, although it will have to be activated by the cable company's computer. The company also is introducing an optional 40-inch projection television for Dimensia.

The communications segment, consisting of satellite communications services and products, generated $417.2 million in sales, $107 million in pretax income compared with 1983 figures of $377 million and $95.2 million, respectively.

Revlon Inc.
New York

RANK 36

($ figures = 000,000)

Worldwide	1984	1983	% chg
Sales	2,399	2,379	0.9
Net income	112	111	0.8
U.S.			
Sales	1,729	1,661	4.1
Operating profits	221	224	-1.4
Advertising	205	179	14.5

Revlon Inc., New York, currently fending off a takeover attempt, was the 36th largest national advertiser in 1984, increasing its U.S. advertising spending to an estimated $205 million, up 14.5% from a restated $179 million in 1983.

Worldwide, Revlon's advertising costs were $273.3 million, up 14.2% from the previous year. Revlon derives about 70% of its sales from the U.S., Canada and Puerto Rico.

Sales in 1984 increased slightly to $2.40 billion, up 0.9% from 1983, while earnings rose 0.8% to $112.1 million. Operating profits dropped by $3 million to $298.3 million.

Despite several years of lackluster performance in the financial column—Revlon's earnings peak was in 1980 when it reached $192 million—Revlon is considered a strong company in the market, particularly because of its acquisitions in the healthcare area the past decade.

It is the perceived market value of such healthcare divisions as Norcliff Thayer and National Health Laboratories that helped promote a takeover attempt in August, 1985, by Pantry Pride Inc. The properties could be sold by a new owner at top dollar to repay debt incurred in a takeover. Takeover rumors had circulated before any move by Pantry Pride, however, when chairman Michel Bergerac and several of his key executives in 1983 got so-called golden parachute contract clauses that would provide them with a generous severance and compensation package should the company be merged or acquired.

The takeover battle between Revlon and Pantry Pride continues at a heady pace with offers and counteroffers by Pantry Pride and defensive actions from Revlon, including adoption of a "bitter pill" that calls for a new dividend distribution and stock buyback scheme.

Revlon, segmented into beauty products and healthcare, generated approximately two-thirds of its operating profit in 1984 and more than half its sales from its healthcare segment. Its healthcare segment, marketing such items as soft contact lenses, lens solutions, NoSalt salt substitute, Oxy acne remedy and Tums antacid tablets, generated $1.3 billion in sales (54% of the total) and $198 million of operating profit (66% of the total).

Beauty products accounted for 46% of total sales and 33% of operating income in 1984. The cosmetics division for the U.S., Canada and Puerto Rico accounted for 32% of total operating income, while international cosmetics contributed 1%. U.S. ethicals accounted for 12% of operating income; international ethicals, 16%; diagnostics, 15%; optical, 13%, and other 11%.

Revlon, which recorded national measured media spending of $85.4 million in nine media, up 4% from 1983, concentrated $30.6 million on cosmetics (makeup, eye makeup, lipstick, nail polish). The greatest share went to the Revlon brand lines for makeup, mascara and nail polish, with $4.4 million credited to Ultima II cosmetic products line, up 4.5% from 1983, and $2.6 million on the Natural Wonder line, up 40.5%.

The media mix for advertising in 1984 was tilted strongly toward national tv, which took 48% of the measured spending. Magazines followed with a 25% share. Cable and spot tv saw increases.

Revlon also gained market share for the first time in several years in the $800 million U.S. cosmetics market in which sales rose by 9% in 1984, according to market analyst Diana Temple of Salomon Brothers.

The company's first-quarter 1985 U.S. cosmetic's sales rose by more than 10%, Ms. Temple says, noting the figure excluded Hair's Daily Requirements shampoo. In the same period, Revlon's facial makeup rose to 6.4% of the supermarket dollar share, third in volume after Maybelline. Revlon is also No. 3 in eye makeup. It holds a 5% market share for mascara, 5.5% for eyeliner and 4.8% for eye shadow.

Revlon Natural Wonder lipstick is fourth (trailing No. 1 Noxell's Cover Girl) with 10.2% of the supermarket dollar share. Revlon nail polish is also fourth with 7.9% of dollar share.

In the highly competitive market for facial creams and lotions worth $450 million, Revlon's sales advanced a dramatic 34%, increasing share to 2% in the first quarter of 1985, Ms. Temple says. Revlon's Moon Drops will be repackaged, reformulated and repositioned, as well as supported by advertising for the first time in five years. In the same market Revlon has made steady progress with its European Collagen Complex.

Revlon's Oxy-5 overtook Richardson-Vick's Clearasil for the first time with an energetic 21% sales growth, gaining 1.5 percentage points to attain a 21.3% share of the market for the top spot.

Its hand lotions, however, are at the bottom of the market, declining a tenth of a percentage point to a 0.5% dollar share.

There has been less activity in the shampoo market in 1985 than in 1984 when five major shampoos—each backed by about $25 million in advertising and promotion—were launched. Because the new shampoos have achieved only minimal share of market, the companies have cut back expenditures to focus on other brands. Revlon, one of these companies, is expected to cut spending on Hair's Daily Requirements. The product was targeted for a 6% market share in its first year, but ended up with only 0.7% in 1984, according to Ms. Temple of Salomon Brothers.

The market leader among Revlon shampoos is Flex, with a 6% share, third in the market behind leader Helene Curtis.

Among hair conditioners, Flex hair conditioner holds an 11.5% market share, second only to Helene Curtis. Two lines of Revlon hair coloring hold a small 3.3% share after the leaders, Clairol and L'Oreal.

Flex hair spray dropped near the bottom of the list, with a 1.9% supermarket dollar share.

The positive surprise of 1984 was the mousse market. Sales of these aerosol styling foams, meshing with greater consumer interest in products for shorter hair, reached $150 million in 1984, according to Ms. Temple. Revlon planned a major mousse launch in the second quarter of 1985.

In over-all sales in the $7 billion U.S. cosmetics and fragrance industry, Revlon's U.S. sales of $798 million in 1984 placed the company second to Avon Products, which had sales of about $950 million. However, Cosmair and Estee Lauder, both of which have experienced faster growth rates, are closing in on Revlon, whose sales in the industry in 1984 were up only about 1%.

In the fragrance segment, Revlon's Jontue gained 0.8 percentage points in market share, to 6.6%, aided by the Fleurs de Jontue line extension, introduced in 1984. Perfume advertising rose to $12.4 million, or 14.7% of the 1984 measured advertising budget, up 6% from the previous year.

Among the new products introduced in 1984 were Naturally Glamorous Blush-On, a long-wearing powder formulation; Natural Wonder Super Nails with a new formulation in 24 cream and 16 frost fashion shades; Ultima II Advanced Formula mascara, developed with Barnes-Hind as the first irritant-free mascara designed for contact-lens wearers, and Advanced Formula compact liquid makeup with sunscreen protection.

In advertising, the company more closely coordinated advertising and in-store displays so each multiplied the impact of the other to increase consumer awareness.

Healthcare operating profits rose by 6% in 1984 to nearly $200 million on $1.3 billion in sales, despite profit declines for Technicon (blood analyzers) and Hydrocurve (extended-wear soft lenses).

Measured media advertising for contact lenses also declined in 1984 to $4.4 million, down from $7.1 million.

Healthcare operating profits also benefited from new products—including the U.S. launch of Calcimar for the treatment of osteoporosis, a new premium-priced bifocal contact lens and the 1984 launch of the YAG laser (for secondary cataracts).

Other	738	580	27.2

R.J. Reynolds Industries, Winston-Salem, N.C., which climbed into 5th place among advertisers in 1984, could challenge perennial leader Procter & Gamble for the top spot next year because of its acquisition earlier this year of Nabisco Brands, ranked 21st in this report.

RJR had total advertising in 1984 of an estimated $678.2 million, up 14.2% from 1983. Of the total, $533.2 million was in measured spending.

Nabisco had estimated ad spending of $335 million for the year, giving the two a total of $1.01 billion in advertising.

Procter & Gamble in 1984 spent an estimated $872 million. P&G's measured total in 1984 of $740.4 million, however, still would outpace the combined RJR/Nabisco measured tally of $681.7 million in 1984.

The addition of Nabisco Brands to RJR's stable of companies is certain to assure the company of realizing its oft-stated goal of becoming the largest consumer products company in the world, with 1984 sales in excess of $19 billion.

RJR for the year had a sales gain of 5.4% to $12.97 billion and net earnings from continuing operations of $843 million, up 20.1%. Discounting gains from the sale of Sea-Land Corp. and Aminoil Inc., sold to maintain focus entirely on consumer products, earnings from continuing operations were $1.62 billion, up 15.9%.

The U.S. cigaret market was flat in 1984, although RJR did manage a modest volume gain of 1.2%. Over-all tobacco sales were $7.69 billion. Earnings of $1.29 billion, however, represented a 14% increase.

Industry analyst John C. Maxwell Jr., analyst at Furman, Selz, Mager, Dietz & Birney. New York, says the industry bright spot continues to be the economy brands, including RJR's Doral. Phased out of production in 1980 Doral resurfaced in May as a branded item at a generic price.

Mr. Maxwell says generics, private-label brands and the 25-unit, popularly priced brands now account for 6% of industry sales. This low-priced category is likely to continue to grow, but not at the stepped-up rate of the past two years.

RJR's share of the domestic market was up slightly to 31.6%, reflecting a stabilization of existing brands and the success of brands introduced in the past two years. In addition to Doral, Century and Sterling accounted for more than 5% of the company's total volume and a combined market share nearing 2%.

In August, 1985, a half-page color ad in *Parade* introduced the country to Century 25s, an RJR package of 25 cigarets priced similarly to packs of 20.

R.J. Reynolds seemed to get the jump on the competition in the upscale brand category with the introduction of low-tar Sterling, but now is in a fight as other cigaret marketers have followed suit.

In mid-1985, market leader Philip Morris began testing Dunhill, a low-tar entry, in both 85mm and 100mm styles, while Sterling was undergoing a packaging change to identify more clearly the menthol and regular styles. Also in the works is a national introduction of a soft-pack version.

Measured ad spending for all Century brands in 1984 totaled $13.6 million, much of that support coming in magazines. The Sterling introduction drew considerably more support—$41.2 million.

RJR's Winston, Salem, Camel and Vantage brands continue to rank among the best-selling brands in the country. Winston, second behind Philip Morris' Marlboro, increased its market share fractionally. Measured ad support dipped 6.8% to $34.4 million.

Salem was the company's next best-selling brand with a market share of 8.1%, unchanged from 1983. Measured advertising support for Salem also fell off in 1984 to $31.1 million, but the brand did claim substantial promotional support by sponsoring the Salem Spirit concert series. RJR officials declined to reveal the cost of the promotion.

Spending for Camels increased 49.6% to $37 million in 1984 even though the brand's market share was down slightly. Added support also went to Vantage, another low-tar entry, with a declining market share. Media spending for Vantage amounted to $43.6 million, up 38.4% from 1983.

For the year, total spending for all RJR cigaret brands was $267.5 million. None of that caused more controversy or attracted more attention than the series of ads created to focus attention on the issue of smoking and health.

Public smoking, fire safety and youth smoking are among the issues Reynolds has tackled in the campaign, which has been greeted with plaudits in some corners and drawn fire from antismoking forces. The cost in 1984 was pegged at $7.7 million.

Flat sales notwithstanding, the company is in the midst of a $2 billion manufacturing modernization program designed for cost efficiencies. At the end of 1984, 29% of the company's cigarets were being manufactured on new equipment. By 1993, when the modernization plan will be completed, the company expects a 60% improvement in productivity.

During the year, RJR International improved its market share in 16 of its top 20 foreign markets. Volume increased to 84.7 billion units, although the year was marked by unfavorable currency transactions.

Camel again was the company's fastest-growing international brand, gaining market share in nine of the top 10 markets. Volume increase was 13%, and up to 18% in the established markets of Western Europe.

Brazil, Turkey and Ecuador were among the foreign markets where Reynolds' brand were introduced during 1984, but the biggest splash was made in Japan.

That market, second-largest cigaret market in the world behind the U.S., is a $10 billion market and was witness to a $5 million campaign to introduce Camel Mild. The entry was fueled by about 1,000 tv spots in Tokyo alone and print ads and outdoor boards in the rest of the country.

Cigaret prices in Brazil are structured in tiers, and the battle for market share in 1984 was being waged at the low end. RJR's entry in the fray was Mustang, and it became the company's best-selling brand with a 5% market share. The company's total market share is 9%.

In an agreement with two Chinese partners in the province of Xiamen, RJR International became the first foreign tobacco company to gain access to the People's Republic of China. The company will begin production of a joint-venture brand by 1986.

While tobacco remains the principal business of RJR Industries, the food and beverage segment contributed $4.7 billion in sales, or 36% of total sales, and operating earnings of $391 million.

A major contributor to the segment, Heublein Inc., had a 2% increase in spirits sales and an earnings increase of 7% in 1984, according to the company. Its California and imported wine business grew about 1%.

Heublein's Smirnoff vodka, the company's flagship brand, and the top-selling domestic vodka, was given a $12 million advertising shot in the arm late in the year. For years the top-selling liquor brand in the country, Smirnoff vodka, has been overtaken in recent years by Bacardi rum. This and the impact of imported vodkas on the market prompted the renewed effort in 1984.

Also benefiting from a freshly mounted campaign in 1984 was Heublein's Inglenook wine. Spending totaled about $6 million in magazines and tv. Over-all, ad spending in the spirits category amounted to $32.9 million, with considerable advertising support going to Black Velvet Canadian whisky and to Jose Cuervo tequila.

Agency creative reassigments in the past year included Black Velvet and Irish Mist to McCann-Erickson in New York; Jose Cuervo, Lancers and Valbon to Young & Rubicam in New York; Club Cocktails and Arrow Cordials to Leber Katz, and Inglenook and Citronet to DYR, New York.

Heublein is the acknowledged leader in the pre-mix cocktail market with a 55% share, although the market has been stagnant.

Edwin Gualtieri, group marketing director for Heublein, thinks the market might be helped by more advertising, but those playing second fiddle in the category are not spending much in advertising. Aiming at the young and active drinker with its convenient Club Cocktail, Heublein is spending slightly more than $2 million in measured media. Additional spending is directed at the retail level for prominent displays.

Del Monte's products are marketed in more than 60 nations and include canned fruits and vegetables, prepared and frozen foods, beverage products and fresh fruit. The addition of Canada Dry and Sunkist soft drinks in 1984 to the $30 billion soft drink market gives Del Monte a foothold where its only previous presence had been Hawaiian Punch.

Both Canada Dry and Sunkist are leaders in their respective beverage categories. Sunkist holds more than a third of the $1.65 billion orange-flavored carbonated beverage category. Procter & Gamble's Orange Crush has a 15% share and Coca-Cola's Fanta 8%. The segment represents just 5.5% of the soft drink market.

Canada Dry ginger ale controls more than 40% of that soft drink segment and has a 30% share in mixers. It spent in excess of $12.3 million in support of its beverages in 1984.

Not lost in the acquisition of Canada Dry was its extensive worldwide franchise bottling operations, which hold enormous potential for added distribution of Sunkist and Del Monte's Hawaiian punch. There also is the opportunity to increase vending and other on-premises sales.

Del Monte's Hawaiian Punch, with a 17% market share behind Shasta's Capri Sun and Coca-Cola's Hi-C, was supported with $10.6 million of measured advertising during 1984. Other Del Monte products were supported by spending of $20.9 million, most of it going for canned fruits and vegetables.

The final consumer behemoth in the RJR family is Kentucky Fried Chicken, which in 1984 had worldwide sales of $2.8 billion. Total revenues rose 19% from 1983, almost twice the industry average. With 50% of the chicken segment, KFC is by far the largest fast-food chicken chain in the world.

KFC began its highly successful roll-out of Kentucky Nuggets during the year. Advertising support for the restaurant chain reached $63.3 million in 1984, almost all of it in tv.

Richard-Vicks, Wilton, Conn., became the 48th largest U.S. national advertiser with spending of $163.5 million, up 8.3% over 1983, increasing its emphasis on the consumer healthcare and beauty segments of its businesses, which include vitamin, cough and cold products, and toiletry items. Personal care represents nearly half of the Richardson-Vicks over-all sales.

Sales declined by 4.4% to $1.22 billion, while net income rose 0.4% to $72.2 million during the 1985 fiscal year, ended June 30.

Company officials say lower sales were the result of negative impact of continuing U.S. dollar strength abroad (about 43% of total company sales come from abroad), and point to the over-all sluggish retail environment for health and beauty aid products in this country.

On the international front where Richardson-Vicks markets its products in more than 100 countries, sales were up by 15% in local currencies, but conversion to dollars reduced contribu-

Toy safety

The Consumer Product Safety Commission, which oversees toy safety, reported 118,000 toy-related injuries in 1983. In the 1977, the first year the commission kept records, 146,000 injuries were reported.

tions by $69 million compared with the prior year.

Advertising expenditures climbed to an estimated $163.5 million, as Richardson-Vicks supported four new product launches during the past year. The company also sold Lavoris brand of mouthwash to Jeffrey Martin Inc. of Union, N.J., for a reported $8.5 million in cash during the first quarter fiscal 1985. Advertising had all but stopped on Lavoris.

Lavoris holds an estimated 2% share of the $430 million mouthwash category, which corresponds to the selling price of the brand. The category is led by Warner-Lambert's Listerine, with a 32% share of the market. Richardson-Vicks also sold in March, 1985, its two-year-old line of Plus line of vitamin and mineral supplements to Faraday Laboratories of Hillside, N.J., for an undisclosed price.

Another divestiture was the company's sale of its Pea-Beu insecticide business in Australia to an Australian company, Reckitt & Colman Pty. Ltd.

At the same time, Richardson-Vicks acquired two Italian products. Keramine H, a line of haircare products based on a patented process for manufacturing hydrolyzed keratin, was bought in January, 1985, from Hanorah Italiana, a leading Milan-based cosmetics and toiletries manufacturer. And Pierrel S.p.a., a pharmaceutical manufacturer in Italy, sold its toothpaste to Richardson-Vicks' consumer products division in June, 1985.

Oil of Olay, Richardson-Vicks' facial moisturizer for the mass market, continues to dominate that segment with around $100 million in sales. Measured spending continued high, as Richardson-Vicks outspent the competition, devoting nearly $25 million in measured spending to the product last year.

By contrast, Noxell, with a 15.6% share of market, with its Noxzema brand, and American Home Products' Youth Guard, reportedly spent $10 million each on their facial moisturizer products.

Oil of Olay has been joined by two line extensions, both facial cleansing products. Olay Beauty Bar, introduced in 1983, is estimated to have recorded a mediocre $5 million to $6 million in sales. Olay Beauty Cleanser, targeted to the mass market non-bar user, was supported by a $10 million campaign in its launch early this year. Young & Rubicam handles Oil of Olay.

Facial cleansing is one of two growth categories Richardson-Vicks has entered.

The second is men's skincare, a category in its infancy, but which by various accounts is growing. Saxon lotion for men, an aftershave conditioner launched in 1983, was joined by Golden Musk fragrance line extension. Saxon sales have not been exuberant, and this year's $680,000 measured spending advertising budget represented a significant drop in support to about one-fourth of last year's $3 million budget.

Clearasil, a name long associated with teen skincare, is extending its base to the 20-34 young adult market, as this country's teen population declines. The Latin American and Asian markets, however, continue to provide Clearasil with a growing teen audience. Clearasil adult care acne medicine entered the $140 million-plus, acne-remedy market last fall. Clearasil was edged out in the battle for market leader by Revlon's OXY 5. Market share for both is in the low 20% range. Noxell's Acne 12 trails with a 6.3% share.

Richarson-Vicks' activity in the $750 million cold remedy market was augmented by a line extension, and a reformulation, in hope of strengthening its well-known Vicks line against the onslaught of new products that continue to enter the segment.

Richardson-Vicks holds an estimated 20% share of the $300 million cough syrup market, mainly because of its Vicks Formula 44 line, in which Vicks Formula 44 remains the individual top-selling brand, company officials say.

Throughout the first half of fiscal 1984, company officials reported a 14% unit sales growth for the line, with strongest performance in supermarkets. Because each product in the line provides the maximum allowable level of cough suppressant, the advertising stresses the products' "adult" strength with the theme, the "Adult formulas for the coughs adults get with the strength adults need."

For the first time, the entire line is featured in the campaign, which reached its highest level of spending in the category's history.

The Vicks Formula 44 line got more than $8.5 million in measured support in 1984, up 42%. Most of it was in network tv. An improved version was introduced last year. Formula 44 has been on the market since 1958.

However, the October, 1984, launch of Vicks Formula 44 M was the first addition to the line since 1973. Riding on the Vicks Formula 44 name, and appearing at the start of the cough and cold season, Vicks Formula 44 M is performing unusually well as a product that combines a cough suppressant with an expectorant, nasal decongestant and an analgesic.

While Formula 44 profits from its adult skew, the Cremacoat line, launched in fiscal 1984 with pharmacy-exclusive distribution, is positioned as a whole family line.

Advertising is directed to physicians and pharmacists via professional journals and patient samples to establish Cremacoat as a professionally recommended, pharmacy-only product.

During the past year, Richardson-Vicks filed four investigative new drug applications with the Food & Drug Administration in the cough/cold analgesic areas.

Although sales for the Vidal Sassoon line of haircare products lagged, advertising and promotional expenses were increased, with measured media support climbing to $21.2 million in 1984, up 49.3%.

Richardson-Vicas attributes the lag in sales to an adjustment in inventory trade levels.

Two new product introductions were a factor in the boost in advertising spending.

Breaking into a booming new category were Vidal Sassoon's styling mousse and gel products, which were introduced in March, 1984, and which already have added $175 million in retail sales to the segment in just over a year. In a category in which more than a dozen new entrants in one year were jockeying for position, Vidal Sassoon mousse established itself in the top three, reportedly along with earlier arrival L'Oreal (Cosmair) and Alberto (Alberto-Culver Corp.) mousse products.

Company officials claim the Vidal Sassoon gel product has taken the lead in mass outlet distribution. The $450 million hair spray category has grown faster than most other hair segments, mainly because of the mousse and gel entries in the market. Surprisingly, company officials report there has been no cannibalization of the Vidal Sassoon hair spray since the introduction of the mousse and gel. They point to research that demonstrates that most women use hair spray in combination with a mousse or gel.

Vidal Sassoon mousse and gel are the first products in a planned line of other styling products yet to appear on the market, all of which are designed to satisfy women's broad range of styling needs. Included in the future intro lineup are a sculpting gel for achieving a "wet look," a body glaze for fullness and shine, and a "style fix" product for avant-garde hairstyles. With so many new products planned, and a recognizable name established, Vidal Sassoon's advertising efforts aim for a total line, rather than a single-product approach.

Richardson-Vicks' second major haircare line, Pantene, which is skewed toward a more upscale audience, also launched mousse and gel products last year, in October.

The Pantene products were the first to reach department store counters, where company officials claim they have established the lead, with their pro-vitamin and sunscreen products for the hair.

Measured spending on Pantene, basically print in nature, almost doubled to $1.5 million in 1984 from $759,300 in 1983. This fiscal year, Pantene introduced its Sunbrella line of mousse and hair sprays, which offer higher levels of sunscreen for summertime use.

Mill Creek, Richardson-Vicks' natural products business, also added a line of suncare products, for distribution in health food outlets.

Richardson-Vicks' homecare products segment had a difficult year despite the lead position of its Formby's line in the refinishing market. Company officials blame the lower sales on the declining number of home refinishing activities.

Baker Instruments Corp. will be marketing a line of monoclonal antibody-based diagnostic kits for use in physicians' offices, and by hospitals and laboratories.

One such kit is Confidot, in which testing can be performed as early as 10 days after pregnancy has occurred. Results are available within minutes.

R-V in 1984 helped establish a Center for Alternatives to Animal Testing at Johns Hopkins University to examine alternatives to the use of animals in product testing.

U.S.NEWS

Sara Lee's 16% sales increase looks good compared to the food industry as a whole, which has been growing about 2% annually in sales.

In the view of analyst Laurie Lively of Oppenheimer & Co., New York, "Sara Lee is well known for its strengths in unit volume growth. They're [Sara Lee] going where markets are growing—unlike the breakfast cereal market which has just 3% to 4% growth. Sara Lee is less willing to sacrifice earnings to advertising." Ms. Lively estimates that food earnings in general are going up 17% for 1985.

Those growth markets are in areas like meats, in which sales are 70% of the revenue in the big consumer foods segment of Sara Lee, specialty food products, baked goods and intimate apparel. Ad spending reflected developments in those markets. Spending for meat brands was up 66%, to $9.4 million. Hanes men's underwear line measured advertising rose 68%, to $9.95 million, and its women's hosiery/pantyhose lines, with L'eggs, rose 35% to $36.3 million while the Hanes brand, grew 29% to $28.1 million.

Ad spending also ballooned in promotions of specific new products such as Popsicle Industries' OREO Cookies n' Cream line of ice cream sticks, sandwiches, and half gallons ($3.5 million).

In spite of its success, Sara Lee recently seemed to face an identity crisis as acquisitions pulled in more and more nonfood companies. A study in the investment community found that only 22% of those polled knew what Consolidated Foods did. After testing for a new name, Sara Lee Corp. was agreed upon by shareholders in April, 1985. The Sara Lee name itself came from an acquisition, Kitchens of Sara Lee, named for the daughter of the Kitchen's founder, Charles Lubin.

Company chairman-ceo, John Bryan, is said to oppose maxi-acquisitions that may load the company with big debt and unknown factors. He largely advocates growth from within.

But he has engineered a number of acquisitions and divestitures in 1984 and so far in 1985. The major acquisition was made in October, 1984, when Sara Lee acquired all of Melbourne, Australia-based Nicholas Kiwi Ltd.'s outside of Australia and about 15% of the Australian business for an estimated U.S. $300 million. The Sara Lee portion accounts for 75% to 80% of Kiwi's annual sales of $287 million and earnings of $26 million.

Kiwi's well-known Kiwi, Cavalier, Saver, and other shoe care brands account for nearly $100 million in sales. The rest comes from a varied line of personal care and household products including Bloo toilet bowl scrubber, Miracle White laundry detergent, Ambi skin care products for black consumers, and Wood Preen floor and furniture polish.

In July, 1985, Sara Lee acquired Coach Leatherware, a New York-based maker of high-quality leather handbags and accessories.

Among divestitures included the sale, in April, 1984, of C&C Cola, which had not performed as hoped, and in June, 1985, the divestiture of Idaho Frozen Foods, Twin Falls, Ida., to potato processor, Universal Foods. The same month, Sara Lee sold service merchandiser Sav-A-Stop, Jacksonville, Fla., to ZF Corp., because of disappointing performance. And Sara Lee sold its 670 Lawson's convenience stores in the mid-East to Dairy Mart Convenience Stores Inc. of Enfield, Conn., and is phasing out Sara Lee Ice Cream, produced in the 1970s, discontinued, then reintroduced in 1982.

Sara Lee's biggest operating segment, consumer foods, had fiscal 1985 sales of $2.62 billion, up 38.2% from 1983. Operating income was up 21%, to $149.8 million. Within the segment, unit volume of frozen baked goods, including Kitchens of Sara Lee and Chef Pierre Lloyd J. Harriss pies, was up 9%. Biggest new product items for Kitchens of Sara Lee, which now markets 80 products, are its 11 varieties of frozen croissants and five flavors of Bagel Time Bagels. Ad spending for Sara Lee brand was down slightly, 2%, to $5.6 million from a year earlier. Expenditures for Chef Pierre and Harriss were up about 7%, to $536,600.

Eric Larson, securities analyst with PaineWebber, New York, says, "The bakery business, especially fresh baked goods, is another growth business, and doing well. General Foods understood this in acquiring Entenmann's. Sara Lee gets good shelf space for its fresh and frozen croissants, for main meals, and hors d'oeuvres."

In specialty meats, unit volume was up 11%. This is a food line in which Sara Lee uses a different approach than that of other meat companies, says Mr. Larson. "Sara Lee looks at it on a regional basis. John Bryan has a meat background . . . He's 'beefing' that area up—adding through acquisition—and knowing consumer tastes are different, region by region."

Perhaps the one exception to its regionalization is its Jimmy Dean brand, the largest U.S. brand of fresh sausage and, with some of the other sausage lines, has made Sara Lee the nation's biggest producer of fresh sausage. This fall Jimmy Dean is introducing Steak & Biscuit packs and Chicken & Biscuit packs in the Southeast and Southwest and also a line of Jimmy Dean Party Link cocktail sausages in major metro areas. In 1986, the Jimmy Dean line will hit New York City.

Biggest advertising spending for the meat companies was for Hillshire Farm, New London, Wis., and Cincinnati, up 62% to $5.6 million.

Other big spending in the food group was for Popsicle's OREO Cookies 'n Cream and for Chocolaty PayDay, which debuted in December with spending of $1.1 million that month. The new product came from Hollywood Brands, Centralia, Ill., which also produces regular PayDay, Milk Shake, Butternut, and Zero candy bars, but until now with little ad backing, according to Hollywood's vp-marketing Bob Gulovsen. Hollywood Brands has just started consumer marketing to augment sales which have more than doubled in the past two years.

In the beverages segment, sales rose less than 1%, to $1.45 billion, although operating income rose 13%, to $54.9 million in 1984. Holland-based Douwe Egberts, marketer of coffee, tea, and tobacco products in Western Europe, had a sharp rise in operating income, helping the figures in the beverage segment.

Measured advertising for the Shasta beverage line, with annual sales estimated at $400 million, was off 17% in 1984, to $10.2 million. One big drop within the line was a 48% decrease in backing for Capri Sun Natural Fruit Drink, to $2.9 million. At the same time, support for the Shasta diet soft drink line more than tripled, rising to $3 million.

Capri Sun's market share has fallen to 29% of product volume since it introduced Capri Sun and its German-developed aseptic carton packaging to the U.S. in 1979. Coca-Cola's Hi-C has grown to 25% of market, Del Monte's Hawaiian Punch, 17%, and Ocean Spray, 10%.

Shasta, based in Hayward, Cal., reformulated its entire diet line of 18 flavors with aspartame sweetener. The top six flavors are 100% aspartame, and the others are sweetened with an aspartame-saccharin blend. The company is test marketing Spree All-Natural soft drink, now with seven flavors, in northern California, Ohio and Florida. New flavors for Capri Sun are Wild Cherry and Red Berry.

PaineWebber analyst Mr. Larson questions the Shasta product line. "It's too small to compete with the major soft drink producers . . . Sara Lee wanted to go for all-natural drinks to try for a bigger part of the market—if only 3%—but the big pop companies fought back."

The consumer personal products segment had a sales increase of 13%, to $1.64 billion. Operating income rose

Surprise,
Surpr!se...

**At Don Jagoda Associates,
the extras are a pleasant surprise.**

In the wonderful world of promotion, where the lure of something for nothing rules supreme, some promotion planners do nothing about some things that need doing, because they're "not in the agreement." Taking care of such extras is one of the professional hallmarks of Don Jagoda Associates.

Extra creative. Turning a deluxe trip to London into one guided by a great-great-grandson of Charles Dickens himself to make a "Dickens of a Christmas" sweepstakes extra memorable. Not contracted for. Added because we could, and we cared.

Extra care. Winners in an international Sweepstakes/Premium program received their gifts wrapped carefully with a big ribbon attached—"Reaction great—response terrific." We turned prizes into presents.

Extra attention to detail. Why should you pay for several P.O. Box rental cycles, when for a slight fee, we can reserve them in advance for the exact time required and save you money? Just a detail. No big deal. But multiply by 100 details and it becomes important.

Extra dedication. Filling, in one night, 640 4-foot and 6-foot Christmas stockings with Ideal toys and shipping them to supermarkets that same night, to meet Christmas deadlines. Our staff caught the spirit. And delivered.

Extra professional. We control all of our own facilities: creative, administrative, legal, prizes, verification, reporting and fulfillment. We do it all to be sure there are no "shortcuts." We stay in control every step of the way.

Extra. Extra effort on our part, not extra cost on yours.

Here are "extra" ways for you to become acquainted with Don Jagoda Associates:

- Sweepstakes
- Contests
- Games
- Refunds/Rebates
- Premiums
- Incentive Programs
- Club Management
- Fulfillment

Why don't you call us. We're extra friendly, too.

19%, to $137.9 million for the year. Nicholas Kiwi was credited with part of this rise, along with the hosiery companies, L'eggs and Hanes, and the knitwear units, Hanes Knitwear and Hanes Printables, which made 7% gains in unit volume.

Ad backing for the Aris Isotonor line of men's and women's gloves and women's slippers and knitwear increased 47%, to $7.9 million. Aris, New York City, plans another $7 million year in 1985 in both print and network tv.

Isotonor is introducing Stain Guard water-and-stain resistant leather gloves, said to be a first on the market, and new light-weight Isotonor gloves for women.

Bali Co., New York introduced new Bali brand Neo Classic bras and panties in "male look" dark fabrics; a line of A-OK A-cup bras to give the small-breasted woman new stylish materials and designs; Ce Soir European styled bras and panties with the sheer European look and Something Else panties in light-control materials—all to be merchandised at a self-contained in-store environment called the "island of Bali."

Spending for the intimate apparel line was down 10% for 1984, falling to $2.3 million. Bali has its problems according to Laurie Lively of Oppenheimer, who believes a reason for lower profits at Bali may be that management was not reacting to changes in style and taste.

"So Sara Lee replaced Bali management. And they had inventory problems. The women's lingerie business must be fashion-oriented," Lively says.

The 29% increase to $28.1 million in 1984 spending for the Hanes hosiery and pantyhose line reflects the vitality of that line which is offering seven new products for the summer and fall. Hanes Hosiery, Inc., Winston Salem, N.C., announced Fitting Pretty brand, a full-line brand of panty hose for hard-to-fit women and a line extension called Hanes Alive Light Support pantyhose. Also announced were Hanes Light Tights, a line extension that is a lightweight tight; Silk Reflections, a spandex sheer style; Papillon Brand, a full-line premium-priced flanker designed to compete with Evan Picone, Christian Dior, etc.; Summeralls, a summerweight panty top; and Isotonor Brand, a new full-line spandex panty hose made of three different deniers of spandex.

New from Hanes Knitwear, Winston Salem, the second biggest men's underwear maker, are a new men's fashion underwear program, "Bill Blass for Hanes," and the ShowToons series of cartoon-decorated underwear for girls, duplicating a style started for boys.

Ad spending for the ShowToons grew 9% in 1984, to $853,700. The spending increase of 68% for the men's lines was the heaviest of all Sara Lee products.

While Hanes spread its 1984 ad spending of $28.1 million for women's hosiery products across both print and electronic media, L'eggs went almost entirely to magazines with its purse of $36.3 million.

Capitalizing on the fitness boom, L'eggs will now mass merchandise tights for its little plastic egg packages. Also, there will be three line extensions—Just My Size Silky Sheer, Just My Size Regular in fashion dark colors, and Just My Size Winter wear. Rollouts for these products will be this fall.

Consumer direct sales passed the $1 billion mark for that segment in 1984, boosting revenues 8%, to $1.04 billion and operating income 6%, to $91.1 million.

Sara Lee attributes the performance to good results from Fuller Brush, the direct marketing division which offers mail order sales mainly of L'eggs irregulars and white hosiery for nurses; and the Electrolux Corp., the largest division of this segment, up 9% for the year in volume sales of its vacuum cleaners and other floor-care equipment.

The ball's right on par

Through its Titleist line of golf balls, American Brands served up 87 million balls to linksmen in 1984. The Titleist 384 Tour, introduced in 1983, is the most-played ball of golf professionals on the PGA Tour, while Pinnacle, a two-piece construction ball manufactured under the Titleist banner, is one of the most-played balls in the country by amateurs.

Schering-Plough Corp. was the country's 52th largest advertiser with estimated total advertising expenditures of $144.3 million, or 22.3% higher than 1983 expenditures.

The Madison, N.J.-based company had U.S. sales of $1.08 billion, up 9.2%, and U.S. operating income of $237.9 million, up 10.9%. In the U.S., measured media expenditures decreased slightly in 1984, down 0.1% to $69.3 million. Worldwide sales were $1.87 billion, up 3.4%, and operating income from continuing operatins was $177.2 million, down 1%.

Pharmaceuticals, Schering-Plough's main business segment, recorded $1.06 billion in sales, up 6.1%, as domestic pharmaceuticals propped up the division with sales of $536 million, up 13%. Foreign pharmaceutical sales declined 0.5% to $520.8 million, a figure affected by foreign currency conversions.

Schering-Plough's major business line outside of research-based human pharmaceuticals is its personal and healthcare products sector—a consumer products-oriented sector that had 1984 sales of $817.5 million, an increase of less than 1% from 1983. International consumer sales dropped 7%, or $22.1 million, while over-all proprietary product sales were generally slow partly because of lower sales of laxative products and the St. Joseph brand of aspirin products. Domestic sales rose 5%, which the company attributed to the success of its Maybelline cosmetics line, including new product launches.

Company returns did not quicken much in the first quarter of 1985. Sales and earnings rose slightly to $487 million and $54.1 million, respectively, versus $486.5 million and $53.3 million for the first quarter the previous year.

Schering-Plough completed its broadcasting divestiture activity last year by selling its radio operations, which netted the company $53.9 million. Capital expansion totaled $140 million in 1984 and included the construction of an interferon plant in Ireland, a pharmaceutical development facility in Kenilworth, N.J., and the completion of new headquarters in Madison, N.J.

In the consumer segment, sales for the Maybelline line rose 14%, to an estimated $231 million. Maybelline is the market leader in the mass-marketed cosmetics category. Aided by the 1984 introduction of new products such as Expert Touch makeup implements and the largest advertising budget in Maybelline history, Schering told women around the country they could "be at their best with Maybelline," through a Bloom Agency of Dallas-inspired campaign. Joining the Expert Touch line of facial brushes and makeup tools in bolstering Maybelline's sales were the Long Wearing line of lipsticks and foundation makeup and the Shine Free Oil Control line of makeup.

All in all, Maybelline received close to $34 million in measured advertising support, a 13.7% increase over 1983 levels. The Maybelline spending represented 49% of total measured advertising of $69.3 million. The Moisture

How much did your competitor spend on full-color magazine ads this quarter, last quarter, last year?

Turn to LNA for answers.
See page 101

Whip line got a slight boost in advertising, totaling slightly more than $7 million. By contrast, Shine Free cosmetics received only $811,600 in measured media support, according to six-media figures monitored by Leading National Advertisers, which reflected a slight gain in budget.

The line receiving the highest support as a single type of product was Maybelline's mascaras, which had $10.3 million in support, closely paralleling last year's expenditures. Other eye products, excluding the Shine Free line versions, got $7.2 million in spending.

Schering-Plough suncare products experienced slow growth because of inclement weather last year, but analysts say the market has improved this year. Coppertone suncare products maintained their dominant market position, aided by a $4.4 million measured media budget. Solarcaine was aided by a line extension, an aloe version.

Late last year, Schering-Plough brought its sun products full circle with the launch of Shade, a line of sunscreen products which it armed with a $5 million advertising budget. Positioned against Johnson & Johnson's Sundown sunscreens in a segment growing at 20% annually, Shade received $1.5 million in measured support and earned a 3% and 5% share of the suncare product universe, a strong showing for a new product, says Kidder Peabody analyst Arnold Snider III.

The Coppertone name has been licensed for a line of fashion sunglasses that protect against ultraviolet light. Schering-Plough acquired its own license for use of the popular Ocean Pacific brand name to grace a new line of sun products to be sold exclusively in certain coastal areas, poolside and beachfront outlets.

The Paas line of children's Easter products was expanded to Halloween faces with Paas halloween makeup kits. Following favorable reception, Paas has plans to tackle other holidays. Its Easter product line garnered a 60% share of that market in 1984.

In another area, Schering-Plough in 1985 placed warning labels on bottles of St. Joseph aspirin for children warning of the aspirin-Reye's syndrome link.

Laxative sales declined, though Schering-Plough has introduced the first fiber laxative containing natural grain and fruit fiber under the Correctol brand name in August, 1985.

The Dr. Scholl line of footcare products, which company officials claim exceeds a 90% share in some product areas, saw U.S. sales rise by 10% last year, to $265 million, of which $111 million came from the U.S. market.

Three new products were added to the Dr. Scholl's lineup: A shoe insole scented in microencapsulated timed-release form called Fresh Step; Hidden Comfort half-insoles, which provide discreet foot relief for women to wear with bare toes or heels, and Eliminator, which absorbs foot shock. Dr. Scholl's products, excluding the softening sandal business, received $4.8 million in measured spending, with nearly $3 million supporting last year's launch of Odor Attackers shoe inserts.

Sales at the Wesley-Jessen vision care division leaped 28% in the U.S. Healthy growth was sustained despite industrywide price cuts. Ophthalmic drug sales grew by 16%, but the big news and sales were captured by Wesley-Jessen's introduction of three new types of contact lenses and one improved version.

The DuraSoft line launched two new entries: A new type of extended-wear lens and lenses for astigmatism. Wesley-Jessen also brought to the U.S market its AIRLens gas-permeable lenses that deliver oxygen to the cornea. AIRLens has been selling in Canada for several years. An improved version of DuraSoft 2 bifocal lenses joined the contact lens lineup.

After two years of testing, the Wesley-Jessen division became an advertiser for the first time in 1985. The DuraSoft line of contact lenses and Wesley-Jessen's advertised product line received a $5 million budget to run national tv, radio and magazine advertising throughout the year.

Schering-Plough's pharmaceutical division stepped up its long-term plans to establish a dominant position in recombinant DNA technology, immunology, and to continue its drug discovery program. These include the development of a new anti-insomnia drug, a nonsedating antihistamine and a beta lactum antibiotic.

The division plans to introduce Intron A, its genetically derived alpha-2 interferon product into several markets this year. Intron A is already marketed in Ireland, where an interferon-producing plant is expected to be completed soon, and has been approved for marketing in the Philippines in 1985.

Pharmaceutical companies are in a hot contest to market interferon, a drug used for cancer treatment and even the common cold. Schering-Plough got a jump on the rest in 1984 when Geneva-based Biogen S.A. its interferon licensor, received a generic patent for alpha interferon from the European Patent Office. It still must be approved, however, by regulatory bodies within each country.

However, that patent was challenged by Hoffman-LaRoche, claiming it covered only the "precursor" of the alpha interferon product, not the mature form. Schering-Plough and Hoffman-LaRouche, which markets under the name Roferon A, reached an agreement during the year to sell its interferon free from liability for patent right infringement, worldwide, excluding Japan. The agreement does not affect the administrative proceedings. This marks the first such agreement between pharmaceutical companies in the growing interferon market. In July, Biogen received U.S. patent covering production of recombinant Alpha-2 interferon.

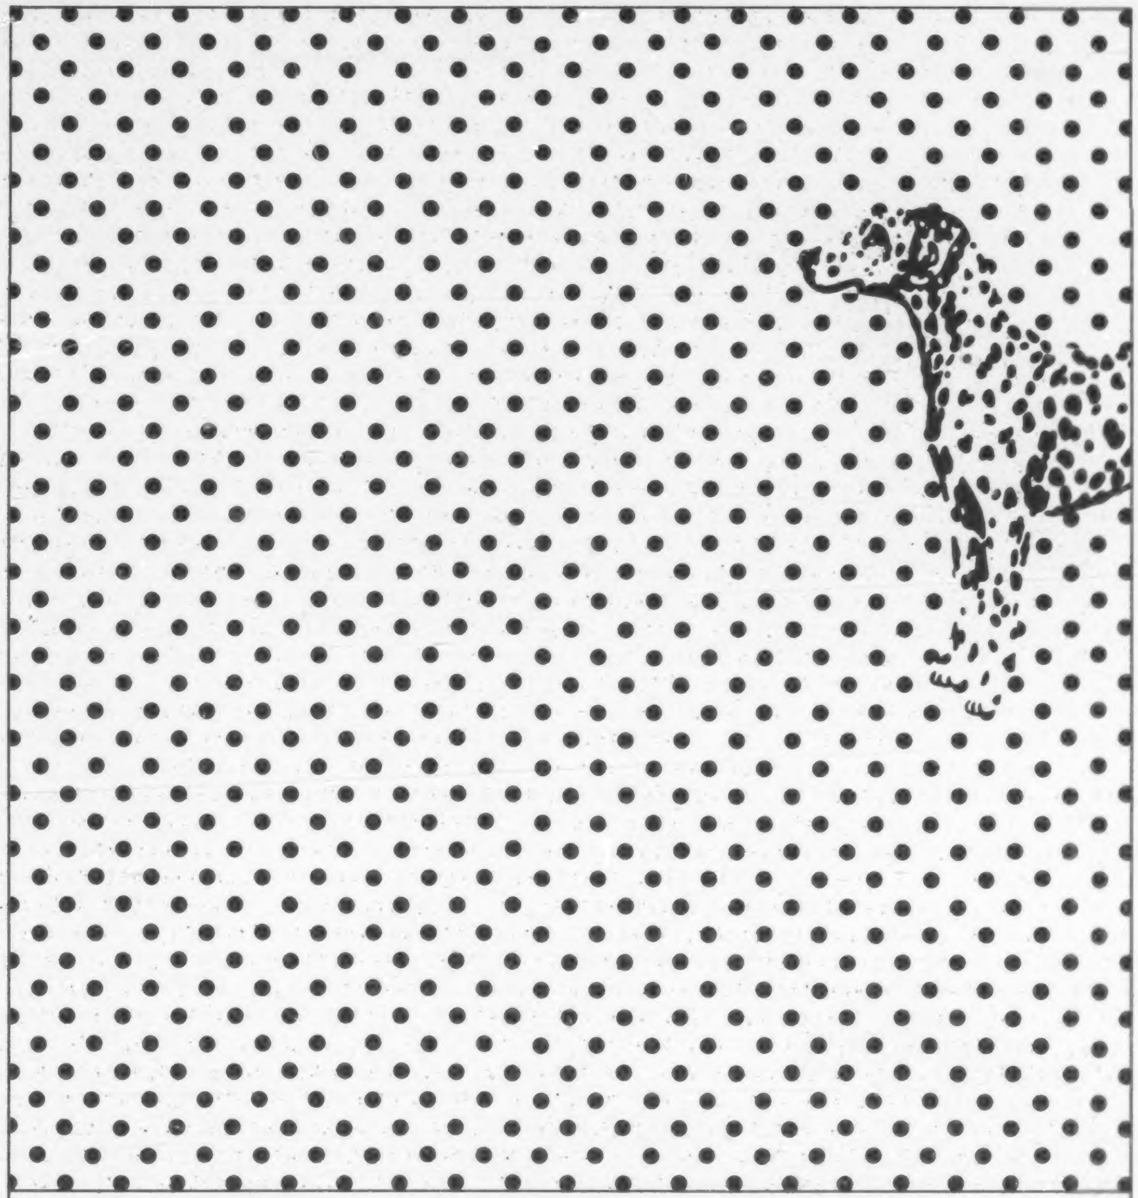
In the U.S., the company took interferon to the Food & Drug Administration, filing new drug applications for four anticancer indications and a preventative treatment for the common cold.

The pharmaceuticals division also is beginning clinical trials of gamma interferon, as part of a biotechnology agreement with the Japanese company Suntory Ltd. However, interferon represents just one chapter in the company's international pharmaceutical activity. Sales gained 14% on the international market over last year in local currencies, but declined by $2.6 million, or slightly less than 1%, in currency conversion.

Quazepam nighttime therapy for insomnia is awaiting U.S. approval late this year or early in 1986. The product has been approved for use in France, the Netherlands, Portugal and South Africa. Eulexin, an oral treatment for prostatic cancer, received approval for marketing in Canada, Chile, Denmark, Portugal and West Germany. Schering-Plough's U.S. pharmaceuticals, which totaled $536 million in sales, exceeded the 1983 figure by $63 million. Over-the-counter products account for 35% of the U.S. pharmaceuticals business.

As a first major step in realizing its goal to expand in the growing cardiovascular market, Normodyne, a prescription anti-hypertensive agent that Schering-Plough officials claim has a superior ability to control and protect cardiac function, was introduced last year. Initial sales of Normodyne exceeded that of any prescription product Schering-Plough has ever launched. Since its introduction last September, through August of this year, $13.7 million worth of Normodyne has been sold. In July alone, 32,000 new prescriptions were filled, while competitor Trandate sold 14,000 prescriptions in the same period. Schering-Plough estimates 1985 sales of Normadyne will approach $15 million and will exceed $50 million per year by 1988.

Normodyne is the Schering-Plough name for labetalol, which is licensed to



Sometimes another look can change the whole picture.

● When you look at the circulation numbers for the two Dallas papers, you may form the wrong image if the information isn't current. Because in an environment that's constantly changing, the picture rarely stays the same. So you need to take another look.

The latest ABC figures show The Dallas Morning News with a commanding lead over the Dallas Times Herald. With more than 127,000 copies daily and over 130,000 on Sunday, The Dallas Morning News gives you more of Dallas. In fact, not only do we lead in total circulation, but we lead in Dallas County as well.* All of which means when you run advertising in The Dallas Morning News, you'll be looking at one thing.

Represented by Cresmer, Woodward, O'Mara & Ormsbee, Inc.; The Leonard Co.; Florida, Mexico, Caribbean; Lenha [illegible]

Schering-Plough by U.K.-based Glaxo. Glaxo also is the producer of the competition, Trandate.

The dermatological products market grew, aided by sales of Lotrisone cream, a combination antifungal/steroid, which was introduced in July, 1984.

In the first eight months of 1985, Lotrisone achieved $7.6 million in sales. This was partially offset, however, by a drop in sales of Schering-Plough's longstanding dermatological product Valisone, which went off-patent in April, 1984.

Tinactin, an antifungal, held a 35% dollar share of the market at the end of the first quarter, 1985, according to the company.

Schering-Plough has plans to expand in the area of inflammatory and allergic disorders.

Its Chlor-Trimeton allergy product maintained a leading position in that category with a 57.9% share of market.

The product underwent an agency change during the year, moving from Ketchum Advertising, New York, to Ogilvy & Mather, New York.

Drixoral, a former prescription product, now is otc. It reported strong growth. Sales rose 21% to 8 million in drug stores, giving it 9.[illegible]% market share.

In management, Donald R. Conklin was promoted to president-Schering U.S., a new position in the company. And a chapter of corporate history closed in 1984 when Abe Plough, founder of Plough Inc., died Sept. 14, 1984, at age 92. He had been Schering-Plough's first board chairman, a post he held from 1971 to 1976.

Sales	1,752	1,639	6.9
Operating profits	37	33	12.1
Advertising	116	120	-3.2

Joseph E. Seagram & Sons, New York, a subsidiary of Seagram Co. Ltd., Montreal, was the 70th largest national advertiser in 1984 with estimated national advertising of $115.8 million, a decrease of 3.2%.

Worldwide sales for fiscal 1985 ended Jan. 31, 1985, for the parent, were $2.8 billion, an increase of 5.7% over 1984 sales of $2.65 billion. Net income rose to $383.6 million, including $141.4 million in dividends received from the company's holding in E.I. du Pont Nemours & Co.

It is this holding in Du Pont that may be as much Seagram's future as its distilled spirits. Seagram, in fact, is setting aside this dividend stream to buy more Du Pont stock, edging its holdings up from 20% in 1981 to the current 22.5%.

As the world's largest producer of distilled spirits and wines, Seagram Ltd. markets some 175 spirits and 300 wines, champagnes, ports and sherries. Like all companies in the field, Seagram has been feeling the lingering effects of the recession, coupled with intense competition for consumers no longer as inclined to drink alcohol as they once were.

The company, like others in the business, is likely to feel a slight tremor this October when the federal excise tax on liquor will be increased 19%, adding about 30¢ to the price of a fifth. The industry estimates the tax could reduce revenues by as much as $74 million—and that decline coming on top of another sluggish year predicted for 1985. The company has re-evaluated its marketing strategy, and this January initiated a sweeping reorganizaton of its U.S. operations. The move eliminated two operating units and roughly 200 sales and marketing people in a move to make Seagram into a leaner marketing entity.

The Seagram reorganization, which took effect Feb. 1, dissolved Calvert Distillers and General Wine & Spirits in favor of two new strategically separate companies, 375 Spirits Co. and Perennial Sales Co. Both Seagram Distillers Co. and Summit Sales unit remained, but with redefined mandates.

"Under the new approach, our sales companies and brands will no longer compete with one another," Mr. Bronfman said at the time the move was announced. "Instead they will be guided by a comprehensive, integrated company-wide marketing strategy."

The plan calls for Seagram Distillers to market those brands carrying the Seagram name—ergo, Seagram gin and imported vodka—as well as other high-volume items: Seagram's V.O. Canadian (Ogilvy & Mather), Crown Royal Canadian, Kessler whisky (Warwick Advertising) Captain Morgan's spiced rum (North Castle Partners) and Leroux cordials (Warwick).

For its part, 375 Spirits, named for the Seagram corporate headquarters located at 375 Park Ave., will market such premium and super-premium products as Chivas Regal scotch (Doyle Dane Bernbach), Glenlivet single malt scotch (Warwick) and Jameson whisky (Doyle Dane Bernbach).

The name of the new unit, Perennial, reflects its product base—those that have been around for a long time, and have steady, loyal followings—such as Calvert Extra and Wolfschmidt vodka, which maintain pockets of strength regionally.

For the first time, the company's new product development will fall outside the domain of the various sales companies, previously responsible for their individual efforts. In addition, the test-marketing function has been transferred to the new products development group.

The allocation of Seagram ad dollars will be affected—in some cases to a large degree—by the restructure, as will brand development activities, as the company is jettisoning a scattershot marketing approach for one targeting support for fewer products.

The move, which eliminated some 200 overlapping sales and marketing positions, resulted in some key top management changes at Seagram. Martin Bart, formerly president of Calvert Distillers, replaced Walter Haimann as president of Seagram Distillers. Mr. Haimann has since retired from the company.

Seagram has made news this year in other ways. In March, the company approached the three tv networks with a proposal to go on the airwaves with a Warwick Advertising-created ad campaign equating the alcohol content of a typical serving of beer, wine and alcohol. All three networks declined to run the advertising on the grounds that it violated their policy banning advertising for alcohol on the airwaves.

Seagram was not amused and in early April commenced a 90-day, $5 million print campaign in 75 major metropolitan areas chastising the networks for their decision. Daily newspapers and newsweeklies bore the ads.

Headlined "It's time America knew the facts about drinking," the campaign asserted that "It's time ABC, CBS and NBC let the facts be heard." As in the equivalency ads rejected by the networks, copy and visuals stressed that "12 ozs. of beer, 5 ozs. of wine and 1.25 ozs. of liquor all have the same alcohol content."

In addition, the distiller filed a formal complaint with the Federal Communications Commission accusing the networks of violating the Fairness Doctrine, which requires them to present all valid viewpoints on controversial issues. Although the networks have continued to stalemate Seagram's attempts to broadcast its equivalency campaign, the company's vocal activities have positioned it as a catalyst in reversing negative public opinion vis-a-vis alcohol.

According to the 1984 "*Impact* American Distilled Spirits Market Review and Forecast," Seagram last year was the leading distilled spirits advertiser in the U.S., despite the fact that the company has slashed its advertising dramatically over the past two to three years. Seagram's financial commitment is more than twice that of the No. 2 marketer, Hiram Walker Resources.

Seagram's cut in advertising has clearly hurt magazines the most. In 1984, spending in the medium dropped 16.9% to $37.9 million. Among those budgets cut most sharply was Seagram's V.O., down 19% to $6 million. In 1984, magazine advertising for V.O. was 62% of its budget compared with 84% of its budget in 1983. Although maintaining the No. 8 position among distilled spirits in the U.S., V.O. declined slightly to 3.3 million case depletions in 1984.

By the same token, Seagram's gin, the No. 9 U.S. brand, declined from 3.4 million to 3.3 million case depletions. Recently, the company has started a new campaigned themed "Everything they say is true" for Seagram's gin, via newly selected agency Mingo Jones.

With 5.4 million case depletions, Seagram's 7 Crown is the No. 3 largest U.S. selling spirit brand, and the No. 1 whisky. No. 1 regardless of liquor type is Bacardi Imports' Bacardi rum, and No. 2 is Heublein's Smirnoff vodka.

Both of the top two brands, however, have suffered sales declines in the past two years. Seagram's 7 Crown, however, suffers more sales erosion than most of heavy hitters. In 1984, it had a 4% decline in depletions to 5.2 million from 1983, according to "*Impact.*"

Measured advertising for the brand, according to the six-media monitored by Leading National Advertisers, was $6.4 million in 1984, a drop of 6%.

In 1984, Seagram's major new spirits introduction was Royal Paisley scotch, which the company is positioning as a lower-price alternative with a a premium cachet. Although costing $11 per bottle—about the price of J&B, Johnnie Walker Red, Cutty Sark and Dewar's White Label—Royal Paisley borrows heavily from the high-brow aura of Chivas Regal, Seagram's ultra premium entry that is the fifth best selling scotch in the U.S.

Seagram is now reaping the benefits of its 1983 purchase of the Wine Spectrum from Coca-Cola. In the deal, Seagram acquired the popular Taylor California Cellars line, the Taylor New York State brands and the California wineries of Sterling Vineyards and Monterey Vineyards. The sale, which immediately made Seagram the No. 2 wine producer behind E. & J. Gallo, also gave the company adrenalin via growth oriented brands.

In fact, earlier this year, Seagram Wine Co. introduced a line of blush wines under the Taylor name, a move the company feels will give it pioneering momentum in the blush wine category, which to date has been limited to more expensive varietals.

Although California currently accounts for some 85% to 90% of U.S. wine sales, the over-all performance of California wines—like those of the market in general—has been sluggish. For one thing, the wine boom as a hot consumer trend ended in the 1970s; for another, California has produced two bumper crops since 1980.

But there is good news. Wine coolers have emerged as the hottest thing since the white wine spritzer, and over the last year, Seagram has entered the market with Seagram Wine Coolers, backed by heavy ad spending and a campaign that positions the drink as perfect for outdoorsy, young and on-the-go consumers.

Seagram's allocated many of their other wine products larger ad budgets: B&G Imported, $1.5 million; Black Tower Wine, $3 million; California Cellars, $8.6 million; Great Western, $1.2 million; Partager Wine, $1.5 million, and Paul Masson, $6.8 million.

When You Think Hispanic ... Think
FINDINGS INTERNATIONAL CORP.

Too often survey research is poorly implemented and executed. **Findings** understands the dangers inherent in poor quality research. This **understanding** derives from the fact that not only are we Hispanic but have the ability to communicate in the Hispanic "jerigonza." This **ability** is not only limited to the fact that we speak the same language but includes the understanding of their behavioral patterns, idiosincracies and motivating factors, thus enabling us to "translate" the Hispanic reaction to a form understandable to the manufacturer/advertiser for use in future strategic plans. We are not just Hispanic research specialists, **we are research specialists.**

DATABASE MARKETING...
A New Approach to Corporate Profits.

It's on the forefront of today's business revolution. Everyone's talking about it, but not everyone understands it.

What does database marketing really mean? How does it work? What benefits does it bring? Who's using it, when — and why? And if you need it, where do you go to get the job done right?

Truly effective database marketing is a complex process. But the reasons for its emergence as one of today's most effective marketing tools are very simple.

A Direct Response To Business Change

Database marketing was developed in response to fundamental changes in the business world.

Customer bases expanded to the point of unmanageability. Competition became stiffer — markets more resistant. And the need for closer cost-accounting became increasingly more apparent.

Then came the computer age.

Suddenly, marketing techniques that were adequate in the past no longer sufficed for companies operating in a more complex and competitive business environment.

Enter database marketing. A perfect marriage of sophisticated database technology and modern direct marketing techniques.

It Takes The Guesswork Out Of Marketing

Now, with database marketing available, older marketing techniques that relied on intuition are fast becoming obsolete. Today it's no longer necessary to commit a major portion of the marketing budget to a campaign designed by hunch (and pray the campaign was inspired).

With database marketing, companies are effectively:
- Segmenting market audiences to identify their most profitable customers and best prospects;
- Testing many marketing and advertising ideas to determine which work best before committing their marketing budgets to full-scale campaigns;
- Communicating with their market in a highly-personal way. A way that builds longer-term, more valuable customer relationships;
- And measuring campaign results scientifically, with the intention of improving marketing strategy and advertising tactics in the future.

What Can Database Marketing Do For You?

Nearly all companies could use database marketing. Some really shouldn't be without it. Typically they're companies with large computerized lists of customers and prospects who sell products that generate repeat purchases.

If your business fits that general definition, you can take full advantage of database marketing's many important benefits.

Pan Am did. Its frequent flier program is one of the best examples of what an integrated database marketing program can do.

By tracking the mileage and purchases of its best customers — and rewarding those customers with discounts and free tickets — Pan Am has built brand loyalty worth many millions of dollars each year.

Information gathered from customer records and market research lets the airline communicate directly to segments with specific interests (regular fliers to London, skiers, etc.)...and target special promotions to each of them.

With your present knowledge of your company's operation — and a little imagination — you can probably think of some profitable database marketing applications on your own.

But why not leave that to the experts.

Where Do You Go For The Best?

You'll find everything you'll need at Epsilon...The Database Marketing Company.

Epsilon was specializing in database marketing before the phrase was even coined. Long before it became marketing and advertising's fastest growth area.

For over 15 years, Epsilon has been the leader in merging sophisticated database technology with modern direct response techniques. Defining what database marketing has become — and where it is going.

In the process, we've helped our clients establish ongoing, personal communications with each of their individual customers. (Even when those customers number in the millions).

Epsilon is the only company to offer businesses the right combination of managerial, technical, creative and production services that's essential for truly successful database marketing ...all under one roof.

Epsilon's ability to provide totally-integrated, measurable, database marketing is a very important advantage to our clients. It could be for you too.

So why not join Pan Am, Texas Instruments, Emery Worldwide and over 100 other companies who've discovered the easy answer to the Database Marketing question.

It's easy to do. Just call John Groman, Senior Vice President, at 617-273-0250. Or mail the reply form below and we'll rush you a copy of our Database Marketing Kit.

Sears, Roebuck & Co., Chicago, the nation's largest retailer, ranked No. 3 among national advertisers, increasing U.S. ad spending 2.9% in 1984, to a total estimated $746.9 million.

The figure does not include the cost of producing its annual catalog.

Worldwide, Sears spent $925.1 million, compared with $898.8 million in 1983, according to the company, which places Sears No. 2 in worldwide spending among U.S. companies behind P&G's estimated $1.09 billion. Sears generates 89% of its sales in the U.S., while 77% of P&G's sales are domestic.

Sears, the company where "there is more for your life," services 40 million customers in its five operating units: Sears Merchandise Group, Chicago, which operates 796 retail department stores and 1,119 catalog outlets in the U.S.; Allstate Insurance Group, Northbrook, Ill., which sells property-liability, life and commercial insurance; Coldwell Banker Real Estate Group, Los Angeles, a nationwide real estate company; Dean Witter Financial Services Group, New York, a stock brokerage and consumer deposit and lending operation, and Sears World Trade, a Chicago-based, import-export consultancy.

Allstate, Coldwell Banker and Dean Witter together operate as the Sears Financial Network in 300 Sears retail stores.

Revenues for the company increased 8.2% to $38.8 billion in 1984. Net income rose 8.4%, to $1.46 billion, though operating income dropped 12.1%, to $1.55 billion.

A slowing economy and a highly competitive marketplace slowed Sears' growth in the first half of 1985. While revenues climbed 4.5% to $18.6 billion, net income fell 14.2% to $488.8 million.

The Sears Merchandise Group's retail, credit and international operations in 1984 constitute 68% of the company's total revenues and 62% of its net income, making it by far the largest of Sears, Roebuck & Co.'s units.

The division reported 1984 revenues of $26.5 billion, up 5.7% from 1984, and posted net income of $905 million, a 16% increase from a year earlier. For the first six months of 1985, the merchandise unit reported net income of $214.3 million, a 27% drop, on flat revenues of $11.87 billion vs. $11.86 billion in 1983.

The group in 1984 also accounted for most of the $237.4 million in measured media monitored by Leading National Advertisers. Newspaper display ads, inserts and spot radio are not included in the Leading National Advertiser total. The company says its merchandise group spent $726.2 million in 1934 advertising.

Last November, G. Joseph Reddington was promoted from vp-marketing for Sears Merchandise Group to senior vp-administration and planning. Succeeding Mr. Reddington as vp-marketing was Wayne Holsinger, formerly national merchandising manager-apparel.

Other operating units and their respective measured media spending include: Allstate Insurance Group, which posted revenues of nearly $9 billion, up 11% from 1983, and net income of $661 million, up 19% from a year earlier. Allstate spent $29.2 million in national measured media, up 14%.

The Coldwell Banker Real Estate Group generated $826 million in revenues, a 17% increase over 1983, and earned net income of $76 million, a 58% jump over 1983, when the division reported an 8.7% decline. The real estate unit spent $3.2 million in measured media, up 44% from $2.2 million.

Dean Witter Financial Services Group posted 1984 revenues of $2.5 billion, up 18%, while the division posted a net loss of $33 million, compared with a year-earlier gain of $100 million. The company attributed the loss to an "unfavorable securities market environment." The unit spent $7.3 million on measured advertising in 1984, a 3% decline from 1983.

Sears World Trade, completing its second full year of operation in 1984, posted $189 million in revenues, a 139% increase, but increased its net loss to $25 million from $12 million in 1983.

Perhaps the most significant of Sears' activities so far in 1985 has been the debut of its long-awaited Discover credit card, which the company believes will compete with MasterCard, Visa and other financial-service credit cards. Discover, to be issued by Sears' Greenwood Trust Co. in Delaware, will be operated by the Dean Witter group.

Discover will be offered with a low annual fee, though interest will be charged as is the case with bank credit cards.

The card will grant Sears customers access to automated teller machines, enable them to deposit checks by mail, and provide access to money-market and brokerage accounts. It also will be accepted at Sears stores (along with the original Sears credit card) and at merchants nationwide.

So far, companies including American Airlines, Budget Rent-a-Car, Denny's restaurants, Hilton Hotels, Holiday Inns and Hospital Corp. of America and Pizza Hut have agreed to honor the card, which entered test market this fall in Atlanta and San Diego. National rollout in the spring is expected. J. Walter Thompson USA, Chicago, handles the estimated $20 million advertising budget for Discover. (Nearly 63 million original Sears cards are outstanding, with about 28 million in active use.)

Other recent developments include two tests by Sears of smaller, specialty-store formats in markets with populations of less than 100,000. The first test store, opened Feb. 1, 1985, in Alma, Mich., is an 8,300-sq.-ft. unit containing hardware, paint, appliances, electronics and a catalog office. Another such store was opened in Monroe, N.C., and two more are expected in 1985, though the company would not disclose locations. Sears says it will add 50 of the smaller hard-lines stores each year beginning in 1986, through remodeling of existing stores or construction of new ones.

The second test store emphasizes home fashion and apparel in 35,000 sq. ft. The prototype store will open in 1985 at an undisclosed location, and the company hopes to add 15 more per year to its system beginning in 1986.

Both tests seek to improve Sears' position in smaller markets, where it historically has lagged behind rivals J.C. Penney Co. and Montgomery Ward & Co.

Meanwhile, Sears continued its "Store of the Future" retail and marketing concept, with 110 stores added or remodeled at the end of 1984. The company expects to have 206 such stores in operation by yearend 1985, and 600 units at the end of the five-year, $1.7 billion plan.

The company also has more than 100 stand-alone Sears Business Systems centers in operation, selling computer hardware, software and furniture.

Expansion plans initially called for 50 new stores to open in 1985, but growth plans have been scaled back to five new units because of uncertain conditions in the computer industry. Ogilvy & Mather, Chicago, handles advertising for the chain.

The company also has 11 Sears Paint and Hardware Centers, including nine in the Chicago area and one each in New York and New Jersey.

As the "Store of the Future" concept progressed, Sears placed increasing emphasis in 1984 on brand-name merchandise as it sought to distinguish its departments from those of other mass merchandisers. The concept calls for establishing boutique-style, stores-within-a-store. The company has opened or remodeled 155 such stores and expects to operate 206 by the end of 1985.

The merchandise group divides its retail advertising responsibilities into two areas: "Hard goods," including automotive, appliances, electronics and home improvements, handled by Ogilvy & Mather, Chicago, as are the Sears Business Systems centers; "soft goods," including apparel, home furnishings and general merchandise, handled by Needham Harper Worldwide, Chicago. Both agencies use the same tag line—"There's more for your life at Sears"—created by Needham in a "creative shootout" to develop an over-all image campaign. The company itself produces promotion-oriented newspaper display ads and free-standing inserts.

Last year, Sears unveiled a new, modernized logo, and its agencies continued a gradual process of updating tv advertising with a more stylized approach.

In separate developments, Sears continues its 4-year-old test of frozen-food home delivery service in Detroit, a joint venture with American Frozen Foods, Stratford, Conn. In June, 1985, Sears announced plans to test an electronic kiosk service, offering shoppers information about its financial services and selected merchandise. That test is under way in Atlanta, Chicago and San Diego stores.

Sears Financial Network, the combined financial services group, currently operates in 309 Sears stores. Advertising for the umbrella group began two years ago with spokesman Hal Holbrook and is handled by Foote, Cone & Belding, Chicago. The 1984 budget was $27 million.

Allstate continues to broaden its product lines and has added agent incentives to increase new business. It also plans to increase the number of outlets outside of Sears stores and to step up direct-marketing activity.

The Allstate group also publishes two magazines: *Discovery*, for members of Allstate Motor Club, and *Mature Outlook* for those 50 and older. Each offers its readers discounts from Sears' merchandise group and other divisions, as well as coupons from some outside merchants.

Coldwell Banker chairman-ceo C. Wesley Poulson resigned Aug. 29, 1985, to take early retirement. Sears named Arthur J. Hill to the post, pending approval of the board in October. Mr. Hill will move up from chairman-ceo of Homart Development Co., Coldwell Banker's real estate development unit. Coldwell Banker spent an estimated $3.2 million in measured advertising in 1984, up 45.5% from 1983.

Dean Witter, in addition to its Discover card responsibilities, also has broadened the customer base for its securities brokerage service. The unit has placed more emphasis on business development through Sears Financial Network centers located in Sears' retail stores. Its purchase of two banking operations also permits Dean Witter to engage in consumer deposit and lending activity. It hopes also to attract first-time securities investors through customer service and an improved research program.

Greyhound's struggles

Greyhound Corp. began 50 years ago in Minnesota by transporting miners to and from work across the Mesabi Iron Range. Now unemployment is skyhigh at the Mesabi fields in northeast Minnesota, and Phoenix-based Greyhound is paring its workforce because of lower bus ridership and competitive encroachment by smaller operators.

Sterling Drug, New York, the nation's 45th largest national advertiser in 1984 with $166.6 million in spending, suffered sales declines in two of its five operating groups in 1984, including international, and only marginal increases in the other three.

Sales over-all dropped 1% to $1.83 billion, as net income increased 4.8% to $143.0 million.

Of total sales, 38%, or $690.9 million, came from Sterling's international groups, up 1% from 1983 but far short of the 47% contribution in 1980. International sales were down 3% from the 1983 total of $710 million.

Estimated total U.S. advertising in 1983 dropped 3% to $166.6 million. Measured advertising fell to $113.5 million from $115.2 million.

Worldwide advertising and promotion costs were $336.4 million, down 3.4%.

The corporation's proprietary products group, which includes Bayer aspirin, Phillips' Milk of Magnesia, Panadol pain relievers and Diaparene baby products, was the big loser, dropping 8.4% in sales to $273 million, and operating profits declined 34.9% to $26.9 million.

Sales performances mirrored advertising expenditures for two of these products, Bayer and Panadol.

Bayer, which remained No. 2 in the $1.4 billion analgesics market, but with only 8% of the market, dropped in sales. Advertising expenditures also decreased 37.5% to $12 million. One Bayer ad in 1984 was a popup ad in *Woman's Day*. As readers opened the four-page unit in the Feb. 7 magazine, an extra fold of paper popped up, proclaiming "Only Bayer." The ad cost $400,000.

Panadol, on the other hand, grew in sales, aided by the introduction of Panadol products for children. Advertising jumped 67.2% to $20.4 million.

A print media campaign for children's Panadol, developed by SSC&B, claimed the product is the only line of children's liquid fever reducers free of alcohol.

Most children's fever reducers, the ad said, contain at least 7% alcohol. The campaign takes aim at Tylenol, which dominates both adult and children's analgesic markets.

Sterling and other aspirin makers ran into criticism from federal agencies in 1984 over a tv public service spot they sponsored. The Food & Drug Administration called it "misleading" for not pointing out medical authorities' belief that there is a connection between aspirin and Reye's syndrome, a potentially fatal children's disease. The Committee for the Care of Children, funded by Sterling and several other aspirin makers, refused to withdraw the ad, and the FDA sent out its own psas to some 10,000 radio and tv stations.

Sterling backed Stri-Dex medicated pads with $1.3 million, down from $2 million in 1983.

Sterling launched what is expected to be a $2 million ad campaign in baby magazines and on daytime network tv to support a new product, Diaparene Nursery Fresh aerosol room disinfectant. The line also includes baby wash clothes and powder.

Sales in the company's household and personal products group, the Lehn & Fink group, were flat in 1984, increasing only 0.5%, to $481.2 million. The group includes such products as Lysol, Love My Carpet, Mop & Glo, d-Con and Miniwax. Market shares for both Mop & Glo and Perk floor care products improvement in 1984.

Lysol disinfectants were the most heavily advertised Sterling products in 1984, although ad expenditures dropped 2.7% to $32.4 million. Among new Lysol products introduced with national advertising campaigns last year was Lysol Cling toilet bowl cleaner. D-Con insecticide products placed $5.7 million in advertising in 1984, down 24%. An extensive ad campaign was mounted for d-Con Exact, a roach and ant killer with a felt-tip "pen" dispenser.

Little advertising is done for Sterling's pharmaceutical specialties.

Three new Sterling products were approved for marketing by the FDA last year, including a drug for short-term treatment of patients with congestive heart failure.

Sterling in 1984 sold 11 over-the-counter drugs to Mentholatum Co., Buffalo, N.Y., and disposed of Zimpro Inc., its environmental control business, through a combination sale and donation to Michigan Technological University and its affiliate, Michigan Tech Ventures.

Other divestitures in 1984 included the sale of Nilok Chemicals, manufacturer of a product used in the production of an agricultural chemical; Sterwin Laboratories, a producer of poultry biologics, and Parfums Givenchy Inc., producer of fragrances. Early this year, Sterling sold Thompson-Koch Co., its in-house advertising agency.

In May, 1985, exec vp James G. Andress became president-chief operating officer, succeeding John M. Pietruski who was named chairman, replacing the retired W. Clarke Wescoe.

Buying the Rocky Mountain News, Denver's 7-day leader.

Rocky Mountain News
News' Building slated for completion Fall 1985

We know media buyers are making a habit of buying the Rocky Mountain News because our ad linage keeps going up . . . 30.5% in the last four years.

It's easy to figure out why.

You can buy more paid circulation, daily and Sunday, with the News than the Post. And you'll get the largest percentage of total adults, homeowners . . . even college grads. In fact, the News offers you the most effective reach of the entire Denver metro area.

Stroh Brewery Co.

Detroit

RANK 84

($ figures = 000,000)

Worldwide	1984	1983	% chg
Sales	1,600	1,646	-2.8
Net income	N/A	N/A	N/A
Advertising	85	74	14.9

Privately held Stroh Brewery Co., Detroit, the 84th largest national advertiser, increased its ad spending 14.9% to $85.2 million in 1984.

Stroh's, with estimated sales of $1.6 billion, down 2.8% from 1983, is the nation's No. 3 beer maker behind giants Anheuser-Busch and Philip Morris' Miller Brewing.

Like the rest of the industry, it felt the effects of the decline in over-all U.S. beer consumption, the first such drop in almost three decades. Stroh's total shipments in 1984 were 23.9 million barrels from the combined production of seven breweries, a 1.5% decrease from 1983.

Stroh's share of the market was 13.4% in 1984, down from 13.5% the previous year as it continued consolidation after acquiring Jos. Schlitz Brewing Co. in 1982. It trails Anheuser-Busch with a 36% share (up from 33.6% in 1983), and Philip Morris' Miller Brewing with 21% (even with 1983).

During 1984, the brewer completed a national rollout of its flagship brand, Stroh's and Stroh Light, and increased its brand offerings with a second malt liquor and a low alcohol content beer. Silver Thunder malt liquor was presented to selected regions in August, 1984, as a flanker for the brewer's Schlitz malt liquor brand, the segment leader. Schaefer Low Alcohol, Stroh's first entry in the low-alcohol category, was introduced in Texas in July, 1984, and has expanded into other markets.

Stroh funneled its biggest ad expenditures in measured media into Stroh's beer—$32 million in 1984 vs. $19.8 million in 1983. Old Milwaukee got $16.4 million, up 16.3%; Stroh's Light took only $1.3 million, down from $10.8; Schaefer beer spending stayed even at $1.1 million, and Schlitz beer declined to $1.6 million, down from $2.9 million, although Schlitz malt liquor got a boost to $3.4 million from $2.7 million. Stroh spends 90% of its measured media spending on tv, primarily network.

Much of the news that Stroh brewed during 1984 and into 1985 was on the legal front. Stroh challenged tv advertising exclusivities, sued to stop another brewer's expansion plans, got embroiled in a dispute over the use of the term "LA," and lobbied to stave off the movement to ban beer and wine broadcast advertising.

Stroh took its complaint about product exclusivities to the U.S. Justice Department, which opened an investigation of network and local tv contracts with advertisers, under which an advertiser generally pays a premium for the guarantee it will be the sole sponsor of its kind during a particular program.

Stroh said network sports programing contracts with A-B and Miller prevented Stroh from gaining access to the most effective programing vehicles for reaching the beer target audience. The Justice Department issued a statement late last month backing the legality of the exclusive agreements between the networks and advertisers.

Stroh also dealt with the problem by hooking up with sports and events not already dominated by the big two. It entered a three-year sponsorship agreement with USA Cable Network for National Hockey League broadcasts and put up $200,000 in prizes for a new statistical category, "Stroh's Power Ratings" (an assessment of team penalty-killing and power-play effectiveness) intended to give Stroh access to news columns.

In addition, the brewer set out to create more of its own tv programing. Ohlmeyer Communications Cos., New York, developed "Stroh's Circle of Sports," an anthology show that debuted in June, 1985, on USA Cable Network and a broadcast tv syndicate. Ohlmeyer is expected to develop two or three projects a year for Stroh. These kind of ventures are expensive. Stroh's David Martin, exec vp-corporate media director, says the company is spending almost $200 million in 1985 on all advertising and sales promotions.

In April, 1984, A-B introduced LA brand low-alcohol beer in a dozen test markets, and when Heileman and Stroh introduced their own low-alcohol products, A-B sued to stop them from using the "LA" designation. A federal judge in May enjoined Stroh from using "LA," forcing Stroh to rechristen its Schaefer LA brew as Schaefer Low Alcohol.

In December, 1984, Stroh and Philadelphia-based C. Schmidt & Sons sued to stop the attempt by G. Heileman Brewing Co., La Crosse, Wis., to buy out Pabst Brewing Co., Milwaukee. The acquisition would have moved Heileman, the No. 4 national brewer, past Stroh. Stroh and Schmidt, arguing antitrust violations, won a temporary restraining order against the buyout. Pabst subsequently was acquired by S&P Co., Corte Madera, Cal.

Also in December, Stroh officials met with top network tv executives to measure their resolve to stave off the movement to ban beer and wine broadcast advertising. The meetings were initiated by Stroh, which said it would not agree to run "matching" public service ads advocating moderation in alcohol consumption as a compromise.

During 1984, Stroh's strength was in the low-price but high-volume segments, with the Schaefer brand in the low end and Old Milwaukee in the popular price segment. Schaefer was taken national in October, leading to an increase in the brand's shipments of 22% for the year. Old Milwaukee, once an ailing regional brand, topped the popular price category and was the fifth best-selling American beer.

Major promotions for Old Milwaukee included sponsorship of Tim Richmond on the NASCAR race circuit, and a Play-for-the-Gold sweepstakes in which the winner received the weight of an Old Milwaukee six pack in gold. The contest drew 682,000 entries.

Shipments of the ailing Schlitz premium brand fell for the sixth straight year. Schlitz was positioned a little below the Stroh's flagship brand, also a premium. Stroh virtually abandoned advertising the Schlitz brand, except in some Texas markets with ads developed on contract by Point Communications, Dallas.

Stroh's and Stroh's Light brand sales were flat, despite the cult-like popularity of two humorous Alex the Dog commercials via Marschalk Co., New York. In early 1984 the spots were ranked by a tracking company as the third most popular on the air, even though it had been shown in only 65% of the country. Alex was retired as the Stroh spokesdog in July, 1984, because of worries that he might come to overshadow the product.

The first Stroh's Run for Liberty was held in October to help create awareness that Stroh had moved from a regional to a national brewer. The run was a merchandising tie-in to Stroh's $3 million sponsorship of the Statue of Liberty-Ellis Island restoration fund. About 150,000 runners took part, raising $500,000. The 1985 run is set for Oct. 12 in 127 cities and 15 military bases, with Chrysler Corp.'s Plymouth brand also a major sponsor.

Stroh brand sponsored other sporting events, including the 1984 Dallas and 1985 Detroit Formula One Grand Prix races, six American Motorcycle Assn. races and a series of American Board Sailing Assn. races.

Responding to the flat beer industry sales, Stroh set out to look for new niches, setting up a marketing hothouse headed by John Bissell to create new money makers in nonmainstream areas. Besides nonbeer products, Mr. Bissell's group also took over the Erlanger superpremium and Primo premium Hawaiian brands.

One of the group's first efforts was White Mountain Cooler, introduced in March, 1985, and quickly taken national in July. The citrus-flavored, 5% alcohol beverage uses beer-making technology, and competes in the growing cooler segment that also includes entries from other brewers, A-B, Coors and Heileman.

Stroh's diversification took another form with the January, 1984, establishment of its River Place Financial Corp., a limited-purpose bank to package loans for development projects along a 30-acre stretch of the Detroit River, where the brewer's corporate headquarters are located.

In September, 1984, J. Wayne Jones, vp-corporate marketing operations for Coca-Cola Co., Atlanta, moved to Stroh to handle the new post of exec vp-sales and marketing.

Sales	2,840	2,737	3.7
Net income	189	282	-33.0
Advertising	190	157	21.1

Tandy Corp., Fort Worth, Tex., is the nation's 38th largest advertiser with an estimated total U.S. advertising expenditures of $190 million in 1984, representing a 21.2% increase over 1983 spending.

In Tandy's fiscal year 1985, which ended June 30, 1985, the company reported worldwide advertising expenditures of $237.8 million, up 7.4% from 1984 fiscal year advertising expenditures of $221.5 million.

Tandy has shown strong increases in advertising the past few years. Spending in fiscal 1984 was up 11.2% from $199.1 million spent worldwide in fiscal 1983, which, in turn, was 23.8% greater than the $160.9 million reported spent in fiscal 1982.

During calendar 1984, Tandy media spending was measured at $44.4 million, not including newspaper, direct mail, special events and other promotional expenditures, which make up the remainder of Tandy's total domestic budget.

Heavy competition, particularly in the personal computer marketplace, prompted Tandy to increase advertising expenditures to achieve sales gains in 1984. The year was plagued with rapid price changes in the microcomputer market, delayed introductions and limited availabilities of certain computer products, and extraordinary price cuts throughout Tandy's own line based on cost reductions and inventory shortages.

Tandy introduced its first IBM-compatible computers in late 1984, the Tandy 1200 HD and the Tandy 1000. Other computers introduced recently include the Tandy 6000, a multi-user business computer, and the Tandy 200 lap-top computer. A hard disc version of the Tandy 1000 was introduced in June, 1985.

Tandy's thrust into telecommunications was accelerated in fiscal 1985 with the opening of 83 telephone centers within existing Tandy computer centers, bringing the number of telephone centers to 108.

In the fiscal year ended June 30, 1985, Tandy reported net income of $189.1 million, down 33% from the prior year, on net sales of $2.84 billion, up 3.7% from fiscal 1984. Fiscal 1985 was affected by a plunge in profits in the third quarter. That drop was the result of a writedown of the Tandy 2000 computer and parts, which has not been a big seller, although it was introduced with great fanfare in November, 1983. The newer computers, the 1000 and 1200, are selling ahead of the 2000, which is not fully IBM compatible.

1985 fell 9% to $53.2 million on net sales of $652.1 million, up 7%.

However, powered by improved computer sales in July, 1985, and a rebound in earnings, Tandy has begun to emerge from its year-and-a-half slump. July, 1985, sales for Tandy's U.S. retail operations rose 15% to $174.9 million compared with the previous July. The company's total sales for the month rose 12% to $216.3 million.

Tandy attributed part of the turnaround in sales to the company's IBM-compatible Tandy 1000 and 1200 personal computers. In June, 1985, Tandy lowered the price of the Tandy 1000, from $1,199 to $999, making it the only MS-DOS (most common operating system for personal computers) available for less than $1,000. July, 1985, computer center sales responded by rising about 15% in contrast to a 12% decline the previous month.

Eugene Glazer, research analyst with Dean Witter of New York, says the strength in Tandy's computer operation is encouraging and puts the company back on an upward trend in its computer business.

Mark Manson, analyst with Donaldson, Lufkin & Jenrette of New York, says the real test should come as Tandy enters the fall selling period and moves toward Christmas.

Tandy also is diversifying its marketing strategy, which some analysts say could lead to Tandy becoming the largest chain of discount name-brand consumer electronics in the country. Tandy has not participated in the boom in brand name consumer electronics because of the house-brand marketing concept behind its Radio Shack stores.

But with the acquisition last April of Memphis-based Scott Appliances Group (24 stores) and the acquisition of American Home Video Corp. (207 Video Concept stores) from Jack Eckerd Corp. in early fiscal 1986, Tandy is adding a branded concept to its strategy.

For now, Tandy officials say, the acquired stores will remain autonomous and continue operating under their respective names, separate from Tandy's traditional Radio Shack stores. Thus far, Tandy has announced plans to open 12 to 15 McDuff Supercenters (one of three names under which Scott Appliance stores operate).

Other relatively new directions for Tandy include its strong move into the mobile cellular telephone market with its first cellular phone introduced in 1984 and several new products in the catalog for 1986.

Additionally, Radio Shack will make its own version of the satellite dish, "user installable," available through 4,800 company-owned stores, priced at approximately $1,999.

Although some analysts have hailed the new direction, some have been moderately critical of Tandy's Video Concept Stores acquisition, saying the new business will draw attention away from Tandy's established main lines.

And critics of the Video Concept acquisition point to the chain's reports of losses and reduced sales at a time when other chains were growing. But others say the undisclosed terms were favorable to Tandy, which reported it purchased American Home Video at a price at least $72 million (pretax) below the audited net book value of the assets as of Aug. 3, 1985.

Dean Witter's Mr. Glazer says that because of Tandy's long-term retailing expertise and financial strength, it "earns the benefit of the doubt" on the Video Concept venture. Mr. Manson views the acquisition as a "minor positive."

Tandy officials say that in the current fiscal year that began July 1, 1985, Radio Shack plans to continue its expansion with the addition of more than 100 full-line stores, about the same number added last year. Tandy also plans to open 50 Radio Shack computer centers and 50 telephone centers this year. Only one computer center was opened in fiscal 1985. Radio Shack has more than 7,000 stores in the U.S.

Computer related sales contributed 33.6% of 1984 worldwide warehouse shipments (compared with 34.6% in 1983), followed by audio equipment and related accessories, with 17.8% (from 18.2% in 1983). Shipments in the electronic parts category, including batteries and test equipment, were 13.7% (compared with 13.2% in 1983) toys, antennas, security devices, timers and calculators accounted for 11.9% of shipments (down from 12.5% in 1983).

Time Inc., New York, the nation's 61st largest national advertiser, raised advertising expenditures to an estimated $133.9 million in 1984, an increase of 6.9% spending levels in 1983. Of the total advertising outlay, Time Inc. spent $107.2 million in measured media, up 18.7%.

Time Inc., ranked the third largest U.S. media company in terms of media revenues by ADVERTISING AGE, reported net income of $216.4 million in 1984, an increase of 28% over 1983. Sales were $3.07 billion, up 12.9% over the previous year.

A good part of the increase was posted in Time Inc.'s magazine division, where revenues rose to a record $1.32 billion, up 16.8% from 1983, and operating income rose to $188 million, up 78% from the previous year when Time wrote off $47 million in losses incurred by the now defunct *TV-Cable Week*.

In the magazine division, Time Inc. concentrated its advertising outlay on promoting its three biggest sellers: *People, Time* and *Sports Illustrated*.

People led the pack, with measured media spending of $15 million, up 8.6%. *Time* followed with $11 million, about the same as in 1983. *Sports Illus-*

The 1985 Ad Dollar Summary lists 35,000 Brands and how much they spent in 7 Media.

You can't buy this complete listing anywhere else.

These are the official industry figures.
If you want to know who's spending what on advertising, BAR/LNA's Ad Dollar Summary is the reference tool you need.

Because only in this one volume will you find a complete summary of ad dollars from the PIB Magazine and Newspaper Supplement Service, from BAR's Broadcast Services and from the LNA Outdoor Advertising Service.

These are the very same figures LNA prepares for major media organizations like MPA, TVB, RAB, and OAAA. They're used by leading advertisers and their agencies. The trade journals also turn to LNA for media data.

The 1985 Volume now includes cable TV.
The Ad Dollar Summary tells you how much each of 35,000 brands is spending in consumer magazines, newspaper supplements, network and spot television, network radio, outdoor advertising, and now, for the first time, in cable TV.

Brands are listed in alphabetical order along with their parent company identifications and the media used.

And that's not all. For the first time we've added listings that show the top 100 companies ranked by expenditures in each of the media.

Top 1000 Companies by total ad dollars.
The Ad Dollar Summary includes other vital reference data.

For instance, there's a convenient listing of Top 1000 Companies ranked in order of total media expenditures and broken out in each of the seven media.

There's also a section in the year-end edition showing the top 10 brands in 275 product categories, with a category total.

Year-End 1984 Edition on sale now.
If you didn't subscribe to the last year's Ad Dollar Summary, now is your chance to order the entire year round-up in one conveniently bound edition for just $150.00.

Multi-Media Services from BAR/LNA.
The Ad Dollar Summary is just one of the Multi-Media reports we offer, and the only one available without subscribing to the full service. Our full-service subscribers receive two additional reports which complement the Ad Dollar Summary with more detailed analyses.

- Company/Brand—an alphabetical listing of companies and how much is spent on each brand in seven media.
- Class/Brand—compares competitive brands within 275 product categories. This enables you to see not only how much each brand spent in specific media, but also who the major spenders are in each category.

For more information about our other media analysis services, including on-line programs and customized reports, just check the box in the adjacent column.

BAR LNA

trated spent $3.8 million, an 18% increase over the previous year.

The spending of all three magazines was concentrated on spot tv, with *Sports Illustrated* and *Time* using lots of direct-response subscription promotion. In contrast, *People* promotes only newsstand sales, according to Jim Calloway, president of Holland & Calloway, New York, which handles the account.

During the year, *Sports Illustrated's* 540-page, two-pound special Summer Olympics issue set an ad dollar record for a single issue when it brought in $24 million in advertising. Over-all, *SI* ad revenues rose 26.1% to $230.8 million and ad pages climbed 10% to 3,035.

Time magazine, aided by the presidential election advertising, again beat all its competitors for ad dollars, pulling in $335.6 million, up 12.1% on 2,817 ad pages, up 4.2%.

People, celebrating its 10th anniversary, also had an exceptional year, with ad revenues rising 32.8% to $232.9 million, on 4,063 ad pages, up 17.9%. Ad revenues also rose by 7.4% to $111.7 million at *Fortune*; 35.1% to $57 million at *Money*, and 19.8% to $35 million at *Life*.

The poor performer of the group was the science monthly *Discover*, where ad revenues dropped 10.4% to $10.6 million as ad pages dropped 14.5% to 434. Time Inc. began revamping *Discover* with its September issue, and will devote a large portion of each issue to a special report on one topic. Michael Luftman, spokesman for Time Inc., says the company is offering a guarantee: dissatisfied *Discover* advertisers can swap for linage in one of Time Inc.'s other magazines.

The magazine development group focused its attention on *Picture Week* early this year. Potential advertisers criticized the first prototype of the photoweekly, released in May, as looking cheap. A revamped prototype with more hard news and a four-color cover got better reviews.

Picture Week currently is in test, and should reach broad distribution in early 1986 if all goes well.

The major magazines all showed circulation gains for the year: *People* circulation for the six month period ended Dec. 31, 1984, totaled 2.84 million, up 2.1%, compared with the same period in 1983; *SI* circulation rose 7.6% to 2.64 million; *Time* circulation hit 4.62 million at year-end, up 0.1%; *Fortune* rose 2.6% to 710,141; *Money* totaled 1.51 million, up 9.6%.

Time Inc. solidified its business interest—books, magazines and cable—in October, 1984, when it sold Pioneer Press, a chain of suburban Chicago weeklies, to Marshall Field V's Field Corp. for $25 million, taking itself out of the newspaper business. "Pioneer Press just didn't fit in," says Mr. Luftman.

The company purchased Southern Progress Corp. of Birmingham, Ala., in March in a $480 million deal. Earnings reflected that acquisition for the first time in the second-quarter. Without the three Southern Progress magazines —*Southern Living, Progressive Farmer* and *Creative Ideas for Living*—magazine revenues would have increased only 6.8% over the second quarter of 1985. With them, revenues for that quarter rose 17%. Pretax profits for the magazine operation slowed to a more typical 13% gain in the first half of 1985—$95.4 million, compared with $83.8 million in the first half of 1984 —while revenues rose 12%, to $700 million.

Southern Progress also includes Oxmoor House, a direct marketer of books. This fall, the subsidiary is launching a fourth magazine, *Southern Living Classics*, aimed at an upscale audience.

The video portion of Time's business slowed in 1984, dragged down by high programing costs at Home Box Office Inc. and a softening of the pay-tv market.

The company does not publish separate figures for HBO, but Jay Nelson, an analyst with the Wall Street firm of Brown Brothers, Harriman, estimates that HBO's 1984 profits declined 20%, to $118 million from $148 million in 1983.

As a result, operating profit for the video operations, which also include Denver-based subsidiary, American Television & Communications, and one-third of USA Network, dropped by 1.4%, to $212 million in 1984, although in the first six months of 1985, they rose 7.6% to $116 million.

The video holdings in mid-1985 took out in hot pursuit after Warner Amex Cable Communications, the sixth largest multiple systems cable operator in the U.S. Time Inc. and Denver-based Tele-Communications Inc. jointly offered $900 million for that operation.

The deal evaporated in August, 1985, when Warner Communications announced it would buy out American Express' share of the operation and stay in the cable business. (The two own Warner Amex 50/50.)

Although ATC and TCI are still studying Warner-Amex with an eye toward making another offer, success seems remote. ATC spokesman Jim Duffy says cash-strong ATC would actively continue to seek new investments—from new systems to new technologies.

ATC, the nation's second largest cable television company, is the strength of the video division, and Time Inc. expects it to set profit records in 1985.

As a corporate entity, ATC does very little advertising, in 1984 spending less than $20,000 nationwide. Mr. Duffy says that's because ATC has just completed a long decentralization process that gave marketing responsibility to the local systems. "I'm responsible for the corporate advertising budget, which is about $10,000, and I think I've spent $1,100 of it," Mr. Duffy said this August. "We don't view ourselves as a consumer company."

Meanwhile, the video division has been focusing on improving the performance of HBO. The second quarter of 1984 brought HBO's first reduction in profitability in seven years, and the company immediately responded with a major reorganization that began a period of cost-cutting and staff reduction.

In October, HBO replaced chairman-ceo Frank Biondi with former president and chief operating officer Michael Fuchs. Many of the problems at HBO are traced to contracts for movies that were predicated on a growing subscriber base that failed to materialize. Those contracts have been renegotiated based on lower subscription levels but most will not take effect this year.

But Mr. Luftman says the cost-cutting measures are beginning to show results, noting that the second quarter of 1985 brought a rise in HBO profits —the first in a year—although subscription levels remained flat.

Tough times have brought aggressive marketing to HBO, which began 1985 with its first national direct-response tv campaign.

The company revamped its HBO schedule to cut down on repetitious programing, and spent $10 million on a summer campaign to explain the new schedule. Mr. Luftman says the results of that campaign have been good, with June prime-time ratings the best in three years.

The company spent 57% more on advertising HBO in 1984 than it did in 1983—going to $15.3 million from $9.7 million in measured media spending.

For the entire video group, media spending rose by a third, to $18.1 million in 1984 from $13.6 million in 1983.

After two years of losses, Time-Life Books division turned a profit in 1984. Time-Life Books, the largest component of the books and information division, underwent a cost-cutting reorganization in 1984. Pretax income for the books and information division more than tripled, to $65 million from $21 million. Desite a lackluster second quarter, pretax income for the first half of 1985 rose in the book division by 18%.

The division is one of the company's largest ad spenders, and its big spenders in measured media were Time-Life Books and its products at $18.2 million, up by 22% from 1983, and Book-of-the-Month Club products at $4.6 million, down 8% from 1983.

Worldwide Toyota Motor Sales U.S.A., Torrance, Cal., which has announced plans to build an auto plant in the U.S. by 1988, is the 57th leading national advertiser with estimated U.S. ad expenditures of $137.9 million, up 11.3% from the previous year.

The Japanese auto maker holds a 23% share of the U.S. import market in cars sold and 5.4% of the nation's total market.

The company is a subsidiary of Toyota Motor Corp., Japan, which for 1984 reported record worldwide sales of $22.83 billion, up 11% over 1983,

and earnings of $1.7 billion, up 33.5% from a year earlier for another all-time high. Sales and earnings for both 1985 and 1984 fiscal years were converted from yen to dollars at the rate of Y238 to = U.S.$1.

Toyota currently ranks third in worldwide auto production behind General Motors and Ford and is followed by Nissan in fourth place.

More than half of Toyota cars and trucks are exported worldwide, with a record 1,710,352 units of a total 1984 production of 3,376,224 units being sold in overseas markets. The export figure includes 1,076,662 passenger cars, up 1.4% from 1983, and 633,690 trucks and buses, up 10.3%.

Loosening of voluntary restraints on passenger car exports to the U.S. and the strong sales performance of Toyota's light trucks helped account for an 11.9% increase in exports to North America in 1984.

For the seventh consecutive year, the company set a U.S. total vehicle sales record, with sales of 822,164 units, up 13.1% over the previous high of 726,818 units sold in 1983. It was the first import to sell more than 800,000 units in a year. The total included 557,981 cars (up 0.4%) and 264,183 trucks, a booming 54.4% jump and a record high for trucks for 10 straight years.

The self-imposed quotas assumed by Japanese marketers, under the Voluntary Restraint Agreement for the year beginning April 1, 1985, limit Toyota to an allotment of 620,000 cars, up 12.5% from last year. Despite record sales, Toyota's U.S. market shares again shrank slightly. The company ended the year with a 23% unit share of the U.S. import market, down from 23.4% in 1983, and 5.4% of the total market, down from a 6.1% share a year earlier.

Also, Toyota is the leader in the sale of import forklifts, a record 5,606 units sold in 1984, marketed through its Toyota industrial equipment division.

Toyota responded to its reduced U.S. car market share with a substantial increase in advertising, boosting measured media expenditures in the nine media tracked in this report to $119.9 million, up 12.9% from 1983. Of these measured expenditures, Toyota spent $18.5 million on network tv and $58.3 million on spot tv, a total of $76.8 million compared with $70 million in 1983. Toyota is the only Japanese importer to spend more money on spot tv than network tv. The company also spent $15.4 million for magazines, a $3 million increase over year-earlier figures.

Once again cable tv was part of the Toyota ad budget, with a total of $5.3 million spent for packages on the sports-oriented USA Cable Network and superstation WTBS. The expenditure was only slightly higher than for 1983.

Among the many significant unmeasured expenditures budgeted for the 1985 model year was Toyota's participation in a record 21 auto shows in major metropolitan areas throughout the U.S. The exhibits featured $1 million worth of new high-tech displays, which debuted at the Dallas dealer meeting in October.

The unmeasured total also encompassed Toyota's heavy involvement in a motor sports program that included the Toyota Grand Prix and pro-celebrity race at Long Beach and the Olympus Toyota Pro Rally, largest motor sports rally in the U.S., held at Tumwater, Wash. Also not measured were expenditures for merchandising and promotion materials used to support the marketing effort at the dealer level.

The Corolla once again was Toyota's U.S. sales leader, with unit sales of 157,885, up 10% over 1983. Accounting for nearly $20 million in measured media expenditures during the year, the Corolla was the company's most heavily advertised nameplate.

But as a category, Toyota trucks of every variety took $43.4 million of the measured spending, up 50.7% from the previous year in the six media traced by Leading National Advertisers. Record expenditures in most media supported the "Oh What A Feeling" ad slogan for the sixth consecutive year.

One of the first campaigns of the 1985 model year was for the all-new Corolla GT-S and its 16-valve engine ($9,538 for the liftback model) that kicked off in *Road & Track* magazine in September, 1984. The three-page spread was followed by similar spreads in other enthusiast magazines, plus a youth-oriented, 30-second network tv spot.

A 60-second spot playing off the magazine creative ran on the youth-oriented MTV:Music Television, the video music channel on cable tv. The spots also ran on popular network series and National Football League games.

Toyota continued its use of celebrity spokesmen for the 1985 line, such as baritone Sherrill Milnes featured in tv spots singing the praises of van models that "can seat a seven-person orchestra or carry 1,500 lbs. of sheet music." Race driver Dan Gurney took to the streets of New York to demonstrate the performance of the $17,158 luxury Supra sportscar; five members of the Los Angeles Lakers basketball team showed off the roominess of the Camry models ($8,948 to $10,698) and off-road champ Ivan "Ironman" Stewart pitched the toughness of Toyota trucks on the 1,000-mile Baja endurance race.

The spring of 1985 saw tv personality Ed McMahon making a special, one-time pitch for Toyota's new sport/performance MR2 offering. The MR2 is a wedge-shaped two-seater priced at $10,999 and positioned to sell against the Mazda RX-7 and the Pontiac Fiero. Mr. McMahon called it "the new game in town," pointing out it had been selected as *Motor Trend's* "Import Car of the Year."

The MR2 spots featured a giant-scale pinball machine with the car racing between the bumpers and flippers to emphasize the fun and excitement of driving the new model.

Pro golfer Lee Trevino pitched Toyota vans and trucks and signed on as an official Toyota spokesman for the next three years.

Toyota print ads again used big action photos of the vehicle accompanied by a bold headline. One new 1985 page ad, headed "Van of A Thousand Faces," detailed the specifics of the Toyota cargo van for the rapidly growing fleet market. Print ads appeared in major consumer and enthusiast magazines and *USA Today*, while tv ads were seen on such major network shows as "Hill Street Blues," "Dallas," "Cagney and Lacey" and "60 Minutes."

The company once again advertised heavily on sporting events. Sponsorship included 14 NFL games on CBS-TV, four hockey and 18 basketball games and eight college football bowl games on network and cable tv, including the Rose Bowl. The schedule also included first-time sponsorship of PAC 10 and Big 10 college football.

Outdoor posters, designed to boost sales at individual dealerships, featured the Corolla GT-S, the 4x4 Xtracab truck, the van and Tercel three-door liftback.

Contributing to Toyota's continued dominance of small truck sales in the U.S.—245,596 units compared with 220,000 for Ford, 203,724 for Nissan, 187,065 for Chevy and 119,127 for Mazda—was sustained promotion, both nationally and at the dealer level. Once such effort was the "Steal A Deal" ad package, which featured five tv and three radio spots and a wide range of merchandising materials for dealer use.

In mid-model year, the truck campaign came to encompass the 1985 1/2 4x2 Xtracab SR5 trucks, the first in the industry to feature gas turbochargers and electronically controlled transmission, as well as Toyota's first use of a four-wheel drive automatic transmission.

Toyota joined the ranks of Japanese auto marketers with U.S. production facilities in April, 1985, when it joined with General Motors in the formal dedication of the New United Motor Mfg. Inc. plant in Fremont, Cal. The former GM assembly plant is a 50-50 joint venture between GM and Toyota to produce the new Nova to be sold by Chevrolet, according to the joint agreement signed in February, 1983. Resembling a Corolla, the Nova is being targeted as a family car for the upscale youth market, positioned between Spectrum and Cavalier.

NUMMI is producing 75 Novas a day, with plans to build 20,000 units a month by April, 1986. When introduced to U.S. car buyers in June, 1985, ads for the Nova called it "the best of both worlds" and mentioned Toyota as a partner with GM and Chevrolet in the joint venture. Toyota, however, views the Nova as just another competitor.

Production of Toyota Celica GT-S convertibles, a joint venture with ASC Inc., Southgate, Mich., was halted at the factory in Compton, Cal., on completion of a contract for 5,000 of the ragtop units.

On June 23, 1985, Toyota announced it would build its own U.S. and Canadian manufacturing plants at as yet undisclosed locations by 1988. The U.S. plant, expected to cost an estimated $625 million, is to produce Toyota's mid-sized Camry at an annual production capacity of 200,000. The Camry is the largest upscale model either being built or scheduled to be built by a Japanese auto maker in the U.S.

Opening of the plant will make Toyota the last major Japanese auto maker to manufacture in the U.S. Honda Motor Co. has been making subcompacts in Ohio since 1982 and Nissan started production at its Tennessee truck factory this spring. Mazda Motor Corp., Japan's No. 3 auto maker, has plans to build a factory in Michigan, to start production in 1987.

The past year has been a stormy journey for Trans World Airlines, New York, N.Y., which ranked as the 96th largest national advertiser in 1984 with $66.2 million in advertising.

Total measured spending in nine-media for TWA was $42.7 million in 1984, up 9.2% from the previous year when TWA was a subsidiary of Trans World Corp., New York, now a conglomerate with hotel and food service properties.

Worldwide, TWA says it spent $80.2 million on all aspects of advertising and promotion in 1984, up 12%. Components of this spending, notes the airline, were $66.2 million for domestic advertising and promotion, including $58.7 million for all types of media outlets. The balance was spent on international advertising/promotion. For 1983. The full U.S. total was $59 million, including $52.3 million for all kinds of media placement. International 1983 spending was $12.9 million.

During the past year the airline has weathered its own corporate spinoff, the post-deregulation fare wars, tough union negotiations on wage cuts, a squadron of new air transport discounters, and the cross fire of would-be TWA owners Frank Lorenzo and his Texas Air Corp. vs. Carl C. Icahn and his group of investors. Icahn forces, now with 52% of TWA's common stock, are the new owners.

TWA's total revenue reached $3.66 billion, up 9%, continuing a generally gradual year-to-year increase since 1980.

Net income was $29.9 million, the first full year of profit in the past four years.

In the second quarter of 1985, ended June 30, the company had net income of $18.1 million, a drop of 67% from the second quarter, 1984. Sales for the same quarter increased 8%, to $1.04 billion. For the first half of 1985, total revenue increased 10.8% to $1.81 billion, but there was a net loss of $56.2 million, compared with a net loss of $31.9 million in the prior year period.

The continued availability of deeply discounted industry fare programs, principally on domestic routes, has diluted earnings along with measured costs of salary, wage, and benefits related to an increase in capacity-related employment levels and the expiration of a 1984 wage-reduction program.

TWA is the fifth largest airline in U.S. domestic service with a 7.6% share, behind American, United, Eastern and Delta in that order. It is the largest U.S. airline in the trans-Atlantic service to Europe. Its share of the U.S. domestic market has slipped from 8.7% in 1982. By contrast, its market share of the trans-Atlantic service in 1984 was 19.3% and rising, from 16.9% in 1982.

For that part of the trans-Atlantic market going to TWA and its chief U.S. rival in that service, Pan American, TWA consistently takes an increasing majority of the business—66.4% in 1984, up from 54.4% in 1982 and 55.3% in 1983.

Consistent with the recent trends in its total sales and income figures, the airline had international traffic growth of 20.2% in 1984 but a domestic traffic decline of 7.1%.

TWA, which became part of Transworld Corp. in January, 1979, was spun off Feb. 1, 1984, into an independent publicly-owned company.

Since 1978, TWA has restructured its domestic routes keying in on two hubs, Lambert-St. Louis International Airport in St. Louis and John F. Kennedy International Airport, New York.

Since TWA now gets 48% of its total revenues from its strategy of feeding from its domestic system into the international system, it is at pains to further develop and carefully market that combination. Its efforts seem to be paying off.

The 1984 gain of 20.2% in traffic overseas outpaced the U.S. airline industry-wide gain of 13%.

TWA gives major credit for the cut in its 1984 operating loss to the efficiency of its St. Louis hub. Domestic revenue for 1984 was up 4.8%, to $2.05 billion. The domestic pre-tax loss of $122.2 million in 1984 was an improvement over the 1983 loss of $191.2 million. International system revenue was $1.61 billion, up 14.9%. Pre-tax income of $156.6 million rose 0.8%.

TWA pursues a marketing strategy emphasizing its identity as a full-service quality airline providing a product mix clearly differentiated from "no-frills" low-fare travel. This strategy can only be possible if operating costs are held down.

One way the major airlines can compete with discounters like the Peoples Express is to offer alternative fares, "but the single biggest adjustable element is wages . . . the one thing management can control," says Louis A. Markesano, securities analyst with Janney Montgomery Scott Inc., Philadelphia.

And TWA has been whittling away at its labor costs of 36.1% of total operating expenses compared, for example, with 21% at the Continental Airlines unit of Texas Air Corpn., headed by fare-discounting, cost-cutting president/ceo Frank Lorenzo.

In 1984, costs of salaries, wages, and benefits fell slightly to $1.29 billion, resulting from 10% wage concessions granted by about 43% of TWA's employes, including pilots, during November, 1983, to January, 1985. Also, the total labor force decreased 3.3% during 1984, to 27,320 from 28,242. Since then, the company has suffered a "snap-back" effect from restoring the cut wages while the signatures still have not been inked on lower-cost contracts with the other 57% of TWA workers, the flight attendants and machinists, also unionized like the pilots.

Added to the jostling turbulence of TWA's past year was the activity of outside investors. Sizable TWA stock purchases were begun in December, 1984, by Carl C. Icahn interests. Mr. Icahn ultimately won out over Resorts International, a hotel and gambling casino company, and Texas Air Corp. and a TWA employes group seeking a leveraged buyout as the bidding price rose from an original $18 a share to $26.

During the bidding, TWA pilot-members of the Airline Pilots Assn. struck a deal with Mr. Icahn to take benefit and salary cuts up to 20% through Dec. 31, 1988, as a tradeoff for 20% ownership and 20% profit-sharing in the airline.

Union concessions were in response primarily to Texas Air's involvement because of the union-busting reputation of the president, Frank Lorenzo.

Analyzing this campaign for TWA control, Janney Montgomery Scott's Frank Markesano says that "if Texas Air had won control, parts of TWA would have been merged into parts of Texas Air or Continental and no longer would have been the TWA we recognize.

With Icahn, the promise is that the basis will be found for a profitable TWA by 1986 or '89."

TWA in the meantime built innovation into new services to create more traffic and introduced new marketing-advertising techniques to sell those services.

Beginning in April, 1984, and continuing to today, TWA has introduced countless new domestic and international routes. The broadening service now encompasses 207 flights each way weekly across the Atlantic, with the 71,649 total seats each week 18% greater than 1984.

A small but telling equipment innovation is the new Ambassador Class lounger chair, now installed aboard trans-Atlantic 747s in the business-class section.

In the same genre as Pan Am's business-class lounge seat and British Airways' Super Club seat, the Ambassador Class (which TWA claims is the widest of the three) is transformed at the flip of a lever into a three-position, home-style recliner.

In other innovations, TWA linked its automated PARS reservations-ticketing system with Amtrak's automated ARROW system, allowing cross-ticketing between the two networks. Also, TWA plugged into H&R Block Co.'s CompuServe information service for computer users giving more than 185,000 subscribers direct access through their PCs.

A major advertising change for TWA broke on Jan. 21, 1985, as the company switched scenes from its familiar soaring, "You're Going To Like Us, TWA" theme to a new ad series titled, "Leading the Way, TWA," created by Ogilvy & Mather, New York for tv and print.

The campaign says hot coffee, in-flight movies, express check-in, boarding passes, and separate sections for business class flyers were original with TWA.

Less splashy, was the late-1984 advertising promotion that Polaroid Corp., Cambridge, Mass., and TWA produced in concert. Ally & Gargano, New York, created the program that offered buyers of $25 or more in Polaroid camera and film 25% fare discounts on all round-trip TWA overseas flights. In addition to a campaign on network and spot tv, spot radio, magazines and newspapers, Polaroid sent 1.5 million direct mail pieces to Polaroid customers and TWA frequent flyers. TWA says the company expected 150,000 redemptions, but got 350,000.

Passenger-service advertising received 99.8% of the TWA ad budget in six measured media, up 38% for 1984, to $19 million. Freight ad costs were just $12,000 for 1984.

Spot tv was the clear preference for TWA campaigns in 1984, totaling $12.1 million, a sharp jump of 45%. Network tv received nothing in 1984 after just $99,000 in 1983 spending.

Magazine spending, the second largest category, had a total of $5.2 million, up 27%, and spending for newspaper supplements jumped 103%, to $611,200. Spot radio for 1984 was off 24%, dropping to $2.9 million, ad outdoor spending increased 102% to $310,000.

C.E. Meyer, who resigned as TWA's president-ceo in June, 1985, during the Icahn takeover efforts, left to become president-ceo of the Hilton International Co. unit of Transworld Corp., TWA's former owner. He was replaced by Richard D. Pearson, who moved up from his former executive vice president-ceo position with TWA.

UAL Inc., parent company of United Airlines and the nation's 59th largest advertiser in 1984 with an estimated total advertising of $136.7 million, up 4% from the previous year, took both the high and the low road in 1985 in agreeing to buy Pan American World Airway's Pacific division and Hertz Corp. rental car company, at a combined cost of $1.34 billion.

A merger of both acquisitions into the Elk Grove Village, Ill.-based UAL would greatly extend the company's marketing opportunities in the travel service industry. They also reduce its attractiveness as a takeover target, analysts say.

UAL made significant shifts in measured media spending in 1984 to focus on network tv for United, its principal subsidiary. United cut measured outlays for spot tv by 20% to $18.9 million, and for spot radio by 54% to $6.8 million in 1984 over 1983, while tripling outlays for network tv to $25.8 million with image-oriented ads focusing on targeted market segments, using the longstanding "fly the friendly skies" theme.

United's rising network tv spending parallels growing confidence in the long-term profitability of the nation's largest carrier. United's 1984 operating revenue of $5.6 billion was up 16% from 1983; it accounted for 89% of UAL's 1984 revenue of $6.97 billion, up 15.7%.

United's 1984 earnings of $564 million were up from $160 million in 1983, a 253% increase. United's earnings accounted for most of UAL's net income of $643 million, up 198% from 1983, and the best since 1978.

Profitability in the first six months of 1985 was another story, however, with UAL posting an operating loss of $183.7 million and net loss of $91.7 million, almost entirely the result of a 29-day pilots strike at United in May and June, 1985. For comparison, UAL earned $148.6 million on operating income of $260.1 million for the same period in 1984. The strike is expected to wipe out after-tax earnings for 1985, analysts say.

The strike also helped to lift American Airlines into the lead of domestic traffic and market shares during the first half of 1985.

American's domestic market share for the period was 15.2%, up from 14.1% the previous year's first half, according to Michael Derchin of First Boston Corp., New York.

United, in the same period, had a 14.4% share, down from its previous year's first half market share of 18.1%. The next largest carriers were Eastern and Delta, with 11.6% and 11% shares, respectively, followed by Trans World Airlines with 6.4%, Continental with 5.7% and Northwest with 4.3%.

United quickly began rebuilding national market share following the strike, offering a 50% rebate on flights from July 1 to 7, reductions in advance purchase requirements for discount seats, double mileage for frequent fliers and free upgrades. Other carriers matched its promotions, except for the rebates.

United's scheduled service was back to normal in August, and Mr. Derchin predicts United's operations will be normal by the fourth quarter of 1985. United also is benefiting from strong passenger traffic growth in 1985, which could exceed 1984 levels by 12% to 13%, and which is expected to grow another 9% in 1986, Mr. Derchin says.

The temporary setback from the strike will be far outweighed by concessions United was able to wring from pilots and other unions in 1984 and 1985, which will significantly reduce operating costs over time, he adds. The new pilots' agreement, for example, establishes a two-tier wage scale with new pilots hiring on at 40% lower pay for the first five years, with wage scales afterward set at competitive levels through arbitration. Wages are to merge with former pay scales when a pilot reaches the rank of captain, which takes about 18 years, according to United.

With favorable labor contracts, United is now in a position to grow more profitably at major hubs and elsewhere, says John Zeeman, United's exec vp-marketing and planning. Operating costs per seat mile of all expanded service will now be competitive with those of low-cost carriers. "We're now in a position where expansion makes sense," he says.

United's route expansion and schedule enhancements in 1984 allowed it to become the only airline serving all 50 states. This helped to make its shift to national tv advertising an economical move, Mr. Zeeman says. New "spokes" were added at hubs in Chicago, Denver and San Francisco, and 24 cities were added to United's system, bringing the yearend total to 159 cities served through 139 airports. United announced plans in January, 1985, for a $300 million 42-gate "Terminal for Tomorrow" in Chicago, and in September, 1985, for $100 million in improvements at Denver, its second-largest hub.

United's growth strategy in recent years has focused on increasing its dominance in the western U.S. Interestingly, American Airlines in recent years began focusing on growth to the East, with several new trans-Atlantic routes and new hubs at Raleigh/Durham, N.C., and Nashville, Tenn., prompting speculation that the two carriers are staying out of each other's way.

Pan Am's Pacific division, which United agreed to buy for $750 million, will greatly enhance the profitability of United's domestic network by tying in long-haul flights across the Pacific, the industry's fastest growing area, says Mark Daugherty, airlines analyst with Dean Witter Reynolds.

Likewise, the pending acquisition of Hertz Corp. from RCA for $587.5 million would allow UAL to benefit from synergies in the air passenger, car rental and hotel markets, he says. UAL-owned Westin Hotels manages 54 hotels containing more than 25,000 rooms worldwide and owns 24 of those hotels. Hertz has 6,300 locations worldwide, 30,000 employes and 36% of the domestic car-rental business. It reported a $74 million net profit on revenues of $1.44 billion in 1984.

United's Mr. Zeeman says the most important effect of the Hertz acquisition will be operational—such as the ability to share computerized reservations systems for better marketing management and promotion, which would reduce the number of empty seats on airplanes, unrented automobiles and empty hotel rooms.

Hertz will bring to UAL a list of America's business and pleasure travelers nearly equal in value to its own. If the Hertz sale is approved by RCA shareholders, Hertz would become a separate UAL unit, similar to the Westin Hotel subsidiary, which would be free to continue its contractual obligations as a member of the frequent flier programs of other airlines, a UAL spokesman says.

The U.S. Department of Transportation plans to rule by Oct. 31 on whether the UAL-Pan Am deal is okay as stands or Pan Am's Pacific routes should be open for competitive bidding. Already, the Justice Department has issued an opinion that the acquisition would "substantially reduce" U.S.-Tokyo competition, that it violates merger guidelines, and that United should sell one of Pan Am's three Tokyo-to-U.S. routes, in addition to possibly divest other Tokyo-Orient routes. United in late September had not responded to the Justice Department's comments.

If United gets the routes, it will immediately be a force in the Pacific with an estimated 23% market share of trans-Pacific traffic. Pan Am currently has a 19% market share in that sector, and United has about 4%.

But the Pan Am division is only a base to grow from, Mr. Daugherty says. United would need more long-haul B-747 aircraft, and would have a tough pricing battle with Northwest and Continental, the two major U.S. carriers with the lowest unit operating costs, and with Pacific market shares of 26% and 3%, respectively. Another factor is Japan Air Lines, which has a 45% to 50% trans-Pacific traffic share.

Fleet acquisition and modernization will intensify as a result of United's new labor contracts and will certainly be affected by the DOT's decision on the Pacific routes, United's Mr. Zeeman says. United in mid-1985 increased its capacity by about 5% and had aircraft purchase agreements totaling $1.3 billion as of Dec. 31, 1984.

Financing for UAL's massive acquisition strategy comes from two sources: An overfunded pension plan, and from sales of equity in hotels owned by the Westin unit. In June, 1985, UAL recovered $962 million surplus from its pension fund by buying annuities for all 59,600 eligible employes. The $962 million was transferred into a trust fund earmarked for corporate expansion activity.

In June, 1985, UAL announced its intention to sell several properties owned by Westin Hotels. In September, 1985, UAL plans to offer interest in three hotels to the public for $360 million. UAL through its Westin unit will retain the lucrative management contracts and will split any equity appreciation 50-50 with the limited partners. If the deal works well, a second offering of $300 million-plus could be in the works as early as 1986.

UAL also sold GAB Business Services, an insurance claims adjusting unit, for an undisclosed sum in July, 1985, to SGS North America, a subsidiary of Societe Generale de Surveillance Holding S.A., of Switzerland.

UAL's financial maneuverings accomplish two important goals, says Mr. Daugherty of Dean Witter. First, the actions concentrate resources in the travel service industry; second, they minimize UAL's attractiveness as a takeover target by removing liquid assets from the potential reach of corporate raiders.

Fearing the latter, UAL shareholders in April, 1985, also approved an increase in authorized UAL common shares, which could be used to repel a takeover.

Mr. Derchin of First Boston says UAL's actions to transform itself from an investment company to more of an operating company have caused many analysts, himself included, to become more bullish about earnings prospects in the future. Mr. Derchin believes UAL's stock is undervalued, and it will rise in value when the effects of its aggressive marketing moves become clear.

An example is found in UAL's Westin unit, Seattle, which announced Aug. 31 that it is moving its $8 million corporate account of 30 years from Seattle-based Cole & Weber to DYR, Los Angeles, as part of a total restructure of its marketing strategy, a Westin spokesman says. The change is part of a long-range plan to double its market share. The change is effective Jan. 1, 1986. Cole & Weber retains publicity and some hotel ad accounts.

UAL's results since 1978 have been plagued by various misfortunes, ranging from the grounding of all DC-10s in 1979 to skyrocketing fuel prices, labor problems, fare wars with low-cost carriers and the air traffic controller's strike.

Perhaps now UAL will have a chance, free of unusual events, to prove what it can do, Mr. Derchin adds. "I'm very optimistic," he says.

Congress may moan about the rising federal deficit, but its concern hasn't been reflected in government ad spending, which last year leaped 22.7% to an estimated $287.8 million, making the government the nation's 26th largest advertiser.

That spiraling increase in the government's ad budget seems likely to continue. The three main advertisers—the military services, Amtrak and the USPS, whose combined budgets represent four-fifths of the government total—all will spend more this year and will likely have even bigger budgets in 1986, depending on Congressional politics. Amtrak's future as a quasi-goverment agency is still under debate.

Adding another huge chunk to last year's spending was the Treasury Department's $40 million Olympic coin sales program, which raised $65 million in donations for the Olympic games committee. Next year, Treasury intends to spend as much as $30 million to promote Statue of Liberty coins. Proceeds from those sales will go toward restoring the 100-year-old landmark.

Spending to bring in new military recruits had dropped slightly in 1983, but rose 8% this year to $166.3 million. Pentagon ad personnel estimate they will spend $191.5 million this year and have asked for $228.5 million in 1986.

While they believe advertising of the various services has been successful in the last three years—recent high school graduates are signing up in large numbers—Defense marketers are frightened that the dwindling pool of 18 to 22-year-old males signals trouble ahead. Many government officials predict recruiting will become more difficult by 1987.

So, they have convinced Congress bigger ad budgets are necessary to reel in recruits. Their efforts may be given a boost with a new GI education bill which went into effect July 1. Education is one of the main draws for high school graduates, and the new bill promises recruits larger chunks of money for college.

The Army, which also has increased its own college education fund, expects to benefit most from the new program, while other services say it may have only a marginal effect on their recruiting efforts.

The Pentagon's spending looks like this for 1984/85:

- The Army (N W Ayer, New York), the biggest spender, had a $90.5 million budget, up from last year's $85.1 million, with $6.5 million going to the Army Reserve Officers Training Corps and $16.2 million for the Army Reserve. It will spend $93.5 million in 1985, and seeks $116.2 million next year.
- The Navy (Ted Bates Advertising, New York), $13.1 million, down 20.6%. The Navy regained ground this year with a $20.8 million budget.
- Marine Corps (J. Walter Thompson USA, Washington), $16.8 million; $17.25 million in 1986.
- Air Force (D'Arcy MacManus Masius, New York), $16.1 million; $16.85 million in 1986.
- Army National Guard, $8.4 million; $12.6 million and Air National Guard, $2.3 million; $2.6 million in 1986 (both Needham Harper Worldwide, Washington).
- The military's joint service advertising, via Grey Advertising, New York, dropped 5.7% to $18.2 million in 1984 and will be $17.6 this year, but it has asked for $21.3 million in 1986. It will spend more money on network tv buys, rather than in magazines, where most of the other services' money goes.
- The Coast Guard (Thomas Buffington & Associates, Washington), $926,000; $762,500 in 1986. The Coast Guard is hardest hit because of its affiliation with the Transportation Department, which has been hurt by budget cuts. Guard officials expect to miss their recruiting goals by 30% this year, a situation only slightly alleviated by a 68% re-enlistment rate.

The Postal Service (Young & Rubicam, New York) had perhaps one of the largest budget increases, a hefty 41%, to $42 million in 1984. An estimated $18.7 million in measured media, a nearly $2 million increase, went to promoting its Express Mail overnight delivery service. The service delivered 43.9 million pieces of overnight mail in 1984, producing revenue of $489.9 million, increases of 19.3% and 16%, respectively. This year a new campaign aimed at corporate users broke in magazines and newspapers.

The USPS, which expects a total ad budget of $46 million this year, also promotes stamp-collecting, a business which last year had sales of $188.6 million. Other parts of the budget went to international express mail and E-Com, the electronic message service which went out of business this September.

The post office declined to break down its budget by categories because of the fierce competition among overnight delivery services, led by Federal Express with the USPS placing second in volume handled.

Amtrak (Needham Harper Worldwide, New York), which saw its ridership rise a healthy 4.8% in 1984 to 19.9 million, rolled in with a 25% hike, to $26.3 million, even though it changed neither its advertising strategy nor its campaign, "All aboard Amtrak."

New paid ad campaigns which began last year include General Services Administration's $2 million promotion to sell off unwanted government buildings such as the $45 million Hamilton Air Force Base in Marin County, Cal. Kennedy-Wilson, Santa Monica, Cal., a real estate advertising firm, handles.

The U.S. Travel and Tourism Administration finally had $1.2 million of its 1984 budget freed up to promote the U.S. this year, although the fate of the program remains tied up in Congress. The outlook, say officials of the program, is clouded.

A test print campaign, via N W Ayer, New York, is scheduled to break in Germany this fall.

Other paid government campaigns, however, are being phased out. The Federal Crop Insurance Corp. spent $1.7 million in 1984, but will spend only $500,000 this year and in 1986 will let private insurance companies inform farmers about federal insurance programs.

The U.S. Treasury stopped advertising for gold medallions and spent only $110,000 to promote gold and silver coin sales.

Efforts by Transportation secretary Elizabeth Dole to launch a four-year, $80 million seatbelt safety awareness campaign quietly died in Congress this spring. Transportation officials earlier this year issued a request for proposals from agencies, but now say the program will not be revived. Instead, the department will spend $495,000 on a public service campaign via the Advertising Council.

The U.S. Export-Import Bank abandoned plans to advertise its services to small businesses after promotions in test markets resulted in few, if any, inquiries.

Public service campaigns last year added only $7.9 million to the total budget, with few new efforts launched last year. The National Cancer Institute, part of the National Institute of Health, spent $329,000 on the first phase of a cancer prevention program, including tv spots warning against sun exposure.

The Food & Drug Administration spent $200,000 on a Reyes Syndrome information campaign and $150,000 on patient education. Fish & Wildlife Service spent $25,000 to promote the 50th anniversary of the duck stamp.

Some government agencies have increased their budgets.

The National Heart, Lung and Blood Institute this year signed a three-year, $2.1 million contract with Needham Porter Novelli, Washington, to spend as much as $200,000 more a year on its high blood pressure awareness campaign.

The Ad Council's revenue in 1984 dropped dramatically, to $2.4 million from $3.8 million. The non-profit organization will likely not regain that ground, because an April 1 change in contracting rules now makes it more difficult for government officials to hire the Ad Council instead of a for-profit agency.

New Ad Council campaigns include the Social Security Administration, which began with a $4,000 research program. This year, the council also picked up a $496,000 effort for seatbelts for NHTSA, but it also lost its $228,000 campaign for Treasury's direct deposit $228,000 campaign. Treasury asked for bids for the program, but now says it will not likely have any funding next year.

The Council retains long-time clients Smokey the Bear (Foote, Cone & Belding), the Peace Corps (Ted Bates), and Employee Support of the Guard and Reserves (D'Arcy MacManus Masius).

During 1984, Unilever U.S., New York, dug deep into its pockets to support a plethora of new products, particularly those in its largest U.S. division, Lever Brothers. National spending in advertising climbed 21.5% over 1983, to an estimated $395.7 million, making Unilever U.S. the nation's 17th leading advertiser.

Combined sales of the three major companies attached to Unilever U.S.—Lever Brothers, Thomas J. Lipton Inc. and National Starch & Chemical Corp.—climbed 15.2% to $3.8 billion in 1984. Net earnings rose 6% to $133.4 million.

Unilever B.V, the Netherlands' parent, in mid-September, 1985, made a move to expand its U.S. holdings by seeking to buy Richardson-Vicks, Wilton, Conn. The offer amounted to $54 a share, or $1.24 billion. The offer was rejected by Richardson-Vicks, which markets Vicks cough drops, Clearasil acne treatment and Vidal Sassoon shampoo.

The move demonstrated Unilever is not only on the prowl for expansion, but also is moving into the market as an unfriendly suitor. The company took over Brooke Bond tea merchants in Britain in a hostile takeover in the fall of 1984 and reportedly had given R-V preoffer assurances it would not engage in an unfriendly takeover. R-V took the cash offer, judged fair in most financial quarters, as hostile.

Lipton reported earnings of $71.3 million on sales of $1.1 billion, a 10.5% and 13.1% jump, respectively. Sales at National Starch rose 11.3% to $842.6 million. Improved cost-control measures helped push up earnings 17.7% to $55 million.

Sluggish earnings at Lever, however, held down total results. Lever's earnings dropped from $14.6 million in 1983, to $7.1 million for the same period in 1984, on sales that were up 15% to $1.8 billion. Despite the downturn in profits, it was only the second year since 1977 that Lever showed a profit.

Unilever is not holding back in advertising for Lever and others. Measured spending for its three U.S. divisions was up 21.6% to $226 million in 1984. The company also spent an additional $169.7 million in unmeasured advertising, up 22% from 1983. The unmeasured primarily included spending on point-of-purchase, coupons and direct mail.

A rash of new product launches and intensified ad support for existing brands put a crimp in Lever's earnings. Lever made a gutsy midyear decision to accelerate the launch of a crop of new products, including Sunlight automatic dishwashing detergent, Snuggle fabric softener and Surf laundry detergent. During 1984, Lever made its greatest marketing push to date against archrival Procter & Gamble in several household products areas.

Lever's Wisk liquid laundry detergent, backed with $18.4 million in measured media spending, held on to its top spot in the liquid segment of the detergent market with a 9% share. It also held a second-place spot in the total detergent business behind P&G's Tide powder. To capitalize on the strong Wisk name, Lever is planning a Wisk powder version.

The company fired another salvo with its new Surf powder. This is Lever's shot at gaining share in standard-density powders, the largest segment of the $3 billion heavy-duty laundry business. In its Houston test market, Surf, backed with $1.6 million measured spending, grabbed an impressive 13% share. The ad pitch for Surf is that it removes laundry odors. P&G liked the theme so much it borrowed it in its campaign for unscented Tide.

Backed with a $2.8 million measured spending budget, Lever set out to steal share away from P&G's Downy and Bounce fabric softeners. According to New York-based Salomon Brothers analyst Hugh Zurkuhlen, Snuggle has garnered about a 10% to 20% share and has eroded P&G's hold on the category. Lever's push for Sunlight automatic dishwashing detergent helped pull P&G's Cascade to less than a 50% share for the first time in years. A spending budget of $11.6 million helped Sunlight liquid light-duty detergent steal share from P&G's Joy, Ivory and Dawn. It ended the year with an 8% share.

In bar soaps, heavier spending behind Dove ($12.8 million in measured media), Caress ($8 million in measured media) and Shield ($7.3 million in measured media) helped increase Lever's total share of market from 18.5% in 1983 to 24% in 1984. Although Dove remains its biggest brand, Shield was able to carve out a 3.5% share and Caress a 4% share of the soap business, according to Mr. Zurkuhlen.

The toothpaste war was a bit rougher for Lever. "Lever was hit hard in toothpaste," Mr. Zurkuhlen says. "Share for Aim dropped to 10% while Close-Up came in at 6%." The decline in Aim's market share—it once controlled 14% of the market—hurt the most. Recently, Lever shifted the $20 million Aim account from Ogilvy & Mather, New York, to SSC&B. Lever called the move a consolidation, but many industry observers believe it was designed to provide Aim with a needed shot in the arm. Aim has a reported 9% share in the market, and Lever Bros.' Close-Up holds 8%.

Lever increased spending in 1984 on Signal mouthwash 37.5% to $4.4 million in an effort to score higher than a 10% share of the mouthwash business.

Lever also found itself up against some heady competition in the haircare market. The company's Dimension shampoo and conditioner line (backed with $15 million measured media) met up with eight other new product launches all vying for a chunk of the $3 billion market.

Dimension shampoo lost share during 1984, dropping from a one-time high of 6% to 3.6% at year's end. In the first quarter of 1985, Dimension's share dipped to 2.6% in supermarkets, according to Diana Temple, an analyst with Salomon Brothers, New York. In 1985, Lever will begin its assault on the botanical end of the shampoo business with Timotei, a brand Unilever currently sells in Norway, Sweden and Switzerland. J. Walter Thompson USA handles the account with the theme, "So mild you can wash your hair as often as you like."

Body sprays, a category Lever pioneered in the U.S., did not pan out to be the $100 million category industry suppliers had hoped for. In 1984, body sprays grew to only $65 million in sales. The flattening of the market hurt Impulse's total share, which dropped from a one-time high of 3.5% to 2.4%, according to Ms. Temple. Lever lowered its spending on Impulse—to reflect the market trend—by 17.6% to $6.1 million.

Unilever completed its acquisition of Shedd's Food Products during 1984, and those products were incorporated in Lever's food business. The foods division, aided by the strength of Shedd's Country Crock brand, achieved its first profit in 10 years.

Measured spending for Shedd's was $6.1 million. Shedd's joins Lever's Mrs. Butterworth's syrup and Imperial margarine as Lever food brands. Spending was down for Mrs. Butterworth's from $2.7 million in 1983, to $2.5 million. A new Imperial light margarine was launched. Imperial was backed with $2.3 million of measured spending, up 15% from 1983.

Lipton was also active on the new products front. Early in 1985, the company introduced decaffeinated beverages including an instant tea, sugar iced tea mix and a NutraSweet decaffeinated version. During 1984, Lipton continued to put heavy media dollars—$17.3 million measured—into teas to retain its dominant position. Lipton continued to market its popular instant soup mixes and introduced a new line of International Soup Classics.

Wish-Bone salad dressings received a face lift and a new ad pitch last year. The packaging now includes a tamper-evident seal, while the new campaign encourages consumers to "Give salads their fondest wish." Last year, Lipton sank $5.4 million of measured media into Wish-Bone. This year, Lipton is testing Wish-Bone Country Inn refrigerated spoonable dressing.

Two big launches falling under Lipton's Sunkist logo are Fun Fruits, bite-sized chewy fruit pieces, and Sunkist Light, a NutraSweet enhanced powdered drink. In total, Lipton backed its Sunkist products with $5.2 million of measured spending in 1984.

In addition to its shift of the Aim account, Lever shuffled Impulse body spray from JWT, New York, to SSC&B, New York. Thompson was assigned to handle Dimension and the new Timotei shampoo and conditioner.

For Union Carbide Corp., the 78th largest national advertiser with estimated ad expenditures of $93 million in 1984, up 4.2% over the previous year, 1984 was a year of extremes—substantial increases in sales and net income on one hand and tragedy in Bhopal, India, on the other.

Sales for the Danbury, Conn.-based company in 1984 were $9.5 billion, a 6% increase from 1983, and net income was $323 million, a substantial increase from $79 million in 1983. The immediate effect of the disastrous chemical leak in Bhopal, India, on Dec. 3, 1984, showed up in reduced earnings as the company took $18 million from the net income figure to cover operating, distribution and administrative costs incurred and anticipated relating to the accident.

The company took major steps to shore up its business performance in 1984-85 through reorganization at the company and job eliminations. The company also took efforts to thwart takeover attempts by parties accumulating Union Carbide stock, which has shot up because of takeover rumors and because of Carbide's announced plan to purchase its own shares.

Although 80% of Carbide's sales are in industrial products and technology services, the consumer products division, accounting for 20% of sales, is responsible for virtually all of the company's advertising. Division products include Eveready and Energizer battery products, Glad bags, Prestone antifreeze and Simoniz wax and car products. Revenues from consumer products were a little more than $1.9 billion, up less than 1% from 1983. The company realized 23% of its operating profit from consumer products in 1984, down from 32% in 1983.

The weak performance of the company's consumer products segment reflected a 5% drop in international sales. Domestic consumer product sales were up 4% from 1983, despite a 4.5% drop in measured domestic advertising expenditures.

The December accident at the Bhopal pesticides plant, which killed more than 2,000 people, cost the company more in bad publicity than it apparently did in strictly financial terms, at least in the short run. Officials set aside $17.6 million for initial expenses involved in coping with the disaster, but still reported earnings of $13 million in the fourth quarter of 1984.

However, recent signs have been more ominous. Revenues in the first quarter of 1985 dropped 9% from the first quarter of 1984, to $2.2 billion. The second quarter results also were down 6.2%, to $2.3 billion.

Analysts say, however, that Bhopal is not a factor in the financial decline. "The entire industry is down," says Leslie C. Ravitz, a vp at Salomon Brothers, New York. "There's been a significant erosion in petrochemicals, and U.S. productivity in general has been going nowhere in the past 10 or 11 months. Union Carbide's performance is about on par with the rest of the industry."

U.S. contribution to 1984 Union Carbide sales was $6.8 billion, or 71% of corporate sales, while U.S. profits were $677 million, 69% of total profits.

Measured ad expenditures in the U.S. last year totaled $50.6 million, down from $53.1 million in 1983, with tv accounting for 72% of the total, or $42.1 million. The decline in measured spending was accounted for in tv outlays, which dropped $3.1 million.

Union Carbide put the biggest share of its tv advertising budget into its Eveready products—almost $21 million for both spot and network. The company's new line of Energizer halogen flashlights, introduced last fall, was promoted with a $1.6 million tv budget, virtually all of it on network.

Among Union Carbide's unmeasured advertising estimate of $43 million in 1984 were efforts in the Summer Olympics, in which the company was designated exclusive supplier of flashlights and batteries. Union Carbide also financially supported several U.S. teams.

Media receiving year-to-year increases were spot radio, which had advertising of $3.6 million, up 28.6%; farm publications for Union Carbide agricultural chemicals, $2.2 million in 1984, up 28%, and outdoor, $1,000 in 1984 vs. zero expenditure in 1983. In all other measured advertising categories Union Carbide spent less in 1984 than in 1983. Magazine ad expenditures were down 47%; network cable, 21%; spot tv, 32%; network tv, 4%, and network radio, 3%.

The Eveready line represented about 44% of total measured advertising in 1984, or $22.2 million, with $18.9 million of that going to network tv and almost $1.3 million for newspaper supplements.

The second largest consumer product advertising budget was for Glad bags, for which Union Carbide spent $13.2 million, down from slightly more than $14 million in 1983. Again, the biggest share of that went for network tv. New products introduced in 1984 included a Glad cling wrap and a redesigned Glad disposer bag using fewer resins, made from Union Carbide's linear low-density polyethylene.

Prestone antifreeze advertising also dropped slightly to $7.4 million in 1984 from $7.5 million in 1983. The company says Prestone II's market share increased, even though prices were up. Prestone's market share was estimated at 53% in 1984, and later rose one or two percentage points. Brian Corvese, analyst with Drexel Burnham Lambert of New York, expects the share to rise more in 1985 because Dow chemical stopped producing competitor, Dowguard. The No. 2 share was held by Peak, put out by Northern Petroleum.

For Simoniz automotive products, Union Carbide spent $927,000 in advertising in 1984, down almost 50% from 1983. According to the company, sales of Simoniz products were hurt by a market swing to lower-priced waxes, but the products' over-all market position did not change.

Simoniz, with a 10% to 12% of the market, ranks third or fourth after Turtle wax of Turtle Wax Inc. at No. 1 and Du Pont's Rain Dance at No. 2.

The Bhopal incident, however, haunted Union Carbide, which replaced the president of the agricultural products division, Robert Oldford at his own request (the division has authority over the pesticides plants in Bhopal and Institute, W. Va., where there also have been leaks). Mr. Oldford, responsible for operations at the Institute plant, has taken other assignments.

The agricultural products division has been included in a reorganization of the company's chemicals and plastics businesses.

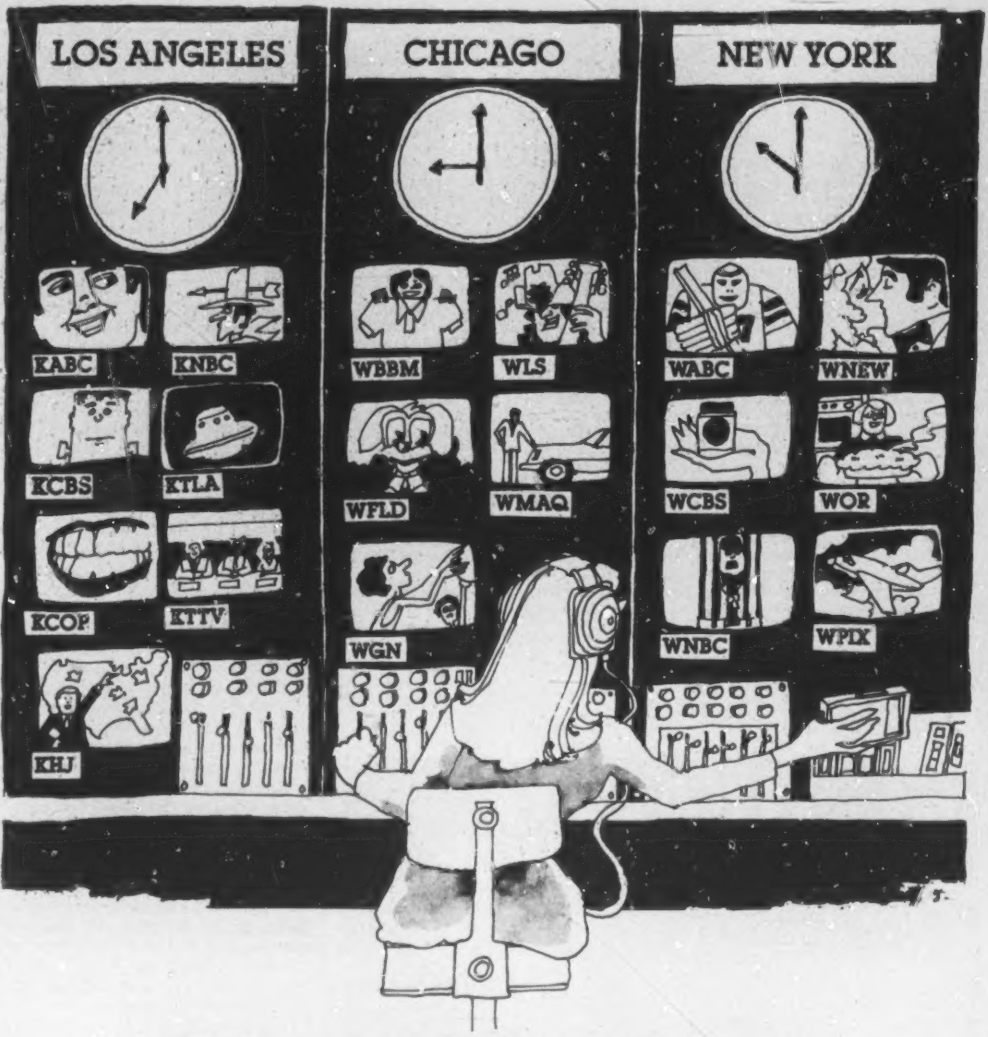
Announced in late August, 1985, it involved the consolidation of diverse units within the divisions and the elimination of 4,000 jobs by early 1986, many of those in the Danbury corporate headquarters. Analysts believe the consolidations will make it easier for Carbide to sell or close some business lines.

The company also has been moving rapidly in buying back its own stock. In late August, it announced a plan to buy 10 million of its 70.5 million shares. Such a move, typical of companies facing takeover, increases a company's earnings per share, raises the share value and ultimately makes a takeover more expensive. This came at the time GAF Corp. disclosed it had increased its holdings in Carbide stock from 7.1% to 9.9% with intent to possibly merge.

Although Union Carbide historically has sought its major revenues from petrochemicals and its metals and carbon products division, the former faces a worldwide overcapacity, and the latter has been hurt by its dependence on the long-ailing American steel industry.

In recent years, Union Carbide has been concentrating investment in its industrial gases, consumer products, and technology, services and specialty products division.

Union Carbide also is moving to divest itself of unproductive holdings. Besides closing the Bhopal plant, it indefinitely closed a major petrochemical facility in Puerto Rico and completed the sale of its interest in a Swed-



Whose eyes and ears are monitoring your most expensive TV spots?

Let BAR's videotape recorders be your eyes and ears in the three largest markets. We'll check your schedules every day of the year, 7 a.m. to 3 a.m. Missed spots, wrong copy, poor audio or video, clipped commercials, competitive conflicts …we'll report them all hot off the tubes. Competitive schedules and copy themes are sent weekly, estimated expenditures monthly.

ish producer of polyethylene.

However, operations did begin in 1984 at an ethylene glycol plant in Alberta, Canada, as did an oxo-alcohol facility at Carbide's Texas City, Tex., plant. It announced this year that it will build a plant in Ohio to produce resins used in making plastic products.

Carbide paid $78 million to Beatrice Cos. for STP Corp., the Boca Raton, Fla., company that makes oil and fuel additives. STP had measured ad spending in 1984 of $5.5 million, up 31% from 1983, according to LNA. STP reported sales of $97 million in 1984. Its products will fit in with other aftermarket Carbide products, Simoniz and Prestone.

In one major 1984 marketing move, Union Carbide moved its $2 million home products account from Leo Burnett USA, Chicago, to SSC&B:Lintas New York.

Sales	350	N/A	N/A
Net income	9	N/A	N/A
Advertising	59	39	50.8

Van Munching & Co., New York, was the 100th largest national advertiser in 1984 with estimated national advertising of $59 million, an increase of 50.8% over 1983.

The major boost in advertising was attributed to the introduction of Grizzly beer at a measured ad cost of $6.2 million—all in spot radio, and to a 47% increase in measured spending for Amstel Light to $14.7 million, and an increase of 31% in Heineken measured spending to $28.7 million.

Advertising was weighted heavily toward spot radio, in which Munching spending soared to $30.7 million, up 110% from the previous year.

At a time when domestic beer sales are slowly moving at a 2.5% growth rate, imports continue to thrive—the category increased 16.8% in 1984. Van Munching is in good shape with its market leader, Heineken. Amstel Light and Grizzly Canadian Lager are both growing forces in the field.

Industry sources attribute as much of the company's success to Van Munching's work ethic as to the products themselves.

Leo Van Munching Jr., who succeeded his father as company president in 1980, takes a hands-on operating approach to the company that keeps employes—from top executives to distributors—on their toes.

But his success as a manager is not surprising. Mr. Van Munching trained for many years watching his father operate in much the same fashion, which established the Van Munching style as intense, smart, thorough and enormously successful.

Leo Van Munching Sr. had been awaiting his opportunity to enter the U.S. beer market, and on Dec. 6, 1933 —the day after prohibition ended—he got his chance. With his wife, two children and 25 cases of Heineken, he headed for the States. His mission: to win the hearts of America with the Dutchmen's favorite beer.

Van Munching & Co. was incorporated as the exclusive U.S. importer for Amsterdam-based Heineken in 1946. The private company in 1984 had estimated sales $350 million and aftertax profits of $9 million.

Cash shipments at Van Munching grew to 32.2 million in 1983 (1984 figures have not been released), according to "Impact," an industry newsletter published by M. Shanken Communications, New York. Heineken in 1984 accounted for about 34% of total import shipments of 87 million cases. Imports shipments between 1973 and 1983 enjoyed an annual annual growth rate of 18% per year.

Heineken's import share in 1984, however, slipped from 37% the previous year, losing the couple of points to German beers such as Beck's and St. Pauli Girl. It still holds a comfortable lead over No. 2 Molson, which has a 15.9% share of the market.

As other foreign brewers have recognized the opportunities for success in the import category, the competition has mounted. Most importers stepped up their ad budgets, but none to the extent of Van Munching, whose accounts are handled by SSC&B, New York.

Van Munching spent a measured $28.5 million on Heineken in 1984 and $14.7 on Amstel Light. Molson, the next biggest importer, spent a measured $11.5 million on its Molson brands in 1984.

Both Van Munching and Molson spend heavily on spot radio. Van Munching's total measured ad budget allotted 61.9% to the medium, while Molson put 79.1% of its measured advertising into spot radio.

Van Munching's approach to promoting Heineken has been to communicate its implied import quality, and to ascribe to it a special mystique. Since 1981, Heineken's ads have carried the theme, "Come to think of it, I'll have a Heineken."

Although a member of the SSC&B team has explained that "the real challenge is for other beers to differentiate themselves from Heineken," Van Munching is by no means relying solely on the momentum that propelled Heineken into its No. 1 position to keep the company on top. Over the last few years the company has expanded its product line to include Amstel Light, introduced in 1981, and Grizzly beer, Van Munching's entry into the fast-growing Canadian Lager category. Grizzly was introduced in 1984 with a $6.2 million splash on spot radio.

Responding to consumer interest in low-calorie alternatives, Van Munching in 1981 introduced Amstel Light as the first premium imported light beer. The timing came on the tail end of the light beer explosion (industry growth figures dropped from double digit annual growth rates in the 1970s to 4.9% in 1983). But Amstel Light in four years has become the No. 1 imported light beer and the No. 10 imported beer over-all. The brand has also tripled its sales—from 300,000 cases in 1981 to 1 million cases last year—the bulk of growth occurring from 1982-1983 according to *Market Watch*, which monitors the industry.

Additionally, there is speculation that the popularity of Amstel Light has contributed to the slight falloff in Heineken market share.

Amstel remains one of the most supported imported beers by any importer, with $11.5 million of its $14.7 million total spending going into spot radio. The company says it plans continued budget increases.

The brand's SSC&B-created campaign, "95 calories never tasted so imported, 'til they imported Amstel Light," debuted only in radio and print, later moving into tv in 1984. The popular theme will be maintained in the coming months.

Of late the Van Munching entry to watch is Grizzly Canadian Lager. Van Munching introduced Grizzly in 1983 during the rise in popularity of Canadian lagers spurred on by the success of All Brand Importers' Moosehead Bear—now the No. 4 import.

And Moosehead isn't the only Canadian lager faring well in the U.S. Three of the top five imported beers hail from Canada: No. 2, Molson which showed 10% growth in 1983; No. 4, Moosehead, which charted 18% growth; and No. 5, Labatt's which showed 7% growth. In total, the three held 28.1% of the total import market in 1983.

Originally Grizzly, billed as "the bear of beers," was geared to a college-age market, younger than that of Amstel Light or Heineken. Its humor-laced radio spots, built around a "Grizzly encounters" theme, featured characters ranging from stockbrokers to Valley Girls describing their first, strange encounters with Grizzly. They ran primarily on young adult radio stations. Supporting print ads picturing the shadow of a large grizzly billed the product as "the new party animal."

Recently, however, Van Munching has rethought its focus. New Grizzly spots are being aimed at an older more established segment. The bulk of advertising will still be done on radio, however. This year's campaign spending, is not expected to come close to the $8 million to $10 million that All Brands plans to spend on Moosehead in 1985.

Net income	82	-77	206.5
Advertising	103	113	-8.8

Volkswagen of America, Troy, Mich., a subsidiary of Volkswagen AG, Wolfsburg, West Germany, reduced its U.S. advertising spending in 1984 by 8.7%, to an estimated $103 million, making it the 75th largest national advertiser.

A sustained economic upturn and continued profitability of the company's VOA division in the U.S. helped the company to return to the profit column in 1984 as it netted $81.8 million in income on $16.36 billion in sales. This compared with a loss in 1983 of $77.1 million on sales of $14.36 billion worldwide.

Sales and earnings for both 1984 and 1983 were converted from DM to dollars at the rate of DM2.79=U.S.$1.

In 1984, Volkswagen AG delivered 2,147,706 vehicles worldwide, a 1.6% sales increase, in spite of short supplies caused by a seven-week strike last summer by metalworkers in West Germany. VOA sales in the U.S. rose to 248,523 units, a jump of 15.9% over a year earlier.

Phasing out the Rabbit from production at VOA's Westmoreland, Pa., assembly plant also ate into available supplies. But total domestic sales of 73,838 Rabbits and the Golf models at Westmoreland helped meet demand in 1984, along with sale of 103,479 imported units last year, up from 77,009 units in 1983.

These sales gave VOA a 6.7% unit share of the import market, up from 6.4% in 1983, and a 2.3% share of the total U.S. auto market, same as 1983.

VOA moved up to a 2.5% share on sales for the first six months of 1985. The second half of 1984 saw production of the new Golf started up at the Westmoreland plant. In mid-November the new U.S.-built Golf and the new imported Jetta were introduced in the U.S. VOA's 1984 import sales consisted of 37,997 for the best-selling Jetta, up from 22,017 in 1983; 18,646 for the Quantum, up from 16,485; 17,251 for the Scirocco, from 13,703; 18,025 for the Vanagon, from 15,191; and 11,559 for the Rabbit convertible, marketed since the beginning of 1985 as the Cabriolet, from 9,613.

VOA had projected sales of the imported Vanagon at 25,000 for 1984 and reportedly had doubled its Vanagon ad budget over 1983 spending.

Two new models in the VW 1985 product line, the new Jetta sedan (priced at $7,975 for five-speed two-door sedan) and the Golf coupe

($6,790 for five-speed diesel, and $6,990 for the fuel-injected model), were on the receiving end of the biggest introductory budget in the company's history. Both got strong emphasis on their German heritage as VW attempted to shed its image as "the Rabbit Car Co.," with the upscale Jetta getting about 60% of the ad budget.

Measured media figures for 1984 found a major portion of VOA ad expenditures devoted to the Jetta, a total of $14.6 million, with the spending evenly divided between network tv and magazines. Budget for the new Golf in measured media was $9.6 million, $5.8 million for tv and $3.5 million for magazines.

The Audi models, which account for 0.7% of the U.S. market, had the support of $16 million in measured media, with about $8.7 million devoted to the Rabbit and $5 million for the Quantum.

Use of tv in 1984, according to measured media, remained virtually unchanged from the previous year, with spot at $16 million and network at the $22 million level. Magazines, however, registered a $4.4 milion drop in 1984, to $33.5 million, from $37.9 million in 1983.

Unmeasured media, say VOA marketers, consisted of heavy involvement in motor sports activity and sponsorship of promotional caravans to Super Vee races; direct mail merchandising program, and collateral, point-of-sale and dealer advertising materials.

The new U.S.-built Golf and the imported Jetta were introduced in November. The Golf is positioned as the "gold standard" in the hatchback segment of the subcompact market against the Honda Civic, Renault Encore, Mazda GLC and Ford Escort-Mercury Lynx. The Jetta will compete against the Mazda 626, Honda Accord, Ford Tempo and Mercury Topaz.

Ad spending for the eight-week introductory campaign began in November, 1984, and for pre-launch teasers came to more than $26 million, up 20% over the entire fourth quarter of a year earlier. Another substantial expenditure was budgeted for the introduction of the new Golf GTI in January.

With production of the elderly Rabbit halted at VOA's Westmoreland, Pa., plant in June, sales emphasis shifted to its replacement, the Golf (Golf as in "Golf Strom" or German for Gulf Stream), an entry which is expected to boost VW's fortunes in this country. The company hopes to ride the Golf to a 3.5% share of the U.S. market by the end of the decade. The Jetta and the Golf represent 75% of VOA's 1985 offerings in the U.S., compared with 50% for VW worldwide.

Ads for the upscale Jetta two-door five-speed sedan ($7,975) got a new line—"The affordable German road car." The Golf convertible, recently named the Cabriolet, ($11,595 for the five-speed), borrowed the old Chevrolet theme with "See the U.S.A. in a Cabriolet." One tv spot showed a Golf with a driver flying into the driver's seat, much like the old Hertz commercials. But the old tag line, "It's not a car. It's a Volkswagen." was continued for another year to also be used in ads for the GTI, Quantrum, Scirocco, Cabriolet and Vanagon models.

Ads for the U.S.-made GTI, priced at $8,990, also pointed out the car's selection as the *Motor Trend* domestic 1985 Car of the Year. The GTI, like the new Golf, is made at VW's plant in Pennsylvania.

Tv ads for the 1985 introductions broke in November on CBS-TV's mini-series "Ellis Island." Except for this and "60 Minutes," all other programing buys consisted of sports, mostly football coverage. In addition to the network tv, which received 55% of the budget, national magazines came in for a 41% allotment, with the remainder of introduction expenditures going into newspapers, outdoor advertising and telemarketing.

Another 1985 entry was the Jetta GLI, a 100-hp version of the restyled Jetta (priced at $9,995 for the five-speed four-door), which was introduced with little support, mainly with word-of-mouth, a few magazine ads and no tv. VW sales executives expect to sell 20,000 GLI models, about 20% of the 100,000 Jetta sales forecast for 1985.

In mid-1985, VW introduced three of its limited Wolfsburg Edition models—the Scirocco, the Cabriolet and the Vanagon camper—which received the last gasp of the company's advertising for the model year. The mid-year introductions had the support of newsweeklies and outdoor magazines, a print-only campaign.

The end of August, 1984, saw the end of the distribution agreement between Porsche and VOA, a $9 million annual marketing effort formerly handled by the VOA Porsche-Audi division. Loss of the Porsche advertising is reflected in the reduced ad expenditures reported for VOA in 1984.

The company underwent a reorganization in September, 1985, in which Volkswagen AG set up a direct reporting tier called Volkswagen U.S. Inc. Under this umbrella sits Volkswagen of America Inc. and Audi of America Inc. The Audi division has mounted an aggressive drive to record a 25% increase—"85,000 in '85"—allowing the division possibly to overtake Mercedes as the best-selling German import in the U.S. For 1984 Audi sold more than 71,000 units, a 48.5% increase over 1983 and almost 40% more than its previous high of 50,817 units sold in 1981.

Audi sales gains were posted even with departure of Porsche, although most of Audi's 409 U.S. dealers continue to sell Porsches. Leading National Advertisers reported Audi's measured media spending for 1983 at $15 million, a figure that rose near the $20 million level in 1984 as Audi placed strong emphasis on models in a more upscale price range—the 4000-S Quattro five-speed four-door sedan at $17,450, the 5000-S five-speed wagon at $23,675 and the Quattro Turbo five-speed coupe at $35,000.

The upscale models took a portion of the 1984 ad dollars and again in 1985. But the face lifted Audi 4000 and 5000 models, which remain the bread-and-butter cars in the Audi lineup, accounted for the lion's share, or about $17.5 million, of the total $20 million 1984 ad budget.

Audi's 1985 advertising emphasizes the brand marque while setting up distinct roles for each model to help sort out previously confused car identities. At one point, earlier ads for the Audi 4000 had positioned it as a high-performance sports sedan as well as a fuel-stingy family sedan. "The art of engineering" remains the main ad theme.

The smaller 4000 was marketed on its performance, and a 4000-S Quattro tv spot focused on functional driver benefits, such as fulltime 4WD. One of few traditional glamor shots of the revamped 4000 carried the headline "The understatement of the year."

The 1985 marketing plan also saw Audi step up significantly its use of a variety of unmeasured promotional media, including support of local dealer council ad efforts, direct mail and an owners magazine, "The Spirit of Audi," which debuted in December.

Warner Communications, New York, the 40th largest national advertiser, increased its advertising 8.3% to $181.7 million in 1984, however, divestitures of heavily advertised subsidiaries will likely cut deeply into spending levels for the media and entertainment conglomerate in 1985.

Warner's considerable sales have to do with selling off nonperforming units as well as zeroing in on its biggest and best-performing segment—entertainment.

In 1984, the company reported a net loss of $586 million, or 40% above losses in the previous year. This included $611 million in losses from discontinued operations. Total revenue increased 17% to $2.0 billion.

Ending the year with $830 million in debt, the company has been in a divestiture mode to rid itself of businesses not essential to its core operations and spin off unprofitable units.

The company also has trimmed executive and staff personnel, which has curbed corporate overhead costs by 50%. The divestitures:

- Divestitures were led by Atari, on which Warner spent $67 million of its corporatewide $81.7 million in nine measured media in 1984. Atari, a producer of home computer and home video games—the latter of which caused huge losses at Warner in the first half of 1984—was sold in June, 1984, to Jack Tramiel, former president of Commodore International, for $240 million in notes, with the option to buy up to 32% in the new company. Atari lost nearly $540 million in 1983.
- Franklin Mint, the world's largest direct marketer on which Warner spent $27.1 million in media in 1984, was sold to American Protection Industries for $167.5 million in cash and stock. Warner kept a 15% interest.
- Panavision, involved in the manufacture and leasing of photographic equipment used primarily in the motion picture and television industries, was sold for about $52 million.
- In March, 1984, Warner sold its cosmetics and fragrance division to Cosmair Inc. for $146 million; Warner Leisure, an 88.5%-owned subsidiary of Warner, halted the operation of 10 of its Gadgets restaurants; Warner disposed of controlling interest in the Cosmos Soccer Club, in July, 1984, and it sold its Pittsburgh Warner-Amex franchise to Tele-Communications Inc. (TCI) for $93.4 million.

All these efforts have begun to pay off. In the first half of 1985, Warner reported gains in both the first and second quarters. Earnings from continuing operations tripled in the first quarter, rising to $21.4 million; losses from Warner Amex shrank from $16.3 million to $4.4 million for the period (Warner and American Express hold a 50% share of Warner Amex).

In both quarters, the company cited the recorded music division as especially strong, as well as the filmed entertainment division. The broadcast and cable division also improved in the second quarter, with operating income at $356,000, compared with losses of $13.3 million in 1984.

Even with such high debt, Warner

The market and the media to ring up food store sales

The St. Petersburg-Tampa-Clearwater metro area is the super market of Florida. Not only is it the most populous and fastest growing major metro in the state, it is also the largest in food store sales … ringing up $2.4-billion in register receipts in 1984.

Pinellas County, home of the St. Petersburg Times and Evening Independent, has the largest piece of the pie. Residents here outspend neighboring Hillsborough County (Tampa) by more than $52-million.

On an average weekday, the Times and Independent reach seven of ten adults in Pinellas County. And four of five Times' readers in Pinellas regularly check out the food section. It's the dominant medium in the dominating market.

has become a target for takeover. The latest in a long line of suitors has been Lorimar, the entertainment and advertising conglomerate that has been seeking media properties. Lorimar owns New York-based agencies Bozell & Jacobs and Kenyon & Eckhardt.

Lorimar, in a filing with the Federal Trade Commission in late August, 1985, reported it might buy up to 15% of Warner stock at a cost of about $312.5 million. There has been much speculation that Chris-Craft Industries is interested in buying out Warner as well. Chris-Craft holds about 29.4% of Warner stock, much of it bought with Warner encouragement to fend off an unfriendly takeover attempt of Warner by publisher Rupert Murdoch in 1983.

Amid such attempts by outsiders to buy up the company, it is thought that chairman-ceo Steven J. Ross, is seeking to go private.

Warner in early September took action to buy the half of Warner Amex cable system it does not own when partner, Amex, received an offer to sell the system for $900 million from Time Inc.'s American Television & Communications Corp. and TCI.

Warner, under the joint agreement, can match any offer Amex should receive.

It in effect, countered the ATC/Tele-Communications offer in its sale of its two-thirds ownership in MTV Network and its half-interest in Showtime/Movie Channel to major communications company Viacom (half-owner already of the latter). The sales agreement contained a clause for Viacom to buy out Amex's half interest in Warner Amex within three months, or by late 1985.

Warner had spun off MTV Networks (MTV and Nickelodeon) into a public company in February, 1984, placing one-third of its stock on the market. Both MTV and Nickelodeon are supported by advertising.

Isn't it time we talked?

If you have a background in Brand or Account Management, we'd like to know you, and have you get to know us.

As Executive Search Consultants we represent many of the top package goods marketers and their agencies. We work primarily on referral: so if you're making a name for yourself we'll be calling you . . . eventually. If you've decided it's time to talk now, please give us a call or send a resume.

In March, 1985, Warner agreed to buy back 5.6 million shares held by Mr. Murdoch's News International at a price of $180.6 million, or $31 a share, plus $8 million in legal fees. Warner's relationship with one-time white knight, Chris-Craft, however, has soured, and now Warner is looking to regain control of the shares held by Chris-Craft.

Even though 1984 was a poor year for most of the company, some divisions did well. The recorded music and music publishing division, with performers like Prince, Madonna and Phil Collins, reported that operating income rose 48% to $89.6 million and sales of $817.6 million, up 6.8%. A proposed merger of Warner's record division, which holds about 17% of the U.S. market, and PolyGram, was halted by an injunction requested by the FTC. However, in May, 1985, the Motown Record Corp. was approached as a potential buyer of Warner's record division.

Warner's filmed entertainment division claimed 1984 as the best year in its history. Operating income rose about 36%, to about $150 million for a 19% share of the domestic box office market. Sales were $1.09 billion, up 28.6%. It is doubtful that this performance will hold up in 1985. A glut of movies in the crucial summer months has intensified competition, although two of Warner Bros.' summer releases, "Mad Max III" and "Pale Rider," were relatively successful. A total of 25 movies are scheduled for release in 1985. Warner Bros. paid more than $47 million to advertise its movies in 1984, up about $10 million from 1983.

The biggest expenditure in measured media for new releases—and virtually all spending on movies is in network tv and spot tv—was $6 million for "Gremlins." The next largest outlay, $3.8 million, went to "City Heat." Both "The Little Drummer Girl" and "Protocol" received $3.5 million. "Tightrope" got $3 million.

In the $2 million to $3 million range was "American Dreamer," "Cannonball Run II," "Never Ending Story" and "Police Academy."

Division sales			
Health care	2,303	2,247	2.5
Gums & mints	635	624	1.8
Other products	229	237	-3.4

Warner-Lambert, Morris Plains, N.J., marketer of popular over-the-counter brands like Rolaids, Listerine, Trident, Dentyne, Certs and Bubblicious, was the 13th largest advertiser with estimated U.S. advertising spending of $440 million in 1984, an increase of 27.3% over 1983 expenditures.

Warner-Lambert's measured ad spending increased 12.8% to $151.5 million, with nonprescription remedy products, gums and mints and the company's "other product" category—which includes Schick and other shaving products—reaping the ad harvest. Worldwide advertising and promotion totaled $607 million, up 2.5% from 1983, according to the company.

The company had total earnings in 1984 of $223.9 million, up 11.7% from 1983, on sales of $3.17 billion, up only 2%. The pattern continued in the first quarter of the current fiscal year as net income rose 11.1% to $60 million and sales edged upward to $795 million, a 2.3% increase over the corresponding period in 1984.

Although ethical healthcare products and prescription pharmaceuticals—sold in the U.S. under such trade names as Parke-Davis and Goedecke—represent 45% of the corporation's sales, little advertising was placed for these products in measured media. One of the few products getting measured support was Warner-Lambert's Lifestyle brand condoms. Thirty-second test spots created by J. Walter Thompson USA were aired on Columbus, O., radio stations and were expanded to cable tv and national radio.

Potential spending waits in the wings for Lopid, an anticholesterol drug now in use tests that may reduce the risk of a second heart attack by 20% to 40%. It could receive regulatory approval for that use by early 1986 if a four-year study of 4,000 men in Finland proves favorable. It is a potential $100 million market.

Warner-Lambert's over-the-counter products, including such widely known names as Gelusil, Rolaids, Bromo-Seltzer, Sinutab, Halls, Mediquell, Listerine and Efferdent, were paced in advertising spending by Listerine and Listermint mouthwashes, which got a 55% increase in ad spending in 1984 over 1983 to a combined $24.7 million. More than 80% of the outlay went to tv. The 105-year-old-Listerine, whose share of the combined total was $17 million, up 19.7%, increased its market share to a record 32% in 1984.

But Listermint slipped one notch in 1984 to No. 4 in the market behind Lever Bros.' Signal brand, the current No. 3. During the year, Warner-Lambert changed the Listermint formulation to fluoride and increased the brand's ad budget to $7.7 million.

Rolaids, Warner-Lambert's market leader in the antacid field with a 35% share of market, showed a 12% increase in measured advertising to $10.7 million, all of it in tv and radio. Split 30-second tv spots were used for the Rolaids and Efferdent denture products in 1984. Efferdent advertising itself dipped slightly in 1984 to $7.2 million from $7.3 million. Advertising for the cough suppressant tablet Mediquell, on the other hand, increased dramatically in 1984, to $6.9 million from $256,900, all on radio and tv.

With 20% of corporate sales in its gums and mint segments, Warner-Lambert puts big advertising dollars into such products as Dentyne, Certs, Chlorets, Chiclets, Trident, Ultramint and Bubblicious bubble gum.

Advertising for Trident sugarless gum and mints increased 17% in 1984, to $17.7 million, as Warner-Lambert faced a big advertising campaign by Wm. Wrigley Jr. Co.'s new aspartame-sweetened Extra gum. Trident gum is in a virtual dead heat with Wrigley's Doublemint as No. 1 seller in the $3 billion worldwide gum market.

Measured advertising for another top-of-the-market Warner-Lambert product, Halls cough tablets—with 55% of the market—remained almost constant at $7.1 million in 1984.

Schick and other shaving products are the major segments of Warner-Lambert's "other products" category, accounting for 7% of company sales in 1984. Although total Schick sales dropped off in 1984, Warner-Lambert is making a strong push for its 2-year-old Schick disposable razors, which are fighting Gillette and Bic products. A tv campaign for Schick disposable razors features San Francisco 49er quarterback Joe Montana, whom Schick officials hope will counter the Bic pitch by pro tennis star John McEnroe. Schick measured advertising in 1984 dropped 28%, despite the new ad campaign, to $5.9 million.

In Warner-Lambert's total measured media advertising in 1984, spending was up for all media except spot radio, which declined 19% to $1.3 million. Magazine was up 40%, to $10.1 million; network tv increased 16.6% to $87 million; network radio was up 4%, to $8.1 million, and cable increased 46%, to $2.9 million.

This year W-L's Joseph D. Williams was elected chairman-ceo. He was named to the ceo post in late 1984, succeeding Ward S. Hagan, who remained as chairman at the time. Mr. Hagan then retired in June, 1985, opening the door for Mr. Williams to step in.

In a major agency change in 1984, Warner-Lambert ended its longtime relationship with William Esty Co. for consumer products such as Clorets, Schick, Lifestyle and Personal Touch women's shavers. The accounts, totaling about $14 million annually, went to J. Walter Thompson USA and Ted Bates Advertising/New York.

Wendy's International, Dublin, O., ranked as the 80th largest advertiser in 1984, with domestic ad spending rising 40.9% to an estimated $90.8 million, as the company achieved what it termed "one of the most successful years in its history."

That is a far too modest appraisal by almost any standard. In truth, the chain experienced one of the most successful years in the history of the restaurant industry as a result of successful new product introductions and a marketing program that became near legendary.

Systemwide (company and franchise-operated stores) sales rose 26% to $2.42 billion in 1983, while the number of restaurants operating rose only 12% to 2,992.

Systemwide average-unit volumes increased better than 13% in 1984, rising to $861,000. By contrast, average-unit volumes at industry leader McDonald's are higher ($1,264,000), but rose only 8% last year.

Some of Wendy's 1984 sales gain can be attributed to the five-variety line of "Hot Stuffed" baked potatoes introduced in November, 1983. That product line was met with skepticism in some corners when introduced, but analysts estimate the item accounted for perhaps 25% of per-store sales at the peak of its initial popularity early in 1984. Wendy's now sells more than 600,000 baked potatoes daily, and the item still represents between 10% and 15% of sales.

The successes of the "Hot Stuffed" potatoes and Wendy's "Garden Spot" salad bars, behind which the chain launched its first magazine advertising campaign, made the chain especially attractive to women. As a result, Wendy's customer base expanded demographically as well as numerically.

But it was one woman in particular who largely was responsible for Wendy's substantial sales gains last year. An octogenarian former beautician named Clara Pelier, who had never eaten in a Wendy's until last year, did more for the chain when she simply croaked, "Where's the beef?" than 14 years of previous advertising by Wendy's.

In the summer of 1983, Wendy's national agency Dancer Fitzgerald Sample, New York, and Chicago director Joe Sedelmaier had created a series of commercials depicting customers being "victimized" at "some other hamburger places." The indignities included using frozen beef or making customers wait in line while special orders were prepared.

To begin 1984, a second series of two new ads on the victimization theme were launched. Both featured bewildered customers asking the question, "Where's the beef?" when served small burgers on giant buns.

Mr. Sedelmaier and executives at Wendy's and DFS thought they had two memorable commercials on their hands. And they thought one line, "Yes, it is a big, fluffy bun," delivered by actress Mildred Lane (one of three elderly women featured in one spot), might catch on.

They had the right premonition for the wrong line. After a slow initial reception for the campaign, launched Jan. 9, Wendy's executives began receiving funny field reports. At Watterson High School in Columbus, O., students were chanting "Where's the beef? Where's the beef?" when opposing teams ran out at basketball games. A Denver radio station was running a contest to find someone who could say "Where's the beef?" like actress Clara Peller.

Wendy's extended the commercial's network flight to six weeks from the originally budgeted five weeks. But even after the spot disappeared from the airwaves, "Where's the beef?" mania continued to build.

The commercial became famous enough to attract detractors, among them Gray Panthers national president Margaret Kuhn, and quick-buck artists. Wendy's finally organized an official licensing program to cut off t-shirt and trinket marketers using the advertising line without paying royalties.

When Democratic presidential hopeful Walter Mondale used the line to disparage the programs of rival Sen. Gary Hart, "Where's the beef?" moved from fame to immortality as political cartoonists everywhere incorporated the line into drawings. *Time* and *Newsweek* both covered the ad campaign. Syndicated columnist Bob Greene profiled DFS copywriter Cliff Freeman. Awareness of Wendy's reached an all-time high.

At the end of February, everyone was back in Mr. Sedelmaier's studio to shoot a sequel. A slight delay ensued when Ms. Peller engaged a lawyer/agent to renegotiate her contract. But an agreement was reached, and filming was completed for the spot, in which Ms. Peller and her friends phone the owner of the Big Bun chain that had served the skimpy burger.

"Where's the beef?" III debuted in late August, 1984, coupled with a scratch-card game tied to ABC-TV's "Monday Night Football." One of the new spots—not directed by Mr. Sedelmaier—depicted Clara Peller at a political rally, while another showed her and her two companions roaring through the streets in a 1949 Dodge in their continuing search for "the beef."

The one-time happy working relationship between Wendy's and Clara Peller came to an end this year after the actress appeared in a commercial for Campbell Soup Co.'s Prego Plus spaghetti sauce. When the diminutive actress held up a jar of the sauce and barked "I found it," Wendy's ended the relationship. If "the beef" was going to be found, they argued, it was going to be at a Wendy's rather than on a supermarket shelf.

Wendy's new-found popularity happily coincided with an earlier-devised plan to increase the chain's national advertising profile. Operators had voted to increase their contributions to fund network advertising from 1% to 1.5% of their sales, beginning in 1984.

As a result, the chain had at its disposal a larger tv budget. For the year, Wendy's network tv jumped 86% to $34.7 million from 1983. Spot tv spending rose 25% to $39.4 million.

There's more to dining than beef, and, in November, Wendy's surprised consumers expecting Part IV of the "Where's the beef?" saga by promoting chicken instead. Mr. Sedelmaier produced a new commercial that asserted "parts is parts," to explain that Wendy's chicken sandwich is a breast fillet rather than the chopped "parts" used by some other guys. For "The Challenge of the Chickens," Wendy's spent $15 million.

In 1985, Wendy's has been concentrating on still other nonbeef menu favorites.

It introduced nationally its "Light Menu," which brings together its baked potatoes and salad bar and adds such low-calorie options as light dressings and whole-grain buns. For the "License to eat" campaign, Wendy's also returned to magazine advertising in women's books, which had worked well with the baked potato rollout.

For those who think fast-food should be fun as well as healthy, Wendy's began testing hot dogs in several markets. Soups have appeared on menus in other test sites.

In July, Wendy's finally introduced nationally the breakfast menu it had been tinkering with for years in a succession of test markets. McDonald's already has muffins and biscuits, Burger King has croissants on its breakfast menu, so Wendy's has built its morning menu around that old standby, toast.

La Opinion
La Opinion
La Opinion
La Opinion

The leading Spanish language daily newspaper in the U.S. 213/748-1191

The "Only Wendy's" network tv campaign for the breakfast rollout featured customers lip-syncing a jingle set to the Platters' 1950s hit "Only You." The chain had used a similar technique and the same tune in advertising two years earlier.

Wendy's next move could be expanded availability of a line of dinner platters that have been testing in Cincinnati for several years. Quality-control and preparation snags have kept the line from being rolled out, but Wendy's is known to want to increase dinner business and be the first major chain to introduce a separate dinner menu.

While adding to its menu, Wendy's also has added to its roster of advertising agencies.

Lockhart & Pettus, New York, was added as the chain's first agency of record for black consumer advertising. Similarly, Mendoza, Dillon & Asociados, Newport Beach, Cal., has been assigned advertising for the Hispanic market.

Wm. Wrigley Jr. Co., Chicago, the nation's 93rd largest advertiser, spent an estimated $70.4 million on national advertising in 1984, up 5.9% from 1983.

Net earnings for the year were $39.7 million on worldwide sales of $590.5 million, increases of 1.3% and 1.5%, respectively. The company attributed the revenue increase to higher unit sales in the U.S., from which it derived about 71% of its total sales.

International sales revenues, especially in West Germany, Austria, Taiwan and Canada, also were higher, in local currencies. But a strong U.S. dollar forced consolidated revenues downward. Wrigley reported its "advertising costs" worldwide as $82.8 million in 1984, down 8.7% from $90.7 million in 1983.

Wrigley continued to spend the bulk of its ad budget on network and spot tv buys. In 1984 Wrigley's total tv spending remained near the $60 million level. Meanwhile, the company moved about $2 million into magazines, a medium it did not use the previous year, according to Leading National Advertisers, which monitors six media. Network radio buys decreased from $3 million in 1983 to less than $1 million in 1984, basically reflecting a halving of measured ad spending for

Hubba Bubba bubble gum.

Leading the company out of a stagnant period was the national introduction of Extra, a sugar-free gum containing NutraSweet, the trade name for G.D. Searle's artificial sweetener aspartame. Wrigley rolled out Extra last summer, several months after placing it in western test markets.

Extra's rollout was backed with a heavy tv and magazine campaign. Although it was not shipped nationwide until mid-year, Extra received more ad support than all but three Wrigley brands: Doublemint, Spearmint and Freedent.

Wrigley has placed heavy emphasis on the sugar-free category because it is the only gum segment that has shown significant growth in recent years. Early this year, the company extended the Extra line by introducing Extra bubble gum. The new product was the first bubble gum with NutraSweet to hit the market. Extra already has proven far more successful than the company's first sugar-free entry, Orbit, whose market share never reached double digits before the brand was phased out last year. By the end of 1984, Extra had moved into the No. 3 position among sugar-free gums, having grabbed an estimated 23% of the fast-growing segment. Warner-Lambert responded by beefing up support for its market-leading brand, Trident. Advertising for Trident sugarless gum and mints increased 17% in 1984, to $17.7 million.

Several other brands are doing battle for market share with Extra and Trident, including Warner-Lambert's Chewels, Life Savers' Care Free and Ragold's Velamints.

Wrigley's top four sugared brands—Doublemint, Spearmint, Juicy Fruit and Big Red—control a combined share of at least 40% of the $1.8 billion in total gum sales. Doublemint continues to reign over all other gum brands with an estimated 17% market share, although Trident is close behind.

The Doublemint campaign, which continued with its longstanding "Double your pleasure" theme, was given a more contemporary look in 1984. More than $15 million was spent on the campaign in 1984, the heaviest support for any Wrigley brand.

Wrigley invested more than $12 million in the Spearmint "Really keeps you hummin' " campaign that was begun in 1982. A new Spearmint campaign, themed "Get the little lift," was launched in June, 1985. The brand currently holds an estimated 10% share of chewing gum sales.

Juicy Fruit, which claims an estimated 8% market share, continued in 1984 using its upbeat youth-oriented theme, "The taste that's gonna move ya," which was begun in 1983.

The company reported that Big Red, a cinnamon-flavored chewing gum, posted its fourth consecutive year of growth. The brand received about $8 million in ad support in 1984, down from close to $10 million the previous year.

To widen its appeal among older consumers, Wrigley added a cinnamon flavor to its Freedent brand. The company continued to back the brand with tv and magazine ads that stressed its breath-freshening ability and the fact that it will not stick to most dental work.

Amurol Products, Chicago, Wrigley's associated company, recorded 1984 sales revenues that were almost even with its all-time high the previous year. Amurol's product roster changes from year to year because many of its gums are novelty brands tied to current fads. In 1985, the company introduced two new flavors: one linked to the Dr Pepper soft drink label and another to the feature film "Rambo," one of the year's biggest box-office draws. The Rambo gum was shaped like bits of shrapnel.

Big League Chew, a shredded bubble gum that has been on the market for several years, continued to be the major contributor to Amurol's performance. Big League Chew, which is packaged in much the same way as chewing tobacco, is very popular with young males who seek to emulate big-league baseball players.

The company has said it plans to continue to focus on the sugar-free segment and that it will substantially increase marketing and promotional support for its brands in the near future to boost volume worldwide.

Xerox Corp., Stamford, Conn., the country's 64th largest national advertiser, spent an estimated $127.6 million on U.S. advertising in 1984, up 15.3% from 1983.

Worldwide, Xerox had a total ad budget of $241.4 million, up 13.5% from 1983, according to the company. The U.S. ad budget included measured advertising of $58.7 million, down 1.1% from 1983, and unmeasured advertising of $68.0 million, up 34%. A Xerox spokesman says unmeasured advertising includes support costs such as direct mail, brochures and advertising salaries, space and materials.

Xerox realigned its measured advertising budget by increasing its network tv spending 51% to $34.3 million and eliminating its network radio budget of $875,000. It also increased its outdoor advertising budget to $108,000 from $4,000.

Other losers were spot radio, down $2.1 million, or 82%; spot tv, down $1.6 million, or 54%; newspapers, down $5.2 million, or 38%; magazines, down $2.3 million, or 15%, and cable tv, down $161,000, or 28%.

Despite the over-all advertising cuts, the company boosted it expenditures for general promotional advertising substantially. Xerox put $8.2 million, or 61.3% more, into promotional advertising in 1984.

This is indicative of the change in mentality the company is going through, says Phil Cavalier, who follows Xerox for Pershing & Co., an arm of Donaldson, Lufkin & Jenrette, New York.

Mr. Cavalier says Xerox has spent the past several years trying to re-establish the reprographics side of its business and has done so. Now it is shifting its attention to the computer output business, particularly its laser printer, copier products and computer communications.

The increased advertising in general promotion, Mr. Cavalier says, represents an attempt to educate buyers and corporate executives about the quality and availability of Xerox computer products.

Xerox points out that this spring Xerox launched its "Directions" campaign, which represented a departure from the company's previous new-product introduction methods.

In the past, the company had introduced one or two products at a time. In April, during "Directions I," it introduced 14 or more new office systems products at one time.

"Directions II," the second of four such announcements scheduled over the next two years, will introduce a like number of new products.

The change to announcing new products in batches gives the company "greater focus if it's done all at once," Xerox says and "reassures the public that Xerox is serious in the office automation area."

Another area that showed a major jump in spending on advertising was that of business machines, which climbed to more than $9.1 million from less than $673,000. This, too, is part of the company's drive to support its computer-oriented business, Mr. Cavalier adds.

He cites the strength of the company's software r&d program and the sophisticated research aimed at intercomputer communications, which he says is the next major area for growth in the company business.

Xerox's r&d spending also reflects the shift in corporate emphasis. Spending on reprographics research has fallen to an estimated $290 million for this year from an estimated $371 million in 1982. Meanwhile, research spending in the information systems area has climbed this year to an estimated $210 million to $225 million from $106 million in 1983.

Xerox also raised spending for its electronic typewriters, whose measured advertising climbed 14.7% to $12.8 million for the year.

The company substantially reduced its advertising for copiers, trimming 34% off its 1983 spending to $15.1 million. It also cut advertising for its Crum & Forster insurance subsidiary by 68% to $62,600.

The drop in copier advertising represented a shift from the startup program supporting the very successful Series 10 copiers, which first were offered in 1983, to "maintenance advertising, which doesn't have to be at such high levels," Mr. Cavalier says.

The strength of the dollar against overseas currencies and the continuing problems in the property and casualty insurance field hurt the company's balance sheet, company officials report.

Operating revenues rose 6.3% to about $8.8 billion, while net income fell 38% to $290.5 million.

The first quarter of this year was not much better. Xerox reported a 9.8% earnings drop for the first quarter to $114 million. Much of the problem was laid to the Crum & Forster insurance subsidiary, whose net income fell 60% to $10 million. The company has raised the insurance subsidiary prices, which it contends have been "grossly inadequate" for several years along with prices among other industry players.

With the higher prices now rolling through, Crum & Forster has begun to show substantial improvement. Within the first half of the current fiscal year, C&F earned $10 million in the first quarter and $4 million in the second, compared with a $25 million gain and a $15 million loss recorded in the respective quarters of 1984. Overall first-half earnings in 1985 at Xerox rose 5.6% to $233.9 million.

Two other segments of Xerox's financial services business—Xerox Credit Corp. and Van Kampen Merritt—did well in 1984. The entire financial services segment generated $2.8 billion in revenues, up 18%, but contributed only $22 million to the company's net income, down from the $163 million the previous year.

Xerox shut down and wrote off its Shugart disc drive operation in 1984, and announced plans to move its Diablo computer printer operations to a highly automated plant in California.

In April, Xerox announced plans to sell its educational publishing operations for a total of more than $500 million. International Thomson Organisation agreed to buy Autex Systems; Gulf & Western Industries will get Ginn & Co.; Field Co. agreed to buy Xerox Education Publications, and Times Mirror Co. will buy Xerox Learning Systems. Reed Holdings, Inc., will buy R.R. Bowker Co., and Elsevier U.S. Holdings Inc. will buy University Microfilms International.

The company also licensed some parts of Savin Technology for possible application in copying and printing. This could lead to a return to the computer wars with possible introduction of a new line of computers manufactured by Olivetti & Co. of Italy.

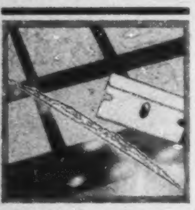
Cocaine: Equal opportunity for addiction



Second of two parts.

Feds eye coke link in Landau case. P. 64
No coke epidemic, say top shops. P. 68
Baseball's coke trial raises concern. P. 70

By JOSEPH M. WINSKI

Here's something else you've come a long way in, baby: Cocaine abuse.

In advertising and other fields, there are signs that cocaine use among women not only is growing, but growing rapidly.

Two years ago, when the 800-COCAINE Helpline began operating in Summit, N.J., one of every four callers was a woman. Today, women account for about half of the 900-to-1,500 calls received daily from people with cocaine problems, a Helpline spokesman says.

Specific numbers on over-all cocaine use by women aren't available, but drug-abuse experts say the 50% figure probably holds across the board. That is, about half the estimated 5 million-to-6 million people who regularly use cocaine are women.

This is believed to represent a rapid rise in use—and abuse—among women in the last few years. Experts attribute the increase partly to the influx of women into the workplace, where exposure to cocaine is more likely. In addition, heightened career aspirations among women have introduced them to the kinds of frustrations and pressures that make the physical and mental "lift" provided by cocaine all the more tempting.

Cocaine dependency poses different problems for women than it does for men, the experts say. One obvious area of concern is cocaine's effect during pregnancy. A study published earlier this month by doctors at Northwestern University Medical School found that women who used cocaine during pregnancy suffered more spontaneous abortions and suggested that their children are more likely

PM-GF combine would top the advertiser list

New York—Philip Morris Inc.'s announcement last week of its intention to acquire General Foods Corp. will create the nation's largest consumer-products company and possibly its largest advertiser.

Chairmen of both companies said Sept. 27 they would urge their respective boards to approve the merger this week. Several days after PM approached the company, GF management accepted a $120-per-share bid for a total price of $5.7 billion.

The deal will combine two companies that last year had total worldwide sales of $22.8 billion ($13.8 billion from PM and $9.02 billion from GF), and a combined ad budget of $1.02 billion ($570 million from PM and $450 million from GF).

This surpasses the newly completed acquisition by R.J. Reynolds Industries of Nabisco Brands, which created a $19.2 billion worldwide company. Those two last year spent a total of $1.01 billion in advertising ($678 million for RJR and $335 million for Nabisco Brands).

Final 1985 ad figures will determine if PM thus has denied archrival RJR a place in the sun as the nation's leading national advertiser. (The 1984 leader was Procter & Gamble with $872 million.)

A look at the agency rosters of PM and GF indicate few apparent client conflicts. Most at risk, observers believe, is Young & Rubicam. Y&R is a major GF agency, and also serves RJR as agency for Canada Dry and Kentucky Fried Chicken. RJR is known to have a strict agency-conflict policy regarding other tobacco companies, even though the products involved may not compete.

Other agencies for GF include Ogilvy & Mather; Grey Advertising; Ted Bates Advertising, and D'Arcy Masius Benton & Bowles. Philip Morris' major shops are Leo Burnett USA; Backer & Spielvogel, and Wells, Rich, Greene.

Terms of the deal, apparently concluded as Hurricane Gloria roared through the Northeast last week, indicate GF will operate as a separate company within Philip Morris. GF chairman James Ferguson will become vice-chairman of PM.

The acquisition of a company the size of GF is a clear signal that no publicly held package-goods marketer is immune to a takeover bid.

With Nabisco recently acquired by RJR and Carnation Co. in Swiss-based Nestle's fold, size apparently is not a key issue in today's frenzied search for established brand names in the U.S. (AA, Sept. 23).

Among the names of other companies bandied about

Bottlers say margins as high as 9 to 1

Classic laps new Coke

Copyright © 1985 by Crain Communications Inc. Quotation or reproduction in whole or in part without written permission is expressly prohibited.

An Advertising Age roundup

Coca-Cola Classic, the old American favorite, is beating the reformulated Coke hands down in almost all markets across the U.S., according to an informal survey of bottlers by Advertising Age.

Only one bottler contacted by AA, Coca-Cola Bottlers of Detroit, reported new Coke selling better than Classic. In some markets, the old favorite was ahead by a 9-to-1 margin.

Officials at Coca-Cola USA in Atlanta said they are giving the marketplace 60 to 90 days to settle down before looking for a definite trend. They also suggested that with the new megabrand strategy, sales of new Coke versus Classic is not an issue. The company brought original formula Coke Classic to market last summer following consumer protests after the company reformulated the 99-year-old drink.

An exec at Coca-Cola Bottling Co. of New York said he was rooting for the new taste because it was the best hope for regaining share that Coca-Cola has lost to rival Pepsi-Cola over the last two decades.

In New York, the old favorite is ahead by a 2-to-1 margin. In blind taste tests, consumers pick the new taste, but when the blindfold is removed, they go for Classic, an offi-

A-B pops Baybry's as its cooler

By SCOTT HUME

Anheuser-Busch, the nation's leading brewer, will announce Oct. 3 that it will test in San Francisco a "cooler" beverage marketed under the brand name of Baybry's, sources said last week.

St. Louis-based A-B has held off entering the fast-growing, $350 million cooler segment of the beverage industry while it searched for something more than a "me-too" product.

Although details were scarce last week, sources said Baybry's is not a

Last Minute News

Joint-venture brew to be named Masters III

Alexandria, Va.—Masters Brewing Co. will announce this week that its first beer will be named Masters III. The label is said to bear medallions depicting the founders of the three breweries that have created Masters Brewing under a joint venture (AA, Aug. 5): Adolph Coors (Adolph Coors Co., Golden, Colo.), John Molson (Molson Cos., Toronto) and Prince Ludwig II of Bavaria (Kaltenberg Castle brewery, Kaltenberg, West Germany). Coors already is brewing the beer. Molson will handle marketing, and sources named Dancer Fitzgerald Sample, New York, U.S. agency for Molson Golden, as most likely to get the Masters Brewing account.

Beatrice eyes new agency on County Line

Chicago—Beatrice Cos. is reviewing its $5 million County Line cheese account, now at D'Arcy Masius Benton & Bowles. Bozell & Jacobs and "a few other Beatrice agencies" are pitching the account, sources say. The product is in the process of going national (AA, Aug. 5).

Jack in the Box revives review

San Diego—Jack in the Box has reopened the review of its $20 million account (AA, Sept. 9) to HCM and Tatham-Laird & Kudner, both Chicago; TBWA, St. Louis; Marschalk Co., San Francisco, and W.B. Doner & Co., Southfield, Mich. Incumbent Wells, Rich, Greene/West, also is taking part. A decision is expected in mid-October.

HIGHLIGHTS

Busch forecast: Coolers 1

Anheuser-Busch, the nation's leading brewer, will announce Oct. 3 that it will test in San Francisco a "cooler" beverage marketed under the brand name of Baybry's. A-B held off on the fast-growing cooler segment while it searched for something more than a "me-too" product.

A Classic triumph 1

Coca-Cola Classic is beating the reformulated Coke hands down in most U.S. markets, according to an informal nationwide survey of bottlers by Advertising Age.

Dorland moves on Dancer 3

A top executive with Saatchi & Saatchi's Dorland Advertising agency in the U.K. confirmed that Dorland is negotiating to take a new equity position in Dancer Fitzgerald Sample, but denied that the U.K. agency wants to buy Dancer outright.

Admen wait for aftershock 4

Most of Mexico's ad industry escaped serious damage from the worst earthquake in that country's history, but the industry, one of the biggest in Latin America, and dominated by U.S. agencies, may be in for some big ad budget cutbacks following the quake.

AAF taps FTC exec 6

The chief of the Federal Trade Commission's ad regulation unit next month will join the American Advertising Federation in the latest reshuffling of ad industry lobbyists.

Doctors team up 10

"Out-of-the-ordinary" Dr Pepper will take a wacky turn next year when pop sex therapist Dr. Ruth Westheimer joins the Pepper bandwagon, as part of a campaign featuring parodies of her own radio call-in program.

Burger King's momentum ebbs 12

Burger King has found it difficult to sustain the momentum it gained from its 1982 "broiling vs. frying" ad salvo. Awareness of BK's advertising, as measured by Advertising Age's monthly adWatch survey, jumped nearly 16 percentage points after the first campaign broke. Subsequent campaigns have moved the awareness needle by smaller and smaller increments.

Cosmair's dollars and scents 32

The decision by Cosmair's Warner Cosmetics division to drop its Ralph Lauren cosmetics and skincare lines means more new fragrances and increased advertising on existing brands can be expected next year.

Pressing the Japanese 36

Japanese car and truck marketers may be forced to step up ad spending as competition in the low end of the automotive market intensifies this fall. New competitors from Europe and Asia are joining the fray.

On-Cor takes to tv 42

On-Cor Frozen Foods took on the heavyweights of the low-calorie frozen-entree business in September when it served up a major tv ad blitz produced by commercial comic whiz Joe Sedelmaier. Created by Grant/Jacoby, the campaign marks the first time the Chicago-based food marketer has used tv ads to support the fast-growing On-Cor Lite frozen dinners.

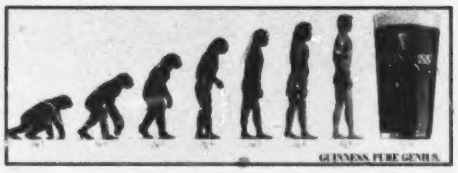
Going out on your own 48

The rewards reaped from starting one's own agency are well worth the risks involved, according to a survey of personnel at small to medium-size agencies. The satisfaction of running their own show more than compensates for the headaches incurred.

A blast from Western's past 87

Western Airlines is using top Hollywood talent, including Gene Kelly, Fred Astaire, William Shatner and Leonard Nimoy, and its former "The only way to fly" slogan in a new campaign it hopes will reestablish it as the dominant airline in the West.

INTERNATIONAL



GUINNESS. PURE GENIUS.

Pure genius for Guinness 52

U.K. beer giant Guinness Brewing, via Ogilvy & Mather, is launching a new campaign with a global strategy—but not execution—for Guinness beer. The campaign will position the stout as an upmarket brew, but the advertising will look different from market to market.

IBM invokes the gods 53

IBM Corp., in a recent test campaign via J. Walter Thompson Co., Hong Kong, dropped the Charlie Chaplin character as its company spokesman and replaced him with Lu Pan, the patron god of Chinese craftsmen and toolmakers, and Zong Zhi, a Taoist sage.

OTHER NEWS

U.S. ad agencies with interests in Mexico are beginning to organize relief efforts to help the victims of that country's recent devastating earthquake. Page 4.

Time Inc. is moving on two fronts to boost its international unit. In Hong Kong, Time agreed in principle to buy 80% of one of the leading English-language publications in the Far East, *Asiaweek*, from the Readers Digest Assn. In Canada, Time was exploring the possibility of establishing a new Canadian edition of its flagship publication *Time*. Page 38.

Ohlmeyer Advertising, the ad agency half-owned by Nabisco Brands, is being sued by a 64-year-old former senior vp-director of broadcast media on grounds of age discrimination. Page 38.

Times Mirror Co. is firing the latest and largest research salvo in the newspaper industry's running battle with direct mailers and alternate-delivery companies to win the hearts and minds of retail advertisers. Times Mirror is ready to release to major advertisers what the media conglomerate says is the most comprehensive study ever done of the relative effectiveness of the circular advertising format compared with traditional run-of-press advertising. Page 47.

Johnson & Johnson, which often turns to the courts to complain about competitors' advertising, has itself been named in a lawsuit challenging ad claims for its Reach toothbrush. The suit, filed in federal court by Oral-B, a subsidiary of Gillette Co., charges J&J with devising deceptive performance tests for the Reach toothbrush. Page 54.

The growing importance of Jeep to the survival of American Motors Corp. played a key role in the auto maker's decision to consolidate its advertising at Saatchi & Saatchi Compton. Page 80.

Ralston Purina Co. will spend $5 million on the national rollout of the industry's first skinless, boneless canned pink salmon. Ralston is telling retail buyers that figure is nearly triple the ad dollars spent in the salmon industry this year. Page 91.

COMING THURSDAY

Time Inc.'s Richard Stolley is watching the debut of his brainchild, Picture Week, *in a 13-city test, which began Sept. 23 and is to run through yearend. If Time deems test results satisfactory, it would begin early next year a national rollout of the self-styled "magazine of news and human interest."*

Special Report examines the magazine industry and its changing expectations. After 10 years of outstanding growth, business is leveling off, but that doesn't necessarily mean bad news for everyone.

Nynex will join videotex venture

By BRIAN MORAN

New York—Nynex Corp. reportedly has pledged $50 million to join RCA Corp. and Citicorp in a $150 million videotex venture.

In joining the three-way venture, the Northeast's Baby Bell operating company would replace J.C. Penney Co., which bowed out of the RCA-Citicorp partnership late last year.

RCA and Citicorp have been searching in earnest for another partner since early summer and reportedly are close to bringing Nynex into the fold.

J.C. Penney is now exploring a videotex project with GTE Corp. and a group of French companies.

A Nynex spokesman declined comment on the report. RCA and

Burnett, Needham after Mac?

By SCOTT HUME

Leo Burnett USA and Needham Harper Worldwide will go head-to-head in a creative shootout for the Assn. of Chicagoland McDonald's Restaurants' $8 million-to-$10 million co-op account.

In announcing these two finalists, the co-op set up a match-up between McDonald's national agency, Burnett, and the shop it succeeded on that account nearly three years ago. Needham officials declined comment on the co-op's announcement, and it was unclear at press time whether the agency would continue to seek the Chicago assignment.

Despite losing McDonald's

ADWATCH

BK sees ad awareness slipping away

By SCOTT HUME

Burger King's "Battle of the burgers" marketing strategy appears to be losing its sizzle.

The nation's No. 2 hamburger chain changed the focus of fast-food restaurant advertising nearly overnight in the fall of 1982 when it launched its "broiling vs. frying" campaign. Tough, comparative advertising—some called BK's approach snide—suddenly was acceptable in what had been a fairly gentlemanly marketing arena.

In the months since BK's ad assault, harder-edged advertising has evolved into a necessity as competition in the maturing market has sharpened. Another effect has been a steady increase in ad spending, especially for tv advertising, by the nation's chains.

But Burger King has found it increasingly difficult to sustain the momentum it gained from that initial ad salvo, although it has tried heartily and spent heavily. Awareness of BK's advertising, as measured by ADVERTISING AGE's monthly adWatch survey, jumped nearly 16 percentage points in October, 1982, after the first "Broiling vs. frying" campaign broke. Subsequent campaigns under its continuing "Aren't you hungry?" theme have moved the awareness needle by smaller and smaller increments.

In June of this year, Burger King launched one of its most important and most heavily supported ad campaigns since the burger battle broke out. The $30 million campaign (AA, May 13) announced that it had enlarged its flagship Whopper hamburger by nearly 20% in weight and enlisted a bevy of tv personalities (Mr. T, Mr. Bill, Loretta Swit, Bruce Weitz and others) to deliver the news.

The results: In the July adWatch survey, 19% of the 1,000 persons nationwide asked to name the first fast-food advertising that came to mind named Burger King, a 3.6 percentage-point increase from its 15.4% share in June.

In August, $30 million later, the thrill was gone. Last month, Burger King's advertising came to mind first for only 13.4% of the sample, a 5.6 percentage-point drop from July. That decline put the chain's ad awareness score lower than it has been since November, when it still was looking for a way to combat the success of Wendy's "Where's the beef?" and subsequent campaigns.

Last month, BK's share of top-of-mind awareness was in third place, behind leader McDonald's (36.2% of first mentions) and Wendy's (14.8%). In other words, BK's awareness this summer took one step forward, then two steps back.

The mid-August campaign featuring the "He-Man and Masters of the Universe" characters (AA, Aug. 19) seemingly didn't do anything to help its score (although the September survey results may yet reflect some gain). Those spots were targeted primarily to children, but still represented a hefty, $20 million effort.

Clara Peller and Wendy's proved that unexpected creative can boost ad awareness even for a chain that is outspent by its competitors. But those increases are hard to maintain over time. While BK and Wendy's have sought to sustain their creative momentums, McDonald's has been steadily and sharply increasing its league-leading tv advertising budget.

Through the first six months of 1985, McDonald's spent $143.3 million on tv advertising ($88.4 million of it on network), according to figures released last week by the Television Bureau of Advertising. Over-all, that was a 40% increase compared with what Big Mac spent during the first two quarters of 1984.

Burger King's tv advertising bill during that period came to $64.1 million ($26.9 million on network). That was only a 5% increase compared with the same period in 1984, as BK readied for the second-half Whopper and He-Man spending spree.

Wendy's tv budget increased 12%, to $37.7 million ($19 million on network). It, too, set its sights on the second half, launching its $15 million "Choose fresh. Choose Wendy's" campaign last month (AA, Sept. 9).

But the legacy of Burger King's lesson that fast-food has become a marketing-driven industry continues. Ad spending is increasing at more than just the big burger chains. Domino's Pizza spent $7.5 million from January to June (including $4.3 million on the networks), up 313% from last year's first-half, all-spot tv budget.

Taco Bell, heavily backing its Pizzazz pizza item, boosted spending 61% to $19.5. Church's Fried Chicken spent $6.1 million, up 62%. Long John Silver's, with its new "Sounds good to me" campaign, boosted spending to $11.7 million from $9.3 million.

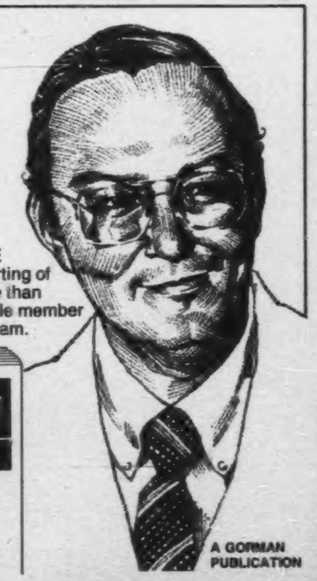
A GORMAN PUBLICATION



AdWatch

(Continued from Page 12)

ness is measured by asking a nationally projectable sample of consumers to name advertising in a variety of product categories that first comes to mind from all seen, heard or read in the previous 30 days.

In August, 1,000 adults were questioned by telephone. Under adWatch methodology, an increase or decrease of 2.8 percentage points is considered statistically significant and attributable to more than sample variation.

In the other long-running ad-awareness battle, last month some of the fizz began to come out of Coca-Cola's dominance.

Coke, whose share of first mentions in the soft-drink category grew from 27% in January to 53.4% in July, had a gulp taken out of its lead in August as the flurry of attention given the reformulation and Coca-Cola Classic introduction subsided. But its advertising still is No. 1 in consumers' minds by a wide margin. Last month, 48.9% of the sample said Coke's ads came to mind first, down 4.5 points from July. Pepsi held steady in the No. 2 slot at 25.7% of first mentions; 7UP was third with 2.2%.

Among other significant changes in the August survey results:

- The single largest loser in last month's survey was TWA. Its share of first mentions in the **airlines** category dropped six points to 9.2% of first mentions from 15.2% in July. That decline also moved it from the No. 2 to the No. 3 slot behind United (18.4%) and Delta (10.9%, up 5 points). Just as some of TWA's awareness gain appeared to come from its involvement with the Lebanese hijacking incident, so, too, some of Delta's gain may have been the result of the plane crash in Dallas.
- Levi Strauss returned to a double-digit share of first mentions in the **apparel** category for the first time since February's 10.8% score by gaining four percentage points in August to a 13.4% share. Jordache remained No. 2 with 4.6%; Sears remained No. 3 with a 3.3% share.
- Advertising for no brand but Procter & Gamble's Tide ever has registered a significant gain or loss of share in the **laundry products** category. Probably because no other brand has a large enough share or top-of-mind awareness to make such a swing possible. August was a "down-glitch" month for Tide, its share of first mentions dropping 3.6 points to 25.6% from 29.2% in July. All moved into the No. 2 slot by a whisker with 4.1%, easing ahead of Cheer's 4%.
- The top 10 in unaided awareness (without a specific product category mentioned) in August were, in descending order: Coca-Cola, Pepsi, Miller/Miller Lite; Budweiser/Bud Light; McDonald's; Burger King; Wendy's: Pizza Hut; Tide, and AT&T.#

Pepper

(Continued from Page 10)

unidentified top recording artists. Dr Pepper is woven into the lyrics of each song, some of which are two minutes long. Pop, middle-of-the-road, country and rock are all part of the lineup.

A male singer in one spot warns that "You can take me to the cleaners, but leave my Dr Pepper behind." That will be followed by a parody response sung by a female singer.

Three new tv spots for Diet Dr Pepper, combined with the sure-to-be-talked-about Dr. Ruth radio spots, reflect the company's belief that its problems in the diet soft-drink market relate to marketing rather than to formulation.

Dr Pepper, though, is going along with bottler requests that it test a 100% NutraSweet diet version. That product soon will be in two as-yet-unidentified test markets for an almost yearlong test.

The company, however, still thinks the appeal of 100% NutraSweet soft-drink formulas is more a matter of perception than taste. Dr Pepper is concerned about the stability and shelf life of 100% NutraSweet soft drinks, because its brand remains on many shelves longer than brands of its leading competitors, Mr. Hamlin said.

Thus, Dr Pepper is boosting support of its diet brand with three new tv spots, also with science-fiction-inspired story lines.

Dr Pepper's love affair with the beast Godzilla will extend into 1986 with a sequel to this year's spot. "Godzilla Too" picks up with Godzilla's thirst having been appeased by regular Dr Pepper.

Now comes "Mszilla," a *femme fatale* monster wearing a polka-dot bow on her head. As she storms in a rage along Tokyo harbor, toppling buildings in her path, Godzilla becomes smitten with her and ultimately wins her affection with a Diet Dr Pepper.

A spot titled "Droids" portrays efforts to ferret out the real human being from the computerized replicas. The efforts succeed when the human selects Diet Dr Pepper, and the droids choose their ordinary diet soft drink.

"You can teach a replicant to drink—but you can't teach it to taste," the spot concludes.

The new Diet Dr Pepper theme line is "Diet Dr Pepper. The taste for out-of-the-ordinary bodies."

Dr Pepper will turn to a "burst" media strategy in 1986, when it will try to concentrate its $25 million-plus budget in roadblock-type bursts and in sponsorship of key media events.

A July 4 burst will be augmented by a four-week national Screen Vision buy, in which spots will be placed in movie theaters.

Also, Dr Pepper will continue its heavy schedule with MTV: Music Television and will introduce a syndicated tv program being produced by Young & Rubicam, New York, Dr Pepper's agency.

The program, initially a 13-week series, is entitled "The Canned Film Festival" and features a series of what Mr. Hamlin said are "the worst movies ever made, so bad that they are classics."

Lorraine Newman, a former "Saturday Night Live" regular and a star of the recent movie "Perfect," will host the exclusive Dr Pepper series.

Y&R's team for the 1986 Dr Pepper campaign included Louis DiJoseph, creative director and art director; copywriter Lee Kovel, and producer Christine Jones. Director Bob Brooks of BFCS, London, directed the tv spots. HEA Productions, New York, created the music. Copywriters Victor Levin and Howard Gould generated the Dr. Ruth radio spots.#

Strickland heads ad group

CHARLOTTE, N.C.—Downs Group account exec Kirby Strickland has been elected 1985-86 president of the Carolinas chapter of the Business/Professional Advertising Assn.

Tired Feet. Tired Data.

Tired data could be one of the risks when you use mall surveys.

How many people are willing to take all the time needed to answer your important questions when their minds are on shopping—or getting home and off their tired feet?

A mall intercept survey might be appropriate for some marketing research needs. But when you need a well-defined sample for reliable, representative market or product information, consider the advantages of the NFO consumer panel. Our panelists answer your questions in the comfort of their own homes. Without tired feet.

The NFO consumer panel. It's effective. It's representative. And it costs less.

Stop by our booth at the Las Vegas AMA Conference to learn more about the benefits of the NFO consumer panel. And give your tired feet a rest.

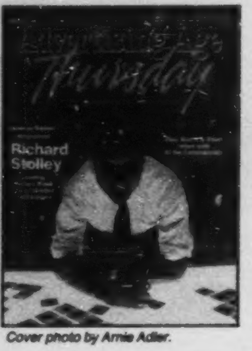
Stolley's time has come

Richard Stolley is watching the debut of his brainchild, *Picture Week*, in a 13-city test, which began Sept. 23 and is to run through yearend. If Time deems test results satisfactory, it would begin early next year a national rollout of the self-styled "magazine of news and human interest." Estimates of the price tag for introducing what would be the company's eighth magazine run from $10 million to $20 million. *See Page 20.*



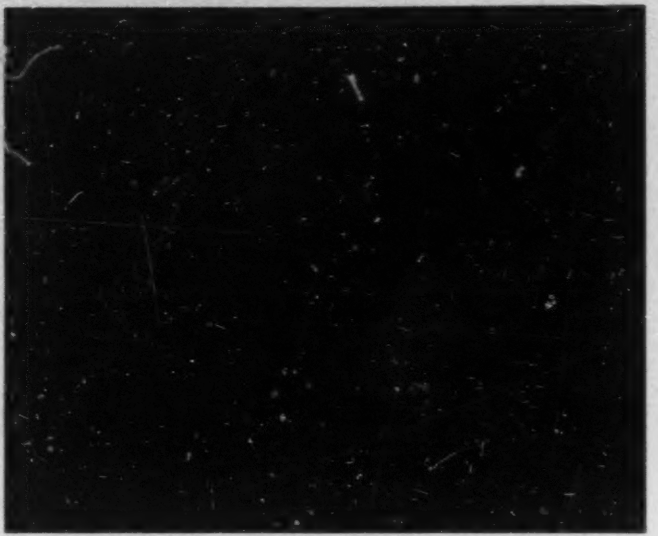
Cover photo by Arnie Adler.

Saatchi

Procter & Gamble's gentle attempt to break away from its traditional pattern of campaign execution *(see story at right)* is being matched, on an agency level, by Saatchi & Saatchi Compton. The agency's new animated commercial for Ivory bar soap, now in test, uses a style resembling that used in ads for Perrier. Strategy is the traditional one for the brand, but the execution represents P&G's continued attempts to break out of some of its executional molds. It's also one of the new spots that Saatchi hopes conveys the same message about the agency. The spot is the lead commercial on Saatchi's new reel, meant to represent work done at the agency under Robert Levenson. *See Page 65.*

Special Report— Magazines

After 10 years of outstanding growth, business is leveling off for the magazine industry, but that doesn't necessarily mean bad news for everyone. *Starting on Page 15.*



Mom and Pop Cloud proudly watch as their son creates his first roll of Procter & Gamble's White Cloud bathroom tissue, in new tv spots from Leo Burnett USA, Chicago.

New P&G ads not always cut from slice-of-life

By Laurie Freeman

Talking cartoon clouds? Bouncing laundry products? Animated bars of soap?

This is the new look of Procter & Gamble advertising, now that the package-goods giant is giving its agencies more freedom to experiment with creative executions.

The current campaign for Bounce fabric softener sheets is a creative breakthrough for Cincinnati-based P&G, some agency executives say. The tv spot, via Benton & Bowles, New York, is set to the Pointer Sisters' pop hit "Jump" (AA, Sept. 16), an appropriately bouncy tune but not the sort P&G's advertising has danced to in the past.

At least three other P&G agencies now feel comfortable enough to try animation instead of the company's traditional live-action, slice-of-life scenarios.

The newest animated P&G commercial, for Ivory bar soap, will air soon in test markets.

The spot, from Saatchi & Saatchi Compton, uses detailed b&w outlines of people washing with Ivory soap. Copy describes Ivory as the soap that's "pure and naturally wonderful," while the line drawings are enhanced with carefully placed splashes of color.

By the end of the 30-second spot, the animated characters have decided there's nothing better than to "experience Ivory for a real feeling of clean."

Animation

"We needed a fresh way to tell a familiar story and animation fit right in," said S&SC president-ceo Ed Wax.

"We're taking advantage of P&G's desire to experiment with different executions, which we both feel will allow us to focus on better creative," Mr. Wax said.

The changes are more evolutionary than revolutionary, with animated spots generally being worked in as one of several executions produced for ongoing campaigns.

Dancer Fitzgerald Sample, for instance, has animated the same basic story line used earlier for a live-action Solo detergent spot.

In both spots, a woman is pictured as having forgotten to add fabric softener to her wash. After running down the stairs, tripping over a cat and begging the washing machine to "please wait," she flings herself against the machine, only to find that she's too late.

The most recent campaign for White Cloud bathroom tissue, from Leo Burnett USA, Chicago, is entirely animated (AA, July 1).

The idea to use animated, talking, puffy white clouds was "a creative cloudburst," said Peter Husting, Burnett exec vp-client services.

"With White Cloud, the idea just burst out of the product's positioning, to emphasize its fullness and softness," he said. "Animated clouds made it easier to talk about the product."

In the campaign, consisting of 30 and 45-second tv spots, two proud White Cloud "parents" watch over their cloud son as he creates his first roll of bathroom tissue. The theme is "The softest and thickest bathroom tissue ever."

Although Burnett has thought about using animation for various P&G products over the years, "it's difficult to fit the animation to a brand," Mr. Husting said.

Neither Mr. Husting nor S&SC's Mr. Wax believes P&G is in the midst of an animation trend, but they do say the company is looking for new ways to "intelligently sell their products' efficacy."

S&SC executive vp Kit Mill added: "P&G is looking with enthusiasm at stuff they refused to look at before.

"There will still be plenty of typical P&G slice-of-life ads, but more and more there will be some fun stuff." ■

Presstime

Budget returns to tv...

CHICAGO—Budget Rent A Car on Oct. 12 breaks its first network tv spots in several years as part of a $5 million fourth-quarter campaign. Print ads in consumer and trade magazines support. D'Arcy Masius Benton & Bowles handles.

...As Napa winery arrives

YOUNTVILLE, CAL.—Domaine Chandon on Nov. 18 will use tv for the first time with a 30-second spot promoting Chandon Napa Valley Brut sparkling wine. The spot will appear in Los Angeles, Miami, New York and San Francisco during the seven-week, $800,000 campaign. Tatham-Laird & Kudner, San Francisco, handles.

Co-op to Burnett today?

CHICAGO—Assn. of Chicagoland McDonald's Operators is expected today to assign its $8 million-to-$10 million co-op account to Leo Burnett USA, following the withdrawal of the other finalist, Needham Harper Worldwide (AA, Sept. 30).

Van de Kamp's drops shop

LOS ANGELES—Van de Kamp's Frozen Foods has dropped DiIorio, Wergeles, New York, from its $5.5 million ethnic entree account to consolidate all advertising at D'Arcy Masius Benton & Bowles. B&B for the last eight years has handled the $5.5 million seafood account for Van de Kamp's, which is a division of Pillsbury Co., Minneapolis.

Beatrice brings in Bozell

CHICAGO—Beatrice Cos. has moved its $5 million County Line cheese account (AA, Sept. 30) to Bozell & Jacobs from D'Arcy Masius Benton & Bowles. Separately, Beatrice has confirmed that it is seeking buyers for its Avis, Danskin, Pennaco Hosiery and International Jensen units (AA, March 11). Those units have projected 1985 sales of $1.1 billion. Ted Bates Advertising/New York, handles Avis; Grey has Danskin; Rosenfeld, Sirowitz & Lawson has Pennaco, and HBM/Creamer here handles Jensen. Beatrice's stock continued climbing this week, fueled in part by rumors that former Esmark chairman Don Kelly will orchestrate a leveraged buyout.

'USA Today' makes gains

ROSSLYN, VA.—Gannett Co. will report in the Audit Bureau of Circulations FAS-FAX report that paid circulation of *USA Today* for the six months ending Sept. 30 has risen to 1.36 million, up about 5% from a year ago. Combined paid and bulk circulation now exceeds 1.4 million. Gannett has hiked the paper's rate base 7.7%—a b&w page goes to $26,849 and a color page to $33,561. The circulation figure follows by a month the daily's newsstand price hike to 50¢ from 35¢. Circulation losses due to the price increase were averaged in with circulation gains made earlier in the year.

ABP lowers dues

NEW YORK—Assn. of Business Publishers has reduced member dues by 25%, effective with billings for the quarter starting Oct. 1. The move is

Viewing the future in a new light

By Belinda Hulin-Salkin

These are anticlimactic times for the consumer magazine industry. Newsstand sales are down, ad pages are down, and big-ticket/big-name mergers are almost commonplace.

After 10 years of seemingly limitless growth, capped by a record-breaking 1984, business is leveling off. While no one is predicting gloom, most observers look to the future with a slightly wary eye.

"I think one of the problems with the magazine industry is that we've come through a period of enjoying our success, and now that we've hit a plateau, we forgot how far we've come," says John Mack Carter, editor-in-chief of *Good Housekeeping* and director-magazine development for Hearst Corp., New York.

He says things weren't nearly as bright in 1975 as they are today, and ad revenues still are growing. "When you have that much success, two things happen," he says. "The first is that we begin to take success for granted.

"The second is that we forget how we got here—namely, by exceptionally hard work and in spite of intense competition."

The good news for magazines, Mr. Carter says, is they are getting more serious attention from advertisers than ever before, largely because of the search for network tv alternatives.

According to the Publishers Information Bureau, New York, total consumer magazine ad revenues reached $2.4 billion for the first half of 1985, up 8.2% from 1984, although ad pages were down 1.4% for the same period.

"The industry is coming off of last year's Olympic doings, so the decline is not too surprising," says Marianne Howatson, senior vp-marketing development for the Magazine Publishers Assn., New York.

Ms. Howatson cites a few national advertising categories for which magazine spending is down from last year. Tobacco advertising, for instance, dropped more than $30 million from 1984 for a decline of 15%. Computer advertising is down; liquor advertising is leveling off.

Offsetting those categories, revenue gains were made in the areas of food (up 20% for the first half of 1985, compared with the similar period last year), entertainment (up 27%), snack and soft drink (up 32%), and soap and cleanser advertising (up 62%). Still, the net revenue increase of 8.2% is modest by recent standards.

"From 1982 to 1984 advertising revenues increased 33%," Ms. Howatson says, "a staggeringly big jump. [Because] 1984 was such a big year, for anyone to even compete with that massive level of spending is difficult."

The bad news for the magazine industry comes largely from outside influences. Although paper and printing costs seem to be stabilizing, postal rates are expected to increase. "We continue to be at the mercy of the Postal Service both for rates and efficiency," one executive says, "and we can't do anything but pay the bill."

There's more bad news from the racks. Declining newsstand

(Continued on Page 16)

Belinda Hulin-Salkin, Advertising Age's Philadelphia correspondent, examined the science category in last October's Special Report on magazines.

Unless otherwise noted, all circulation figures used in this Special Report represent total paid circulation as reported to Audit Bureau of Circulations for the six months ended June 30, 1985.

Viewing

(Continued from Page 15)

sales for magazines are a concern throughout the industry as publishers rely on the kindness of retailers for market penetration and display space.

"There have been some pretty dramatic losses in single-copy sales," says Michael Garavalia, newsstand sales manager for Advance Publications' Conde Nast subsidiary, New York. "And even if subscriptions go up, it's much more economical to have a newsstand sale than it is to get a new subscriber."

Mr. Garavalia says videocassette recorders are at least partly responsible for declining single-copy sales.

"There are at least 10 million vcrs out there, and people don't read while they're watching the vcr," he says. "The same people who buy publications are the ones buying vcrs. Even after people have bought the machine, they're renting and buying movies with money they might have spent on magazines."

According to the MPA, single-copy magazine sales dropped to a combined per issue average of 81.8 million for 473 magazines in 1984, down from a high of 92.8 million for only 372 titles in 1978. That 1984 figure represents a decline of 2 million from 1983.

David Lee, MPA vp, says the industry is working with distributors and retailers to reverse the trend; he says over-all circulation continues to grow.

Still, the industry's rack sales have declined 10% over the past five years, a fact Mr. Lee partially attributes to consumer price resistance. Magazine cover prices have increased 40%, on the average, over the same period.

In the same vein, the industry is suffering from a decline in multiple purchases. Consumers who once grabbed two or three magazines at the checkout counter now are reaching for only one.

To some extent, newsstand sales are a victim of increased subscriptions. "The industry has gotten very sophisticated at marketing subscriptions," Mr. Lee says. "As a result of direct mail techniques, large subscription agencies, direct marketing and tv ad support, the over-all public is buying more magazines than ever before . . . 312 million paid copies per issue in 1984."

Bucking newsstand trends, New York-based Family Media expects rack sales of *Ladies' Home Journal* to go up by 100,000 units in 1985, over the nearly 1 million sold in 1984. Michael Senior, the company's newsstands sales director, credits a strategic price-reduction campaign for the success.

"In November, 1982, we priced 25% of our newsstand copies at $1.19," Mr. Senior says. "We built up to 40% in May, 1983, and by 1984 all newsstand copies were $1.19. Just as slowly, we rolled the price back to $1.50, where it is today.

"It was our way of saying 'Try me, you'll like me.' "

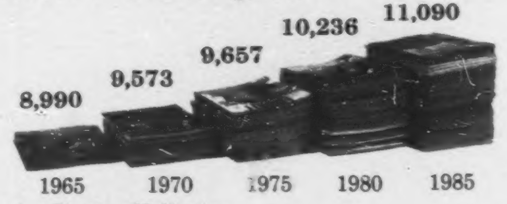
According to Mr. Senior, Family Media did no advertising to support its price promotion.

"The purchaser that bought two or three magazines each month is gone," he says. "And when one-magazine shoppers saw *Ladies' Home Journal* at $1.19 and *McCall's* and other magazines priced higher, they bought us."

Mr. Senior says the company has seen no decline in sales since reinstating the old cover price. The experiment was so successful, the company is trying it on recently acquired *World Tennis* and *Savvy*.

They keep stacking up . . .

Growth of U.S. magazines



Source: Ayer Directory of Publications

Competitive pricing aside, magazines have to secure a place at the checkout counter or newsstand before they can catch a shopper's eye, and with the ever-increasing number of titles—estimated by the "Ayer Directory of Publications" at 11,090 for 1984—that can be difficult.

"The proliferation of titles bothers us," says Gay Bryant, editor of *Family Circle*, New York. "In the good old days it was us and *Woman's Day* at the checkout counter and that was it. These days there are as many as 30 other titles up there—along with razor blades and cookies.

"Instead of sitting back and waiting for a woman to spot us, we've got to really work to catch her eye."

Ms. Bryant says such seemingly unrelated magazines as *People* give *Family Circle* strong competition for discretionary dollars. In addition, magazines have fewer opportunities to entice shoppers. "Women used to average five trips to the store a week," she says. "Now they make one trip."

Changing consumer profiles and interests continue to contribute not only to magazine marketing, but also to the character of individual magazines. As the industry attempts to cash in on surfacing consumer passions, the number of narrowly focused magazines multiplies. Observers expect the trend toward specialized consumer titles to continue, possibly at the expense of more general-interest publications.

One relatively new tenet of the magazine industry is that every publication has its price. After the sale of The New Yorker Magazine Inc. to Advance Publications and Ziff-Davis Publishing's consumer titles to CBS, no company could be considered too elite or too large to be a candidate for sale.

"Mergers and acquisitions are a fact of life in business today, and not only in the magazine industry," says Peter Diamandis, president of CBS Magazines, New York. "You're going to be involved in one sometime in your life, so you might as well get ready.

"Magazine publishing is a tough business these days and size gives an economy of scale," he says, predicting that 1986 will be another tough year for the industry. "There's been a slowing of the total economy; it's a time of consolidation."

(However, Mr. Diamandis says that doesn't extend to CBS' own publications. Through its $362.5 million acquisition of 12 Ziff-Davis titles this year, CBS acquired several publications that directly compete with its own magazines. He says speculation that the company eventually will combine the competing books is off-base. "People don't seem to grasp the Procter & Gamble concept of marketing," he says. "Procter & Gamble has 18 soaps. They're not going to drop Tide just because they have 17 other brands.")

Outside the magazine industry, observers expect to see more title acquisitions in the coming months. "There are a lot of sellers who simply want to move on to other things," says Steven Rattner, vp at Morgan Stanley, New York.

"The magazine industry has always been characterized by a lot of entrepreneurial companies, and at some point entrepreneurs often come to the conclusion that they want to get their money out and retire or do something else."

Mr. Rattner says the high prices magazines are commanding are tempting a lot of privately held publishing companies to sell. There is still a market for established magazines because, over-all, he says the industry is very healthy.

"The rate of growth of advertising over the last 30 years has been phenomenal, and that's what has fueled this industry," he says. "And the outlook is good because advertising is still going to grow as fast or faster than the [gross national product].

"There's no question that magazine advertising has been soft this year," he says. "But that's becauce things were so heady last year. And don't forget—this is an industry that views a year in which ad revenues increase 4% to be a disaster.

"The steel industry would love to have such a 'bad' year." ∎

Smithsonian builds on solid footing

By Van Wallach

Every year more than 30 million potential subscribers drop by *Smithsonian* magazine's headquarters to look around. But they don't visit some bland high rise. The offices are in the Smithsonian Institution, six huge museums lining the Mall in Washington.

Merchandising to these masses demands tact. A high-decibel push for subscriptions, or "memberships," would clash with the august image of the 139-year-old *Smithsonian*, which strives for "the increase and diffusion of knowledge among men" as an establishment chartered by the U.S. Congress. Executives at the magazine prefer caution over collar-grabbing amid the exhibits.

"We could do more marketing, but it must be done discreetly," publisher Joseph J. Bonsignore s)ays. "We have counter displays in gift shops. We want to make our presence a little more known. There's a potential out there."

The museums register about 900 memberships a month from visitors. The $18 annual "national membership" includes book and gift discounts, entry into a dining room and reception center, and free admission to New York's Cooper-Hewitt Museum (part of the institution), as well as 12 issues of *Smithsonian*.

The magazine thrives on a rock-steady operational style that mirrors this marketing. Connoisseurs of back room intrigue should look elsewhere.

Mr. Bonsignore signed on as general manager in 1969, before the premiere April, 1970, issue, after 24 years at Time Inc. Thomas H. Black also joined then as advertising director/associate publisher, a position he still holds.

"The magazine has stayed incredibly consistent," Mr. Black says. "We've had two editors. Focus group interviewers try to get hints for change, but people say, 'Leave it alone.' "

Readers and advertisers like the stability. Circulation has soared from the initial 164,000 to 2,172,831. Ad pages increased 7.7% in 1984, to 1,012.4, according to the Publishers Information Bureau. Ad dollars rose 19.6%, to $30.7 million.

So far, 1985 looks strong, too; ad pages for the first six months of 1985 were 548.7, up from 523.8, according to the PIB.

Mr. Black characterizes *Smithsonian* as a magazine in search of a category. S. Dillon Ripley, the institution's secretary from 1964 to 1984, wanted a magazine to help diffuse knowledge. "We were a museum magazine and people saw us as old and stodgy," Mr. Black says.

Circulation came naturally, and in 1973 surpassed the initial expectation of 500,000. With growth came comparisons to *Harper's*, *Atlantic Monthly*, *The New Yorker* and *Saturday Review*. The current status, Mr. Black says, combines "quality-class" magazine demographics and editorial with newsweekly size.

According to a 1982 subscriber study conducted by Belknap Data Solutions Ltd., *Smithsonian* subscribers have a median age of 47.7 and median annual income of $39,000; 85.4% attended or graduated from college, 82% own homes, and 58% are male.

Smithsonian always has respected the intelligence and patience of its readers. The magazine offers leisurely reading on a mix of topics, covered at length with plentiful illustration.

The August issue featured 12 pages on New York's garment center (18 color photos) and other articles on innovative playgrounds, poison ivy and satellite repairs in space. Columns note institution activities, but the magazine doesn't dwell on in-house news.

"The institution covers everything and we do, too," Mr. Bonsignore says. "There will always be people who like to read, who will take their time to relax and look at something handsome. We don't compete with tv or radio or newspapers or vcrs. [Our readership] is a category of people who are armchair travelers, curious to do things at their own pace."

Taking a historical view, Mr. Black compares *Smithsonian* to general-interest magazines such as *Look* and *Life*. *Smithsonian* maintained its original vision while other magazines adopted narrower formats. This defied the logic of the times, but "the more educated people are, the more varied their interests," he says.

The demographics have led to a similarly eclectic mix on the ad side. With a median age pushing 50, it's not the hallowed yuppie audience—and that suits Mr. Black just fine. "The market never narrowed down to them," the 60-year-old Mr. Black says. What the audience lacks in youth it gains in purchasing power.

From *Smithsonian's* viewpoint, education is the bond linking the consumers advertisers want to reach. Be the product yogurt machines, imported cars or exercise programs, "the whole *gestalt* flows out of the education market," Mr. Black says. "Educated men and women, both young and old, are linked by their talent, environment, and culture."

Smithsonian

Smithsonian ***offers a mix of topics covered at length and includes plentiful illustration.***

Several food advertisers signed on in the past year, including Stouffer Corp., Sara Lee Corp. and Dart & Kraft. Growth in national accounts counters the sharp drop in direct mail advertisers, down 60 pages last year as catalogs cut into the magazine's business. Pages are distributed among travel, auto, corporate, direct mail and liquor categories (no cigarets). Overall, *Smithsonian* gets advertising from 26 of 28 PIB categories, Mr. Black says—excluding tobacco products and industrial.

The institution soon will mount a new venture, *Air & Space* magazine, which has been given a possible April, 1986, launch date.

Inspired by the hugely popular National Air and Space Museum—housing Charles Lindbergh's Spirit of St. Louis, the Wright brothers' airplane and National Aeronautics & Space Administration spacecrafts—*Air & Space* would extend the museum's influence beyond visitors to a wider audience, says Paul A. Hanle, the museum's associate director for research and project manager.

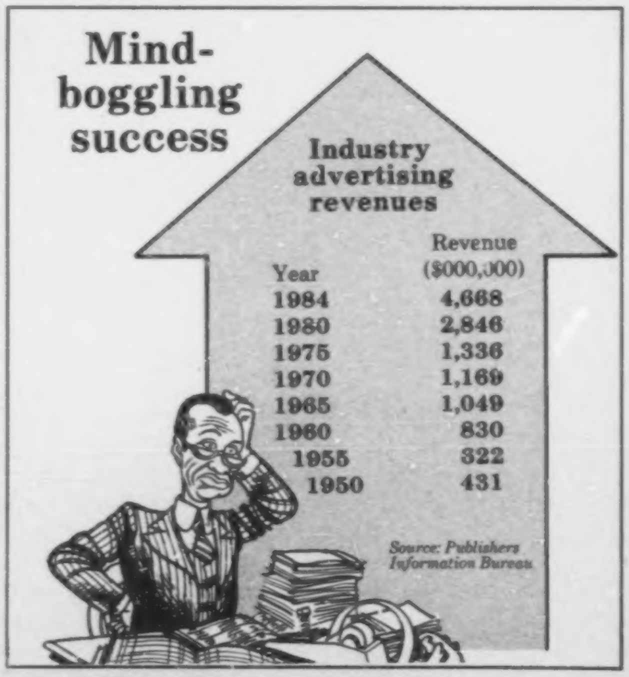
A test mailing to 250,000 readers of *Smithsonian* and 17 other magazines got an "extraordinarily favorable" response, Mr. Hanle says.

He says circulation conceivably would start near 200,000 and grow to 500,000. The magazine would seek a 50-50 mix of consumer and civilian aerospace advertising in a consumer-style editorial setting.

"We found a niche no one else occupies," says Mr. Hanle, who's examined enough magazine proposals to distinguish a rocket from a turkey. "It's a general magazine on aeronautics and space, not a trade or buff magazine. It's for anybody who's looked up at planets or wanted to go into space."

Although a separate project from *Smithsonian*, *Air & Space* would continue its older sibling's outlook, which Mr. Bonsignore defines as high standards in content and physical product. These factors enhance quality magazines as other publications lower their standards and the electronic media become increasingly cluttered.

"There are lots of images coming at you, but you'll still have this kind of enjoyable magazine," he says. "As other things get quicker, magazines that retain quality will stand out more and more."



Mind-boggling success

Tailoring medium to marketers' needs

By Gary Levin

Marketers have discovered it sometimes takes more than a good product, creative advertising and extensive media placement to foster brand loyalty. Not content with scattered exposures in mass media, many consumer product and service companies have created their own editorial environments by sponsoring customized magazines.

Custom magazines are nothing new in the airline industry, which has used its own in-flight magazines to capitalize on a captive audience. But following the success of magazines from companies as diverse as Polaroid Corp.; Sears, Roebuck & Co., and R.J. Reynolds Industries, others have joined the airline crowd with general-interest titles aimed at a potential or existing customer base. The custom publishing houses produce about 40 regularly published titles, excluding in-flight magazines, employe publications and one-shot issues.

R.J. Reynolds, for example, is the exclusive advertiser in *Moviegoer*, edited for the young film buff by Knoxville, Tenn.-based 13-30 Corp. and distributed free in hundreds of movie theaters nationwide. Polaroid, Sears and Martin-Senour Co. each have developed loyalty-building "clubs" for their customers, offering discounts on merchandise and exposing likely sales prospects to several pages of advertising each month. Wagner Spray Tech Corp. has developed *Time Off* for professional painters.

Building on the trend, new projects are in the works from American Honda Motor Co., Toys "R" Us and even Motherhood Maternity Shops.

"This is the ultimate segmented marketing tool," says Henry Fiola, vp-creative communications at Webb Co., St. Paul, Minn. "It's no more expensive than direct mail, but you wrap your message in credibility, with [the presence of] editorial content."

Advertisers often choose an editorial focus that complements their businesses, although some—such as R.J. Reynolds—publish magazines unrelated to their product lineups. Meredith Corp., Des Moines, Ia., edits and sells advertising in an annual *Poc[illegible]e* magazine for Olin Corp., a maker of pool chemicals and supplies, in addition to Polaroid's *Instants* (a club magazine) and others.

Last month, Meredith, publisher of *Better Homes & Gardens* and other consumer titles, launched *Motherhood*, edited for expectant mothers and distributed in Motherhood Maternity Shops. The company also acquired two titles from rival Webb Co.: Farmers Insurance Group's monthly *Friendly Exchange* (circulation: 4.25 million) and Kampgrounds of America's annual KOA Directory.

Instants
State Fair

Meredith Corp. edits and sells advertising in Polaroid Corp.'s **Instants** ***club magazine.***

Webb, once a leader in the in-flight market, produces many titles, including *Healthscenes* for local hospitals; *moneytalk*, customized for local banks and savings and loan associations; *AAA World*, which circulates 2 million copies to members of 13 regional American Automobile Assn. clubs, and a magazine for Kawasaki motorcycle owners. It plans soon to begin publishing a magazine for selected Honda automobile owners encouraging loyalty to Honda dealers' service departments.

Western Publishing Co., the Racine, Wis.-based publisher of Little Golden Books for children, is readying the launch of *Toys "R" Us* magazine, to be distributed at the toy retailer's stores. Edited for children, the title features puzzles and articles and includes ads from toy makers.

Most often, companies will approach publishers with an idea for a project, although sometimes a custom house will identify a marketing need.

Ad agencies are not always content to watch their clients' ad dollars shifted to media over which they have little control. "When you're spending a significant amount of an ad budget, there's a natural reluctance for agencies to have their hands tied," Mr. Fiola says.

But publishers maintain that such magazines often serve clients' interests more effectively with less intrusive and more relevant messages.

"All of these publications do reach a target audience of their [sponsor] companies, even though it may not be exclusively users of that product," says Nick Glover, 13-30's president. "The idea is to reach an audience that has the highest propensity to use the product."

For R.J. Reynolds, the audience is the broad universe of moviegoers, but other companies target their readers more narrowly.

House of Seagram, for example, last fall began issuing *Tables*, a monthly magazine whose ultimate goal is to encourage restaurant waiters and bartenders to recommend and serve Seagram's distilled spirits. The October issue of the magazine includes 23 pages of Seagram advertising interspersed with articles on "America's best servers" and money-management techniques.

When starting a new custom project, Meredith's Mr. Benson says, "We ask potential clients, 'How would you like people to think about you in the future?' You have to get a platform or foundation on which you build an editorial premise, [because] if a magazine is not read by its recipients then it won't do its job."

Although some magazines seek tangible results—product or magazine sales, for example—in other cases the job is advocacy of a particular view. New York-based Hearst Corp. recently published the first issue of *Philip Morris* magazine on behalf of the cigaret maker to dispel so-called myths about cigaret smoking.

Farmers Insurance Group's *Friendly Exchange* subtly injects its political perspective into occasional articles related to the industry, says Richard Pittenger, vp-pr at the Los Angeles-based company and publisher of its magazine. "We don't push [insurance] sales," he says. "We leave that to the agents."

Although many titles in the category accept ads only from a single sponsor, others—including *Friendly Exchange*—have found revenues from other advertisers essential in offsetting production costs.

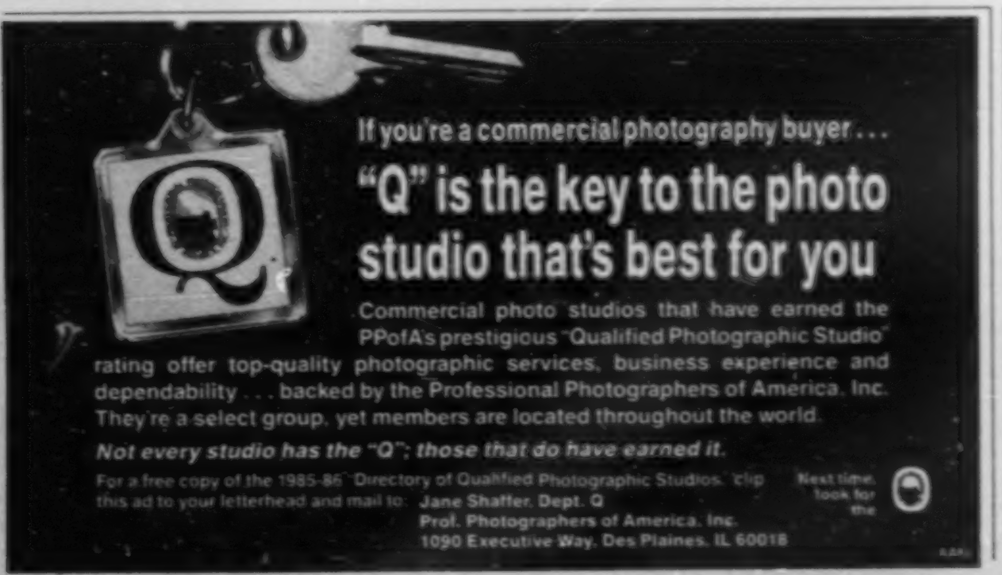
Farmers Insurance spends about $5.5 million a year on *Friendly Exchange*, which at Webb offered color page ads for $20,000 and brought in annual ad revenues of $3.6 million. "We'd sure like to have it paid for [entirely by ads]," Mr. Pittenger says, but "we don't expect to break even—not by a long shot." Others discount the need for outside revenue, but offer space anyway because they want to make it look more like a real magazine, Meredith's Mr. Benson says.

From a pr standpoint, ad revenues are less important than good will and new or increased business generated by a well-written publication. "The success of a [custom] magazine has to be based on insurance renewals or new business, not on the success of advertising sales," Mr. Fiola says. "There's no way in custom publishing that an ad pays for anything more than the page on which it's published."

Indeed, it costs marketers anywhere from 40 cents to $1 per copy, including postage, for an average-size 32-page magazine that reaches more than 100,000 readers. Publishers normally take a commission on advertising sold through outside reps, although sometimes sponsors receive all ad revenues less sales expenses.

But because editorial success can't be measured by subscription renewals or newsstand sales, marketers believe the ultimate measure of a custom magazine's value is how readers respond to and become involved with the book.

"What makes a client happy with the publication is that the audience it's intended for is in fact reading the publication, that they like what they're reading and that they're spending time with it," Mr. Glover says. If that goal is achieved, he says, the rest—product sales—takes care of itself.



If you're a commercial photography buyer . . .

"Q" is the key to the photo studio that's best for you

Commercial photo studios that have earned the PPofA's prestigious "Qualified Photographic Studio" rating offer top-quality photographic services, business experience and dependability . . . backed by the Professional Photographers of America, Inc. They're a select group, yet members are located throughout the world.

Not every studio has the "Q"; those that do have earned it.

Men's sophisticate titles feel circulation pinch

By Gary Levin

The market for men's magazines has grown skimpier lately, as trendsetting titles, such as *Playboy* and *Penthouse*, encounter rough times caused by life style changes and new competitors.

So far this year, total paid circulation of every major magazine in the politely termed "men's sophisticate" category has dropped—by as much as 22%—with newsstand sales declines leading the pack.

Although an over-all downward trend has hit the magazine industry, men's titles are perhaps most vulnerable to attack on several fronts.

In addition to the category's heavy dependence on newsstand sales, X-rated videocassettes have duplicated more graphic "girlie" magazine pictorials, forcing many publishers into producing soft-core "video magazines" or more explicit films themselves.

"The stark attraction of nudity is not what it used to be," says David Leibowitz, an analyst at American Securities, New York, who follows the magazine industry. "The battle lines are drawn, and these magazines now are going to have to survive and prosper based on editorial content and a unique product. Sex alone is not the answer."

Publishers of both *Playboy* and *Penthouse* blame a more conservative social environment on readership declines. *Playboy's* current 4,202,324 circulation is far below the 7.2 million it claimed at its peak in 1972. *Penthouse's* circulation, which peaked at 4,711,849 in 1979, now stands at 3,200,863.

Executives from both magazines say these circulation drops are in large part a result of boycotts by groups, such as the National Federation for Decency, that have lobbied to prevent distribution of the magazines at convenience stores. In addition, *Penthouse* last year was banned in Canada after a pictorial on women in bondage.

PENTHOUSE
MEDICAL GENOCIDE
MISS AMERICA: NOT WHAT SHE USED TO BE
THE NEW MAFIA MORE VIOLENT THAN EVER

Penthouse *publisher Bob Guccione says his magazine is "more sexual in parts . . . because that's what our readers want."*

Playboy associate publisher Arthur Kretchmer says his magazine's circulation decline was a "marketing dilemma" attributable to increasing competition and changing mores. "*Playboy* definitely lost part of its franchise," he says. "It lived in a crystal palace," fostered by the mystique surrounding founder Hugh Hefner.

Illustrating what Mr. Kretchmer calls "intentional anachronisms" in the magazine today, Chicago-based *Playboy* has downplayed skin, instead focusing more on fiction, service features and other material that could be found as easily in *Esquire* or *Gentlemen's Quarterly*.

Although *Playboy* still contains such 1950s-era holdovers as Playboy Party Jokes, "we're trying to make the magazine more appropriate for the '80s and '90s than for the '60s and '70s," says Mr. Hefner, editor and publisher of the magazine as well as chairman of parent Playboy Enterprises.

As a step in that direction, *Playboy* last month unveiled its first perfect-bound issue, heralded as a collector's edition but editorially similar to previous issues. Mr. Hefner describes the move as "being something more . . . . It's a dramatic way of symbolizing change," he says, citing the product's fewer pictorials, shorter articles and gradual expansion of monthly columnists.

The October-dated *Playboy*, while replacing the navel-piercing staple with a perforated centerfold, also permits advertisers greater flexibility in using blow-in cards and bound inserts, Mr. Kretchmer says.

More arresting—but less revealing—cover designs are intended to boost sagging newsstand sales, which have resulted not only from changing values, but also from continued price increases: Both *Playboy's* and *Penthouse's* regular issues—excluding Christmas and anniversary editions—sell for $3.50.

Both editorial and design changes are aimed at making the magazine a more upscale, coffee-table product, Mr. Kretchmer says, and thus more acceptable to advertisers beyond *Playboy's* core group of alcohol, cigaret, car and stereo marketers.

Publisher Hugh Hefner says* Playboy *is making changes to meet the demands of readers of the '80s and '90s.

In addition, Mr. Hefner says, these changes are designed to "move us away from other [men's] magazines, where the primary emphasis is sexual. But that doesn't mean the magazine is going to lose its personality." Instead, Mr. Kretchmer says, *Playboy* will refine its editorial voice and its use of cartoons to make both less outdated.

But *Penthouse* publisher Bob Guccione says his magazine "is more sexual in parts than *Playboy* because that's what our readers want. We haven't changed our mix as far as sex is concerned," he says, adding, however, that *Penthouse* has increased its investigative reporting and is now more politically minded.

The magazine, whose circulation includes nearly 3 million newsstand copies, has taken an opposite tack than *Playboy* by downplaying service journalism. It has done so, Mr. Guccione says, "because in my opinion they're just puffery for advertising that detracts from the credibility of the magazine's editorial content."

In an unusual move on the advertising side, Mr. Guccione last January began limiting ad space in *Penthouse* by increasing the editorial-ad ratio to 4 to 1. He says *Penthouse* now accepts only 30 ad pages for each regular issue and 50 pages for its larger January, September and December issues, a self-imposed limit Mr. Guccione says offers advertisers an "optimum window: They're not crushed between page after page of advertising."

Mr. Kretchmer, however, says this ad policy is merely a shield to hide the fact that *Penthouse* can't get ads.

Whether self-imposed or not, *Penthouse* sold only 274 ad pages in the first seven months of 1985, compared with 343.8

Teens

(Continued from Page 51)

the increase in working mothers, young women are merged in an ever greater arena of involvement. Changes in society dictate that we cover pertinent topics such as stepparents, sexual abuse and many other subjects."

A changing sexual attitude among teens has yielded various philosophies on dealing with the subject.

"We have an obligation to educate," *Seventeen's* Ms. Richardson says. "Forty years ago, in keeping with a moral code, navels were airbrushed out of a model. Within the last 10 years, we've been dealing with more serious, previously taboo subjects." For example, in 1977, the magazine introduced a Sex and Your Body column.

However, *Seventeen*, like *'Teen* and *YM*, will not accept birth control ads. "We don't run birth control advertising because we feel it is somewhat misleading," Ms. Richardson says.

Seventeen's publisher, Mr. Bunge, concurs.

"We have no plans to accept birth control advertising, but we do think the subject should be addressed editorially," he says.

'Teen's approach is similar to *Seventeen's*. In the late 1960s, the magazine began sex education articles, "one of the first to have the courage to do so," says publisher Robert MacLeod. "We cover the subject of sex in a clinical way."

Although *YM* also addresses serious, previously taboo subjects, teen age sex is an area it handles somewhat differently from its competitors.

"It's not our role to educate, but to guide them to organizations that are better equipped to do so," editor Ms. Schneider says. "We don't tell them 'don't have sex,' we give them information and let them make up their own mind."

However, *YM* considers birth control a hands-off subject. "We don't have articles on birth control because it would sound as though we're condoning teen age sex," she says.

"I think the other teen magazines that cover that subject felt pressured," she says. "We don't have enough space to cover that subject accurately, and I don't feel any magazine covers the topic of birth control properly."

Although each publication varies slightly in its over-all editorial philosophy, providing information remains a common denominator.

"We're very concerned and responsible about young America," Mr. MacLeod says. "Our editorial is more educational than entertaining."

Entertaining or not, *'Teen*, as well as *YM*, is not reaching the older segment of female teens. While Mr. MacLeod sings the praises of a pure teen readership, he admits *Seventeen* receives the bulk of teen advertising. "They certainly have a lot of business I'd like to see," he says.

While these three publications appear to co-exist peacefully, some in the industry question the absence of more rivals.

"I'd like to see more competition among teen magazines," says Stone Roberts, exec vp at SSC&B, New York, the agency for Noxell Corp., a predominant teen magazine advertiser.

Teen magazines and radio are the two most efficient vehicles for reaching a teen audience,

Working

(Continued from Page 51)

New York, has built her magazine around the same objective as *Self*—covering the multifaceted life style of today's woman in one magazine. Because 72% of its 1,093,590 readers work outside the home, *New Woman* also keeps a wary eye on *Savvy*, *Self* and *Working Woman*.

"Even *Savvy* and *Working Woman* have accepted the fact that the battle of the sexes is over," Ms. Miller says.

"Now it's time to move on and prove that women can not only handle the responsibilities of a job but a life outside of the office as well."

She says *New Woman* likes to think its readers "can have not only bank accounts, but orgasms, too."

during the same period of 1984. The 25% drop in ad pages was accompanied by a 6.2% decline in ad revenues, to $11.3 million, for the period. The magazine estimates it will finish the year with 410 ad pages sold, compared to 701 for all of 1984.

Playboy, following increased advertorial promotion activity, sold 519 pages from January to July, for revenues of $31.7 million, compared with 518.4 pages sold and revenues of $30.1 million in the first seven months of 1984. Through October, the magazine is up by barely a page over year-to-date 1984 figures.

Reflecting the summer firings of senior vp-ad director Charles Stentiford and two other top *Playboy* marketing executives, Mr. Kretchmer says such promotional activity will be de-emphasized in the future (AA, July 29). He since has replaced Mr. Stentiford with Saul Stone, a former vp-group publisher at Ziff-Davis Publishing Co., New York (AA, Sept. 23).

Other magazines in the category, including *Club*, *Genesis*, *High Society* and *Hustler*, survive mainly on mail-order advertising for adult films and sex toys despite declining circulation.

Hustler, published in Los Angeles by Larry Flynt Publishing, temporarily has been suspended by the Audit Bureau of Circulations, although it probably ranks third in the category, behind *Playboy* and *Penthouse*, in terms of circulation.

Club's 407,000 paid circulation makes it the largest of the other currently audited sex magazines.

Meanwhile, with both softcore and more explicit videocassettes readily available, publishers have challenged the relatively recent soft-porn video upstarts with cable and video projects of their own. But the Playboy Channel, launched in November, 1982, has not been received well by local cable operators, whose subscribers and local governments have resisted such adult programing.

Mr. Guccione says Playboy Enterprises' cable problems are deterring a similar attempt by New York-based Penthouse International. Both magazine publishers, however, sell videotapes through outside distributors with varying success rates.

Penthouse, capitalizing on what Mr. Guccione terms a more visual orientation among readers, has launched *Newlook*, an unusual monthly hybrid of *Penthouse* and a newsweekly that has juxtaposed pictorials of nude women with news photos. The title is an American version of an existing French pictorial magazine.

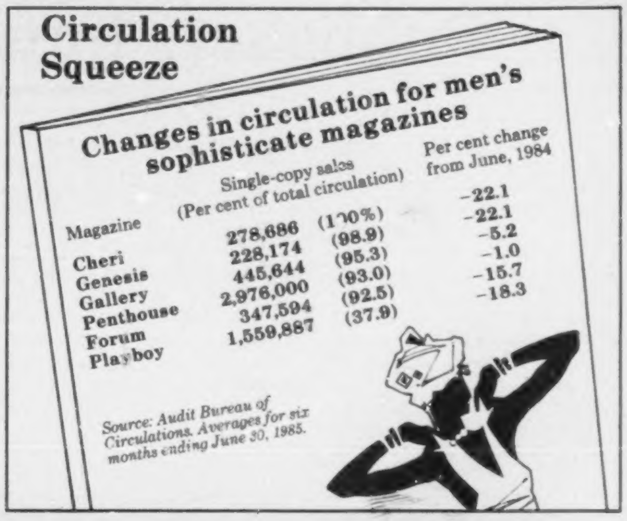
Observers say the future of the men's sophisticate category depends not on corporate diversification, but on such publishing events as *Penthouse's* pictorial on former Miss America, Vanessa Williams, which sold 5 million copies in four days, according to the magazine.

More recently, the *Playboy-Penthouse* skirmish over photos of pop singer Madonna resulted in issues of both magazines hitting the newsstands within hours of one another and weeks earlier than scheduled.

The competition generated heavy publicity in the mass media and at least temporarily boosted newsstand sales of both magazines.

Who will be the next celebrity revealed? Neither publisher will say, but both promise more events are soon to come. ■

Circulation Squeeze



Changes in circulation for men's sophisticate magazines

Magazine	Single-copy sales (Per cent of total circulation)		Per cent change from June, 1984
Cheri	278,686	(100%)	–22.1
Genesis	228,174	(98.9)	–22.1
Gallery	445,644	(95.3)	–5.2
Penthouse	2,976,000	(93.0)	–1.0
Forum	347,594	(92.5)	–15.7
Playboy	1,559,887	(37.9)	–18.3

Source: Audit Bureau of Circulations. Averages for six months ending June 30, 1985.

Mr. Roberts says. However, many products require a visual message, which eliminates the use of radio. "If you look at the first 20 pages of each publication [*Teen*, *YM* and *Seventeen*] you see a tremendous amount of duplication among advertisers." However, *Seventeen* garners similar advertisers and then some, according to Mr. Roberts.

"They seem to be getting greedy," he says. "*Seventeen* has so much clutter that it's become a concern that our message gets lost."

Although the magazine's average advertising-editorial ratio for 1985 is 55% to 45%, publisher Mr. Bunge cites a 1984 Starch Adnorms Report from Starch INRA Hooper, Mamaroneck, N.Y., that ranked *Seventeen* No. 1 in over-all ad awareness.

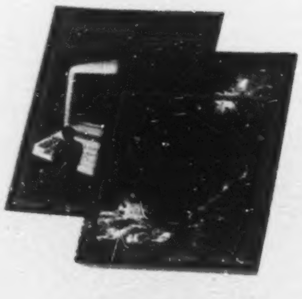
"With young readers, every ad is an adventure. They read every single line of it," he says.

Nevertheless, Mr. Roberts questions the limited print media available to target teens.

"Maybe this [need for higher visibility] will present a situation for a fourth power." ■

ROTARIANS...you can't find a better upscale male audience!

Uncommonly affluent. Achievers with a keen taste for accumulative purchasing. Businessmen, owners, executives who call the purchasing shots for their companies. 13.5% have leased a plane for business or pleasure; 5.7% expect to buy or lease during the next two years.



480,000 successful, dedicated subscribers with an average household income of $65,000, an average net worth of $390,000! They travel and entertain extensively, have sizable investment portfolios, are well educated...and they're available through THE ROTARIAN.

THE ROTARIAN is the magazine of Rotary International...and it plays an important role in the everyday life of Rotarians. Here is a market of prequalified business/consumer readers and THE ROTARIAN is their magazine. 92% do not subscribe to TRAVEL AND LEISURE, 90% do not subscribe to FORBES or FORTUNE.

YOU'VE GOT EVERY REASON TO CELEBRATE!"

Celebration time

"You've got every reason to celebrate!" proclaim test-market ads for Anheuser-Busch's Baybry's Champagne Cooler, but production staffers at magazines in which A-B plans to run the copy-intrusive ads may disagree. The celebration, which includes tv and radio, as well as print, begins next month. *(See story on Page 3.)*

BK embroiled in ad-plan review

By BRIAN MORAN

Burger King Corp. chairman J. Jeffrey Campbell, dissatisfied with "marginal" sales gains from recent ad campaigns and facing a crisis of confidence among his franchisees, says the chain will make radical changes in its marketing strategy this fall.

The Burger King chief said he senses consumer "boredom" with more than three years of hard-edged, comparative strikes against McDonald's Corp., and that the company will attempt to forge its own identity as a quality-driven chain in future advertising.

His displeasure was registered during an interview last week that followed a shakeup in Miami-based Burger King's marketing staff. The changes saw exec-vp marketing Donald Dempsey reassigned to an operations training program (AA, Sept. 30). Mr. Campbell

Stage set for agency reviews at P&G-Vicks

By NANCY GIGES

Procter & Gamble is expected to play musical chairs with the agencies of soon-to-be acquired Richardson-Vicks, despite its more relaxed stance recently on agency conflicts.

Especially vulnerable are the $40 million R-V assignments at Young & Rubicam, which dropped P&G two years ago to handle a more flexible advertiser, Colgate-Palmolive. Less clear is how P&G will deal with smaller agencies that handle some of R-V's business.

The fast action may also put P&G once again in the leading advertiser slot, a position being contested by R.J. Reynolds Industries with its new Nabisco subsidiary and Philip Morris Inc. with General Foods as its partner. Within a few short months, these three companies have emerged as $1 billion advertisers, the first time any company has topped that figure annually in this country.

Ironically, the Y&R-P&G split related in part to Y&R's handling of Oil of Olay beauty soap, an R-V

(Continued on Page 92)

Billionaires

It looked for a while there as if the flurry of megamergers would knock Procter & Gamble from atop Advertising Age's list of 100 Leading National Advertisers.

Now, with P&G itself jumping into the merger business, there will be no less than three giants vying for the top spot in 1985—all with combined ad budgets exceeding $1 billion.

Here's the lineup, based on Advertising Age estimates:

Procter & Gamble ($872 million)
+Richardson-Vicks ($163.5 million)=$1,035.5

Philip Morris Inc. ($570.4 million)
+General Foods ($450 million)=$1,020.4

R.J. Reynolds ($678.2 million)
+Nabisco Brands ($335 million)=$1,013.2

Advertiser, affiliate objections growing

NBC, ABC take 15s

By VERNE GAY

New York—NBC-TV and ABC-TV will begin accepting stand-alone 15-second commercials throughout their schedules by January, even though the NBC affiliate board has threatened to boycott the unit, and major advertisers, including Procter & Gamble, have expressed displeasure with the 15 to the nets.

NBC-TV Network president Pier Mapes told Advertising Age that NBC soon "will go to [selling] 15s in newsbreaks only as a practical matter." He added that the supply of 10-second commercials for those breaks is drying up.

CBS was the first network to accept the 15 in news and sports breaks (AA, Aug. 12, 19), and then rolled the unit into about 25% of its total inventory. ABC quickly started taking the 15s in newsbreaks. Now agency sources report NBC is telling advertisers it will soon begin accepting the unit. If NBC goes, most observers believe ABC will follow suit.

Mr. Mapes said, however, that NBC had "no immediate plans" to adopt the unit across its entire schedule. He said he wanted to see how many CBS affiliates preempt

South Africa's crisis

Marketers see ad budgets crumble

By JOHN WOLFE

Johannesburg—Ray Ackerman, one of South Africa's top consumer goods marketers, puffs on his cigar while pondering a question from an American visitor. His brow is furrowed and his eyes hint of desperation.

"There's no question that we're facing a crisis of enormous magnitude," says the chairman and managing director of Pick 'n Pay, an 86-unit chain of supermarket-retail stores with about $1 billion in annual sales. "Our problems are deep and we must be careful not to let our country go down the tube."

Mr. Ackerman, who spends about $8 million a year on advertising via Hedley-Byrne, Cape Town, is not the only one worried. Other advertisers, as well as ad agency executives, say a year of bitter racial violence and economic strife sparked by South Africa's apartheid policies have left deep scars on the South African advertising and marketing industries.

It has turned a fast-growing and stable advertising market into a nightmare for many U.S. agencies and marketers with interests here.

"The events of 1976-77 were a blip compared to this," said Mike Wells, managing director of Bates Wells Advertising, in reference to the racial turmoil almost 10 years ago in Soweto. "Psychologically and economically, it was not as serious then. There's a great deal of pessimism in the country now and a lot of people are leaving."

A report on South Africa begins on Page 34.

Two major problems facing the ad industry are a 12% general sales tax on billings for all ad agencies and the severe decline of the rand. This nation's currency has lost more than 50% of its value in the last year.

Admen say these elements have caused a ripple effect throughout the industry that has led to dwindling profits and ad budgets, increased staff layoffs and quick, "hard-sell" advertising that lacks the creativity the industry is capable of in better times. The situation also has led a handful of agencies, such as McCann-Erickson

HIGHLIGHTS

R-V agencies in suspense 1

Procter & Gamble is expected to play musical chairs with the agencies of soon-to-be acquired Richardson-Vicks, despite its more relaxed stance recently on agency conflicts. Especially vulnerable are the $40 million R-V assignments at Young & Rubicam, which dropped P&G two years ago to handle a more flexible advertiser, Colgate-Palmolive.

Burger King cooking up changes 1

Burger King Corp. chairman J. Jeffrey Campbell, dissatisfied with "marginal" sales gains from recent ad campaigns and facing a crisis of confidence among his franchisees, says the chain will radically change its marketing strategy this fall.

Yessir, that's Baybry's 3

Anheuser-Busch next month will pop the cork on an aggressive campaign to introduce its Baybry's Champagne Cooler in western test markets. A-B's long-awaited cooler entry will be backed by two 30-second tv spots, six copy-intrusive magazine ads and a battery of 18 radio spots.

Target: Beatrice 10

Beatrice Cos.' intention to sell four of its units, combined with promising sales in the first half of the year, could bring its debt ratio back in line. The bad news for Beatrice is that such a rebound once again would make the company a ripe takeover target.

Budget takes to the air 10

Budget Rent a Car Corp. turns its attention to the leisure market this week as the company breaks its first tv campaign in more than two years. Budget will use diminutive actor Herve Villechaize in a $3 million network tv effort beginning Oct. 12.

Ward's shines up image 14

Montgomery Ward & Co., which claims "Things are changing," is poised to make a bold change in the look of its advertising. Off to a fast start with "Seven Worlds of Ward's," its version of the store-within-a-store strategy, Ward's is about to spruce up its advertising image to match the new-store concept's sleek, modern look.

Chevy turning Japanese 32

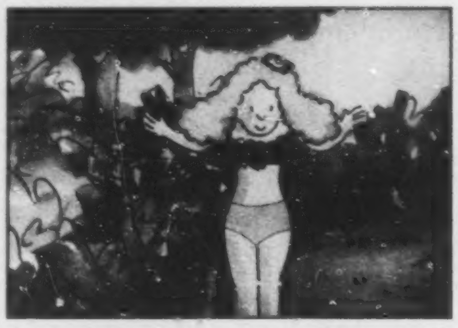
The next Japanese invasion on the West Coast will be led by Chevrolet. The General Motors division last week began an all-out push to let prospective import buyers in the West know that Japanese cars are available from an American manufacturer.

Matters of principals 40

In addition to deciding whether to strike out on their own, principals of small to medium-size agencies have to ask themselves whether to specialize, which clients to add or drop, and how to promote their agencies.

Political ads under fire 60

An internal committee of the American Assn. of Advertising Agencies is mulling whether the trade group should push for legislated changes in political advertising.



Fruit of the Loom goes distaff 62

Union Underwear Co. is beginning its first tv spot for Fruit of the Loom women's underwear as it tries to extend its brand name to other product categories. Union's fruity band of characters are absent from the 30-second tv spot. Instead, the brand is using its first animated commercial.

CORPORATE CLOSEUP

Nielsen on the attack 4

Facing one of the most serious competitive threats in its history, from London-based AGB Research, the media research group of A.C. Nielsen Co. is about to undertake a number of changes that could affect the entire company.

INTERNATIONAL

Latin diet 50

Consumer marketers are going on a "diet" in Latin America. Dozens of low-calorie food products have been launched in the last three years, and more are on the way.

Finnish ads in Moscow 51

Finnish communications company Finnav has just renewed an earlier deal with the Soviet Union, giving it the right to handle all foreign advertising on U.S.S.R. outdoor boards at sports events, for the period 1986 to 1988.

CATEGORY REVIEW

Call of the mousse 68

With sales in the mousse category expected to grow to $175 million by yearend, marketers are spinning off what has been a women's hair-styling product into men's styling and women's hair coloring.

OTHER NEWS

As industry leaders gather for the 1985 American Magazine Conference, many are echoing the rueful cry of the baseball fans whose season ended yesterday: "Wait till next year." Those attending the conference Oct. 6 to 9 at the Hyatt on Hilton Head Island, S.C., for the most part are putting 1985 behind them as a disappointment after the record-setting pace of 1984. Page 6.

Hesselbart & Mitten, Fairlawn, O., has landed the General Tire account, worth $5 million to $7 million, beating out Marschalk Co., Meldrum & Fewsmith and Wyse Advertising. Page 32.

CAMPAIGNS BREAKING

Ralston Purina, St. Louis, breaks a new tv campaign for its G.I. Joe Action Stars cereal today through Nov. 23. Gardner Advertising, St. Louis, handles (AA, July 29). Ralston also breaks a $20 million campaign for its new Almond Delight cereal with tv and coupons via freestanding insert today. Print appears in November and December issues of 12 women's service magazines. Tatham-Laird & Kudner, Chicago, handles (AA, July 15).

A couponed freestanding newspaper insert Oct. 13 kicks off the third annual Italian Dining promotion, via J. Walter Thompson USA, Chicago, sponsored by Campbell Soup Co.'s Prego Plus spaghetti sauce with meat, Kraft Inc.'s 100% Grated Parmesan cheese and Pillsbury's Soft Breadsticks. A 90-second tv spot will run Oct. 14 on "The Country Music Awards" show (AA, Aug. 12). Campbell also breaks its first national advertising for Campbell's Dry Quality Soup and Recipe Mixes today in newspapers, followed by network tv Oct. 14. Leber Katz Partners, New York, handles (AA, July 11).

RCA Consumer Electronics, Indianapolis, will distribute a $2 million freestanding co-op insert Oct. 13 in 587 newspapers comprising its "Video Showcase '86" products. The insert was produced in-house (AA, Sept. 16).

COMING THURSDAY

They range from writers and composers of the words and music you hear in tv and radio commercials to presidents and ceos of very large agencies. Some work for the nation's largest agencies and some are with small or medium-size shops. All are exceptional in one way or another and all are under 40. They are "100 of the best and brightest young people in advertising," as chosen by the editors of ADVERTISING AGE.

Special Report focuses on the creative aspects of global business-to-business marketing. Profiles of the state of the art in various countries and some of the luminaries in the field will be included.

Olympics deal has admen on guard

By ROBERT RAISSMAN

Advertisers reacted with caution to NBC-TV's winning bid for the 1988 Summer Olympic Games, wondering how the network will try to price commercial time for the games and whether the revenue-sharing aspect of the bid will be extended to advertisers.

"If they're talking about sharing, then have them share in the deficiencies," said one agency executive who declined to be identified. "If we buy at an expected rating level and it isn't met, then we should get a discount. That's sharing too, isn't it?"

Under NBC's winning bid, pegged to advertising revenues, the network guarantees the Seoul Olympic Organizing Committee

New shows not solving nets' woes

By JAMES P. FORKAN

NEW YORK—With one weekly win to its credit in the embryonic fall tv season, NBC seemed to have the fewest potential weak links. ABC had the most. NBC led ABC midway through Week 2, but NBC and CBS dominated the season-to-date Nielsens through Oct. 2.

More than midway through the second week of the prime time season, there already were indications most of the three networks' problem slots of last season (and earlier, in some cases) would continue into this fall. On the other hand, each network could point to some bright spots as well.

ABC, a distant third in "pre-

If we were to sum up the wine industry's 1984 performance in one word, it would be "coolers."

The wine-cooler market has taken off like gangbusters. We estimate that, if it had not been for wine coolers, the U.S. wine market would have experienced close to a 3% decline in shipments. Thanks to the more-than-quadruple growth of coolers, however, the total domestic shipments reported a gain of 4%.

Imports also continued their excellent growth, up nearly 9% compared with 1983. However, if the dollar continues its current slide, the party could be over for imports, at least temporarily.

The U.S. wine industry's performance is not strictly dollar-related. One other factor may be the increasingly vocal public sentiment against the ingestion of any alcoholic beverage, be it beer, wine or liquor. With New York scheduled, as of Dec. 1, to join those states that have raised their drinking age to 21, it appears to be only a matter of time before the age is raised to 21 on a national level.

Another minor item giving the industry some problems over time is President Reagan's proposal relating to a $25-per-person cap on tax deductions for business meals. There are many cities in the U.S. where it is difficult for one to eat a business meal, particularly dinner, for less than $25. We cannot see people cutting back on their food consumption at these functions, so it may be the extra martini or the second glass of wine that is eliminated.

As noted earlier, wine coolers during 1984 achieved phenomenal success. These products fit the American population's trend toward a more moderate and a healthier life style as well as the penchant for cold and sweet drinks. Wine coolers are wine combined with equal parts citrus or other fruit juices. Coolers generally have an alcohol content of 3% to 7%, making them lower in proof than liquor or straight wine.

The lower alcoholic content obviously complements the trend toward moderate liquor consumption. This movement began with liquor, moved to light beers and has finally come to the wine industry. We believe that this trend toward moderation will continue and that coolers are here to stay. The entry of the bigger players such as E. & J. Gallo Winery and Jos. E. Seagram & Sons into the market serves to strengthen this thesis. Another piece of evidence is the recent acquisition by Brown-Forman Inc. of California Cooler, the premier wine-cooler company, which commands more than 50% of the total market and whose estimated sales passed the 7 million case mark in 1984.

While California Cooler is the dominant product in the market, there are several other formidable competitors, such as Gallo's Bartles and Jaymes. With Brown-Forman behind it, we expect California Cooler will fight hard to maintain market share. There are more than 125 products now on the market classified as coolers, and most of these are wine-based. It is estimated that in 1984 the cooler market achieved sales of nearly 35 million gals., versus 6.5 million in 1983. California marketers dominate the wine-cooler market, which partially helped offset the continued strong performance by imports in 1984. Coolers have also slowed the growth of Italian lambruscos.

The typical wine-cooler drinker appears to be a white, middle-class female in her late 20s or early 30s, who is upwardly mobile or aspires to be. Those consumers who seem most likely to switch into wine coolers from other beverages appear to be the beer and soft-drink set. One might say that this product, due to its sweet, cold and refreshing nature, appeals to the "Pepsi generation" who were raised on cold, sweet drinks. By using innovative packaging and making itself available in smaller containers, wine coolers have achieved something that the wine industry has never done before—to overcome the snobbish image and feelings of intimidation people have built up in connection with wine.

It is estimated that the cooler market will double during the next two to three years compared with 1984 shipments and will then probably settle down to an annual growth of between 4% and 6%. The one concern with regard to wine coolers is that, with the name "cooler," they may be perceived as seasonal drinks. Studies have shown that nearly two-thirds of all coolers are purchased during the spring and summer months. Some in the industry believe this product will become a year-round drink, as are beer and soft drinks, with peak consumption occurring during the summer months.

With all the wine-cooler products on the market, we have probably seen the end of the expansion phase, and the industry is now going through a shakeout.

Imports

Imports managed to grab more than one-quarter of the total domestic market, gaining 8.8% compared with 1983's shipments. France achieved the largest year-to-year gain, rising 26.3%. Spain had the second-best performance, up 12.5% compared with 1983. All of the five major importing countries achieved gains compared with 1983.

We still face a situation in the U.S. in which a good bottle of French or Italian wine occasionally can be had for less than a California vintage, but this is changing. While the dollar is declining, European countries continue to subsidize shipments of wine to the U.S. and consumption of imports could continue to increase. Because the price of imports had been low, it has taken some fancy marketing by domestic producers to get consumers to buy their product.

One of the reasons that Italian wine has done so well relates not only to price, but also to taste. For the same reason wine coolers have succeeded, they have capitalized on the American taste for chilled, sweet drinks.

Company rankings

Despite a total decline in shipments of about 1.4%, Gallo retained its No. 1 position with shipments of 142.0 million gals. in 1984. Seagram experienced a decline of 9% with its Taylor and Paul Masson brands. Heublein Inc. managed a shipment increase of more than 1.5%.

In terms of the top 10 performers, the first five rankings remained unchanged.

Franzia Bros. Winery moved from No. 9 to No. 7, while Monarch Wine Co. dropped to No. 8 and Guild Wineries & Distilleries to No. 9. Robert Mondavi Ltd. jumped from 17th to the No. 10 spot, displacing Sebastiani Inc., which fell to No. 11.

Per capita consumption

Total per capita consumption of wines (including coolers and imports) rose in 1984 to 2.55 gals., versus 2.41 gals. in 1983. In terms of categories, we estimate that about 67% of all domestic wine consumed in 1984 was the white variety, with about 16% red and the remaining 17% rosé. ∮

CATEGORY REVIEW: MOUSSE

Herd of mousse sellers stampedes market

By PAT SLOAN

New York—With mousse sales expected to grow to $175 million from $130 million by yearend, marketers are spinning off what has been a women's hair-styling product into men's styling and women's hair coloring.

Vidal Sassoon Inc., Century City, Cal., is introducing its first men's mousse, following the lead of Alberto-Culver Co., Melrose Park, Ill., which in late 1984 came out with Alberto VO5 Hair Grooming Mousse for Men.

A-C, meanwhile, has just signed race-car driver Danny Sullivan, Indianapolis 500 winner, to appear in print ads and tv commercials beginning in 1986. Bozell & Jacobs, Chicago, handles.

Sassoon, through agency Peter Rogers Associates, began a print campaign this month using celebrities as well as "real people" for its men's haircare products, which include the new mousse plus aerosol and nonaerosol hair sprays and a styling gel (AA, Aug. 19).

Speaking up for Vidal Sassoon Grooming Mousse for men is Olympic swimmer Steve Lundquist, who says, "Everything else is all wet," and a Charlotte, N.C., police officer, who calls the mousse "a secret I like to keep under my hat."

Sassoon, which brought out a women's mousse in 1984, is among the first to target men with its own product. And it is at the forefront again in the introduction of a women's mousse that both styles and imparts a temporary color change and highlighting to hair (AA, Sept. 16).

Until now, with the exception of Clairol Inc.'s Loving Care Foam Mousse, hair-coloring mousses have been sold primarily at beauty salons. But there are indications this is about to change.

Besides Sassoon's entry, which will be introduced in March, Revlon's Roux division is about to introduce a Fanciful coloring mousse. And A-C has begun marketing an Alberto-Culver Color Styling Mousse in the U.K., which A-C's competitors think eventually will be sold in the U.S. if it succeeds there.

"People will follow, but we will have been among the first in this segment," said Sassoon president Peter Wilson. While Sassoon will spend $10 million on the March introduction of its coloring mousse and gel, only $1 million has been allotted to the introductory advertising for its men's styling products.

"I don't think the men's market will explode overnight," said Mr. Wilson, but "hair styling makes sense to them. Right now, 35% of all men use a hair spray, 20% use a gel and 10% use a mousse."

A-C's Malcolm Lloyd, group vp, said his company's research showed that "men are not satisfied with existing grooming products." Mr. Wilson shares that belief and sees Sassoon's new men's line as the next generation of men's styling products that will replace established brands, such as Pittsburgh-based Beecham Products division's Brylcreem and Bristol-Myers Co.'s Vitalis. Vitalis itself, though, via Grey Advertising, this month introduced new super-hold and natural-hold hair sprays under the theme "The new neat look." A spokesman also said tv commercials, which have not been used in several years, are planned for a later date.

Neither Sassoon nor A-C has broken out sales figures for men's mousse. Salomon Brothers vp Diana Temple gauges total sales of mousse at between $100 million and $150 million for 1984 and projects a possible 30% increase in 1985 sales, "despite a decline in average prices" as a result of price-conscious competition in the form of Faberge's Aqua Net mousse, Revlon's Flex and Chicago-based

B/PAA seeks Pro Comm contestants

New York—The Business/Professional Advertising Assn. has made a call for entries for its 11th annual Pro Comm International Awards.

Entries in space advertising, direct mail, broadcast media, promotional material, annual reports, corporate identity programs and trade show exhibits are eligible. The efforts must have been directed to business or industry and published between Oct. 1, 1984, and Oct. 1, 1985.

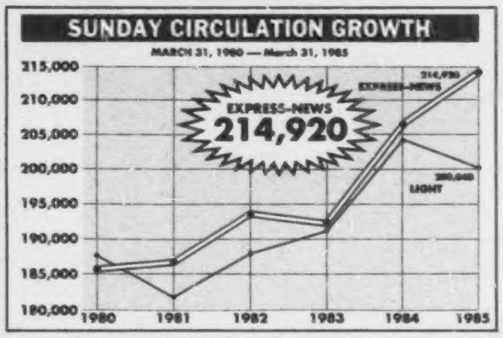
Entry fee is $50 for B/PAA members and $65 for nonmembers; deadline is Oct. 18. Judging will take place in November.

Contestants should mail entries to B/PAA, 205 E. 42nd St., 10017.#

Morton agency moves

New York—Morton Dennis Wax & Associates pr agency has moved to 1560 Broadway, 10036.

New ABC Audit Shows Express-News Strengthens Its Lead, Grows Faster Than San Antonio And South Texas...



Latest Audit Bureau of Circulations figures for the period ending March 31, 1985 (and released Aug. 3) show the Sunday Express-News continues to exceed the population growth rate of San Antonio and South Texas while the Sunday San Antonio Light is losing circulation.

The fully audited figures show the Express-News leading the Light by 14,880 on Sunday and by 32,549 daily.

The Express-News continues to be the paper of choice for the state's third largest market area.

The San Antonio ADI is home to more than 1½ million adults who earn $13.1 billion annually and spend $7.3 billion on goods and services.

Growing South Texas demands a quality and aggressive newspaper whose circulation is outpacing the area's growth. In addition, we lead the San Antonio Light in number of pages printed, volume of news presented, and in all categories of advertising. The Express-News also leads in the all-important area of upscale demographics.

SOURCES: ABC Newspapers Publisher's Statements, 6 months ending 3/31/80-3/31/85. Newspaper Publisher's Statements for 3/31/83 & 3/31/85 Special 6 month Statements audited by ABC Calculations computed by Express-News Research Dept.

ABC AUDIT BUREAU OF CIRCULATIONS

The March 31, 1985 Audit shows these daily figures:

EXPRESS-NEWS	LIGHT
166,943	134,394

Express-News leads the daily Light by 32,549.

Mousse

(Continued from Page 68)

Helene Curtis Industries' Suave.

Despite that healthy growth curve, however, Sassoon's Mr. Wilson wonders when mousses will shake out, since he sees the popularity of mousse owing not so much to the product itself as the consumers' greater awareness of hair-styling needs and possibilities as a result of shorter and more versatile haircuts. In fact, Mr. Wilson seems more enthusiastic about long-term prospects for gels and other styling products.

"Currently, styling gels account for 25% of styling-product sales in the general market, or about $45 million to $50 million at retail, and we think that could hit $75 million at retail soon," he said.

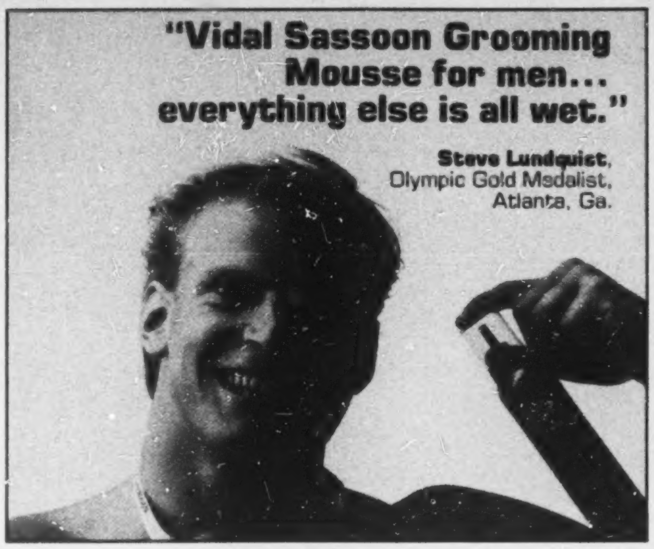
According to Salomon Brothers figures, Sassoon ranks fourth in the mousse market, with almost a 9% dollar share (food stores), trailing L'Oreal's Free Hold, from Cosmair Inc., which has a 17.7% share, A-C with a 14.2% share and Helene Curtis' Suave with a 10.5% share.

No market-share data were available for Revlon's Flex mousse, introduced during the second quarter of this year. But Revlon also seems intent on segmenting the mousse market.

This fall, the company is introducing a Flex medicated antidandruff shampoo with a companion dandruff-control styling mousse aimed at both men and women. The products will not be supported individually, but as part of the Flex line.

Alcohol-free mousse may, in fact, be the next major spinoff for the mousse category. Marketers of these products claim they dry hair and scalp less.

Besides Revlon, Clairol has entered this segment with Condition mousse, while Sassoon says it is considering it and Minneapolis-based LaMaur Inc. is said to be planning an alcohol-free Perma Soft mousse.#



"Vidal Sassoon Grooming Mousse for men... everything else is all wet."
Steve Lundquist,
Olympic Gold Medalist,
Atlanta, Ga.

Vidal Sassoon Inc. tries the celebrity/slice-of-life approach for its men's mousse. In this ad, Olympic gold medalist Steve Lundquist claims "Everything else is all wet."

GF rebuts ABC study on barter

By VERNE GAY

General Foods Corp. has attacked an ABC-TV study on barter syndication, disputing the ABC claim that advertisers use spot tv budgets to fund their forays into barter.

In a letter sent to hundreds of stations and the three networks, Dave Braun, GF director of media and program services, said ABC's conclusions were "totally inconsistent with the facts as they relate to General Foods."

Mr. Braun added that GF's total network tv spending declined this year by 14%, while "spot cash expenditures" increased 12%. Total tv broadcast spending by GF rose 10% over 1984, Mr. Braun said. Using Leading National Advertisers data for 1984, ADVERTISING AGE estimates, based on Mr. Braun's percentage changes in spending, that in 1985 GF will spend $163.6 million in network tv, $108.4 million in cash spot tv and $43.7 million in national barter syndication.

"Our strategy is to utilize national syndication vehicles to offset escalating network television costs per thousand," Mr. Braun explained in his letter.

The Assn. of National Advertisers issued a statement Sept. 18 saying that its members funded "more than 99% of their barter syndication as an alternative to network television."

ABC, in response to GF, said, "The purpose of our presentation was to encourage stations to look closely at the more indirect effects of barter in their local market. The subject of barter's impact on spot is a very complex one and much of the controversy has been fueled by misinterpretation."

The ABC study was widely perceived as a tactic to convince affiliate stations that if they air barter syndicated programs they will abet the diversion of spot money spent directly with stations to national syndicators. The ABC study said that 66.4% of barter spending is coming from spot tv budgets (AA, Sept. 9).

In spot tv, advertisers purchase time directly from the station or its representative. In barter, the station pays nothing for the program but gives half of the commercial time or more back to the syndicator for national sale.

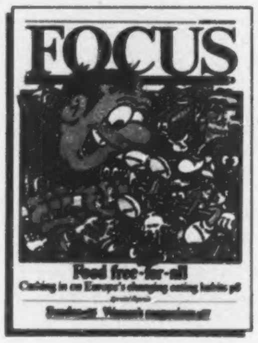
There has been a series of volleys among ABC, syndicators and advertisers on the origin of barter advertising funds and even the size of the barter syndication field. Syndicators claim barter this year will reach $700 million, while the networks put it at less than $400 million.

Syndicators also attacked the ABC study. Telepictures issued a heated rebuttal earlier this month (AA, Sept. 9).

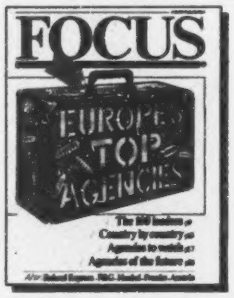
The industry trade association, Advertiser Syndicated Television Assn., also lambasted the study.#

Most European countries have advertising and marketing publications which do an excellent job monitoring local developments. Some occasionally include items about Europe, or even publish a one-off, in-depth glance at Europe in the form of a special issue.

But FOCUS is different. FOCUS is the monthly magazine written for advertising and marketing professionals. Europe as a whole is their exclusive, full-time assignment.



Successful pan-European marketers need insights into complex cultural and legal concepts, and the ability to make difficult media choices. There is no simple, all-purpose, enduring formula which guarantees success. So FOCUS provides a forum where pan-European professionals find the information they need to solve their problems and do a better job.



FOCUS is based on the premise that forward-looking companies will recognize Europe as the most promising growth market of the decade, with better-than-average profit potential for those who understand the opportunities and the special marketing skills that are required.

FOCUS serves pan-European marketers. It has correspondents permanently stationed in every European country and an editorial staff of senior professional business journalists. It has access to the worldwide resources of Crain Communications and can draw on Crain's seven years of experience as publishers for pan-European marketers.

This data has been provided by Media Records for exclusive publication in Advertising Age and may not be reprinted or published in any form without explicit permission from Media Records. All newspapers represented are subscribers to Media Records. For those newspapers that subscribe to Media Records National Advertising Reporting Service, Total Advertising data shown has been supplied by the publisher to Media Records and included in this compilation. All publisher supplied figures are converted to MRCS/SAU inches by Media Records. These newspapers are indicated with an asterisk (*).

REPORTING METHODOLOGY

Media Records continues to measure in linage but due to the introduction of the SAU 6 column format Media Records has designed and developed a methodology with the approval of our subscribers, the INAME Measurements Committee, The ANPA/NAB Working Committee, The AAAA Newspaper Committee, and other industry groups.

The approved methodology is titled The Media Records Conversion System (MRCS) and is based upon the printed page area of each product of the newspaper and is a five step approach as follows:

1. Measure Printed Page......
   Width and Depth in Inches.
2. Determine Square Inches of Page......
   Multiply Width by Depth Inches.
3. Determine the Number of SAU Inches of Page......
   Divide the Square Inches by 2.0625 (SAU Inches).
4. Measure the Total Lines of the Page......
   Multiply Column Depth Agate Lines by the Number of Columns on the Page.
5. Determine the Factor for Converting Measured Lines to Reported SAU Inches......
   Divide the Total Lines of Page by the Number of MRCS/SAU Inches of the Page.

P&G-Vicks

(Continued from Page 1)

product. Now that Y&R directs some $120 million worth of Colgate business worldwide, Y&R's $40 million R-V business, which also includes Vicks Formula 44-D cough syrup and Tempo antacid, pales in size.

Y&R had no comment on the effects of this deal on its assignments, but president-ceo Alex Kroll told employes in an internal memo last Friday he is not concerned with megamerger mania as long as the agency holds to its task of being the best at helping build a client's business with creative ideas.

There are signs that P&G is taking a more relaxed view toward agency conflicts. Before the proposed acquisition of Richardson-Vicks, P&G had chosen to overlook the over-the-counter drugs that P&G agency D'Arcy Masius Benton & Bowles handled for R-V, including Vicks NyQuil and DayCare cold medicines, Sinex sinus remedy, Cremacoat cough medicines, Vicks cough drops and Clearasil acne medicine.

Since DMB&B also has some P&G drugs, such as Pepto-Bismol stomach remedy and Norwich aspirin, traditionally the relationship would not have been condoned.

P&G's longstanding policy states that a conflict exists when an agency handles any product anywhere that might compete with any brand in the P&G division of the assigned product.

The policy is "designed to keep agencies from ending up in a compromising position," P&G officials said. But they would not elaborate.

Besides Y&R, R-V's other major shop is DMB&B. Since P&G has already overlooked a previous apparent R-V/P&G conflict at DMB&B, that relationship should be secure. The big question lies in what will happen to agencies that handle smaller pieces of R-V business: Slater, Hanft, Martin (Percogesic analgesic, Formby's furniture refinishing products), Carrafiello-Diehl & Associates (Fasteeth, Fixodent, Complete, Denquel oral healthcare products), Leber Katz Partners (Saxon aftershave, Pantene haircare products) and Peter Rogers Associates (Vidal Sassoon haircare line).

Only last May, P&G went outside its familiar fold, assigning Zest soap to Jordan, Case, Taylor & McGrath. But agencies that had come with other P&G acquisitions in the past have gradually been dropped and brands consolidated at shops already on P&G's roster.

In announcing a definitive merger agreement, Cincinnati-based P&G said R-V would maintain its headquarters in Wilton, Conn., and operate as a wholly owned subsidiary. When P&G bought the Norwich-Eaton pharmaceutical business in 1982 (from, at that time, Morton-Norwich), the company said it planned no immediate changes. But most of those operations have been consolidated.

P&G scored extra points in proving it is a revitalized marketing machine by emerging as the surprise winner in the R-V winner-take-all sweepstakes. But the mode of growth—acquisition vs. internal development—is new to this company that for years prided itself on its internal-development capabilities. While P&G in the past has acquired small companies and then turned their brands into major products, it has never made an acquisition near the size of R-V.

In offering $69 a share for Richardson-Vicks, which had been fighting a hostile takeover attempt by Unilever N.V., P&G is not intensifying to any great degree the bitter marketplace rivalry between it and its two traditional U.S. competitors—Colgate-Palmolive and Unilever's Lever Bros., both New York.

Instead, the $1.55 billion acquisition already approved by both boards, will put P&G up against the likes of Gillette, Noxell, Helene Curtis, Chesebrough-Pond's, SmithKline Beckman, American Home Products—even Burroughs Wellcome.

But the bidding war that erupted when R-V sought a partner other than Unilever did pit the household products company then against its two traditional rivals as well as other interested parties.

Unilever bowed out gracefully with a $60-per-share high bid, congratulating the winner but noting that the price exceeded the value of the business to Unilever.

Colgate-Palmolive, another prospective purchaser, pulled out when its board refused to support chairman Reuben Mark's bid of $70 a share because it would weaken the company's financial standing.

Analysts generally approved the R-V buy despite the price tag that some considered high.

Hugh Zurkuhlen, an analyst at Salomon Bros., said, "The buyout of R-V is a good fit, both productwise and debtwise. R-V and P&G have synergies in distribution and marketing channels, which will be helpful to both companies. It appears, given P&G's [uneven] success in new products, that it's easier to acquire existing products with name recognition" and market them heavily.

Commented Jay Freedman, analyst at Kidder, Peabody, "Conceptually the merger is positive. It will give P&G exposure in businesses they've been trying to build, an entree into skincare and nutrition, plus more products in areas where they are already strong, like Vidal Sassoon's haircare products."

R-V will do much to expand P&G's struggling pharmaceutical business, an area P&G has selected for major investment, but where its marketing muscle has not won any awards. Its best known otc is Pepto-Bismol, but P&G has had high hopes for Encaprin analgesic, Head & Chest cold remedy and Chloraseptic sore-throat remedies.

Before the opportunity with R-V arose, P&G was known to be interested in the G.D. Searle & Co. consumer products business now owned by Monsanto: Metamucil and Prompt laxatives, Dramamine antinauseant, Icy Hot analgesic balm and Equal sugar substitute.

Mr. Freedman believes P&G "could and probably will continue" its efforts to buy those.#

A client conflict? Young & Rubicam, a major Colgate agency, handles these Richardson-Vicks brands, soon to be part of P&G.

GF staff fear: Where PM smokes, they're fired

New York—The proposed $5.8 billion acquisition of General Foods by Philip Morris Inc. has many GF staffers on edge.

"Morale is low," said one GF insider. "People are nervous."

Among their concerns are rumors that GF will speed up planned across-the-board staff cuts, said to be as high as 20%—although GF denied that figure. The cuts had been expected to unfold over a longer period of time.

Similar rumors are circulating in PM's executive suite.

PM, in documents sent to GF shareholders, said it does not plan to sell off any GF operations.

A spokesman for White Plains, N.Y.-based GF said it has been tightening up for some time.

"We have had an ongoing effort to reduce overtime and examine administrative costs," he said. "It is absolutely untrue that we are reducing staff by 20%."

In the meantime, a half-dozen agency executives are nervously eyeing potential account conflicts and wondering whether megamergers are forcing a redefinition of the traditional agency/client relationship.

Even without improved productivity in the GF unit, some analysts already are predicting that PM's earnings growth will suffer little if at all after GF is absorbed.

"I'm not as upset with the acquisition as I gather some people are," said Diana Temple, tobacco-industry analyst for Salomon Brothers in New York. "I think it's a positive for PM because it diversifies its earnings base."

Ms. Temple believes PM can maintain its operating earnings growth at its present 16% to 17% level and increase earnings per share from the present $10.50 to up to $12. "If General Foods just grows about 10% at the operating level, it [would translate into] very strong growth at Philip Morris."

PM had to make an acquisition, a big acquisition, analysts believe. The specter of product-liability suits now being heard in several courtrooms around the country has worried tobacco executives, most notably those at PM, which is the least diversified of the major tobacco marketers. Only 8% of PM's operating income was from nontobacco sources. After the GF merger, 24% of operating earnings will come from nontobacco businesses, including GF, Miller Brewing and Seven-Up Co.

As for the agencies, PM is offering neither words of encouragement nor enlightenment. It isn't talking about agency conflicts.

However, there are several potentially explosive situations in the PM/GF agency stable, among them D'Arcy Masius Benton & Bowles, which, besides GF business, handles Miller archrival Anheuser-Busch; Leo Burnett USA, a major PM USA agency that also handles GF's Post unit's competitor, Kellogg Co.; Ogilvy & Mather, which is Brown & Williamson Tobacco Co.'s agency of record for media as well as its agency on several brands; Ted Bates, a GF agency that handles A-B's Michelob and also owns William Esty Co., the second-largest agency on RJR's roster; Young & Rubicam, a GF agency that handles several products for PM's rival, R.J. Reynolds Industries, including Kentucky Fried Chicken, Canada Dry and Heublein products, and Grey Advertising, which handles special assignments for Lorillard.

One agency executive familiar with the tobacco business said, "You won't see a bloodbath quickly, but there certainly will be changes down the road as a result of the merger. You will probably see a lot of statesmanship on the part of the tobacco companies." But, he added, "I think it's the tobacco conflicts that count."#

BK review

(Continued from Page 1)

dressed down BK's recent marketing strategy for its lack of focus and continuity, particularly during the last six months. While individual programs generated some excitement, the company's ad messages, including ads for last summer's rollout of a larger Whopper sandwich—have failed to project a consistent image for consumers, Mr. Campbell said.

"The competitive pressures are so great in this industry that you can't afford to go 18 to 24 months without consciously articulating to people what your over-all purpose is," Mr. Campbell said.

Despite McDonald's steady increases in ad spending, which threaten to blunt BK's ads even more, Mr. Campbell believes sharply focused messages will get BK awareness. He pointed out that despite a $30 million blitz to support the new Whopper, that campaign primarily appealed to existing Whopper eaters and failed to attract new customers.

(Advertising Age, in its latest monthly adWatch survey [AA, Sept. 30], found that Burger King's $30 million July Whopper campaign resulted in a 3.6 percentage point awareness increase compared with June, to 19%. That was a far cry from the 16% gain BK made with its first "broil vs. fry" campaign in October, 1982. When the new Whopper campaign ended, BK's awareness level dropped 5.6%, to 13.4%.)

Mr. Campbell attributed the early success of BK's comparative "Battle of the burgers" approach in 1982-83 to its ability to clearly state the chain's positioning. Followup campaigns based on menu items—such as one last spring for double hamburgers—hammered away at the broiling vs. frying question with less effectiveness, he said.

"There's never going to be the kind of surge from a short-term marketing event that you can get by actually taking people through your whole business in a campaign," Mr. Campbell said.

BK's way of doing business is likely to change rapidly during the next year as Mr. Campbell attempts to introduce more full-service restaurant amenities into the burger chain's operation. BK parent Pillsbury Co. this year has acquired Diversifoods Inc.'s Godfather's Pizza chain and Quick Wok, a Japanese chain. And Mr. Campbell, who heads Minneapolis-based Pillsbury's restaurant operations as exec vp, says he plans to borrow heavily from those concepts in a drive to upgrade BK's image.

Improvements in restaurant decor (less plastic, more flowers and greenery) and more value-added services, including free soft-drink refill dispensers (AA, Sept. 19), are part of his plan to upgrade BK's image. Consistently speedier, more courteous service than Big Mac also is a goal that is likely to find its way into the marketing strategy, Mr. Campbell said.

As he sees it, the rapid maturity of the business will mean market share battles will hinge on other factors besides who has the biggest or best-tasting burger.

"To avoid becoming the Howard Johnson's of 1995, we're going to have to operate more like a restaurant and less like a factory," Mr. Campbell said. "The ultimate success of our business will be how much quality we can put into each customer visit. There's a lot of room for improvement there, both in our operations and marketing."

To oversee these changes, Mr. Campbell is depending on Jay Darling, who was named president, Burger King USA, earlier this year. With Mr. Dempsey's departure, Mr. Darling has assumed day-to-day responsibility for marketing. Mr. Dempsey could not be reached for comment.

Mr. Campbell asserted that BK's marketing shakeup will have no effect on the company's relationship with J. Walter Thompson USA, New York.

"I'm very satisfied with Thompson. On balance, my confidence in them has never wavered," Mr. Campbell said.

However, one indication of the sweeping changes planned by Burger King is the active participation these days of Thompson exec vp-general manager Steve Bowen, who headed the now $125 million account during the inception of the "Battle of the burgers." JWT's first new creative featuring the repositioning is set for November.#

Baybry's

(Continued from Page 3)

field's birthday, East Coast Black Out Day and the anniversary of New York's Holland Tunnel).

Bloom Agency chairman Paul McMahon said the campaign strategy is to help people find everyday occasions for celebration.

Baybry's is the first cooler with a champagne base. The champagne is being supplied through an agreement with Franzia Brothers Winery, Ripon, Cal., which markets its own wines and champanges under the Franzia and Mogen David names. Baybry's is packaged to resemble a half-bottle of champagne, and is targeted to consumers from minimum drinking age to mid-40s, Mr. McMahon said.

The initial wave of tv and radio ads, all of which depict a variety of humorous reasons to celebrate, are only the beginning. Mr. Price said he hopes anticipating the next occasion to be spotlighted will be a sort of game for consumers.

Bloom's creative team was led by associate creative director Richard Schiera and art directors Don Fields and Marion Johnson. Music was created and the singing talent assembled by Richard Look, Look & Co., New York, along with Bloom's Mr. Schiera and Heidi Beckerman. The account team includes Mr. Price, along with vp-management supervisor Alan Armstrong, senior vp-media Charlotte Wenberger, vp-director of planning Jim Rienstra and group media director Beverly Leidee.#

The 'challenging' economy tops magazine meet

By STUART J. ELLIOTT

HILTON HEAD ISLAND, S.C.—That song they kept playing here last week during the 1985 American Magazine Conference—was it "What a Difference a Year Makes"?

At last year's conference, the urge to merge was all the rage, as industry players reveled in what turned out to be "a vintage year" for attracting advertising, as it was described by Jack Rehm, president-publishing group, Meredith Corp., and 1984-85 chairman of the Magazine Publishers Assn.

Discussions with many of the approximately 650 persons attending this year's conference, co-sponsored by MPA and the American Society of Magazine Editors Oct. 6 to 9, disclosed different, changing, attitudes.

That is not to say media merger mania is over. One deal—the purchase of *Early Years/K-8*, Darien, Conn., by Highlights for Children Inc., Columbus, O.—was announced during the conference. Another—the merger of Telepictures Corp., parent of Telepictures Publications, with Lorimar Inc.—cost the conference the scheduled appearance of Michael Garin, Telepictures' president-chief operating officer.

There also was the proverbial buzzing in the corridors about more buying and selling to come, with such names as CBS Magazines, Hearst Magazines and Time Inc. being mentioned.

And even with the slowdown in marketers' purchases of magazine ad pages, which is becoming more pronounced as '85 comes to a close (AA, Oct. 7), it still should be "the best year for the magazine industry in revenues," predicted William Gorog, MPA president, following "two incredible years" during which those revenues soared 33%.

Yet there is a belief the easy times, the easy gains, are pretty much over.

In this new environment, which executives here termed "challenging"—the polite version of "tough as all get-out"—the emphasis is on working harder and smarter to achieve increases in both ad dollars and share of market.

Mr. Gorog said the industry could expect ad revenues to advance 5% to 6% in '86 "if we just roll with the economy." But he said the

Falling net tv prices pinch other media

By VERNE GAY

NEW YORK—A pall has settled over all national media in the fourth quarter as many key advertising categories pull back short-term spending and falling network tv prices create pressure on other media.

While the network tv fourth-quarter scatter market started October with as much as $100 million in unsold inventory, it is starting to pick up some sales steam. But prices are still reduced from the upfront market of last summer.

The attractive pricing in network tv is zapping what little strength there was in the national spot tv market, although tv reps still hope to come in between 6% and 9% ahead of the same period last year.

The lure of low-cost network time is also leveling a severe blow against barter syndication. With network cost-per-thousand rates so low, syndication can no longer offer advertisers a "cheap" alternative. In addition, most of the prime barter syndication programing was sold out earlier in the year, and the inventory remaining doesn't have the appeal to compete with network prime time or daytime. Don Stump, vp-media sales of Telepictures, said, "The networks are in a tight situation and [they're saying]: 'We're not gonna share a dime with syndication.' "

Magazines are experiencing an especially poor fourth quarter in what has been a soft market for the past six months. Major ad categories,

U.K. shop, DFS draft agreement on client concerns

Dorland conflict pact

By LAUREL WENTZ and DENNIS CHASE

Dorland Advertising in the U.K. and Dancer Fitzgerald Sample in the U.S. are drafting an agreement to resolve client-conflict concerns in any DFS-Dorland deal, said Jack Rubins, Dorland chairman.

Saatchi & Saatchi, which owns 100% of Dorland, also will sign the agreement, which Mr. Rubins described as "unique."

Mr. Rubins acknowledged for the first time that a buyout of DFS by Dorland was a possibility. When asked whether Dorland, using Saatchi money, might buy DFS outright, he said, "I do not preclude that."

He said the deal, first reported last month (AA, Sept. 23), might be concluded by the end of the year and that DFS chairman Stu Upson would become chairman of the new group.

Other sources said the purchase could happen within the next several weeks, and that Saatchi offered to buy DFS for $130 million. Mr. Rubins will be in DFS' New York offices before the end of October.

Previously, Mr. Rubins had outlined a three-zone approach in which Dorland and DFS would exchange equity in Europe, the U.S. and Asia, and divide responsibility for looking after each other's clients (AA, Sept. 30).

To allay fears of clients—mostly in the U.S.—that there are too many conflicting Saatchi and DFS accounts, DFS and Dorland lawyers have drafted what they call a "watertight" legal agreement preventing conflicts.

The confidential, three-page document would prevent Saatchi from receiving information from Dorland and DFS about clients, personnel or reporting procedures—"all the things clients would expect to keep confidential," said Michael Geraghty, Dorland's commercial manager.

The agreement restricts everyone from top managers to low-level employes from exchanging information. The agreement specifies, for example, that Saatchi cannot require information from Dorland or DFS about clients or require the services of any director or

Seagram spots go to cable

By GAY JERVEY

After six months of trying in vain to buy network tv time, Joseph E. Seagram & Sons will take its controversial "public service" campaign to at least three cable networks Oct. 16 with a four-week, $1.2 million flight.

Seagram declined to comment on the effort, which will be announced in Washington tomorrow.

The spots, which argue that 1¼ ozs. of whisky contains no more alcohol than 5 ozs. of wine or 12 ozs. of beer, will run on USA Network, Turner Broadcasting System's

HIGHLIGHTS

Net prices squeeze other media 1

A pall has settled over all national media in the fourth quarter as many key advertising categories pull back spending and falling network tv prices create pressure on other media.

Conflict pact for Dorland, DFS 1

The U.K.'s Dorland Advertising said it and Dancer Fitzgerald Sample are drafting an agreement designed to solve client conflict concerns that might be created should the shops merge. Dorland chairman Jack Rubins called the agreement with DFS "unique."

Polaroid snaps up new ad focus 3

Polaroid breaks an estimated $20 million tv and print campaign on Oct. 20 that focuses on the benefits of instant photography rather than on cameras. That's a creative and strategic shift away from Polaroid's ads of recent years.

JWT, O&M stay on top 3

After three quarters of polling, J. Walter Thompson USA and Ogilvy & Mather remain deadlocked as the best of the nation's advertising agencies, according to Agency Watch, an ADVERTISING AGE survey of company ad directors.

Chiat Gaines a big one 4

Chiat/Day won its first major package-goods account last week by picking up the $19 million account for Gaines Foods. It includes the Gravy Train, Cycle, Top Choice and Gaines Burgers dog foods.

Smokes take it slow 10

The new wisdom in the tobacco business says that you test a product, practically to death, before you take it national. With few notable exceptions, cigaret marketers are starting tests in two-to-four traditional test cities, then expanding the tests, often to entire regions.

Federal, UPS in foreign fight 12

Federal Express and United Parcel Service, two giant rivals in the U.S. package-delivery business, both made significant moves last week to extend their horizons into the growing international air-courier market.

Master-ing the beer market 32

Masters Brewing Co.—the joint venture by breweries from the U.S., Canada and West Germany—last week launched its first beer, Masters, a superpremium brand introduced in Miami, Washington, Boston and Columbus, O.

Upgrade your Japanese.

You never know where the road might lead you. So be prepared. In a take-just-about-anything, take-just-about-anywhere Vista wagon. Now with optional four wheel drive. Four wheel drive translates some of the nastiest words in the language—detours, dirt, gravel, potholes, slush—into a pleasant communication with the road. And it does so at the push of a button. Colt Vista's interior adapts handily too. Middle and rear seats fold backwards and forwards. So you can change the set-up as easily as you change your mind. Don't get stuck with a fair weather friend. Get an '86 Colt Vista wagon. Perfect Japanese for an imperfect world.

Vista is imported for Dodge and Plymouth, built by Mitsubishi Motors Corporation in Japan.

Colt. It's all the Japanese you need to know.

Chrysler's yen for market share 72

Japanese-built Dodges and Plymouths suddenly are outselling American Motors Corp. and Volkswagen of America. Chrysler is projecting about a 60% increase for the 1986 model year in captive-import sales because of eased restrictions on Japanese imports.

Stirring up the yogurt market 74

In a market overrun with new products and line extensions, making an impact on the nearly $1 billion yogurt industry is no easy task. But To-FITNESS Inc., a Miami-based health food marketer, hopes to do it in an instant. To-FITNESS has gained exclusive U.S. rights to a process that allows yogurt cultures to remain dormant in powdered form until activated by moisture.

INTERNATIONAL

Argentine cigaret ad ban 56

A proposed government bill banning cigaret and tobacco advertising in Argentina is sending tremors through the advertising community here. The health ministry bill about to be introduced bans electronic media, print and outdoor ads for cigarets and promotions and sponsorships by cigaret marketers.

New Shah paper 56

Eddy Shah, a Londoner of Iranian descent, is launching a new newspaper that will break all the rules London's newspaper industry has lived by for decades. Ad rates will be 75% cheaper than his competitors' and the seven-day-a-week tabloid will be the first newspaper here to use color every day.

OTHER NEWS

G.D. Searle & Co.'s NutraSweet Group will spend $1 million on a November-December print campaign to counter the "bad press" its nonnutritive aspartame sweetener received during the summer. Page 4.

Procter & Gamble has given birth to a new character, Sud-Z Lemon, to introduce a new Joy dishwashing liquid. Page 4.

The Benevolent Dictators: Would she or wouldn't she have made a great president for Foote, Cone & Belding? No one will ever know because Shirley Polykoff never reached that position. The creative force behind Clairol's famous tag lines spent 18 years of her career at Foote, Cone & Belding before starting her own agency. Page 48.

Georgia-Pacific Corp.'s recent announcement that it had completed its acquisition of the Riegel Textile Corp. went virtually unnoticed amid the merger news from larger companies. Yet it means G-P, already the nation's second-largest private-label disposable-diaper marketer, has gained Riegel's Cabbage Patch Kids diaper line, considered the best known private-label disposable diaper. Page 78.

Xerox's award of its direct-marketing account to Marschalk Co. two weeks ago was a source of consternation at many direct-marketing agencies. Unlike its competitors, Marschalk has no dedicated direct-marketing capability. In Direct Marketing. Page 88.

CAMPAIGNS BREAKING

Ralston Purina today breaks tv spots for its Alley Cat, a lower-price cat food. The spots are scheduled to run through Nov. 22, accompanied by on-pack couponing (AA, July 15).

J.C. Penney breaks a network tv campaign Oct. 16 as part of its $9 million campaign for its Best of Britain fall fashion promotion from N W Ayer (AA, May 20).

Kitchens of Sara Lee today breaks 30-second tv spots introducing its Bagel Time bagels, themed "Eat 'em slow." On-pack coupons and radio, via Foote, Cone & Belding, also support (AA, July 15).

COMING THURSDAY

Good creative isn't easy. It just appears that way when the results are strikingly successful, as they have been at W.B. Doner & Co., Southfield, Mich., consistently the most honored shop in the Detroit area, the third-largest advertising market (based on billings) in the country.

Special Report: While direct response enters new fields and reaches new creative heights, alternative media fall flat.

Polaroid heavies up in 4th quarter

By LISA E. PHILLIPS

NEW YORK—Polaroid breaks an estimated $20 million tv and print campaign on Oct. 20 that focuses on the benefits of instant photography rather than on cameras.

The new tag line, delivered by actor Martin Sheen at the end of every tv spot, tells consumers their Polaroids "do what no other kind of camera can do."

That's a creative and strategic shift away from Polaroid's ads of recent years. Last year's fourth-quarter campaign, traditionally Polaroid's biggest, was strongly tied to a Trans World Airlines promotion that offered a 25% discount on trans-Atlantic airfares with the purchase of a Polaroid camera.

This year's ad spending has been spotty thus far, with only one flight of tv ads running for six weeks last summer. Fourth-quarter spending this year will be up 45% over last year's fourth quarter, said Peter Eichorn, Polaroid vp-North American marketing.

Polaroid, still the market leader in instant photography, breaks its Christmas season promotion Oct. 20. The new strategy focuses on special events, such as a new baby (above), and is tagged "Polaroid instant cameras do what no other kind of camera can do."

Enthusiasm for the new ad campaign within Polaroid was so strong that "we squirreled away our quarters from the rest of the year to put behind this campaign," said Frank Nolan, acting vp-advertising.

The new, use-oriented strategy and heavy ad spending come at a critical time for Polaroid because the company plans to introduce a new instant photography system next spring. Mr. Eichorn would say only that the new camera will be on sale in retail stores in the first half of 1986, and that it would be positioned as a higher price, higher-end camera than its current top model, the 680.

Troubled in recent years by a decline in camera sales, Polaroid had flat sales in the first half of 1985. But according to a recent Gallup poll and an internal study of dealer inventory, instant camera and film sales should pick up for the Christmas season, Mr. Eichorn said.

A 60-second spot in the fall campaign, via Ally & Gargano, features the pounding beat of the

Personals classified as daily profit makers

By WILLIAM F. GLOEDE

To most daily newspaper readers, the "personal" column in the classifieds is a *meet*market for one-man bands and party clowns, separated by an occasional invocation to St. Jude.

Newsday, Times Mirror Co.'s Pulitzer Prize-winning tabloid that circulates throughout Long Island and in New York City, is finding that romance in the personal columns can both increase readership and contribute to the bottom line.

Personal ads, once the province of alternative weeklies like New York's *Village Voice*, regional magazines and the *New York Review of Books*, are slowly making their way into the daily newspaper as publishers react to the increasing number of singles.

In the last 12 months, several major dailies—and a raft of smaller ones—have begun mining the personals market, which is populated with young, upwardly mobile people who are among the least frequent readers of daily newspapers. Among the dailies jumping on the

AGENCY WATCH

Which agency's best?

Response by company ad directors to question, "Based on your experience and the experience of your peers, and regardless of size, which ad agency, in your opinion, provides the best overall services and products to its clients?" Up to three responses were allowed. *Not among leaders during period. Source: SRI Research Center Inc.

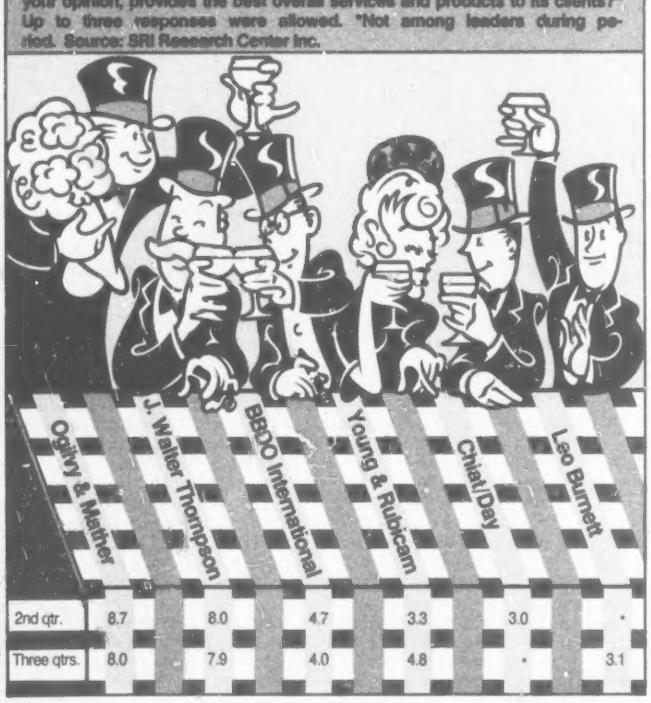

Chart by Steve Musgrave

JWT, Ogilvy still on top

But Chiat/Day turns up as 'hottest'

By JOSEPH M. WINSKI

After three quarters of polling, J. Walter Thompson USA and Ogilvy & Mather remain deadlocked as the best of the nation's advertising agencies, according to Agency Watch, a survey of company ad directors.

The two agencies could hardly be closer.

In the April-June quarter, the latest period for which results are available, Ogilvy & Mather was named best agency by 8.7%, or 26, of the 300 ad directors questioned. JWT was named best by 8.0%, or 24 ad directors.

And in the cumulative totals for the three quarters from October, 1984, through June, 1985, just one vote separates the two agencies. Ogilvy & Mather received 72 mentions, or 8.0% of the total; JWT received 71 mentions, or 7.9% of the total.

Agency Watch is a quarterly survey conducted for ADVERTISING AGE by SRI Research Center of Lincoln, Neb. In each survey period, the research company questions a random sample of 300 ad directors of companies with $25 million or more in sales that are based in one of the 20 largest U.S. markets.

Stories based on the survey will be published at least twice a year. Highlights of the first survey, conducted in the last quarter of 1984, were published in AA's 1985 Agency Income issue (AA, March 28).

Respondents are asked the question "Which ad agency, regardless of size, provides the best over-all services and products to its clients?"

They are allowed to respond with the names of up to three agencies. Each mention is counted as one vote, whether it is the respondent's first answer or not.

JWT and Ogilvy have ranked No. 1 and No. 2 in each of the three surveys to date, and stand well above the rest of the field, as far as the ad directors are concerned. BBDO International was No. 3 in the most recent quarter with 4.7% of the mentions.

In the three-quarter totals, Young & Rubicam was No. 3 with 4.8% of the mentions.

Rounding out the top five in the latest survey were Young & Rubicam (3.4% of mentions) and Grey Advertising and Chiat/Day (tied with 3.0%).

In the three-quarter totals, BBDO International was No. 4 with 4.0% of the mentions and Leo Burnett USA No. 5 with 3.1%.

Ad directors also are asked to name the first agency that comes to mind. JWT wins handily in this measure, with an awareness score more than twice that of any other agency.

In the latest quarter, JWT was named as coming first to mind by 29.7% of the respondents, compared to 13.0% for No. 2 BBDO, 11.3% for No. 3 Young & Rubicam, 10.3% for No. 4 Ogilvy and 7.7% for No. 5 Grey.

The cumulative awareness rankings for the three quarters were JWT (26.6%), Ogilvy (13.2%), BBDO (12.1%), Young & Rubicam (11.5%) and Doyle Dane Bernbach International (8.0%).

Ironically, given their obvious belief in the power of advertising, agencies apparently do little self-

Shop salary survey under way

New York—You *can* put a price tag on creativity and it's called salaries and incentives.

Advertising Age, in cooperation with Cole Surveys, Boston, the leading compensation survey company, has begun mailing out questionnaires for its first Survey of Advertising Agency Compensation. When published in January, the report will contain accurate statistics on how much the top creative and managerial talents in the industry are paid, arranged by national, regional and size groups. Pay differentials will be shown by organizational types, including multiunit headquarters, independent single-unit agencies, subsidiary agencies and branch office operations.

With more than 20 years' experience in conducting compensation studies, Cole Surveys is a subsidiary of Wyatt Co., a worldwide compensation and benefit consultant company. In 1985, more than 2,000 organizations, including the 100 largest commercial banks, have entrusted Cole with their data and participated in its surveys.

Cole's advertising survey will seek base salary and incentive information on the 10 highest-paid executives at an agency, ranked from highest to lowest on the basis of Dec. 31, 1984, base salaries. The survey also will include base salary data as of Oct. 1, 1985, for the same 10 peopie.

Positions included in the survey are: Ceo II-independent; ceo I-subsidiary; president-chief operating officer; branch office manager; exec vp; chief financial officer; traffic manager; creative director; associate creative director; senior art director; senior copywriter; media director; associate media director; broadcast production manager; print production manager; public relations manager; director of account management; senior account exec, and market research manager.

Data also will include compensation of managers who are not among the 10 highest paid but perform duties in one of the described positions. Financial data collected on each agency are used to categorize

Hume to head Chi. bureau; 2 promoted

S. Moran

P. Sloan

Chicago—Scott Hume has been named Chicago bureau chief of Advertising Age. Mr. Hume has been serving as acting bureau chief since last April, when his predecessor, Sarah Moran, began maternity leave.

Ms. Moran is rejoining the Chicago AA staff as a senior editor with new responsibilities for expanding coverage of retail news and features into a new national format.

Working with her to expand retail coverage is New York-based senior reporter Pat Sloan, who has been promoted to senior editor. She will continue to spearhead retail coverage from New York, where she reports on national retail trends and retailers in the Northeast, and in addition will continue to cover cosmetics and fashion.

S. Hume

Mr. Hume, who joined AA in April, 1983 as a reporter, previously served with Cahners Publishing Co.'s *Restaurants & Institutions* as senior editor and as editor of a weekly newsletter, "Chain Marketing & Management." In his new post, he will continue to report on the fast-food and domestic beer industries. Mr. Hume holds a degree in English literature from Denison University, and a master's degree in English literature from the University of Chicago.

Ms. Moran, a business reporter for the *Chicago Sun-Times* who developed into the newspaper's leading retailing reporter, joined AA as Chicago bureau chief in July, 1984. From 1979 to 1982, she served as an associate editor of the "Kiplinger Washington Letter" and contributing editor to *Changing Times*. Ms. Moran earlier served as the editor of "Postal World," associate editor of McGraw-Hill's "Inside D.O.E.," covering the oil industry, and editor of "Fuel Oil Week" and "U.S. Oil Week" for Observer Publishing. She is a graduate of Duke University.

Ms. Sloan joined AA as a reporter in October, 1977, from Fairchild's *Daily News Record*. At the Fairchild daily from March, 1975, until joining AA, Ms. Sloan served as copy editor, men's grooming editor and men's accessories editor. She is a graduate of the University of Missouri. At AA, she has specialized in coverage of retailing, cosmetics, fragrance and fashion.#

CORRECTIONS & CLARIFICATIONS

- Marschalk Co., San Francisco, not Houston, is the agency for Del Monte USA, San Francisco (AA, Sept. 30, P. 91).
- Linage figures for *W* were omitted from the September Consumer Magazine Ad Linage report (AA, Sept. 23, P. 34). Updated figures should read: Sept., 1985—163.3; Sept., 1984—143.7; Year-to-date, 1985—965.3; Year-to-date, 1984—956.8.
- The photograph of the Willie Bear Gummy Bears incorrectly was identified as belonging to the Foreign Candy Co., Hull, Ia. The Willie Bear brand is marketed by C&J Willenborg Inc., Ramsey, N.J. Foreign Candy markets the Black Forest brand (AA, Sept. 12, P. 8).
- J. Walter Thompson USA, San Francisco, is the advertising agency of record for the Embarcadero Center retail development, San Francisco. The agency was incorrectly reported to be the Los Angeles office of JWT USA (AA, Sept. 30, P. 92).
- J'Roget L'Orangerie, a bottled mimosa cocktail from Canandaigua Wine Co., Canandaigua, N.Y., is made with J. Roget champagne, orange juice and triple sec flavoring, not the liqueur (AA, Aug. 26, P. 1).
- French advertising agency Publicis S.A. is a privately held company, not a state-run agency (AA, Sept. 30, P. 52).#

Summer doldrums hit papers

By WILLIAM F. GLOEDE

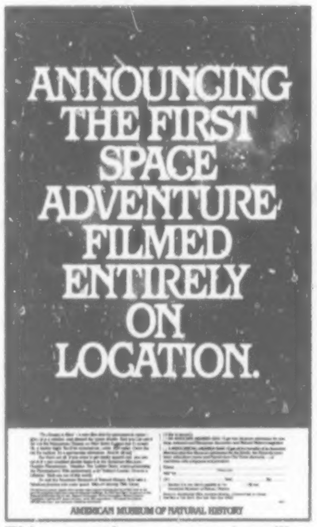
NEW YORK—The traditional summer slowdown in advertiser spending in daily newspapers was particularly pronounced in July as advertisers in 10 of 16 major categories cut spending from July, 1984, levels, according to the ADVERTISING AGE Flash Report of Newspaper Advertising Investments prepared by Media Records.

Total spending in 16 measured categories in 15 major markets fell by roughly $3 million in July compared with the same month last year, with total spending coming in at $202.7 million.

Among the six advertiser categories posting gains were food stores, up 18.5% to $26.7 million; radio-tv-phonographs and records retailers, up 10.6% to $15.1 million; new passenger-car sellers and marketers, up 32.6% to $13.8 million; amusements advertisers, up 6.3% to $28.4 million; airlines, up 7.4% to $8.4 million, and stock, bond and investment houses, up 33% to $1.7 million.

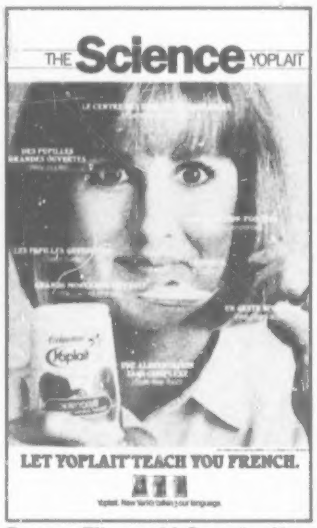
Losing retail categories included department stores, down 5.1% to $54.8 million; general-merchandise stores, down 5.4% to $26.5 million; computer stores and supplies, down 16.3% to $3.6 million, and, in the financial category, banks and trust companies, a drop of 29.5%, decreasing to $4.9 million.

Among the general categories posting declines were alcoholic beverages, down 26.4% to $1.6 million; cameras, photo supplies and services, down 41.7% to $457,728; computers, equipment and services, down 66.8% to $1.3 million; public service utilities and commissions, down 22.5% to $4.4 million; publishing and media, down 25.6% to $6.4 million, and cigarets, down 17.7% to $4.5 million. #



ANNOUNCING THE FIRST SPACE ADVENTURE FILMED ENTIRELY ON LOCATION.
AMERICAN MUSEUM OF NATURAL HISTORY

This arresting reverse headline set against the night sky made this Ogilvy & Mather ad for the American Museum of Natural History in New York stand out. Creative director, Tom Rost; art director, Paul Scolaro; copywriter, Tony Gomes; illustrator, Mark Tocchet.



Dancer Fitzgerald Sample, New York, tailored this ad for General Mills' Yoplait to the medium in which it was presented, the *New York Times'* "Science Times" section. Creative director, Stanley Becker; copywriter, Jill Danenberg; art director, Nina Salzberg; photographer, Larry Robins.

Best of Press selections are made by a committee of three: Hank Simons, vp-creative director of the Newspaper Advertising Bureau; James Dunawey, vp-information at the bureau, and William F. Gloede, ADVERTISING AGE's newspaper industry reporter. National System Inc., St. Louis, provides tear sheets to the Newspaper Advertising Bureau for much of this work. Agencies, clients and newspapers are invited to submit ads for review. Submissions should be sent to Mr. Gloede at AA's New York bureau.

CATEGORY REVIEW: YOGURT

To-FITNESS hopes for instant yogurt success

By JULIE FRANZ

Shares of the yogurt market

Dannon and Yoplait yogurts continue to battle it out for the lead against pressure from heavy-hitting marketers like Beatrice Cos. and Kellogg. Time Inc.'s Selling Areas-Marketing Inc. reports dollar sales of refrigerated yogurt hit $552.5 million in 1984, up 23.4% over $448 million in 1983. In 1985, sales are now at $576 million. Source: [1]A.C. Nielsen Co. and [2]Leading National Advertisers

Brand	Share[1]	Ad spending ($)[2]	Agency
Dannon	25.2	5.7 million	Saatchi & Saatchi/Compton and HCM
General Mills' Yoplait	14.5	13.3 million	Dancer Fitzgerald Sample
Kraft Light & Lively and Breyer's	8.0	4.4 million	Geers Gross
Kellogg's Whitney's	2.0	1.4 million	Leo Burnett USA
Beatrice's Mountain High	2.0	1.0 million	Bozell & Jacobs

Dannon introduced its Hearty Nuts & Raisin flavor in mid-1984. Yoplait, meanwhile, is trying to strengthen its brand name with a campaign linked to the French language. The Beatrice entry, Mountain High, holds a 2% market share nationally, but as much as 8% in its key markets.

In a market overrun with new products and line extensions, making an impact on the nearly $1 billion yogurt industry is no easy task. But To-FITNESS Inc., a Miami-based health food marketer, hopes to do it in an instant.

To-FITNESS has gained exclusive U.S. rights to a process that allows yogurt cultures to remain dormant in powdered form until activated by the addition of moisture, much like powdered yeast is activated by warm water.

The company intends to market three brands based upon the patented process—Instant Culture, a yogurt shake; Jet Set yogurt, and To-FITNESS Frozen Yogurt. All are powdered yogurt products that can be mixed with either milk or water.

Willa Rose Abramson, To-FITNESS president, cites instant coffee as an example of what the product can do for the yogurt market, which has been growing at a 14% pace yearly. Instant coffee has garnered 40% of the coffee market and acted as a catalyst to growth.

Jet Set powdered yogurt's 14-flavor line will begin testing in southeastern markets in January. But the product may have several obstacles to hurdle in gaining significant market share. Consumers may perceive the product as something suited for survivalists or campers. Like powdered milk, powdered yogurt may have to battle doubts that it tastes as good as the "real" thing.

The company's marketing plan addresses both problems, said Ms. Abramson. All To-FITNESS products, which include tofu, pasta and whole grain/seed bread, must pass three tests. "First and foremost, they have to taste great," she said. "Then they have to be high in nutritional value and low in calories."

To-FITNESS is banking on an aggressive, in-store, taste-testing program to get Jet Set yogurt and Instant Culture off the ground.

Advertising for the brands, now in the works, will stress the products' active yogurt cultures, which aid in digestion.

The process upon which the products are based, developed at Israel's Ben Gurion University, overcomes the problem of keeping yogurt cultures active through pasteurization and dehydration, Ms. Abramson said. Powdered yogurt will have an indefinite shelf life and, because Jet Set can be mixed with water, it's good for consumers allergic to lactose, a substance found in milk, she added.

The company hopes to garner a 2% share by the end of next year, said Ms. Abramson; she expects powdered yogurt to expand the market rather than grab share from other marketers. Richard Rosen Co., Miami, handles the account.

The competition has been careful in its reaction to powdered yogurt. "The success of any yogurt product depends on its quality and taste," a General Mill's spokeswoman said. Kellogg's Whitney's Foods doesn't consider powdered yogurt competition to ready-made yogurt, much like powdered and fluid milk aren't considered to be competing for the same dollar, a spokeswoman said.

"A powder conflicts with yogurt's all-natural image," said a Dannon spokesman. Powders "just don't seem to be all that good for you." For example, active cultures aside, yogurt and powdered chocolate drink mix in milk have relatively the same nutritional value, he said. "But you don't see people wolfing down chocolate milk for its nutritional value."

To keep up with the Dannons and Yoplaits, however, To-FITNESS is developing a powdered yogurt product with dried fruit that will retain its indefinite shelf-life. "We're about 95% sure we'll be able to do this," Ms. Abramson said.

Trying to shore up its leading position in the yogurt market, Dannon Milk Products this year has introduced Dannon Supreme, reformulated its Dannon Y.E.S. into Dannon Extra Smooth, and started selling its Dannon regular in a perforated four-pack package.

The company also boosted its advertising budget and streamlined its distribution system to neutralize the pressure exerted by Yoplait, General Mill's yogurt entry and the market's second-leading brand.

Dannon leads the market with a 25.2% share; Yoplait has a 14.5% share, down from 16.1% earlier this year. Kraft's Lite & Lively and Breyer's brands combined hold an estimated 8% share, sources say. Kellogg's new Whitney's brand has a 2% share nationally, but is distributed in only seven markets. Beatrice's entry, Mountain High, nationally holds about a 2% share while capturing as much as 8% in some of its 11 markets, sources say. Regional and store brands complete the remainder of the market.

Time Inc.'s Selling Areas-Marketing Inc. reports $552.5 million in refrigerated yogurt sales in 1984, 23.4% above the 1983 sales mark of $448 million. Thus far in 1985, sales have hit $576 million, SAMI reports. (SAMI does not track direct-to-store delivery, where Dannon is particularly strong; its figures also exclude frozen yogurt and yogurt drinks.)

The market made its largest sales jump between 1980 and 1981, when refrigerated yogurt volume climbed 38% to $298.5 million. While part of the increase can be attributed to inflation, the boom in "health" food started then, an industry source said.

The steady 14% growth of the yogurt market should continue, since sales are driven by consumer concern over wholesome foods, ready-to-eat items and rising prices of fresh fruit, vegetables and other healthy snacks, a Dannon spokesman said.

New-product introductions, sparked by more sophisticated processing methods, also will boost yogurt consumption, he added.

Dannon Supreme combines Dannon Extra Smooth, formerly Y.E.S. (yogurt extra smooth), and regular yogurt to make a richer, sweeter product, the Dannon spokesman said. The new product is flavored but also has fruit on the bottom. Ads call it "Yogurt good enough to be dessert."

Ad copy for the renamed Dannon Extra Smooth, a premixed product, says: "What we created turned out to be so extra smooth and creamy, we finally had to call it the way it is." Once the product is fully introduced, Dannon will drop the Y.E.S. initials from packaging all together, the spokesman said. Both products are getting print and tv from Saatchi & Saatchi/Compton, New York. HCM, New York, handles Dannon regular.

In an effort to cut costs, Dannon is reducing its fleet of store-delivery trucks while increasing distribution through traditional warehouse channels, a source said. Dannon nearly has stopped direct delivery in southeastern markets, where its market share is lower than elsewhere, he added.

The move also will boost Dannon's numerical share of the market and increase the total market size, since its direct-to-store delivery system wasn't tracked by SAMI and other market share services. Dannon declined comment

Yogurt

(Continued from Page 74)

on the subject.

The company boosted its measured media budget by 24% to $5.7 million in 1984, up from $4.6 million a year earlier, according to Leading National Advertisers. Dannon said those figures are "grossly understated" but wouldn't divulge its actual budget. For first-quarter 1985, Dannon spent $2.0 million, mostly in network, spot and cable tv. The LNA figures neglect to account for any magazine ads, which Dannon relies on heavily, the company said.

General Mill's Yoplait has been playing tit-for-tat with Dannon since the brand went national in 1977. Yoplait beat Dannon to market with its Breakfast Yogurt, a product with fruit and nuts mixed in, introduced in 1983. Dannon introduced Hearty Nuts & Raisins in mid-'84. The two also are battling it out with flavored yogurts that also have fruit on the bottom—Dannon's Supreme and Yoplait's Fruit-on-the-Bottom.

French lesson

Yoplait is trying to strengthen the brand name with a campaign themed "Let Yoplait teach you French." Print ads, via Dancer Fitzgerald Sample, New York, translate a cowboy's and a sunbather's garments, expressions and yogurt into French. Tv spots feature people bursting into French after eating Yoplait.

Yoplait's 1984 ad budget jumped 77% to $13.3 million from $7.5 million in 1983, according to LNA figures. The company is spending at the same rate in 1985, sources say.

Yoplait isn't the only heavy hitter taking jabs at Dannon's market position. Food marketing giants Beatrice Cos. and Kellogg Co. entered the market last year while Kraft continues to be a threat with its Light & Lively and Breyer's brands.

Kraft seems to be relying more on its Light & Lively brand than the Breyer's brand, which is distributed heavily in the Northeast. Light & Lively, in perforated six-packs, has been dipping into Breyer's sales in those markets, though, industry sources said.

Breyer's share began slipping late last year when it converted to a 6-oz. from an 8-oz. package without offering a price break, according to one industry executive. Breyer's was trying to capture the attention of yogurt snackers, he added.

But an industry analyst says the strategy "blew up in their faces" as consumers proved their price sensitivity. Luckily, some of Breyer's sales went to Light & Lively, so Kraft didn't loose too badly. Light & Lively's multipack concept boosted sales when first introduced 18 months ago, but the concept is too easily imitated, as seen by Dannon's introduction of the Dannon regular four-pack, he added.

While Kraft wouldn't comment on its strategy, a spokesman said it's not planning to discontinue the Breyer's brand. The brand gets about $1.5 million in spot tv support and Kraft doesn't plan to change the budget significantly, the company says.

Kraft will continue its "Stock a stack" tv and print campaign for Light & Lively, via Geers Gross, New York, the company says.

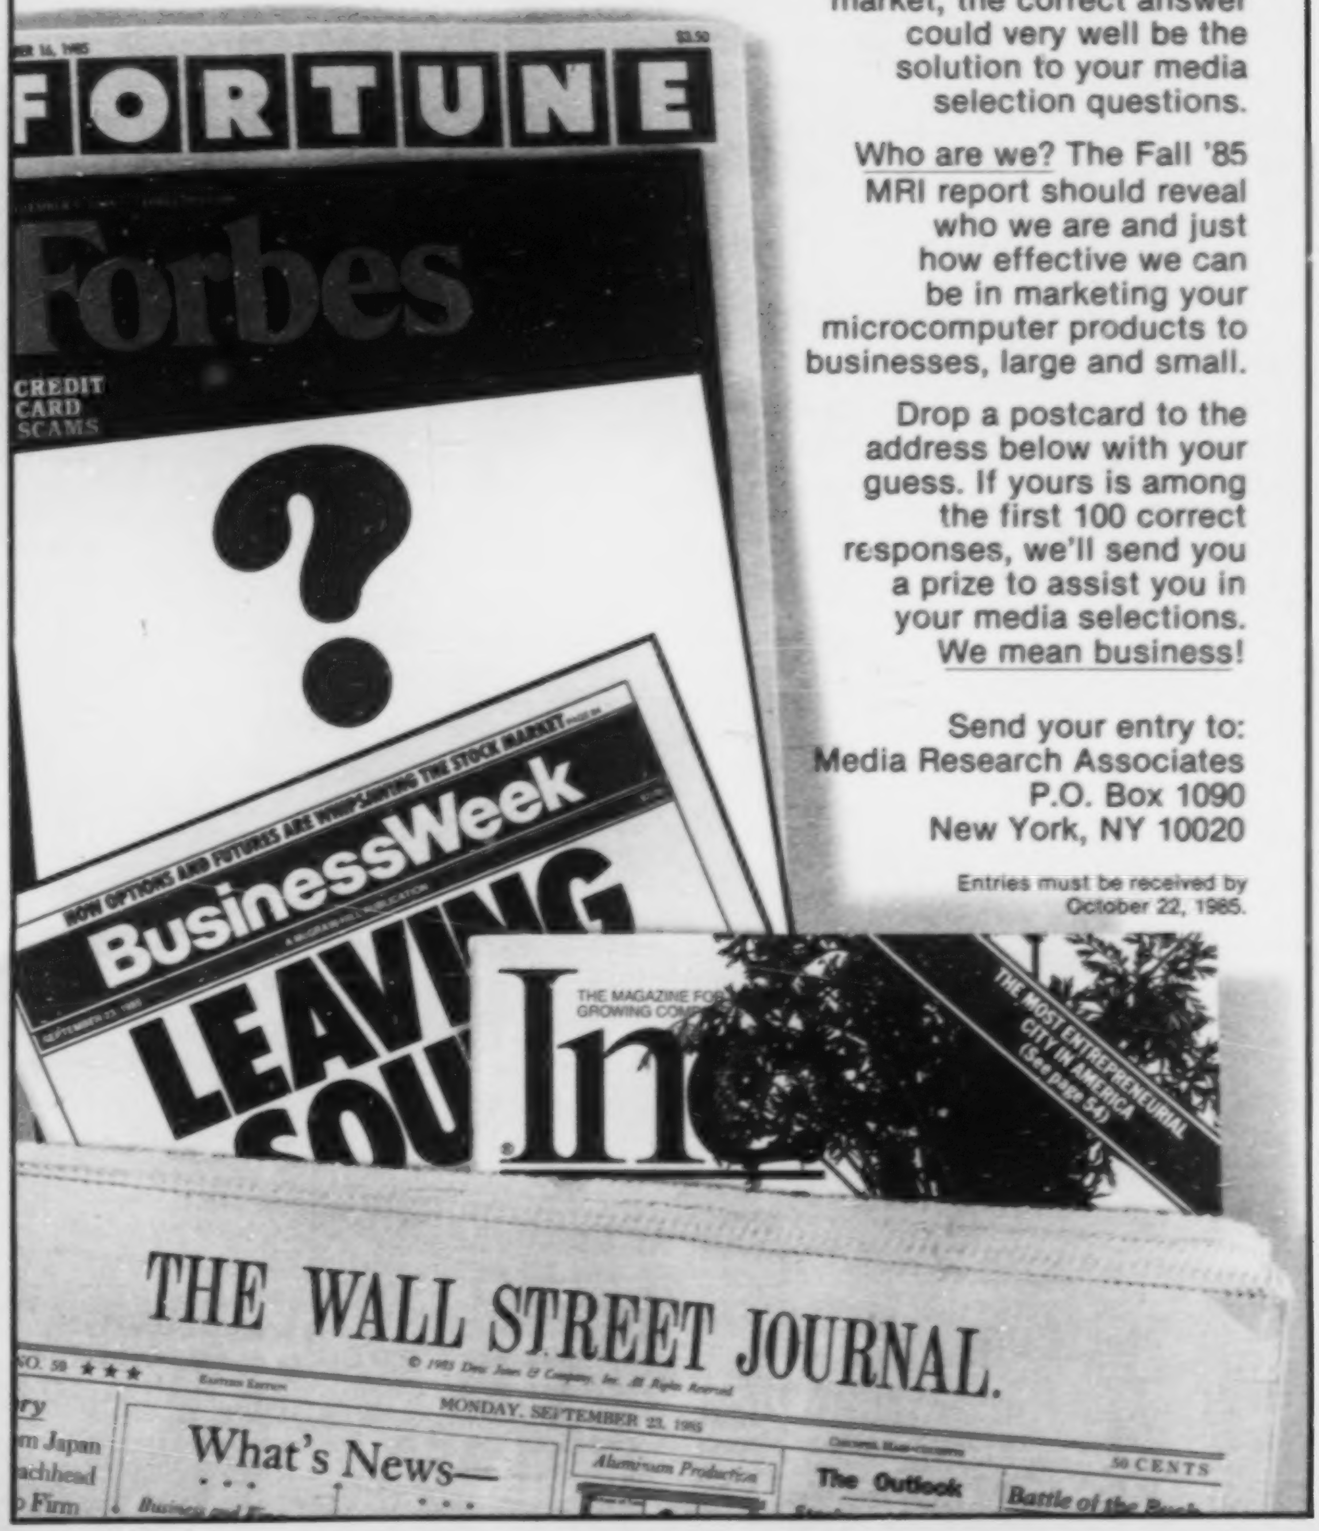
Whitney's gaining

Kellogg has made a big splash with its Whitney's brand, quickly capturing strong market share in some of its seven markets, said Whitney's Foods president Mike Wolfe. The brand's high-quality, custard-like consistency will bring new consumers to the category, he believes. Whitney's has a national share of 2%, but the brand is grabbing 8% to 10% of the market in its "more mature markets," Mr. Wolfe said.

Roughly 30% of the population consumes all the yogurt in the U.S., Mr. Wolfe said. Focused new products, such as multipacks and breakfast yogurts, brought in new consumers in the past and future growth will come from constantly refining existing products, he added.

There's no telling when the yogurt market will top out, the Dannon spokesman said. Americans now consume an average 1.8 lbs. of yogurt a year, while European consumption is 10 to 12 times greater.#

Guess who's missing.



To reach the microcomputer market, the correct answer could very well be the solution to your media selection questions.

Who are we? The Fall '85 MRI report should reveal who we are and just how effective we can be in marketing your microcomputer products to businesses, large and small.

Drop a postcard to the address below with your guess. If yours is among the first 100 correct responses, we'll send you a prize to assist you in your media selections. We mean business!

Old-timers sweet on ice cream

By NANCY GIGES

STAMFORD, CONN.—The greatest per capita consumption of ice cream occurs among Americans 55 years and older, according to a study on frozen sweets by MRCA Information Services.

The average American eats ice cream at home 41 times per year, but the older group averages 56 times annually—even more than children aged 6 to 12, which average 43 times a year.

The group that eats ice cream least often at home are the 18-to-34-year-olds, averaging only 29 occasions.

According to David Fencl, publisher of the study, eating dessert at home has been declining steadily for years. Ice cream consumption has declined 2% per year since 1977, but premium and all natural ice creams have stemmed some of the erosion, he said. Last year consumption of premium ice cream rose 38%.

Among other findings in the study are that vanilla ice cream is 2.5 times more popular than the runner-up flavor, chocolate; men eat ice cream at home nearly 10% more often than women; consumption of frozen pies fell by 16% last year and frozen cakes 20%.

On the up side, consumption of frozen croissants was up 161%; frozen gelatin bars up 344%; frozen juice bars up 72%; frozen pancakes up 41%, and ice cream sandwiches up 38%.#

AGENCY WATCH

Watch

(Continued from Page 3)

advertising that creates an impression: Of the ad directors questioned in the three quarters, 69% said they hadn't seen recently or couldn't remember seeing any ads or promotions for ad agencies.

Only two agencies—JWT and Ogilvy—did house advertising that was remembered by more than 2% of the respondents. JWT advertising was mentioned by 8% of the ad directors and Ogilvy advertising for itself was mentioned by 3%.

For the third straight quarter Chiat/Day was named most often as the industry's "hottest, up-and-coming" agency, receiving even more mentions (8.7%) in the latest quarter than it did in the previous two quarters. Fallon McElligott Rice (4.6%) remained second, while Saatchi & Saatchi Compton Worldwide (2.6%) broke into the top three among the hottest agencies for the first time.

Another agency that seems to be attracting attention is Grey Advertising. Its awareness score jumped to 7.7% in the third quarterly study, good for No. 5 among all agencies, from less than 3% in each of the first two survey periods.

Moreover, Grey made impressive gains in four of the six criteria in which ad directors were asked to name best agencies. It moved to No. 2 in media planning and buying, to No. 3 in account executives, to No. 3 in research and to a tie for No. 4 in top management. The agency previously had received 2% or less of the mentions and had failed to rank among the top five in each of these categories.

Grey is in the second year of a five-year program to upgrade its creative image and also has launched an ambitious expansion plan (AA, Jan. 21, *et seq.*). Grey's rank in creativity has improved slightly since the first survey, but still isn't among the leaders in that attribute.

Asked to assess the importance of the six criteria, the ad directors ranked them in the same order in all three surveys: Creativity (termed very important by 91% of the total respondents in the three surveys), account executives (79%), media (68%), top management (56%), marketing (39%) and research (39%).

In the latest survey, JWT ranked No. 1 in account executives, media, top management and research. Ogilvy was No. 1 in marketing and tied with Chiat/Day for No. 1 in creativity.

Asked to volunteer reasons why they named a particular agency best over-all, the ad directors most frequently cited past satisfactory experience with the agency or its reputation and awards. However, the ad directors applied certain key reasons significantly more to some agencies than to others.

For example, Young & Rubicam, No. 3 in the cumulative "best" rankings for the three quarters, was named more often than other agencies for its reputation/awards and general experience, while respondents named BBDO more often because of their satisfactory past experience with the agency. Understanding of the client's business was cited more often for JWT; quality of staff was cited more often for Ogilvy.

In all three survey periods, the ad directors said lack of knowledge about the client's business was the most important weakness at agencies generally, followed by agency shortcomings in controlling and estimating costs.

Agencies continue to prowl for business: Of the ad directors in the most recent survey, 62% said they had been approached by an account-hunting agency within the previous three months. But many of the overtures were less than impressive: Forty-seven per cent of those approached said the quality of the contact was only fair or poor.#

Additional information is available from Gary Gabelhouse, SRI Research Center, 301 S. 68th St., Lincoln, Neb., 68510. Phone: (402) 489-0351.

MEDIAMOVES

'Life' celebrates 50th anniversary

New York—Events planned to celebrate *Life's* 50th anniversary next year include a fall prime time ABC News special, a book and a special 13th issue in November, 1986. In addition, retrospectives will run in every regular monthly issue.

Publisher Charles Whittingham expects the special issue, with perfect binding, to be *Life's* largest ever, topping 300 pages; circulation will be 2 million, 500,000 above the current rate base.

NBC

NBC-TV has recaptured two former affiliates: KOMU-TV, Columbia, Mo., and KCEN-TV, Waco/-Temple, Tex., both previously at ABC; they replace KCBJ-TV and KXXV-TV, respectively.

Harcourt Brace Jovanovich

Harcourt Brace Jovanovich, Cleveland, has ceased publication of *Quick Frozen Foods* following the monthly's October issue. The publication had a mostly nonpaid circulation of 21,223. Three editorial staffers and additional sales personnel were dismissed.

Marvel Comics Group

Marvel Comics Group, New York, will publish a "Voltron" comics book, starting in December. The comics is inspired by World Events Productions' syndicated cartoon series.

'Gulf Coast Golfer'

Gulf Coast Golfer, Houston, a monthly magazine covering amateur and professional golf in the southern PGA district of Texas and Lousiana, will increase both circulation and ad rates, effective February, 1986. Circulation rate base will reach 33,000, and ad rates will increase by 5%.

Satellite Music Network

Satellite Music Network, Dallas, will premiere its fifth full-service live radio programing format in November with the airing of "Heart and Soul." The new programing will be approximately 70% classics and 30% currents and recurrents.

Satellite Syndicated Systems

Satellite Syndicated Systems, Tulsa, has purchased two cable tv systems in Holdenville and Okemah, bringing the company's cable holdings to 22 systems serving 22,000 subscribers. Also, Tulsa-based Ann Arbor subscription tv service, IT TV, a subsidiary of SSS, will convert to a fulltime commercial tv station in November, 1985.

'Billboard'

Billboard, New York, has set an Oct. 25 advertising deadline for its special section, the "World of Video Music," keyed to its seventh annual Video Music Conference to be held Nov. 21 to 23 in Universal City, Cal.

'New Home'

A consumer magazine targeted to new-home purchasers, *New Home*, Laconia, N.H., will begin publication in April from Salls-Wright Publishing Group. Advertising rates are $8,500 for a b&w page and $12,300 for a color page. Rate base is 200,000.

'Audio'

The 1985 annual equipment directory published by *Audio*, New York, includes a Yellow Pages section that lists 3,000 stores in the U.S. and Canada according to city and Zip code. The directory also carries 70,000 statistics on 4,000 high-fidelity products in 19 categories and contains 220 ad pages. For more information, contact CBS Magazines, 1515 Broadway, 10036.

'NASA Tech Briefs'

New York-based *NASA Tech Briefs* reports that circulation has increased 25%, to 100,000, from its spring issue. In 1986, the magazine will increase its frequency to every other month, from quarterly. Ad rates will be raised, effective Dec. 1, to $4,990 for a b&w page, from $3,990; a color page will cost $5,840, up from $4,840.

'PEOPLExpressions'

A new in-flight magazine for People Express Airlines, *PEOPLExpressions*, Miami, has begun monthly publication. With a controlled circulation of 200,000, a b&w page is $7,590 and a color page is $10,850.

'Arab Media Book 1985'

Promovente International, London, has published a marketing guide to the Mideast, the *Arab Media Book 1985*, which profiles 550 media in the Arab marketplace. Designed as a source book for planning and executing an advertising campaign in the Mideast, the directory, to be updated annually, costs $69.95. For further information, contact America Direct Mail Co., 350 Hudson St., New York 10014.

'The Sporting News'

The *Sporting News*, St. Louis, will introduce a design change and a new editorial direction in its January issue. A bolder graphic style will be adopted, including more color photography, graphics and illustrations, and a change from three-column layout to five columns. Editorial focus will expand to include collegiate sports, golf, tennis and auto racing.

'The Advocate'

The Advocate, Malibu, Cal., a national gay news magazine, has adopted a standard 8-by-10⅞ in. format to target it as a magazine rather than a newspaper. The every-other-weekly is also planning to expand newsstand distribution and increase national advertising.

'Jewish Week'

Jewish Week, New York, reports it has been accepted as a member of the Audit Bureau of Circulations—with an audited total circulation of 113,693—and is expanding its local reporting coverage in an effort to increase advertising. It will add vending machines with the publication's logo in Manhattan and has just completed a Simmons readership study that places *Jewish Week* readers' median household income at $55,680.

'New England Living'

New England Living, Worcester, Mass., will change from its 5⅜-by-8⅜-in. format to the standard 8⅜-by-10⅞-in. trim size with its December/January issue. The issue will contain a special section called "Ski New England," with an ad close date of Oct. 15. Paid circulation is 78,000; advertising rates are $1,200 for a b&w page and $1,700 for a color page.

'Newsweek'

Listing 500 media research studies published during 1950-84, the second Media Research Index has been published by *Newsweek*, New York. The index contains international contributions, journal articles, conference papers and books listed in chronological order by year of publicaton within a given media category. The book is available for $10 from the publisher at 444 Madison Ave., 10022.

'New Jersey Monthly'

New Jersey Monthly, Morristown, reports it is accepting nominations until Nov. 30 for its New Jersey Pride Awards. Nine recipients will be recognized for their accomplishments and will be profiled in the May issue. An awards ceremony will be held May 1.

BPA

The Busines Publications Audit of Circulation, New York, has added 10 new publications, bringing its total to 1,153. Also, BPA reports its central division Chicago office has relocated to 20 N. Wacker Dr., Suite 770, 60606.

'Creative Ideas for Living'

Creative Ideas for Living, New York, will publish a "Catalog Spring & Summer Showcase" in the February and September issues. The section, in 1/9 b&w page format, carries an ad close date of Nov. 22 for the February showcase and May 22 for the September showcase. A discount is available for advertisers in both issues.#

Ponderosa cool to USACafes

By SUSAN GARLAND

"Don't fence me in" was last week's polite but firm response by the Dayton, O.-based Ponderosa steak house chain to a $160 million buyout from USACafes, the Dallas-based franchiser of the Bonanza steak house chain.

Calling USACafes' $16 per share offer "inadequate" and "excessively vague," Ponderosa officials made clear their determination to remain independent. But USACafes said it will continue to pursue the buyout, which would create a new national restaurant power with sales in excess of $1 billion.

USACafes, the smaller of the two restaurant companies, licenses and provides support services to nearly 600 Bonanza family steak house restaurants in 43 states and Canada.

Revenues for the year just ended are estimated at $425 million, up 9% from 1984.

Ponderosa, the nation's largest family steak house chain, reported revenues of $513.3 million for the fiscal year ended Feb. 28. Systemwide sales from its 625 Ponderosa units were nearly $700 million.

Ponderosa controls about 24% of the $2.9 billion steak house category, putting it ahead of Los Angeles-based Sizzler's 16% and Bonanza's 15%.

Ponderosa is by far the larger advertiser as well. Kenyon & Eckhardt, New York, handles the chain's estimated $15 million account. Advertising for USACafes' Bonanza chain, including $2 million in measured media last year, is handled in-house.

Steven Rockwell, restaurant analyst at Alex. Brown & Sons, Baltimore, admitted to being surprised by USACafe's move, but said the acquisition "has a reasonably good chance of working out. It will be able to use Ponderosa's resources to fund debt service, should USACafes borrow the money for the merger."#

All's McQuiet on McPizza front

By SCOTT HUME

McDonald's Corp.'s franchisees Les and Alan Dukart have put up a sign outside their Wilmington, Del., restaurant proclaiming "First restaurant in the country to serve McPizza."

And right now that's the extent of the advertising support being given the item Big Mac is testing in 10 stores there and in the Philadelphia area. The Dukart brothers reportedly wanted to buy outdoor board space on a nearby interstate highway to alert travelers, but McDonald's denied approval.

But that doesn't mean McPizza hasn't been noticed. Once word of the test got out (AA, Sept. 30), newspapers across the country picked it up, including several that ran the news on their front pages.

The nation's 10th-largest advertiser isn't advertising McPizza because the chain is testing its "operational feasibility" rather than its sales appeal, according to a McDonald's spokeswoman. That means the company wants to know if there's room at the deep fryer for one more product. Chicken McNuggets, Filet O' Fish sandwiches, fries and pies already are lined up for fryer time and, said the spokeswoman, "we need to know how the addition of a McPizza might affect the system."

Oak Brook, Ill.-based McDonald's takes such operational "shakedown cruises" seriously. Operationally disruptive menu items don't make the grade even if they become front-page news. As senior exec vp-chief marketing officer Paul Schrage told ADVERTISING AGE earlier this year (AA, Jan. 21), "We would never introduce a new item that would disrupt our system. Never. No product is worth that."

As a result, national agency Leo Burnett USA, Chicago, hasn't been asked to prepare advertising to support the test. Yet. Should McPizza pass the operations test, a full-scale market test of sales appeal could follow.

At that point, the nation's pizza chains may become more concerned than they were last week. Wichita, Kan.-based Pizza Hut, the nation's largest pizza chain, had no comment on the McDonald's test.#

King, Konior team up

BOSTON—James King and Lynne Konior have left the Arnold Public Relations division of Arnold & Co. to form King Konior & Co., a new public relations agency, located here at 10 Thatcher St., 02113.

Mr. King formerly was Arnold PR's president-chief operating officer, and Ms. Konior most recently served as vp. Succeeding Mr. King is Gerald Broderick, also president of Arnold & Co.; Arnold Rosoff is chairman of both Arnold and the pr division. No successor to Ms. Konior has been named.#

Target takes aim

BETHLEHEM, PA.—Target Marketing & Communications, a new company specializing in marketing research, planning communications and direct marketing, has opened here at 2045 Westgate Dr., Suite 200, 18017.

The company is headed by president Francis Storm Jr., formerly director-national marketing, A.W. Marketing & Communications, also Bethlehem.#

Distinctive Doner

Good creative isn't easy. It just appears that way when the results are strikingly successful, as they have been at W.B. Doner & Co., Southfield, Mich., consistently the most honored shop in the Detroit area, the third-largest advertising market (based on billings) in the country. The agency won two Clios this year, one in tv for a Canadian Tire spot called "Screwdriver," the other in radio for a Highland Superstores spot called "Disclaimer." The same spots also won first-place Mobius Awards at the U.S. Television & Radio Commercials Festival. Other clients for whom Doner produced award-winning campaigns this year include the *Detroit Free Press*, the Michigan State Lottery and Canada's Wonderland. *See Page 4.*

Giving positioning a buzz

When the Alfred A. Knopf publishing house was considering a new edition of Rosser Reeves' "Reality in Advertising," a continuing seller around the world since 1961, Mr. Reeves drafted, but ultimately did not publish, a chapter on "The New Buzzword." The chapter draft, and consultant Joe Sacco's comments, appear on *Page 13.*

Special Report—Direct Marketing

Traditional direct-response media find new users and high levels of creativity as alternative media try to get their foot in the direct-marketing door. *Starting on Page 15.*

Presstime

SB&A lures 'Playboy'

CHICAGO—*Playboy* has named Smith Burke & Azzam, Baltimore, to handle its $1.2 million trade account, replacing Levy, Flaxman & Associates, New York (AA, Sept. 9). SB&A will be invited to pitch *Playboy's* $2.8 million consumer account, now in-house. CPM handles media buying for that business.

New scoop on Care Bears

CINCINNATI—Pierre's French Ice Cream Nov. 1 breaks spot tv, radio and newspaper ads for its Care Bears Ice Cream, a superpremium children's product. Distribution of the eight-flavor line, packaged in toy buckets, begins in East Coast markets. Ads are handled in-house.

Columbia taps Sealey

BURBANK, CAL.—Peter Sealey, exec vp-corporate marketing director, Columbia Pictures, succeeds Ashley Boone as president-domestic marketing, distribution group. Mr. Sealey, a former vp-manager, marketing operations, Coca-Cola Co., joined Columbia in 1983.

Seagram stands by ads

WASHINGTON—Jos. E. Seagram & Sons president Edgar Bronfman told an Oct. 15 press conference he is committed to running the company's controversial equivalency advertising campaign "until a majority knows and understands" the relative alcohol content of distilled spirits versus beer and wine. Mr. Bronfman formally announced the start of a $1.2 million cable tv ad campaign (AA, Oct. 14).

Kodak to appeal injunction

ROCHESTER, N.Y.—Eastman Kodak Co., found guilty of infringing on Cambridge, Mass.-based Polaroid patents by a federal judge in Boston, will appeal an injunction that bars it from manufacturing or selling instant cameras or film, effective Jan. 9. Kodak said it will not alter current marketing and manufacturing schedules, pending resolution of the appeal.

Stroh strikes during Series

DETROIT—Stroh Brewery Co. during the Oct. 19 World Series telecast breaks its new campaign for flagship Stroh's and Stroh's Light, themed "Stroh's is spoken here." The brewer told its distributors in Atlanta this week it will spend $50 million for the campaign in the next 12 months in order to position Stroh's as "a mainstream premium beer." Spot tv, radio, print, outdoor and point-of-sale support, via Marschalk Co., New York.

JWT tries sales promotion

LOS ANGELES—JWT here will start its first sales promotion division later in the month, headed by Mike Wiglesworth, formerly vp-director of sales promotion, Eisner & Associates, Baltimore. Separately, DFS/Southern California has started a six-member direct marketing arm, DFS/SC Direct, headed by former general manager Ayer-

ABP MPA RED TAG ABC

This contest is for ad ideas that couldn't pass the test

By Stewart Alter

A new advertising awards show is in the works for great ideas that have gone a'glimmering.

The First International Animatics Festival will honor advertising that its creators thought was pretty hot stuff but that got thumbs down from pretesting.

"I know the brilliance that goes into advertising, and you start to wonder what happens along the way," said Peter Tannen, a former agency creative executive who hatched the idea for the show.

"When you rely completely on testing, there's a constant homogenization that goes on. There have got to be some brilliant ideas along the way that somehow got weeded out."

His call-for-entries letter, which will be sent to agencies shortly, phrases the creative frustrations of the advertising business even more strongly: "Are those commercials I see on tv the very best that our generation has created? Or are there some superb ideas that have been pushed aside and forgotten—ideas that fell victim to 'judgment by committee' or 'timid brand manager' or 'day-after recall'? Now we'll find out."

Mr. Tannen, who is now in a consultancy business with Joel Baumwoll, a onetime president of Needham Harper Worldwide/New York, has held a number of creative posts, including senior vp-creative director of Benton & Bowles, associate creative director of Campbell-Ewald/-New York and international creative director of Foote, Cone & Belding in Canada and Australia.

Mr Tannen also has owned and run his own agency in Toronto.

For the First International Animatics Festival, work done since 1980 is eligible, though subsequent festivals will cover only one year. The deadline for entries is Dec. 31; the entry fee is $19.95 per animatic or two animatics for $35.

Animatics are basically video versions of slide shows with music. They're unfinished translations of what the storyboard would look like on tv, used for testing purposes before the winning commercial idea triumphs in research and goes on to big-budget production.

Any animatic that has gone on to full production is ineligible, Mr. Tannen said. Anyone can enter, but recognizing the political realities of the business, animatics can be entered under pseudonyms.

However, as the rules point out, "If you win an award under an alias, accepting it at our Awards Dinner could be embarrassing."

If this contest idea catches on, a black-tie dinner will be held in the spring, at which awards will be given for four categories of animatics. They will be regular animatics (the slide show of illustrations accompanied by music); enhanced animatics (if something, *i.e.*, a hand, toothbrush or car actually moves in the spot); photomatics (animatics that use either original or stock photos instead of drawings), and live-matics (which are cheap, rough versions of commercials that use live people and cost $5,000 to $10,000 to make, but are not meant for airing).

In each of those categories, awards will be given separately to 30-second spots and 60-second spots.

Only first and second prizes will be awarded.

The address of the company running this is the First International Animatics Festival, c/o Baumwoll & Tannen Associates, 888 Seventh Ave. (28th floor), New York 10106. ■

Direct Marketing
YOU MIGHT WIN

Steve Boswick

Alternative media try to get their feet in the door

By Eileen Norris

Ask a marketing executive about the status of at-home shopping and you likely will hear a long sigh and then something like: "It's coming, it's coming . . . but it's not here yet." Not to any great degree, anyway.

The electronic two-way communications revolution we've been hearing about for more than a decade has yet to evolve. Mail is still king of the direct marketing hill, and the insurgents have yet to organize an effective coup or even to gain much recognition by the court.

Eileen Norris, a frequent contributor to Special Report, wrote about remaining independent in the merger-intensive direct response business in last October's Direct Marketing section.

Direct mail and catalogs each accounted for 24% of direct response offers that led to orders.

In its October, 1984, landmark study, New York-based Rapp & Collins and Simmons Market Research Bureau asked consumers how they learned of direct response offers that led to orders over a month's time. Direct mail and catalogs each accounted for 24% of the sources of information, followed by telephone and circulars at 7% each, magazine and newspaper ads at 6% each, Yellow Pages ads at 5% and "take-ones," tv commercials and bill inserts each were the source of information for 3% of the sample.

Interactive media pulled nary a percentage point.

"We never asked anyone if they had an interactive system," says Wally Lepkin, vp-research at Doyle Dane Bernbach, Rapp & Collins' parent company. "But they had plenty of opportunities to tell us about it and I'm sure it

(Continued on Page 58)

Alternative

(Continued from Page 15)

would have come out."

Lack of industry interest is not a factor in interactive media's marketplace obscurity. An astounding 80% of direct response professionals who responded to a recent ADVERTISING AGE mail survey on industry trends say new media and technologies will affect direct marketing significantly.

It's not that the new technology is lacking, either. The media forms are here—although at a consumer price tag that far outdistances the cost of answering the phone or opening the mail.

The major roadblock to this revolution is the great majority of consumers have not purchased the required technology. Therefore, advertisers are understandably leery of spending their money to reach a currently minuscule audience.

> **"Videotex will be a direct marketer's dream when it gets off and is operational because it is truly a two-way communication."**
>
> *—Steve Dapper*
> *Wunderman, Ricotta & Kline*

Four media forms—cable, videotex, personal computers and videocassettes—are bandied about when folks look into their crystal balls and talk about interactive technology's potential in direct marketing. There is a lot of talk—and again, little action—about how they will restructure direct response.

Cable is the only category that has achieved some sense of reality, thanks to a 45.7% penetration rate, according to Cabletelevision Advertising Bureau. Cable also holds the greatest potential for direct marketers because it's very easy to sell a specific product to a specific audience on a particular cable show, says Steve Dapper, president-chief executive officer, Wunderman, Ricotta & Kline, New York. "For example, we advertise Columbia Record and Tape Club on MTV because we know the audience is right," he says.

But even cable is underutilized by direct marketers, says Sandy Clark, president of New York-based Clark Direct Marketing. Nevertheless, "tv is still the dominant influence in our lives and I think it will live with us the longest," he says.

Cable is here to stay because it has the largest penetration, says David Soskin, president of J. Walter Thompson Direct Network, New York. "Cable is good in terms of response because, No. 1, you can select your audience by the programing. No. 2, and more importantly, the subscriber is qualified in advance. He tends to be used to dealing through the mail; he probably pays his cable bill through the mail. You can use direct mail to support cable audiences."

Cable may hold the most fascination because it delivers a real audience. But in the not-too-distant future, videotex could become very big, much the way it has in Europe, says Jim Kobs, president of Kobs & Brady Advertising, Chicago.

Videotex encompasses a handful of systems that allow two-way communication from the home to the marketplace or vice versa. It operates through a standard tv set, a telephone and either a computer or a special control unit. Unlike cable, it is interactive—the user can select and manipulate the information.

It promises affluent consumers—primarily *only* affluent consumers because of its high equipment costs—the chance to shop at home. Advertisers are provided the opportunity to sell their wares through electronic brochures or catalogs or in direct response ads that run along the bottom of the screen. Consumers can dial a scrolled 800 number for more information on displayed products and services.

But videotex, too, has problems. The required equipment includes a dedicated videotex terminal, which ranges from $200 to $800 to purchase or $25 to $30 a month to rent. Because the terminal has only one use—videotex—a spokesperson for the Videotex Industry Assn. says most people opt for computer-based systems.

Even here the system is rather equipment intensive, demanding a personal computer; a modem, which costs between $100 and $800, and software, which can be free or cost $200 depending on the service. Add in service fees of $25 to $30 a month or $5 to $25 an hour and the potential market narrows.

"When it comes down in price, it could be *the* form of direct mail, exclusively," Mr. Dapper says. "But it's not a factor in the market yet and I'd say it's about five years off. Videotex will be a direct marketer's dream when it gets off and is operational because it is truly a two-way communication."

The bankroll required to buy and maintain a system poses the main problem, Mr. Kobs says, but future penetration will be strong. "There's the feeling among the big agencies that they won't use a medium unless there's a 30% penetration level; that it's not worth looking at for the most part." But, he says, "don't forget, even cable advertising was slow to get national advertiser acceptance."

Currently, the Videotex Industry Assn. reports 500,000 consumers subscribe to personal computer-based videotex services. The association does not have figures on the number of dedicated terminal-based consumers, although the spokesperson says it is significantly less.

It's one thing to have the technology but quite another to have customer acceptance, says Jonah Gitlitz, president of the Direct Marketing Assn. in New York. "People need these things in their homes to be a significant factor. Obviously, some of the new technology will be part of the media mix, but I don't think it will supplant direct mail."

With videotex still in the experimental stage, it's definitely not likely to reach the mass audience numbers by 1990, as predicted by some, JWT Direct's Mr. Soskin says. "There will be a slower build. The problem is hardware sales, which would be driven if videotex was available at a reasonable price."

Mr. Clark says videotex's biggest problem is it isn't very interesting to watch. "It's sort of bibliographic, like a research function. Somehow, it has to be made interesting," he says. "It's great on paper, but you don't run into many using it well."

Advertisers are afraid of new ideas because they don't want to be the first, especially if the idea turns out to be a bomb, he says. "Our clients are hesitant. There's little evidence or inclination to explore videotex yet."

The biggest disappointment to direct marketers looking for new ways to communicate to consumers has been the lackluster growth of the personal computer. Industry observers say the roller-coaster computer market possibly could be boosted by an option like videotex. "The fact that videotex can be a nice add-on for subscribers could be another reason to buy a personal computer," Mr. Soskin says.

The personal computer market's peak and valley sales personality is a result of overpromising—"a great deal of fanfare but not a great deal of utility," Mr. Kobs says. "I remember hearing computer companies suggest you could put your checkbook on your personal computer. Now that's great, but do people bring their personal computers with them when they go to cash a check at the supermarket? Some practical utility could help bring some dusty personal computers out of the closet," he says.

Even utility may not turn skeptical consumers into keypunching converts. "I think it's a mechanical achievement when you can blow your horn in your car," jokes Mr. Gitlitz. "A lot of us are not born with technology at our sides. But the children in elementary and high schools will be the consumers of electronic interaction because they have a greater acceptance of and immediacy toward it."

Technological penetration has not held back videocassettes' potential as a direct marketing tool because many people—20% of U.S. households, according to A.C. Nielsen Co.—own videocassette recorders. Direct marketers are just not taking advantage of the audience, Mr. Soskin says.

Alternative media don't make the mix

Initial sources of direct response orders during July, 1984

Direct mail	24%
Catalogs	24%
Telephone	7%
Circulars	7%
Magazine ads	6%
Newspaper ads	6%
Yellow Pages ads	5%
"Take-ones"	3%
Tv commercials	3%
Bill inserts	3%

Source: Simmons Market Research Bureau; Rapp & Collins

"There's no reason why Beech Aircraft, for example, couldn't send cassettes to 100 people it knew wanted to buy planes," Mr. Dapper says. "Those people are likely to have videocassette recorders and it would be a good bet." A detailed and highly targeted videocassette presentation probably is the industry's closest approximation of a personal sales call.

For all the negatives and skepticism surrounding interactive technology, some factors appear to be driving advertisers to at least consider the new media forms.

Some say interest has resulted from society's increasing technological bent. "That's how we're communicating today and that's how kids are being schooled," Mr. Dapper says. "The American populace is a tinkering one."

It also is an experimenting crowd with "a general desire to try something new," Mr. Kobs says. Advertiser interest will result from a desire to get a leg up on the competition, he says. "We've been hearing about interactive technology for 10 years or more and those that are not tired of hearing about how it's coming are actually trying it."

While soaring postal costs may have nudged direct marketers to expand the outlets available to reach customers, Mr. Soskin says the ability to highly define and target audiences is fueling the move to electronic interactive marketing. "It's a convenience factor, what with all the working couples. But more so, I believe it's the ability to segment and target special interest groups," he says. "When it's a part of enough people's lives, that's when we will be able to sell the media.

Direct market consumers follow from media to media, Mr. Soskin says. "We just have to get the environment correct for them," he says. The way to achieve the ideal climate is to present the new media forms as an intriguing and interesting consumer-oriented service.

Some of the conditions may be out of direct marketers' reach, Mr. Gitlitz says. "If we expect people to buy videotex or a pc, you have to make it economical. I just don't get the impression consumers are banging down the doors yet," he says.

Cable already is a viable medium for direct marketers; videotex, personal computers and videocassettes may never be common. Many agree the impact of all of the technologies will be felt, however.

The changes certainly will affect the way consumers buy products, the experts say. "It will be service oriented, because you can get the products you need just about anywhere," Mr. Dapper says. "We'll be buying the service, not really the product."

Department stores and catalogs should be able to latch onto these new electronic media forms beautifully, Mr. Clark says. Home shopping and banking are the two categories that will be affected most, Mr. Soskin says, basically because the concept is sensible and attractive enough to appeal to a mass of consumers.

While a majority of the public may not know about the new media forms or their capabilities, once their neighbor has it, watch out, Mr. Kobs says. He predicts that when the forms fit the life style of the working couple, their popularity will soar because of their ability to handle shopping needs and allow access to information for time-starved consumers.

That day of reckoning may be a bit down the electronic highway. "If I put my optimist's hat on, I'd say, yes, down the road . . . probably," Mr. Gitlitz says.

His observation may be a little too pessimistic. Others say they know it's coming; they just don't know when.

One thing is certain. It's a subject direct marketers cannot ignore. As one marketing executive puts it, "You certainly don't want the technology to sneak up on you." By the looks of things, that won't happen.

Associate editor Ed Fitch coordinated this report on Direct Marketing.

4A's meet in Monterey

Record attendance at the American Assn. of Advertising Agencies' western region meeting in Monterey, Cal., last week left cohosts Adrienne Hall (l.), vice-chairman, Eisaman, Johns & Laws, Los Angeles, and Jerry Gibbons, president-ceo, Doyle Dane Bernbach, San Francisco, with plenty to smile about. The convention drew 570 participants. *(See story on Page 104.)*

Seagram's 7 shops get cut down to 3

By WILLIAM F. GLOEDE

New York—The House of Seagram, the $1.45 billion marketer of distilled spirits and other alcoholic beverages, shook up its stable of seven agencies last week as it pulled more than $50 million in business from four shops, assigning it to three others.

The news came as a shock to the four losers, sources say. The two big winners, however, apparently knew for some time that the shakeup was in the offing.

Ogilvy & Mather and Doyle Dane Bernbach become Seagram's two primary agencies Feb. 1, leaving Warwick Advertising, William Esty Co., Kenyon & Eckhardt and North Castle Partners, Greenwich, Conn., high and dry. Mingo-Jones Advertising lost Seagram's gin, but gained special market advertising on House of Seagram brands.

Peter Dimsey, exec vp-marketing of the House of Seagram, headed by Edgar Bronfman Jr., said, "This shift in strategy is certainly no reflection on the creative efforts of any of our agencies. It merely reflects our conviction that there will be greater strength in consolidating our accounts at a smaller number of agencies. In particular, we feel that there is considerable synergy to be achieved having all the brands which share Seagram's name at the same agency."

"It's unbelievable. Absolutely unbelievable," one stunned agency executive said of the decision. As the word circulated Oct. 18, one executive remarked, "Now I know why Edgar [Bronfman] Jr. left yesterday for a two-week tour of the Orient."

Mr. Dimsey added that Seagram believes its previous roster was long compared with the agency lineups of other major advertisers.

The consolidation of its brands at two shops with strong international capabilities seems to fit the company's intent to expand its

Buyout seen leading to fragmentation

Beatrice sell-off due

By JULIE FRANZ

Chicago—Beatrice Cos. stands little chance of surviving a leveraged buyout bid intact, Wall Street sources say.

Active bidder Kohlberg, Kravis, Roberts & Co., backed by financial house Drexel Burnham Lambert, said last week in a letter to the Beatrice board it intends to keep it whole as "a decentralized holding company with its headquarters in Chicago. We have no intention of liquidating or dismembering Beatrice."

But the company's $4.9 billion price tag and $2.5 billion debt load have financial observers already speculating on what plums will fall from the Beatrice tree if the company is sold.

Buttressing expectations of a selloff is the investment community's assumption that the forces behind the KKR bid include former Esmark chairman Donald Kelly and at least three other Esmark executives, including former Swift/Hunt Wesson head Frederick Rentschler, Joel Smilow, former head of Beatrice's International Playtex unit and Roger Briggs, who had been Esmark vice-chairman.

"It's definitely Mr. Kelly behind the buyout, judging by the fact that Kohlberg is involved with making the deal. Mr. Kelly has been very close to Kohlberg, and I'm sure Mr. Rentschler is in there too because [he] hasn't found employment yet," said Ronald Morrow, food-industry analyst with Smith Barney, Harris Upham, New York. Should Mr. Kelly in fact be behind the KKR proposal, it's hard to believe he "doesn't want to unload some operations," Mr. Morrow said. "Don Kelly is *not* an operating manager. He'll shake out what he doesn't like."

"If Mr. Kelly were involved, he is known for keep-

Last Minute News

Is SSC&B it for Coca-Cola?

Atlanta—Coca-Cola Co. is reported to be considering moving its U.S. ad account for its Coca-Cola brand from McCann-Erickson Worldwide to sister Interpublic Group of Cos. agency SSC&B:Lintas, which already handles Diet Coke, Cherry Coke and Tab. While the move could take place "in the spring or the winter," sources indicate, it is not a fait accompli and will depend on McCann's new 1986 campaign developed under the auspices of its new New York creative director, Curvin O'Rielly. A statement issued by Coca-Cola on Oct. 18 and attributed to Ira Herbert, Coca-Cola exec vp, said, in part, "We have encouraged Interpublic to organize their creative process as they see fit to help us take advantage of the tremendous opportunity which we now have with the new Coca-Cola megabrand." A McCann spokesperson said only, "Other Interpublic agencies have been involved in Coca-Cola projects throughout 1985." McCann reportedly asked sister agencies SSC&B and Marschalk to help out with ideas earlier this year (AA, Aug. 12). Sources indicate the work SSC&B has done for the three Coca-Cola brands has impressed company brass. McCann would keep U.S. media buying, as it does with the other brands, but media planning, marketing and creative would shift.

Lorillard reviews shops for Kent

By WILLIAM F. GLOEDE

New York—Lorillard, the tobacco marketing unit of Loew's Corp., quietly has solicited presentations from four agencies for its $20 million Kent cigaret account and perhaps some other Lorillard business.

Ad spending for Kent broke the $20 million mark in 1984, but its budget this year has been much lower.

The agencies involved in the Kent cigaret review are incumbent Foote, Cone & Belding; BBDO; Grey Advertising, and Jordan, Case, Taylor & McGrath, all New York.

Among the four agencies that are pitching the business, BBDO, a former R.J. Reynolds Tobacco shop, and Grey, a former Lorillard shop, are not handling cigaret business.

Among the Lorillard shops not involved in the Kent review are Dancer Fitzgerald Sample, which handles True and Triumph cigarets, and MCA Advertising, which handles Lorillard's flagship Newport as well as Satin and Old Gold smokes. Besides Kent, FCB handles Max 120s. Jordon, Case, Taylor & McGrath has new-product responsibilities.

The agencies have been given "creative exploration" assignments, sources said, and a decision

HIGHLIGHTS

Beatrice to lose some units? 1

Beatrice Cos. stands little chance of surviving a leveraged buyout bid intact, Wall Street sources say. The company's $4.9 billion price tag and $2.5 billion debt load have financial observers already speculating on what plums will fall from the Beatrice tree if the company is sold.

Lorillard hunting for Kent shop 1

Lorillard, the tobacco marketing unit of Loew's Corp., has quietly solicited presentations from at least four agencies for its $20 million Kent cigaret account and perhaps some other business.

Restaurants look for fast fix 3

Powerless to hike prices in a low-inflation economy and facing a legion of fitness-focused customers, restaurant chains are whipping up new menus and delivery methods to boost sales. Judging from the array of remedies served up at last week's Multi-unit Food Service Operators conference, the industry clearly has liberalized its view of what differentiates a full-service restaurant from a fast-food outlet.

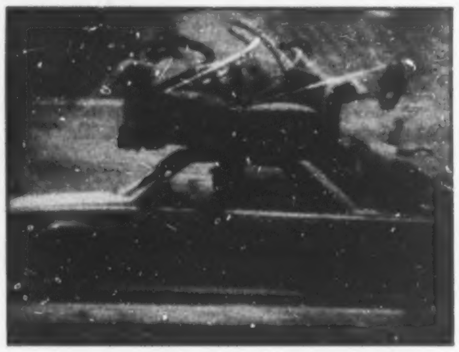
Beer imports up, ad dollars down 6

Look for a continued increase in the number of imported and low or nonalcoholic beer brands entering the market. But the U.S. dollar's increasingly less-favorable position against foreign currencies may mean less consumer advertising spending in support of those entries.

Kodak development threatened 12

A federal court judge's injunction barring Eastman Kodak Co. from marketing or selling its instant cameras and film after Jan. 9 could affect Kodak's industrial and commercial applications.

Subaru takes its own road 14



Subaru of America is trying to hold onto its four-wheel-drive niche, while carving out new ones, in an increasingly combative U.S. auto industry. Instead of competing across the board, No. 5 Subaru will defend its rural-use, dependable four-wheel-drive image, while seeking narrow, low-volume markets for expansion.

Braniff ad dollars soar 14

Braniff will boost its ad spending to about $7 million in 1986 from $4 million this year, stimulated by strong load factors and growing profits. The revived airline already has begun to use tv for the first time and is adding a new round of radio spots to its pool.

Getting a cable education 40

You can't tune in Cableshop on your tv set anymore, but you can read about some of the lessons to be learned from the cable infomercial venture.

A follow-up foul-up 48

Running the ad is just the beginning of the marketing effort. Carl Zucker shares an experience he had in 1958 that shows how an ad's power was spoiled by poor follow-up in the marketplace.

No Laugh-In matter 74

Gary Owens, the omnipresent radio-tv commercials spokesman, launched a new phase of his broadcasting career last month when he joined KKGO (fm), the all-jazz radio outlet, as its 6 a.m.-to-10 a.m. personality.

CATEGORY REVIEW

Coke, Pepsi turn on the juice 3

It's not likely that Coca-Cola and Pepsi-Cola can be squeezed out of any soft-drink category, but the two cola giants will now go head-on against the nation's top three ad spenders in what's shaping up to be the fastest-growing soft-drink segment—juice-added citrus beverages.

INTERNATIONAL

'IHT' to print in U.S. 58

The *International Herald Tribune* will start printing in the U.S. for the first time early next year in a move to boost its global presence. At the same time, the newspaper also will take its first steps in Latin America.

Multinationals discover Portugal 58

The image of Portugal as a tiny nation with sunny beaches, famous port wine and a seafaring history is changing fast now that U.S. multinational marketers are establishing there.

Bank heavies up campaign 58

Serfin, one of Mexico's largest banks, is using female bodybuilders in an unusual new ad campaign to dispel the myth that investments and banking chores are handled primarily by men.

OTHER NEWS

No part of Time Inc. will be spared from a goal to reduce corporate operating costs next year by $75 million, or 2.5%. Page 12.

Superpower one-upmanship may stand between the 1986 World Exposition and a rebound from the New Orleans Expo debacle. Page 34.

Ansa Software, a startup from Lotus Development Corp. and Compaq Computer, broke advertising last week for Paradox, its first product. The company will promote its $695 database management software in a print campaign that unabashedly likens the program to the technological breakthroughs of Henry Ford and Thomas Edison. Page 36.

CAMPAIGNS BREAKING

Hansen's Foods, City of Industry, Cal., will break new ads for its Natural Soda in the western U.S. today. Singer Stevie Wonder is featured in two 30-second tv spots and one 60-second radio spot for the soda. Ketchum Advertising/San Francisco is Hansen's agency (AA, Oct. 7).

ConAgra's Armour Processed Meats today breaks a $10 million network tv campaign for its five-item lower-salt line. Coupons and in-store sampling, via Bozell & Jacobs, Dallas, also support (AA, Sept. 16).

Xanaro Technologies begins a promotional campaign for the samples of its Ability computer software that will be bound into the November issue of *PC World* (AA, Sept. 2). Ads touting the free samples are scheduled to run in *Barron's*, *Newsweek's* executive edition, *USA Today* and the *Wall Street Journal*. Ronalds-Reynolds, Toronto, handles creative; DFS, New York, handles media buys.

Lorillard Inc., New York, today breaks a major new campaign in national magazines, newspapers and Sunday magazines as well as in outdoor media in support of True Gold, a new, higher-tar extension of its True brand family. Dancer Fitzgerald Sample, New York, handles (AA, Sept. 23).

COMING THURSDAY

Beber Silverstein & Partners is now the largest privately owned, female-controled ad agency in the nation. With 103 employes and offices in Miami, Washington and New York, it also is far and away the largest agency based in Florida. The agency also has had phenomenal success, climbing to a billings level now around $65 million and earning a reputation as one of Miami's hottest creative shops.

Healthcare marketing is in its infancy, but the competitive marketplace requires maturity. Special Report will examine the different competitors and the unusual obstacles they face.

Loews' Tisch in control at CBS

By MAURINE CHRISTOPHER

Laurence Tisch, chairman of Loews Corp., New York, billed as a friendly rescuer in a white hat, has succeeded where Turner Broadcasting System chairman Ted Turner, the brusque raider in a black hat, failed. Mr. Tisch's effective control of CBS Inc. may have been achieved without firing a single cross word, in public at least.

Thomas Wyman, the incumbent chairman of CBS Inc. who built up a wall of debt to repel Mr. Turner's run at taking over CBS earlier this year, welcomed Mr. Tisch with open arms after Loews increased its holdings in CBS from 11% to 25%. Whatever Mr. Tisch's reasons for acquiring such a huge chunk of CBS, Mr. Wyman & Co. on the surface have greeted him warmly as

Interpublic revamps Marschalk network

By STEWART ALTER and LAUREL WENTZ

Interpublic Group of Cos. last week created a new international network to bail out an unsuccessful Marschalk Campbell-Ewald network, and its first move will be to expand in Europe.

The new $500 million network, called Lowe Marschalk Worldwide, will replace the existing U.S.-based Marschalk Campbell-Ewald network.

Frank Lowe, chairman of Lowe Howard-Spink Campbell-Ewald, a publicly held agency in the U.K., will become chairman of the new network. Lester Delano, president of MC-E, will be named chairman of the executive committee.

Besides Messrs. Lowe and Delano, that committee will include Richard O'Connor, chairman-ceo of Campbell-Ewald Co. and of MC-E, Tim Bell, LH-S ceo and a former key executive at Saatchi & Saatchi, and Michael Lesser, who remains chairman-ceo of Marschalk as he becomes president of the new network.

"It's a new company," Mr. Lesser said. "It's listed separately on a different stock exchange and it has a different point of view."

Philip Geier Jr., Interpublic chairman, said, "It will give us the ability to do a lot of things Interpublic couldn't do, such as attracting good agencies into the system. A lot of those problems had to do with image and attitude, which we won't have with a U.K.-run agency."

Interpublic holds 30% of Lowe Howard-Spink, but will increase that as part of the deal. The new network will take over six MC-E European agencies, one Australian agency and one Canadian agency. All the agencies were 100%-owned

Restaurateurs seek new growth recipes

By BRIAN MORAN

ORLANDO, FLA.—Powerless to hike prices in a low-inflation economy and facing a growing legion of fitness-focused customers, restaurant chains are whipping up new menus and delivery methods to boost sales.

Judging from the array of remedies served up at last week's Multi-unit Food Service Operators conference here, the industry clearly has liberalized its view of what differentiates a full-service restaurant from a fast-food outlet. Both segments intend to raid each other's concepts in response to changing consumer preferences. As a result, the traditional definition of one's competition is beginning to blur.

"The era of product and price differentiation in this industry is gone forever," said J. Jeffrey Campbell, chairman-ceo of Burger King Corp. "The winners now will provide the best total dining experience."

In an era of negligible price increases, even the most successful chains can look forward to annual growth of only about 10%—a far cry from the 1970s, when the industry regularly feasted on sales increases of 20% and more.

"Back in the '60s and '70s, price was the real marketing leverage," said Fred Gonzales, senior vp-marketing, Church's Fried Chicken. "All you had to do to increase volume was raise your price. The customer today has become very price-sensitive."

With the proliferation of new concepts and small chains threatening to saturate the restaurant landscape, the hottest strategies to build sales involve faster ways to get the product into consumers' hands. McDonald's Corp. is marching into military bases, hospitals and zoos. Burger King is marshaling a fleet of 20

'Uncola' unhappy with Ayer work

Seven-Up kills net tv ads

By GARY LEVIN

Seven-Up Co. has canceled an estimated $8 million in fourth-quarter network tv buys due to "creative and other marketing considerations" related to the brand's July reassignment from N W Ayer, New York, to Leo Burnett USA, Chicago (AA, July 15).

A spokesman for the St. Louis-based unit of Philip Morris Cos. implied that dissatisfaction with Ayer's creative work—said to have been the primary cause for the agency switch—contributed to the decision to pull the remainder of Seven-Up's 1985 tv schedule, purchased last June in the prime time upfront market.

Seven-Up said the network tv time would be shifted to its 1986 ad schedule. It was unclear how the company's print and radio ad plans would be affected.

The tv schedule reportedly was canceled, at Seven-Up's insistence, by Ayer shortly after it lost the account. Burnett is not expected to purchase any media domestically for Seven-Up before its first U.S. campaign for the brand breaks in the first quarter of 1986. Burnett has handled international assignments for Seven-Up since 1980. The estimated $60 million U.S. account includes 7UP, Diet 7UP, Like cola and Sugar-free Like, in addition to new products.

A source close to the company said the canceled time represented "well less than half" of the estimated $20 million spent on network tv this year.

Burnett, which officially assumed Seven-Up's U.S. business Oct. 12, has been working for months on new creative work for the soft-drink maker. "The level of activity has been intensive for some time," said an agency source.

Burnett was handed the domestic account—without a review—following what sources called a disagreement between Seven-Up and Ayer over use of the brand's "Uncola" ad theme.#

CATEGORY REVIEW: JUICE-BASED SOFT DRINKS

Soft-drink giants squeeze into citrus soda segment

By NANCY GIGES and GARY LEVIN

It's not likely that Coca-Cola and Pepsi-Cola can be squeezed out of any soft-drink category, but the two cola giants will now go head-on against the nation's top three ad spenders in what's shaping up to be the fastest growing soft-drink segment—juice-added citrus beverages.

Encouraged by Pepsi-Cola's introduction last year of Slice lemon/lime with 10% juice, Philip Morris Co.'s Seven-Up Co., Procter & Gamble with its Crush line and R.J. Reynolds Industries, marketer of Sunkist, are all readying lemon/lime and orange entries containing some juice. These three marketing giants have emerged recently as a result of mergers and acquisitions to become the first U.S. advertisers to exceed $1 billion in ad spending annually.

Royal Crown Cola Co., Rolling Meadows, Ill., also has confirmed it is testing formulations of a with-juice soft drink, but said it has not set plans for introducing the new brand.

Not to be outdone, Coca-Cola and Pepsi-Cola also have new product and geographical expansion plans in the works. Pepsi is especially pleased that its Slice entry is proving to be a formidable challenger to Coca-Cola's Sprite in the lemon/lime segment.

Next week P&G's Crush International, Cincinnati, begins a new ad campaign in Marion, Ill., and surrounding markets in Arkansas, Kentucky, Missouri and Tennessee, to support its test of Crush and diet Crush with 10% juice. The tv and couponing effort, via Cunningham & Walsh, New York, is themed "We turned up the juice, and turned the flavor loose."

Ads feature life-style vignettes of Crush drinkers, accompanied by "upbeat music," and stress the increased-juice content of Orange Crush, diet Orange Crush, Grape Crush and Strawberry Crush. Orange Crush sold in other markets contains 0.1% juice. Grape Crush now contains grape and pear juices, while the strawberry variety contains grape, pear and strawberry. New packaging for all brands includes a pinstripe design.

Ad support for the Crush test has been delayed twice, first by inadequate distribution and then by what P&G described as a "technical glitch" in production of the tv spot. The ads were originally set to

(Continued on Page 103)

Citrus-flavored soft-drink shares

Pepsi-Cola's Slice lemon/lime with 10% juice has emerged as a major soft drink in just a year's time. When these shares, which are percentages of the total soft-drink market, were calculated in June/July, the brand was only in 60% of the country. In those markets, it was holding a strong No. 2 position behind only 7UP. The lemon/lime and orange flavor segments account for 17% of the total soft-drink category. Source: Advertising Age.

Citrus

(Continued from Page 3)

break Oct. 14 (AA, Oct. 7).

In its recently established Atlanta headquarters, Reynolds' Del Monte Franchise Beverages group has hired a former Coca-Cola hand, Henry Cardello, to fill a newly created vp-marketing slot. Mr. Cardello was director-marketing, cola brands, at Coca-Cola USA until a year ago, when he joined Lotus Development Corp. as marketing director.

He and other members of the Del Monte management team are on a multicity road tour telling bottlers about Diet Sunkist Plus with 10% juice, which will be available in February, as well as a juice-added Sunkist Plus sugar orange option for markets that may see action from Coca-Cola's Minute Maid orange soda, which contains 10% juice.

Although Del Monte has told bottlers it is aiming to push higher the upper age range of its target market with the juice-added products, advertising still has a teeny-bopper tone. Foote, Cone & Belding, Chicago, is the agency.

Seven-Up Co., St. Louis, which one analyst termed "most vulnerable" to attack on the juice front, also is preparing a juice brand for test-marketing by early next year, a spokesman said. The Philip Morris unit already has done extensive testing of juice formulations and brand names, though it may decide to use the still-dominant 7UP name in a line extension.

The juice prospect was made more likely with the launch earlier this year of Juice Up, a frozen concentrate for lemonade and limeade, by Seven-Up's citrus products division in Ventura, Cal. Leo Burnett USA, Chicago, earlier this year replaced N W Ayer, New York, on Seven-Up's domestic account.

George Thompson, a Prudential-Bache analyst, questions Philip Morris' commitment to the company if it markets, as expected, a juice-content beverage. "Anyone can introduce a product. Whether they'll give it the ad support it needs just to compete on a marketing basis with Coke and Pepsi is another question," he said.

The juice-added segment was actually conceived by Holland, Mich.-based SquirtCo., which last week introduced to its bottlers a reformulated, vitamin-enriched Diet Squirt Plus. The new product will be available in some markets by Dec. 1, with co-op ad support planned via Beber Silverstein & Partners, Miami.

But Pepsi has reaped the greatest rewards of consumer demand in the juice segment. Introduced into test markets in April, 1984, Pepsi's Slice is now sold in 75% of the country and has exceeded all expectations. Pepsi is hoping that Slice will become so successful that bottlers in the remaining 25% of the country, where Pepsi franchisees also sell 7UP, will drop the latter for the Pepsi entry. Just last week, Pepsi persuaded Wendy's International to drop Sunkist to take on Slice in its 1,100 company-owned fast-food restaurants.

Pepsi claims Slice is a strong No. 2 in the markets where it is sold, behind only 7UP, putting that brand's share ahead of Sprite, running at a 3.6% national average. For the June/July period, when Slice had distribution in about 60% of the country, its national share in retail outlets was 2.1%.

Especially successful has been the diet version of the brand, which has moved into the No. 1 spot in the diet lemon/lime segment in many areas. Diet 7UP remains the market leader.

During the June/July period, diet Slice accounted for 1.0% of the total Slice share (regular at 1.1%) while Sprite broke down as 2.7% for regular and 0.9% for diet.

Beverage Marketing Assn., a New York-based trade group, says lemon-lime brands accounted for 12.7% of total packaged soft-drink sales in 1984, up from 11.2% of the 1983 total. The packaged lemon/-lime segment itself grew nearly 20%, to 986.6 million gals., in the same period.

During the first half of this year, Sprite was showing year-to-year growth of about 25%, due in part to the conversion of McDonald's to Sprite from 7UP. This growth is not reflected in the shares, which measure take-home sales. The growth has slowed somewhat lately, but the brand will finish the year with a strong yearly growth record.

Although the demographics of the heavy juice-added-soft-drink user closely parallel the diet drink consumer, Pepsi has intentionally taken a shotgun approach.

Said John Costello, senior vp-sales and marketing, Pepsi-Cola USA, "It doesn't make sense to restrict ourselves from a demographic standpoint. We are targeting at people who are interested in the benefits of juice in soft drinks."

And those, he said, are "better taste and refreshment." Mr. Costello attributes Slice's campaign, themed "We got the juice" and created by J. Walter Thompson USA, as contributing a great deal to the brand's success.

With a lead in the juice-added lemon/lime segment, Pepsi plans to put mandarin orange Slice into test before yearend.

Meanwhile, rival Coca-Cola is focusing on the orange flavor, planning to roll Minute Maid orange soda into the Southwest from the Washington area. This flavor segment, accounting for about 4% of total soft-drink sales, is led by Sunkist, with 2% of the total soft-drink business, followed by Crush at under 1%.

Coca-Cola is cautious on the juice-added segment as a whole. "We think it is too early to determine whether the juice-added segment is major," said a company spokesman.

Coca-Cola is predictably mum about its plans for Sprite and whether a juice-added line extension is being considered. "That is certainly an option open to us, but we have no plans at this time," the spokesman said. Meanwhile, the company continues to test Fresca with juice in the Boston area.

Positive or not, at least one analyst believes competition among the giants in smaller market segments is the way of the future. Said Emanuel Goldman, analyst, Montgomery Securities, San Francisco, "This is a portent of things to come as giant companies enter relatively small markets via acquisition. Sunkist is not a Winston or Salem or Camel to RJR, but it is part of their business and they can't let their share go. So these large companies will end up doing funny things like getting in an orange-soda war."#

For the Record

R.J. REYNOLDS INDUSTRIES, Winston-Salem, N.C., will dissolve its RJR Development Corp. subsidiary Jan. 1. Since the unit started identifying potential acquisition targets in 1981, RJR has acquired Heublein Inc. (including Kentucky Fried Chicken) and Nabisco Brands.

TELESCAN, a commercial monitoring service, today begins measuring tv flights of 24 advertisers in New York by encoding commercials with a special signal that traces when and where the ad runs. Advertisers, including Nabisco Brands, Quaker Oats, Pepsi-Cola and Ralston Purina, pay a fee of 10¢ each time their ads are monitored. Chicago and Los Angeles will be measured starting next January, Telescan says.

CBS won Week 3 in the fall prime time ratings race, its 17.7 Nielsen ratings average topping NBC's 17.3 and ABC's 15.6.

VIDEOCASSETTE UNIT sales to dealers for the first nine months of 1985 "nearly equal" the total sold last year, said Electronic Industries Assn.'s Consumer Electronics Group, Washington. Nine-month sales rose 57% to 7.5 million sets, and EIA estimates 11.5 million vcrs will be sold by yearend.

AMERICAN AIRLINES, Dallas, targets achievers and society-conscious business executives in a new tv and print ad set to run through December in the 12 largest U.S. markets. The line, "When you're something special, people know it," is added to American's regular theme line "Something special in the air." Bozell & Jacobs/Southwest handles.

COMPLIANCE with federal truth-in-advertising laws by real estate advertisers increased to 90% in 1984 from 70% two years earlier, and compliance by auto advertisers rose to 92%, according to a Federal Trade Commission review.

PARKER PEN CO., Janesville, Wis., has sold its writing instrument group to Schroder Ventures, London, a group of investors lead by Jack Magre, head of Parker Pen-Europe, and Peter Kibble, head of Parker Pen-Asia and Australia, for an undisclosed price. Mitchell Fromstein, Parker's president, will remain in charge of Manpower Inc., the temporary-help subsidiary that now becomes the parent company, operating under that name. No changes in agencies are planned by the company as yet; Marcus Advertising, Cleveland, is Manpower's agency. Ogilvy & Mather's Chicago and London offices handle Parker's estimated $8 million global account.

THE NEW YORK TIMES CO. will have the national edition of the *New York Times* printed by the *Atlanta Journal & Constitution* beginning in mid-'86. The paper will be distributed throughout the Southeast except for Florida, where the national edition is printed by the *Lakeland Ledger*, a subsidiary of the Times Co.

K MART CORP., Troy, Mich., will end a two-year test on Dec. 28 by closing Accents, a discount gift and tableware store in Birmingham, Mich., and its adjacent sit-down restaurant, The Annex, because of low profits.

INTERNATIONAL HERALD TRIBUNE, Paris, reports its advertising revenue increased 35%, up $3.4 million, through the first half of 1985. Circulation, at 164,639, is up 27% since 1980.

ACCOUNT ACTIVITY: **Dean Witter Reynolds** to **Lord, Geller, Federico, Einstein**, for its $10 million retail account, from Doremus & Co., all New York. . .**Northwest Orient Airlines**, St. Paul, will hear presentations next month from Fallon McElligott Rice and agency of record Grey Advertising, Minneapolis, for a special project reportedly aimed at business travelers. The new project is expected to bill "somewhat less" than $10 million; its effect on Grey's $23 million in Northwest business is uncertain. Bryan Moon, Northwest's vp-advertising, insists the airline is satisfied with Grey's work. . .

WORTH NOTING: **Paul Woolard**, president of Revlon's worldwide beauty group, has confirmed industry reports that he will remain with the cosmetics company (AA, Oct. 14). There had been speculation that he might leave if the division is acquired in a leveraged buyout by Adler & Shaykin and Linda Wachner, former Max Factor ceo. . .**Charles Weaver**, president and chief operating officer of Oakland, Cal.-based Clorox Co., has been named ceo, succeeding Calvin Hatch, who continues as chairman. Exec vp **John Collins** becomes chief operating officer. . .**George Simpson**, former communications director for *Newsweek*, to vp-corporate communications, Simon & Schuster, New York, succeeding **Peter Minichiello**, now president, George Trescher Associates (AA, Oct. 14) . . .**Young & Rubicam/Zemp**, St. Petersburg, Fla., has formed an association with Garcia-Serra & Blanco, an Hispanic ad agency in Miami, and separately absorbed Cohn & Wolfe pr agency, with offices in Tampa and Orlando, via a merger. . .**Deutsch, Shea & Evans'** Los Angeles office has formed a collateral communications divison to be headed by **Morris Hertz**, former vp-creative director/branch manager of Ogilvy & Mather, Los Angeles' recruitment division. . .**Hearst Corp.**, New York, has established the Helen Gurley Brown research professorship at Medill School of Journalism, Northwestern University, Evanston, Ill. Ms. Brown celebrates her 20th year as editor of *Cosmopolitan* with a special November issue (AA, July 22). . .**Pacific Southwest Airlines**, San Diego, is emphasizing its expanded number of flights between Los Angeles and San Francisco, with a new tv, radio and print campaign reviving the "Catch our smile" theme. . .**Vista**, the Coral Gables, Fla.-based English-language Sunday newspaper magazine for Hispanic Americans, has increased its circulation 41%, to 601,000, effective with its Nov. 3 issue. . .**Rayovac Corp.**, Madison, Wis., is introducing nationally three additions to its Workhorse flashlight line—a AA-size minilight, a 6-volt beam lantern and a fluorescent lamp. Print ads support, via Leber Katz Partners, New York, which handles the estimated $15 million Rayovac account. . .**Alberto-Culver Co.**, Melrose Park, Ill., has acquired Victory Beauty Systems, Hillside, Ill., a 38-store professional beauty supply outlet chain under the Bee Discount and Beauty Care Discount Center names in Chicago, Cleveland, Detroit, Milwaukee and St. Louis. Victory will be operated by Alberto's 260-store, wholly owned subsidiary, Sally Beauty Supply Co. . . .**Schering-Plough's** Plough unit, Memphis, Tenn., is introducing nationally Correctol Natural Grain and Fruit fiber powder laxative, an extension of its tablet and liquid line. Network tv and print will break in mid-November, with more than 96 million coupons distributed through freestanding newspaper inserts. Warwick Advertising, New York, handles.

MIAMI SPICE

The Beber Silverstein agency keeps growing— and making headlines

Special Report: Healthcare Marketing

Thursday

Sweet home Miami

If there's one thing that still vexes Joyce Beber and Elaine Silverstein after 14 years in Miami advertising, it's that lingering label: "Two Jewish doctors' wives." Beber Silverstein & Partners is the largest privately owned, female-controlled ad agency in the nation. With 103 employes and offices in Miami, Washington and New York, it also is far and away the largest agency based in Florida. The agency also has had phenomenal success, climbing to a billings level now at approximately $65 million and earning a reputation as one of Miami's hottest shops. *See Page 4.*

Hyatt hotels are hot

They did not mention glass elevators or soaring atriums, but readers who responded to ADVERTISING AGE *Thursday's* hotel-motel poll came out strongly in favor of the Hyatt Hotels Corp. The poll, in the form of a questionnaire that ran in August in *Thursday*, asked readers to select their three favorite U.S. hotel-motel chains and also asked them to name their favorite single U.S. business and vacation hotel. Marriott Hotels Inc. was second, and Westin Hotel Co. came in third. *See Page 12.*

Special Report—Healthcare Marketing

Healthcare marketing is in its infancy, but the competitive marketplace requires maturity. Special Report examines the competitors and the unusual obstacles they face. *See Page 15.*

Presstime

Hot Wheels roll to O&M

HAWTHORNE, CAL.—Mattel Toys is shifting an estimated $6 million in billings from Dailey & Associates, Los Angeles, back to its longtime agency, Ogilvy & Mather. The split ends the toy company's 11-month association with Dailey, which had won Hot Wheels and unspecified future brands. "The relationship has not worked out in the best interest of either party," Mattel said.

Agencies plug for Edison

WASHINGTON—Edison Electric Institute is considering six agencies to handle the electrical utilities consortium's $5 million account—Ketchum Advertising and Needham Harper Worldwide here; BBDO and Young & Rubicam, New York, and W.B. Doner & Co. and Smith Burke & Azzam, Baltimore. D'Arcy Masius Benton & Bowles, New York, previously handled.

Profits plummet at BBDO

NEW YORK—BBDO International saw its profits squeezed in the third quarter due to losses from transfer of its BBDO Holdings unit in South Africa to local management (AA, Aug. 26). It posted a 6% rise in worldwide revenues for the quarter, reaching $76.5 million, but, as expected, net income suffered. At $464,000, net income was down 88% from a year ago. Earnings per share plunged to 7¢ from 62¢; 50¢ of the drop was attributed to the South African transaction. For nine months, net income sank 30% to $10.6 million and worldwide revenues were up 6% to $236 million.

On Rumrill's bandwagon

NEW YORK—Rumrill-Hoyt, which has agreed to work free on a campaign to benefit the Live Aid Fund and promote the "Live Aid World Concert Book," has received offers from Tina Turner, Jack Nicholson, Robin Williams, Michael Douglas and Cher to appear in the commercials, and from directors such as Bob Giraldi, Jim Johnston and Steve Horn to direct for no cost.

Video gels for Sassoon

CENTURY CITY, CAL.—Richardson-Vicks' Vidal Sassoon Inc. subsidiary is producing a music video for Mr. Mister's RCA recording "Is It Love?" Actors in the video, which will make its premiere early next year on MTV: Music Television, use the company's new Colorific products, unusual styling mousses and gels that temporarily dye hair in intense punk-ish colors. Sassoon will

ABP MPA RED TAG ABC ANPA

O&M animates abstractions in latest spots

By Stewart Alter

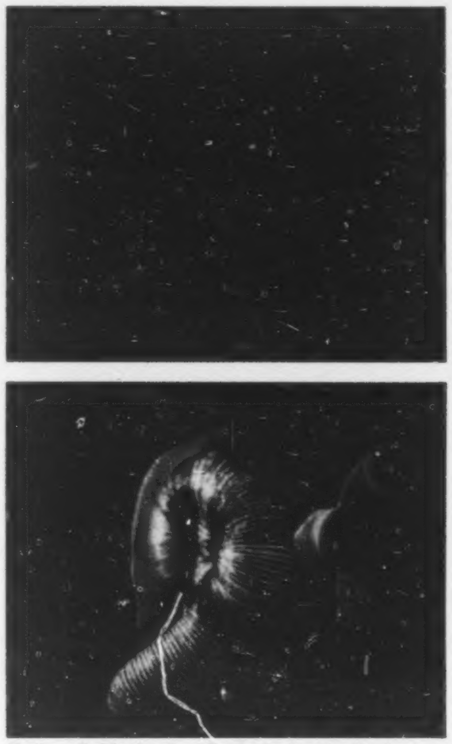
Ogilvy & Mather, New York, recently launched a series of 10-second animated commercials for Trans World Airlines that brings advertising into the era of abstract art.

One typical spot in the series, intended for the St. Louis market, shows different-colored lines zooming out of a ball. "TWA gives you a choice of 200 flights a day from Lambert Field. . ." says the voice-over. As it completes the sentence by saying ". . .and back," the colored lines reverse direction and start shooting back into the ball, while the tag line "Leading the way—TWA" flashes on the screen.

Since O&M this year also launched a campaign for AT&T Information Systems using the Mummenschanz Swiss mime troupe translating points about computer-system compatibility into abstract mime-demonstrated visualizations, one might wonder if there weren't some creative trend going on within this agency.

Consider also some other recent O&M commercials that have a similar intensity if not the same abstract visual emphasis: The much-publicized Hersheys New Trails spots that also toy with the viewer's sense of sight by having children lip-sync familiar rock songs, or the also-reported-on General Foods Maxwell House campaign in test in Ohio in which stand-up comedians are shown simply working coffee into their routines while the unmentioned brand name only flashes on at the end.

Has this agency become convinced that it's time to say goodby to commercials showing real people expressing the kind of warm emotions that can only come from brand names? Has Ogilvy & Mather, a systematic agency if ever there was one, decided that the way to break through in the era of tv commercial zapping is obliquely, abstractly, intensely?



Ogilvy & Mather's 10-second animated commercials for Trans World Airlines use visual abstractions that mirror O&M's distinctive Mummenschanz campaign launched earlier in the year for AT&T Information Systems.

The answer, as in most cases, is yes and no.

It's emphatically no, maintained O&M/NY seniot vp-creative director Jau Schulberg, if one perceives that the agency has abandoned human values. "I believe it is emotion that sells, supported by reason to believe," said Mr. Schulberg, noting the agency reel also includes heart-warming commercials such as those for Kimberly-Clark's Huggies, filled with cute babies, or Hardee's Food Systems, in which an enterprising boy's early-morning devotion to his newspaper route symbolizes the industriousness of the "good people" discussed in the campaign. And besides, TWA is continuing its main people-oriented "Faces" campaign, even while it uses the minimalist graphic technique in 10-second spots.

"I think it is very important today to get consumers' attention," said Mr. Schulberg, adding that he's "not a fan of cleverness for its own sake." There are "three or four very simple things" that advertising has to do, he continued: be on strategy, be distinctive, make sure the selling message comes through and be rewarding to the reader or viewer.

But at the same time, the intensity and purposefulness that characterize the TWA and AT&T spots do represent something about O&M's approach to advertising. "I believe that any good advertising has to be single-minded," said Mr. Schulberg, who sees no reason why copy points can't be made very directly, even in apparent isolation, or why every TWA spot, for example, has to show human beings "I don't believe you have to tell people the obvious," he said, explaining that research shows the TWA 10-second spots to be effective with their messages understood.

Belaboring the obvious is what Mr. Schulberg maintains was one of the problems with "a lot of advertising that came out of America in the 1970s." It insulted the average person's intelligence" and was often boring and cliche-ridden as it presented "artificial people in artificial situations."

Yet Mr. Schulberg does not dispute that some of the more recent advertising coming out of O&M is not different in spirit from what this agency

(Continued on Page [illegible])

for $50,000.

Although individual tastes vary, "Casablanca" remains the perennial favorite, garnering as much as $3,000 for an original movie poster, he says. Five years ago, the same poster sold for as little as $10. "It's a strange, growing business."

Marie Spadoni

There's no music, but the scenery's great in these hotel videos

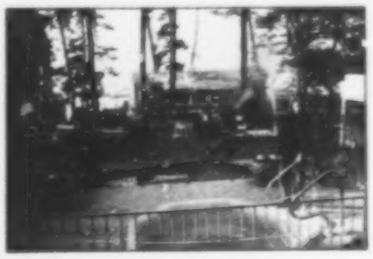
The video craze has graduated from mugging rock stars and slickly edited soft drink commercials to a new, more serene subject matter: High-class hotels.

Applying video techniques to tourism was the brainchild of Toni Doyle, director of marketing for the Highlands Inn in Carmel, Cal. Doyle came up with the idea of hiring nearby Michaelson-Ruskin Productions, Palo Alto, to shoot a 6½-minute video of the hotel—complete with background music and voiceover narration waxing eloquent on the virtues of the hotel and its surrounding environs.

"Decision makers can't always take the time to come see the property," Doyle notes. "This way, we can bring it to them."

So far, the inn has sent the video primarily to clients considering it for conferences, but it also plans to supply travel agents with copies. For a $25 deposit, they'll also send one to interested individuals.

According to Rob Berg, director of communications for Michaelson-Ruskin, the video will serve a dual purpose, promoting the inn and serving as a sort of visual resume for the developer. The video includes more than 40 shots, interior and exterior, highlighting hotel amenities and the beauty of the California coastline, done at a cost of $20,000.



The video has only recently been made available, but Doyle says the number of requests she's received suggest they'll have "tremendous success" with it. The production company, says producer Ira Ruskin, is developing a marketing strategy to promote this service to other hotels.

"The proliferation of the vcr makes this a very opportune time for this type of marketing," he says. "I look upon it as a significant extension of our business."

The job, says Ruskin, is not without its perks: "If it catches on, we'll get to stay in a lot of nice hotels."

Brian Lowry

A word of advice: Grab the mustache and run

No corporate type's Christmas will be complete this year without the "Executive Expense Account Kit" nestled under the tree. The kit is the brainchild of Marc Juris, a financial analyst-turned copywriter now with GM Communications, a small New York agency. It was his job as a financial analyst that taught him the ins and outs of expense account padding, but he realizes that account execs are experts, too.

The kit comes complete with an instruction manual ("If you must validate the taxi receipt quickly, sign it with the hand you do not write with"); a pen that writes in three different colors; pads of preprinted, guaranteed fake receipts from chichi restaurants such as "Lou Tess," "La Snobee du CoCo," and "Chez What," and a "Fail Safe" system in case of detection: A fake mustache.

The EXECUTIVE EXPENSE ACCOUNT KIT

Several thousand kits are already in Bloomingdale's and trendy card and gift shops across the country, Juris says, and retail for about $10.

Lisa Phillips

It has finally arrived! A thesaurus that works as hard as you do

"Dear Reader: Forget everything you've heard about **thesauri**. "Words That Sell," (by Richard Bayan, Caddylak Publishing, $19.95), may change the way you write copy.

Here's why: It's all here! Everything from "snappy transitions" to "knocking the competition."

"Words" leaves no stoned unturned **in its** step-by-step sections. All you do is look up "grabbers," and you'll discover how easy it is to "make the reader sit up and take notice." It's a snap. "Descriptions and benefits convey the value of your product or service."

Sections such as "clinchers, closing statements that motivate the reader to respond," **followed by** top-notch "terms and offers, making the 'bottom line' irresistible" and "special strategies, pulling out all the stops to make your point" will make you feel brand new.

Are we claiming too much? We don't think so. The key word is quality. You are the one who benefits. The ultimate **thesaurus** furnishes all the **words** you need to **create copy.**

The wizardry of **author Bayan** gives you an insider's grasp of **advertising and** takes the mystery out of **copywriting. "I could see it being used in advertising classes," he says, adding that it exposes a wealth of choices to expand the repertoire of the professional.**

You'll be tickled by **"Words," too. "The humor is to take knowledge of the fact that there's an element of fun in direct mail," says Bayan.**

words that sell

What kind of people read **"Words"**? You'll join the ranks of **20,000 other copywriters and marketing execs who own this thesaurus** of distinction, the kind you've only dreamed about, the first real improvement **since Roget.**

"Words That Sell" is billed as "A thesaurus to help promote your products, services, and ideas." It will revive your **vocabulary** and it's the **thesaurus** no family **(read: copywriter)** should be without. Snuggle up, cuddle up, get comfortable with it.

Can you think of any reason *not* to send for "Words that Sell"? Now is the best time. You've waited long enough. Take this important first step. Reserve your **thesaurus** today! **It's available by ordering from Caddylak Publishing, 201 Montrose Rd., Westbury, N.Y. 11590.**

You'll wonder how you ever managed without it.

Kevin Brown

Dine out in Jakarta, work in New York, live in Lisbon, and you may break even

For all our Jakarta readers, we've got some good news and some bad news: The good is that a hearty meal (steak, two side dishes and dessert) can be had there for $11. The bad news is, quite possibly, you earn less than that in a week.

According to a worldwide wage and price survey conducted for the Union Bank of Switzerland by two independent organizations, New Yorkers command the highest salaries of the 49 major cities surveyed. In fact, the average worker in New York earns 42% more than a worker in Zurich or Tokyo and more than twice as much as the average worker in Paris. Los Angeles workers, meanwhile, are paid 36% more than their Zurich and Tokyo colleagues.

Low-end cities? Bombay, Manila and Jakarta. In fact, textile workers in Jakarta earn about $400 a year—lowest of any occupation in any city on the survey.

Dinner in a quality restaurant averaged $17 per person in the 49 cities, up from $13 in 1982. Cheap eats can be had in Bangkok, Brussels, Caracas, Dublin, Duesseldorf, Istanbul, Jakarta, Lisbon, Madrid, Manila, Tel Aviv and Rio. That's $10 or less for the steak dinner described above. On the other hand, eat that steak and potatoes in New York, and you (or your company) pay $35. Eat it in Tokyo (Benihana's, perhaps?) and cough up $42. In Abu Dhabi, be prepared to ransom your food for $59 (find a sheik to foot the bill).

Apartment rents can be really cheap some places. Abu Dhabi, New York, Chicago, L.A. and Houston are not among them. Average rent for a three-room unfurnished apartment ranged from $80 in Jakarta to $1,470 in Abu Dhabi. Average rent in New York is $1,050; $750 in Chicago; $580 in L.A., and $530 in Houston.

Lagos, Nigeria, followed by Tokyo, New York and, as always, swinging Abu Dhabi, are the four most expensive cities to live in, but each of the four U.S. cities surveyed made it to the top 10. Living in Rio, Lisbon, Luxembourg or enchanting Istanbul costs half of what it takes to live in the Big Apple or the Big Sushi.

WESTIN HOTELS

. . . and Westin got more compliments for its food than any other chain.

Hyatt's the place

AA readers rank Marriott, Westin next best

By Robert Goldsborough

They did not mention glass elevators or soaring atriums, but readers who responded to ADVERTISING AGE *Thursday's* hotel-motel poll came out strongly in favor of the Hyatt Hotels Corp.

The poll, in the form of a questionnaire that ran in August in *Thursday*, asked readers to select their three favorite U.S. hotel-motel chains and also asked them to name their favorite single U.S. business and vacation hotel.

We received responses from more than 150 readers in 20 states, the District of Columbia, Canada and Australia. In all, 33 chains received votes.

The largest number of responses came from New York, with California second, Illinois third and Washington, D.C., fourth.

Hyatt was a clear winner in the chain category, garnering a total of 101 points, based on three points for a first-place listing, two points for second and one for third.

Runner-up Marriott Hotels Inc. picked up 85 points and got 17 first-place votes to 20 for Hyatt.

Although 76-hotel, Chicago-based Hyatt has among its signatures vaulted atrium lobbies, glass elevators and revolving rooftop restaurant-lounges, these stylish elements were not written about by any of those who voted for the chain.

Rather, Hyatt was praised most frequently for consistency and quality of service. Readers also gave it high marks for "upkeep of the hotels," "easy check-in and check-out," "no reservations foulups" and "female executive floors."

Interestingly, Marriott got more strongly favorable comments from its supporters than did Hyatt. The Washington-based chain, with about 135 domestic facilities, was cited most often for the friendliness of its personnel and its Honored Guest program, in which travelers accumulate points that can be used for merchandise and for discounts on rooms, airline tickets and car rentals.

A sample comment from a Cincinnati reader: "[Marriott] knows what a businessman wants and needs while traveling and they are especially good at employe attitudes and training."

AA hotel-motel poll

	Total points
1. Hyatt (20)	**101**
2. Marriott (17)	**85**
3. Westin (9)	**58**
4. Four Seasons (11)	**41**
5. Vista International (11)	**36**
6. Hilton (3)	**28**
7. Ritz-Carlton (1)	**12**
8. Sheraton	**11**
9. Holiday Inns (3)	**10**
Helmsley (1)	**10**

Source: ADVERTISING AGE readers' poll. Readers were asked to rate their favorite hotel-motel-chains. The results were derived by giving three points for each first-place vote, two points for second and one point for third. First-place votes are in parentheses.

Others gave the organization high marks for cleanliness, safety, express checkout, "great gift shops" and—from one California reader—"great bars!"

In third place was Westin Hotel Co., Seattle, a subsidiary of UAL Inc., which has 26 domestic hotels with six more under construction. "Class," "style" and "service" were the words most often used to describe the Westins, and the chain also got more praises for its food than any other. One New Yorker praised the chain for "service and people who are considerate and love what they do."

Several smaller chains did well in the balloting. Toronto-based Four Seasons, which has 10 U.S. hotels, finished fourth, with readers calling them "quiet," "comfortable" and "luxurious" and having "a passion for excellence."

Vista International, a group of five hotels that are part of Hilton International, itself a subsidiary of Transworld Corp., was fifth, getting praise for "European style of service" and "lovely atmosphere."

Atlanta-based Ritz-Carlton Co., which operates four hotels with three under construction, finished seventh. (The company owns the Ritz-Carlton in Boston, but not the hotels of the same name in New York and Chicago, the latter of which is a Four Seasons facility.)

A number of readers also showed preferences for all-suite hotels, a relatively new development. Several singled out the L'Ermitage group of all-suite hostelries in the Los Angeles area.

The ballots showed a wide variety of preferences in the favorite business and vacation hotel categories. Among hotels mentioned most frequently as business stopovers were the L'Ermitage, Westwood Marquis and Beverly Hills Hotel in the Los Angeles area, Arizona Biltmore in Phoenix, Mark Hopkins in San Francisco, Waldorf-Astoria in New York, and two Chicago hotels, the Tremont and Ritz-Carlton.

Vacation hotels that received multiple mentions include the Arizona Biltmore, Mark Hopkins, Fairmont and Four Seasons Clift in San Francisco, Carlyle in New York, Ritz-Carlton in Laguna, Cal., Ritz-Carlton in Chicago and the Hyatt on Maui, Hawaii.

We also asked readers what one hotel they would choose to stay in, anywhere in the world, if they had the opportunity.

Here also, there was a wide variety of nominations, with 46 hotels and resorts named, in the United States as well as in Canada, England, Scotland, France, Spain, Greece, Monte Carlo, Hong Kong, India, Japan, Jamaica and the Bahamas.

Hotels that received multiple mentions were the Kahala Hilton, Honolulu, the Ritz and George V in Paris, Mansion in Dallas, Westwood Marquis in Los Angeles, Fairmont in San Francisco, Broadmoor resort near Colorado Springs, Colo., and the Maui Hyatt.

Three Hong Kong hotels—Shangra La, Regent and Mandarin—were favorite choices, along with four in London: Sheraton Belgravia, Connaught, Berkeley and Churchill.

And one reader from Santa Ana, Cal., got very specific about an all-time favorite place to stay.

His ballot read: "Westin Hotel, Seattle, Wash. Top floor—face west!" ■

Special Report

Product management is in the air

By Richard Edel

The tv image is a young male executive. The voiceover: "A message to those who don't care." As the announcer talks about cocaine abuse, time-lapse photography shows dramatic deterioration of the man into a disheveled addict.

The 30-second spot, airing now in New York and for two weeks last June, is not a public service message. It targets loved ones of "briefcase addicts" and its goal is to fill beds in a new drug abuse treatment center called Stuyvesant Square at New York's Beth Israel Medical Center.

It is part of a national trend among healthcare providers to market services through product management, which is radically changing attitudes about medical marketing and advertising.

Richard Edel is a Chicago-based freelance writer.

Beth Israel's tv spot cost $40,000 to produce and $80,000 to air in June. Inpatient census in the 50-bed clinic for a 28-day initial treatment jumped from 21 before the June campaign to 40, a 90% increase. At a price of $10,000 a patient, Beth Israel will receive net income of $80,000 from initial advertising alone. As the first wave of in-patients is released, the cycle starts again with $90,000 in tv budgeted for the fourth quarter.

The idea of selling medical services like McDonald's sells hamburgers would have shocked New York's medical establishment even last year, says James Stark, Beth Israel's senior vp-marketing. But faced with a vast restructuring of the healthcare industry, the medical community is adapting.

Beth Israel's ad was the first paid ad by a nonprofit hospital in New York. But all the major institutions there are scrambling to begin marketing products. "I think you're going to see some million-dollar budgets popping up, compared with zero before," Mr. Stark says. And with no resistance from physicians, he says. "They see the writing on the wall."

The dramatic turnabout is rooted in a mixture of political, economic and social forces. But a key factor is the need for healthcare providers—hospitals, insurance companies, health maintenance organizations, independent physician associations—to react to greater competition and concern about the bottom line.

One reason is a new medical reimbursement system for Medicare, the federal program that provides health benefits to those 65 and older, which established reimbursement levels for treatment of 468 common procedures, called diagnostic related groups of illnesses (DRGs). If a hospital provides the treatment for less than the DRG reimbursement, it makes money. If the treatment costs more, the hospital loses money. The transition, which began in late 1983 and will be introduced in New York in 1986, has healthcare providers in an uproar.

(Continued on Page 18)

Product

(Continued from Page 16)

"It's like a bomb went off here," Mr. Stark says. "It's amazing that everyone is reacting so quickly to the new system. It's a whole new ball game."

What is happening in New York already has happened or is occurring across the U.S., causing sweeping changes in the delivery of healthcare. Evolution in the system is being caused by many factors, says John Gaffney, economist for the American Medical Assn., Chicago.

A critical factor is the rising cost of care. In 1950, healthcare expenditures accounted for about 4.4% of the gross national product, or $83 billion. By 1982, it accounted for 10% of the gross national product, $322 billion. Health expenditures are expected to increase to $690 billion in 1990, 12% of the gnp, according to projections by the Health Care Financing Administration, Washington.

Pressure for cost containment is changing some time-honored traditions of medicine—for example, the patient and physician relationship, Mr. Gaffney says. With new incentives to release in-patients quickly and to perform more outpatient procedures, there is concern over the intrusion of economics into the physician's clinical decisions.

"It puts the physician in the middle," Mr. Gaffney says. "And it puts consumers under tremendous pressure to make informed decisions [about the course of treatment], which is difficult at any time, but especially when you're not well."

An abundant and growing supply of physicians also is dramatically increasing competition, Mr. Gaffney says. A study by *Internal Medicine News*, International Medical News Group, New York, predicts the ratio of physicians to population will reach 1 in 400 by 1990, compared with 1 in 540 today, and 1 in 625 in 1970.

A large supply of physicians stimulates formation of HMOs, preferred provider organizations and independent physician associations, and this is having a significant impact on competition for the delivery of healthcare. As competition intensifies, so will advertising and marketing, Mr. Gaffney says.

Steven R. Steiber, chief executive officer of Allied Research Associates, Chicago, estimates total 1985 measured-media hospital advertising in the U.S. at about $400 million, up from $100 million to $200 million in 1984 and $25 million to $50 million in 1983. "Where will that take us?" asks Mr. Gaffney.

"Is the healthcare product similar enough to other products that the same approach to producing, pricing and distribution will work to the benefit of the consumer? There is a great range of opinion," he says.

One possibility is that rising competition will cause advertisers to make increasingly strident claims about pricing and service to attract consumers, he says. But such claims could haunt advertisers in years to come, especially if they compromise the consumer's perception of quality care.

The American Medical Assn. favors self-adjusting market forces in healthcare as long as the quality of care is not hurt. But it is impossible to predict the effect on quality of product-oriented competition, Mr. Gaffney says.

Examples of product-oriented programs include those of highly aggressive for-profit companies, such as Republic Health Corp., a Dallas-based chain that offers discounts and freebies like a free pair of glasses for cataract operations or a free pair of shoes for foot surgery. For-profit hospitals, which were spawned by a flood of money from enactment of Medicare in 1965, are reacting most quickly to changes in the healthcare environment.

The greatest long-term effect in healthcare is demographic change, Mr. Gaffney says. As the U.S. population continues to age into the next century, the effect will be fewer workers supporting more older nonworkers. This trend will have profound implications on the cost, quality and accessibility of medical care in the future. At issue is the effect these factors will have on for-profit and nonprofit hospitals, and on alternative healthcare providers, says Daniel R. Longo, a professor with the Center for Health Services & Policy Research, Northwestern University, Evanston, Ill.

How diagnostic related groups of illnesses are changing purchasing decisions

Respondents reported alterations in degree of influence by various purchasing decision makers in light of recent drg regulations as follows:

Decision maker	More influence	Less influence	No change
Administrator	67.9%	3.6%	28.6%
Operating room supervisor	46.4	17.9	35.7
Individual physician/surgeons	21.4	42.9	35.7
Director of nursing	60.7	7.1	32.1
Central supply supervisor	46.4	10.7	42.9
Infection control supervisor	28.6	7.1	64.3
Emergency department supervisor	35.7	14.3	50.0
ICU/CCU supervisor	33.3	16.7	50.0

Key effects of diagnostic related groups of illnesses

	Effect	Per cent mentioned
1.	Shorten patient stay	72.7%
2.	Reduce drug, devices and other supply costs	60.0
3.	Reduce staff	54.4
4.	Increase in enhanced cost/accounting computer systems	48.5
5.	Use of lower cost distributors/buying groups	42.4
6.	Enhanced hospital marketing programs	39.4
7.	Increased use of reusables vs. disposables	18.2
8.	Increased early diagnostic procedures	15.2
9.	New or increased use of incentives for personnel to comply with drgs	14.3
10.	Increase in admissions	12.1
11.	Reduced purchases of capital equipment	12.1
12.	Transfer of more acutely ill patients to short-term extended care or nursing home facilities	9.1
13.	Adoption of cost-reducing medical equipment	6.1
14.	Increased in-house clinical lab tests	3.0
15.	Increased tendency toward surgical specialization	3.0

Source: Gordon DRG Report, Chart: *Medical Marketing & Media*, Boca Raton, Fla.

"The interesting question is whether hospitals will become healthcare institutions providing a whole array of services [including HMOs and PPOs], or whether they will remain mainly acute care institutions," he says.

"Nobody has a crystal ball," Mr. Longo says, "but there are a number of avenues for marketing that we hadn't dreamed of even two years ago."

These include more joint ventures among hospitals, physician groups, HMOs and insurance companies, all creating a plethora of possibilities. "Competition will continue to increase, not only between hospitals, but between physicians and hospitals, hospitals and corporations, and all of the alternative types of providers," Mr. Longo says.

The distinction among major elements in the health sector is becoming blurred by joint ventures among big corporations representing hospitals, insurance companies and alternative healthcare providers, says Stephen W. Brown of the center for services marketing, Arizona State University, Tempe. The healthcare industry is moving from a physician controlled economy to a consumer controlled market.

"That puts the consumer in the power position," says Mr. Brown, who is co-author with Dr. Andrew P. Morley Jr. of "Physician Marketing," released last week by Medical Economics Books, Oradell, N.J.

"It used to be that you had to go to the castle, or the physician's office, to get medical care," he says. Now providers are creating healthcare products that emphasize price, accessibility and convenience.

But the future will be dominated by huge healthcare corporations, which even now are creating national healthcare systems offering a variety of services through regional networks of hospitals, clinics and physicians. These systems are

(Continued on Page 19)

National networks develop brand names

Healthcare conglomerates will pump millions of dollars into advertising and marketing medical and insurance services as they develop national health system networks. The networks feature branded healthcare products, insurance services and financial incentives for using the systems.

"It's a terrific time for the creative juices to be flowing," says Roland Wussow, vp-communications at HCA (Hospital Corporation of America), Nashville, Tenn. Mr. Wussow says HCA, a 440-member, for-profit hospital chain, now is targeting employers, and later consumers, for its network, HCA Health Plans. The network combines managed healthcare plans with low-cost insurance and will be available in 10 markets by yearend and 40 markets by the end of 1986.

After successful tests this year in Nashville and Houston, where it was able to significantly increase HCA name awareness, the corporation plans heavy "brand" advertising in 1986, Mr. Wussow says.

The big, for-profit hospital chains, HCA, Humana, American Medical International and National Medical Enterprises, and nonprofit Voluntary Hospitals of America, Irving, Tex., all are forging national network systems combined with cut-rate group insurance either self-funded or through joint ventures.

VHA Enterprises, a VHA subsidiary, kicked off a joint venture this month with Aetna Life Insurance Co., Hartford, Conn., called Partners National Health Plan, combining reduced rates through 500 member hospitals and group insurance from Aetna, says Allen Maltz, senior vp at VHA in Dallas. Partners National is a preferred provider organization, which provides low-cost fee-for-service medicine and links employer premiums to the consumer price index.

"We think the country's going to eat it up," Mr. Maltz says.

Prudential Insurance Co. of America, the largest group insurance carrier, is rolling out a similar program called Pru-Care Plus, a health maintenance organization type plan combining prepaid healthcare and insurance options. Pru-Care is targeting 80 locations by 1988. Prudential already operates 18 HMOs across the U.S.

The Prudential program will involve heavy consumer advertising, a first for Prudential, which currently targets corporations only.

"We've never done [consumer] advertising for the group insurance," says Rollin Lacy, Prudential's vp for north-central group operations in Minneapolis. "But now we're going to be heavily involved in the advertising business."

Humana, an 87-member network, probably is the leader in developing a national system with Humana Care Plus, a PPO type arrangement with a self-funded group insurance plan that encourages use of the Humana network, or a $500 deductible for use of non-network hospitals, says Elroy Schuler, director-marketing, hospital division. Humana is recruiting new network members and plans more product-oriented advertising in 1986, he says.

Regional companies also are getting involved in networks through joint ventures.

For example, ChoicePlus, introduced this month by Group Health, Minneapolis, combines group insurance benefits from Prudential with Group Health's own HMO.

ChoicePlus is one of a growing number of hybrid-type arrangements that give consumers the option of using HMO facilities at no cost, or fee-for-service physicians with a co-payment.

Its introduction in Minneapolis-St. Paul, considered the most competitive healthcare market in the U.S., is a sign of what lies ahead for the rest of the country, says Leonard Schaeffer, president of Group Health.

"HMOs are the wave of the future and the step beyond is this type of combination plan," he says.

Stephen W. Brown, a marketing professor at Arizona State University, Tempe, says the healthcare industry is moving from one that is supply driven to one that is market driven, which means advertisers increasingly will emphasize such factors as price, quality, availability and convenience of service.

"These health plans could be the kingpins someday in dictating how healthcare is provided," Mr. Brown says. —*R.E.*

Insurers writing new healthcare policy

By Diane Lynn Kastiel

A new and aggressive healthcare provider has emerged from the metamorphosis of the healthcare industry—the insurance company.

Insurers are not conducting physicals or delivering babies, but they are organizing networks of doctors and hospitals to provide healthcare services such as these to their policyholders.

Responding to demands from policyholders protesting 25% yearly increases in healthcare premiums, insurers are offering alternatives to the traditional fee-for-service healthcare delivery system. The most common of these alternate delivery systems are known as health maintenance organizations and preferred provider organizations.

Insurers aren't alone in marketing such services. Their competitors include hospitals, doctors and entrepreneurs organizing similar healthcare delivery systems.

"It's necessary [to offer these alternatives] to stay in business," says Richard Freiburger, vp-healthcare cost management for Equitable Life Assurance Society of the United States in New York.

"You have to offer it or someone else will."

Although many of these alternative delivery systems can be incorporated into traditional group health insurance plans, some, such as HMOs, circumvent traditional health insurance by offering unlimited care for a prepaid subscriber's fee, which replaces the traditional health insurance premium—and takes money out of insurers' pockets.

"There's an increasing trend in terms of HMOs penetrating the insurance business and part of the impetus for insurance companies to get into HMOs is to keep the business," Mr. Freiburger says.

But insurers also are marketing healthcare delivery systems that don't necessarily eclipse traditional insurance—such as PPOs, which designate cost-efficient providers but usually get reimbursement through an insured health plan.

"The future of healthcare is going to be in managed healthcare plans," says Mary DeVasto, director-marketing for Hancock Preferred, the PPO from John Hancock Mutual Life Insurance Co. in Boston.

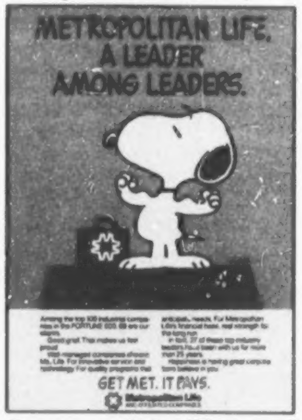
"And, a couple of years ago, it became clear that if John Hancock was to remain a viable force in the marketplace, they were going to have to get into this."

Although some of the major insurers are still in the early marketing stages of their alternative healthcare delivery systems, those up and running are becoming increasingly aggressive with their advertising, using a variety of media—tv, radio, trade publications, consumer publications and direct mail.

"It's a real competitive market, and we're going to do whatever we have to do to get our message across," Ms. DeVasto says. John Hancock uses radio, print and direct mail to advertise Hancock Preferred and is considering tv, she says.

Insurers are beefing up their ad budgets in response to this competitive environment. The Blue Cross & Blue Shield Assns., Chicago, will spend about an average of $8.5 million—for alternative healthcare advertising and promotion only—in 1985 and 1986, up from $7 million in 1984 and an average of only $1.5 million in 1983 and 1982.

And, CIGNA Health Plans, Inc., CIGNA Corp.'s HMO subsidiary based in Dallas, will spend between $200,000 and $1 million to advertise its HMOs in each of the 13 metropolitan areas where they are offered.



Snoopy and the "Peanuts" gang are leading Metropolitan Life's campaign to overhaul its image.

The biggest challenge insurers face in advertising these alternative healthcare delivery systems is getting their message to two distinct groups—employers and employes. Both groups are potential buyers of alternative healthcare.

Employers buy alternative healthcare delivery systems as part of their employe benefits program. Employes can choose between alternative healthcare plans and a traditional, fee-for-service plan. Rarely do employers not offer a traditional healthcare option along with an alternative healthcare option.

Both employers and employes are concerned with the quality, availability and cost of the delivery system, especially as employers require employes to pay more for healthcare and offer them more choices.

"It's imperative in this complex world, where healthcare costs are such a threat, to communicate to not only the major corporate decision maker—the chief executive officer or benefits manager—but to the end user as well—the employe," says Andrew Brennan, director-group insurance marketing for Metropolitan Life Insurance Co. in New York.

"We have to integrate the employe to have the active involvement of the end consumer. They can only make an intelligent decision to use that product or service when they know about it—when they're educated," he says.

Metropolitan's MetLife HealthCare Management Corp. subsidiary markets HMOs in St. Louis, Cleveland and Louisville and wants to offer its product nationwide eventually.

The company's Met-Elect PPOs are marketed in about 20 cities, including Miami, Los Angeles, Dallas and Chicago and eventually will be nationwide, Mr. Brennan says.

Metropolitan advertises both its HMO and PPO products in business and consumer publications, including *Fortune*, the *New York Times* and the *Wall Street Journal*.

Its first barrage of ads were black and white—and serious. Large, block letters dominated the page. "When it comes to containing health costs, hospitals know we mean business," one says. Another declared: "Our last word on containing health costs: Action." Copy explained exactly what Metropolitan's healthcare alternatives offer. The ads also included a coupon employers could send to get more information.

"We approached it in a serious vein and educated people," Mr. Brennan says. "Now we're ready to go to the next level. It doesn't have to be a drawn-out, gray, three-piece suit type of approach to be effective."

The next level is anything but a gray, three-piece-suit approach. Snoopy and the Peanuts comic strip gang are now the official representatives of Metropolitan for all lines of business and ready to spread the word about the company's healthcare products.

(Continued on Page 20)

Product

(Continued from Page 18)

being tied together by insurance packages that offer consumers a variety of options from prepaid health plans, such as HMOs, to traditional insurance packages that reimburse medical expenses on a fee-for-service basis, or a hybrid combination of both.

"The healthcare industry is moving from a cottage industry with lots of mom-and-pop operations to one that resembles other industries," with mergers, acquisitions, joint ventures and other hallmarks of big business, Mr. Brown says.

But these developments also signal an impending shake-out.

"There's going to be a huge blood bath," he says. "The big companies with financial power can wait it out, but a lot of smaller companies won't be around after a couple years. We've never seen an industry buffeted by so many changes—not in our lifetimes."

Now, Healthcare Marketers Can Go Directly to

THE SOURCE

in 40 U.S. Cities

DataNational, America's largest healthcare directory publisher, is now accepting national and regional advertising in 40 hospital - medical - dental - health market directories in 1986. When you advertise in "The Source", you get total healthcare market penetration and daily, year-round frequency with these heavily-used resource directories, including listings for every healthcare professional. A **limited** number of color pages and covers are available.

Shorter patient stays dictate new game plan

By Beverly Montgomery-Karp

Selling to hospitals is a whole new ball game. The goal now is to shorten the hospital patient's stay, and ad executives need to remember that when marketing products to hospital administrators, says Karen York, chief executive officer of York Alpern/Doyle Dane Bernbach, Los Angeles.

"Until two years ago, hospitals set their own prices and could count on insurance or Medicare/Medicaid to pay whatever the hospital charged. There now is a limit to hospitals' reimbursement for each patient," Ms. York says.

Since 1980, Medicare and Medicaid have paid most healthcare bills for one of every five Americans. As a result, hospitals faced enormous consequences when the federal government changed the Medicare payment structure in 1983.

"Hospitals started pushing patients through the door faster," says John Reiff, president of JRA/Marketing Communications, Philadelphia. "Hospital administrators suddenly had a drastic need to control operational costs.

"They became concerned that nearly 70 cents of every dollar spent within the hospital goes for labor. Administrators began looking for labor-saving devices," he says.

In response to these changes, some hospital vendors modified their selling messages.

Advertisers "used to talk about technology, the quality of care, design of equipment and convenience the products offered to physicians," Ms. York says. "We're directly addressing the administrators' needs now: Shorter patient lengths of stay and limited reimbursement funds."

In national surveys, administrators indicate that the increased pressure to contain costs has changed some of their purchases, says Joyce Jensen, marketing director at National Research Corp., Lincoln, Neb.

Hospitals have become bigger purchasers of advertising services, market research, strategic planning and consulting services. "And they're adding sales people to the hospital staff to actually sell hospital services to consumers or employers," Ms. Jensen says.

National Research Corp. has documented increased sales by hospitals to consumers. "From June, 1984, to June, 1985, hospitals increased by 8% the amount of durable medical equipment [walkers, wheelchairs, intravenous equipment] that they were offering to patients.

Many of those supplies are for outpatient services. That business has become increasingly common because Medicare doesn't yet use the pricing restrictions on outpatient care.

For expensive purchases, hospital executives are shopping more carefully than they did two years ago, Ms. Jensen says.

Hospitals are renting or sharing some of the major equipment with other hospitals. "That's true even to the extent of putting some radiological equipment on a truck and moving it from hospital to hospital," Ms. Jensen says.

"On computer purchases, the administrators try to decide whether they should buy the more expensive, integrated system with capacity to network the entire hospital," Ms. Jensen says.

"The computer definitely is one product that is up in sales," despite hospital cost-containment pressures, says Marla Shelton, marketing communications manager for American Hospital Systems, a computer services group located in McGaw Park, Ill.

The division's parent company, American Hospital Supply Corp., Evanston, Ill., has been in the hospital market for more than 60 years and is known for an aggressive sales force. It recently was acquired by Baxter

Patient

(Continued from Page 31)

Travenol Laboratories, Deerfield, Ill., one of the biggest advertisers in medical and hospital publications. American Hospital Supply generally doesn't allow much advertising of its products. Ms. Shelton's division is an exception.

"A lot of the advertising this division uses is image advertising. I don't want to get too specific in the ads, because there is too much data to deal with in these products," she says.

Another marketing tool used by Ms. Shelton is "seminars that both prospects and actual buyers attend . . . . A seminar is a good sales tool. It educates the customer."

Mr. Reiff of JRA/Marketing Communications says he advises clients that if the product being sold is a contract management service, "the best way to reach people is through seminars as well as trade shows."

Seminars have been very successful for International Clinical Laboratories, Nashville, Tenn., says William O'Neil Jr., president. The company's market is made up of laboratories. Forty per cent of ICL business comes from hospitals, "And the hospital side of our business is getting bigger," Mr. O'Neil says.

He explains that one year ago the company added free seminars to its marketing mix. "We were looking for a new vehicle to communicate with people in the hospitals. With these seminars, administrators don't feel like their arms are getting twisted. Instead of a direct sale, we're talking with them about their problems."

Another marketing decision ICL made was to keep a lid on prices. "We decided that instead of raising prices, we would tighten up on our costs," Mr. O'Neil says. That decision has paid dividends; the "number of hospital laboratory agreements has increased 50% in the past year," he says.

Other healthcare companies have tried different marketing innovations.

Scott Dillion is manager-group development at Fischer Mangold, Pleasanton, Cal., a company contracting to manage hospital emergency medicine and ambulatory care services. He says most of the healthcare industry has not reached the stage of full lines of "brand" marketing.

"But our entire marketing staff—and much of the sales staff—are old Procter & Gamble people. Our strategy is to sell the emergency room as one hospital product line that could deliver more revenue."

Fischer Mangold recently completed a telemarketing experiment. "It was a two-week test. In 220 phone calls, hospital chief executive officers were reached on the phone 72% of the time. We were able to make appointments right then to see 22% of them. And nearly three-fourths of the people we called on asked that Fischer Mangold draw up a proposal for the hospital," Mr. Dillion says.

In addition to advertising in national hospital publications, the company is about to begin advertising in regional healthcare publications. Testimonial ads will be used, "because so much of the readership will know the person giving the testimonial," he says.

Mr. Dillion believes that for companies selling services, the testimonial may be "not only effective, but perhaps even critical."

But much of the healthcare industry involves manufactured goods. For that client, Mr. Reiff encourages the use of direct mail and trade journal advertising.

Ms. Jensen of National Research says: "Manufacturers once sold heavily at the department level. But today you need to involve not only the end user [nurses or physicians], but the one who makes the decision to buy, the administrator."

Additional changes are influencing healthcare sales. Many administrators believe their hospitals traditionally purchased supplies from too many vendors. Those administrators have decided to bargain with key vendors.

"Eighty-six per cent of hospital administrators are trying to standardize products to cut costs," Ms. Jensen says.

"We've gotten discounts on nearly everything we purchase," says Howard Goldstein, executive director-finance at the 614-bed Hahneman University Hospital, Philadelphia.

He says Hahneman purchases $20 million of surgical and medical supplies annually. "For a large portion of those supplies, do we want to go to 50 vendors? Or do we want to go to two or three vendors, from whom we'll expect big concessions on prices?"

At Hahneman, any contract for more than $500,000 has to be approved by the hospital board. "That happens maybe 20 times a year," Mr. Goldstein says. "At a smaller hospital, a $100,000 purchase might have as significant an impact on the over-all budget as the $500,000 purchase does on ours. So their board of directors may need to approve every purchase of $100,000 or more."

Several marketers indicate their agencies help prepare slides, charts and information packets for those hospital board presentations.

"Money isn't the only driving force in our purchase decisions. We're very concerned about the ease-of-use and the quality-of-care issues," says Vaughan Delk, Hahneman's assistant vp-support services. "And will the equipment be on the market a year from now, or two years from now?"

This fear of obsolescence is echoed by other hospital administrators, physicians and nurses.

"I strongly believe that too many vendors are concerned mainly about their sales this year and next. They don't have a five-year plan," says Charles S. Lauer, publisher of *Modern Healthcare*, Chicago, a Crain Communications Inc. publication. "To get a leg up on the competition, you need to develop products that won't be out of date in five years.

"Then the vendor needs product-specific ads that will convince the reader. Instead, too many ads I read are image ads filled with puff. They say: 'We are the best. We give you quality.' But they don't say anything to convince the reader."

They all laughed when I stepped up to the operating table. But when our team cut right to the heart of the marketing problem, our clients called the strategy we created "the most innovative, action-oriented program" they'd ever seen.

Join the Fortune 500 companies, medical centers, ad agencies and pr firms that call on the specialists with marketing skills backed by direct experience in healthcare delivery.

Drug companies reach into mixed marketing bag

By Jaan Kangilaski

Prescription drug marketers will reach into their medicine chest of marketing tactics and spend about $3.5 billion in 1985, equal to about 20% of the $17.3 billion of "human dosage products" that they expect to sell, according to the Pharmaceutical Manufacturers Assn., Washington.

The cost of marketing and promoting ethical pharmaceutical products is difficult to ascertain. A Federal Trade Commission study in 1976, the last of its kind, put the cost of marketing at 20.6% of the $7.7 billion in industry sales. Although the totals have gone up, agency executives say the proportion of ad spending to sales probably has stayed the same.

Traditional product advertising in scientific journals accounts for 24% of advertising efforts, direct mail about 6% and detail staff for another 20%. Half the marketing and promotion dollars go to happenings, product related exhibits at scientific meetings, special symposiums for select groups of doctors and an assortment of single-sponsor publications ranging from monographs to newsletters, special interest magazines, tapes and videocassettes.

Many doctors have special radio receivers on which they listen to the Physician's Radio Network, New York, for medical news and prescription drug commercials. The program is supported by most major pharmaceutical marketers.

Doctors also watch satellite transmissions of lectures and round-table discussions, often with the opportunity to ask questions of the experts and to earn Continuing Medical Education credits.

One major New York healthcare agency estimates about 65% of its billings cover printed materials, about 10% are for medical convention activities, and 25% are on happenings—the greatest growth area.

While the relative importance of happenings is increasing, journal advertising is down, in part because dollars have followed products reclassified by the Food & Drug Administration as over-the-counter drugs.

However, the American Medical Assn., expects 1985 billings to reach $36 million, up 13% from 1984, for the 11 periodicals published by the Chicago-based association.

Agencies that direct their efforts to the healthcare professionals tend to be wary of the otc switch. Marketing to the public calls for a different approach and different skills.

The impact of the medical products agencies' entry into the proprietary drug marketing field is not yet clear. One veteran agency executive, who asked not to be identified, says the switch to otc status is increasingly confusing to the consumer because of a lack of bona fide therapeutic breakthroughs and a basically static market that has brought a proliferation of product forms.

The same executive has doubts about the impact agencies and companies with an ethical pharmaceutical products background are likely to have in the $7 billion to $8 billion proprietary drug market.

"When you look at their ads you'll see they are not addressed to consumers' needs," he says. "They're long on fact and short on emotion."

"The key is to gain professional approval for the product. Ultimately it does not matter what kind of pressure the public may generate—the basic decision still rests with the doctors," says Jeftyn Portugill, vp, PRISM (public relations in science and medicine), division of BBDO Health and Medical Communications, New York.

Paul J. Abrams, senior vp of Ketchum Advertising/New York, sees little real difference in advertising either prescription or nonprescription products of Schering-Plough Corp., Kenilworth, N.J.

The key in selling to doctors is professionalism, with emphasis on facts. That means homework because health service professionals are aware no pharmaceutical product is perfect.

"You have to try to understand the product or service the client wants," says Ted Klein, president of Ted Klein & Co., New York. "You have to understand what the product will do, what it won't do, and what questions the doctors are likely to ask about it."

When Merrell Dow Pharma-

A lucky guess is OK... when you're lucky.

Chilton Research Services. A way to base business decisions on what's happening. Not what you think might be happening.

In business you need to know exactly what outcome a course of action is likely to bring. Which is why Chilton Research is proving to be an invaluable tool for decision makers.

We start by combining the best in human and technological resources. The result is research studies pinpointed to exactly what needs to be known.

Positioning a product, for example, requires defining the market and interpreting customer needs. Accurately. That calls for state-of-the-art data collection and analysis, careful planning and meticulous execution.

At Chilton your assurance of meaningful research is backed by the experience and professionalism of 160 specialists in statistics, marketing, communications, psychology, economics and data processing.

Whether your needs call for insight into specialized industrial markets or in-depth understanding of consumer attitudes, Chilton Research is ready. Give us a call.

Because research is the best way to ensure a lucky future.

A good reputation is the best recommendation.

- **Nuclear plants find out if tone alert works**
  CRS is currently conducting a three-year series of surveys to determine the effectiveness of nuclear power plant alert systems. Within 2 hours of the tone alert, CRS completes all interviews with a sample of representative households in the alert area to find out whether the siren was heard. Specific areas are then identified for siren enhancement.
- **Industrial survey determined size of market for 30 products**
  Employing a two-phase approach, CRS conducted 3,000 CATI interviews in the United States and Canada to determine brand share and market size for 30 products used by craftsmen and manufacturers in 60 end-user classifications.
  A custom-designed program, based on incidences determined in phase one, was used to allocate optimal sample sizes for the second interview phase. This two-step procedure ensured greater reliability of results within each industry grouping.
- **Insurance survey probes needs of older Americans**
  To determine the perceived coverage shortcomings of Medicare, 1000 CRT interviews were conducted with Americans over 65 about supplemental health insurance coverage. Results are being used to design health insurance programs that better meet the needs of the elderly.

Drug

(Continued from Page 35)

ceuticals, Cincinnati, was preparing to introduce the new antihistamine Seldane, it commissioned a national survey by the Opinion Research Corp., Princeton, N.J., a subsidiary of Arthur D. Little Inc. The survey found that 62% of allergy patients don't always take their medication because they regard the resulting drowsiness as a worse problem than the allergy.

Opinion Research presented the findings in March as a scientific exhibit at the allergists' national meeting in New York. Allergists knew about drowsiness as a side effect of antihistamines, but they didn't know the extent of noncompliance.

Seldane had not received FDA approval for routine prescription at the time of the meeting, so there was no visible effort at product-oriented promotion. "We certainly would have hit that, and hit it hard, if the clearance had come through in time," says Lawrence J. Lesser, chairman-chief executive officer of Medicus Intercon International, the New York agency that handles the account.

The results from the meeting were "very dramatic," he says. "Even though we missed a significant part of the high allergy season, the projected sales for 1985 far exceed the original expectations.

The Seldane promotion was simplified because the drug had been approved for use in Europe years earlier. As a result, the experience of some widely recognized foreign doctors was available for promotion.

"A visiting expert is more convincing from a doctor's point of view than any presentation, no matter how creative or elaborate," Mr. Lesser says.

That's fine with him and other agency officials, because many Continuing Medical Education programs rely on presentations by visiting experts, whose travels often are sponsored by pharmaceutical manufacturers.

Some of these presentations are simple podium lectures, others are much more elaborate with three to eight experts. Doctors in the audience may get a booklet containing reprinted articles or an audio or videotape cassette.

Since the mid-1970s many national medical meetings have used closed-circuit tv. Drug companies have been making educational grants to help pick up the tab for such programs.

Variations of the technique are used for more direct marketing. "We recently used teleconferencing to introduce a new product used by dentists in this way," Mr. Klein says. "Every dentist in New York state was sent an invitation to call a free number to listen to the presentation and ask questions. Afterwards we sent all 1,500 dentists in the state a transcript of the question and answers, along with other material."

Selected doctors also may be invited to a meeting where they can listen to and mingle with the experts. Some of these promotions are very elaborate.

In 1982, Stuart Pharmaceuticals of Wilmington, Del., and its British parent company, ICI Ltd., flew cardiologists and their spouses to the French Riviera for a weeklong symposium on Tenormin, a beta-adrenergic blocker used to treat heart disease patients. About 600 doctors from the U.S. made the trip to hear the scientific reports.

Many of these meetings are billed as research conferences, giving doctors doing research in the field an opportunity to compare notes and present reports that may be published later with drug company support.

Occasionally the papers presented at a special symposium are published as a supplement to a scientific journal, with a note crediting the company with giving a grant to support the meeting.

Satellite broadcasting has added a new dimension to the special symposium: Transmission of its proceedings to meeting halls around the country. While the focus will be a medical problem, the company's products are likely to be mentioned during the discussion.

Pharmaceutical marketing also involves getting coverage by the medical press. *Medical Tribune, Medical World News* and similar publications are thick with prescription drug ads, and their reporters often are invited to cover invitational symposiums. Drug companies also retain agencies to publish newsletters and more elaborate periodicals aimed at specialists. The bigger medical organizations publish bulletins or convention newspapers—largely supported by pharmaceutical advertising—at their annual meetings.

Pharmaceutical marketers may even sponsor publication of a special tabloid-size newspaper devoted to a single meeting on a major medical problem like cancer and mailed to thousands of specialists in the field. Medical Publishing Enterprises of Fair Lawn, N.J., has done this for the past two years for Boehringer Ingleheim Pharmaceuticals, Ridgefield, Conn.

Boehringer Ingelheim's product—Torecam—is not an anti-cancer drug but an anti-emetic used to treat the nausea and vomiting that are a side effect of many anti-cancer treatments.

But what do you do when the product is an antibiotic that is administered in the hospital by intravenous drip? The key people in this case, according to Mr. Klein, are the hospital pharmacists and members of the hospital drug committee. The promotion was aimed specifically at these groups—after Mr. Klein found the product's particular appeal.

He held two invitational meetings for pharmacists from major hospitals and asked their opinion of the product, discovering that many of the pharmacists did not like the stopper on the bottle. "What these people are concerned with are price, effectiveness, and ease of handling," he says. "You find out what appeals to them, and concentrate on that."

Production editor Pat Gray Thomas coordinated this report on Healthcare Marketing.

Coming

Next week ADVERTISING AGE's Special Report will focus on Sports Marketing.

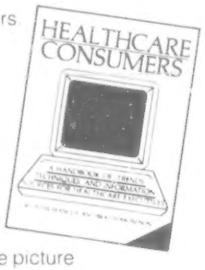
In order to improve your chances for financial survival and long-term prosperity, you, as a healthcare executive, must understand who your customers are, what they want, and how they are changing.

DO YOU KNOW HOW TO INCREASE YOUR SHARE OF THE HEALTHCARE MARKET?

Now you can get this information in *Healthcare Consumers: A Handbook of Trends, Techniques, and Information Sources for Healthcare Executives.* Written by American Demographics magazine, a Dow Jones publication, the Handbook will equip you to:

- Use information to promote your services
- Evaluate your performance against the total market
- Improve your advertising and customer relations
- Deliver and develop services more efficiently

Through the use of case studies, charts, graphs, and clearly-written text, the Handbook gives you a step-by-step look at the trends that are changing your customers.



It then shows you how to plug the facts into the four-part "Consumer Information System," which combines demographics, psychographics, media preferences, and wants/needs to give you a complete picture of your market's healthcare consumers. Order your copy today!

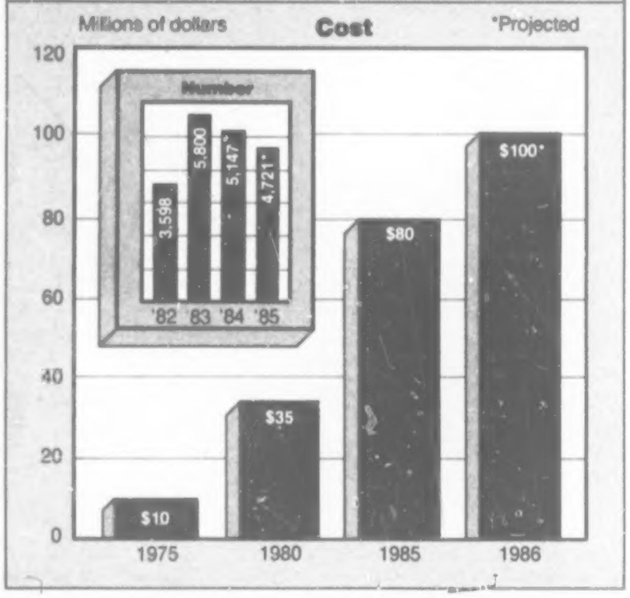
Megamergers

The mighty urge to merge

Launching new products

The cost of new products has increased tenfold during the 1980s, and is expected to top $100 million per launch next year. This has slowed the number of introductions (inset) while increasing the value of existing brand names. (See story on P. 46.) *Sources: Mark S. Albion, Harvard University, and Marketing Intelligence Service, Naples, N.Y. (inset).*



Big-name buyers bag brands

An Advertising Age roundup

In recent weeks, the business world watched as almost $15 billion and about 400 brand names changed hands in rapid-fire sequence. Before the dust began to settle, Procter & Gamble owned Richardson-Vicks, Philip Morris Inc. had General Foods, R.J. Reynolds Industries consumed Nabisco Brands and Monsanto took G.D. Searle & Co.

Three megacompanies cracked the $1 billion-a-year advertising barrier in the space of six weeks. Three different times the honor of being the biggest American advertiser was passed from one to the other, finally landing back with perennial leader P&G. And with Pantry Pride and Forstmann Little vying to pay about $2 billion for Revlon, and untold billions still on the prowl for food and healthcare companies, the dust hasn't settled yet.

No company is safe from acquisition, not even Beatrice Cos., which acquired Esmark last year. The hunters have become the hunted. Even P&G was moved this month to stagger directors' terms and adopt other antitakeover measures.

In the wake of this merger mania, brand managers went to work one morning to discover that someone new was sharing their offices. And its name was Wall Street. The brand name suddenly has emerged as the most coveted corporate asset of all. And with each megamerger, new marching orders are being written for marketers and brand managers.

In the past, brands contributed to the bottom line. Now, the bottom line is burdened with huge debt ratios incurred through acquisitions, and brand management is burdened with new and severe pressures to carry the day. Brands no longer are merely products competing for market share; they're annuities being plugged into the big-money equations of corporate acquisitions, and share is no longer, in itself, enough. Brand performance must prove the wisdom of what already is a $20 billion gamble and growing.

To Wall Street, the established brand name looks better than money in the bank. It has all the makings of a once-in-a-lifetime chance for the big to get huge. Fish can even swallow whales, as Capital Cities Communications demonstrated by acquiring ABC Inc.

It has become wiser to grab somebody else's established brands and extend the lines than spend $80 million or more trying to get a new name into the mix. Convinced it was on to something, Wall Street started measuring the value of brand names against new and different equations. When the calculating was over, Wall Street could argue that paying more

- **Agencies expect new** conflict rules to emerge as the rash of megamergers put brand accounts up for grabs. Page 47.

Last Minute News

Ally, FCB have huddled on merger: Wilson

New York—Ally & Gargano, which has been seeking a way to expand its international presence *(see related story at right)*, has had "recent" merger conversations with Foote, Cone & Belding, confirmed Allan Wilson Jr., FCB exec vp-finance. Mr. Wilson emphasized, however, that the talks are "not active at this point."

ATW says it's shedding 2nd account

New York—Advertising To Women says it has resigned a second account, Wella Corp., Englewood, N.J., with a $3.6 million budget, as part of its restructuring *(see related story on Page 6)*. At press time, president Lois Geraci Ernst had yet to announce any new "equity" accounts. The second resignation leaves her agency with Carlyle Custom Convertibles, the American Home Sewing Assn., G.D. Searle & Co.'s Tanner of North Carolina division and *Good Housekeeping*. Also, ATW vp-executive art director Ray Seide has moved to Campbell-Mithun, Minneapolis, in the new post of vp-creative director.

Triple Crown mounts sponsorship effort

Louisville—Triple Crown Productions has been formed to seek corporate sponsorship for the prestigious Triple Crown thoroughbred horse races. It will offer a sponsorship to one company willing to pay between $3 million and $5 million, sources say. The events—including the Kentucky Derby, Preakness and Belmont Stakes—are being marketed together.

Icahn's ax fells O&M, TWA exec

By BRIAN MORAN

New York—Carl Icahn's Trans World Airlines, in the first major sign that the leveraged buyout trend may damage the advertising business, fired Ogilvy & Mather last week, dismissed its top marketing executive and slashed its U.S. ad budget.

The dismissal of O&M, which had the $70 million account since 1979, also is the first significant operational change at TWA initiated by Mr. Icahn since that New York investor took control of the airline last summer.

Emma Hill, an analyst who covers both ad agencies and the cosmetics and household-goods industry at Wertheim & Co., sounded a note of warning for advertiser and agency executives. "These leveraged buyouts are not being made by marketing executives," she said. "When management that is financially sophisticated takes over a company with a leveraged buyout, using significant levels of debt to make the acquisition, their natural inclination is going to be to cut the advertising budget to improve earnings and help improve the cash flow and, ultimately, pay down the debt."

But not everyone agrees.

"I think the issue here is not leveraged buyouts as much as it is that this is the kind of thing that happens when there is an abrupt change in management," commented Kenneth Olshan, chairman of Wells, Rich, Greene/-Worldwide, a former TWA agency and currently the shop handling Pan American World Airways.

While TWA confirmed it had fired O&M, there still seemed to be some mystery last week about the status of the relationship.

A prepared statement issued by O&M indicated that agency apparently believes it has a chance to retain the account. In the statement, William Phillips, chairman of Ogilvy Group, said, "We have not as yet met with the new owners, but that is scheduled for

Ally splits with foreign shop group

By STEWART ALTER and LAUREL WENTZ

Ally & Gargano is splitting up the international network it helped found seven months ago.

The New York agency and London-based Grandfield Rork Collins International both are seeking new partners, though A&G hopes to keep some of its European affiliate relationships with agencies in the GRC network. GRC International consists of six overseas agencies with a total gross income of about $90 million.

"There were differences of agreement about how to proceed," said A&G chairman Amil Gargano, adding that the agencies' styles were "incompatible." A&G has retained Richard Seclow, who recently left his post as president of New York-based Geer, DuBois (AA,

HIGHLIGHTS

Buyout backlash hits ad business 1

Carl Icahn's Trans World Airlines, in the first major sign that the trend toward leveraged buyouts could be damaging for the advertising business last week fired Ogilvy & Mather, dismissed its top marketing executive and slashed its U.S. ad budget.

Net tv sales winds shift 3

Network tv sales divisions could soon be grappling with fundamental policy shifts in the way they sell their time, especially in the area of advertiser guarantees and commercial length.

Ford eyeing Alpha bet? 3

Ford Motor Co. may create an Alpha Corp. subsidiary that would parallel General Motors' Saturn Corp. The subsidiary would open the doors for an advertising agency assignment to handle the stand-alone Alpha nameplate and its separate dealer network.

Y&R gets a tough call 3

AT&T's consolidation of its $80 million Opportunity Calling program at Young & Rubicam comes as observers are terming the program too complicated to attract most consumers. An AT&T official acknowledged the promotion needs to be simplified, but said it will continue as long as it contributes to "consumer satisfaction."

Cognac on the upscale upswing 76

The quaffing of cognac among young professionals and ethnic groups in search of the good life is infusing the category with growth and spawning new products and line extensions. The category was up 16% in 1983 and 9% last year.

CONSUMER WATCH

Buyers' confidence shaken 84

A sudden tremor of uncertainty about personal and national well-being shook consumers nationwide as the third quarter ended. It has shifted downward buyer attitudes toward consumables, major goods and Christmas shopping plans. One in four Americans feels worse off financially than a year ago—the highest percentage in 18 months, according to the Advertising Age National Poll.

INTERNATIONAL

Ayer plays catch-up 58

N W Ayer is on the verge of buying shares of agencies in Spain, France, Germany, Brazil and Malaysia and is trying to buy into agencies in Hong Kong and Singapore. Spurring all this activity are two potential international clients: The U.S. Travel & Tourism Administration and Iberia Airlines. Ayer won the USTTA account last year and feels it has an inside track on acquiring Iberia's global account, via Spanish creative shop Tapsa.

Venezuela gets Big Mac attack 60

This fall Venezuela has become the second South American country, following Brazil, to sprout golden arches, but there is a catch: McDonald's Venta de Comida, a 100% Venezuelan-owned fast-food chain, says it has first rights to the trademark here and plans to open outlets later this year.

Another tobacco ad ban closer

By STEVEN W. COLFORD

Washington—Congress last week moved closer to doing to smokeless tobacco what it did to cigarets in the 1970s—boot its advertising off tv and radio and brand its packages and print advertising with health warnings of varying severity.

House legislation, sponsored by tobacco-industry critic Rep. Henry Waxman (D., Cal.), still faces a tough road when it moves to the full commerce committee, probably in November. Then, Rep. Tom Tauke (R., Ia.) plans to offer an amendment eliminating the bill's electronic-ad-ban provision.

The advertising industry, along with the Smokeless Tobacco Institute, is fighting both the House

ADWATCH

Cherry Coke takes fizz out of sister brands

By JULIE FRANZ

Despite the furor over whether new Coke will outsell Classic Coke, the success of Cherry Coke may be the real news.

Introduced nationally in July, Cherry Coke surprised everyone by making a splash at retail when Coke and Classic Coke were vying for shelf space. By mid-August a few retailers, when asked to compare Coke and Classic Coke sales, were saying that Cherry Coke was their best seller (AA, Sept. 2).

Initial network tv and radio spots position Cherry Coke as an "out and outrageous" alternative to other colas. And it looks like the $50 million spent to launch the product is getting a surprisingly strong and fast payback.

Cherry Coke's advertising made an impressive debut on ADVERTISING AGE's adWatch survey of advertising awareness last month, coming in at the No. 3 spot in the soft-drink category. With 2.7% first mentions, Cherry Coke bumped advertising for 7UP (2.1% of first mentions) out of its accustomed third-place ranking and back to the No. 5 slot. Dr Pepper held the No. 4 spot with a 2.5% share.

PepsiCo Inc.'s Slice, this year's other much-talked-about new soft drink, fell to eighth position (with 1%) in September after having been No. 4 for the past two months.

Meanwhile, Classic Coke is moving up in the survey. Last month it received 1.1% of first mentions to give it the seventh spot. Classic first appeared in adWatch data last month with 0.6% ad awareness to put it in ninth place.

With consumers recalling advertising for the various Coke sub-brands, awareness for "mega-brand" Coca-Cola continued to fizzle. Asked to name the first soft-drink advertising that came to mind, 43.1% last month named Coca-Cola, a drop of 5.8 percentage points from August.

Pepsi-Cola added 1.9 points to its awareness score, rising to 27.6%. That's the highest level of ad awareness Pepsi has gotten since it dropped 8.2 points to 24.0% in June.

Coke's lower ad awareness score isn't a reflection on the tv campaign that drops the distinction between Coke and Classic Coke (AA, Sept. 16).

Those ads only began airing as the September adWatch survey polling was ending. Any significant effect generated by the "We've got a taste for you" commercials is likely to show up in the next few months.

AdWatch is a joint project of ADVERTISING AGE and SRI Research Center, Lincoln, Neb. Ad awareness is measured by asking a nationally projectable sample of consumers to name advertising in a variety of product categories that first comes to mind from all seen, heard or read in the previous 30 days.

In September, 1,000 adults were questioned by telephone. Under adWatch methodology, an increase or decrease of 2.8 percentage points is considered statistically significant and attributable to more than sample variation.

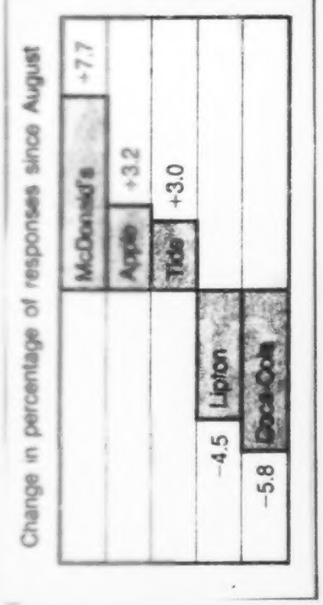
McDonald's was this month's biggest gainer, gaining 7.7 percentage points. The 43.9% share of first mentions in the fast-food advertising category was its highest level so far this year.

Consumers weren't as hungry for Burger King ads in September, and neither were they likely to remember Wendy's new theme "Choose fresh. Choose Wendy's." Ad recall for Wendy's fell 2.2 points to 12.6%, while BK's ad awareness continued its slide, last month dropping 2 points to 11.4%

(Continued on Page 98)

September winners & losers

Question: Of all the advertising for (product category) you have seen, heard or read in the past 30 days, which ad first comes to mind? *Note:* A change of plus or minus 2.8 percentage points is statistically significant. *Source: SRI Reasearch Center Inc., Lincoln, Neb.*



At this rate, we're truly breaking tradition.

The

time has come to do away with the long-established practice of charging national advertisers disproportionately higher advertising rates than local advertisers. That's why The Boston Herald has responded with The Preferred Position Package Plan, available to national advertisers only.

Not only will The Boston Herald tailor make a guaranteed position plan for your ads, you'll pay only $70 per column inch. This is a 42% discount off the regular rate.

Simply run 200 inches or more within a 30-day period. Ad sizes may be different and copy changes are permitted.

The Boston Herald Preferred Position Package Plan—a break in tradition and a break for you!

FDA policy targets food health claims

By STEVEN W. COLFORD

WASHINGTON—Food marketers eager to emulate Kellogg's winning All-Bran campaign should be pleased with the Food & Drug Administration's proposed policy on the use of medical or health claims to promote foods.

The agency's latest proposal eases present policy on what food marketers should not do, as well as on FDA enforcement of health claims, said agency sources.

It reflects a more encouraging attitude toward marketplace freedom, an idea that has split the FDA hierarchy into two camps: Political appointees and career regulators, who want a tight rein on food advertising.

The proposal maintains a hard line against any food marketer suggesting that its brand is superior to others.

"If it's proven that bananas are good for you, then they will be able to say that," an agency official said. "But United Brands couldn't say that Chiquita bananas from its eastern slopes are better for you than other bananas."

Another key element in the FDA proposal requires that full nutrition labeling be used by any food marketer who makes medical claims, according to the FDA official.

Perhaps the most controversial aspect of the original policy was the formation of a government committee to reach a consensus on dietary patterns and to develop "appropriate messages" for food marketers. That idea is retained in the latest version, according to the agency official.

But instead of suggesting that campaigns be "pre-cleared" by the committee, the latest version encourages "discussion" with the FDA before marketers decide on any health claims in labels. Marketers who fail to discuss their campaigns with the FDA or fail to use its "appropriate messages" risk agency action if their campaigns are found unacceptable by the committee.

Chaired by the FDA commissioner, the committee will include representatives of the Federal Trade Commission and various offices of the Public Health Service.

The latest proposal's specific criteria, according to a well informed source, include:

- Labeling should be educational.
- Claims will need consensus substantiation.
- Claims must emphasize the importance of a "total dietary pattern."
- Claims must not over-emphasize the role of a single food.

According to statistics provided to the FDA, there has been a 1% shift in the $4 billion cereal market toward high-fiber products in the last year. Kellogg Co., Battle Creek, Mich., which initiated its high fiber campaign a year ago, has won the lion's share of the shift, although rivals have made up ground in recent months with their own high-fiber cereals. J. Walter Thompson USA, Chicago, handles the Kellogg account.

Enforcement is downplayed in the proposed policy. It also represents a significant departure from

Mergers

(Continued from Page 1)

than three times book value for a company loaded with long-established brands made financial sense.

But there was one fundamental proviso. Wall Street had to assume that if a brand could be merged into a megaparent company with its own strong brands and big ad budgets, it could be marketed with greater clout and its share of market could be expanded.

Wall Street figured that if it could up the ante, the small players would fold their hands. Regional upstarts not already in the megaparent fold would have to stay close to home to survive.

If the upstart brand spent $50 million to go national, the megacompany could spend $75 million or $100 million to go against it. The megaparent would have the top creative talent at the biggest and most sophisticated agencies. Its own corporate brand management would have resources that no upstart could match. And by the sheer size of its advertising and promotional spending, the megaparent could meld its brand into its corporate family buy and effect media economies of scale that the upstart could never compete against.

Bigness, Wall Street calculated, would bring together the top marketing professionals and give them an outlandish competitive edge.

The call went out almost immediately to brand managers to find synergies between the businesses of the acquirer and the acquired. On the surface, the proud new parents could expect greater influence getting retail distribution as their sales forces approached store buyers with massive product families backed by $1 billion in ad spending and impressive promotion budgets. On the media side, the parents could figure that magazines would offer even greater discounts for the volume advertising of the megaparent. Tv stations would bend their cost-per-thousand rates for clients that before were important, and now were so huge they became essential. Networks could be played off against each other, on the premise that none of the Big 3 could afford to be cut out of the media plan of a $1 billion advertiser.

But the *assumption* of clout seems to far outweigh the actual consolidation of spending from the mergers. In the cases of RJR/-Nabisco and PM/General Foods, the parent company acquired another concern whose media philosophy was totally different from its own, and the media mixes did not match.

Only in the case of P&G/Richardson-Vicks did the new subsidiary bring any significant amount of ad spending to the parent's previous media strength. And in this case, R-V simply helped P&G to further its claim as the biggest tv spender in the world. In spot tv, P&G before the merger had led No. 2 spender PepsiCo by $85 million; now P&G leads by $108.2 million. And in network tv, where P&G had been spending $159.6 million more than No. 2 AT&T, the Cincinnati-based megaparent now leads by an astounding $200 million, nearly doubling AT&T's spending.

P&G already had clout in tv. The Richardson-Vicks acquisition simply added to it. Much of the R-V tv budget is used to back its cold remedies, primarily NyQuil, DayQuil and Vicks Formula 44D. Since those budgets are spent during the cold season and not spread out through the entire year, the $70 million R-V will add to P&G's tv spending will have impact greater than its dollar worth.

But exercising that clout is a more complicated matter than simply telling stations that what once was a $400 million tv spender is now a $470 million account. P&G handles network tv negotiations in-house.

R-V has its agencies make its buys. P&G also uses a complex agency-of-record system to purchase its spot tv time. Merging the tv budgets of P&G and R-V poses problems of assignment among agencies, and the outcome of that merger could have dramatic impact on the roles agencies play in the P&G roster, although things may shake out over time.

More immediate for the agencies is the entire question of who will hold and who will lose megacompany assignments. The megamergers have created numerous "soft" client conflicts; agencies may not be representing directly competitive brands, but their megaparent assignments could be jeopardized because the agency serves unrelated brands or subsidiaries of competing megaparents. The client-conflict question is under the

Mergers

(Continued from Page 38)

microscope now, and few observers expect advertisers to hold to previous strict interpretations, especially as further megamergers unfold.

That is not the agencies' only problem resulting from the megamergers. The pressure at agencies to stay on the megaparents' rosters is greater than ever, and agencies have to decide what resources to commit to keeping the megaparent brands without scaring off other clients worried that the best and the brightest at the agencies will be lost to them in favor of the bigger company *(see related story on Page 47)*.

Another aspect of the merger craze makes the agency community even more insecure. While advertising certainly played a critical role in making brand names valued assets, the motives for the acquisitions had little or nothing to do with the client-agency relationship. This despite the fact that each of the acquiring companies was itself a major advertiser and understood the value of good advertising and how it comes about. But even after the acquisitions were announced and completed in some cases, corporate management relegated the handling of potential conflicts to secondary considerations.

First, there is the business of accounting for just what was purchased, and then there is the difficult assignment of merging the two corporate cultures. Only then will the agency questions be addressed, and the final outcome will come in drips rather than in one sweeping rush.

In the acquisitions by RJR and Philip Morris, agency considerations played no role at all. The tobacco giants had lost favor with Wall Street, with many investment firms taking the cigaret stocks off their buy lists. A slew of product-liability lawsuits filed against the tobacco companies by persons or descendants of victims of cancer allegedly caused by smoking threatened the very industry itself, although there is now a strong movement afoot to have the cases dismissed and to have liability laws interpreted narrowly. And while Wall Street has soured on tobacco stocks, RJR is completing the largest, most technologically advanced cigaret manufacturing plant in the world in the quaint town of Tobaccoville, N.C., at a cost nearing $1 billion. This new manufacturing machinery will help RJR cut precipitously the cost of producing cigarets and should help boost profit margins.

But the tobacco industry is forecasting that 1995 cigaret sales will be 5% to 10% below 1985 levels, and once the savings from the improved manufacturing capabilities have been assimilated into its bottom line, where would RJR turn to improve quarterly return on stockholders' investments? Diversification into the food business should soothe Wall Street and get RJR's, and even Philip Morris' stock back up. RJR apparently thinks it has solved its problem. Earlier this month, RJR abolished its RJR Development Group, whose charter simply was to find corporations to acquire.

But why food companies? There is little synergy in distribution between food companies and tobacco concerns. Economies of scale must come from combined marketing clout and through the garnering of media discounts from the merger of huge, if divergent, ad budgets.

Bonnie Cook, an analyst with Salomon Bros, New York, explains the lure of food companies this way: "For the last four years food stocks have been outperforming the market. During the period of disinflation when commodity costs were flat or declining, it was a much more favorable environment for food stocks. In high inflation, people didn't want them [food stocks]."

In periods of high inflation, corporate raiders look for companies with tremendous cash flow, which explains in part why media companies became hotter takeover targets than food companies.

"The problem is, everybody is on a takeover kick," said Ms. Cook. "They want instant gratification. In the General Foods case, it was just a couple weeks from rumor to reality. That's so unusual. A normal deal is to spend two or three months lining up financing.

"There is speculative excess going on now. The market is not listening to any kind of reason."

P&G's acquisition of Richardson-Vicks had less to do with buying its way into entirely new product categories than it did with the prevailing theory that acquiring existing brands is cheaper and wiser than starting something new. There were also some apparent synergies, especially in distribution.

Hugh Zurkuhlen, another analyst at Salomon Bros., called the P&G buyout "a wonderful and rare leverage of P&G's balance sheet," predicting that P&G could still afford to compete in the acquisition waters.

"R-V and P&G have synergies in distribution and marketing channels, which will be helpful to both companies," said Mr. Zurkuhlen. "It appears, given P&G's [so-

Mergers

(Continued from Page 40)

so] success in new products, that it's easier to acquire existing products with name recognition [and market them heavily]. There's a question of what's the numerical value of a brand name? In today's competitive environment, P&G is buying a bunch of brands that it feels have great potential, and it's easier than starting from scratch."

Jay Freedman of Kidder Peabody added, "Conceptually, the merger is positive. It will give P&G exposure in businesses they've been trying to build; it will give them an entree into skincare and nutrition, and it will give them products in areas where they are already strong, like Vidal Sassoon haircare products. P&G is bringing most of the important distribution and marketing channels to the party. Richardson-Vicks, however, is noted to be strong in drug-chain outlets. The deal makes sense, but P&G paid a hefty price for it. Financially, they'll have to manage this deal very well in order to make it pay off."

The sheer size and marketing clout of the merged companies should give P&G and the others a marked advantage in making these deals pay off.

In a report prepared following the Beatrice acquisition of Esmark, Salomon Bros.' Ms. Cook wrote: "We believe that the [greater] spending ability is of major importance, since marketing and advertising expenditures are a key determinant of market share in the food industry. Even if competitors were to spend a larger percentage of sales on advertising and promotion, their absolute dollars would appear small relative to Beatrice."

Ms. Cook noted as an example of the power of clout the soft-drink and tobacco industries, in which two major companies in each industry dominate the expenditures behind new and existing products. "These companies have continued to gain a larger share of the market and have raised the cost of new-product introductions to almost prohibitive levels for smaller competitors," she said.

Following the RJR and Philip Morris acquisitions, Ms. Cook noted, "A $3 billion or $4 billion food company used to be large. Now they have huge dollars to contend with [from these even bigger companies] so there may be more consolidation just to be able to compete. It is being carried to the extreme. Marketing spending is very relevant when you only have 1% or 2% growth over-all because that determines a company's ability to market and push those products."

There are two primary ripple effects to this trend of consolidating companies and merging brand families. The media will be under mounting pressure to find ways to soften the influence the megacompanies will have over their own pricing structures, and several major brand-management teams will have to mesh, creating an entirely new culture in the purchasing of media time and space.

Magazines see little effect

Even before the mergers, R.J. Reynolds Industries and Philip Morris Inc. were the two biggest magazine advertisers. Their acquisitions just made each one bigger than before, although PM, with its acquisition of General Foods, gained on RJR in magazine spending. RJR, however, became the first advertiser to top $200 million in magazine spending.

The impact was less severe for Procter & Gamble's purchase of Richardson-Vicks, although P&G now is a respectable $65 million magazine spender.

Most magazine publishers seemed to think the megamergers would provide those companies with more clout with magazines, but none thought the clout would be able to make the publications break or drop their rate cards.

Philip Howlett, senior vp-magazines, Time Inc., said, "I rather like our chances with our magazine group in terms of this trend, because we have not been enormously strong in package goods in the past. A lot of these companies [General Foods, etc.] are suddenly moving into discount opportunities a company like Philip Morris had. Maybe they will take a more careful look at some of the propositions we've been putting forward, because the price may be right, too. I can see General Foods, with a number of its products, finding they'd like to try some of. . .these [Time Inc.] magazines." He is optimistic, though he realizes it "may not mean suddenly moving $50 million into magazines."

Robert Burton, president, ABC Publishing, added, "Two companies together have a lot more clout. You're not going to break rates [for them], but they're going to have clout." It has been his experience, with ABC Publishing's industrial trade publications, that when big companies combine, "you're not looking at the same kind of ad volume, you're looking at less. They're not going to need two schedules, they're going to

(Continued on next page)

Beatrice buy would break up Dutt's dream

By JULIE FRANZ

Kohlberg, Kravis, Roberts & Co.'s bid for Beatrice Cos. imperils former chairman James Dutt's dream of creating "a premier worldwide marketer of food and consumer goods" just as that dream was about to become reality.

Wall Street is firm in its belief that Chicago-based Beatrice will have to be broken up to finance the deal that includes a $4.9 billion cash transaction and the assumption of Beatrice's $2.5 billion debt.

Even with former Esmark chairman Donald Kelly and other former Esmark executives behind the transaction, the breakup of Beatrice to finance the deal, if successful, is almost inevitable, one financial analyst said. Mr. Kelly is known for an "if it's broke, sell it" management style, he added.

The financial community scoffed when Beatrice made its $2.7 billion bid for Esmark early last year. And rightly so.

The deal came after a complicated duel of one-upmanship between Chicago's two most powerful food-company ceos.

The duel began early in 1984 when rumors circulated that Mr. Kelly would bid for Beatrice. Beatrice stock rose to $32 a share from the mid-$20s. But Mr. Dutt stated unequivocally at a financial analysts meeting that spring that under no circumstances would he allow Beatrice to be acquired. That was followed by a statement from Mr. Kelly that the rumors were untrue. Beatrice's stock price dropped back.

Then, Mr. Kelly began a move to take Esmark private, backed by none other than Kohlberg, Kravis, Roberts. But Mr. Dutt spoiled the plan by making a play for Esmark, seemingly getting the better of Mr. Kelly. When the Esmark board looked like it was taking too long considering the Beatrice offer, Mr. Dutt put in a second, even higher bid.

While it may look like Mr. Dutt won, in fact Mr. Kelly got the last laugh.

The merger stuck Beatrice with nearly $3 billion in debt on top of an already heavy debt load. As ensuing quarterly earnings reports came out, each painting the same bleak picture, analysts continued to balk. Beatrice stock stood still at 33 and dropped off the buy list at several major financial houses.

As early as six months ago, Beatrice's financial results showed 46% of net income came from the sell-off of businesses, not the sale of goods and services (AA, May 13).

Now, for the first half of fiscal 1986, Beatrice's segment earnings are up nearly 10%, indicating a rise in both sales and the amount of profit reaching the bottom line. But net earnings for the first six months still were sabotaged by lingering merger expenses and the strong performance of the dollar abroad, slipping 26.2% to $128 million on sales of $6.22 billion.

Beatrice finally has everything going for it. The company's "We're Beatrice" campaign is producing 81% aided awareness among consumers. Retailers are lapping up Beatrice food products in anticipation of up to 18% higher sales during the company's multibrand promotions.

Corporate debt, which once reached $4 billion, or 70% of equity, is now at a more manageable 45% and will drop to 30% with the company's planned sale of its Avis, Pennaco, Danskin and International Jensen units, for which the company expects to get $300 million.

The ouster of former chairman Mr. Dutt and his replacement with William Granger Jr. boosted company morale and analysts' faith in the future of the company. During Mr. Dutt's chairmanship, beginning in July, 1979, earnings per share steadily declined and return on equity fell from 18% to 13%.

Mr. Dutt left Beatrice in a Catch-22 situation. While Beatrice finally is back on its feet financially, its brands have been merged, its corporate identity established, the company is without strong marketing leadership. In wielding his arbitrary ax, Mr. Dutt left Beatrice vulnerable to takeover.

But any concern looking to gobble Beatrice most likely would be stepping back 18 months, taking on massive debt and the bothersome project of meshing brands, just as Beatrice did with the Esmark merger.

Mr. Granger has said he is intent on doing "whatever is in the best interest of the shareholders. As far as I know, continuation of Beatrice as an independent company is in [the shareholders'] best interest," Mr. Granger told Advertising Age before the KKR offer.

Mr. Granger said the company is looking abroad for long-term growth, especially to the Far East, where developing markets such as China are ripe for the picking. As the standard of living increases in foreign countries, many U.S. product will begin to "fit nicely," Mr. Granger said.

Beatrice wants to keep a 70%-to-30% ratio of food to nonfood businesses, Mr. Granger said. The food business isn't affected by the economy, while nonfood businesses are more cyclical, he said. While most financial analysts are of the opinion that Beatrice will scuttle its Playtex operations, Mr. Granger said that "for the time being, Playtex fits well both domestically and internationally."

Consolidation of Beatrice's 104 agencies began a year before the Esmark merger and was reduced to the current 12 soon after. Beatrice looked for agencies that could handle large pieces of its business, and in which the Beatrice account would be important to the agency's billings. To that end, none of the 12 agencies has less than $10 million in Beatrice billings, according to senior vp-marketing Harold Handley.

Since the agency consolidation, Beatrice product ads have become more benefit-oriented and more strongly competitive. But most important is the creation of the $30 million "We're Beatrice, you've known us all along" campaign, via HCM, New York, that broke during the 1984 Winter Olympics, before the Esmark merger. The campaign for the first time tied together individual Beatrice brands under one theme. The campaign gave identity to Beatrice Foods, which until then had been a hodgepodge of 430 different brands.

Beatrice's agency reorganization also centralized its media buying, opening up volume discounts. All of Beatrice's network tv buying is done by either Leo Burnett USA or J. Walter Thompson USA, and all its print buys are handled by HCM.

Beatrice also is one of the few companies that can buy an entire freestanding newspaper insert. The inserts, running twice a year since January, 1984, have become the cornerstone of Beatrice's drive to tie its brands with the corporate name, Mr. Handley said.

By combining its brands, Beatrice has been able to develop a new posture with consumers and within the trade, Mr. Handley said.

Streamlining the distribution of Beatrice products by pushing them through the Swift/Hunt-Wesson, Beatrice Meats and Beatrice Dairy distribution systems should improve brand performance. While some of the products initially lost momentum, the system probably will work. But it's still too soon to tell what effect centralized distribution will have on brand performance.

"There's more reasons why it should than why it shouldn't [work]," said Paine-Webber food-industry analyst Roger Spencer.

While the system will cut costs, it also will endear Beatrice salesmen with retail grocery buyers, who now have fewer salesmen to see when buying Beatrice foods items.

There's no question that a genuine new-product introduction is more expensive than a line extension, Mr. Handley said. And a line extension is less risky. The key is the price-value relationship of the new product. Frequently, there are opportunities to introduce a product with a higher price-value relationship than any other on the market.

Beatrice already has said it will concentrate on wooing retailers as well as new-product and line-extension activity, which have virtually ground to a halt during the first 12 months after the merger (AA, Sept. 9).#

Mergers

(Continued from Page 44)

need one schedule."

This may not necessarily be true with the package-goods companies' mergers; in the PM-GF case, "because the companies are so diverse," he said, there is little chance of both folding their ad efforts into one corporate campaign.

Jack Rehm, president, publishing group, Meredith Corp., said the mergers will "generate bigger and bigger discount opportunities for many companies, now that they are consolidated." But the discounts being offered now—usually corporate discounts, also called volume discounts, offering lower rates if a company runs its many different brands in a magazine—"are pretty aggressive," he said.

In some cases, though, a company that might not have been large enough to earn maximum discounts might now benefit, he said, since Procter & Gamble would be earning maximum discounts.

Mr. Rehm does not envision dramatic changes at GF. "General Foods is a very well run company, a very sophisticated marketer. I don't think anyone would want to change that. I don't think this would lead to dramatic changes in the way they do business."

As for the issue of giant conglomerates periling magazines' independence, as more and more eggs wind up in a smaller number of baskets, Mr. Rehm said, "That may be a theoretical concern, but, practically, what do you do about it? I don't think this is a quantum change; we've always dealt with big companies generating huge amounts of business."

Lynn Mapes, vp-associate publisher, *Reader's Digest*: "When you add the Philip Morris discount to General Foods advertising, magazines that carry a lot of tobacco ads are a lot more attractive to General Foods than a week ago."

Tv-rate savings spotty

Except in a few instances, the top tv buyers don't necessarily have an advantage on a spot-market basis in tv advertising. There are local and regional advertisers who wield even more clout, such as Hardee's in Atlanta or Jack in the Box in Los Angeles.

What the big spot-tv spenders, such as Procter & Gamble and General Foods, have done to overcome an inherent disadvantage in markets such as Denver or Tucson, where they often are outspent by the local supermarkets, is to go to a "market specialist" and agency-buyer-of-record system.

In this system, one agency—and sometimes one buyer—buys for an individual market or group of markets, for all of the client's brands. The agency stays on top of ad rates, marketplace pressures, unusual conditions and other developments that affect pricing.

In network tv, the megamergers could have some impact on negotiations. P&G can add Richardson-Vicks' network spending to its own massive total, and perhaps extract from the nets even better rates than it receives already. However, Philip Morris Inc. and R.J. Reynolds Industries had some units using tv, but the core of their businesses—tobacco—is banned.

Papers' rate gap may close

Newspaper-industry executives expect to feel more pressure from newly merged package-goods giants as the advertisers seek more efficient ways to buy media.

Already, agencies and clients have approached marketing divisions of media giants such as Gannett Co., Taft Broadcasting Co. and Times Mirror Co., looking for "omnibus" deals comprising newspaper, tv, radio and outdoor buys (AA, Sept. 2). Now, newspaper sources expect added pressure from more powerful conglomerates to end the widening gap between national and local ad rates.

Most major dailies charge 40% to 187% more for national insertions than for those at the comparable local rate. Although intended as a bonus for retailers in a newspaper's primary market area, the local rate has increasingly been extended to certain coveted national advertisers as a means to stave off competition from other media.

Since budgets for many national advertisers' print media buys are often set well in advance, the immediate impact of mergers such as the Philip Morris Inc.-General Foods combination may be minimal. Most media reps deal on an agency-by-agency basis for each of a client's products.

But with mergers now allowing advertisers to cut deals more efficiently on widespread newspaper buys—including run-of-press, Sunday magazine and freestanding inserts, for example—the use of centralized media buying and even in-house services may become more prevalent.

Recently formed sales units such as Times Mirror National Marketing and Gannett Media Sales clearly stand to gain the most from such arrangements, because a single call to one of their sales reps can often reserve discounted space in several markets. Some of those independent companies, in turn, have responded by selling recruitment and local ads and taking a commission of a paper's total ad revenues instead of dealing only with national advertisers.

But media companies less homogeneous than Gannett, for example, have had a rougher time making package deals. Tribune Co. has tried to launch its Tribune National Marketing Co. for two years to sell papers as diverse as the *Chicago Tribune*, the *New York Daily News* and the *Orlando Sentinel*.

But the differences among readers of each of these properties has stymied such an effort. Instead, the company has begun using focused Zip code-cluster research to sell its flagship paper with the *New York Times* and the *Los Angeles Times*.

Mergers freshen outdoor

Outdoor-advertising executives anticipate greater attention and, they hope, more ad dollars to be spent on outdoor advertising as a result of the megamergers among package-goods companies.

R.J. Reynolds Industries' past purchase of Del Monte brought more ad dollars to the industry, said John Mathis, senior vp-eastern sales manager, Foster & Kleiser, New York, the largest U.S. outdoor company. Also, Miller Brewing has spent more on outdoor ads nationally since its purchase by Philip Morris Inc., he said.

Jack Donahue, a spokesman for Institute of Outdoor Advertising, New York, said the experience that RJR and Philip Morris have gained in using outdoor may be transferred to their new subsidiaries.

Last year, RJR was the biggest outdoor advertiser, spending $86.9 million. Philip Morris was second with $55 million, compared with GF's $626,000 and Nabisco Brands' $123,000 last year.

Procter & Gamble spent only $849,000 in 1984 measured outdoor advertising, and Richardson-Vicks had no measured outdoor spending last year, so their merger isn't any great cause for excitement in the outdoor business.

Despite a soft year for liquor and tobacco advertising in outdoor—estimated off by 1% to 3% compared with 1984—outdoor ad sales are up about 8% over-all for 1985, Mr. Donahue said.

When Gannett Outdoor, second-largest U.S. outdoor company, formed the Outdoor Network USA this year, it vowed to pursue pack-

(Continued on Page 46)

Mergers up new-product ante

By JUDANN DAGNOLI

Just 10 years ago, it cost a company $10 million to get a new product off the ground nationally.

This year, the average cost of a new-product launch is hovering at $80 million.

And next year, that average cost will break the $100 million barrier, in large part because of the impact of the megamergers in package-goods companies.

"It costs more and more to buy shelf space [in stores]," said Mark Albion, professor of marketing, Harvard University, Cambridge, Mass. "That's why they're spending the money on mergers."

As the fight for shelf space intensifies, and as the failure rate of new-product introductions increases, the value of an established brand name increases for its parent company, he said.

Despite the high risk and high price, new-product introductions are running 8.5% ahead of last year, reversing a trend from the early 1980s. New launches in 1984, for instance, were down 11.3% from 1983.

But in the wake of the megamergers, Mr. Albion and other experts predict new-product launches may start to decline once again.

The merger of food companies also is expected to drive down the number of new-product introductions. New food-product introductions have been declining for several years, dropping 14.1% from 1983 to 1984. In the first nine months of 1985, there were 1,806 new food-product launches. In 1984, there were 2,681, according to Marketing Intelligence Service, Naples, N.Y. In total, food products account for more than half of all new-product startups.

While total new-product launches may have peaked, line extensions of existing brands should continue to increase. This is especially true if food companies continue to be acquired.

Mr. Albion, who is a consultant to companies such as Coca-Cola Co. and Nabisco Brands, said he knows of at least two or three more megamergers in package goods companies that will occur within the next few months.#

Mergers

(Continued from Page 45)

age goods and brand advertisers. Gannett Outdoor hired Jay Zitz, former product marketing director at Bristol-Myers, as vp-marketing and sales in September.

Cable cool to mergers

The merger mania has made two of the three biggest spenders in cable tv slightly bigger, but the medium itself has no room to make more favorable deals.

Agency sources said the impact in cable will be negligible on deal-cutting. The major advertisers, which include Procter & Gamble as the biggest and Philip Morris Inc./General Foods as the third largest, behind Anheuser-Busch already receive substantial rat discounts, and another $1 millior or so isn't going to leverage an substantial rate reduction.

If P&G wants to influence Ricl ardson-Vicks' spending patte and move R-V into the mediu beyond its current $1 million- year level, there may be more tot money for cable. If that happer there could be greater competiti among the cable networks to sna a bigger percentage of the total p but most observers believe cab will continue to be sold as a me dium for reaching upscale audi ences and not as a discount vehicl

Furthermore, Nabisco Brands a minority owner of ESPN, yet spends only $1.7 million a year cable. RJR brands spend a paltr $800,000 a year, and few observer expect this to increase much.

Dan Lawlor, vp-sales, USA Cable Network, said, "Cable is very efficient medium as it is, ar rates can't go lower than they a now. I cannot envision the mark place becoming any more compe tive."

Radio outlook static

Radio will be affected minima by the pending mergers. With t exception of Philip Morris I which taps the medium on a sp basis for Miller Brewing, none the companies are heavy rad spenders.

Procter & Gamble, however, ha initiated network radio campaigr for a number of brands in the las year, notably for Crest and Luv Some observers think the compan will join the ranks of top spende in the medium by the end of th decade. Richardson-Vicks spen less than $2 million in both sp radio and network.

R.J. Reynolds Industries also is light user of the medium, as is ne partner Nabisco Brands. Togeth both spend less than $10 million radio, and it remains to be see whether the merger will affect this spending level, which has growr only slightly in recent years. Nabisco, another recent recruit to network radio, spent nearly $5 million in 1984 on a variety of feeds. It uses spot sparsely.

General Foods, too, is a light user of both spot and network. Spot expenditures in 1984 were $2.9 million, mostly in support of product tests and new-product introductions. Network spending was $1.7 million. New partner Philip Morris is a heavy user of local radio. The company supports numerous local sports franchises across the country via radio and tv.#

YANKEE®
Where Reading Is Believing

Tie-in deals abound for 'Rocky IV' movie

By JAMES P. FORKAN

New York—MGM/UA Entertainment Co. and MGM/UA Licensing & Merchandising hope their "Rocky IV" movie and extensive tie-in plans will pack a powerful one-two punch this holiday season.

More than 30 companies have been licensed to sell scores of "Rocky" products in the U.S. and Canada alone, said Carole Orgel, account exec at the New York-based licensing operation, compared with only a few for the three previous movies starring Sylvester Stallone as the all-American rags-to-riches boxer nicknamed the "Italian Stallion." There also will be more international activity than for the past films.

Bill Dennis, vp-licensing and merchandising, said the biggest tie-in ad support will be on the U.S. promotional/premium tie-in front, where Pepsi-Cola and Church's Fried Chicken will mount a "major" broadcast campaign. That tv-radio budget will top $2 million, breaking on or near the movie's Nov. 27 theatrical release, he added.

Although the various licensees are not expected to back their wares with much media advertising, other than perhaps advertising to the retail trade, the products' retail exposure in a wide variety of outlets should go a long way to build awareness in the movie, MGM/UA officials believe.

The Culver City-based studio itself plans to support the movie with an ad campaign in the "$8 million-to-$10 million" range, via Wells, Rich, Greene, Los Angeles; a record 2,200 theaters will show the film this Christmas season, promoted by two trailers, the first of which already is being seen by moviegoers in 5,000 theaters.

The film, capitalizing on U.S. versus U.S.S.R. feelings as Rocky battles a Soviet fighter, is expected to gross well above $100 million domestically.

In addition, the Baskin & Robbins ice cream chain will promote November as "Rocky Road" month, Ms. Orgel said, adding that B&R also gets some exposure within the film itself.

Parker Pen also plans some media advertising for its "Rocky IV" pen, personalized with Mr. Stallone's autograph.

Waymart Knitting Co. will soon be marketing a coordinated unisex knit and woven sportswear line that, as "the official 'Rocky' apparel line," will duplicate the character's look in the movie. Other apparel products will come from Izod, Allison Mfg. Co., Axelrod & Wilson, Four Seasons, Winston Imports Corp. and Bandana King.

In toys, Appleworks will add an action figure of the new Soviet antagonist Ivan Drago to its "Rocky" line, also selling soft-sculpture versions and playsets built around Rocky, Ivan and continuing character Apollo Creed.

Among the half-dozen other toy licensees are Diamond Toymakers, Globos International, IJE/Kidstuff and Jak-Pak. Sports-related items include Safe-Play's jump ropes and boxing equipment and Zee Toys' bop bags.

A variety of other categories also anticipate being caught up in what is expected to be the next "Rocky" blockbuster, *e.g.*, Fenited Publishing (in-theater souvenir program), Jay Franco & Sons (towels), Hallmark Cards (cards), One Stop Posters, Starmakers (portfolios, posters), Starlog (poster magazine) and Topps Chewing Gum (trading cards). Aside from all the shelf space to be devoted to these products, Ms. Orgel said that various retailers have expressed interest in showcasing "Rocky"-themed boutiques, *e.g.*, Spencer Gifts.

Although it is widely assumed in the industry that there will be a "Rocky V," MGM/UA officials said their licensing deals "made no such assumption." In fact, most of the products refer to "Rocky" rather than "Rocky IV."

The "Rocky" series is one of the most successful in movie history, they added, right up there with MGM/UA's James Bond films, 20th Century Fox's "Star Wars" and Paramount's "Indiana Jones." CBS-TV, which repeated the first "Rocky" last August, plans "Rocky III" for Nov. 16 prime time.

Whether or not Mr. Stallone plays Rocky Balboa again, his visage will remain a long-term fixture on movie screens and retail shelves for years to come, thanks to his "Rambo" movies and the upcoming "Over the Top" feature, plus their various product spinoffs.

"Rambo: First Blood Part II," having ranked as the summer's No. 1 box office hit at $150 million-plus (via Tri-Star Pictures), pulled more than 20 licensees via Stephen J. Cannell Productions, Los Angeles, including Coleco Industries, which plans to market a "Rambo" action figure line next year. That toy line and other products should enjoy a long shelf life, thanks to the late January videocassette release of the first sequel (via Thorn/EMI Home Video) plus the possibility of an animated tv series and the summer, 1987, release of a third "Rambo" film.

Coming in between "Rocky IV" and "Rambo III" will be Cannon Films' "Over the Top," due next summer, a movie featuring Mr. Stallone playing a trucker who competes in arm-wrestling contests.

As might be expected, Cannon's tie-in promo plans will zero in on truckers in a series of arm-wrestling competitions planned around the country for this fall and winter. Besides competing for a Volvo White truck, featured in the film, some footage from the competitors' matches will be incorporated into "Top." Anheuser-Busch's Budweiser, which has tied into "Rocky," will help promote Mr. Stallone's "Over the Top" as well next year.#

Can Hush Puppies heal now?

By PATRICIA STRNAD

Rockford, Mich.—Wolverine World Wide is keeping hush about future marketing plans after announcing the selection of Needham Harper Worldwide, Chicago, as new agency for its Hush Puppies footwear division.

But the agency switch likely is intended to aid the company's whimpering sales and upgrade its puppy dog imagery.

Hush Puppies went to Needham after a five-month review that included an unspecified number of agencies (AA, Oct. 10).

The account is worth about $2 million, according to Leading National Advertisers. But analysts say ad spending is closer to $3 million to $4 million.

The Chicago branch of previous agency Wells, Rich, Greene, New York, was included in the review. Sources also named Della Femina, Travisano & Partners, New York, and Ogilvy & Mather, Chicago, as participants. O&M confirmed its involvement.

Hush Puppies has run into several problems in the past few years, most stemming from the influx of less-expensive imported shoes, said Fred Anschel, vp-analyst at Dean Witter Reynolds, New York.

"The entire footwear industry has suffered as a result of imports from Brazil, the Far East and other countries," Mr. Anschel said. Also, "a few years back Hush Puppies had design problems with their women's shoes and lost a lot of shelf space. It takes time to recover."

Wolverine's revenues, however, climbed to a record high of $379.6 million in 1984, though net income, at $2.2 million, had dropped a precipitous 86% from '81.

The company lost money in the first two quarters of 1985, but a "modest profit" of about $3.6 million is expected for the entire year, which would be a 64% increase from '84, Mr. Anschel said.

The marketer reported third-quarter revenues of $98.7 million, down only 0.02% from the same period a year ago. Net income was up 8% to $1.3 million.

After figuring in the first and second-quarter losses, '85 net income to date is $29,000.

Hush Puppies footwear accounts for slightly less than half of all Wolverine sales.

Wolverine is the nation's largest tanner of pigskin leather. It is combating foreign competition by importing about 20% to 25% of its shoes, including all athletic shoes, and by using more imported pieces in its U.S.-made shoes.

The Hush Puppies line is becoming more fashion-conscious and producing a variety of styles: In the late 1950s, it produced only traditional suede pigskin shoes. It has since broadened the line to include golf shoes, boots and smoother cowhide shoes for men and women.

"I think a turnaround is in the works," Mr. Anschel said. "Hush Puppies may have wanted a new approach [to advertising and marketing] or a new image to support [that upswing]."

This doesn't mean that the division will shed its sad-eyed basset hound trademark. Hush Puppies always has capitalized on comfort in its pigskin leather shoes—"when feet hurt they are much like barking dogs," a company brochure says.

"I can't say whether we'll continue with that strategy," said C.A. Wolfe, president of Needham's Chicago division. "It's really too early to tell. But it's always better to build on the strengths of a brand."#

AdWatch data valid, two researchers say

New York—Two researchers have validated the monthly Advertising Age adWatch report as a "useful indicator of effectiveness of a brand's advertising" in head-to-head marketing battles.

Writing in the August/September issue of the *Journal of Advertising Research*, Arch Woodside, marketing professor at Tulane University's Freeman School of Business, and Elizabeth Wilson of the University of South Carolina's college of business administration reviewed the results of a survey research study that included top-of-mind awareness (TOMA) levels for advertising of competing brands.

They concluded that a brand's share of consumers who identify the brand's advertising in the TOMA position "may be one useful indicator of effectiveness of the brand's advertising relative to the advertising of competing brands." Their supporting statistical analyses included adWatch's TOMA results for Coca-Cola versus Pepsi-Cola, and the Burger King-McDonald's-Wendy's campaigns.

In recommending that researchers use a constant-sum scale in tracking both TOMA and brand-preference measurements, Mr. Woodside and Ms. Wilson wrote, "Based on findings reported here, reading Advertising Age and SRI [Research Center's] adWatch reports is worthwhile." The adWatch series appears in AA on the last Monday of the month.

"Unfortunately," the journal article noted, consumer product brand managers too often do not include both TOMA and brand preference measurements in their research budgets. "Using a tracking research program of competing brand advertising and brand preference would likely increase the perceived accountability of the impact and importance of advertising in senior management."#

of first mentions.

BK's "Aren't you hungry?" theme apparently hasn't been able to stave off encroachment by McDonalds McD.L.T., its new sandwich that bears remarkable similarity to BK's Whopper.

McDonald's is scoring a hit by feeding the nation's craving for a lettuce-and-tomato-topped burger where, as McD.L.T. advertising claims, "the hot stays hot, and the cool stays cool." The McD.L.T. is McDonald's heir apparent to the slow-selling Quarter Pounder (AA, Jan 21).

The McD.L.T. already is backed by more than a half-dozen tv spots, surprisingly broad support for a menu item McDonald's still considers to be in test. The burger is available in about 50% of McDonald's 6,800 U.S. outlets.

Among other significant changes in the September survey results:

- Apple Computer reversed its six-month awareness decline in the **computer category** by gaining 3.2 percentage points to 28.9% of first mentions in September. The change may be due in part to the company's high news profile, as chairman Steven Jobs sparked controversy by leaving the company he had nurtured from its infancy. Apple hit its high for the year in February with 39.2% ad awareness. Apple's perennial competitor, IBM, garnered a 15.9% share of ad awareness. Commodore was No. 3 with 6.3%.
- The second-biggest loser in last month's survey, behind Coca-Cola, was Lipton Tea, falling 4.5 points to a 37.4% share. Lipton still is far and away the **tea category** leader. The next closest competitor for ad awareness, Nestea, registered 4.4% in September. Tetley commanded 3.6% of first mentions.
- Awareness for Procter & Gamble's Tide, down 3.6 points to 25.6% in August, regained ground in the **laundry detergent category** by rising 3 points to 28.5% in September. P&G's Cheer moved back into the No. 2 spot with 5.1%, up 1.1 points from 4.0% in August. Unilever's All, August's second-most-recalled laundry-product advertising with 4.1%, fell into the fourth spot with 2.9% ad awareness. Snuggle moved to No. 3 with a 3.1% share.
- P&G's Folgers and General Foods' Maxwell House are running neck and neck in the **coffee category**, where advertising for both brands came to mind first for 24% of the sample last month. The two have been playing leapfrog, with Folgers holding the top awareness spot for seven of the past nine months. To gain the tie, Folgers advertising rose 1.6 points, while Maxwell House, last month's category leader, gained 0.2 points.
- The **top 10** in over-all, unaided awareness (without asking for a specific product category) in September were, in descending order: Coca-Cola, McDonald's, Pepsi, Miller/Miller Lite, Budweiser/Bud Light, Ford, Pampers, Wendy's, Marlboro and Burger King.#

Hello, Mary Lou

Corporate America's newest sweetheart—and ubiquitous spokeswoman—is a 17-year-old, gum-chewing, 4-ft., 9-in. West Virginian. Olympic gymnast and gold-medal winner Mary Lou Retton already may have vaulted into history as the most successfully marketed athlete ever. Between September, 1985, and September, 1986, the marketers that are using Mary Lou will make $35 million in media buys. *See Page 20.*

Cover photo by Shelly Katz

Oh, Lord

Tom Mabley's recent move to Henderson Friedlich Graf & Doyle (billing $35 million to $40 million) as its exec vp-creative director, U.S., from a key position at the creative centrifuge of Lord, Geller, Federico, Einstein (billings $200 million), is not, he insists, *just* for a substantial chunk of equity. For one thing, he believes there are strong analogies between the two agencies. "Five years ago, Lord, Geller was about the same size as Henderson Friedlich is now," he says. "Billings were the same; so were the number of employes, and Lord, Geller was characterized by its creative work on small print accounts. . .which may not have billed much but which were considered very good advertising." *See Page 15.*

Presstime

FCB to get $20M AT&T job

Basking Ridge, N.J.—AT&T Communications next week is expected to award a $20 million assignment to FCB Direct, New York. Goal of the the effort is to ensure that consumers will keep or select AT&T as their primary long-distance carrier when they move. AT&T estimates that each year, of those households spending more than $11 a month on long-distance service, some 5 million to 7 million move. Other contenders for the account included Chapman Direct Marketing, DR Group, Ogilvy & Mather Direct Response and Wunderman, Ricotta & Kline.

Interpublic profits gain

New York—Interpublic Group of Cos. reports third-quarter gains of 5% in net income to $3.3 million and 8% in revenues to $156.2 million over the same period last year. The weakness of certain foreign operations combined with the strong dollar led to a 2% net income decline to $22.4 million for the January-through-September period, though net billings gains of $406 million helped boost revenues 5% to $485.1 million.

Esty stars for Texaco

White Plains, N.Y.—Texaco has assigned its account to William Esty Co., New York. Benton & Bowles resigned the account after agreeing to merge with Amoco Oil Co. agency D'Arcy MacManus Masius (AA, July 1). Texaco spent $24 million on advertising last year. Ross Roy/Colarossi still handles Texaco's industrial lubricants ads.

Vanderwarker to N.Y.

New York—Tony Vanderwarker, 42, has been named exec vp-director of creative services at Needham Harper Worldwide's division here. He succeeds Bob Cox, 48, who will head a new unit handling special accounts. Mr. Vanderwarker had been senior vp-group creative director at Needham's Chicago unit. He will report to Needham-New York president James Kuras; Mr. Cox will report to John Bradstock, president of Needham Harper International.

One-on-one vs. Santa

Beaverton, Ore.—Nike will break a new holiday-themed tv commercial early next month for Air Jordan basketball shoes. It features the product's namesake, Chicago Bulls guard Michael Jordan, playing one-on-one against Santa Claus. Chiat/Day, Los Angeles, handles.

JWT's first Lowenbrau ads

Milwaukee—Miller Brewing Co. on Nov. 1 breaks new creative for its Lowenbrau superpremium brand during NBC-TV's "Miami Vice" and "Friday Night Videos." The campaign is the first from J. Walter Thompson USA, Chicago, which succeeded Backer & Spielvogel, New York, on the $20 million account (AA, July 8).

EPB rides with Roy Rogers

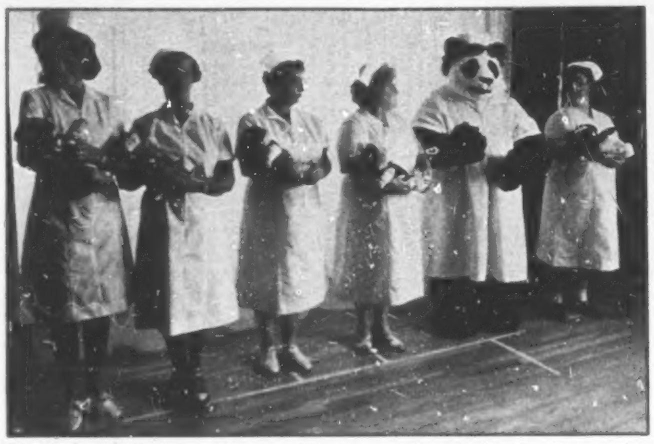
(Continued on Page 47)



That's a 70-lb. foam latex and fur-covered motorized suit covering actor Don McLeod, alias Peter Panda. Mr. McLeod shares center stage with attentive angels of mercy for the Child World commerical directed by Joe Standart. Mr. Standart made the transition from still to live photography with these ads.

Special effects panda-monium at Vogt's shop

By Judann Dagnoli

His light-brown hair darkened by perspiration, Don McLeod smiles and runs a paw over his dripping brow. "I used to be a Shakespearean actor before I slipped down the evolutionary ladder," he says.

Clad in a 70-lb., foam latex and fur-covered motorized panda suit, Mr. McLeod stars and swelters as Peter Panda, the silent spokesbear in local tv spots for Child World, the Avon, Mass.-based toy retailing chain.

The 6-ft. costume is the latest creation of San Francisco's McVey & Vogt, a fledgling production company formed by special-effects experts from Lucasfilm's Industrial Light & Magic unit.

Thanks to Mr. McLeod's skills as an actor and mime, and the last-minute attentions of Joseph Vogt, Tony McVey and Richard Snow of McVey & Vogt, Peter Panda was brought to life at 5 a.m. recently, shortly before filming began on a Child World commercial.

Mr. Vogt, 28, is director and creative impetus behind the special-effects group. Mr. McVey is a 32-year old sculptor who helped create characters in films such as "Gremlins," "Superman," "Dark Crystal" and "Star Trek II." Mr. Snow, 29, is a makeup artist and the mechanical wizard behind "Poltergeist II" and "Return of the Jedi."

"They've created just the image we're looking for," says Andy Mensing, copywriter, Schneider Parker Jakuc, Boston, the agency for Child World. "A benevolent panda with magical powers campaign."

Mr. Mensing, formerly of New York's Young & Rubicam, and Bill Monaghan, SPJ creative director and onetime BBDO employe, are pitting Peter Panda against Child World's competitor, Rochelle Park, N.J.-based Toys "R" Us and that company's mascot, Geoffrey the Giraffe.

Mr. McLeod had to cool down every 20 minutes; production company employes helped.

Since "toy companies operate on slim margins," Mr. Mensing says, special effects were almost ruled out until McVey & Vogt created a low-budget but fully technical panda with moving eyelids, mouth and ears. (In bidding for the project, it sent along a miniature panda that was so real "I spent hours talking to it," he says.)

The panda's eyes and ears are operated by remote control and considerable wiring, but the mouth and body movement is controlled by 37-year-old Mr. McLeod, who studied mime with Marcel Marceau and "never planned to be a special-effects actor" until he landed a role as a gorilla in a never-produced film in 1978.

More monkey business followed as he played a primate in "Trading Places," "The Man With Two Brains" and in ads for Proform, Atlas Van Lines, J.C. Penney Co. and American Tourister. The latter won two Clios.

He also is a proficient werewolf—as he demonstrated in "The Howling"—and will be appearing as a "top-secret Steven Spielberg creature who lives under the stairs" in an upcoming episode of "Steven Spielberg's Amazing Stories."

Peter Panda is another hot role for Mr. McLeod—the temperature rises to more than 130 degrees inside the costume—and a feather in the cap of McVey & Vogt. The special-effects company has amassed an impressive list of credits in its brief history, ranging from the American Cancer Society, Rick Springfield's video "Bop Till You Drop" and local advertising accounts including Kikkoman International and Prudential Insurance Cos. of America. In addition, the company will soon be filming a Missing

NBA practices full-court press in marketing

By Mark Bittman

Jon Spoelstra, vp-marketing for the National Basketball Assn.'s Portland Trail Blazers, Portland, Ore., has seen some enormous changes in the way the league promotes itself. "Seven years ago," he says, "league marketing meetings adjourned in an hour and we'd go drink beers by the swimming pool."

But as few as three or four years ago, the NBA's lack of marketing skills paled in importance to some of the league's other problems.

Some franchises were for sale and others were mismanaged. Players were threatening to strike, and public perception of the league was at an alltime low. Attendance was down, drug use among players was up, and, in a market bursting with network, syndicated and cable tv sports programing, tv ratings were so low that a national cable deal was worth a paltry $600,000.

Now, with WTBS paying $11 million for 55 NBA games, the league enters informal contract negotiations with CBS-TV, its traditional carrier, in its strongest position ever. Not only has the NBA set attendance records for two years in a row, but its tv ratings also are increasing at a time when televised sports generally are suffering.

> **"Our consistent theme is that . . . marketing has to take a priority over virtually everything else."**
>
> *—David J. Stern NBA*

In early 1984, the league avoided a players strike—one it might not have survived—by instituting the widely praised team salary cap. This has led to an environment in which even historically troubled franchises such as the Cleveland Cavaliers can begin making money and building solid basketball teams.

In addition, the league that year negotiated a drug agreement that requires players to undergo testing at the league's request. NBA commissioner David J. Stern calls the agreement, which has given basketball a squeaky-clean look, "the privately negotiated equivalent of a search warrant."

The salary cap and drug testing agreement led to positive press. Since 1983, new owners have taken over in Cleveland, Indianapolis and Kansas City (now the Sacramento Kings), Milwaukee, Chicago, Denver and Salt Lake City, and the league, under Mr. Stern's leadership, began to look more like a business and less like a collection of ego trips.

Furthermore, the marketing department, which just four years ago consisted of three people running what was essentially a primitive licensing operation, has become solid, innovative, profitable and helpful to the individual franchises.

The National Basketball Assn. sells ads in its **Hoop Basketball Yearbook** *and licenses products in its merchandise catalog.*

That's just what Mr. Stern and the New York-based NBA set out to do when he took over in February, 1984. "Our consistent theme," the commissioner says, "is that, after putting your best team on the court, marketing has to take a priority over virtually everything else."

While Mr. Stern was still the league's exec vp, he began to put that axiom into practice, hiring a consumer products marketing expert, Adrian De Groot, to run NBA Properties. "That was a big departure for the NBA; they brought in someone from Lever Brothers," Mr. Spoelstra says. "But it's proved to be a bright move."

NBA Properties now employs 30 people in three divisions: Retail licensing, marketing and entertainment. Revenues in NBA Properties' first year, the 1980-81 season, totaled $1.2 million; by 1984-85, that figure had risen nearly 400%, to $5.8 million. The league projects $7.5 million for the current season.

"The first thing Adrian set out to change was licensing," says Rick Welts, the NBA's vp-pr. "We didn't have quality merchandise, it was really scattered, and there was no way for a retailer to look for NBA merchandise."

Now the league has a field force representing the line, an over-all higher quality of merchandise spread among fewer licensees and a 100-page official merchandise catalog.

Although the Trail Blazers' income from the licensing operation isn't significant, Mr. Spoelstra says, "We like to see people wearing Blazers jackets of good quality."

The Blazers' over-all income is becoming more significant, however, as a result of the league's intense marketing effort—encompassing licensing, sponsorship and special event programs, media sales and NBA Entertainment in its video/publications group.

The NBA had five corporate sponsors four years ago, has 18 going into this season and expects to add six more this year, according to Mr. De Groot.

Among these are American Airlines, PepsiCo, American Motors Corp. and Allstate Insurance Group. Their involvement ranges from a simple "official" designation—like that of Canon USA's cameras—to an intense

Breeders' Cup
Breeders' Cup. A Runaway Winner.

The world of sports sponsorship is a lot like a horse race: There are no sure bets. But the Breeders' Cup, thoroughbred racing's $10 million championship day, has been a runaway winner for sponsors such as Mobil Oil Corporation, Anheuser-Busch, Inc., First Jersey Securities, Inc. and Joseph E. Seagram & Sons, Inc.

On Saturday, Nov. 2, the second running of the Breeders' Cup will be broadcast live by NBC Sports. See for yourself why this innovative event is the closest thing to a sure bet for your advertising and promotion dollar.

NBA

(Continued from Page 26)

symbiotic relationship like the one with Warner-Lambert's Schick razors.

The latter relationship has resulted in a tremendous advertising presence for the razor company and has created NBA events that otherwise might not have existed.

"Schick had been looking for a sports-oriented association," says Robert J. Grant, a Schick category director for Morris Plains, N.J.-based Warner-Lambert, "and saw basketball as having a greater skew toward our target audience than even baseball or football. We began our association with the NBA in 1983 and have been enormously pleased with the increase in attendance and the over-all handling."

The company is represented by Peter J. Kaplan, a principal in National Media Group/High Bar Productions, New York. After creating a remarkably successful three-on-three college intramural league—Schick Super Hoops—Mr. Kaplan suggested that Schick become the official blades and razor of the NBA.

"The big sell," Mr. Kaplan says, "was to convince Schick that the NBA was on the rise, with a new cast of characters, and that NBA Properties was suited to work with major corporations."

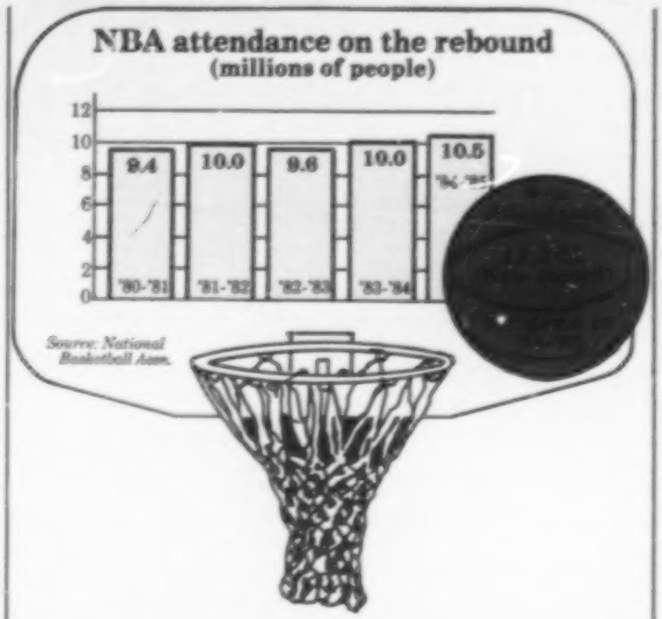
Schick took a one-year contract with the NBA during the 1983-84 season, renewed for a year in 1984-85 and recently signed on for the next two seasons.

"My company is doing close to 100 events for the NBA this year," Mr. Kaplan says. "It's almost like Schick has bought into stock that was near its low point and been with it during the rise."

To the extent that Schick has grown from a small sponsor to a major tv advertiser, the NBA has gained added leverage in CBS negotiations, which ultimately will show up as money for the individual teams.

Larry J. Fisher, the league's vp-media sales, also is seeking to boost the flow of revenue to the teams by providing representation in New York. He's on the hunt for national sponsors looking for local media buys in the 22 NBA cities. This worked with Beatrice Cos.' Fisher Nuts, a national sponsor that recently signed a contract with the Dallas Mavericks, according to Greg Jamison, the team's director-advertising and marketing.

"We've also helped advertisers who didn't want a national ad campaign to get in touch with the markets that they did want," Mr. Stern says. His idea of a cost-free media rep who potentially can sell 23 radio and tv markets "is a real breakthrough," Mr. Spoelstra says. "That is going to help the weaker teams, and it's even better because there's no commission." He says the league assistance should help teams expand their national advertiser lineup—traditionally limited to beer and car marketers—with smaller companies and products.



Mr. Spoelstra's Trail Blazers were pioneers in developing another angle in media sales that the league has helped popularize among other teams.

"Everyone used to sell 82 games to radio and 20 to television," Mr. Welts says. "But the Blazers began to pick their own stations and retain the rights, selling [to advertisers] a deal which includes signage in the arena, ads in the program, names on tickets and so on."

NBA Properties also has created an office to help teams share solid marketing ideas such as postgame concerts, toll-free numbers and the league's new program designed to cut down on drinking and driving, which began in Washington and will be in seven NBA cities this year. The program is co-sponsored by the U.S. Department of Transportation and CBS-TV.

The league's publishing and video groups further smooth the path between teams and sponsors.

Four years ago, for example, the NBA had a warehouse full of game films that no one knew what to do with. "That's all changed," Mr. Welts says. "The video production group is a going outfit which retrieves every game that's broadcast and is developing a complete library."

Despite its huge initial cost, the video group has become a profit center. Its 30-second vignettes have been used by sponsors including Schick and the U.S. Army; Quaker Oats' Gatorade and AMC are taking advantage of them as well.

Warner-Lambert's Schick razors began its relationship with the National Basketball Assn. in 1983.

Longer film clips are used by teams to upgrade the quality of their locally broadcast halftime shows.

The publishing group, which began as a league pr vehicle, also has become profitable; the NBA and its teams sell space in the official league magazine, *Hoop*, published eight times a year. The league even is making money on its calendar, including advertising in its 20 pages and packaging it as the *Hoop Basketball Yearbook*.

Speaking for the teams, Messrs. Spoelstra and Jamison both say they appreciate the way the league has changed in recent years. "The fact that they can sell national sponsorships on a leaguewide level," Mr. Jamison says, "gives more credibility to both leagues and teams."

"Now they're running the league the way a marketing company would run it," Mr. Spoelstra says. "It's not just scribbling notes on the back of an envelope anymore."

That's the way the commissioner wants it. "The whole marketing group at NBA Properties is geared to giving sponsors more exposure than a 30-second spot," Mr. Stern says. "And when the NBA does a positive job of marketing the league, it helps the clubs market themselves; attendance and tv ratings both go up."

With limited national tv exposure, he says, "We're offering sponsors much more exclusivity. We're focusing our product to make first the fans and then the sponsors recognize its value. We're fighting for a certain demographic, and our challenge for the next decade is to broaden that demographic; we owe that to the people who use the NBA as a vehicle and are in a position to do it."

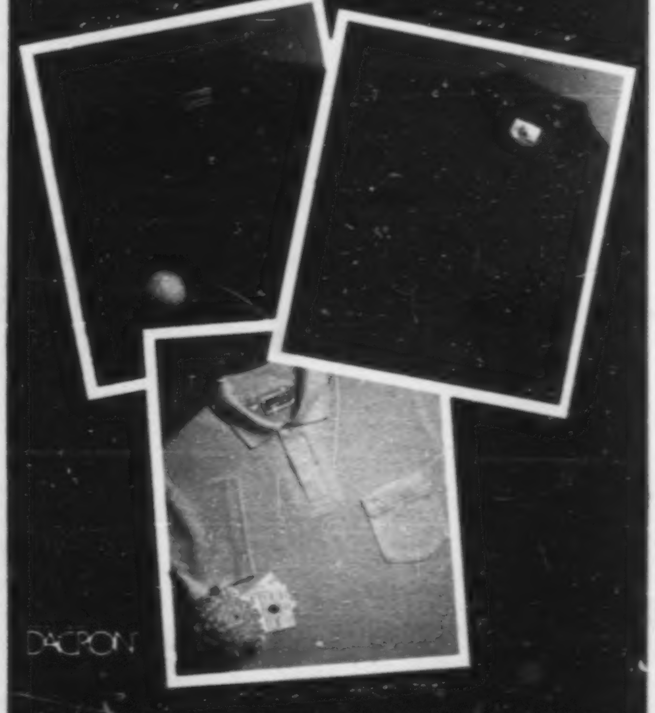
The NBA's demographics compare favorably to those of football and baseball if the advertiser is looking for young men at leisure. Simmons Market Research Bureau's 1985 statistics show that the most frequent attendees of NBA games are men, 25 to 34-year-olds, college graduates, singles and blacks.

But the league and its teams are seeking to increase the number of women interested in the game, and a recent Dallas Mavericks survey revealed an audience that was 30% female.

Meanwhile, Mr. Stern is looking at a broader audience. "We're comfortable marketing the third most popular sport in the U.S.," he says, "but overseas"—where basketball is the second most popular sport after soccer—"we have the advantage; and we're perceived as playing the highest caliber of basketball in the world."

Now that the league and its owners are taking care of business, coaches and players can concentrate on maintaining that reputation.

Focus on Quality with Hanes



Our commitment to excellence in color, comfort, styling and value provides a garment you can put your name on with confidence.
